1. Overview

1.1. Purpose of the Guide

The purpose of this guide is to explain how to use and how to configure the PeopleXD Learn platform which is an integration between PeopleXD and Access LMS.

This includes:

- How to access the Learn widget in CorePortal.
- How to view courses within Access LMS.
- How to configure CorePortal to be linked with Access LMS

 **Note:** This guide does not include full training on the Access LMS system.

1.2. What is the integration between PeopleXD and Access LMS?

PeopleXD Learn is an integration between PeopleXD and Access LMS. This is the LMS on offer as part of the PeopleXD product portfolio. The Learn widget displays the upcoming and incomplete courses that an employee has been assigned to. This gives the employee the ability to directly access the training courses within Access LMS to complete these from the widget.

The following is what is available as a result of this integration.

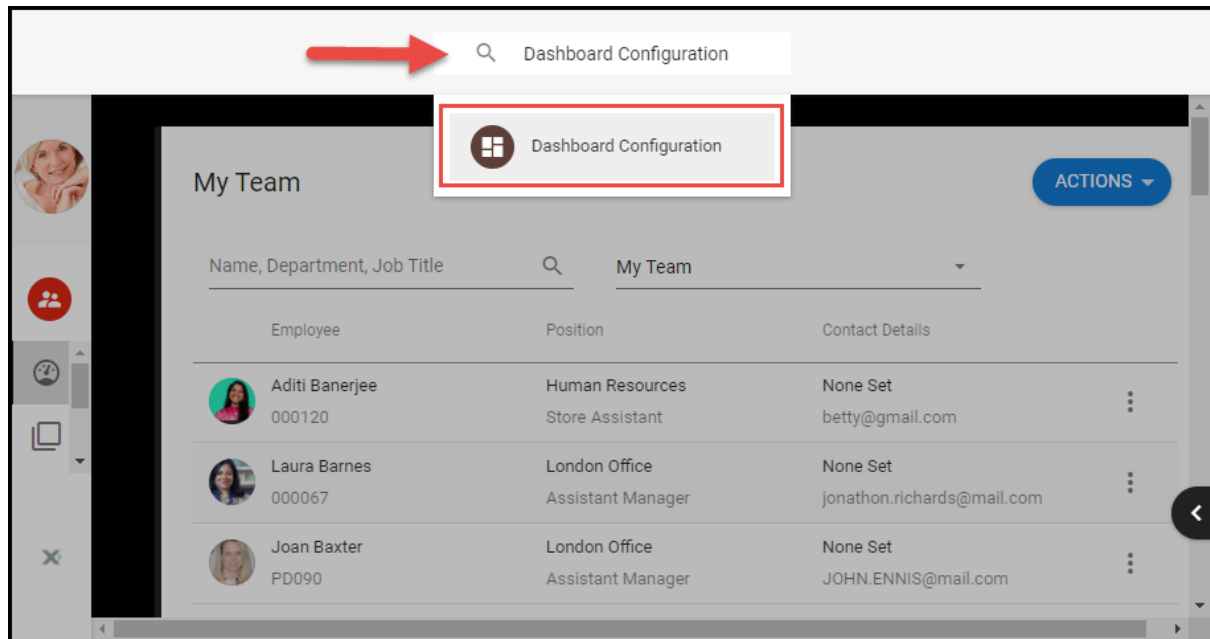

1. Automatic employee creation on Access LMS when created on PeopleXD.
2. Direct route to Access LMS via the Employee Dashboard.
3. Auto-assignment of courses on Access LMS based on the data stored on the employee record in PeopleXD.
4. Course completion data available to report on in PeopleXD via Insight.
5. Auto-mapping of certificates awarded on Access LMS to an employee's qualification record in PeopleXD.

2. How to configure

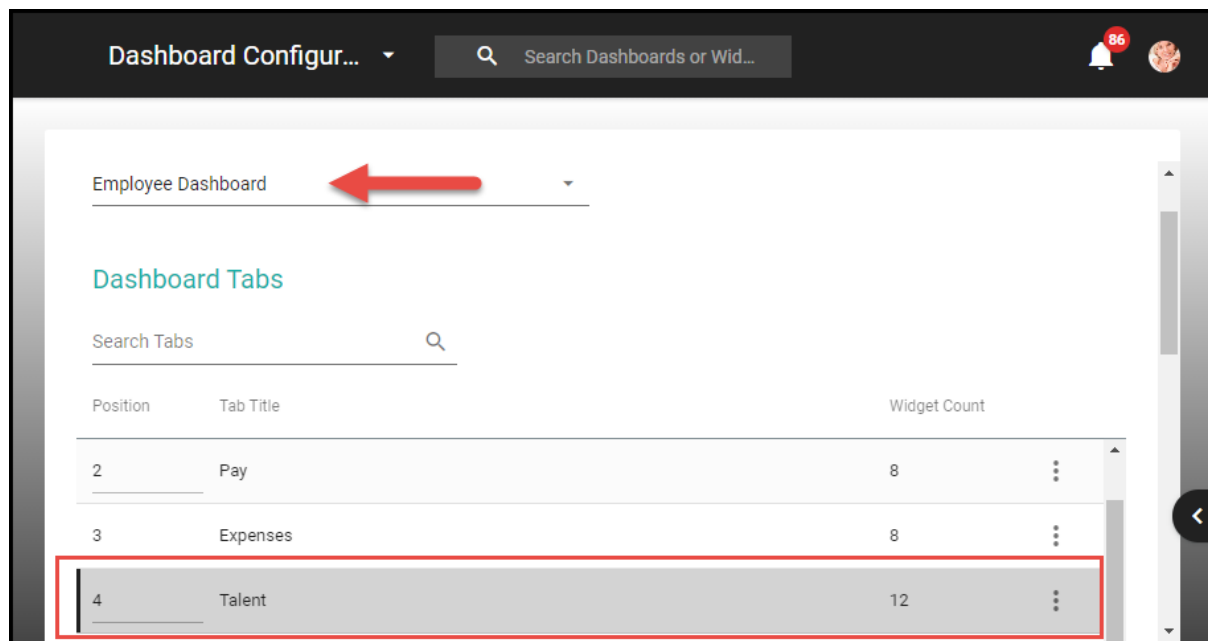

2.1. Setting up the Learn widget

The Learn widget only appears on the Employee dashboard and can be added to any tab within the Employee dashboard. To add this to tab:

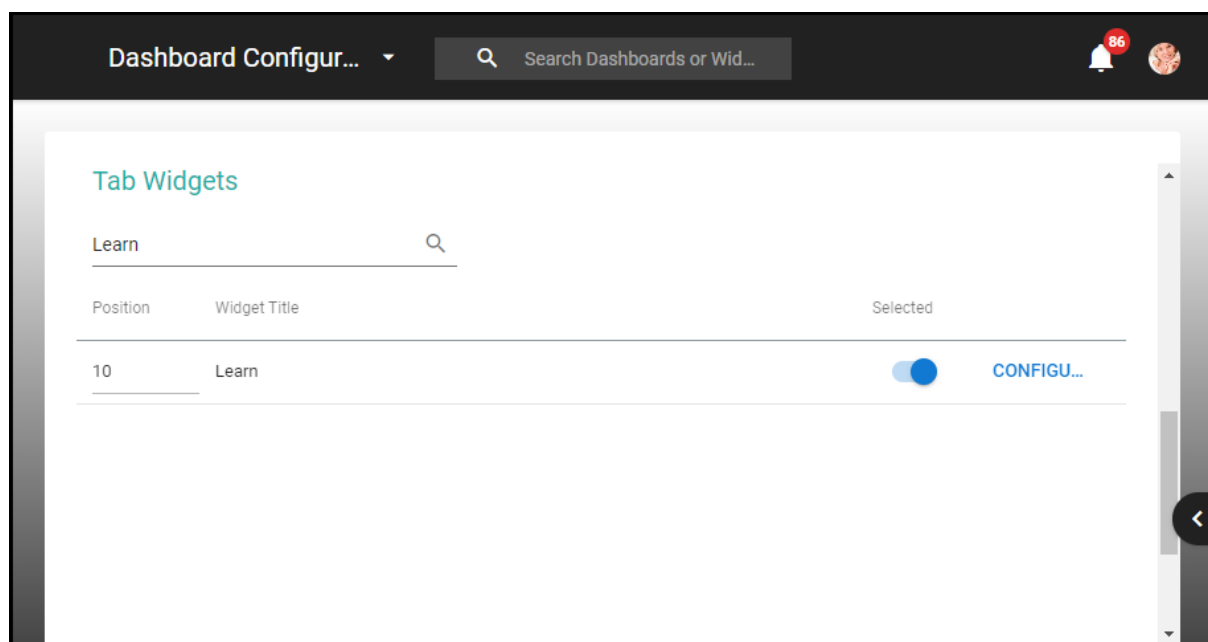

1. Quick Jump to Dashboard Configuration.

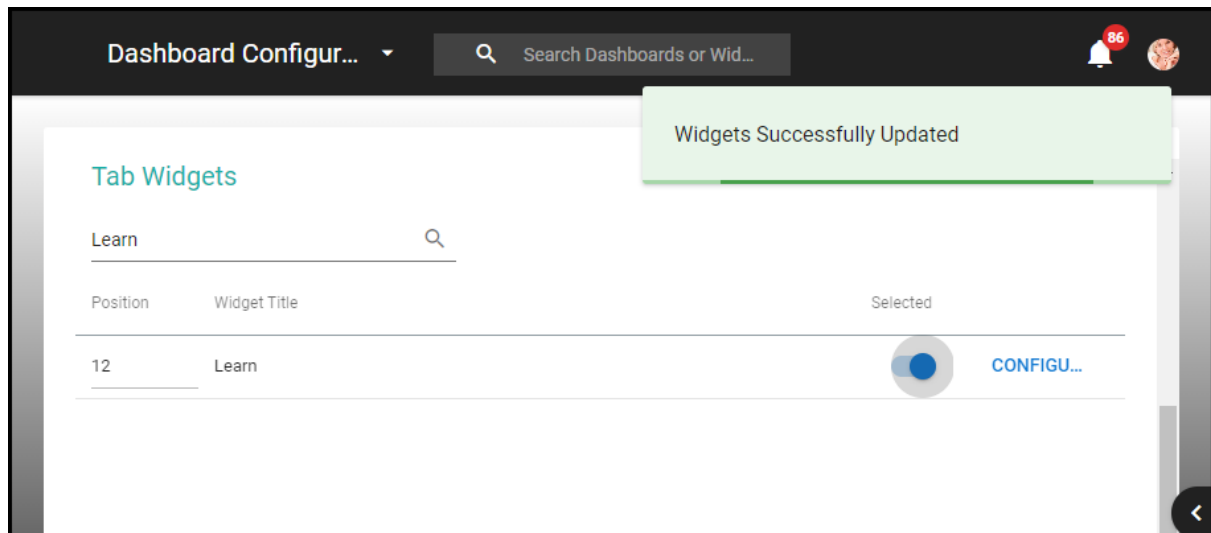

2. Select the Employee Dashboard.
3. Select the tab where the Learn widget is going to be added to.

4. Search for the Learn tab and enable the Selected indicator.

5. The widget has now been added to the appropriate tab on the Employee Dashboard.

2.2. Access to the Learn widget

The following menu option is needed to access the learn widget on the Employee Dashboard.

System	Menu Option	Description
CorePortal	Learn Widget	This enables access to the Learn widget on the Employee Dashboard.

3. How to use

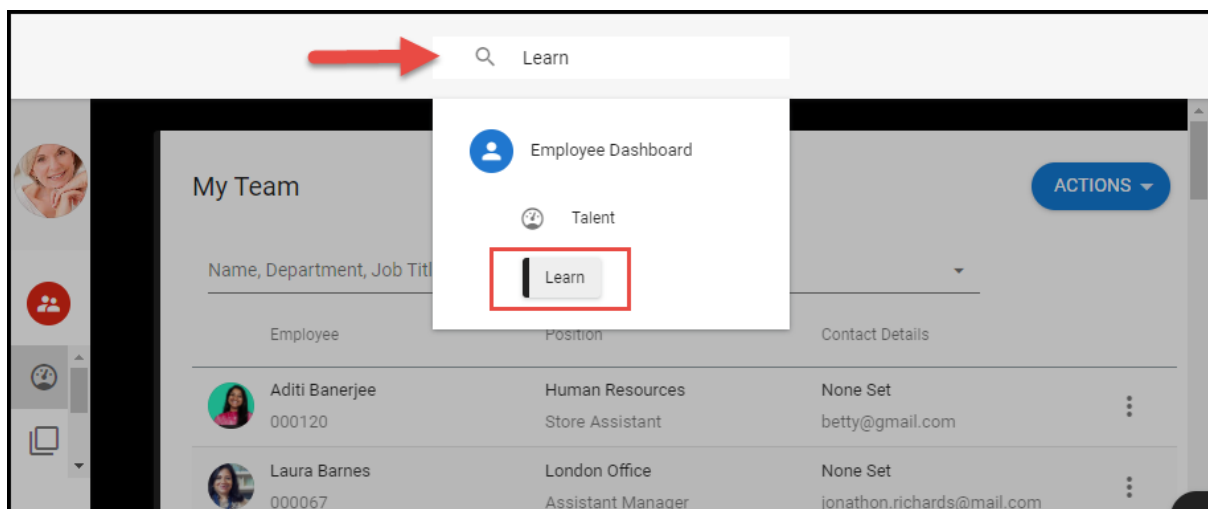

3.1. Learn widget

The Learn widget within PeopleXD is used to carry out the following actions:

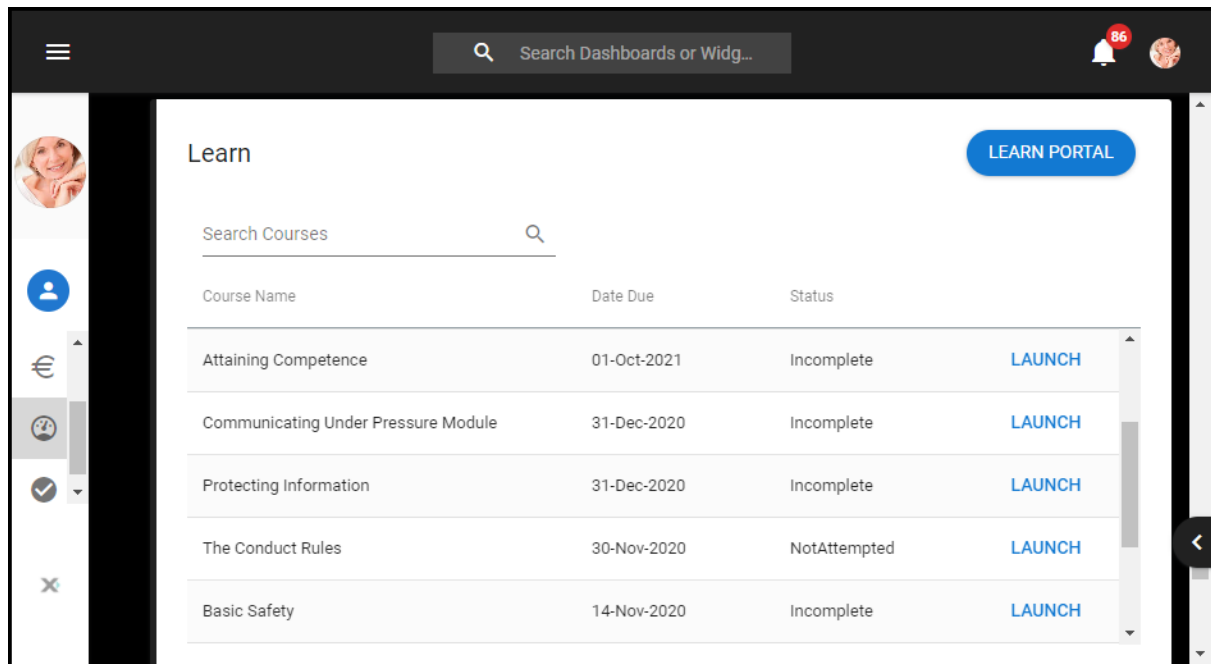

- Review any courses that are assigned to you on LMS that are *Incomplete* or *Not Attempted*.
- Jump directly to a course on the LMS.
- Launch the LMS.

To view the Learn widget, follow the below steps:

1. Quick jump to the Learn widget.

2. The Learn widget appears on screen.

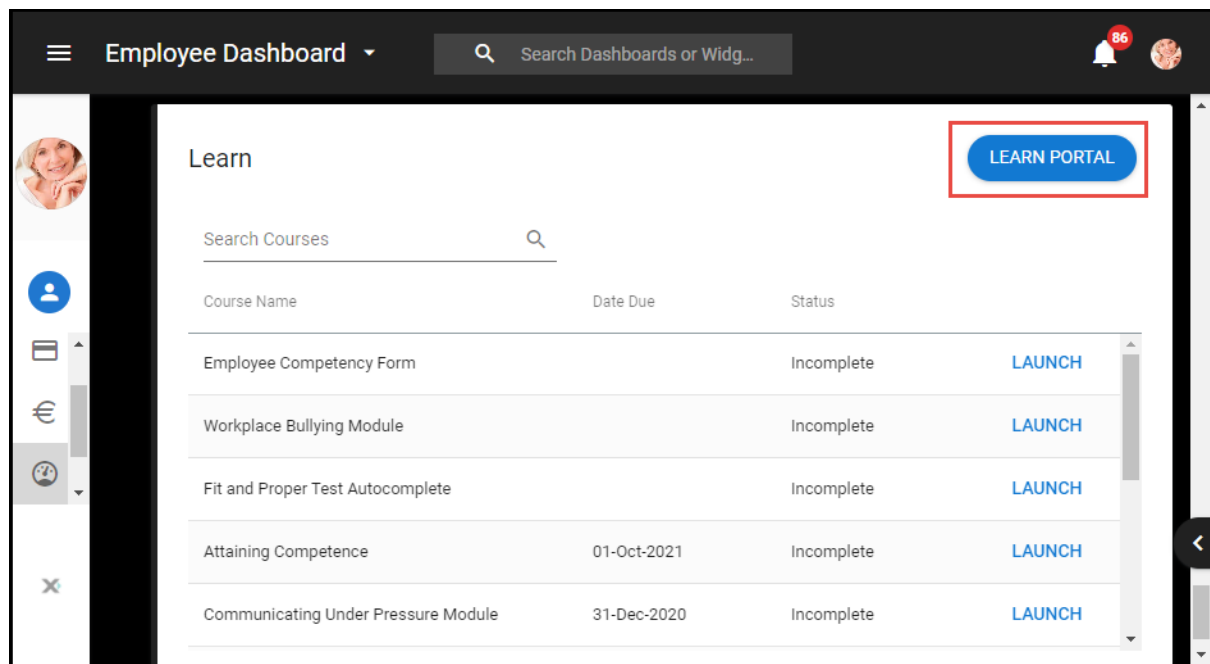

The following table highlights the items that can be seen on the widget.

Item	Description
Learn Portal	This brings you directly to Access LMS.
Search Courses	This allows you to search on all courses incomplete or not attempted courses.
Course Name	This shows the name of the course as it is on Access LMS.
Date Due	This shows the expected completion date of the course.
Status	The widget shows the following courses with the following statuses only: - Incomplete - Not Attempted
Launch	This brings the user directly into the course launch screen.

3.2. Learn Portal

To access the Learn Portal from PeopleXD, follow the below steps:

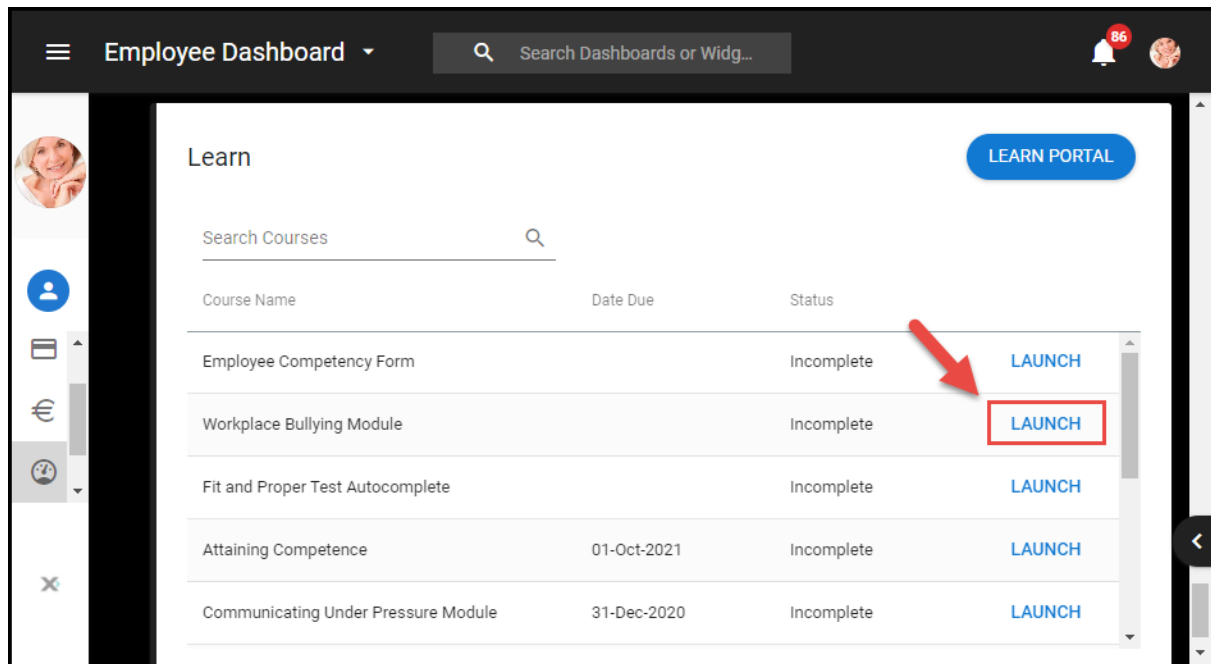

1. Click on the **Learn Portal** button on the *Learn* widget.

3.3. Launching a Course

To launch a course straight from the Learn widget, follow the below steps:

1. Click on the Launch button alongside the course listed on the Learn widget.

2. This brings you into the course content on the Learn platform directly.
 - a. The user is automatically logged in to the AccessLMS Home screen.

Note: When a course has been completed in the LMS it no longer appears on the Learn

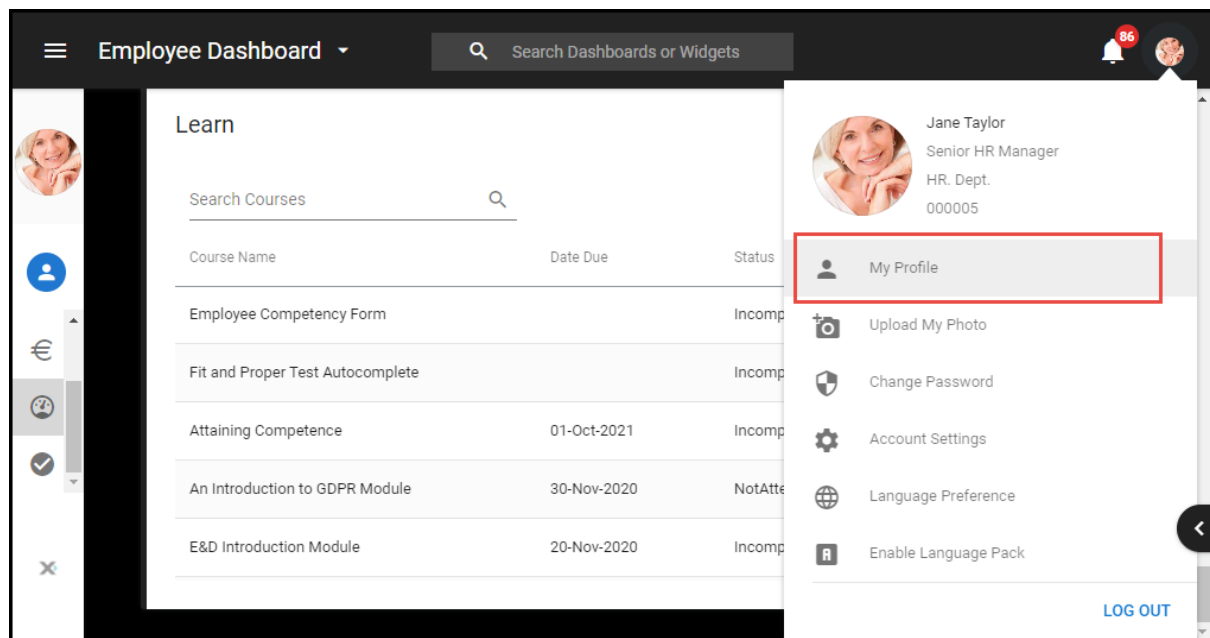

3.4. Viewing Employee Certificates in PeopleXD

To view an employee's certificates, these are saved into an employee's profile under Qualifications. This can be viewed either by the employee, their manager or by a HR administrator.

3.4.1. My Profile

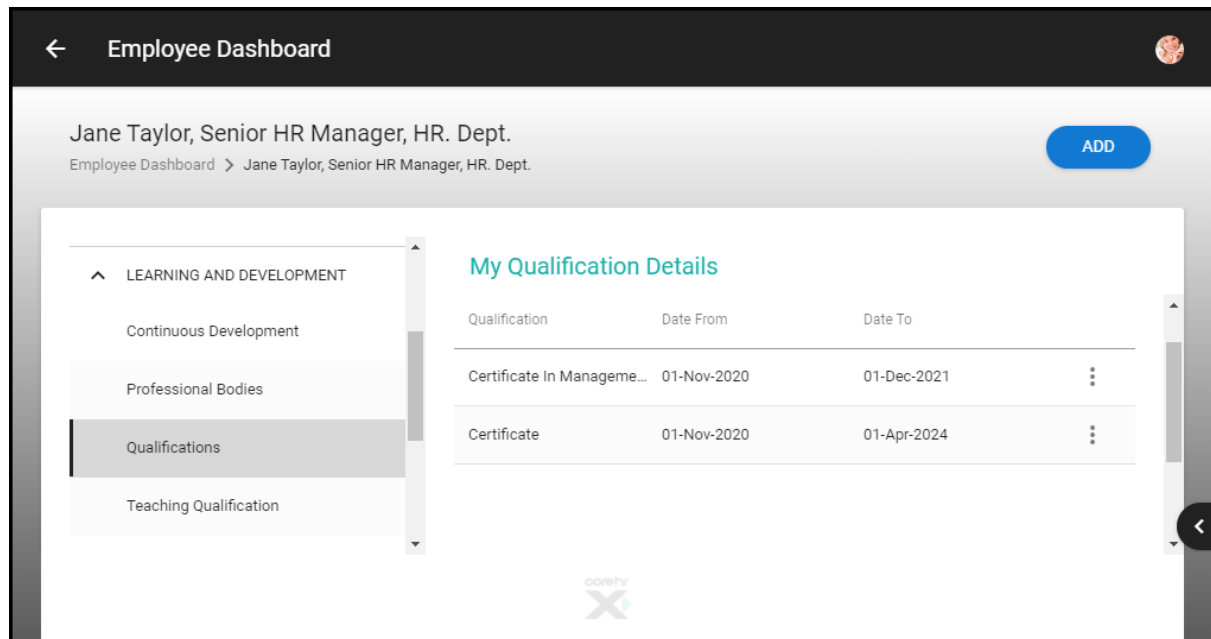

An employee can view the certificates awarded to them on the Access LMS on the My Profile section of CorePortal. To do this:

1. Go to the *My Profile* section of the employee record.

2. Click on the *Qualifications* section on the **Learning and Development** tab.

This shows the Certificates that have been awarded to the employee from the LMS.

3.4.2. Employee Personnel Profile

An employee's line manager and HR administrators can access all certificates that an employee has been awarded by going to the Personnel Profile on an employee's HR Dashboard

1. Go to the Employee's *HR Dashboard* record.
 - a. Accessed from the My Team widget on the Manager Dashboard.
 - b. Accessed from the Employee Search screen on People Management Dashboard.
2. Click on the **Actions** button and then the **Personnel Profile** option.

4. Integration Overview

4.1. Nightly Jobs

A nightly job runs between PeopleXD and Access LMS which reviews the following data and passes the relevant information through each system where required.

- New Starters
- Updates to Employee records including
 - Contract updates
 - Manager updates
- Leavers
- Rejoiners

Changes and updates are seen the next day on Access LMS after the job is completed on PeopleXD.

4.2. User Creation

After the nightly job has successfully been completed, the following accounts are created and updated on Access LMS.

1. Each new starter on PeopleXD is created on Access LMS with a standard User account.
2. Each Manager who has been assigned the Reports To org role on PeopleXD is automatically given line manager access.

 **Note:** Admin accounts not created via nightly job, as this is manual task to be completed on Access LMS.

4.3. XD Data Passed to Access LMS

The following items are passed from PeopleXD to Access LMS via the nightly job.

Field No.	Field
1	Forename
2	Surname
3	Email Address
4	XD Personnel No
5	Date of Birth
6	Job Title
7	Reports to Manager
8	Structure Level 1 - 5 Levels 1 - 5 can be any of the organisational attributes defined on the employee's contract.

Note: The mapping of PeopleXD structure levels is defined when the integration is activated during initial configuration.

4.4. Access LMS Data Passed to XD

The following items are passed back from Access LMS to PeopleXD. These details are stored within the employee profile under the qualifications section.

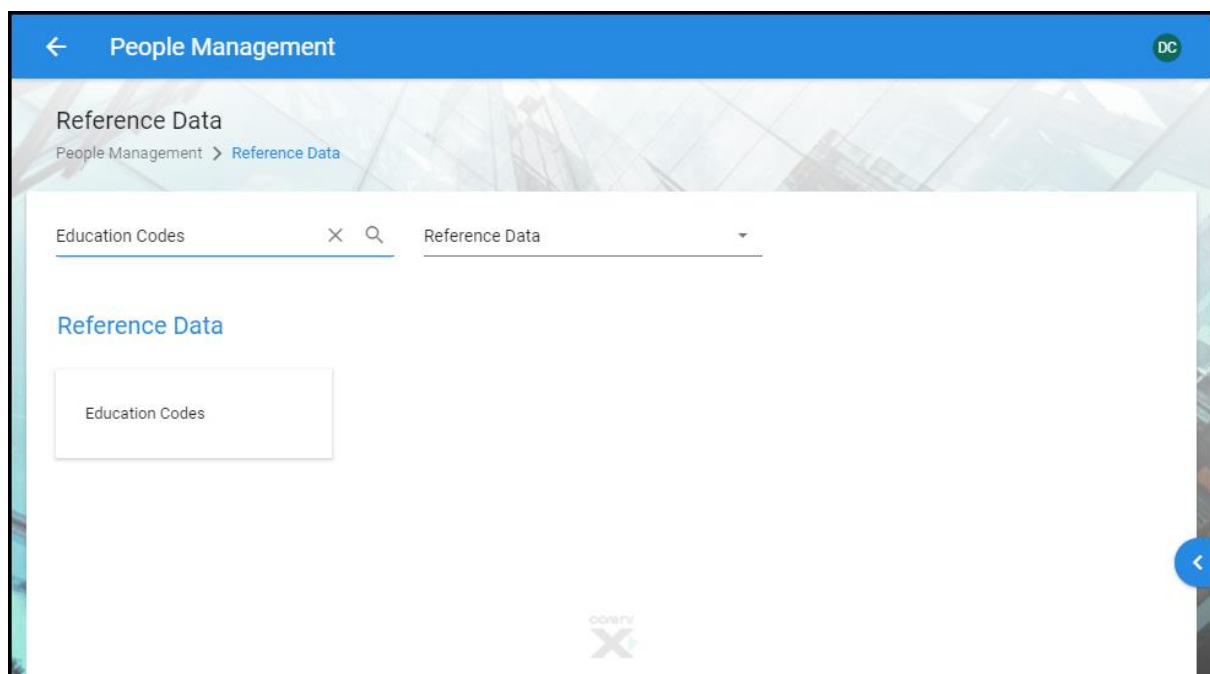

4.4.1. Widget Data

The data on the Learn widget on the Employee dashboard is real-time data which is automatically updated based on the data on the Access LMS and when a course is updated and completed by a user.

4.4.2. Certificates and Education Code Data

PeopleXD retrieves Certificate data from Access LMS and stores it as a Qualification record on the system. PeopleXD checks the Education Code reference items and creates a new Reference data for the certificate on PeopleXD if needed.

The reference data that is created and used for these certificates can be accessed using the Education Code Reference Data option on the People Management dashboard:

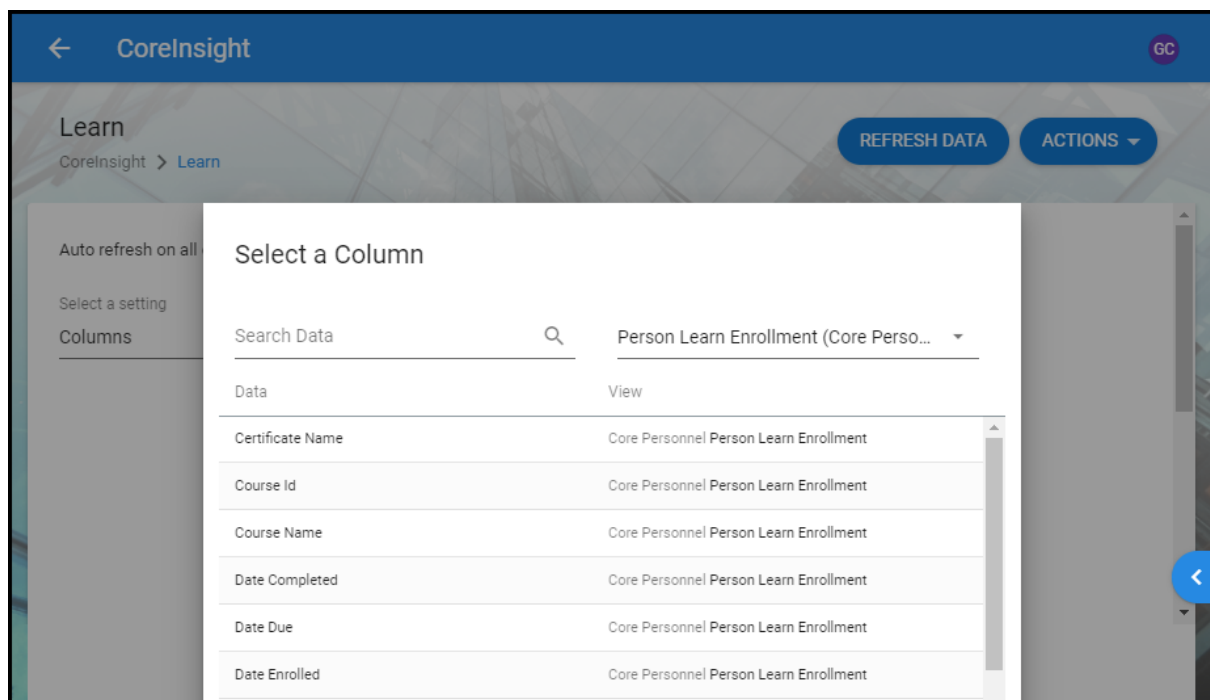

4.4.3. Reporting Data

Training history data that is used for reporting purposes (see [section 5. Reporting](#)) is maintained as part of the nightly feed that passes data from Access LMS to PeopleXD. Included here is information on assigned courses, completed courses etc.

5. Reporting

The following business area is available to create, and view reports of data taken from the LMS and stored on PeopleXD. It can be used to run a straight report based on the employee's training history or it can be built in conjunction with other business areas with XD.

Business Area	View
CorePersonnel	Person Learn Enrollment

The following list shows the information that can be reported on using this view.

- Certificate Name
- Course ID
- Course Name
- Date Completed
- Date Due
- Date Enrolled
- Date Last Accessed
- Date Started
- Percentage Complete
- Person Reference
