Version	Date	Author	Details
1.0	04/09/2019	Keith Pentelow	Published to Customer Success Portal
1.1	19/03/2024	Georga Edwards	QOL update to v28
1.2	04/03/2025	Georga Edwards	Added section 3.3 Data Source Config to add Known As name to Generate Letter screen.

1. Overview

The *Document and Email Generation* feature on PeopleXD allows a user to automatically generate documents / letters / emails based on employee data e.g. employee contracts, letters of offer, hr forms etc.

This feature is primarily available to users in HR Admin and Recruitment Admin.

Pre-configured templates are created and stored centrally on the system. A user can generate a version of this document (MS Word or PDF) which may be populated automatically using data held for employees in HR Admin and applicants & interview panel members in Recruitment. It is possible to generate an individual document per record, or multiple versions of the same document for multiple records. Once a document has been generated, there is an option for this to be automatically stored on the system against an employee's record, for future reference.

The main users of this feature will be:

- **HR & Recruitment Administrators**
 - To create and manage document and email templates.
 - To generate relevant documents and emails.
 - To upload documents to employee records.
- **Managers**
 - To generate documents for an employee (if designated access).
 - To review documents for employees on their team.
- **Employees**
 - To review documents stored against their record.

The purpose of this guide is to provide guidance on:

- Where to access Documents and Email templates.
- How to generate and review documents or emails.
- How to configure, create and manage templates.

2. Manage Documents and Emails

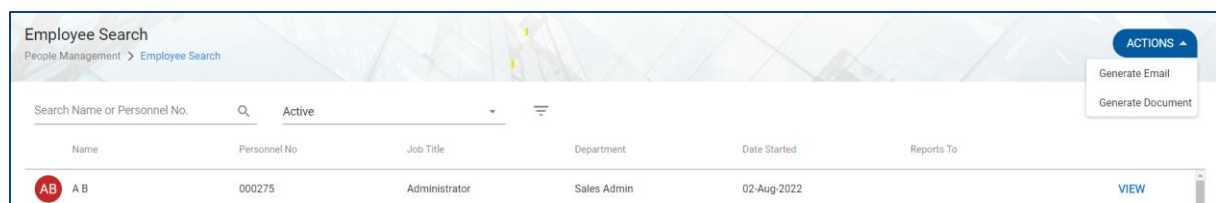

2.1. Where are Documents & Emails Generated?

Documents and Emails can be generated from the **Actions** menu of various People Management & Recruitment screens. Access to this functionality is based on user security and the options will not appear to a user if they have not been granted the relevant Menu Profile access.

The following screens have access to the functionality, if granted:

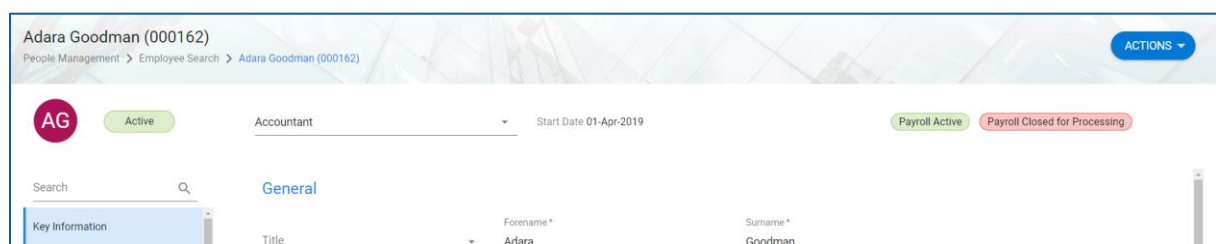

1. Employee Search

People Management Dashboard > Employees

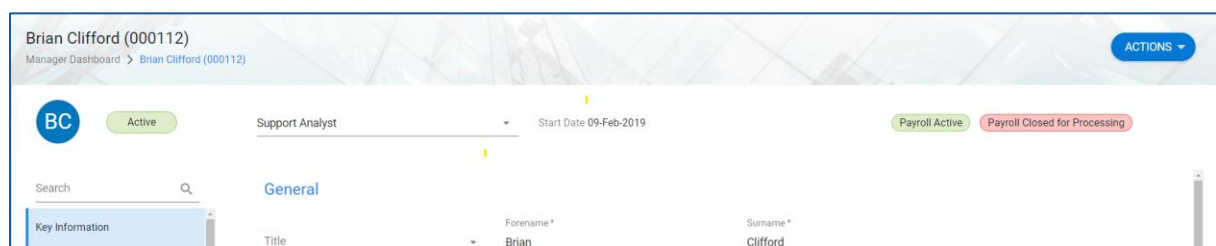

2. Employee Dashboard

People Management Dashboard > Employees > Employee Dashboard

Manager Dashboard > My Team Widget > Employee > HR Dashboard

3. View Applicants

Recruitment Dashboard > Vacancies > View Applicants

2.2. Generate Document

The *Generate Document* screen allows you to select the relevant document to be sent, determine how it is going to be sent and what the output type of the document will be and who will be the recipients of the document.

To Access the Generate Document screen:

1. Navigate to the required screen.
2. From the Actions menu, select **Generate Document**.
 - The Generate Document screen will display.

The **Generate Documents** screen displays the following fields:

Option	Details
Template Group	This is an optional field. If your organisation is using Template Groups to manage your Templates, select the relevant template group from the dropdown options. This will refine the list of document templates available to select.
Document Template	This will display a list of all document templates that have been linked to the chosen screen. A template with restricted access will only appear if the user is a member of the restricted access groups.
Generate Options	There are two options to choose from here: Generate and View: This is the default setting. The document will generate and be available to retrieve in the <i>Download Centre</i>. The user will get a notification in the <i>Notification Centre</i> to alert them when this is ready to review.

Option	Details
	A single document pack will be generated containing a copy of the document for each employee/applicant/record selected. For example, if generated for multiple employees, one file will contain a copy of each document per record. Documents generated in this way will not be automatically uploaded to the employee's record. Generate and Upload: This option is only available on the drop-down list if a <i>Document Type</i> has been configured for the template. This will generate an individual document file per employee/applicant/record selected and these files will be automatically uploaded to their record. Documents generated in this way will not appear in the Download Centre.
Output Type	This indicates the file type that the generated document will be. This will default to 'Word' and may be updated to PDF. However, this may already default to 'PDF' if it has been configured to do so on the template.
Recipients	For a majority of the screens, once the document is selected, a list of the related users will display. You can then select one, many or all users from the list. An individual version of the document will be generated for the user(s) selected.  Note: To make an employee's Known As name available to search, see section 3.3 Data Source Config. Variations to this are: Employee Search, as initially this screen uses a Filter window to select the users for whom the document will be generated, this will

Option	Details
	then display all users that meet the filter criteria. You can then follow the process as above. Employee Dashboard, the records displayed here will reflect the record select in the contract list of the Employee Dashboard, before the Generate button was selected. If the selected contract has had a number of amendments, then a row will display for each amendment.

2.2.1. Generate a Document

To generate a document:

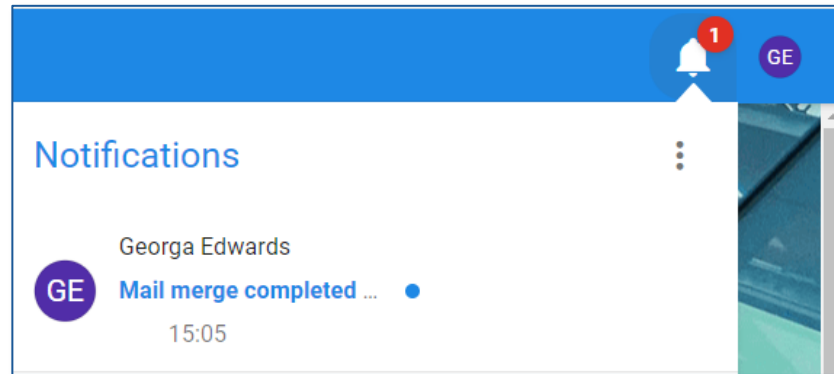

1. Navigate to the required screen.
2. From the Actions menu, select **Generate Document**.
 - The Generate Document screen will display.
3. If using **Template Groups**, select the required template group from the dropdown options.
 - This will refine the document template options.
4. Select the relevant **Document Template**, from the dropdown options.
 - This will display a list of all templates that have been linked to the chosen screen.
 - A template with restricted access will only appear if the user is a member of the restricted access groups.
5. A list of recipients will display.
 - This may vary depending on the screen selected, see table above for details.
6. Use the **Select** toggle to select one, many or all users from the list.
7. Select the relevant **Generate Option**.
8. Finally, select the **Output Type**.
9. Once happy, click **Generate**.
10. An individual version of the document will be generated for the user(s) selected.

2.2.2. Retrieving a Document

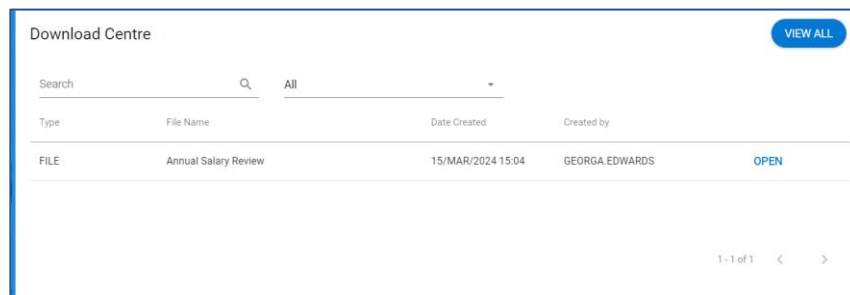

Where a document may be retrieved is dependent on *Generate Option* selected when generating the document.

If **Generate and View** was selected:

- The documents will be available in the *Download Centre widget*. This may be configured on the Manager, People Management or Recruitment Dashboard as required.
- The user will be notified via the *Notification Centre* when a document has been generated and is available to review.

- The document will be listed in the Download Centre / Reports Centre:

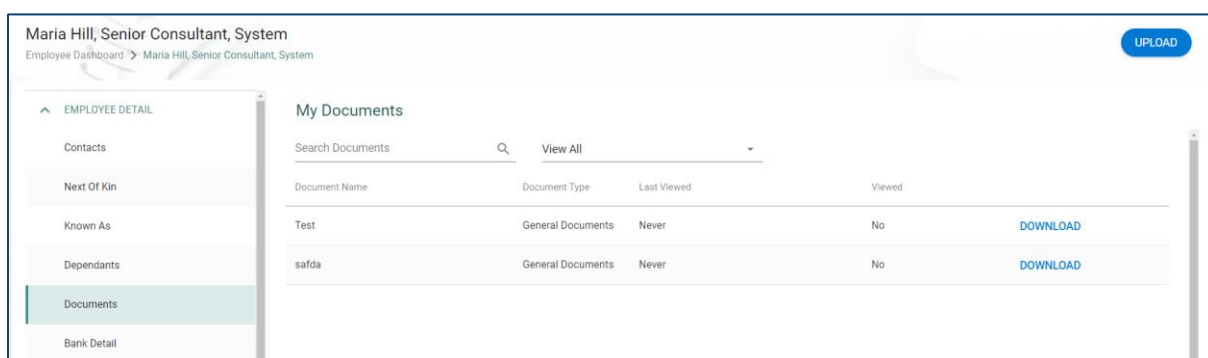

- Click the **Download** button to download a copy of the document.
 - If this document was created for more than 1 record, this single file will include an individual copy of the document template for each record selected.
 - Records here are user specific i.e. user only sees documents they have generated.
 - By default documents, will be cleared down after 5 days.
 - This is a configurable setting. Please see [Report Centre Document Cleardown](#) for further details on how to manage this.

If **Generate and Upload** was selected:

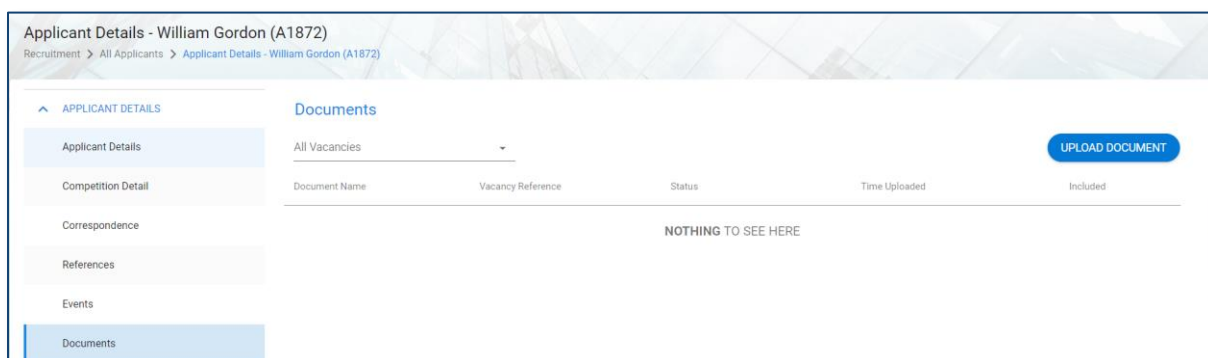

PeopleXD: Document & Email Generation

- The individual document will be available to view against the individual Employee or Applicant record.
- The user will be notified via the Notification Centre when a document has been generated and is available to review.
- **Employee Record**
 - Documents generated from the Employee Dashboard or Employee Search screens will be available to view on the Employee Profile > Employee Details > Documents screen.

Note: Documents that appear here will appear to all users who have access to the Employee Profile screen, including Managers and Employees. It is important to ensure that user access is managed per 'Document Type' if further restrictions are required. Please see [Document Types](#) for further details.

- **Applicant Record**
 - Documents generated from the View Applicants or Assign Applicants screens will be available to view on the Applicant Details > Documents screen.

2.3. Generate Email

The *Generate Email* screen allows you to select the relevant email, and who will be the recipients of the email.

To Access the Generate Email screen:

1. Navigate to the required screen.
2. From the Actions menu, select **Generate Email**.
 - The Generate Email screen will display.

GENERATE

The **Generate Email** screen displays the following fields:

Option	Details
Template Group	This is an optional field. If your organisation is using Template Groups to manage your Templates, select the relevant template group from the dropdown options. This will refine the list of email templates available to select.
Email Template	This will display a list of all email templates that have been linked to the chosen screen. A template with restricted access will only appear if the user is a member of the restricted access groups.

Option	Details
Recipients	For a majority of the screens, once the email is selected, a list of the related users will display. You can then select one, many or all users from the list. An individual version of the email will be generated for the user(s) selected. Variations to this are: Employee Search, as initially this screen uses a Filter window to select the users for whom the document will be generated, this will then display all users that meet the filter criteria. You can then follow the process as above. Employee Dashboard, the records displayed here will reflect the record select in the contract list of the Employee Dashboard, before the Generate button was selected. If the selected contract has had a number of amendments, then a row will display for each amendment.

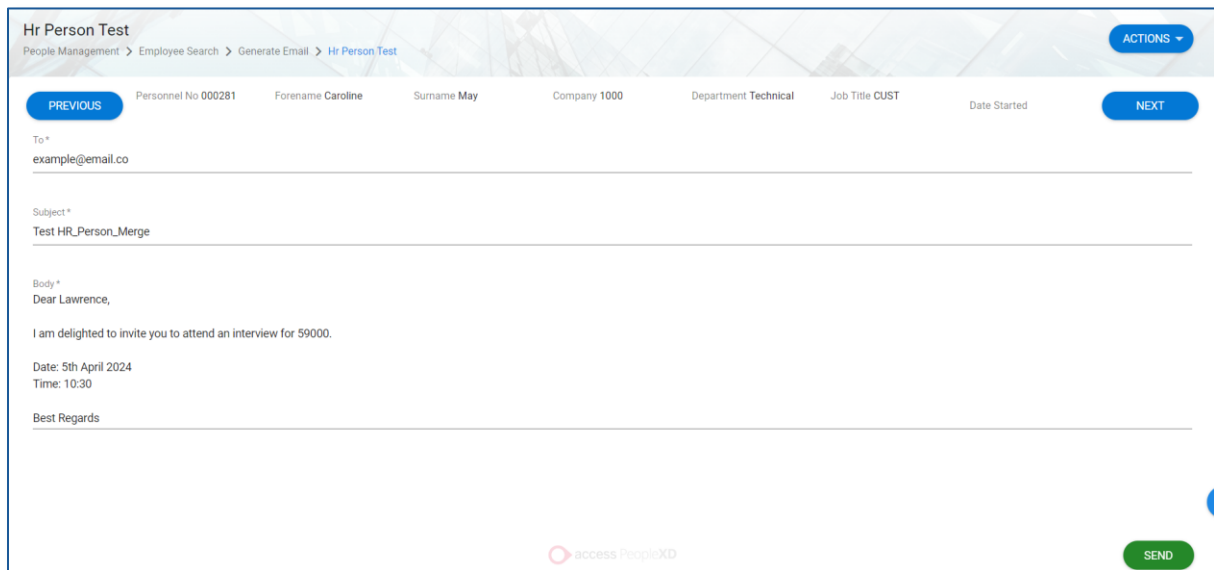

To generate an email:

1. Navigate to the required screen.
2. Expand *Actions* and select **Generate Email**.
3. Select an **Email Template**.
4. Enable the **Select toggle**, for all users you wish to receive the email.
 - Select All can be used to capture larger numbers of recipients.
5. Click **Generate** to generate the email for the chosen record(s).
6. All emails generated will be previewed to the user.
 - If more than one email is included, use **Next/Previous** to navigate between individual emails.
 - The email can be updated here, if required. Once an edit had been made to the email, the *Send* button will update to *Save*. Click **Save** to capture changes.
 - Changes made will only be saved for the current email.
7. Documents can be attached, this is optional.
8. Expand *Actions* and select **Attach** or **Attach to All**, as required.
 - This allows the user to browse for the attachment and upload.
9. Once happy with your email, click **Send**.

- This will only send the email currently being previewed. This email will be sent and cleared from the preview, while all other emails remain unsent.
- Once an email has been sent, the Send button will update to **Resend**.

10. If more than one email is included, expand *Actions* and select **Send All Emails**, to send all emails in one action.

- If any other emails have been sent individually before this button is clicked, they will not be resent as part of this action.

The screenshot shows the 'Hr Person Test' interface for generating an email. At the top, there's a breadcrumb trail: 'People Management > Employee Search > Generate Email > Hr Person Test'. A blue 'ACTIONS' dropdown button is in the top right. Below the breadcrumb, a row of fields contains: 'Personnel No 000281', 'Forename Caroline', 'Surname May', 'Company 1000', 'Department Technical', 'Job Title CUST', and 'Date Started'. Navigation buttons 'PREVIOUS' and 'NEXT' are on either side. The email form fields are: 'To*' with 'example@email.co', 'Subject*' with 'Test HR_Person_Merge', and 'Body*' with the text: 'Dear Lawrence, I am delighted to invite you to attend an interview for 59000. Date: 5th April 2024 Time: 10:30 Best Regards'. A 'SEND' button is at the bottom right. A 'access PeopleXD' watermark is visible at the bottom center.

2.4. Manage Documents

Document Management is a facility that allows for documents to be stored against and Employee or an Applicant record.

- Documents for Employees are available to review on the **Employee Profile > Documents** screen or via the **Employee Dashboard > Files**.
- Documents for Applicants are available to review on the **Applicant Details > Documents** screen.

These screens may be accessed by HR Admins, Recruitment Admins, Managers or Employees. Therefore, an additional level of access is required to view specific 'Document Types' that are stored e.g. a user may have access to the 'Documents' screen but may only be able to view documents linked to the 'Contracts' document type but not the 'Disciplinary' document types.

PeopleXD: Document & Email Generation

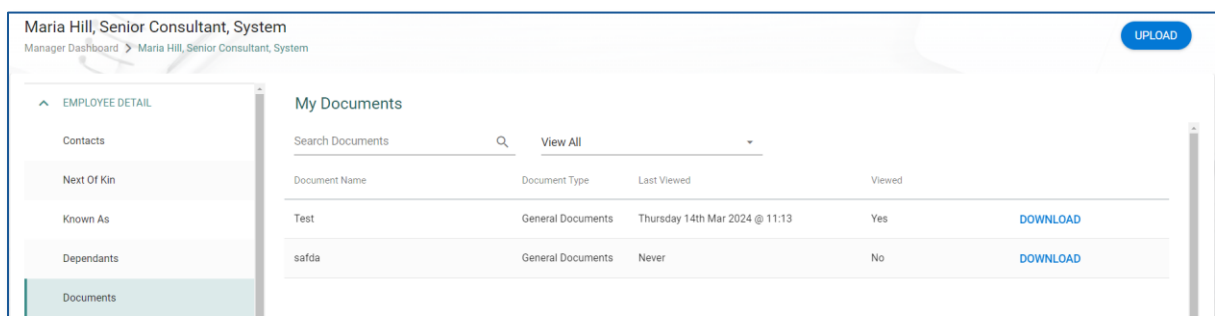

Documents that have been generated on the system for an employee or applicant may be automatically stored against their record.

A user may also have the option to directly upload a file against the employee's record i.e. independent of the document generation functionality.

2.4.1. View Document

To view a document for an employee on either the *Employee Profile* or *Applicant Details* screen:

- Navigate to Documents.
- Click **Download**.

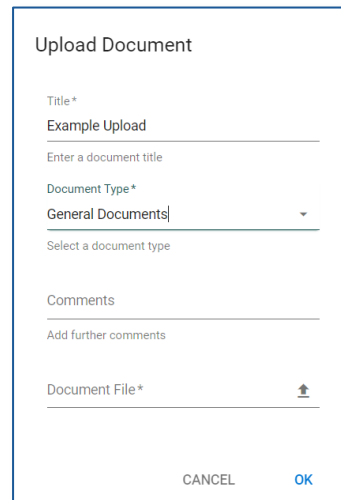

The Last Viewed and Viewed columns will update for the file to reflect the user that viewed the document last and the date and time that it was downloaded.

2.4.2. Upload Document

You can upload a document for an employee/applicant on the *Employee Profile*, *Employee Dashboard* or *Applicant Details* screen. To do this:

From an Employee Profile:

1. Navigate to **Documents**.
2. Click **Upload**.
3. Give your document a **Title**.
4. Select a **Document Type**, from the dropdown menu.
5. Add **Comments**, if required.
6. **Upload** your file.
7. Click **OK**.
8. The document will display.

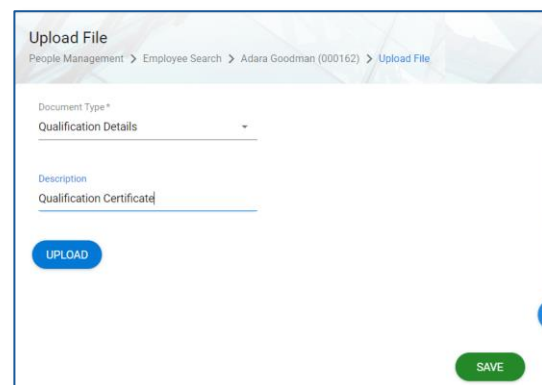

The 'Upload Document' modal form contains the following fields and controls:

- Title***: A text input field with the placeholder text 'Example Upload' and a subtext 'Enter a document title'.
- Document Type***: A dropdown menu with 'General Documents' selected and a subtext 'Select a document type'.
- Comments**: A text input field with the placeholder text 'Add further comments'.
- Document File***: A file upload control with a subtext 'Document File*' and an upload icon.
- Buttons**: 'CANCEL' and 'OK' buttons at the bottom right.

From the Employee Dashboard:

1. From the *People Management Dashboard* select **Command Centre**.
2. **View** Employees.
3. Search for the employee, click **View**.
4. Navigate to **Files**.
5. Click **Add**.
6. Select a **Document Type**, from the dropdown menu.
7. Add a **Description**, if required.
8. Click **Upload**
9. Browser or drag & drop your file to upload.
10. Click **OK**.
11. The document will display.

The 'Upload File' form is part of a larger interface with the following elements:

- Breadcrumbs**: 'People Management > Employee Search > Adara Goodman (000162) > Upload File'.
- Document Type***: A dropdown menu with 'Qualification Details' selected.
- Description**: A text input field with the placeholder text 'Qualification Certificate'.
- Buttons**: A blue 'UPLOAD' button and a green 'SAVE' button.

From the Applicant Details screen:

1. Navigate to **Documents**.
2. Click **Upload Document**.
3. Select a **Document Type**, from the dropdown menu.
4. Select a **Vacancy**, from the dropdown menu.
5. Add a **Description**.
6. Add **Comments**, if required.
7. Enable the Include in application form, if required.
8. **Upload** your file.
9. Click **OK**.
10. The document will display.

The 'Upload Applicant Documents' modal form contains the following fields and controls:

- Document Type***: A dropdown menu with 'CV' selected.
- Vacancy***: A dropdown menu with 'Budget Administrator' selected.
- Description**: A text input field containing 'CV for Budget Admin role'.
- Comments**: A text input field.
- Include in application form**: A toggle switch that is currently turned on (blue).
- File to Upload***: A button with a plus icon to select a file.
- CANCEL** and **OK** buttons at the bottom right.

2.4.3. Delete Document

Available only on the *Applicant Details* screen.

To delete a document:

1. Navigate to **Documents** or **Files**.
2. Expand the document 3-dot menu, select **Delete**.

The screenshot shows the 'Applicant Details - Lucy Black (A1873)' screen. The left sidebar has a menu with 'APPLICANT DETAILS' (expanded) and 'DIVERSITY DETAILS'. Under 'APPLICANT DETAILS', there are links for 'Applicant Details', 'Competition Detail', 'Correspondence', 'References', 'Events', and 'Documents' (selected). The main content area is titled 'Documents' and shows a table of documents. A blue 'UPLOAD DOCUMENT' button is in the top right. The table has columns: Document Name, Vacancy Reference, Status, Time Uploaded, and Included. Two documents are listed:

Document Name	Vacancy Reference	Status	Time Uploaded	Included
CV for Budget Admin role 37.8 KB	Budget Administrator 001384	Appointment Accepted	14-Mar-2024 11:45 Georga Edwards	Yes
Supporting References 146.4 KB	Budget Administrator 001384	Appointment Accepted	15-Jan-2019 10:59 Alice Jones	Yes

Each document row has a 3-dot menu icon to its right. The menu for the 'Supporting References' document is open, showing 'View' and 'Delete' options.

3. Confirm the warning message.
4. The document will be removed from the applicants record.

2.5. Download Centre

The *Download Centre* widget is required to access documents that have been generated using the Generate and View option only.

This widget may be used by HR, Recruitment or Managers, depending on how the Document & Email Generation feature is shared in the organisation. As such, based on an organisation's requirements, this widget may be added to the following dashboards, to support this feature:

- People Management Dashboard
- Manager Dashboard
- Recruitment Dashboard

To add the *Download Centre* widget to a dashboard:

1. Navigate to **Dashboard Configuration**.
2. Select a **Dashboard** e.g. Manager Dashboard.
3. Select a **Tab** e.g. Dashboard.
4. Search for the widget i.e. Download Centre.
5. Flag this as the **Selected**.
6. Changes will save automatically.

Repeat the above steps to add the widget to all required dashboards.

2.6. Report Centre Document Cleardown

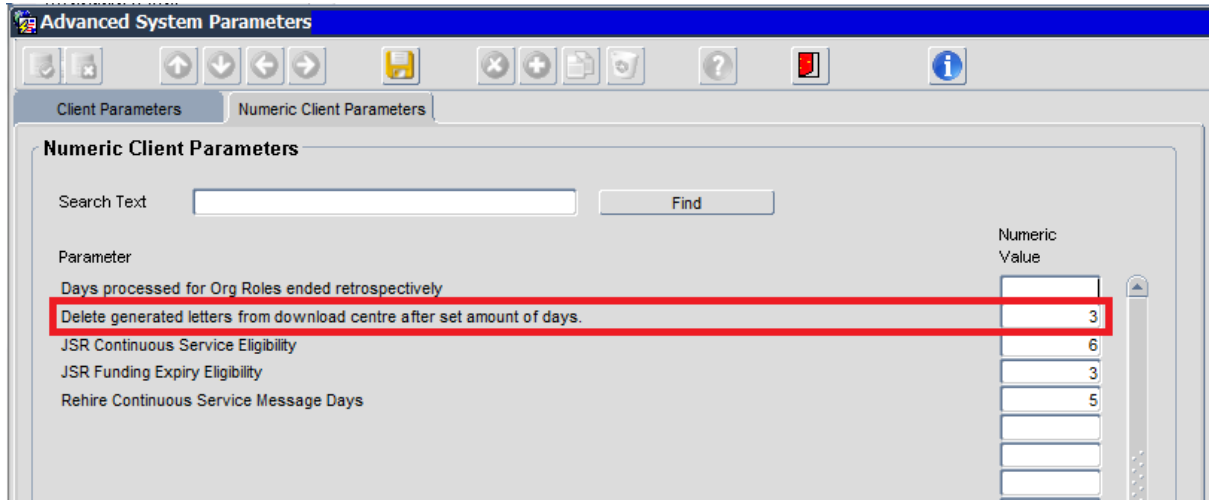

This parameter controls the number of days after which documents generated by the user will be automatically cleared down from the system.

This is defaulted in the system to 5 days.

To update the number of days:

1. Go to back office **CoreHR > CorePersonnel**.
2. Select **Reference > Reference Q-Z > System Parameters Advance > Client Parameters > Numeric Client Parameters**

3. **Parameter Name:** Delete generated letters from download centre after set amount of days.
4. Update value as required.
5. Click  to save changes.

Parameter	Numeric Value
Days processed for Org Roles ended retrospectively	
Delete generated letters from download centre after set amount of days.	3
JSR Continuous Service Eligibility	6
JSR Funding Expiry Eligibility	3
Rehire Continuous Service Message Days	5

This clear down will not happen automatically once the number of days has elapsed i.e. this will not happen immediately once a document is 5 days old.

The clear down is triggered based on any user generating a new document. When any user generates a document, the system will:

- check the number of days set in the parameter e.g. 5 days.
- check if any documents created by any user, were generated > 5 ago.
- those documents will be cleared down.

e.g. User A created a document but if User B generates a document 6 days later, documents created by User A will be cleared down.

3. Configuration

The Documents and Email Templates provides the facility to create and manage all document and email templates that will be used as part of the document and email generation process, throughout PeopleXD.

3.1. Access the Documents and Email Templates screen

To access the Documents and Email Templates screen:

- From the *People Management Dashboard*
- Select the **Data Centre**
- **Open** HR Admin Setup Settings
- Search for and select the **Documents and Email Templates** tile

Template Name	Restriction	Template Type	Available On Screen	Modified	Modified By
Annual Salary Review	Not Restricted	Document General Documents	Employee Search	08-Jan-2018	Alice Jones
Applicant Schedule	Not Restricted	Document Workflow Templates	Applicant Interview Scheduling	16-Aug-2013	
Contract Details	Not Restricted	Document Letter Documents	Employee Dashboard	12-Oct-2014	
Contract Document	Not Restricted	Document Contract Details	Employee Dashboard	29-Aug-2017	Alice Jones
Hr Person Email	Not Restricted	Email	Employee Dashboard	06-Jul-2018	Alice Jones
Hr Person Test	Not Restricted	Email	Employee Search	06-Jul-2018	Alice Jones

The Template Configuration Centre includes five sections:

- Templates
- Data Source Config
- Template Groups
- CoreHR Documents
- Email From Configuration

Access to some of these sections is controlled by user security. Therefore a user will only see the options to which they have been granted access to. Please see Section [Menu Options](#) for further details.

3.2. Templates

This screen lists all of the existing document and email templates that are currently set up on the system. It also provides the ability to add new templates and manage existing templates.

Template Name	Restriction	Template Type	Available On Screen	Modified	Modified By
Annual Salary Review	Not Restricted	Document General Documents	Employee Search	08-Jan-2018	Alice Jones
Applicant Schedule	Not Restricted	Document Workflow Templates	Applicant Interview Scheduling	16-Aug-2013	
Contract Details	Not Restricted	Document Letter Documents	Employee Dashboard	12-Oct-2014	
Contract Document	Not Restricted	Document Contract Details	Employee Dashboard	29-Aug-2017	Alice Jones
Hr Person Email	Not Restricted	Email	Employee Dashboard	06-Jul-2018	Alice Jones
Hr Person Test	Not Restricted	Email	Employee Search	06-Jul-2018	Alice Jones

The **Templates** screen contains the following fields:

Column	Description
Template Name	The description given to the template.
Restriction	This indicates the restriction status of the template: Restricted / Not Restricted.
Template Type	Indicates if the template type: Email or Document. The <i>Template Group</i> that it has been associated to displays below, this may be blank as Template Group are an optional setting.
Available on Screen	The PeopleXD screen that the template will be generated from.
Modified	This displays the date the template was created or last modified.
Modified By	This displays the name of the user that completed the creation / modification.

The *search* option can be used to search for a template using keywords from any of the columns displayed on screen i.e. name, template type, screen, modified by.

From the **3-dot** menu of a template you can Edit, Delete, Restrict Access or apply Additional Configuration.

3.2.1. Create Document Template screen

To access the Document Template screen:

- From the *Templates* Tab
- Expand the *Actions* menu and select **Create Document Template**

The **Create Document Template** screen contains the following fields:

Column	Description
Template Name	This is the title for the template that will appear to a user when they wish to generate a version of the document from People Management or Recruitment e.g. Contract (Permanent).
Called From*	This drop-down list provides a selection of all screens on PeopleXD from which a document can be generated.
Template Group	This is an optional setting. This drop-down list displays a selection of all Template Groups available. By selecting an item from the list you can group Document Templates into overall categories e.g. linking the <i>Contract (Permanent)</i> document to a <i>Contracts</i> template group.

Column	Description
	This is a useful setting to help manage large volumes on document templates on the system.
Merge Fields*	This drop-down list displays a selection of data sources available, dependant on the selection made in the Called From* field. Select the relevant merge field. See Screens & Data Sources for a full list of all data sources available per PeopleXD screen.
Upload Document Type*	This is where you can browse your MS Word template file and upload the relevant document to PeopleXD. Maximum upload of 20MB.
Enable Upload to CoreHR Document Management	This is an optional setting. For a document to automatically save to the employee's or applicant's record once it has generated, this option must be enabled. If this is not enabled, the generated document will only be available in the Download Centre and will not automatically save to the employee's record. If enabled, a drop-down list will appear with a selection of Document Types currently set up and active on the system. Select the Document Type that is most appropriate for the template e.g. Contract Details.
Change Default Output Format	This is an optional setting. All documents will generate as MS Word files by default. It is possible to edit this default setting to PDF or MS Word as preferred. <u>Note:</u> It is useful to remember that generated documents may be further edited if generated as an MS Word file. Keep this in mind if this is required for the specific template.

Create a Document Template

1. Give your Template a Name.

2. Select a **Called From** type from the drop-down list.
3. Select a **Template Group** from the list, if applicable.
4. From the drop-down options, select the relevant **Merge Field**.
5. The MS Word mail merge template can now be created.
6. Click **Download Merge Fields**
 - This will download in your browser as a file called "persdata.txt" which can be imported into MS Word as a data set to be used when configuring the document template.
 - See details here in [5.3 MS Word Mail Merge](#) for steps on how to create a mail merge template in MS Word using this file.
7. **Upload** your Document. Maximum size of upload is 20MB.
8. Enable the *Enable Upload to CoreHR Document Management* toggle and select the **Document Type**, if applicable.
9. Enable the *Change Default Output Format* and select the **Output Format**, if applicable.
10. Click **Save**.
11. Your template is now ready to be used and will display under the Templates screen.

Edit a Document Template

1. From the Templates tab search for the template you wish to Edit.
2. Using its 3-dot menu select **Edit**.
3. Edit any of the template fields, as required. All fields are editable.

 **Note:** If changing the screen or data source, you will need to download the new data source file and update the MS Word mail merge template file to use this new data set.

4. Click **Save**.

Delete a Document Template

1. From the Templates tab search for the template you wish to Delete.
2. Using its 3-dot menu select **Delete**.
3. A warning message displays, click **Yes** to confirm.

Restrict Access to a Document Template

This feature allows for access to a document template to be restricted to a group of specified users, based on an organisational unit or other logical grouping. This is done using Criteria Groups.

Criteria groups allow you to group employees based on reference data in their employee record. For example, you could group all employees in a particular department or location.

If access is restricted, the template will only appear for selection to the nominated users, when generating a document in HR Admin or Recruit Admin. If a user has not been given access, they will not see that template listed when selecting a template to generate. The template will be available to view in the Template Configuration Centre and will be flagged as Restricted.

Restrict Access to a Document Template

1. From the Templates tab search for the template you wish to Restrict access to.
2. Using its 3-dot menu select **Restrict Access**.
3. Click **Assign Criteria Groups**.
 - All existing criteria groups will display.
4. Click **Add Group** to create a new group.
5. Give your group a **Description**, then click **OK**.
6. Select the **Criteria Category** from the drop-down options.
7. Select the relevant attributes from the **Available column** and use the arrow to move them to the **Assigned column**.
8. Click **Save**.
9. Using the breadcrumb to return to the **Criteria Groups** screen.
10. Ensure the rule is **Active**.
11. You can Edit, Copy or Delete rules using their 3-dot menu.
12. Repeat to create all required criteria groups.
13. Click **Save** to complete the creation of the group(s) and return to the *Restricted Access* screen.
14. The screen will display a list of all users that have been identified by the system as a member of the groupings created.

15. The template will now display on the Document and Email Templates screen as **Restricted**.
16. Access can be review and manage for that grouping by selecting Restrict Access from the templates 3-dot menu.
17. To remove all restrictions, deactivate or delete the groups on the Criteria Group screen.

Additional Configuration

The Additional Configuration feature provides the ability to include *UDF* and *T&C Allowance* data related to an employee or their contract in a document that is generated from PeopleXD.

This is useful to allow for the inclusion of data held for employees in customised UDFs i.e. the items listed under the *Other Information* section of the Employee Profile. These are specific to each implementation of PeopleXD, therefore these need to be configured and mapped individually per template, as they are not picked up by default in the data source.

Note: This is an optional configuration feature and does not need to be configured for all templates.

This feature is only available to templates that are configured using the following 4 data sources:

- HR_PERSON_MERGE
- PERS_POST_PERSON_MERGE
- PERS_POST_APPOINTMENT_MERGE
- PERS_RECRUIT_APPLICANT_MERGE

When the data source file ('persdata.txt') is downloaded as part of the template creation, note that the file contains fields specifically for UDFs and Allowances. These will appear at the very end of the data source in the following format:

- Udf_Allowance_1..... Udf_Allowance_5
- Udf_Field_1..... Udf_Field_20

There is capacity to include 20 UDF items and 5 allowances, per template.

Map to a UDF

To add UDF items to the document template, it is required to create a mapping of the UDF item to be included to the actual merge field in the data source. To do this:

1. From the Templates tab search for the template you wish to Configure.
2. Using its 3-dot menu select **Additional Configuration**.

28searchf - Additional Configuration

People Management > HR Admin Setup Settings > Document and Email Templates > 28searchf - Additional Configuration

User Defined Allowances

ADD

Position	User Defined Item	User Defined Field
1	UNIT_TEST_CONTRACT_UDF_1	Contract Label 2
2	UNIT_TEST_CONTRACT_UDF_1	Contract Label 1
3	UNIT_TEST_CONTRACT_UDF_1	Date To
4	UNIT_TEST_CONTRACT_UDF_1	Date From

access PeopleXD

SAVE

3. From the User Defined tab, click **Add**.
4. Select the **User Defined Item** to be used from the drop-down options.
5. Select the **User Defined Field** to be used from the drop-down options.

Add UDF

User Defined Item *

UNIT_TEST_CONTRACT_UDF_1

User Defined Field *

Contract Label 1

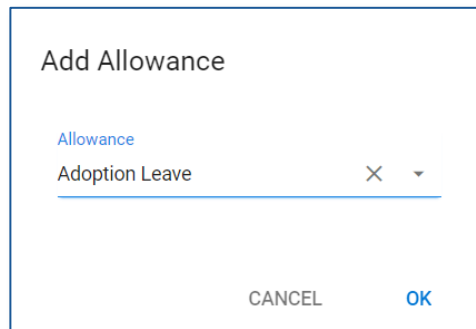

CANCEL OK

6. Click **OK**.
7. Repeat the steps above for up to 20 items. The template can include a variety of User Defined items, as required.

8. Click **Save**.

Map to T&C Allowance

1. From the Allowances tab, click **Add**.
2. Select the **Allowance** to be used from the drop-down options.

A dialog box titled "Add Allowance" with a light blue border. Inside, there is a label "Allowance" in blue text above a text input field containing "Adoption Leave". To the right of the input field is a close button "X" and a dropdown arrow. At the bottom of the dialog are two buttons: "CANCEL" and "OK".

3. Click **OK**.
4. Repeat the steps above for up to 5 items, if required. The template can include up to 5 Allowance codes.

Note: When generating the document for an employee, the Allowance description will only be included on the document for the employee if that allowance is currently included on the T&Cs linked to the employee's contract. If that Allowance is not active and listed on their HR Salary record, it will not appear when generating a document for them.

5. Click **Save**.
6. Now every time the data source is generated for that letter template, the UDF and allowance merge fields will be populated as per the mapping specified.

3.2.2. Create Email Template screen

To access the Create Email Template screen

- From the Template Tab
- Select **Create Email Template** from the *Actions* button

The **Create Email Template** screen contains the following fields:

Column	Description
Template Name	This is the title for the template that will appear to a user when they wish to generate a version of the email from HR Admin or Recruitment Admin e.g. Applicant Invite to Interview.
Called From*	This drop-down list provides a selection of all screens on PeopleXD from which an email can be generated.
Template Group	This is an optional setting. This drop-down list displays a selection of all Template Groups available. By selecting an item from the list you can group Email Templates into overall categories e.g. linking the <i>Applicant Invite to Interview</i> template to a <i>Recruitment</i> template group. This is a useful setting to help manage large volumes of email templates on the system.
Data View Source*	This will be automatically populated based on the screen selected in the Called From* field. For most screens there is only 1 applicable data source.

Column	Description
	The exception to this is the <i>Employee Dashboard</i> screen which if selected will provide a drop-down list of 3 options: • HR_PERSON_MERGE • PERS_POST_APPOINTMENT_MERGE • PERS_POST_PERSON_MERGE
Search	Once the Data View Source field is populated, the Search Field panel displays a list of all merge fields available to use for that data source, when creating your email.
Subject*	This is the subject text that will appear for the generated email. Enter the required text. To add a merge field to the subject: • Ensure the cursor is in the location you want to add the merge field to within the Subject text box. • Search for a field in the <i>Search</i> panel and double click on the field name. This will automatically appear in the subject text box, wrapped in << >>. • When the email is generated, that merge field will be updated to include record specific data e.g. the Vacancy ID
Body*	This is the body of the email. Enter the required text. To add a merge field to the body: • Ensure the cursor is in the location you want to add the merge field to within the Body text area. • Search for a field in the <i>Search</i> panel and double click on the field name. This will automatically appear in the subject text box, wrapped in << >>. • When the email is generated, all merge fields will be updated to include record specific data e.g. applicant's forename, schedule date etc.

Column	Description
	A maximum of 2000 characters may be included. Note: that merge fields will be updated to reflect actual system data, and this may require >2000 characters. This should be taken into consideration to ensure enough characters remain for the generated email.
Attach Invite	An option to include a calendar invite will appear on the email template configuration only for templates created using the following screens: • Applicant Interview Scheduling • Interview Panel Scheduling • View Applicants To include an invite: • Enable the toggle. • Update all 5 fields to map to a merge field from the selected data source.

Create an Email Template

1. Give your *Template a Name*.
2. Select a **Called From** type from the drop-down list. Based on your selection here the *Data View Source* field will automatically populate along with a *Search* field listing of all merge fields related to that data source to use in creating your email.
3. Select a **Template Group** from the list, if applicable.
4. If you have selected Employee Dashboard in the *Called From* field, from the drop-down options, select the relevant **Data View Source**.
5. Enter the **Subject** text. To add a merge field to the subject:
 - Place the cursor in the required location.
 - Search for a field in the Search panel and click on the field name.
 - The field will automatically appear in the subject text box, wrapped in << >>.
6. Enter the email **Body** text. To add a merge field to the body:
 - Place the cursor in the required location.
 - Search for a field in the Search panel and click on the field name.
 - The field will automatically appear in the subject text box, wrapped in << >>.
 - Maximum 2000 characters may be included.

Email Editor

Subject *

Invitation to Interview <<RECRUITMENT_ID>>

RATING SCORE

RECRUITMENT ID

7. An option to include a calendar invite will appear on the email template configuration only for templates created using the following screens:
 - Applicant Interview Scheduling
 - Interview Panel Scheduling
 - View Applicants
8. To include an invite:
 - Activate the **Attach Invitation** toggle.
 - Update all 5 fields to map to a merge field from the selected data source.

Attach Invitation ☒

Start Date * SCHEDULE DATE1

Start Time * SCHEDULE TIME 12H

End Date * SCHEDULE DATE2

End Time * SCHEDULE TIME 12H

Location * FURTHER INFORMATION

9. Click **Save**.
10. Your template is now ready to be used and will display under the Templates screen.

Edit an Email Template

1. From the Templates tab search for the template you wish to Edit.
2. Using its 3-dot menu select **Edit**.
3. Edit any of the template fields, as required. All fields are editable.

Note: If changing the screen or data source, the subject and description sections will need to be completely rewritten, using the new data source merge fields.

4. Click **Save**.

Delete an Email Template

1. From the Templates tab search for the template you wish to Delete.
2. Using its 3-dot menu select **Delete**.
3. A warning message displays, click **Yes** to confirm.

Restrict Access to an Email Template

This allows for access to an email template to be restricted to a group of specified users, based on an organisational unit or other logical grouping. This is done using Criteria Groups.

Criteria groups allow you to group employees based on reference data in their employee record. For example, you could group all employees in a particular department or location.

If access is restricted, the template will only appear for selection to the nominated users, when generating a document in HR Admin or Recruit Admin. If a user has not been given access, they will not see that template listed when selecting a template to generate. The template will be available to view in the Template Configuration Centre and will be flagged as Restricted.

Restrict Access to an Email Template:

1. From the Templates tab search for the template you wish to Restrict access to.
2. Using its 3-dot menu select **Restrict Access**.
3. Click **Assign Criteria Groups**.
4. Click **Add Group** to create a new group.
5. Give your group a **Description**, then click **OK**.
6. Select the **Criteria Category** from the drop-down options.
7. Select the relevant attributes from the **Available column** and use the arrow to move them to the **Assigned column**.
8. Click **Save**.
9. Using the breadcrumb to return to the **Criteria Groups** screen.
10. Ensure the rule is **Active**.
11. You can Edit, Copy or Delete rules using their 3-dot menu.
12. Repeat to create all required criteria groups.
13. Click **Save** to complete the creation of the group(s) and return to the *Restricted Access* screen.

14. The screen will display a list of all users that have been identified by the system as a member of the groupings created.
15. The template will now display on the Document and Email Templates screen as **Restricted**.
16. Access can be review and manage for that grouping by selecting Restrict Access from the templates 3-dot menu.
17. To remove all restrictions, deactivate or delete the groups on the Criteria Group screen.

3.3. Data Source Config

Standard mail merge functionality employs the use of *Data Sources* which are essentially temporary files pre-populated with the record data that will become merged into a document or email template. Various Data Sources are available for selection per screen on PeopleXD. (See [section 5.2 Document & Email Template Data Sources](#)).

Document and Email Templates

People Management > HR Admin Setup Settings > Document and Email Templates

< Templates Data Source Config Template Groups CoreHR Documents Email From Co >

Data Source* **HR_PERSON_MERGE** Column* **EMAIL_ADDRESS**

ADD

Column	Type	Searchable...	Filter by Ra...	Quick Search	Store	Description	
KNOWN_AS	VARCHAR2	☐	☐	☒		Known As	DELETE
PERSONNEL_NO	VARCHAR2	☒	☐	☒		Personnel No	DELETE
SURNAME	VARCHAR2	☐	☐	☒		Surname	DELETE
COMPANY	NUMBER	☒	☐	☐	Company	Company	DELETE
DEPARTMENT_CODE	VARCHAR2	☒	☐	☐	Department	Department	DELETE

access PeopleXD

SAVE

It is possible for an employee's Known As name to be displayed within the Command Centre and Post Management areas of HR Admin. This change by default is not applied to the employee search screen when a document or email is being generated.

To make an employee's *Known As* name available you will need to configure the relevant data sources within Documents and Email Templates. There are 3 data sources to be updated:

- HR_PERSON_MERGE
- PERS_POST_PERSON_MERGE
- PERS_POST_APPOINTMENT_MERGE

Note: Where an employee doesn't have a known as name, their forename will display.

To grant access to update, the menu option **CorePortal - Template Data Source Configuration** needs to be added to the applicable Admin profile.

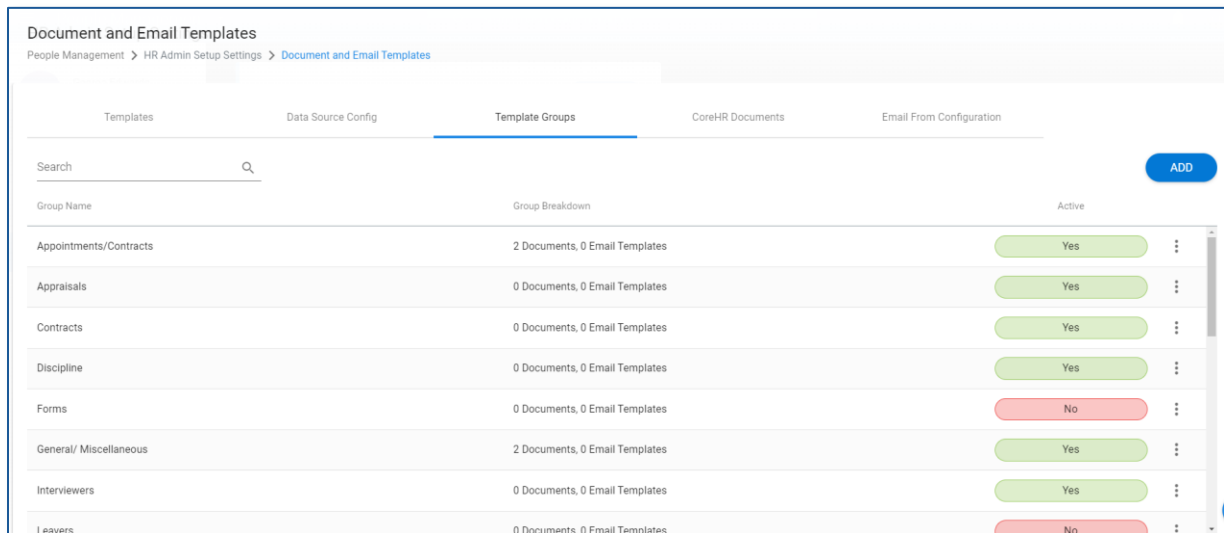

3.3.1. To update a data source with Known As

1. From the *Data Centre* widget, Open **HR Admin Setup Settings**.
2. Search for and click the **Document and Email Templates** tile.
3. Click the **Data Source Config** tab and select the data source, for example **HR_PERSON_MERGE**.
4. Delete the existing column **FORENAME**.
5. Click **Add** and select **KNOWN_AS**.
6. Enable the **Quick Search** toggle and enter a **Description**, for example Known As Name.
7. Click **Save**.
8. The Known As column will be available to search on the Generate Letter screen.

3.4. Template Groups

Template Group can be beneficial as they allow you to group together relevant document and email templates. Template Groups are optional.

This screen lists all Template Groups currently setup. From here it is possible to add a new group or edit an existing group.

Group Name	Group Breakdown	Active
Appointments/Contracts	2 Documents, 0 Email Templates	Yes
Appraisals	0 Documents, 0 Email Templates	Yes
Contracts	0 Documents, 0 Email Templates	Yes
Discipline	0 Documents, 0 Email Templates	Yes
Forms	0 Documents, 0 Email Templates	No
General/ Miscellaneous	2 Documents, 0 Email Templates	Yes
Interviewers	0 Documents, 0 Email Templates	Yes
Leavers	0 Documents, 0 Email Templates	No

The **Template Groups** screen contains the following fields:

Column	Description
Group Name	The description given to the Template Group.
Group Breakdown	The number of document and email templates associated to the Template Group.
Active	Indicates whether the Template Group is currently available for selection when creating/editing a Template.

The *search* option can be used to search for a template group using keywords from any of the columns displayed on screen i.e. group name or active status.

From the **3-dot** menu of a template group you can Edit, View a Breakdown of the templates linked to or Deactivate.

3.4.1. Add a Template Group

1. From the *Template Groups* Tab, click **Add**.

2. Give your Group a **Name** and **Code**.
 - The group code can be up to a maximum of 6 alphanumeric characters.
3. Click **OK**.
4. Your group will display and be available to assign to when creating or editing templates.

3.4.2. Edit a Template Group

1. From the Template Groups tab search for the group you wish to Edit.
2. Using its 3-dot menu select **Edit**.
3. Update the **Group Name** value.
4. Click **OK**.

3.4.3. View the Breakdown of a Template Group

1. From the Template Groups tab search for the group you wish to view the breakdown for.
2. Using its 3-dot menu select **View Breakdown**.
3. The screen will display a list of all Documents and/or Email Templates associated with the group.

Document Templates	Email Templates
Search	Search
Recruitment Letter	Not Shortlisted
Applicant Schedule	Invitation To Interview
Interviewer Schedule	Recruitment Letter
Interview Schedule	Interview Schedule

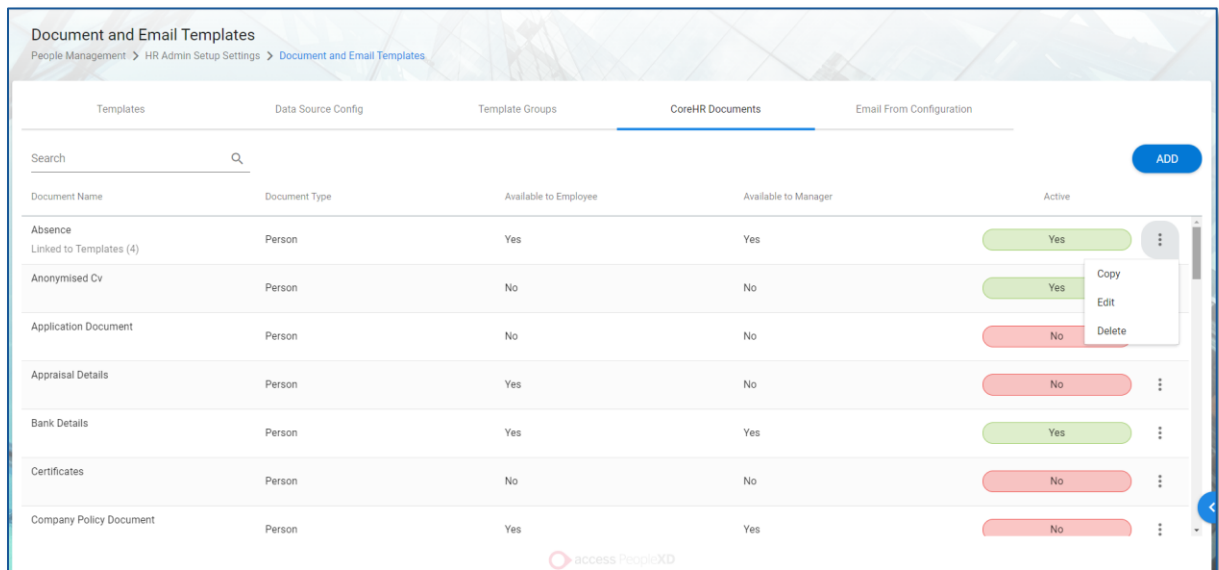

3.4.4. Deactivate a Template Group

1. From the Template Groups tab search for the group you wish to Deactivate.
2. Using its 3-dot menu select **Deactive**.
3. On the Template Group screen, the *Active* column will now show *No* for that record.
4. Once deactivated, the group will no longer appear for selection when configuring a new document or email template.

3.5. Document Types

PeopleXD: Document & Email Generation

The *CoreHr Documents* screen allows the user to create new and manage all existing Document Types on PeopleXD. In order for a generated document to be automatically saved to an employee's or applicant's record, the Document Template must be linked to a Document Type. That Document Type is then configured to link to the employee's record at either a person or contract level. Documents may also be independently uploaded to an employee's record on the Employee Profile screen and will always be linked to a Document Type as part of that process.

Document Name	Document Type	Available to Employee	Available to Manager	Active
Absence Linked to Templates (4)	Person	Yes	Yes	Yes
Anonymised Cv	Person	No	No	Yes
Application Document	Person	No	No	No
Appraisal Details	Person	Yes	No	No
Bank Details	Person	Yes	Yes	Yes
Certificates	Person	No	No	No
Company Policy Document	Person	Yes	Yes	No

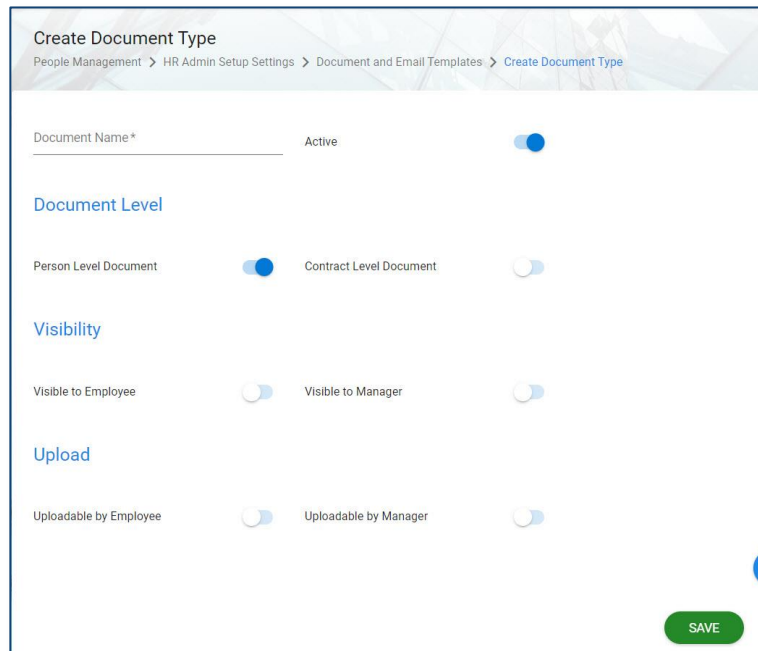

The **CoreHR Documents** screen contains the following fields:

Column	Description
Document Name	This includes a reference to how many templates are currently linked to the Document Type
Document Type	Whether documents of this type will be associated against the employee at a 'Person' or individual 'Contract' level
Available to Employee	Documents of this type will be available to the employee to view on their 'Employee Profile' screen
Available to Manager	Documents of this type will be available to the employee's manager to view on their employees' 'Employee Profile' screen (via the My Team widget)
Active	Indicates if the Document Type is currently active and available for selection on the 'Document Template' or 'Employee Profile' screens.

From the **3-dot** menu of a Document you can Copy, Edit or Delete.

3.5.1. Add a Document Type

1. From the *CoreHr Documents* Tab, click **Add**.

2. Configure all fields as required. The table below explains all fields:

Field	Description
Document Name	This will be the value that appears for the Document Type throughout the system.
Active	If Turned On: The Document Type will be active for selection on all associated dropdown lists throughout the system i.e. when creating a new Document Template or uploading a document. If Turned Off: The Document Type will not appear on drop down lists throughout the system. Documents linked to that Document Type will no longer display on the Employee Profile or Applicant Details screen.
Document Level	Select whether the document is to be associated at a person or contract level.

Field	Description
	Person: The document will be associated at a person level to the employee/applicant. Contract: The document will be associated with an employee's specific contract.
Visibility	Select who should be able to view this document. Both can be selected, if required. Employee: If enabled, documents that are linked to this document type will be available to an employee to view via the Employee Profile screen. Manager: If enabled, documents that are linked to this document type will be available to a manager to view via the Employee Profile screen
Upload	Depending on your selection in Visibility the related field will be available to enable. Uploadable by Employee: If selected, the Document Type will appear in the Document Type dropdown list displayed to the employee on the Upload Document screen. Uploadable by Manager: If selected, the Document Type will appear in the Document Type dropdown list displayed to the manager on the Upload Document screen, for employees in their team

- Once happy click **Save**.
- Your document type will display and be available to select in the system when creating or editing templates.

3.5.2. Copy a Document Type

- From the *CoreHr Documents* tab search for the group you wish to Copy.
- Using its 3-dot menu select **Copy**.
- A copy of the document type will be created and appear on screen automatically. The title will be set to <original document name> - Copy.
 - Linked templates are not copied.

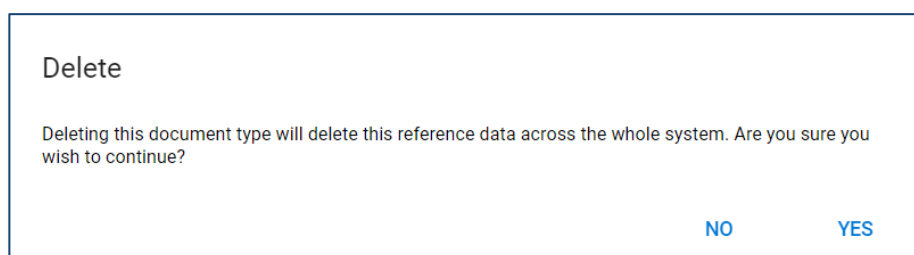

4. The copied document type can now be edited.

3.5.3. Edit a Document Type

1. From the *CoreHr Documents* tab search for the group you wish to Edit.
2. Using its 3-dot menu select **Edit**.
3. Update the fields as required. For example, rename a copied document type.
4. Click **Save**.

3.5.4. Delete a Document Type

1. From the *CoreHr Documents* tab search for the group you wish to Delete.
2. Using its 3-dot menu select **Delete**.
3. A warning message will display to confirm that the document type should be deleted.

4. Click **Yes** to delete.

Note: It is not recommended to delete document types that have been linked to Document Templates. This may cause instability with records already generated and linked to that Document Type on the system. It is therefore recommended to edit the Document Type and set the record to inactive, rather than delete.

3.6. Email From Configuration

This screen is used to record the email addresses that will be used as the default *sent from* email address, used for all system generated emails i.e. any emails generated using this feature in People Management will be sent from 'noreply@test.com'.

Document and Email Templates

People Management > HR Admin Setup Settings > Document and Email Templates

Templates Data Source Config Template Groups CoreHR Documents **Email From Configuration**

Module	Email Address
RECRUITMENT	noreply@corerecruit.com
PERSONNEL	noreply@corepersonnel.com

access PeopleXD

SAVE

The **Email From Configuration** screen contains the following fields:

Column	Description
Module	It is possible to update 2 separate email addresses, depending on the module that the email is generated from. Personnel - Emails generated from within People Management will appear to have sent from this address. Recruitment - Emails generated from within Recruitment will appear to have sent from this address.
Email Address	This is the email address the system emails will be generated from.

It is possible to configure different addresses for emails generated from People Management and Recruitment.

3.6.1. Update the Email From Address

1. From the *Email From Configuration* tab, select the address you wish to update.
2. Update the address details, as required.
3. Click **Save**.

4. Menu Options

This section outlines the elements of this feature that are controlled by Menu Options. User Menu Profiles should be updated as required to share access to these items.

Menu Option	Menu ID	System
CorePortal – Portal Letters	MAIN_MENU.PORTALLETTERS	CorePortal
CorePortal – Generate Emails	MAIN_MENU.LETTERSGENERATEEMAIL	CorePortal
CorePortal – Generate Documents	MAIN_MENU.LETTERSGENERATEDOCUMENTS	CorePortal
CorePortal - Template Data Source Configuration	MAIN_MENU.LETTERS DATASOURCECONFIG	CorePortal
Generate Documents	EMPLOYEE_SEARCH_MENU.GENERATE_DOCUMENTS	People Management
Generate Emails	EMPLOYEE_SEARCH_MENU.GENERATE_EMAILS	People Management

5. Appendix

5.1. Glossary

This table provides a glossary of terminology used in Documents and Emails.

Option	Description
Document	A <i>document</i> refers to a file (MS Word or PDF) that can be generated from PeopleXD by merging employee data into templates that have been stored on the system. These may be used to create employee contracts, pre-populated HR forms, applicant correspondence etc. Documents that have been generated on PeopleXD may be downloaded by the user to further amend and print, as required. They may also be automatically stored against an employee's record on their Employee Profile screen, as part of the document generation. A user may also upload a document to the Employee Profile, independent of generation process e.g. uploading a copy of a passport.
Email	System generated emails can be produced and sent automatically from PeopleXD to an employee or an applicant. Emails are typically used to support the recruitment process e.g. to send an invitation for interview to a candidate. However, these may also be generated to employees within People Management.
Template	Templates can be stored on the system to support the production of both documents and emails. • Document Templates: These are created using MS Word mail merge functionality and uploaded to PeopleXD. • Email Templates: These are created and maintained directly on PeopleXD.

Option	Description
Template Group	Templates (document or email) can be grouped into various categories e.g. Contracts, Recruitment, Salary etc. This is an optional grouping and does not need to be used for all or any templates.
Document Type	This is used to group documents that have been generated on the system or uploaded independently to an employee's or applicant's record. This is an important setting for controlling the visibility of and access to documents for HR and Recruitment Admins as well as Employees and Managers.
Data Source	Standard mail merge functionality employs the use of <i>Data Sources</i> which are essentially temporary files pre-populated with the record data that will become merged into a document or email template. In this feature, each screen in People Management or Recruitment from which a document / email can be generated from, is linked to a specified data source (or data sources). This data source is a set of employee / applicant / contract / record fields which will be mapped to a template. Templates are configured, mapped to these fields. When a document or email is generated, a temporary file (not available to the user) will become populated with data for corresponding record(s). This will then update the mappings in the generated document / email.

5.2. Document & Email Template Data Sources

This table provides a view of the Data Sources that are available for selection per screen on PeopleXD.

Screen	Data Source
Applicant Interview Scheduling	Schedules - Assign Applicants

Screen	Data Source
Applicant References	Applicant Details > References
Employee Dashboard	HR Admin > Employee Dashboard My Team widget > HR Dashboard
Employee Search	HR Admin > Employees tab
Interview Panel	Edit Vacancy > Interview Panel
Interview Panel Scheduling	Schedules - Assign Interviewer
Vacancy Overview	Edit Vacancy > Vacancy Overview
View Applicants	Vacancies > Edit Vacancy > View Applicants Interview Panel > View Applicants

5.3. MS Word Mail Merge

The section provides details on how to create an MS Word mail merge template using a PeopleXD data source file. See [3.2 Templates](#) to understand where in the document template creation process this step is required.

To create the mail merge file:

1. Save the 'persdata.txt' file to your computer.
2. Open MS Word.
3. Select the **Mailings** tab.
4. Expand **Start Mail Merge** and select **Step-by-Step Mail Merge Wizard**.
 - The Mail Merge panel will appear on the right of the screen.

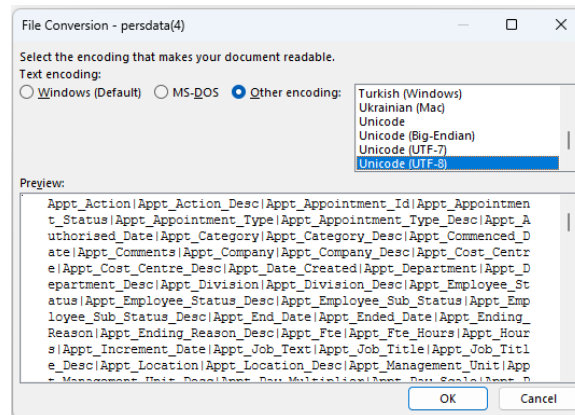

This is a 6-step wizard that will guide the user through the creation of the mail merge template.

Step 1 - Select **Letters** then, click **Next: Starting Document**.

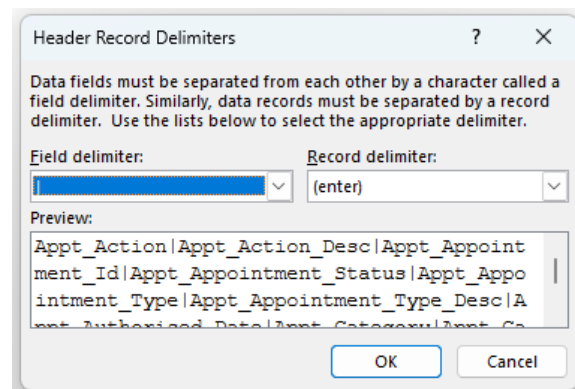

Step 2 - Select **Use the current document** then, click **Next: Select recipients**.

Step 3 - Select **Use an existing list** then, click **Browse...**

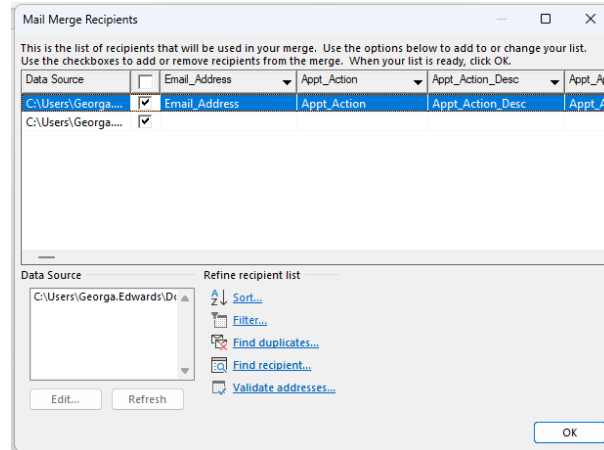

- Locate the 'persdata.txt' file, click **Open**.
- The 'File Conversion' window opens, and the Preview window will display the persdata.txt file.

- Click **OK**.
- On the *Header Record Delimiters* screen update the Field delimiter to |.

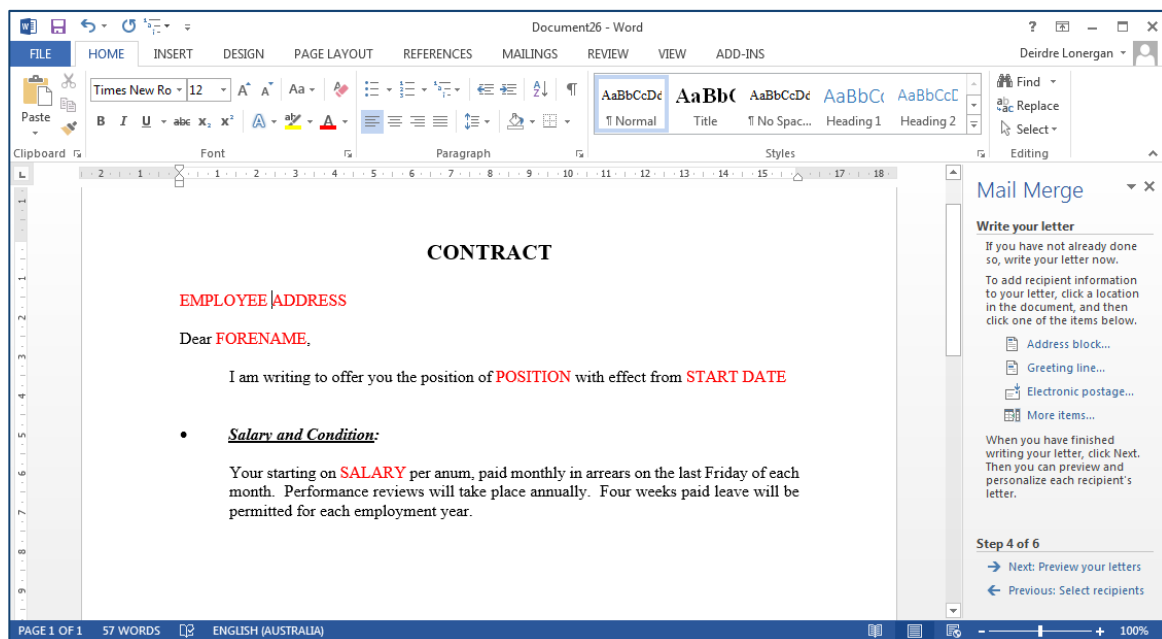

- Click **OK**.
- On the *Mail Merge Recipients* screen the column header on this screen should reflect each mail merge field from the data source.

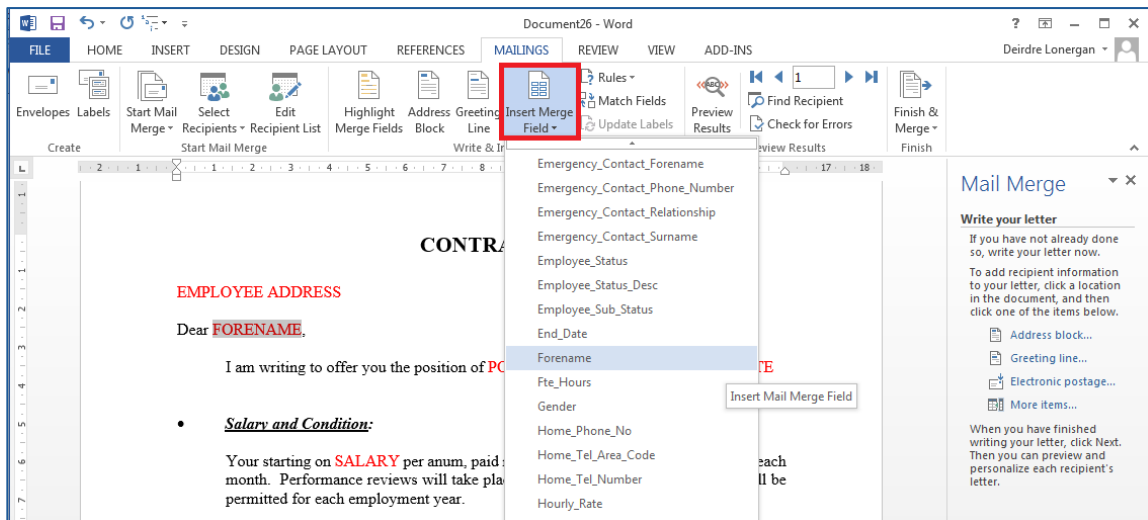

- Click **OK** to close and return to the wizard then, click **Next: Write your letter**.

Step 4 - At this point, ensure the word document is populated with the template details as required e.g. the text for this sample employee contract.

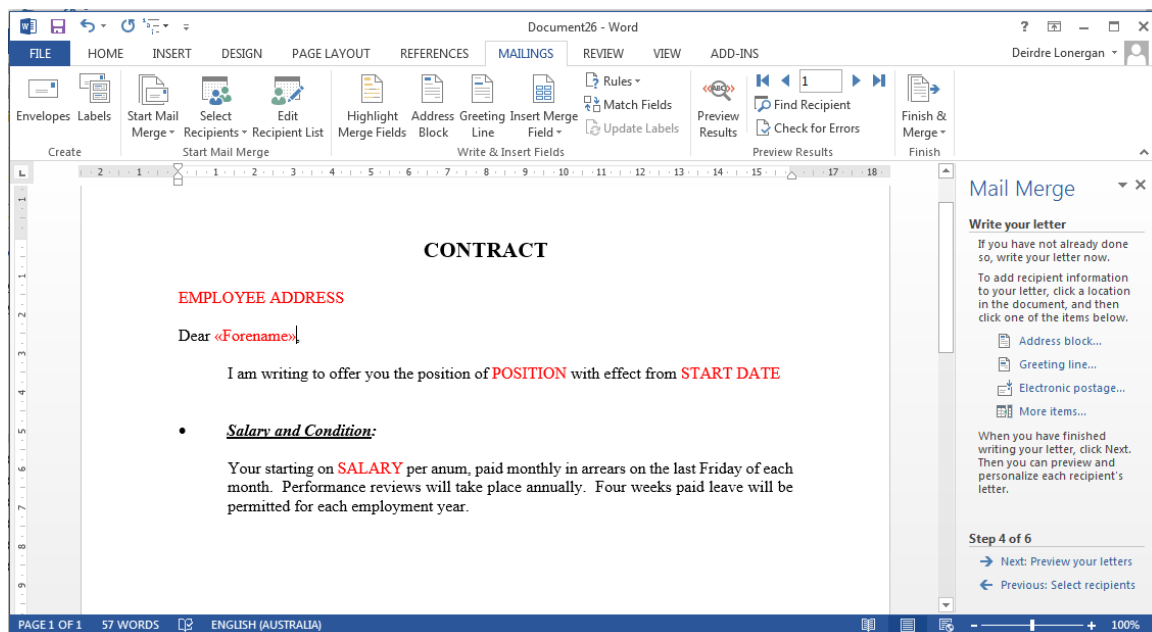

- The variable fields in the template are now mapped to merge fields from the data source i.e. the text highlighted in red in the above example should be linked to the data source to ensure that these items are replaced with employee / applicant data when the document is generated from the system.

- To update the text items, select the **Insert Merge Field** from the *Mailings* ribbon and search for the required field e.g. 'Forename' will be used in this example:

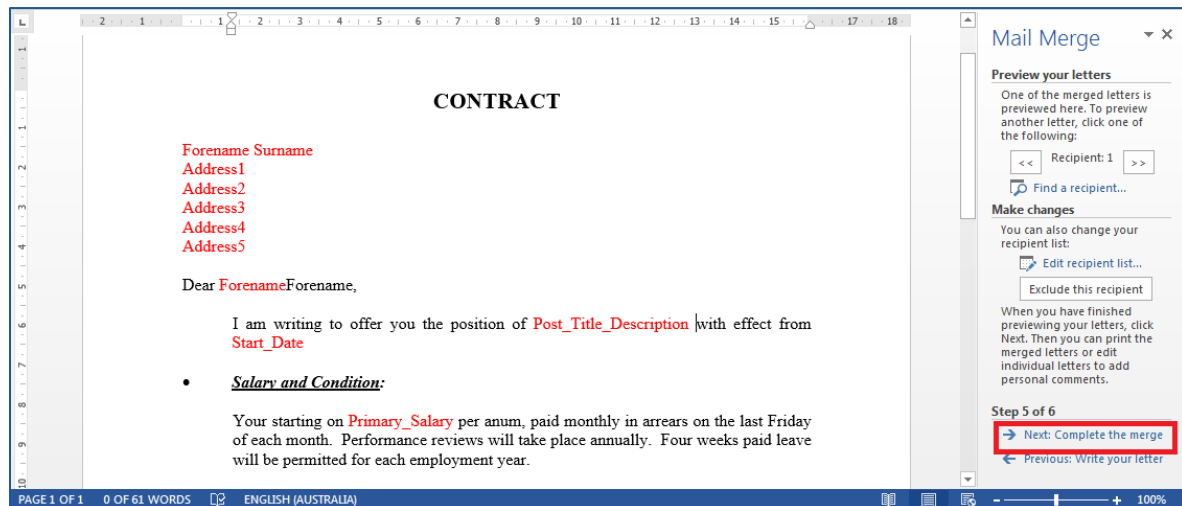

- Click on the merge field and this will appear in the document. Merge fields that are active in a document will appear wrapped in << >> e.g. note how 'Forename' has been updated:

- Do this for all variable fields in the document. Once completed, select **Next: Preview your letters**.

Step 5 - The document will update to populate the merge fields with the data held in the data source that has been linked. Remember, the data in the only row of the data source matches the field names, therefore the merge fields will simply update to display those field names again.

- Once reviewed, select **Next: Complete the Merge**.

Step 6 - Complete the Merge. The MS Word document is now configured as a mail merge template using the PeopleXD data source.

5. **Save** the file for upload to PeopleXD as part of the document template setup, as covered in [3.2 Templates](#).

5.4. Email Addresses

When an email is generated for an employee/applicant/interview panel member, the 'to' email address is automatically populated based on the values stored for that person on the system.

Employee

A screenshot of a web application interface. At the top, it says 'Maria Hill, Senior Consultant, System' and 'Manager Dashboard > Maria Hill, Senior Consultant, System'. On the left is a sidebar with 'EMPLOYEE DETAIL' and 'Contacts' selected. The main content area is titled 'My Contact Details' and contains several input fields: 'Home Telephone Number', 'Mobile Number', 'Other Email Address', 'Work Email Address' (which is populated with 'maria.hill@core.com'), and 'Work Mobile Number'. Each field has a vertical ellipsis icon to its right.
