1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on the available XD Payroll functions in Insight reports. This includes the following areas:

- Expense
- Data Validation

 **Note:** This guide is for reference purposes; information on how to use functions and build reports is not included.

1.2. XD Functions Overview

XD functions are standard functions built into Insight. They perform operations using the provided parameters based on XD data fields (e.g. get email address, active pension scheme appointment data etc.). XD functions enable you to define logical columns returning the data without needing knowledge of the underlying data or internal logic.

 **Note:** To avoid complexity and improve performance, it is recommended to get data directly from data views where possible. Before using functions, check to see if the desired information can be returned through the standard views and columns.

XD Functions are used in the following scenarios:

1. Abstract some of the logic for complex operations and data retrieval.
2. Getting data that may not be accessible from the views in your report (for example, employee name or email address).

 **Note:**

- A function isn't capable of retrieving more than one information; that means if you have two different data matching the parameters, the result will be either null or one of them.
- You will need data access to be granted for the function to return a result, for example Expense functions would only return results for the pay groups you have

1.3. List of XD functions not covered

The following functions are not covered in this document:

- EXBI_ANALYSIS_CODE_DESCRIPTION,
- EXBI_GET_CLAIMANT_EXTRA_MILES,
- EXBI_IS_CODE_IN_STRING,
- EXBI_RETRIEVE_BUDGET_DETAIL.

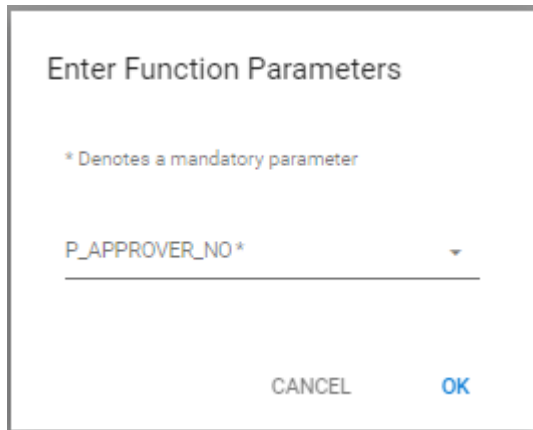

Functions for Personnel are covered in [XD Personnel Functions – Reference Guide](#).

Functions for Payroll are covered in [XD Payroll Functions – Reference Guide](#).

2. Expense

2.1.1. EXBI_GET_APPROVER_FORENAME

This function will return the Forename of an approver for the parameter entered as such:

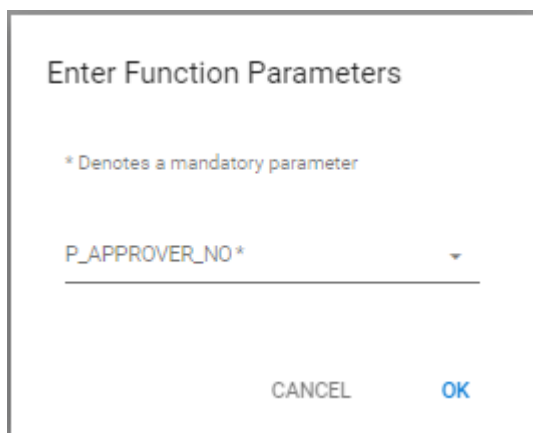

The screenshot shows a dialog box titled "Enter Function Parameters". Inside, there is a note: "* Denotes a mandatory parameter". Below this, there is a text input field containing "P_APPROVER_NO*". At the bottom of the dialog, there are two buttons: "CANCEL" and "OK".

P_APPROVER_NO ← Approver Reference you are looking at,

2.1.2. EXBI_GET_APPROVER_SURNAME

This function will return the Surname of an approver for the parameter entered as such:

The screenshot shows a dialog box titled "Enter Function Parameters". Inside, there is a note: "* Denotes a mandatory parameter". Below this, there is a text input field containing "P_APPROVER_NO*". At the bottom of the dialog, there are two buttons: "CANCEL" and "OK".

P_APPROVER_NO ← Approver Reference you are looking at,

2.1.3. EXBI_GET_P11D_DESCRIPTION

This function will return the item Description from Expense for the parameter entered as such:

The screenshot shows a dialog box titled "Enter Function Parameters". At the top, it says "* Denotes a mandatory parameter". Below this, there is a text input field containing "P_P11D_SECTION*". At the bottom right, there are two buttons: "CANCEL" and "OK".

P_P11D_SECTION ← P11D Section you are looking at,

The function will return the description according to the code entered from that screen:

The screenshot shows a window titled "Employee P11D Benefits". It has a menu bar with "Action", "Edit", "Block", "Field", "Record", "Query", "Help", "Tools", and "Window". Below the menu bar is a toolbar with various icons. The main area is divided into two sections. On the left, "P11d Details" contains fields for "Company", "P11D Year End", and "Employee Ref", each with a dropdown arrow and a question mark icon. On the right, "P11D Benefits" contains a list of benefit items: A Assets Transferred, B Payments made on behalf of Employees, C Vouchers or Credit Cards, D Living Accommodation, E Mileage allowance payments not taxed at source, F Cars and Fuel, G Vans and Van Fuel, H Interest Free and Low Interest Loans, I Private Medical Treatment or Insurance, J Qualifying Relocation Expenses Payments and Benefits, K Services Supplied, and L Assets placed at the Employees disposal.

The function will return data only when Benefit item is N or B and Header Record is Y.

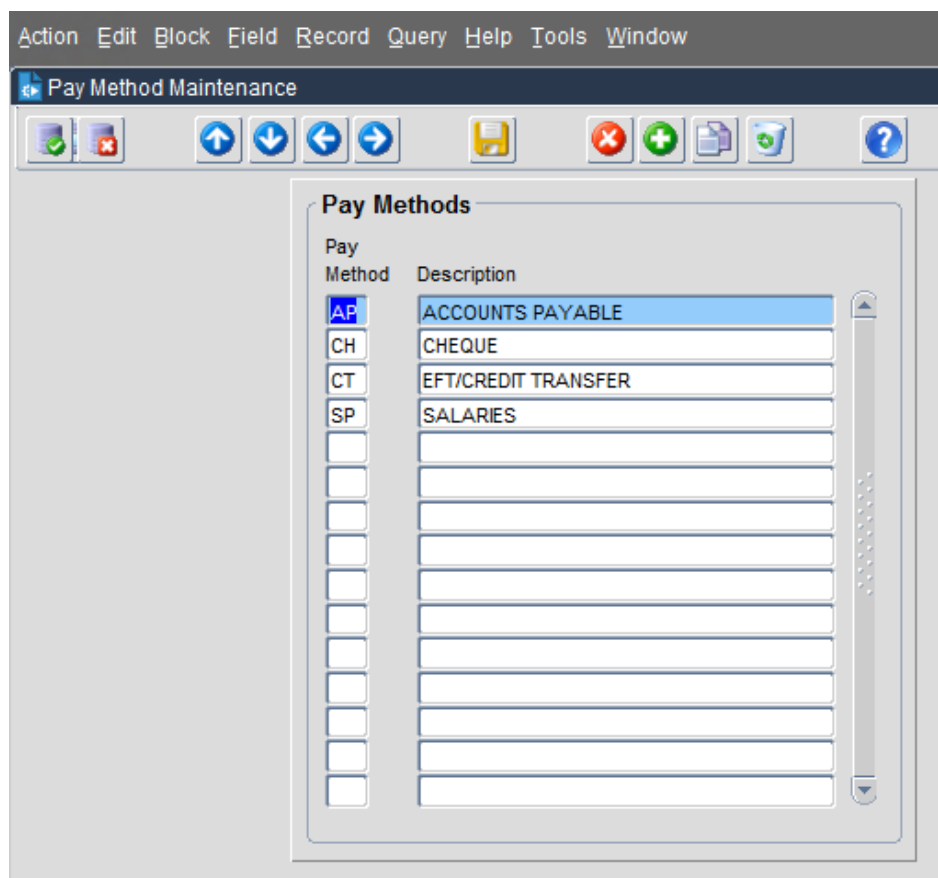

2.1.4. EXBI GET PAY METHOD DESC

This function will return the item Description from Expense for the parameter entered as such:

The screenshot shows a dialog box titled "Enter Function Parameters". At the top, it says "* Denotes a mandatory parameter". Below this, there is a text input field containing "P_PAY_METHOD*". At the bottom right, there are two buttons: "CANCEL" and "OK".

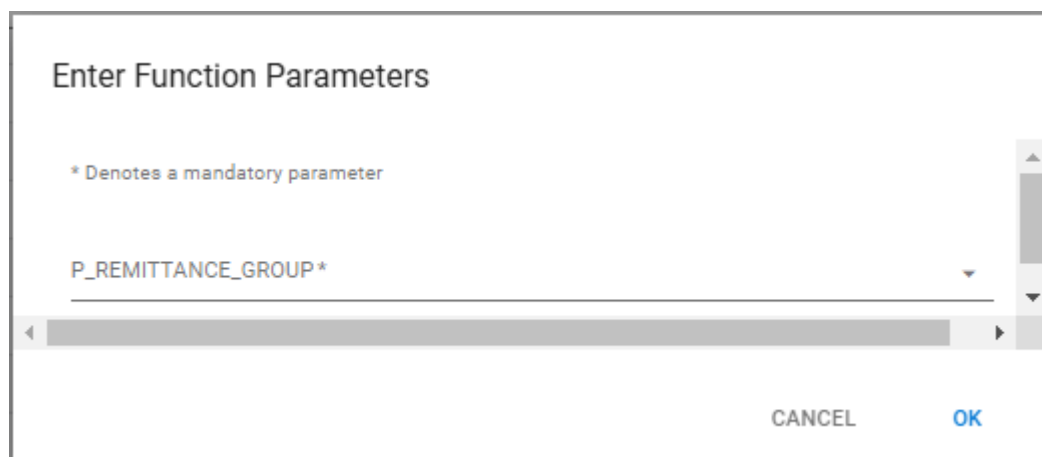

P_PAY_METHOD ← Pay Method you are looking at,

The function will return the description according to the code entered from that screen:

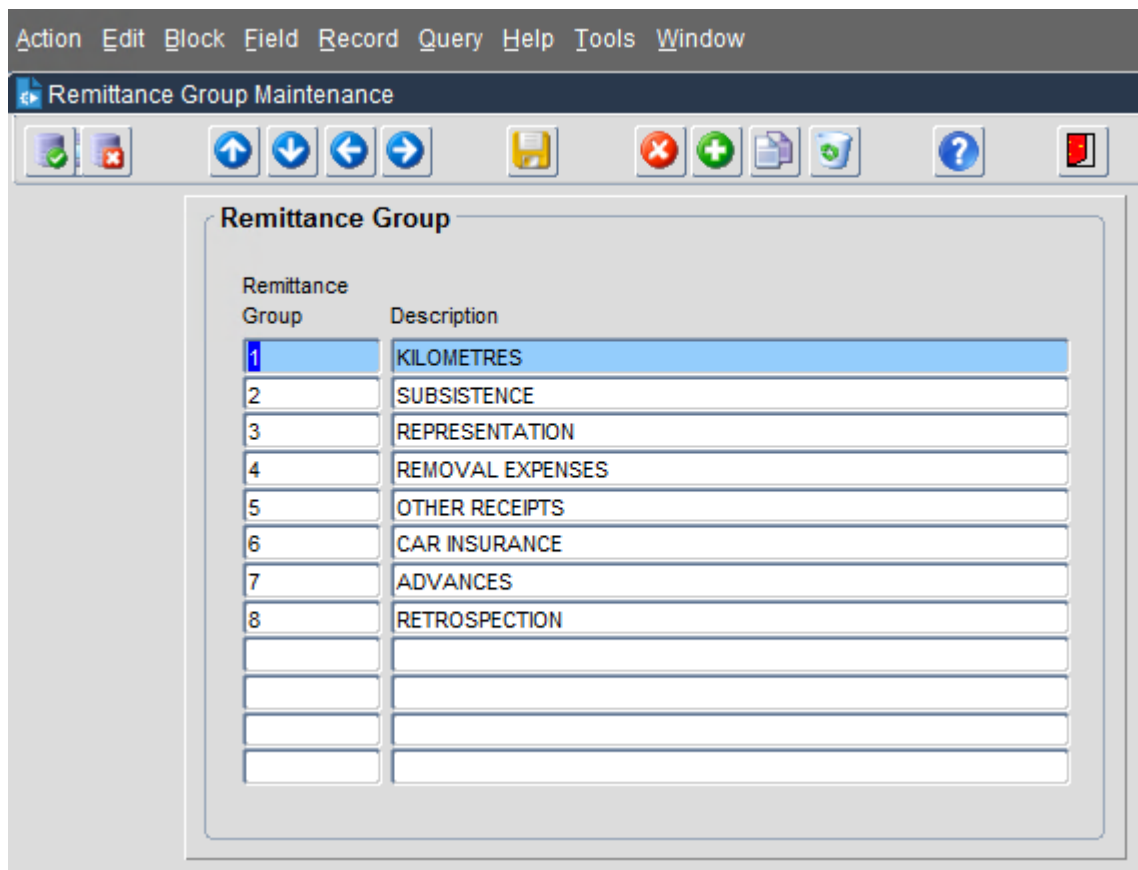

2.1.5. EXBI GET REMITTANCE GROUP DESC

This function will return the item Description from Expense for the parameter entered as such:

P_REMITTANCE_GROUP ← Remittance Group you are looking at,

The function will return the description according to the code entered from that screen:

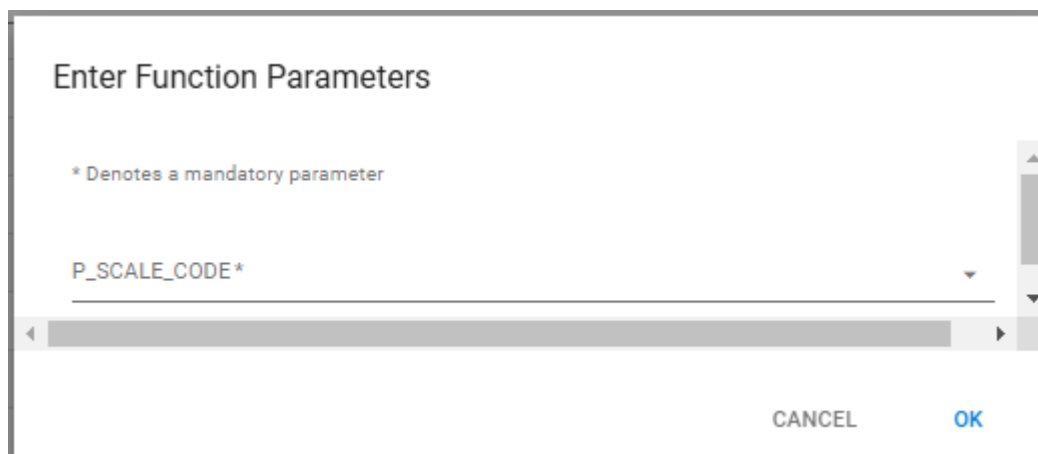

The screenshot shows a software window titled "Remittance Group Maintenance". It has a menu bar with "Action", "Edit", "Block", "Field", "Record", "Query", "Help", "Tools", and "Window". Below the menu bar is a toolbar with various icons. The main area contains a table with two columns: "Remittance Group" and "Description". The table lists several groups, with the first one highlighted in blue.

Remittance Group	Description
1	KILOMETRES
2	SUBSISTENCE
3	REPRESENTATION
4	REMOVAL EXPENSES
5	OTHER RECEIPTS
6	CAR INSURANCE
7	ADVANCES
8	RETROSPECTION

2.1.6. EXBI_GET_SCALE_CODE_DESC

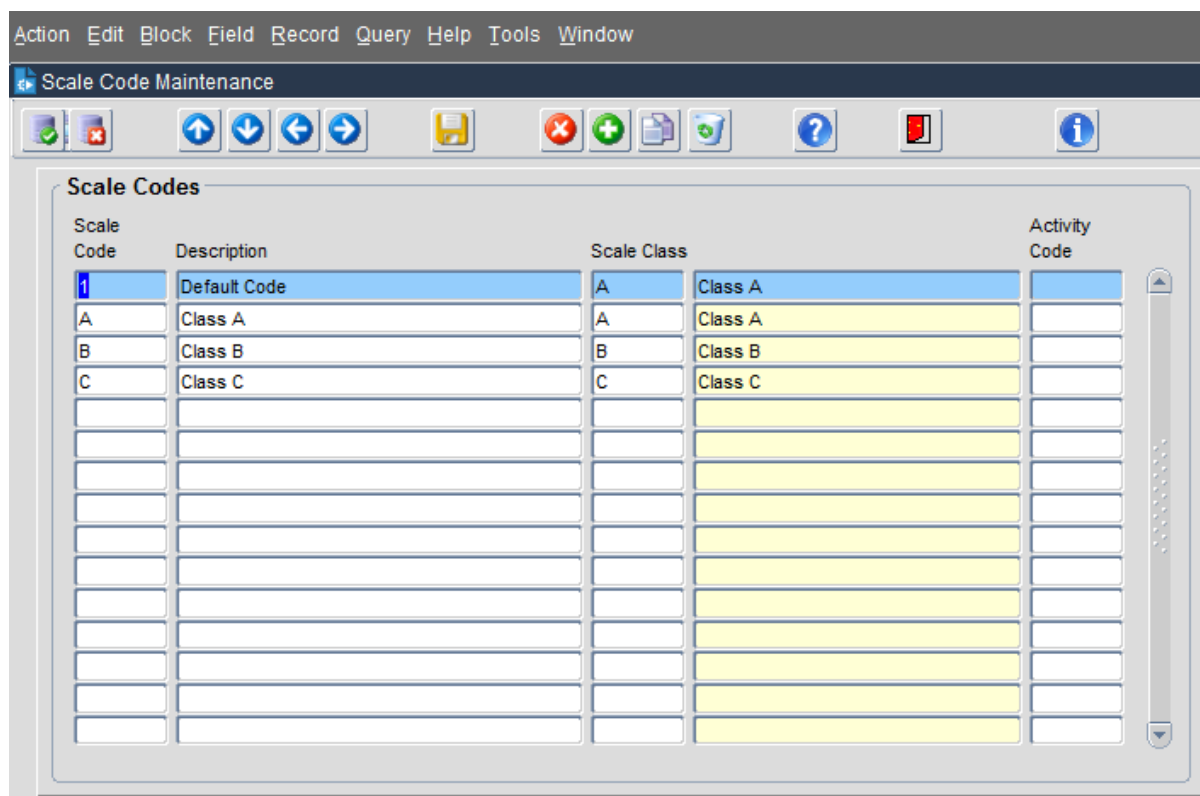

This function will return the item Description from Expense for the parameter entered as such:

The screenshot shows a dialog box titled "Enter Function Parameters". It contains a text input field with the value "P_SCALE_CODE*" and a dropdown arrow. Below the input field is a horizontal scrollbar. At the bottom right of the dialog box are "CANCEL" and "OK" buttons.

P_SCALE_CODE ← Scale Code you are looking at,

The function will return the description according to the code entered from that screen:

2.1.7. EXBI GET SOFT RCT ATTACHED

This function will return an indicator from Expense for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_CLAIMANT_NO*

P_TRIP_ID*

P_TRIP_ID_SEQ*

P_TRIP_DETAIL_ID*

CANCEL

OK

P_CLAIMANT_NUMBER ← Person Reference you are looking at,

P_TRIP_ID ← Trip id you are looking at,

P_TRIP_ID_SEQ ← Trip id Sequence you are looking at,

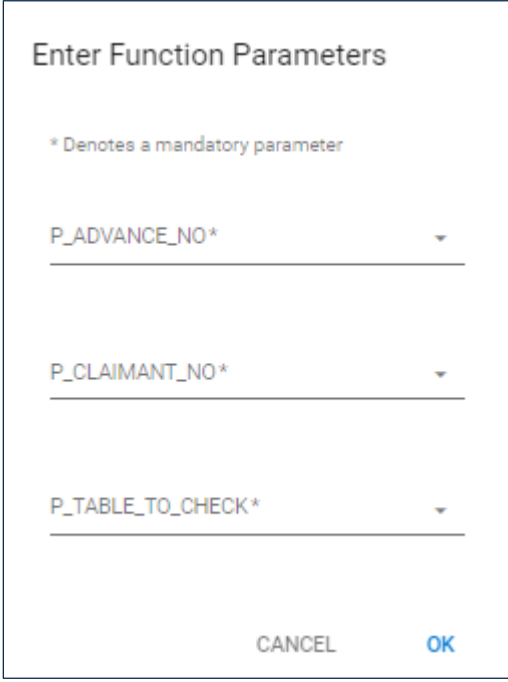

P_TRIP_DETAIL_ID ← Trip Detail id you are looking at,

The function will return Y if there is a document uploaded for the parameters entered above.

2.2. Advance Detail

2.2.1. EXBI_CHECK_FOR_ADVANCE

This function will return an indicator from the view Advance Detail from Expense for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_ADVANCE_NO* ▼

P_CLAIMANT_NO* ▼

P_TABLE_TO_CHECK* ▼

CANCEL OK

P_ADVANCE_NO ← Advance Number you are looking at,

P_CLAIMANT_NO ← Person Reference you are looking at,

P_TABLE_TO_CHECK ← Oracle table to investigate, can be 'EXW_ADVANCE' or 'EX_ADVANCE'.

If there is an existing row for the parameters above, the function will return Y, if not N.

2.2.2. EXBI_GET_EXW_ADVANCE_DATES

This function will return an item from the view Advance Detail from Expense for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_ADVANCE_NO* ▼

P_CLAIMANT_NO* ▼

P_DATE_REQUIRED* ▼

CANCEL OK

P_ADVANCE_NO ← Advance Number you are looking at,

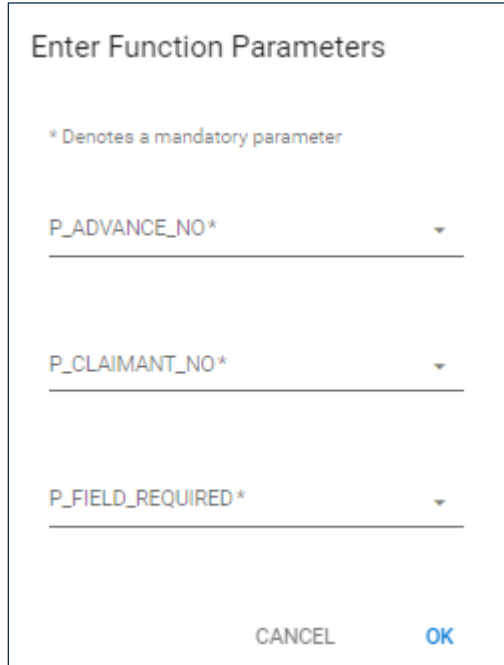

P_CLAIMANT_NO ← Person Reference you are looking at,

P_DATE_REQUIRED ← Type of date you are looking at, can be one of these:

- 'DATE_APPROVED' The function will retrieve the item Date Approved,
- 'DATE_REJECTED' The function will retrieve the item Date Rejected,
- 'DATE_INPUT' The function will retrieve the item Date Input,
- 'DATE_SUBMITTED' The function will retrieve the item Date Submitted,
- 'DATE_RESUBMITTED' The function will retrieve the item Date Resubmitted.

2.2.3. EXBI_GET_EXW_ADVANCE_VARCHAR

This function will return an item from the view Advance Detail from Expense for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_ADVANCE_NO*

P_CLAIMANT_NO*

P_FIELD_REQUIRED*

CANCEL OK

P_ADVANCE_NO ← Advance Number you are looking at,

P_CLAIMANT_NO ← Person Reference you are looking at,

P_FIELD_REQUIRED ← Data you are looking at, can be one of these:

- 'APPROVER_NO' The function will retrieve the item Approver No,
- 'STATUS' The function will retrieve the item Status,
- 'REJECT_REASON' The function will retrieve the item Reject Reason.

2.2.4. EXBI_GET_EX_ADVANCE_DATES

This function will return an item from the view Advance Detail from Expense for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_ADVANCE_NO*

P_CLAIMANT_NO*

P_DATE_REQUIRED*

CANCEL OK

P_ADVANCE_NO ← Advance Number you are looking at,

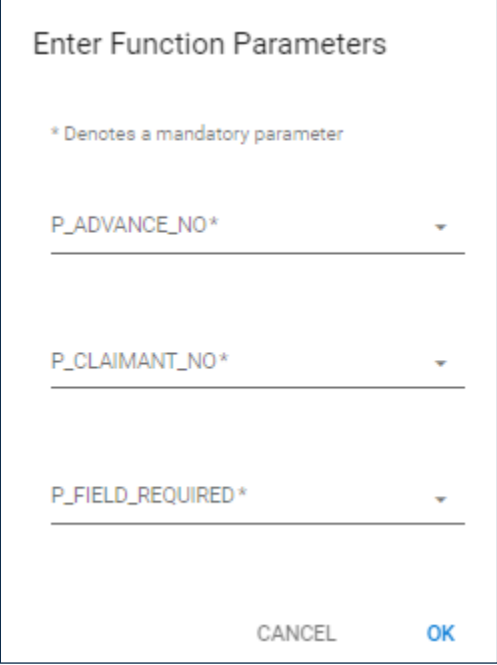

P_CLAIMANT_NO ← Person Reference you are looking at,

P_DATE_REQUIRED ← Type of Date you are looking at, can be one of these:

- 'DATE_FROM' The function will retrieve the item Date From,
- 'DATE_TO' The function will retrieve the item Date To,

2.2.5. EXBI_GET_EX_ADVANCE_VARCHAR

This function will return an item from the view Advance Detail from Expense for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_ADVANCE_NO*

P_CLAIMANT_NO*

P_FIELD_REQUIRED*

CANCEL OK

P_ADVANCE_NO ← Advance Number you are looking at,

P_CLAIMANT_NO ← Person Reference you are looking at,

P_FIELD_REQUIRED ← Item you are looking at, can be one of these:

- 'APPROVED_BY' The function will retrieve the item Approved by,
- 'ADV_PAYMENT_TYPE' The function will retrieve the item Advance Payment Type,

2.3. Claim Details

2.3.1. EXBI_GET_MILES_YTD_PAID

This function will return the Sum of Expense Units from the view Claim Details from Expense for the parameters entered as such:

The screenshot shows a dialog box titled "Enter Function Parameters". At the top, there is a note: "* Denotes a mandatory parameter". Below this, there are three input fields, each with a dropdown arrow on the right: "P_MILEAGE_YEAR_START*", "P_MILEAGE_YEAR_END*", and "P_CLAIMANT_NO*". At the bottom of the dialog, there are two buttons: "CANCEL" and "OK".

P_MILEAGE_YEAR_START ← Expense Date from Date is greater or equal to the date entered in parameter,

P_MILEAGE_YEAR_END ← Expense Date From is less or equal to the date entered in parameter,

P_CLAIMANT_NO ← Person Reference you are looking at,

The function will sum up the Units where the expense codes are types M (Mileage) and the status of the expense is in the list: 'A','K','H','P','C','F','R'.

2.4. Claim Status Lov

2.4.1. EXBI CLAIM STATUS DESCRIPTION

This function will return the item Claim Status Description from the view Claim Status Lov from Expense for the parameter entered as such:

The screenshot shows a dialog box titled "Enter Function Parameters". At the top, there is a note: "* Denotes a mandatory parameter". Below this, there is one input field with a dropdown arrow on the right: "P_CLAIM_STATUS_CODE*". At the bottom of the dialog, there are two buttons: "CANCEL" and "OK".

P_CLAIM_STATUS_CODE ← Status Code you are looking at,

2.4.2. EXBI GET CLAIM STATUS DESC

This function will return the item Claim Status Description from the view Claimant Status Lov from Expense for the parameter entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_CLAIM_STATUS*

CANCEL OK

P_CLAIM_STATUS ← Claim Status you are looking at,

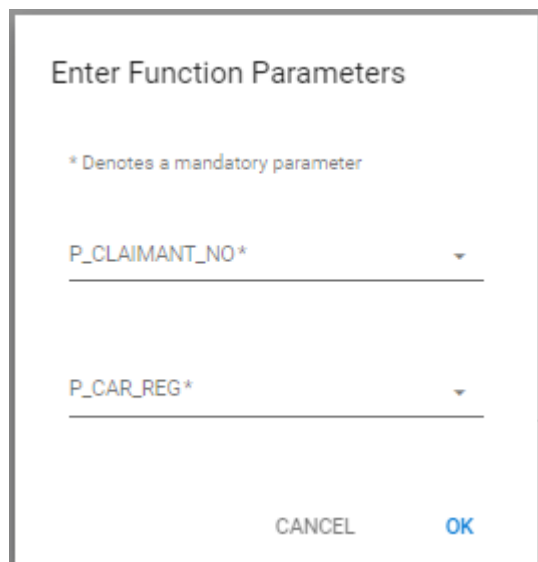

The function will retrieve the description from that screen:

Claim Status	Description	Status Type
AP	APPROVED	A
BF	BROUGHT FORWARD	F
CA	CANCELLED	Z
CK	CHECKED	K
CR	CREDIT	C
HO	HOLD	H
PA	PAID	P
RE	RE-ISSUED	R

2.5. Claimant Car

2.5.1. EXBI GET CAR INSURANCE EXPIRY

This function will return the item Car Insurance Expiry Date from the view Claimant Car from Expense for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_CLAIMANT_NO* ▼

P_CAR_REG* ▼

CANCEL OK

P_CLAIMANT_NO ← Claimant Reference you are looking at,

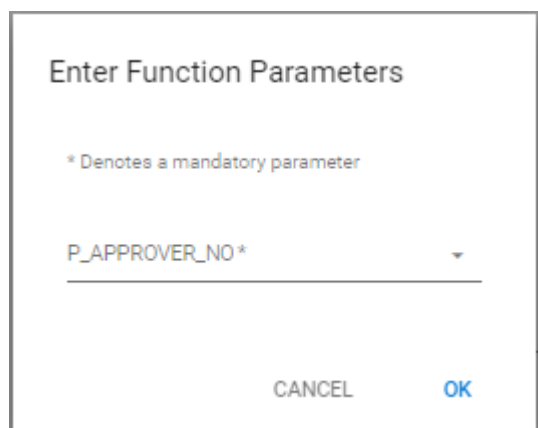

P_CAR_REG ← Car Registration you are looking at,

The function will retrieve the latest car insurance expiry date for the parameters above.

2.6. Claimant Master

2.6.1. EXBI APPROVER FORENAME

This function will return the item Forename from the view Claimant Master from Expense for the parameter entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

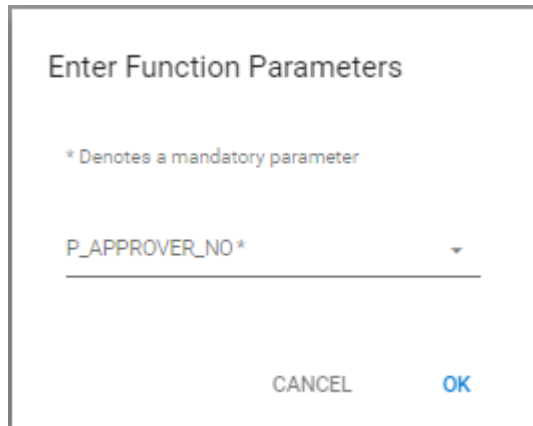

P_APPROVER_NO* ▼

CANCEL OK

P_APPROVER_NO ← Person Reference you are looking at,

2.6.2. EXBI_APPROVER_SURNAME

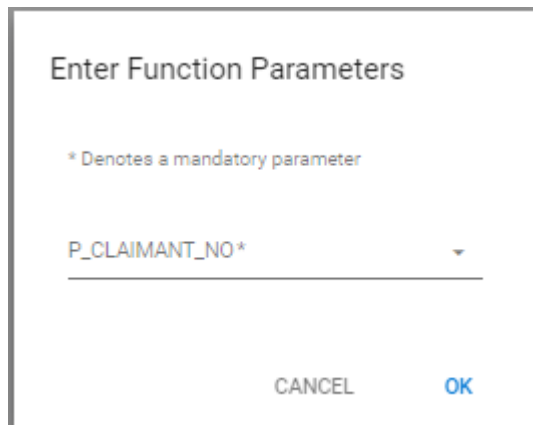

This function will return the item Surname from the view Claimant Master from Expense for the parameter entered as such:

P_APPROVER_NO ← Person Reference you are looking at,

2.6.3. EXBI_GET_EMAIL_ADDRESS

This function will return the item Email Address from the view Claimant Master from Expense for the parameter entered as such:

P_CLAIMANT_NO ← Person Reference you are looking at,

2.6.4. EXBI_GET_NON_EMP_CLASS_DESC

This function will return the item Non-Employee Classification Description from the view Claimant Master from Expense for the parameter entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_CLASSIFICATION_CODE*

CANCEL

OK

P_CLASSIFICATION_CODE ← Classification Code you are looking at,

The function will return the item from that screen:

2.7. Cost Centre Lov

2.7.1. EXBI GET COST CENTRE DESC

This function will return the item Cost Centre Description from the view Cost Centre Lov from Expense for the parameter entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

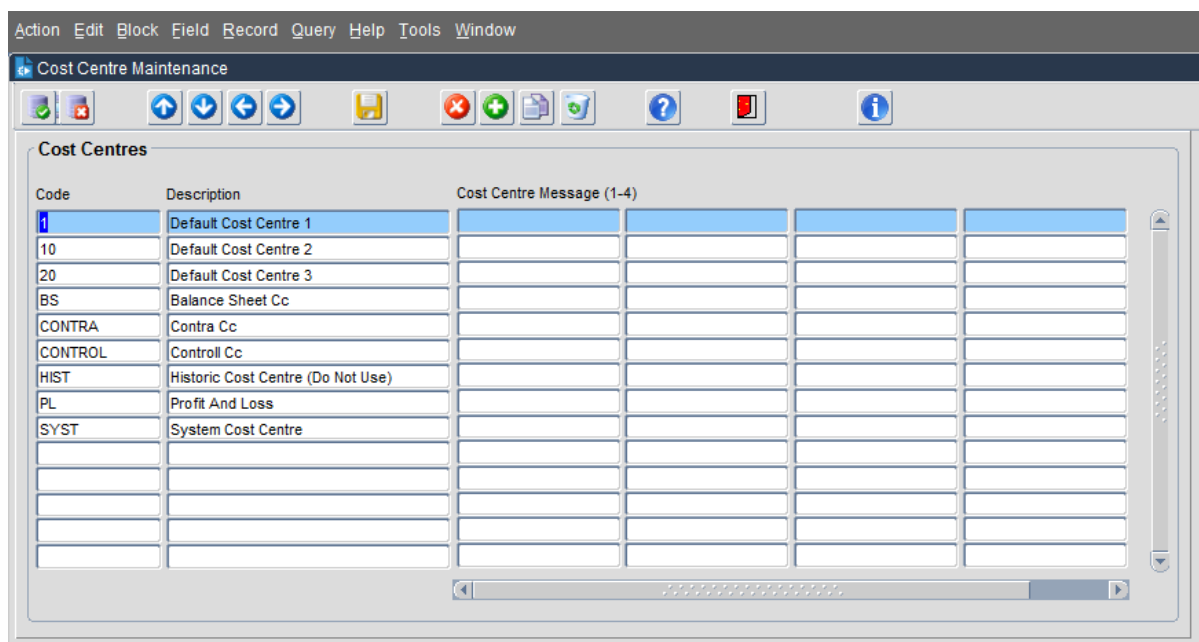

P_COST_CENTRE*

CANCEL

OK

P_COST_CENTRE ← Cost Centre you are looking at,

The function will retrieve the description from that screen:

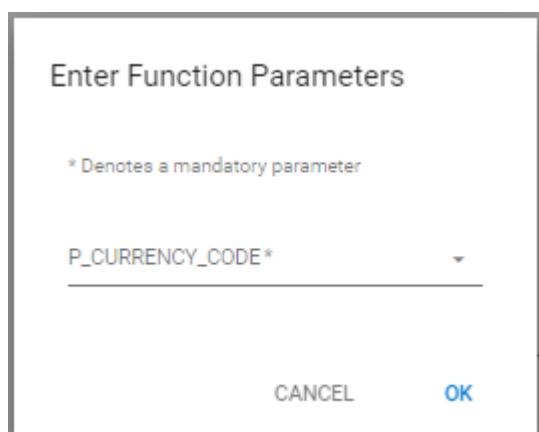

The screenshot shows a software window titled 'Cost Centre Maintenance'. It features a menu bar with 'Action', 'Edit', 'Block', 'Field', 'Record', 'Query', 'Help', 'Tools', and 'Window'. Below the menu is a toolbar with various icons. The main area contains a table with the following columns: 'Code', 'Description', and 'Cost Centre Message (1-4)'. The table lists several cost centres, including 'Default Cost Centre 1' through 'Default Cost Centre 3', 'Balance Sheet Cc', 'Contra Cc', 'Control Cc', 'Historic Cost Centre (Do Not Use)', 'Profit And Loss', and 'System Cost Centre'. There are also empty rows at the bottom of the table.

Code	Description	Cost Centre Message (1-4)
1	Default Cost Centre 1	
10	Default Cost Centre 2	
20	Default Cost Centre 3	
BS	Balance Sheet Cc	
CONTRA	Contra Cc	
CONTROL	Control Cc	
HIST	Historic Cost Centre (Do Not Use)	
PL	Profit And Loss	
SYST	System Cost Centre	

2.8. Currency Code Lov

2.8.1. EXBI GET CURRENCY NAME

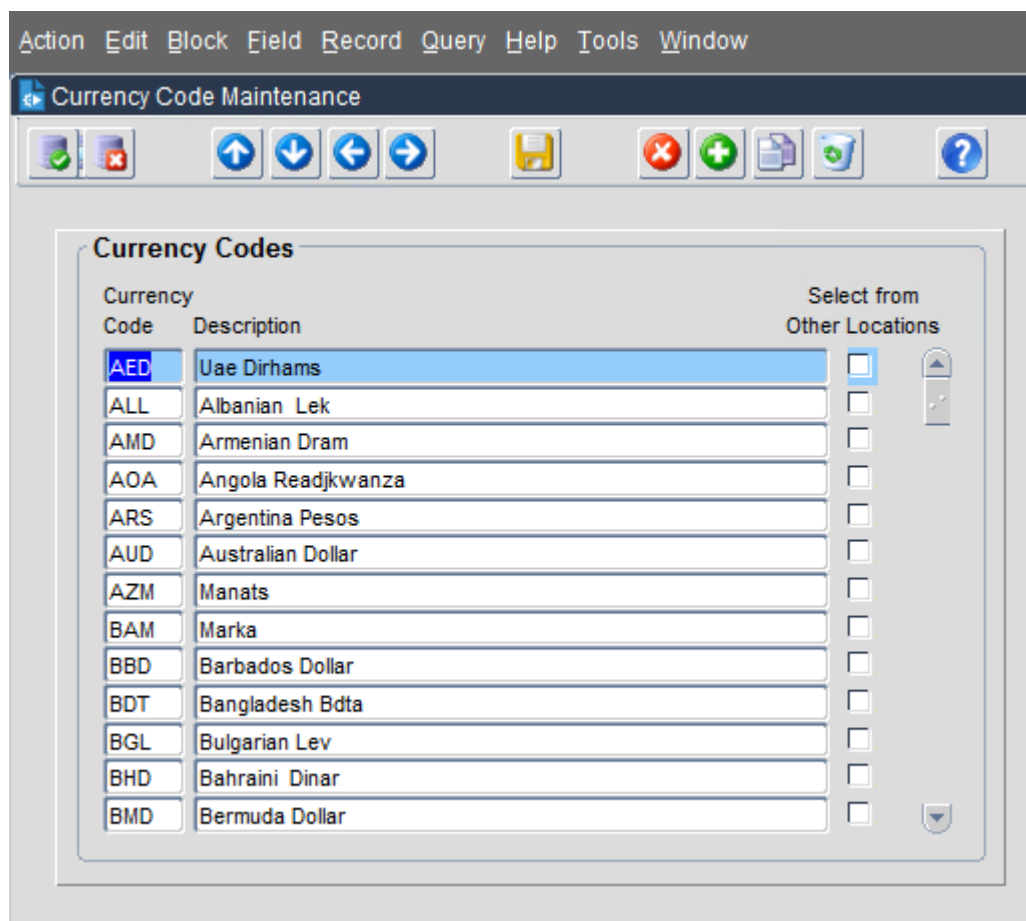

This function will return the item Currency Description from the view Currency Code Lov from Expense for the parameter entered as such:

The screenshot shows a dialog box titled 'Enter Function Parameters'. It contains a text input field with the label 'P_CURRENCY_CODE*' and a dropdown arrow. Below the input field are two buttons: 'CANCEL' and 'OK'. A note above the input field states '* Denotes a mandatory parameter'.

P_CURRENCY_CODE ← Currency you are looking at,

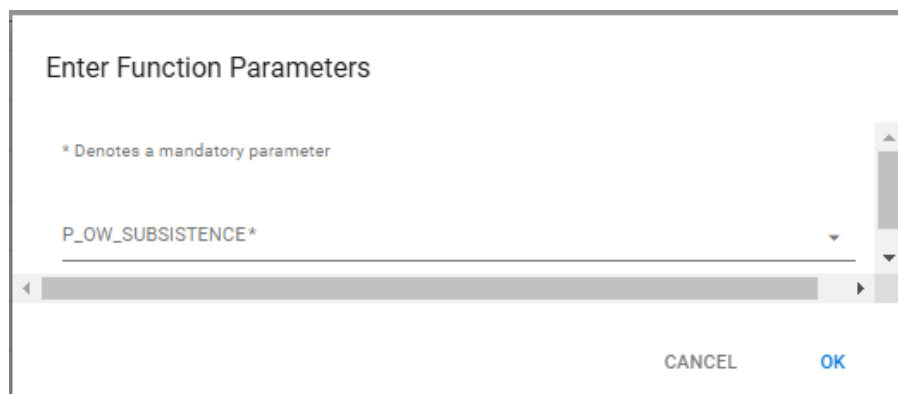

The function will retrieve the description from that screen:

2.9. Exception Expense Ind Lov

2.9.1. EXBI GET OW SUBSISTENCE DESC

This function will return the item Name (Exception Ind Description) from the view Exception Expense Ind Lov from Expense for the parameter entered as such:

P_OW_SUBSISTENCE ← Exception Indicator you are looking at,

The function will return the item from that screen:

[illegible]

2.10. Expense Code Lov

2.10.1. EXBI GET EXPENSE CODE DESC

This function will return the item Expense Code Description from the view Expense Code Lov from Expense for the parameter entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_EXPENSE_CODE*

CANCEL

OK

P_EXPENSE_CODE ← Expense Code you are looking at,

The function will retrieve the item Name from that screen:

Expense Code

Expense Code: 100
Name: Breakfast

2.12. Expense Type Lov

2.12.1. EXBI GET EXPENSE TYPE DESC

This function will return the item Expense Type Description from the view Expense Type Lov from Expense for the parameter entered as such:

Enter Function Parameters

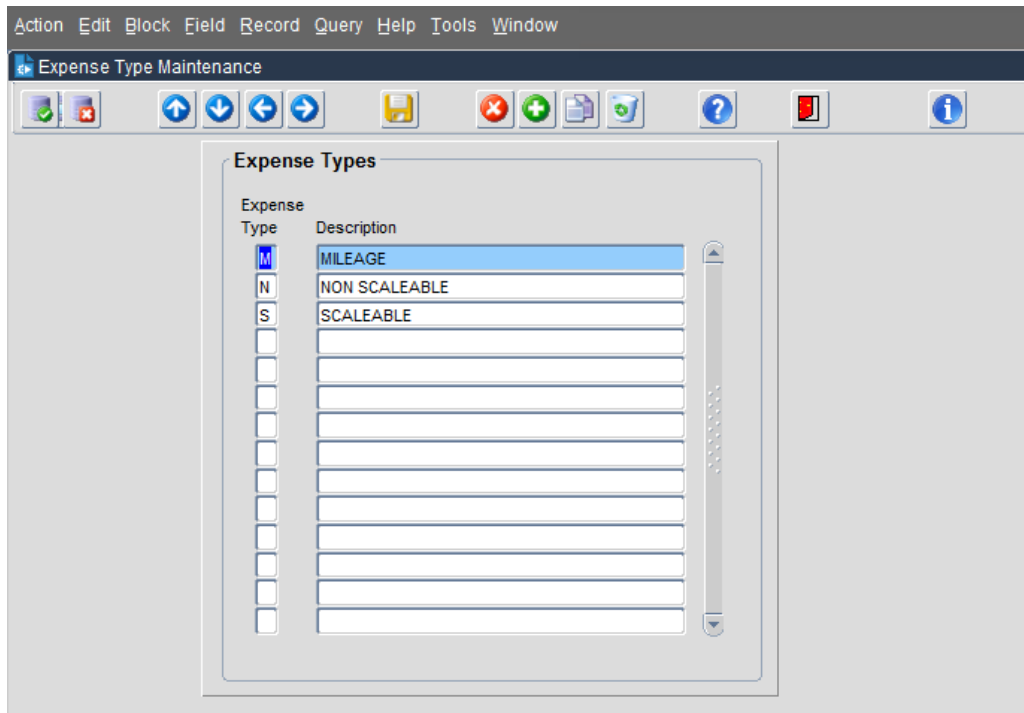

* Denotes a mandatory parameter

P_EXPENSE_TYPE*

CANCEL OK

P_EXPENSE_TYPE ← Expense Type Code you are looking at,

The function will retrieve the item Name (Description) from that screen:

2.13. Reference Data

2.13.1. EXBI GET EX REFERENCE DESC

This function will return the item Description from the Reference Data from Expense for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_REFERENCE_CODE*

P_REFERENCE_TYPE*

CANCEL OK

PeopleXD Insight: XD Expense Functions - Reference Guide

P_REFERENCE_CODE ← Reference Code you are looking at,

P_REFERENCE_TYPE ← Reference Type you are looking at,

Example with the VAT Code Rates here:

The reference type will be VAT and the reference codes in my example would be:

The screenshot shows the 'VAT Code Rate Maintenance' window. It contains a table with the following data:

VAT Code	Description	VAT Rate	Date Effective
1	STANDARD RATE IRL	23.0000	01-JAN-2014
5	STANDARD RATE UK	20.0000	01-JAN-2019

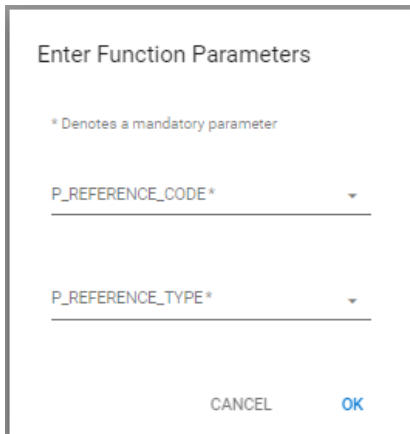

The function will then give you the description attached to the code above.

Note: There is no uncomplicated way to find the reference types, you might ask the Access Group to guide you on this matter. In standard, examples of types for that function will be:

- VAT: VAT Code Rates,
- LCAT: Location Category,

2.13.2. EXBI GET EX REFERENCE2 DESC

This function will return the item Description from the Reference Data from Expense for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_REFERENCE_CODE* ▼

P_REFERENCE_TYPE* ▼

CANCEL OK

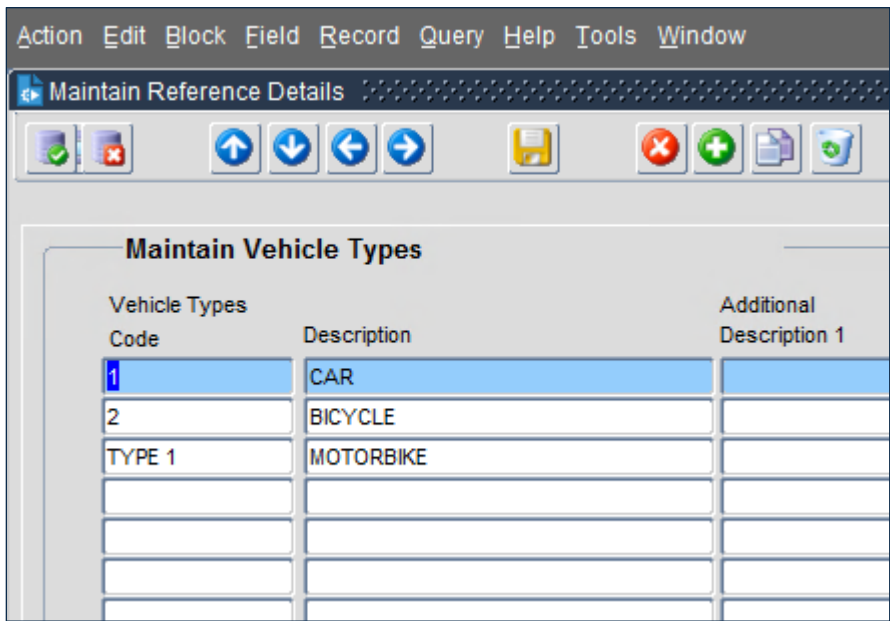

P_REFERENCE_CODE ← Reference Code you are looking at,

P_REFERENCE_TYPE ← Reference Type you are looking at,

Example with the Vehicle Types here:

The reference type will be VTYPE and the reference codes in my example would be:

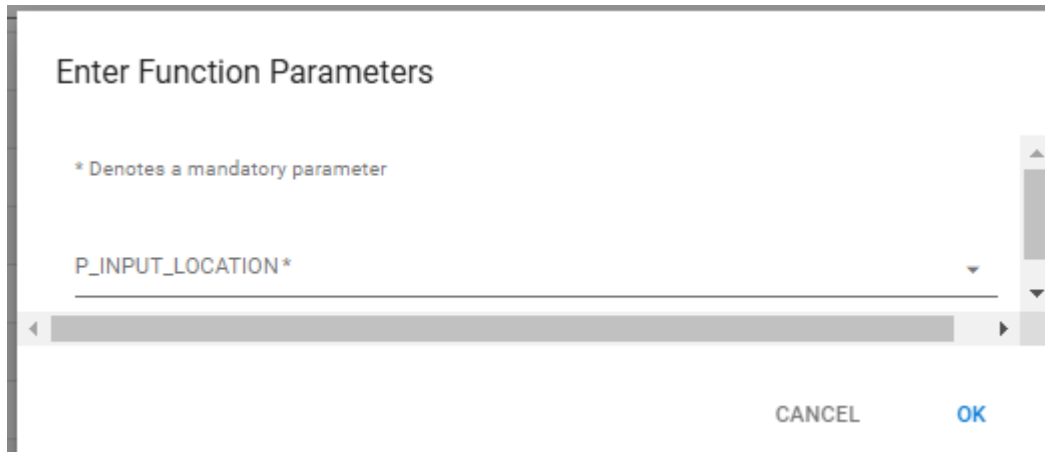

The function will then give you the description attached to the code above.

 **Note:** There is no uncomplicated way to find the reference types, you might ask the Access Group to guide you on this matter.

2.13.3. EXBI_GET_INPUT_LOCATION_DESC

This function will return the item Name from the Reference Data from Expense for the parameters entered as such:

Enter Function Parameters

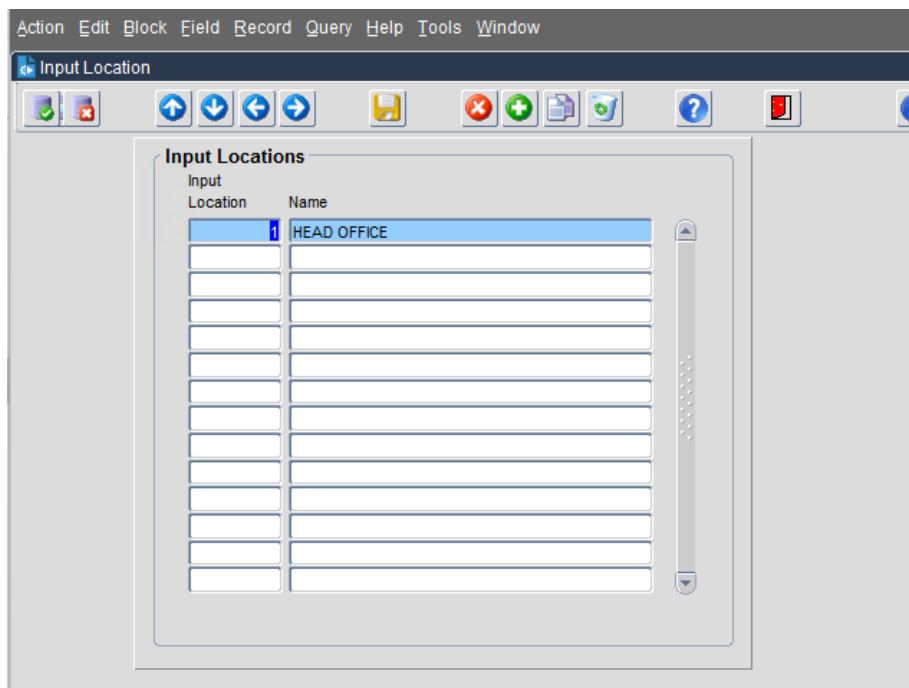

* Denotes a mandatory parameter

P_INPUT_LOCATION*

CANCEL OK

P_INPUT_LOCATION ← Input Location you are looking at,

You will retrieve the item Name from that screen:

Input Location

Input Location	Name
1	HEAD OFFICE

2.13.4. EXBI_GET_LOC_CATEGORY_DESC

This function will return the item Name from the Reference Data from Expense for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_LOCATION_CATEGORY*

CANCEL OK

P_LOCATION_CATEGORY ← Location Category Code you are looking at,

You will retrieve the item Name from that screen:

Category Code	Description	GL Expense Code	Description

CANCEL OK

P_TRIP_ID ← Trip id you are looking at,

P_TRIP_ID_SEQ ← Trip id Sequence you are looking at,

P_TRIP_DETAIL_ID ← Trip Detail id you are looking at,

P_TYPE ← Can be:

- 'ADD_PARTIES', the item will be Attendee,
- 'FURTHER_PARTIES', the item will be Position,
- 'PARTIES', the item will be Reference2
- 'PURPOSE', the item will be Purpose,
- 'VENUE', the item will be Venue,
- 'INVOICE_NO', the item will be Reference1.

Depending on the parameter in P_TYPE, you will retrieve information from the screen below:

The screenshot displays the 'Business Meal' entry form within the PeopleXD Expense Management system. The form is titled 'Business Meal' and includes a 'Car Reg.' field. The main data entry area contains a table with columns: Date From, Date To, Venue, Attendee, Purpose, Client, and Position. The first row is populated with '20-JAN-2018', '20-JAN-2018', 'dfg', 'dfgd', 'dfgdg', '6600', and 'dgfdg'. Below the table, there are buttons for 'Save', 'Delete', and 'Close'. At the bottom of the form, a summary table shows the following values:

Sub Total	100.00
Already Paid	0.00
Deductions	0.00
Total	100.00

Additional buttons at the bottom include 'Mileage Detail', 'Additional Info', 'Currency Detail', 'Analysis Detail', 'View Imprest', 'Upgrade Officer', 'Submit for Approval', and 'All Trips'.

2.14.2. EXBI_GET_MILES_YTD_NOT_PAID

This function will return the Sum of Units Details from the view Trip Detail from Expense for the parameters entered as such:

The screenshot shows the 'Enter Function Parameters' dialog box for the EXBI_GET_MILES_YTD_NOT_PAID function. The dialog box has a title bar and a main area with the following text:

Enter Function Parameters

* Denotes a mandatory parameter

P_MILEAGE_YEAR_START *

P_MILEAGE_YEAR_END *

P_CLAIMANT_NO *

At the bottom of the dialog box, there are 'CANCEL' and 'OK' buttons.

P_MILEAGE_YEAR_START ← Trip Date from Date is greater or equal to the date entered in parameter,

P_MILEAGE_YEAR_END ← Trip Date From is less or equal to the date entered in parameter,

P_CLAIMANT_NO ← Person Reference you are looking at,

The function will sum up the Units where the expense codes are types M (Mileage) and the status of the trip is in the list: APPROVED, SUBMITTED, RESUBMITTED.

2.14.3. EXBI GET TRIP COST CENTRE

This function will return the item Cost Centre from the view Trip Detail from Expense for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter
