1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to use the Health and Safety module in CoreHR and configure the module to accurately record actions, incidents, inspections and audits.

This guide includes how to navigate and use the health and safety dashboard and its widgets available to CorePortal health and safety administrators. It also outlines how to roll out access to the organisation and specific users to the product.

In addition to the above, this guide features steps on how to complete the different stages and approval steps included within the health and safety processes.

2. Accessing Health & Safety

2.1. Overview

2.1.1. Baseline Configuration Overview

Note: The following points are important to know when configuring & viewing the *Health & Safety Dashboard* & its accompanying tabs:

- The *Health & Safety Dashboard* comes pre-configured, with tabs and other items / reference data pre-configured as outlined in this guide. These are set-up as standard and follows best practice configuration.
- Access to the *Health & Safety Dashboard*, tabs, screens & further options are controlled by Security Menu Profiles.

The *Health & Safety Dashboard* is pre-configured with standard settings. The following table provides a list of the tabs and widgets that are available on install:

Tab	Widget / Screen
1. Actions	My Actions
	All Actions
2. Incidents	Incidents
3. Inspections	Inspections
4. Audits	Audits
5. Reference Data	Reference Data

2.2. Default Menu Profiles

2.2.1. Default Menu Profile

The Health & Safety functionality cannot be seen by a CorePortal user unless they have been granted access to the options via Security.

The below pre-configured menu profiles can be used to enable access to the menu options for the *Health & Safety* module by default.

Menu Profile	Description
COREPORTAL_HS_ADMIN	This allows an admin user to have administrative rights to create and edit or delete all items on the health and safety dashboard.
COREPORTAL_HS_MANAGER	This allows you to assign the health and safety dashboard to a manager who has access to edit and view items.

Note:

The menu option “*Health and Safety - Show Link*” is enabled in each of the default menu profiles. If new profiles are created, you must ensure this menu item is enabled to allow access to Health & Safety.

2.2.2. Menu Options

The below table outlines each of the Health & Safety menu options and explains what each of them control on CoreHR.

System	Menu Option	Description
CorePortal	Health and Safety - My Actions	This enables the My Actions sections on the Actions tab.
CorePortal	Health and Safety - Action Create	This allows you to create an action.
CorePortal	Health and Safety - Action Delete	This allows you to delete an action.

System	Menu Option	Description
CorePortal	Health and Safety - Action Edit	This allows you to edit actions on the <i>Actions tab</i> . On the <i>My Actions</i> section, only those actions that are assigned to an employee or for which they are responsible can be edited.
CorePortal	Health and Safety - Action View	This allows you to access the <i>Actions tab</i> . You are able to see actions assigned to you and actions for which you are responsible for.
CorePortal	Health and Safety - Action Admin	This allows you to edit or delete any actions that have been assigned to you, that you are responsible for, that you have created or have been assigned to your organisational structure.
CorePortal	Health and Safety - Incident View	This allows you to view all incidents that you have created, that you have an action that you are responsible for, that has been assigned to you or within your organisational structure.
CorePortal	Health and Safety- Incident Create	This allows you to create incidents with no restrictions. It's status is locked to "For Approval". Amendments and changes are allowed but once the status is approved no changes can be made. Changes can still be made during the following statuses: 1. Unapproved 2. Rejected
CorePortal	Health and Safety - Incident Approver	This allows you to approve incidents previously reported. You can select a status of 'Open' or 'Rejected'. You are only able to approve incidents that have been reported against your organisational structure.
CorePortal	Health and Safety - Incident Delete	This allows you to delete an incident
CorePortal	Health and Safety - Incident Edit	This allows you to edit an incident.

System	Menu Option	Description
CorePortal	Health and Safety - Inspection View	This allows you to view all inspections that you have created, that you have an action for which you are responsible for, that you have been either assigned to yourself or that has been assigned to your organisational structure.
CorePortal	Health and Safety - Inspection Edit	This allows you to edit an inspection.
CorePortal	Health and Safety - Inspection Delete	This allows you to delete an inspection.
CorePortal	Health and Safety - Inspection Create	This allows you to create an inspection.
CorePortal	Health and Safety - Audit View	This allows you to view audits where you have created the audit or have an action that you are responsible for or assigned to you. You can also see other audits assigned to your organisational structure.
CorePortal	Health and Safety - Audit Edit	This allows you to edit an audit.
CorePortal	Health and Safety - Audit Create	This allows you to create an audit.
CorePortal	Health and Safety - Audit Delete	This allows you to delete an audit.
CorePortal	Health and Safety - Show Config	This needs to be enabled to view the health and safety dashboard

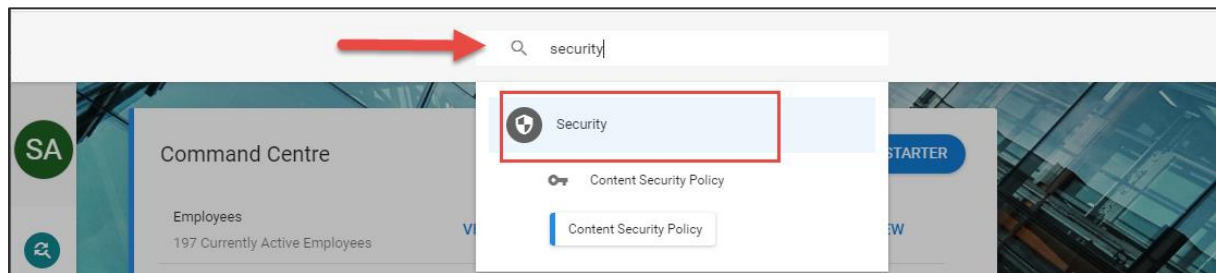

System	Menu Option	Description
CorePortal	Health and Safety - Show Link	This needs to be enabled to view the health and safety dashboard

2.3. System Users

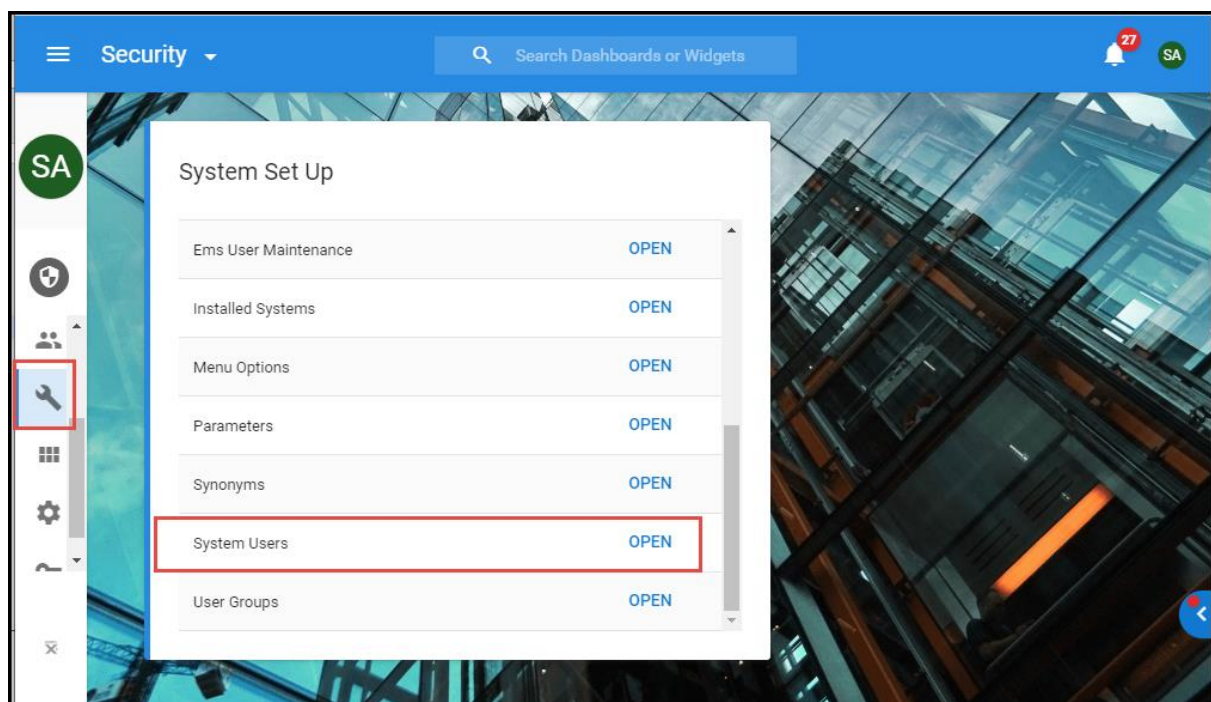

The integration of the organisational structure is fundamental to how the Health & Safety module security works. Controls need to be in place to determine specific data items that you can have access to.

To enable Health & Safety System Users:

1. Quick jump to *Security* dashboard

2. Go to the *Setup* tab and click the **Open** button which correlates to *System Users*.

3. Ensure the Security Type of 'Health And Safety Access' is enabled, along with the correct structure code and access level selected.
 - a. Username
 - b. Security Type = Health and Safety Access
 - c. Structure Code
 - d. Access Level
 - e. Access Granted enabled / disable

4. Once enabled, this allows you to view, edit, delete and action on items that are linked to your access level (e.g. Company Level as above).

3. Health & Safety Dashboard

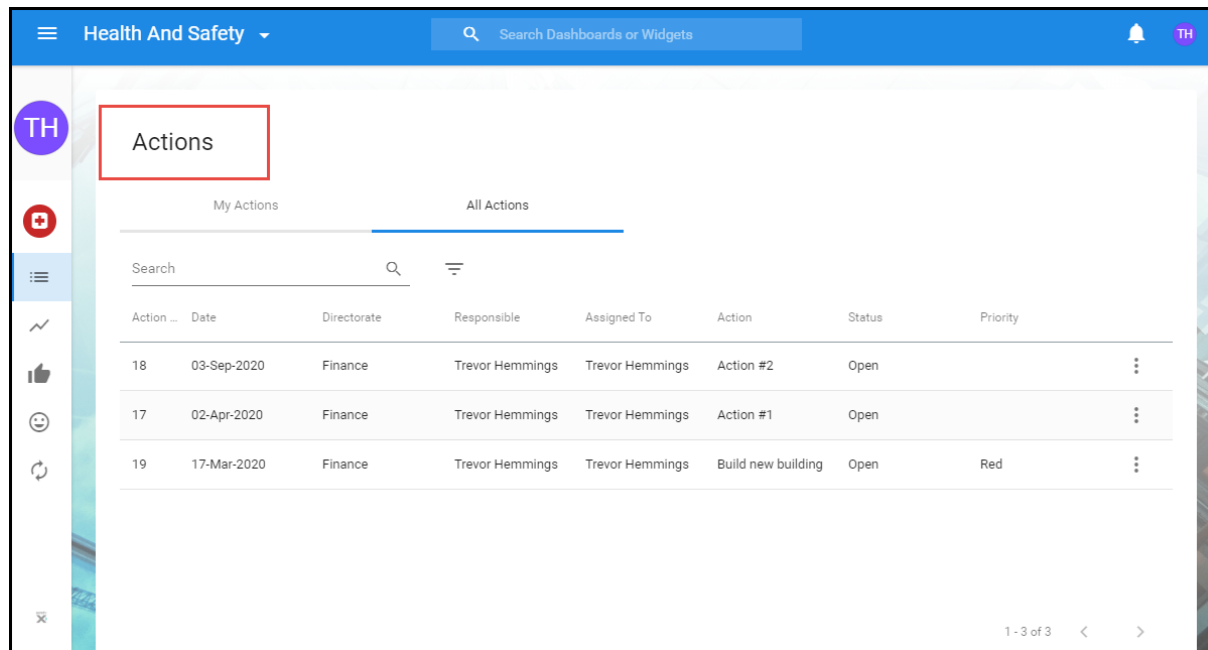

3.1. Accessing Dashboard

To access the Health and Safety Dashboard, follow the below steps:

1. Quick Jump to the *Health and Safety* dashboard.

2. This opens the Health and Safety dashboard, and defaults to show the Actions section of the Health and Safety Dashboard. The list is ordered by Date (newest first).

3.2. Repeated Configuration / Actions for Sections

Within most sections, there are standard items that can be configured / actioned on to ensure the Health and Safety process is an easy flowing process. Follow the below steps which are found in most, if not all sections of the Health and Safety dashboard.

- All mandatory fields must be completed on each step before the next step becomes enabled.
- Each mandatory field is recognised with an Asterix (*).
- If you click the **Next** button and a mandatory field is not populated, then an error is displayed, and the mandatory fields are highlighted in Red.

3.2.1. Search & Filtering

On each tab on the Health and Safety dashboard, there is functionality to search and filter all items to be returned, which is highlighted in the below screenshot taken from the *Incidents* tab:

All items can be displayed on the dashboard by clicking the  button on each individual tab for Actions, Incidents, Inspections or Audits.

Once open, filters can be applied to return specific information that needs to be seen or actioned on. The following image refers to the filtering that can be used for Actions.

RESET APPLY

The table below explains what each filter item relates to and what they are linked to in the system. There are other ad-hoc filters that can be enabled depending on what screen you are working off.

Filter	Description
Source	Actions and inspections can be filtered on where on the Health and Safety dashboard they have been created from i.e. Incidents, Inspections or Audits screens.
Status	You can filter items on their status, as per section 4.2 Status Drivers .
Start Date	This is the start date that the item is to take place from.
End Date	This is the end date that the item needs to be completed by. This is also known as the <i>Due Date</i> .
Company / Directorate / Division / Management Unit / Department	This refers to the level of your Organisational Hierarchy.
Priority	You can filter items on the priorities assigned to them. Priorities can be managed as reference data.

You also have the ability to search the list based on the column headings. Enter text in the *Search* field and click on the  button.

3.2.2. View and Edit items

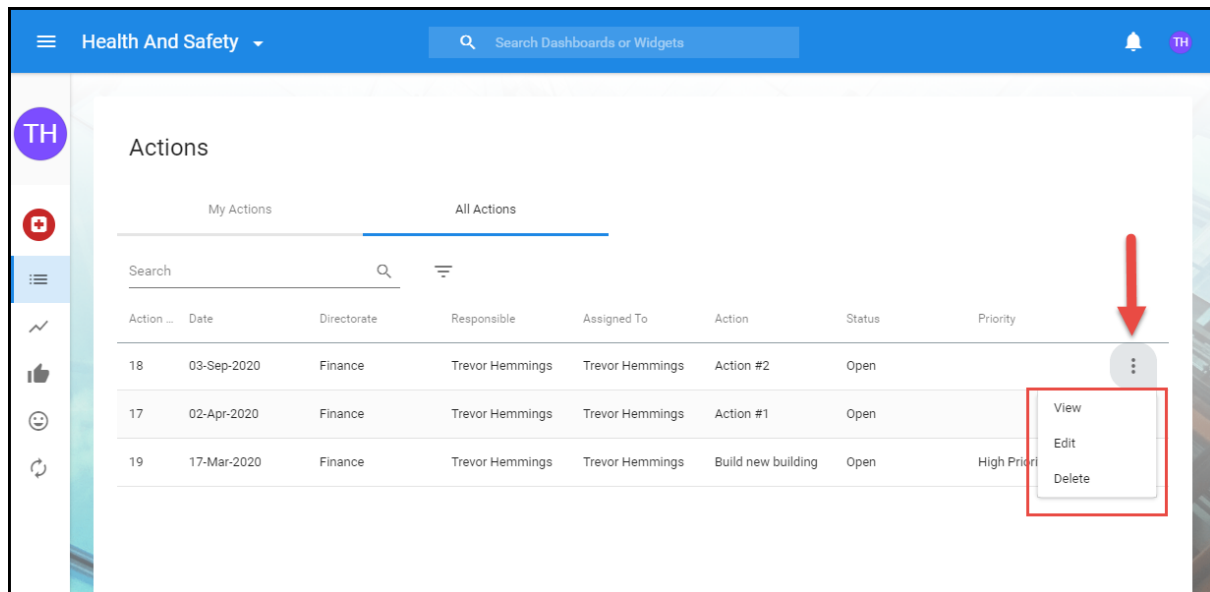

Each item on the actions, incidents, inspections and audits tab have a list of options that can be selected by clicking the  button. The 3 possible options are

1. View
2. Edit
3. Delete

The below menu options control access to allow users access to these items:

System	Menu Option	Description
CorePortal	Health and Safety - Action View	This allows you to access the <i>Actions tab</i> . You are able to see actions assigned to you and actions for which you are responsible for.
CorePortal	Health and Safety - Action Edit	This allows you to edit actions on the <i>Actions tab</i> . On the <i>My Actions</i> section, only those actions that are assigned to an employee or for which they are responsible can be edited.
CorePortal	Health and Safety - Action Delete	This allows you to delete an action.

The options are controlled by the menu profile assigned to the user. The options can be selected by clicking on the edit wheel icon adjacent to the action

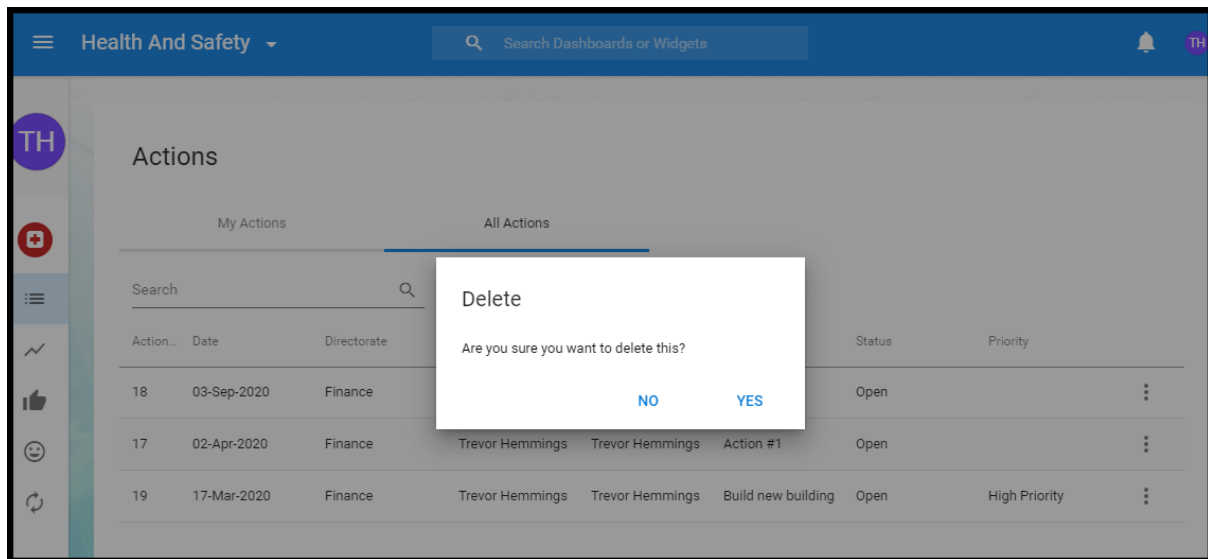

When you click the **View** button against an item, the it opens in read only mode. You cannot edit the details of the item or add a new document to the item via this screen.

When you click the **Edit** button, the item screen becomes editable. You can edit the details of the item or add a new document to the action.

3.2.3. Delete Items

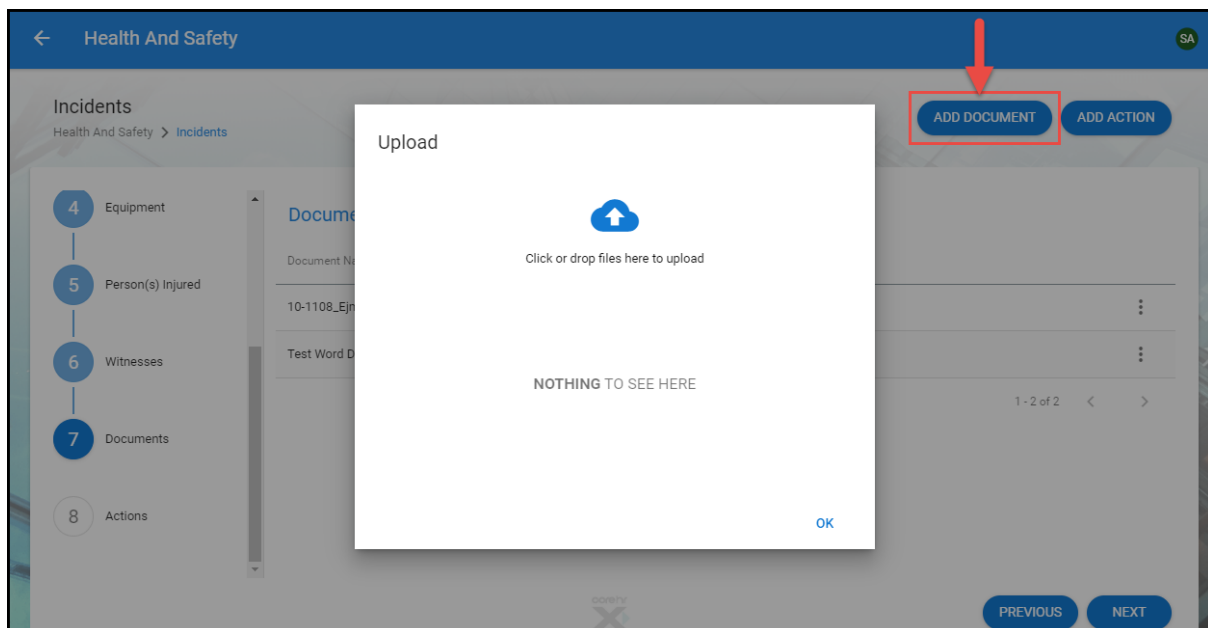

When the **Delete** button is selected, a deletion confirmation message is displayed with the options "Yes/No"

- If **No** is selected, then the item is deleted.
- If **Yes** is selected, then the item is deleted.

3.2.4. Documents

On all tabs on the Health and Safety Dashboard, it is possible to add a document. To upload a document, click on the **Add Document** button on screen and use the file upload screen.

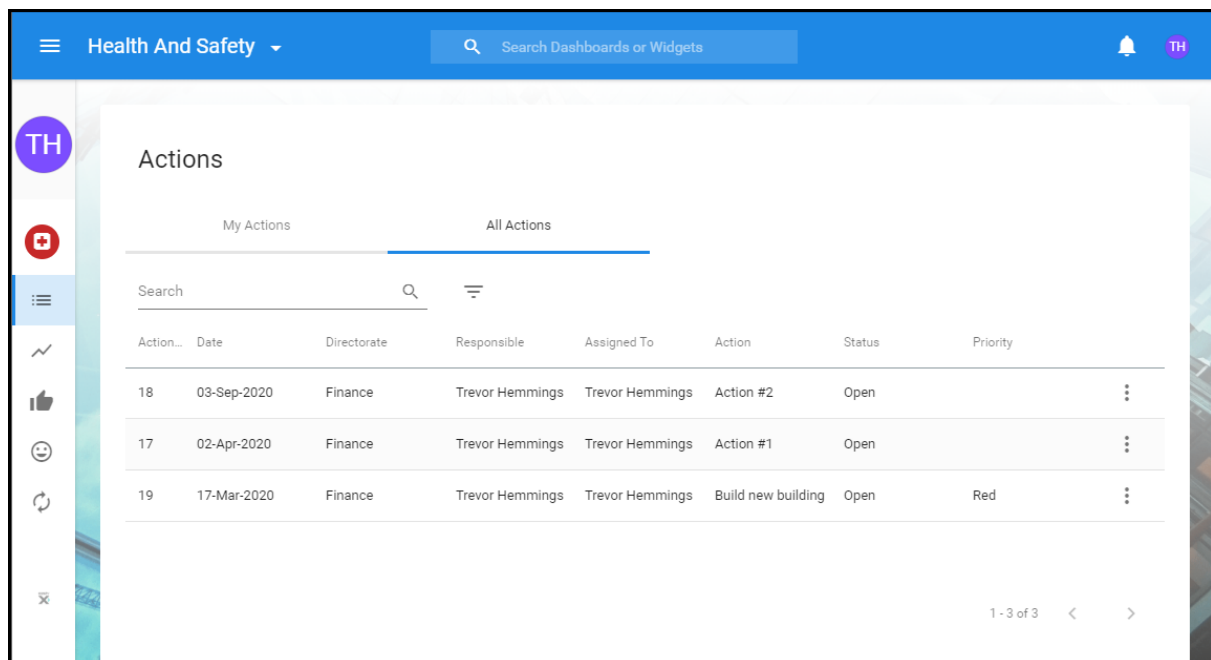

Once uploaded, a document can be downloaded from the screen by clicking the **View** button or removed completely by using the **Delete** button.

4. Actions

4.1. Actions tab

The Actions tab allows you to manage and view all list of actions that have been created within the Health and Safety dashboard. This screen is broken up into two sections and shows certain information about each action e.g. Due Date, Status, Priority etc

Section	Description
My Actions	This shows all actions that have been assigned to you to manage and edit.
All Actions	This shows all actions assigned across the business that need to be managed and completed.

4.2. Status Drivers

When an action is created in the context of an audit, incident or inspection then the status of the underlying actions dictates the status of the overall item. The order of priority and translation can be seen below:

Action Status	Description
Overdue	This is used when the <i>Due Date</i> has passed.
Open	This is used for the duration of an action until it has been investigated, before approval is required.
Closed	This is used when the action has been completed.
For Approval	This is set when the action is required to be approved.
Approved	This is used once the action has been approved to be actioned on.
Programmed	Programmed is used in exceptional circumstances where an action is required but due to the need to identify very significant funding, the precise date for completion of the action cannot yet be determined. This can be used when additional action(s) is/are included which require the identification of the necessary funding and the assignment of overall management of the project are included. These item statuses are: • Overdue • Unapproved • Open • Completed

The screenshot below shows what these statuses look like from the *Action Details* screen.

Programmed

SAVE

Note:

- It is recommended that the person assigning an *Action* only completes the *Person Responsible for Completion* field with the name of the Senior or Senior Executive Engineer or analogous grade in charge of the area.
- It is then up to that person to determine if they wish to assign the *Action* to another person and can so this using the *Person Assigned to Complete* field.
- When the *Person Assigned to Complete an Action* has completed it, they can only mark the *Action* as being *For Approval*.
- It is the responsibility of the *Person Responsible for Completion* to then review the *Action* and mark as *Closed* if they are satisfied that it has been completed satisfactorily.

4.3. Status Update

The status of any *Action* that has not been closed updates automatically to *Overdue* when the actual date exceeds the *Due Date*. The associated *Inspection*, *Incident* or *Audit* also then automatically updates to *Overdue* at this time regardless of the status of any other *Actions* associated with it.

The table below outlines what happens when all of the *Actions* associated with an *Inspection*, *Incident* or *Audit* are updated:

Action Status	Incident, Inspection or Audit Status
Open	Open
Closed	Closed

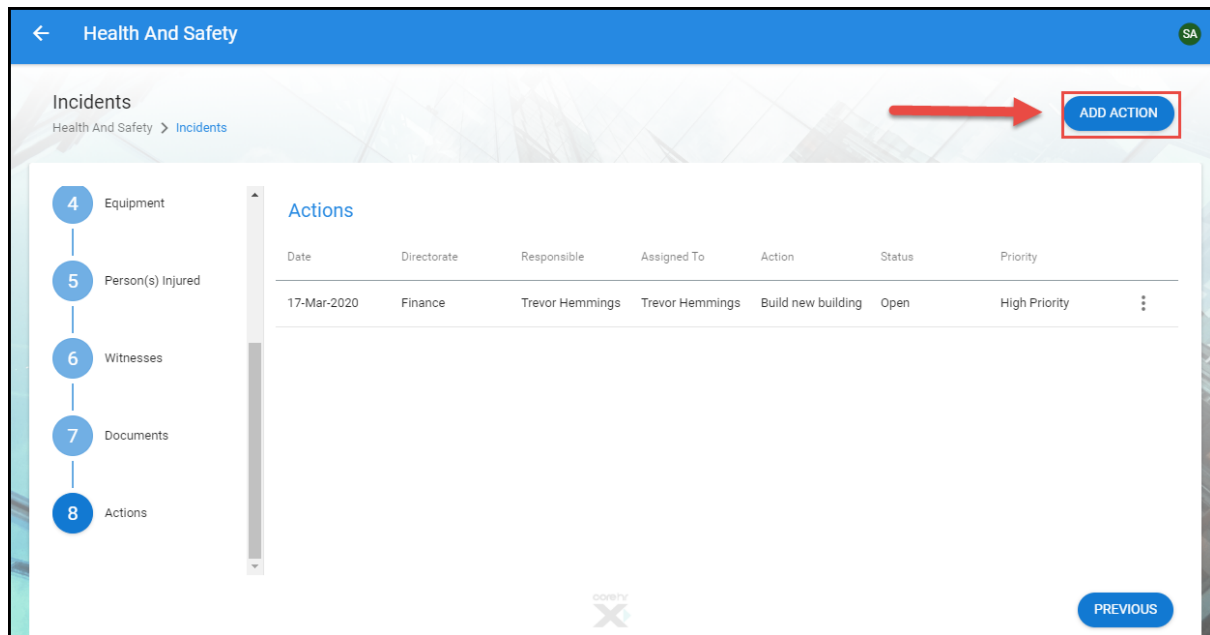

4.4. Action Details

4.4.1. Add Action

Within this document there is a dedicated section on managing and viewing actions (see [section 4. Actions](#)). However, throughout the Health and Safety dashboard, it is possible to add an action to an incident, an inspection or an audit.

To carry this out, follow the below steps:

1. On the final step on each incident, inspection or audit wizard, click on the **Add Action** button.

- The items that need to be entered when creating an action are explained in [section 4.4.1 View Action and Edit Action](#). The following image shows what the *Add Action* screen looks like:

The 'Add Action' form is displayed. It has a title 'Add Action' at the top. The form is divided into two columns. The left column contains: 'Status *' with a dropdown menu showing 'Open' and a 'Select the status' prompt; 'Due Date *' with a date picker showing '12-Mar-2021' and a 'Select the due date' prompt; 'Action Details *' with a text input field containing 'Please refer to Incident Details for further ...' and an 'Enter the details' prompt. The right column contains: 'Priority' with a dropdown menu showing 'Average Priority' and a 'Select the priority' prompt; 'Completed On' with a date picker and a 'Select the date of completion' prompt; 'Comments' with a text input field and an 'Enter comments' prompt. At the bottom right, there are 'CANCEL' and 'OK' buttons.

4.4.2. View Action & Edit Action

The table below explains the items on screen and what they relate to:

Item	Description	View Only	View and Edit (Upload)
Source	This shows where on the Health and Safety dashboard this action originated from.	Yes	No
Incident / Inspection / Audit No.	This is the unique incident number given to an action when created.	Yes	No
Risk Register Update Required	This is a document used to manage risk and compliance.	No	Yes
Person Responsible for Completion	This shows the person / employee required to complete this action.	No	Yes
Person Assigned to Complete	This shows the person / employee that has been given ownership of the task to complete	No	Yes
Status	This shows the current status of the action.	No	Yes
Priority	This shows the current priority level of the action.	Yes	No
Due Date	This shows the date by which the action needs to be completed by.	No	Yes
Completed On	This shows the date on which the action was completed.	No	Yes
Action Details	This is a free text field that can hold a maximum of 500 alphanumeric characters.	No	Yes
Comments	This is a free text field that can hold a maximum of 500 alphanumeric characters.	No	Yes
Documents	This is the section where documents can be attached to an action for further guidance or information.	No	Yes

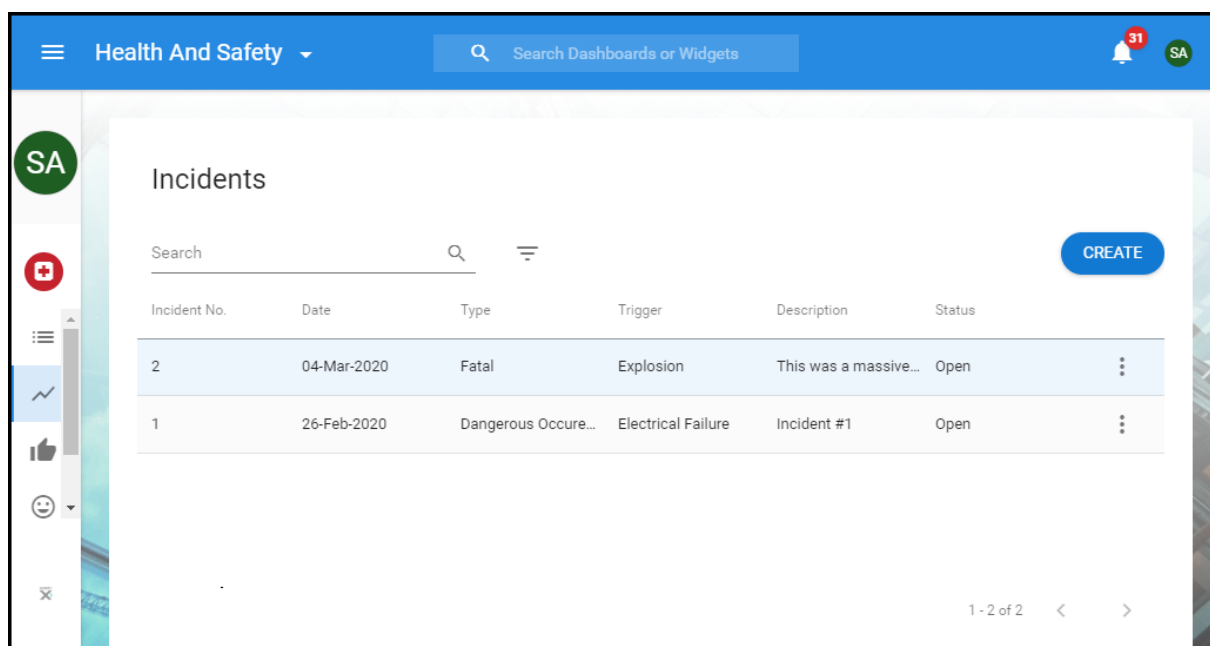

5. Incidents

5.1. Incidents Tab

From the Health and Safety dashboard you can navigate to the *Incident* tab where you can create new incidents or search existing incidents. The Incidents tab allows you to manage and view all list of incidents that have been created within the Health and Safety dashboard.

To open the Incidents screen:

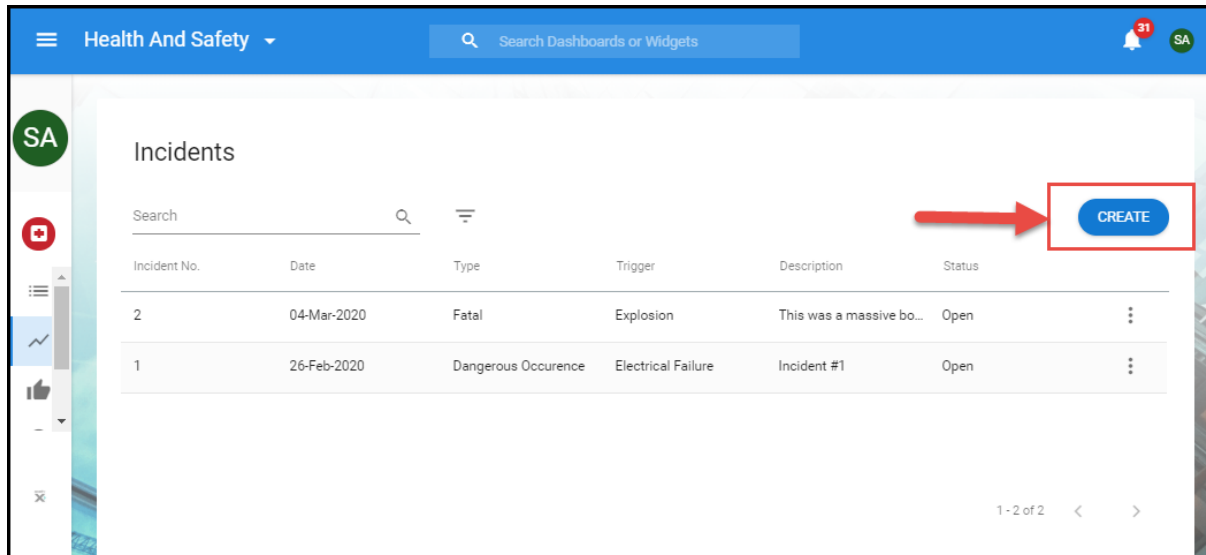

1. Go to the Health and Safety dashboard
2. Click on the Incidents tab
3. Within this screen, the following items are shown:

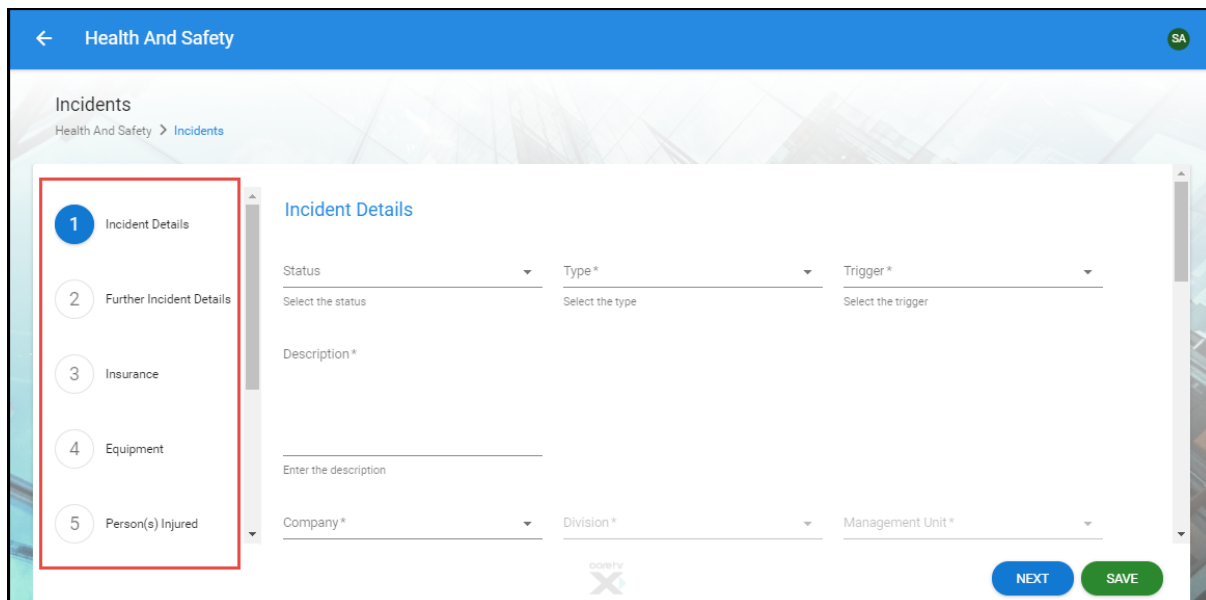

Item	Description
Search	This allows you to search for any incident
Filter	This allows you to filter on an incident.
Incident No	This shows the incident number assigned to the incident.
Date	This is the date the incident occurred.
Type	This is the type of incident that occurred.
Trigger	This is the trigger / reason as to why the incident occurred.
Description	This allows you to describe the incident in detail.
Status	On creation, this needs to be given an unapproved status.

5.2. Create New Incident

To create a new Incident, go to the Incident tab on the *Health and Safety Dashboard* and click the **Create** button.

This automatically opens the Incident wizard, which is compiled of the following steps:

Step	Name	Description
1	Incident Details	This step includes the detail that drives filtering, searching and general information about the incident that took place.
2	Further Incident Details	This includes additional information that can be added after the incident has been raised.
3	Insurance	This holds details surrounding the insurance policy and claim.
4	Equipment	This holds information surrounding equipment used or damaged by the incident.
5	Person(s) Injured	This step can be used to add a person who was involved in the incident. It is an optional step.
6	Witnesses	This step includes any or all witnesses of the incident.
7	Documents	Documents can be added to an incident at any time during the process.
8	Actions	An action needs to be created for an incident.

5.2.1. Incident Detail

On the *Incident Details* step includes two parts which provides the initial information needed for an incident to be reported on and tracked correctly.

Incident Detail

Within this section, there are seven mandatory fields, along with other optional information that can be edited, which are explained from the following image and table

5.2.2. Further Incident Detail

The *Further Incident Detail* step allows you to enter in additional information about when it was reported and what work environment that it is affecting. You can also enter in detail if a vehicle was involved and the description of the weather conditions at the reported time. This section is not mandatory and there are no mandatory items to complete on this screen.

Information recorded here is often not known at the time of reporting the incident. This can be left blank and completed at a later date

The screenshot shows the 'Further Incident Details' form within the 'Incidents' section of the 'Health And Safety' module. The form is divided into several sections with dropdown menus and checkboxes. The left sidebar shows a progress indicator with five steps: 1. Incident Details, 2. Further Incident Details (current), 3. Insurance, 4. Equipment, and 5. Person(s) Injured. The main form area includes fields for 'Date Reported to HSA' (03-Mar-2020), 'Time Reported to HSA' (09:30), 'Reported to HSA by' (Marie Fox), 'Workplace Environment' (Factory Industrial Site Warehouse), 'Sub Workplace Environment' (Maintenance or Repair Area), 'Item Associated' (Vehicles, Land (buses / lorries / etc.)), 'Sub Item Associated', and a checkbox for 'Was there damage caused?' which is checked. At the bottom right, there are buttons for 'PREVIOUS', 'NEXT', and 'SAVE'.

Note: To record confidential information, tick the Confidential checkbox and enter the information in the corresponding text box.

- This is a free text field with a maximum of 500 alphanumeric characters allowed.
- The only person(s) who can view this information are the incident creator and personnel with full incident administration rights.
- This field is to be used to record sensitive personal information that may be relevant to the incident e.g. if a person has epilepsy or another relevant medical condition.

5.2.3. Insurance

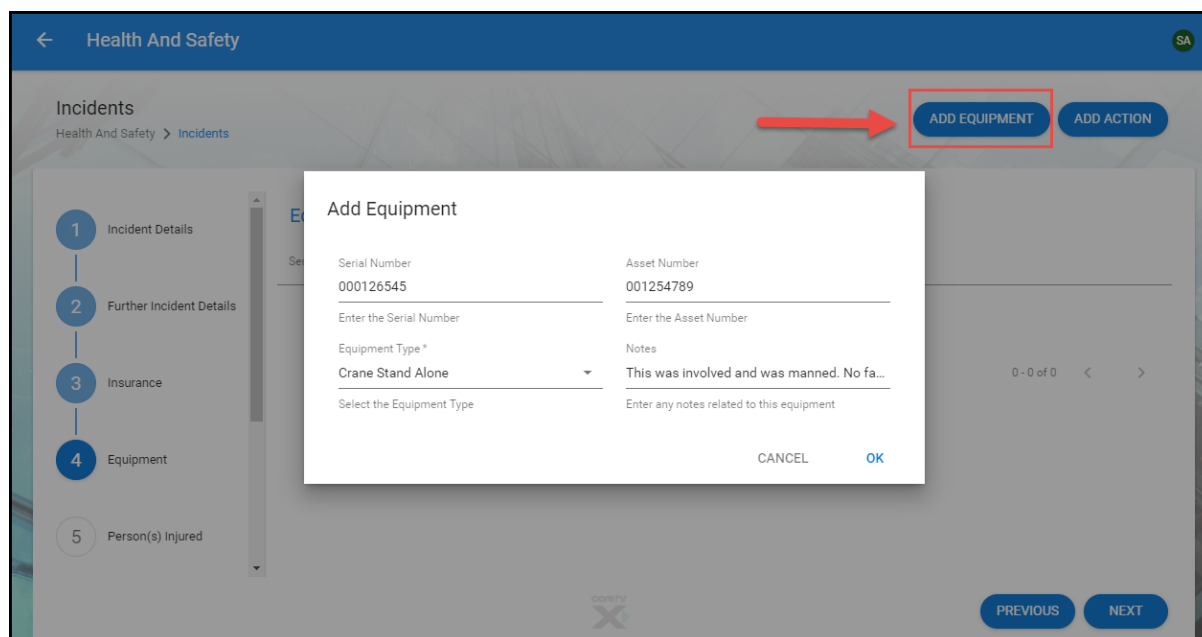

This step allows you to enter in detail about when and who notified your insurance company of the incident. This is not a mandatory step and can be filled out at a later stage. However, it is advised to notify the appropriate bodies as soon as possible.

The screenshot shows the 'Incidents' screen in the XD Health & Safety application. The top navigation bar is blue with a back arrow and the text 'Health And Safety'. A green circle with 'SA' is in the top right corner. Below the navigation bar, the 'Incidents' section is visible, with a breadcrumb 'Health And Safety > Incidents'. To the right of the breadcrumb are two buttons: 'CLEAR DETAILS' and 'ADD ACTION'. On the left side, there is a vertical list of five steps: 1 Incident Details, 2 Further Incident Details, 3 Insurance (highlighted in blue), 4 Equipment, and 5 Person(s) Injured. The main content area is titled 'Insurance' and contains three fields: 'Notified By *' with a dropdown menu showing 'Ann Grant' and a close button 'X'; 'Date Notified *' with a date picker showing '02-Mar-2020'; and 'Time Notified *' with a time picker showing '09:30'. Below these fields are three labels: 'Select who notified this', 'Select the notified date', and 'Enter notified time'. At the bottom of the main content area, there is a label 'Insurance Liaison' and a dropdown menu showing 'Gary Fletcher', with the text 'Select the Insurance Liaison' below it. At the bottom right of the screen are three buttons: 'PREVIOUS', 'NEXT', and 'SAVE'. A small 'COPY' icon is visible in the bottom center of the main content area.

5.2.4. Equipment

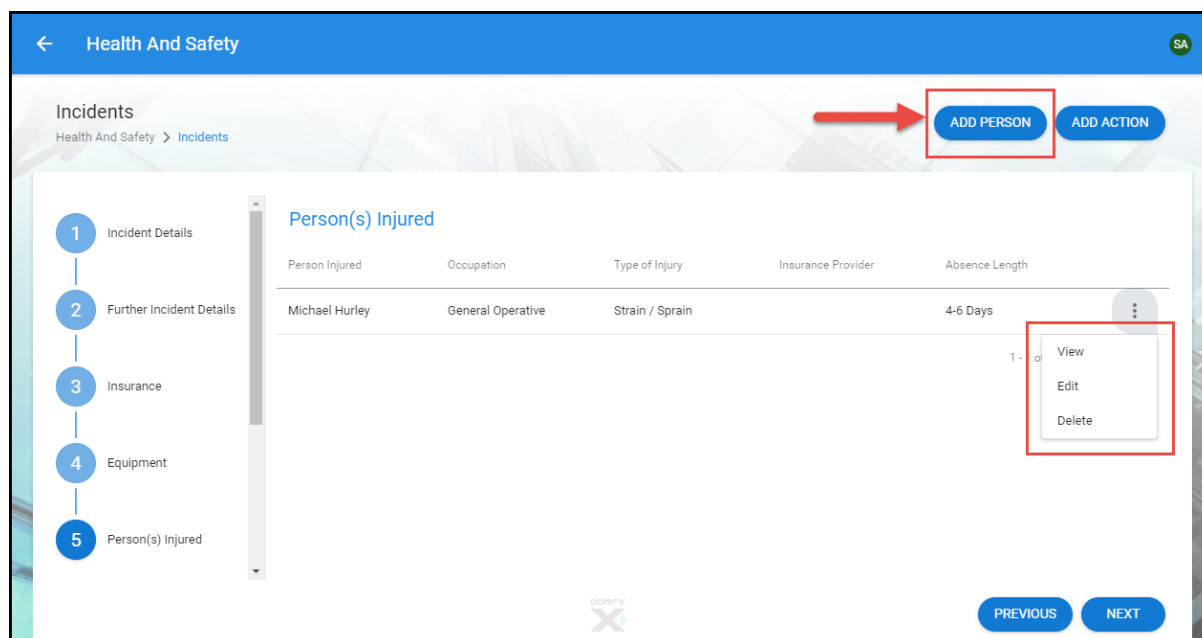

If a piece of equipment was involved in the incident or at fault for the incident, you can mark it here and ensure that it is either decommissioned or repaired before being used again.

1. To add equipment to this incident, click on the **Add Equipment** button.
2. Enter in the item's *Serial Number* and *Asset Number*
3. The only item on this screen that is mandatory is *Equipment Type*.
4. The *Comments* field allows you to add some extra details as to who this equipment or type of machinery was involved.

5.2.5. Person(s) Injured

It is not mandatory to add a person to an incident. However, if a person is added by pressing the **Add Person** button, then the details must be populated and saved.

The following items are shown on the *Injured Person Details* screen:

Injured Person Details

Item	Description
Injured Person	This is mandatory
Gender	This populates automatically based on the employee's record stored on People Management.
Age Range	This populates automatically based on the employee's record stored on People Management.
Non-employee indicator	This allows you to input a free text name for the <i>Person Injured</i>
Nationality	This is a drop-down reference list of nationalities created in the health and safety reference screen.
Employment Status	This populates automatically based on the employee's record stored on People Management.
Occupation	This is a drop-down reference list of occupations created in the health and safety references screen.
Sub-Occupation	This is a drop-down reference list of occupations created in the health and safety references screen. This only becomes available when you select an occupation.
Actual Return Date	This is the date the person returned to work.
Base Address	This is the location that the person is usually working out of.

Organisational Details

Item	Description
Company	This is mandatory.
Division	This is mandatory once Company is entered.
Management Unit	This is mandatory once Division is entered.
Department	This is mandatory once Management Unit is entered.

Injury Details

This is optional information which can be populated from reference data created in health and safety dashboard.

5.2.6. Witnesses

You also have the ability to add Witnesses to an incident if required. While this is not a mandatory step, once the **Add Witness** button has been pressed, the *Witness Name* and *Contact Details* are compulsory to be filled out.

The following image shows how this screen appears if you want to add a witness:

The screenshot shows the 'Incidents' screen in the 'Health And Safety' section. A red arrow points to the 'ADD WITNESS' button. A modal dialog box titled 'Add Witness' is open, containing the following fields:

- Witness Name ***: A dropdown menu with 'Phillip Lyons' selected.
- Non-employee**: A checkbox that is currently unchecked.
- Contact Details ***: A text field with the email 'philp.lyons@abcsolutions.ie or ring h...'.

At the bottom of the dialog are 'CANCEL' and 'OK' buttons. The background shows a sidebar with steps 4 through 8, and a 'WITNESSES' section with a 'Name' field.

5.2.7. Documents

See [section 3.2.1 Documents](#) for further details on managing Health and Safety documents.

5.2.8. Add Action

See [section 3.2.2 Add Actions](#) for further details on how to add an action.

Note:

- Each Incident is saved as *Unapproved* until an *Incident Approver* sets the status to *Approved*.
- The *Incident Approver* must complete the remaining fields and ensure that all details captured are correct and then they can set the status to *Open* or *Closed* as appropriate.

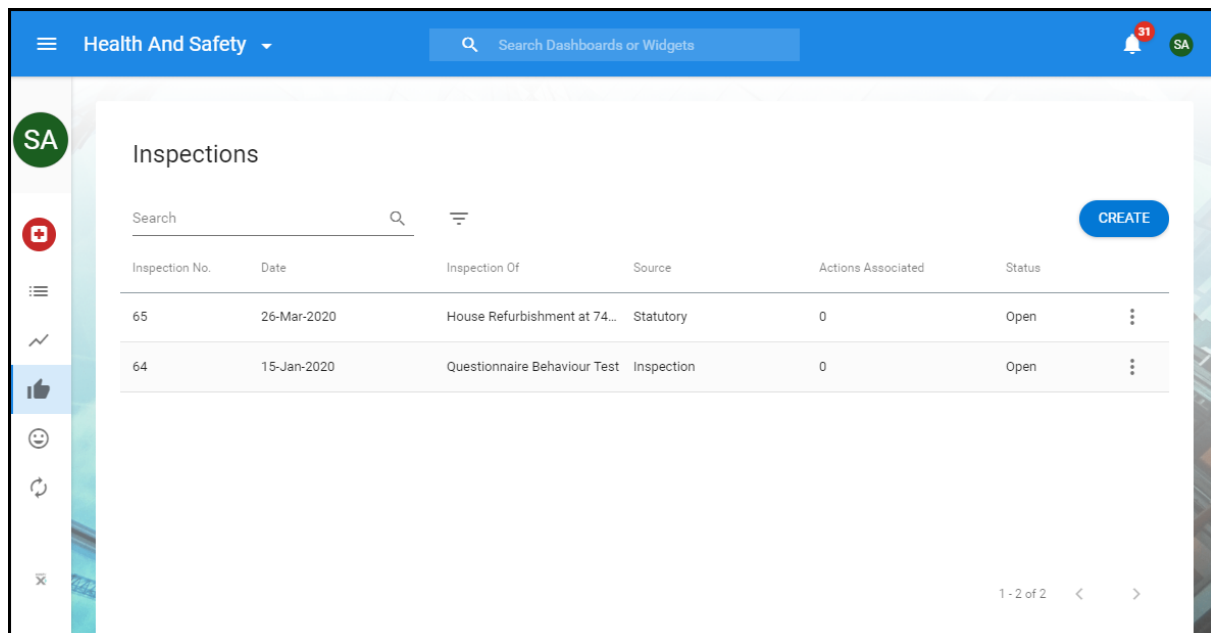

6. Inspections

6.1. Inspections Tab

From the Health and Safety dashboard you can navigate to the *Inspections* tab where you can create new inspections or search existing inspections. The *Inspections* tab allows you to manage and view all list of inspections that have been created within the Health and Safety dashboard.

To open the Inspections screen:

1. Go to the Health and Safety dashboard
2. Click on the *Inspections* tab
3. Within this screen, the following items are shown:

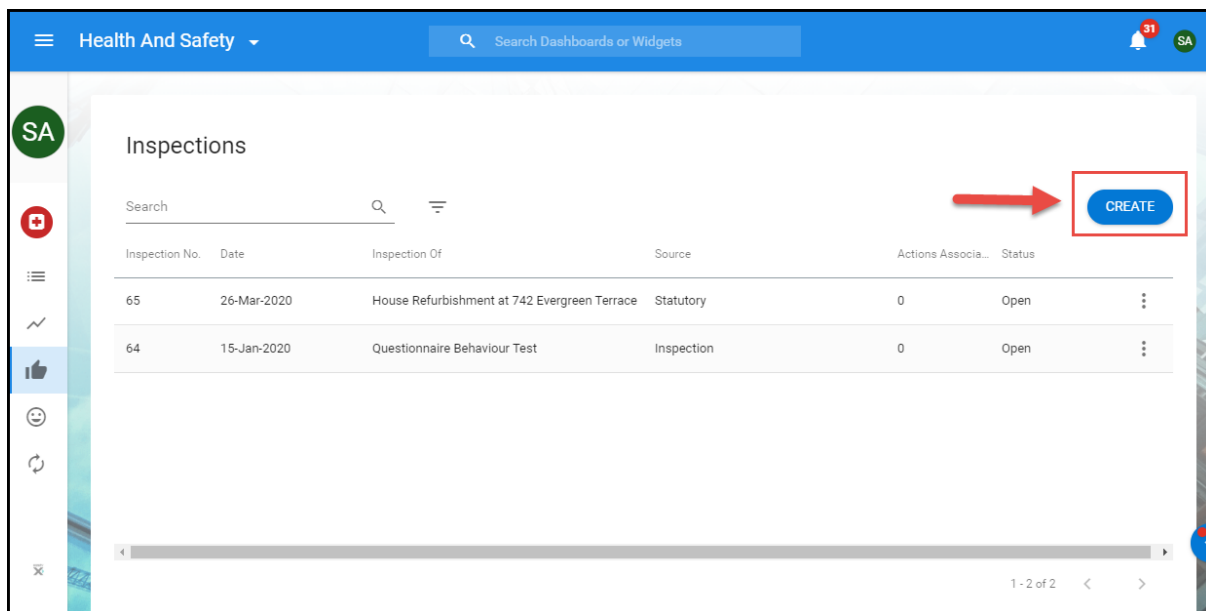

Item	Description
Search	This allows you to search for any incident.
Filter	This allows you to filter on an incident.
Inspection No.	This shows you the unique inspection number assigned to the inspection.
Date	This shows the date the inspection is due to take place or has taken place.

Item	Description
Inspection of	This shows the details of where the inspection is taking place and in what manner.
Source	This shows the reason or source of inspection.
Actions Associated	This shows how many actions and tasks need to be completed for this inspection.
Status	This shows the status of the inspection.

6.2. Create New Inspection

To create a new Inspection, go to the Inspection tab on the *Health and Safety Dashboard* and click the **Create** button.

This automatically opens the Incident wizard, which is compiled of the following steps:

Step	Name	Description
1	Inspection Details	This step includes the detail that drives filtering, searching and general information about the inspection that took place.
2	HSA Notices	This step allows you to track the notice given to or by the Health & Safety Authority for a visit and inspection.
3	Checklists	This step allows you to create questionnaires to complete as part of an inspection.
4	Documents	Documents can be added to an inspection at any time during the process
5	Actions	An action needs to be created for an inspection

6.2.1. Inspection Detail

On the *Inspection Details* step, the initial information needed for an inspection to be reported on and carried out is held.

Within this section, there are mandatory fields, along with other optional information that can be edited, which are explained from the following image and table.

Source of Inspection

The options available from the *Source of Inspection* dropdown are shown in the following table.

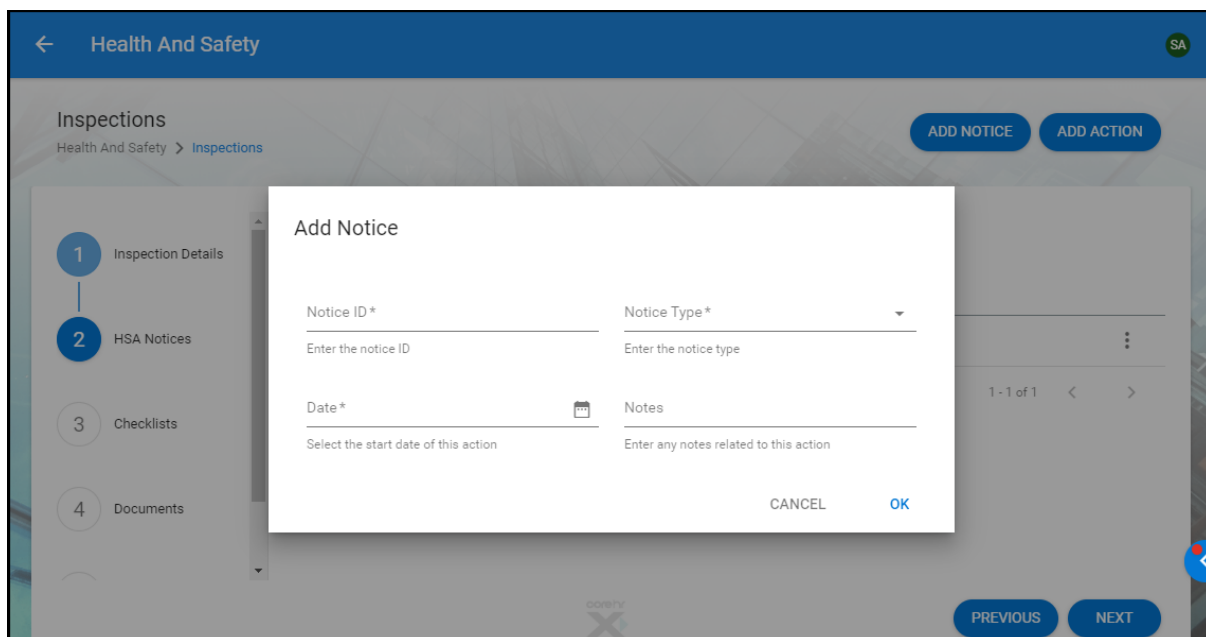

Source	Description
Safety Representative	All inspections or actions arising from a Safety Representative.
Meeting	All actions arising from all general meeting e.g. a Section meeting.
Inspection Planning	To be used when a person is entering the Planned Inspection for a Section for a period of time – usually a year.
Irish Water	All inspections and actions arising from Irish Water.
Safety Committee	All actions arising from a Safety Committee Meeting or from Safety Representatives.
Safety Management Committee	All actions arising from a Safety Management Committee Meeting.
HSA Inspection	All inspections and actions arising from the HSA.
Inspection	Once off inspections.
Insurance	All actions arising from an insurance claim.
Checklist	All inspection carried out using one of the available preset checklists.
Statutory	All actions arising from a Statutory Inspection
ESB	All inspections and actions arising from an ESB inspection
Other	All inspections and actions not covered in the above

6.2.2. HSA Notices

1. To add a New HSA Notice, click on the **Add Notice** button

2. The following screen is then displayed:

3. The items on screen are mandatory if a notice is being created, therefore you have to ensure the following is added to each notice
 - a. Notice ID
 - b. Notice Type
 - c. Date
4. Adding Notes can be used to expand on details surrounding the notice. A maximum of 4000 alphanumeric characters can be entered here

5. The options available from the *Notice Type* dropdown are:

Notice Type
ESB
Improvement Direction
Improvement Notice
Other
Prohibition Notice
Report of Inspection
Voluntary Closure
Workplace Contact Unit

6.2.3. Checklists

The *Checklist* section contains a list of predefined questionnaires that can be filled out in relation to the inspection. These Questionnaires are created and maintained within People Management. Follow the below steps if adjustments to existing questionnaires need to be made or new questionnaires need to be added:

1. Quick Jump to *People Management*
2. Go to Data Centre > Reference Data
3. Search for *Health and Safety Questions* and click on the corresponding button.
4. Within this screen, questionnaires can be created, viewed, edited or deleted.

Health and Safety Questions

People Management > View All > Health and Safety Questions

Question Type
Health And Safety Questionnaire

Question Profile

Maintain Question Profile Codes

Question Profile Code	Description
BMM	Building And Monument Maintenance
CIVIC	Civic Amenities
FIR	Fire Stations
GEN	General Checklist
PIER	Piers, Slipways and Pontoons
RDWKS	Roadworks

To ensure the questions within the checklist appear correctly, follow the below steps:

1. Create a Header
2. Create a question with the answer type set to *Radio Button*.
3. For each question the user must select one of four answers by selecting the relevant radio button.
4. For best results, the following answers can be created for each question.
 - Red
 - Amber
 - Green
 - N/A

Note:

The questionnaire always takes the first answer configured and apply it to the questionnaire running total, regardless of what the following answers have been set to.

The Checklist section shows an overview of the inspection details on screen while you add and complete the questionnaire assigned to this inspection.

To assign a questionnaire type, and make answers available to be filled out:

1. Select the appropriate Questionnaire type from the dropdown list

The screenshot shows the 'Inspections' page in the XD Health & Safety system. The top navigation bar is blue with a back arrow and 'Health And Safety' text. Below it, the 'Inspections' section is active, with a breadcrumb 'Health And Safety > Inspections' and an 'ADD ACTION' button. The main content area is divided into two columns. The left column contains a sidebar with five numbered items: 1 Inspection Details, 2 HSA Notices, 3 Checklists, 4 Documents, and 5 Actions. The right column displays the inspection details for '26-Mar-2020' by 'Trevor Hemmings'. It includes fields for 'Company' (Abc Solutions), 'Division' (Shared Services), 'Management Unit' (Finance), and 'Line Manager' (Trevor Hemmings). A dropdown menu is open under the 'Questionnaire' section, showing a list of options: 'Roadworks', 'Building And Monument Maintenance', 'Fire Stations', 'Civic Amenities', 'Piers, Slipways And Pontoons', and 'General Checklist'. A red box highlights this dropdown, and a red arrow points to the 'Questionnaire' label. At the bottom of the screen, there are three buttons: 'PREVIOUS', 'NEXT', and 'SAVE'.

2. This populates the screen with pre-defined questions to be answered
 - a. A running total of answers are displayed on top of the Questionnaire to allow you view the break-down of responses at a glance.

6.2.4. Documents

See [section 3.2.1 Documents](#) for further details on managing Health and Safety documents.

6.2.5. Add Action

See [section 3.2.2 Add Actions](#) for further details on how to add an action.

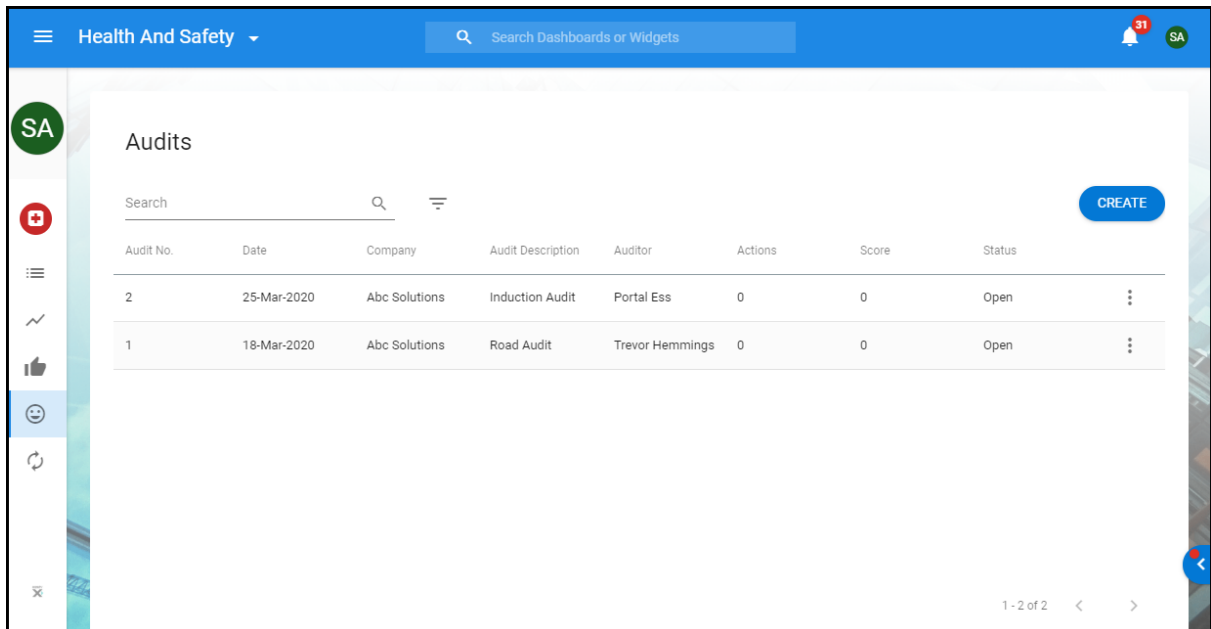

7. Audits

7.1. Audits tab

From the Health and Safety dashboard you can navigate to the *Audits* tab where you can create new audits or search existing audits. The *Audits* tab allows you to manage and view all list of audits that have been created within the Health and Safety dashboard.

To open the Inspections screen:

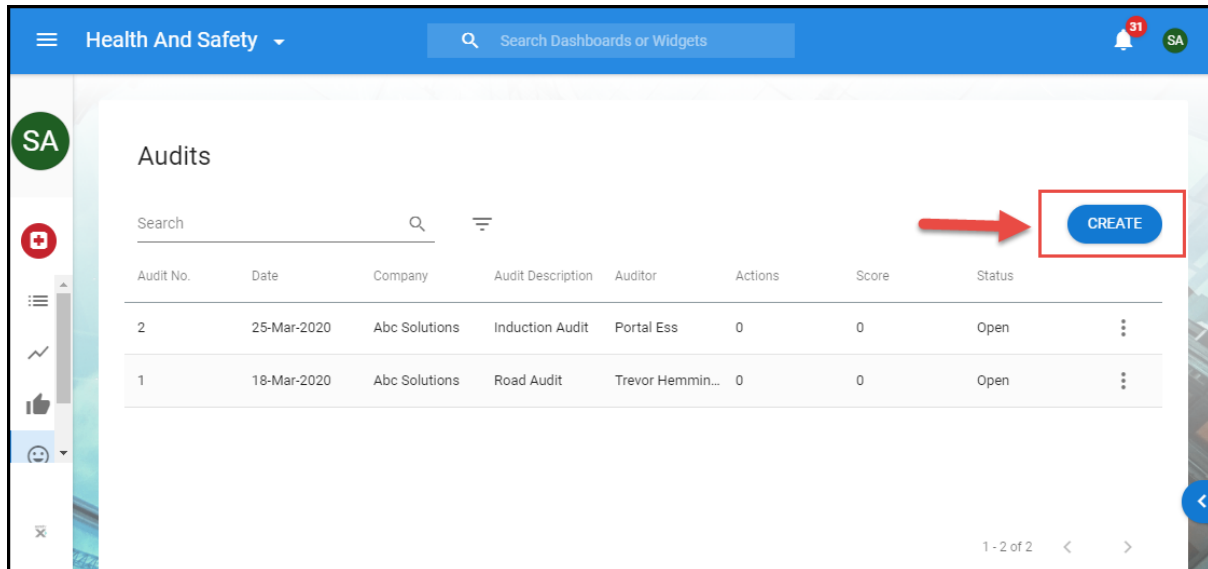

1. Quick Jump to the Health and Safety dashboard
2. Click on the *Audits* tab
3. Within this screen, the following items are shown:

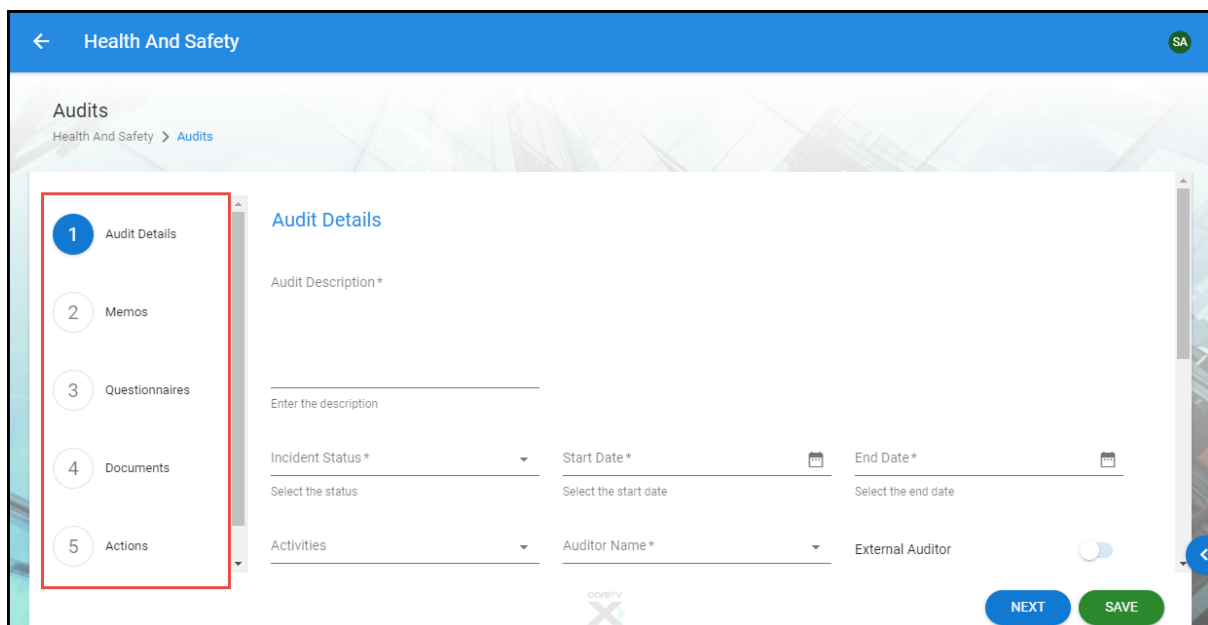

Audit No.	Date	Company	Audit Description	Auditor	Actions	Score	Status
2	25-Mar-2020	Abc Solutions	Induction Audit	Portal Ess	0	0	Open
1	18-Mar-2020	Abc Solutions	Road Audit	Trevor Hemmings	0	0	Open

7.2. Create New Audit

To create a new Audit, go to the Audit tab on the *Health and Safety Dashboard* and click the **Create** button.

This automatically opens the Audit wizard, which is compiled of the following steps:

Step	Name	Description
1	Audit Details	This step includes the detail that drives filtering, searching and general information about the audit that took place.
2	Memos	
3	Questionnaires	This step allows you to create questionnaires to complete as part of an inspection.
4	Documents	Documents can be added to an inspection at any time during the process
5	Actions	An action needs to be created for an inspections, incidents and audits.

7.2.1. Audit Detail

On the *Audit Details* step, the initial information needed for an audit to be reported on and carried out is held.

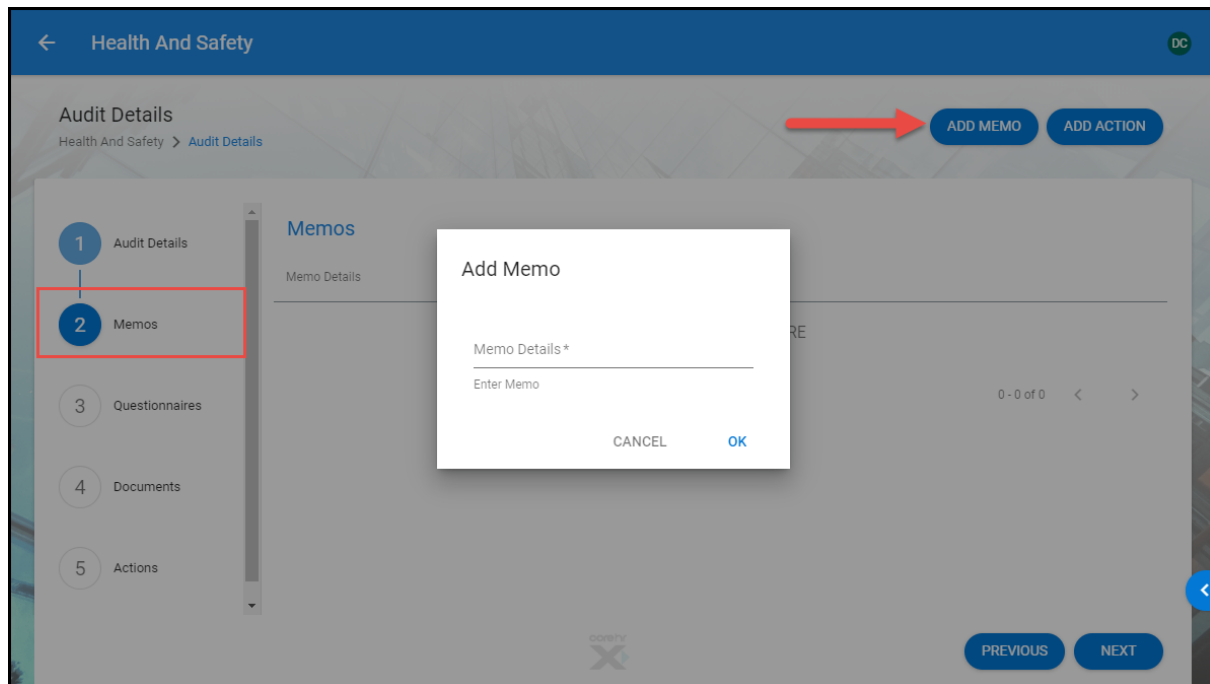

Within this section, there are mandatory fields, along with other optional information that can be edited, which are explained from the following image and table.

Item	Mandatory
Audit Description	Yes
Incident Status	Yes
Start Date	Yes
End Date	Yes
Activities	No
Auditor Name	Yes
External Auditor	No
Company / Division / Management Unit / Department	Yes
Address Line 1 / 2 / 3 / 4 / 5	No
Address Reference / Asset ID	No

7.2.2. Memos

Adding a memo allows you to create a comment or a short memo against an audit which can then be viewed by anyone who views the audit details. They can be used by the auditor to create notes for him/herself as an aide memoire during the course of the audit e.g. a reminder to review a document or procedure, ask a question of a particular person or to get photographic evidence of a certain working place. The display of the memos when a memo has been added shows the first line of the memo in the Memo list and this normally is adequate detail to quickly locate a specific memo from the Memo List.

To add a memo, go to the *Memo section* and click the **Add Memo** button.

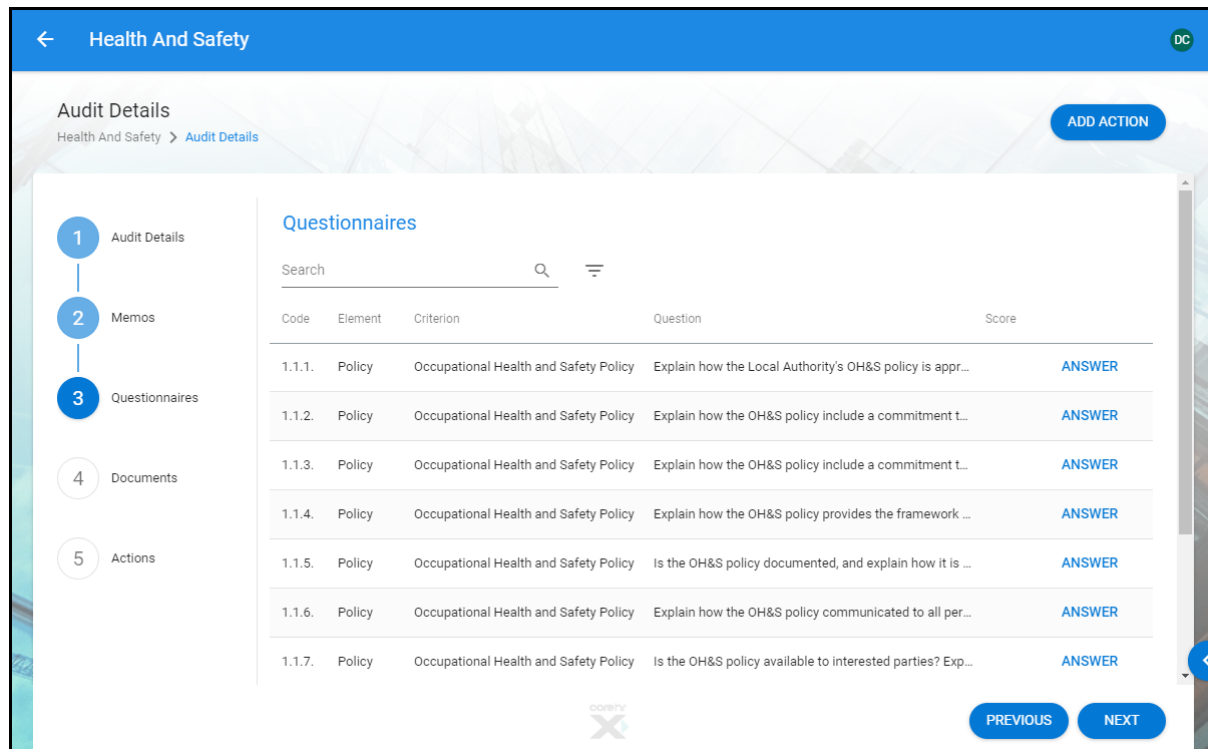

The max character length that can be entered on a memo is 1000 alphanumeric characters

7.2.3. Questionnaires

The questionnaire section allows the user to build a questionnaire for completion. By default, all questions are populated, and the user can de-select questions that are not applicable to this audit

using the  button.

Note: Once the questionnaire selection has been used and an audit has been commenced, the questions selected cannot be changed so the auditor must ensure that they plan the proposed audit questionnaires carefully and ensure that the correct elements and criteria are selected at this stage.

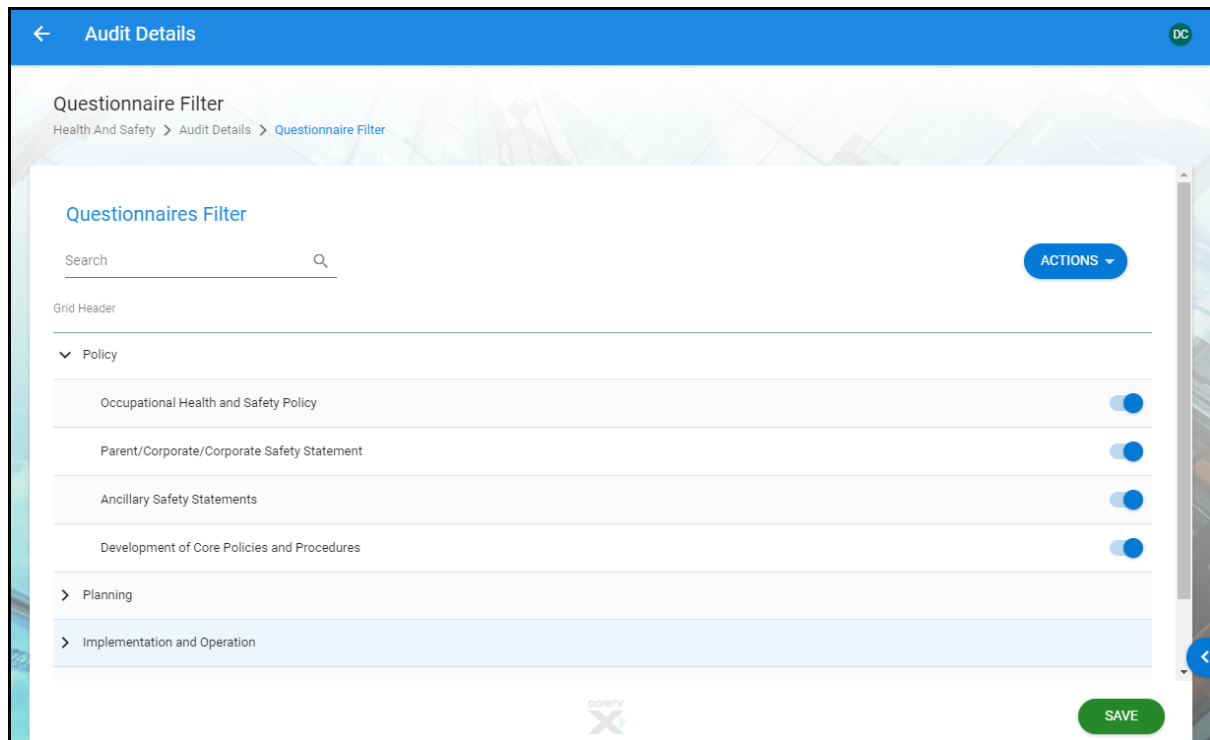

Item	Description
Code	This is a reference code tied to each question.
Element	This is the category that each question has been assigned to.
Criterion	This is the name of the question group.
Question	This is the question being asked.
Score	The score is displayed on the screen that has been input on the question once answered

Question Selection

The *Question Selection* screen is broken down into the elements and criteria. To access the question selection screen:

1. Click on the  within the questionnaires tab.
2. This opens the Question Selection screen as can be seen in the below image.

3. Each section can be expanded to view the criteria of the element.
4. You can deselect any number of criteria and the questions related to that criteria are then removed from the audit questionnaire.
5. Once the audit has been saved the user can still go back and add items back to the Questionnaire.

Completing a Question

To completing a question on the audit questionnaire, follow the steps below:

1. Click on the **Answer** button against a question.
2. The answer pop up box appears.

Explain how the Local Authority's OH&S policy is appropriate to the nature and scale of the Local Authorities OH&S risks?

OK

- If the question is part of the criteria but is not relevant to the specific audit, then it can be marked as not applicable and does not contribute to the scoring of the audit
- The scoring options against a question are the following:

Score	Description
0	To be used when there is no compliance.
2	To be used when there is minimal compliance.
5	To be used when there is some compliance but with major gaps.
8	To be used when is major compliance but with minor gaps
10	To be used when there is full compliance

- The *Audit Interview*, *Audit Observation* and *Audition Documentation* are fields to allow the auditor to make detailed notes as to how they arrived at their scoring in relation to a

specific question in respect of persons spoken to, on the ground observation of the workplace and the titles / details of any documents reviewed.

7.2.4. Documents

See [section 3.2.1 Documents](#) for further details on managing Health and Safety documents.

7.2.5. Add Action

See [section 3.2.2 Add Actions](#) for further details on how to add an action.

8. Reference Data

8.1. Existing Reference Data

The health and safety reference data screen is pre-populated with reference codes and descriptions that have been built as standard within CoreHR.

Code	Type	Description	Phrase Code
FARAGOTHER	AFF	Farmer	cp_ncdnt_hsswe_faragother
FARAGSELF	AFF	Farmer (Self Employed)	cp_ncdnt_hsswe_faragself
FARMSDVI	AFF	Farming Advisor	cp_ncdnt_hsswe_farmsdvi
FISHOTHER	AFF	Fisherman	cp_ncdnt_hsswe_fishother
FISHSELF	AFF	Fisherman (Self Employed)	cp_ncdnt_hsswe_fishself
LABOOORRS	AFF	Labourers	cp_ncdnt_hsswe_laboorrs
OOIA1	AFF	Other	cp_ncdnt_hsswe_ooia1
SKILLWO	AFF	Skilled Workers	cp_ncdnt_hsswe_skillwo

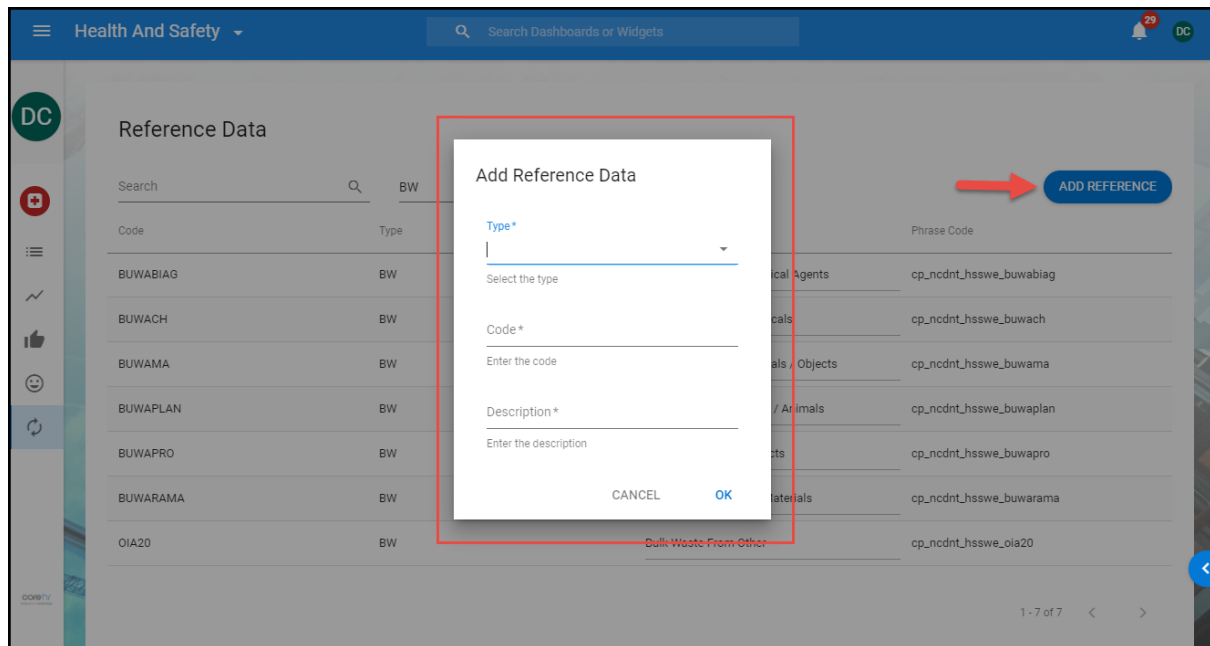

The following table outlines what is seen on the *Reference Data* screen.

Item	Description
Search	This allows you to search on the description of each reference item.
Reference Type	This allows you to filter on the reference type.
Code	This is the unique reference code for each reference created.
Type	This is the reference type.
Description	This is the name of the reference item.
Phrase Code	This is the phrase code of the reference item, used with the language pack functionality in CoreHR.
Add Reference	This allows you to create a new reference item against an existing reference type.

8.2. Add New Reference Item

To add a new reference item to the health and safety module, follow the below steps:

1. Click on the **Add Reference** button within the *Reference Data* screen.
2. The *Add Reference Data* screen appears.

3. Select a Reference Type from the drop-down list, which is a mandatory option.
4. Create a new reference code to assign the new reference item
5. Create a new description for the reference item
6. Click the **Ok** button.

9. Reporting and Notifications

9.1. Insight

The following CoreInsight Business Area is available for you to create, view and run reports based on the data collected from the health and safety dashboard:

- Core Health and Safety

The following menu option grants you access to this business area in CoreInsight:

System	Menu Option
CorePortal	Analytics Area Core Health and Safety

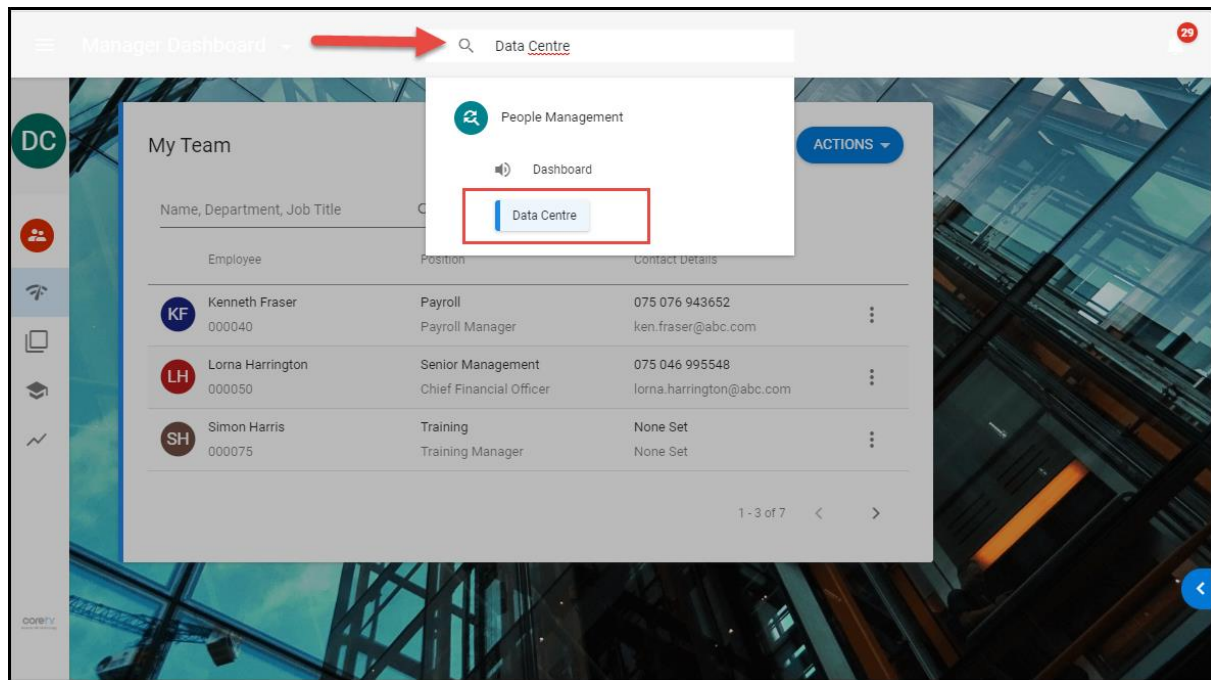

9.2. Event Management (EMS)

There are three event categories that notifications and emails can be created from the health and safety module:

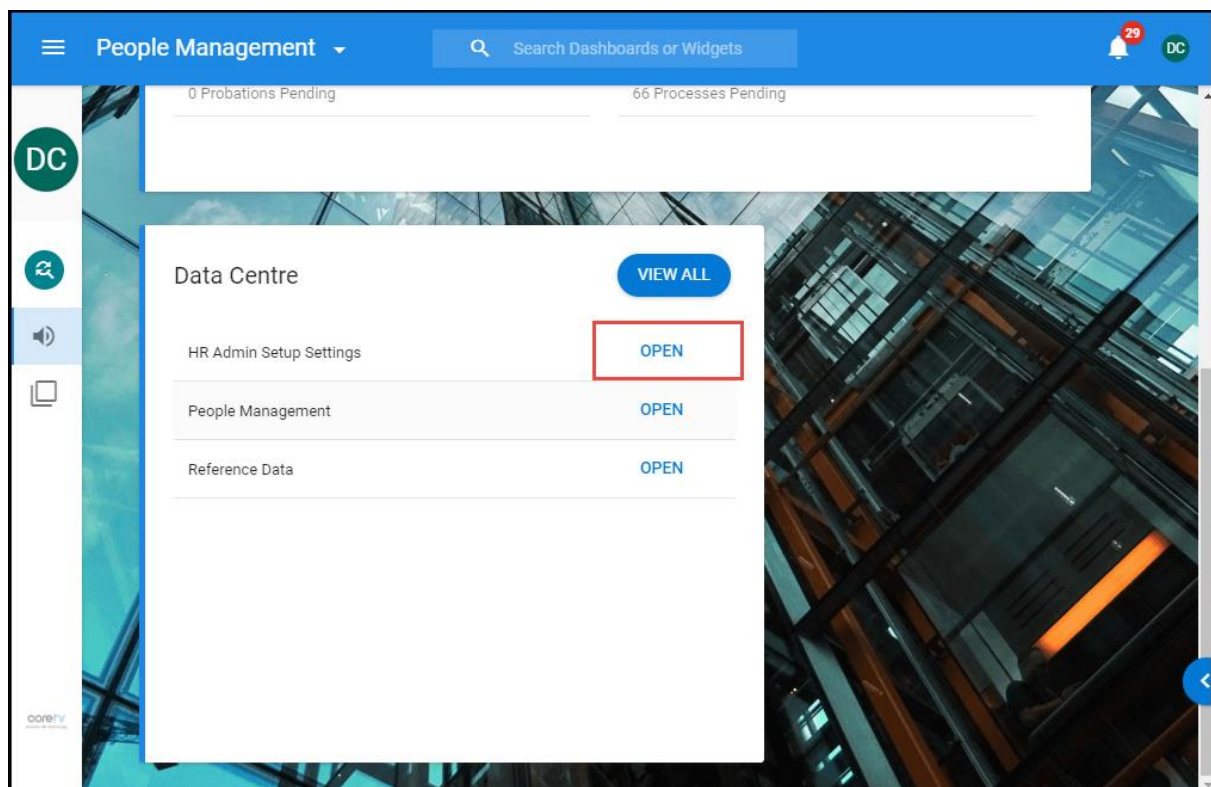

1. Incident Management
2. Health and Safety Management
3. Occupational Injury

These can be configured using the following steps:

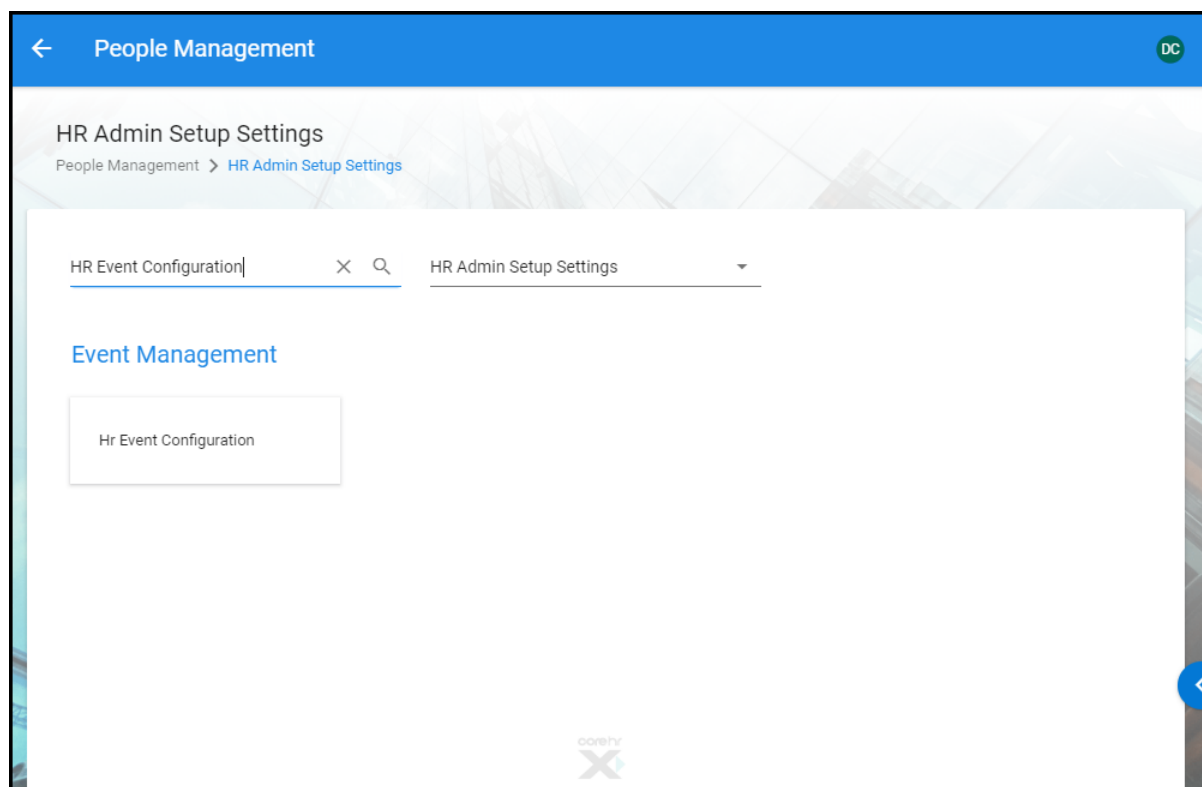

1. Quick Jump to *Data Centre* on the People Management dashboard

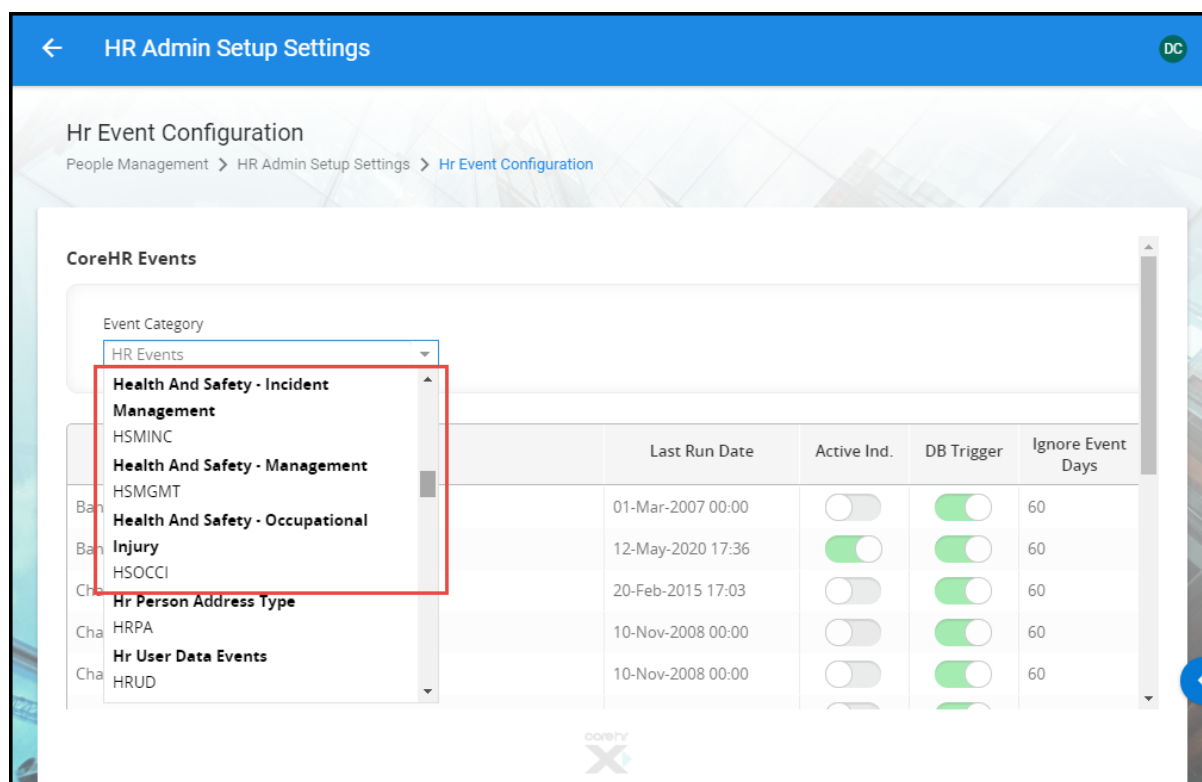

2. Click on the **Open** button aligned to the *HR Setup Settings* option.

3. Search for HR Event Configuration

4. Once on the HR Event Configuration screen, select the Health and Safety options from the event category drop down list.

5. Create and manage all notification events available.
