1. Overview

1.1. Purpose of the Guide

This user guide provides comprehensive guidance on configuring and using PeopleXD Pay Planner, a compensation planning solution that integrates seamlessly with your PeopleXD system. Pay Planner streamlines your entire compensation management process from initial planning through cycle completion.

This includes:

- Configuration – security, user management, user groups & currency.
- Performance Data Integration – automatic or manual.
- Pay Planner Settings – system configuration and customisation options.
- Compensation Cycles – how to create, manage and complete.
- Appendix – additional resources.

This guide covers both the **Standard** and **Premium** Pay Planner Solutions:

Solution Option	Salary Planning	Bonus Planning
Standard	✓	✗
Premium	✓	✓

Note: Sections specific to Premium Pay Planner features are highlighted.

Note: Bonus Planning functionality is not available to PeopleXD **Payroll only** customers.

2. People XD Configuration

In this section we will walk you through how to configure Pay Planner for PeopleXD. Including security, user management, currency and performance data integration.

2.1. User Access

You can customise the level of access a user has to Pay Planner functionality and data using:

- **Menu Options** – grants access to Pay Planner screens.
- **User Access** – grants access to the Pay Planner dashboard.
- **User Groups** - determines what is available to the user within the solution.
- **Data Access** – determines what data is available to the user within the solution.

2.1.1. Menu Options

To access the Pay Planner dashboard, users require the following menu option:

Menu Option	Menu ID	System
Pay Planner	MAIN_MENU.SMARTCOMP	CorePortal

To access the Pay Planner configuration screen, users require the following menu option:

Menu Option	Menu ID	System
People Analytics Configuration	MAIN_MENU.PEOPLEANALYTICSCONFIG	CorePortal

To access the Performance data migration files, users require the following menu options:

Menu Option	Menu ID	System
Create v2 employeeperformance	WS_DATAMIGRATION_MENU.POST_V2_EMPLOYEEPERFORMANCE	Web Services
Create v2 performancerating	WS_DATAMIGRATION.POST_v2_PERFORMANCERATING	Web Services
Delete v2 employeeperformance	WS_DATAMIGRATION_MENU.DELETE_v2_EMPLOYEEPERFORMANCE_ID	Web Services

Menu Option	Menu ID	System
Delete v2 performancerating	WS_DATAMIGRATION_MENU.DELETE_V2_PERFORMANCERATING_ID	Web Services

Note: Bonus data is only required for Premium Package Customers.

To access the Bonus & Commission history, users require the following menu options:

Menu Option	Menu ID	System
Create payroll bonuscommission	WS_PEOPLE_MENU.POST_PAYROLL_BONUSCOMMISSION	Web Services

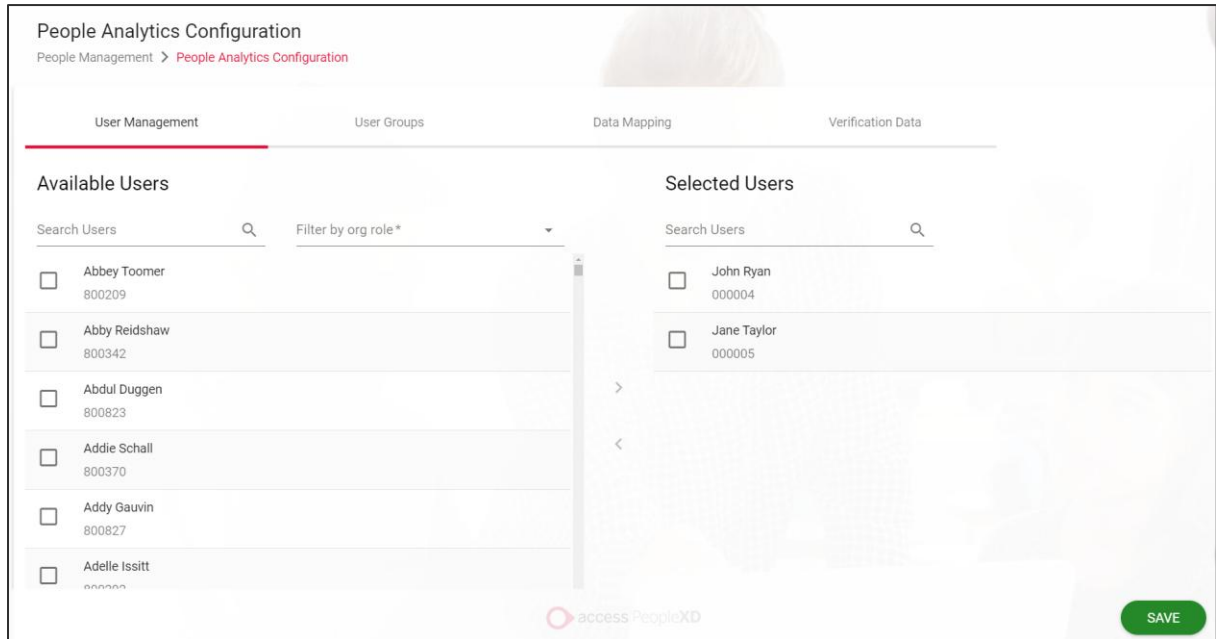

To access the Bonus & Commission data migration files, users require the following menu options:

Menu Option	Menu ID	System
Create v2 salarybonuscommission	WS_DATAMIGRATION_MENU.POST_V2_SALARYBONUSCOMMISSION	Web Services

2.1.2. User Access

To provide a user access to Pay Planner, follow the below steps:

1. On the **People Management Dashboard**, navigate to the **Data Centre** widget.
2. **Open** the People Analytics Configuration option.
3. Click the **User Management** tab.
4. Search for the relevant user or filter by Org Role.
5. Select the checkbox for the relevant user.
6. Click the right arrow to move them to the Selected Users column.
7. Click **Save**.

2.1.3. User Groups

Once a user has been given User Management access, they can then be assigned the relevant Pay Planner access via User Groups. This determines what is available to them within the solution.

The table below outlines what each user group gives access to:

User Group	Description
Pay Planner Admin Users	Manage cycles they create or are shared with • Create pay cycles. • View, edit, and share the pay cycles they have access to. • Create and assign tasks to managers. • Add collaborators. Can view all cycles, reassign ownership and close all cycles (even those they didn't create)

User Group	Description
Pay Planner Manager Users	This user can be assigned tasks within their hierarchy and can complete those tasks, they can: • View and edit the tasks they are assigned to. ◦ If the assigned task has child tasks, they have full rights (view and edit) within those child tasks. ◦ They will not be able to see holdback budget. • Submit a finished task to admins or managers above them for review.
Pay Planner Supporting Users	This user can be added to tasks by admins to support the manager assigned to the task. • They have the same rights as manager users on their assigned tasks. • Support users can be assigned to any task, but manager users can only be assigned tasks within their hierarchy.

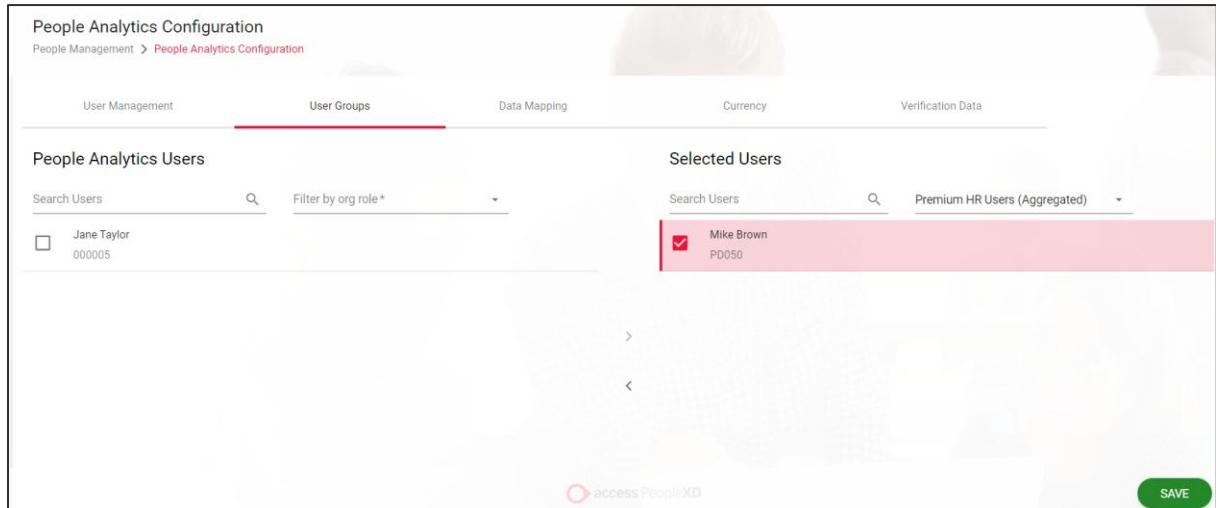

Assign a User Group

To assign a user to a User Group, follow the below steps:

1. On the **People Management Dashboard**, navigate to the **Data Centre** widget.
2. **Open** the People Analytics Configuration option.
3. Click the **User Groups** tab.
4. Select the relevant User Group from the *Select User Group* drop-down list.
5. Search for the relevant user or Filter by Org Role.

 **Note:** This screen will only list users assigned People Analytics access in User Management. See [section User Access](#) for further detail.

6. Select the checkbox for the relevant user.
7. Click the right arrow to move them to the Selected Users column.
8. Click **Save**.

2.1.4. Data Access

Access to data depends on the User Group role assigned.

User Group	Data Access
Pay Planner Admin	Access to Everyone
Pay Planner Manager	Report to Manager
Pay Planner Supporting User	Based on People Mgmt security access and / or Criteria Groups.

For those who have the **Pay Planner Supporting User** role, you can then grant additional access to data using criteria groups. For example:

- Jane has access to departments A and B in People Management. She is granted access to department C using criteria groups. Jane will have access to departments A, B, and C within Planner.
- John has no access to People Management data. He is granted access to department C using criteria groups. John will have access to department C within Pay Planner.

This is done by:

- Creating criteria groups.
- Creating a data access group and assigning it criteria groups.
- Assigning users to the data access group.

Note: Security Consideration - Criteria Group Historical Data Access

When setting up a criteria group, the system returns all employees who match the specified criteria based on their complete employment history (both current and historical positions).

For example: If User A is granted access to "all employees in Department 1," they will see:

- Current Department 1 employees.
- Former Department 1 employees (who may now be in different departments or have left the organisation)

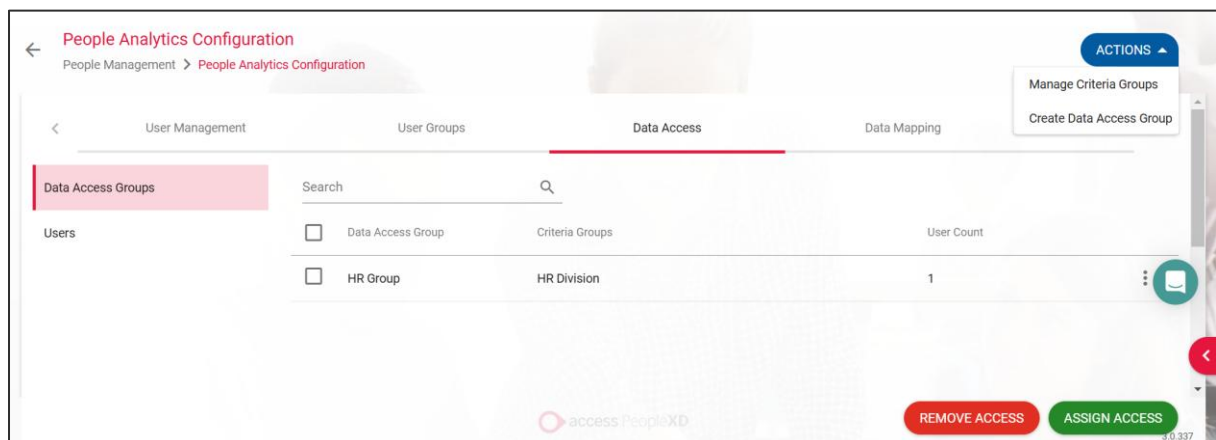

Potential implications:

- Users may gain visibility of employee data beyond their intended scope.

Manage Criteria Groups

To create or manage the criteria groups you will use:

1. On the **People Management Dashboard**, navigate to the **Data Centre** widget.
2. **Open** the People Analytics Configuration option.
3. Click the **Data Access** tab.

4. Expand the **Actions** menu and click **Manage Criteria Groups**.

 **Note:** This type of criteria group used is Analytics. The screen will be prefiltered to this type.

5. Click **Add**.
6. Fill in a name and click **OK**.
7. Select a reference data option from the left-hand menu.
8. Select the checkboxes for the relevant criteria.

- Click the right arrow to move them to the Assigned column.
- Repeat for all required criteria.

Create a Data Access Group

- On the People Analytics Configuration screen click the **Data Access** tab.
- Expand the **Actions** menu and click **Create a Data Access Group**.
- Fill in a name and select whether to copy an existing group.

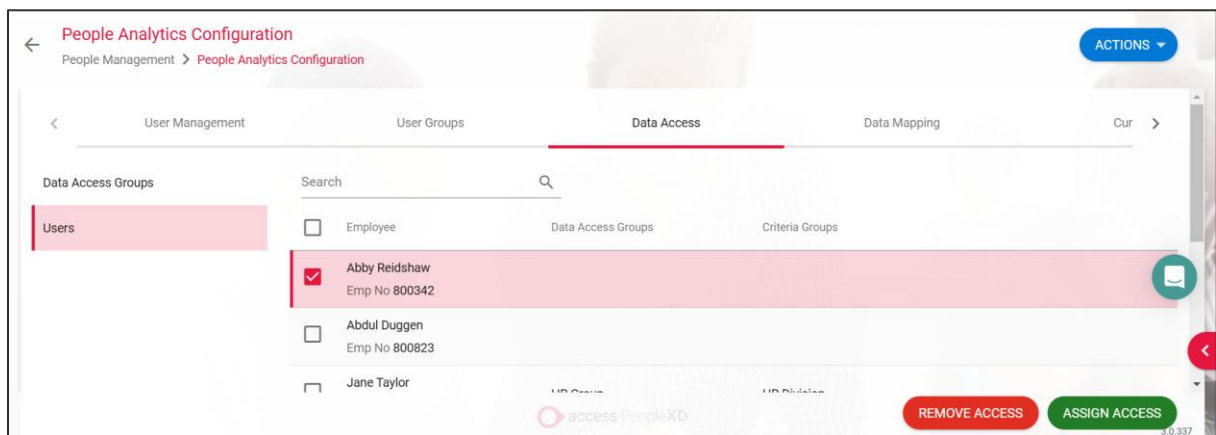

A dialog box titled "Add Data Access Group". It contains two input fields: "Group Name*" and "Copy Data Access Group" with a dropdown arrow. At the bottom right are "CANCEL" and "OK" buttons.

- Click **OK**.
- Click **Assign Access**.
- Select the Criteria Groups and click **OK**.

Assign Data Access

- On the People Analytics Configuration screen click the **Data Access** tab.
- Click the **Users** tab from the left-hand menu.
- Select the checkbox for the relevant user.

- Click **Assign Access**.

5. Select Data Access Group and click **OK**.

2.2. Currency

This section will cover how to add exchange rates to support conversion from your default currency to another currency. For example, this is useful if your PeopleXD solution processes payroll in both the UK (£) and Ireland (€).

The currency the cycle uses is set in the Pay Planner solution in the Cycle.

The screenshot shows the 'Budget' tab in the '2025 Salary and Bonus Modelling Cycle - TEST CYCLE'. The interface includes a sidebar with 'Budget', 'Base pay', and 'Bonus' options. The main content area is titled 'Budget' and contains two sections: 'Currency' and 'Select a budgeting method'. The 'Currency' section has a dropdown menu set to 'GBP (British Pound)' and a link to 'View currency conversion rates'. The 'Select a budgeting method' section has two options: 'Uniform budget' and 'Flexible budget'. The 'Flexible budget' option is selected and highlighted. To the right, a 'Cycle budget in GBP' summary shows 'Total budget' as £2,305,204, 'Holdback' as -£115,260, and 'Working budget' as £2,189,944. Below this, the 'Bonus' section shows 'Amount before adjustments' as £0 and 'Working budget' as £0.

2.2.1. Currency Rates

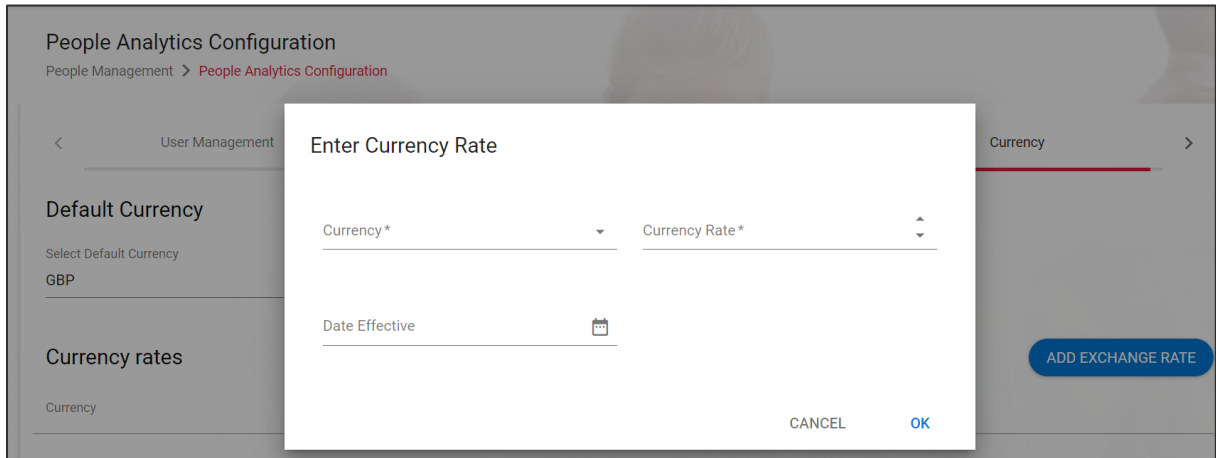

When converting values to a single currency, the solution uses a process called constant currency. This means that only one exchange rate (per currency) is used for a calculation, even if it spans multiple periods. The exchange rates used are based on the last day of the selected period in the Time picker.

Add Currency Rates

To add currency rates, follow the below steps:

1. On the **People Management Dashboard**, navigate to the **Data Centre** widget.
2. **Open** the People Analytics Configuration option.
3. Select the Currency tab.
4. Click **Add Exchange Rate**.

5. Select the Currency, enter the Currency Rate, and select the Date Effective (i.e. the date the currency rate should apply).
6. Click **OK** to apply your changes.

The screenshot shows the 'Enter Currency Rate' dialog box overlaid on the 'People Analytics Configuration' page. The dialog box has three input fields: 'Currency *' (a dropdown menu), 'Currency Rate *' (a text input with up/down arrows), and 'Date Effective' (a date picker icon). At the bottom of the dialog are 'CANCEL' and 'OK' buttons. The background page shows the 'Currency' section with a 'Default Currency' of 'GBP' and a 'Currency rates' table. A blue 'ADD EXCHANGE RATE' button is visible on the right side of the background page.

2.2.2. Support Pay Planning Across Multiple Currencies

To ensure PeopleXD accurately identifies the correct currency and applies appropriate conversion rates within Pay Planner, the following validation steps should be completed for employees not paid via PXD Payroll.

Validation Steps

1. Ensure that a company per currency has been created in PeopleXD.
 - (Payroll Dashboard > Settings > Organisations)
2. Ensure that each company has the correct currency set (*Currency Code*).

Organisations

Payroll Dashboard > Organisations

Code: 3 Select Detail: Choose

Name *: German Company

Address *: CUSTOMER COMPANY (IE)

Registered No: Contact: Phone No:

Fax No: Interface Company: Email Address:

Currency Code: Euro Payroll Provider: External Country Code: Employee UDF Identifier: De Local Company UDF Identifier:

3. Link this company to the relevant pay group.
 - (Payroll Dashboard > Settings > Pay Groups)
4. Ensure each employee is linked to the relevant pay group.

2.3. Sync Frequency

The following table details how often data gets sent to Pay Planner from PeopleXD:

Data Transferred to Pay Planner	Timings
Daily Deltas i.e. difference between data in PeopleXD today versus yesterday.	- Updated once per day. - Data difference is calculated as: data before 00:00 UTC today minus data that was sent yesterday - The job to send this data to Pay Planner starts from 00:00 UTC - Cut off time that all data will be sent to Pay Planner is 05:00 UTC
Security – User Management and User Groups i.e. applying access given in User Management and User Groups	Updated immediately

Data Transferred to Pay Planner	Timings
Data access i.e. what employee data you see (People Mgmt access and Criteria Groups).	Updated every 2 hours.
Data access (reports to manager)	Syncs nightly.
Employee Performance Data	Viewable in Pay Planner within 10 mins of loading into XD.
Bonus Data	Viewable in Pay Planner within 10 mins of loading into XD.

2.4. Performance Data Integration

Pay Planner automatically imports essential employee data from PeopleXD to ensure accurate and up-to-date planning.

To enhance your compensation planning, you can incorporate supplementary data, Performance Data. There are two integration options:

- **PeopleXD Talent Management:** Direct integration with your existing performance management data.
- **Data Migration Upload:** Import performance ratings via CSV file upload from external performance systems.

 **Note:** Bonus Planning functionality is not available to PeopleXD **Payroll only** customers.

2.4.1. Performance Data Sources

This section explains how to integrate performance information into your Pay Planner solution. Pay Planner can receive performance data through two methods:

- **Automatic Integration** - data pulls directly from PeopleXD Talent Management.
- **Manual Upload** - data loaded via the Data Migration facility.

Automatic Integration

When using PeopleXD Talent Management, performance data flows automatically into Pay Planner. The system pulls the **Final Rating** from Performance History directly into Pay Planner.

Note: If you use another area of the Talent Management solution to capture performance ratings (e.g., Talent Factors), you will need to report these out via Insight and load them in via Data Migration.

Manual Upload – Performance data

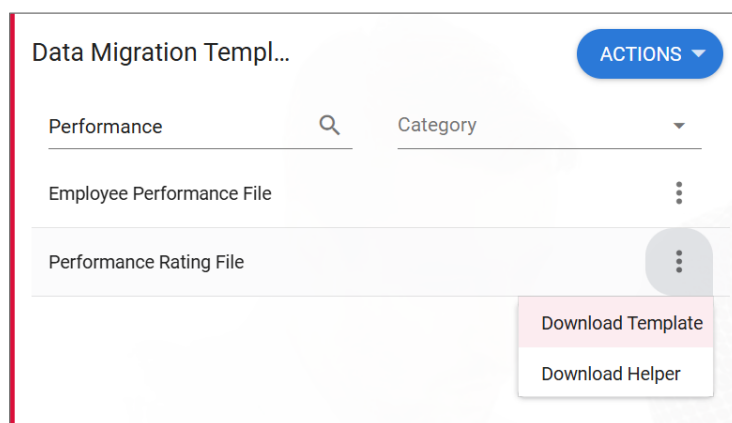

If you do not use PeopleXD Talent Management, you can upload performance data using the Data Migration facility. Two templates are available for performance data upload:

- **Performance Rating File** (must be uploaded first)
- **Employee Performance File**

The Data Migration widgets are usually located on the Administrator Dashboard.

To Download Templates

1. Navigate to the **Data Migration Templates widget**.
2. Search for **Performance Rating File**.
3. Expand the 3-dot menu and click **Download Helper** and **Download Template**.
4. Add the required records to the Download Template File.
 - Each row of the Data Template File represents an individual record, e.g. an employee, a contract etc. Refer to the Download Helper File for guidance on how to complete.
5. Repeat steps 2-4 for **Employee Performance File**.

Note: The Performance Rating File must be loaded before the Employee Performance File.

To Upload your Completed Templates

1. Navigate to the **Data Migration Migration Options** widget.
2. Click **Load File**.
3. Upload the **Performance Rating File** first.
4. Select **Process All Records**.
5. Wait for the status to update to **Complete**.
6. Repeat steps 2-5 for the **Employee Performance File**.

Data Migration Options					LOAD FILE
Search		Open			
Uploaded On	File Name	Template	File Summary	Status	
26-Jun-2025	Employee Performance File SB...		Ready 0	Complete	
	Private	Employee Perform...	Failed 0		
	ID: 2025062603792113		Complete 1326		
26-Jun-2025	Performance Rating File SBA.c...		Ready 0	Complete	
	Private	Performance Ratin...	Failed 0		
	ID: 2025062603792050		Complete 3		

To Verify your Uploaded Performance Data

Once uploaded, you can view your performance data in several locations within PeopleXD:

Performance Ratings (Reference Data)

- **People Management** - Data Centre widget > View All > Other References > Performance Ratings.
- **Insight** - Performance Rating (Personnel) view. This view includes Rating Description and Rating Value for reporting.

Employee Performance Ratings

- **Insight** - Person Performance Load (Personnel) view. This view includes Appointment ID, Effective Date, Person Name, Person Reference, Rating Description, and Rating Value for reporting.
- **Pay Planner** - Cycle data screen (employee performance data is directly accessible)

Cycles > Demo - Admin review - TEST CYCLE ● Review						
Essentials Cycle data Eligibility Budget Timeline Pay philosophy Assignments Allocation Review						
Eligible (123)		Ineligible (1249)	All (1372)	Q Search		
Employee	Employee ID	Direct manager	Job name	Performance rating	FTE ratio	
Alvy Badini	800143	Louise Barton	Solution Architect	Meets Expectations	1	
Alan Laurentin	800338	Catrin Price	Corporate Lawyer	Exceeds Expectations	1	
Agnola Lackham	800375	Louise Barton	Solution Architect	Exceeds Expectations	1	
Rossy Elstob	800482	Louise Barton	Support Operator	Meets Expectations	0.5	
Danie Galler	800563	Louise Barton	Senior Support Engineer	Exceeds Expectations	1	

Manual Upload – Bonus data

Note: Bonus data is required for Incentive Plans. Incentive plans are only available to Premium Package Customers.

You can, also upload your bonus data using the Data Migration facility. For further guidance see our Bonus & Commission History guide. The template available for bonus & commission data upload is:

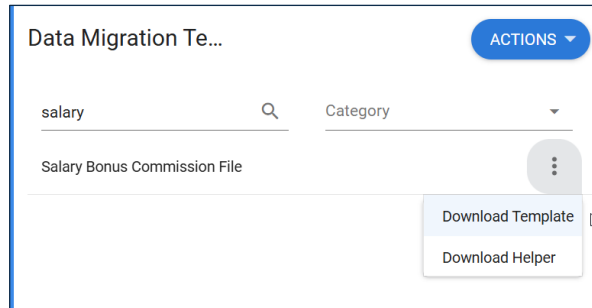

- **Salary Bonus Commission File**

The Data Migration widgets are usually located on the Administrator Dashboard.

To Download Templates

1. Navigate to the **Data Migration Templates widget**.
2. Search for **Salary Bonus Commission File**.
3. Expand the 3-dot menu and click **Download Helper** and **Download Template**.
4. Add the required records to the Download Template File.
 - Refer to the Download Helper File for guidance on how to complete. At least one of the four bonus/commission fields must be populated.

Note: Only Bonus data fields are required for Pay Planner.

To Upload your Completed Templates

1. Navigate to the **Data Migration Options** widget.
2. Click **Load File**.
3. In the *Upload* screen either:
 - Drag and drop the completed *Data Migration Template File*.OR
 - Browse for the completed Data Migration Template File.
4. Click **OK**.
 - Once uploaded, the *Processing* screen appears with the contents of the uploaded *Salary Bonus Commission File*. All records will have an initial status of "Ready."
5. Select **Process All Records**.
6. Wait for the status to update to **Complete**.

Data Migration Options					LOAD FILE
Search		Open			
Uploaded On	File Name	Template	File Summary	Status	
24-Oct-2025	Working Salary Bonu... Private ID: 2025102473171059	Salary Bonus Com...	Ready 0 Failed 0 Complete 1	Complete	⋮
24-Oct-2025	Working Salary Bonu... Private ID: 2025102473171001	Salary Bonus Com...	Ready 0 Failed 0 Complete 1	Complete	⋮

To Verify your Uploaded Bonus Data

Once uploaded, you can view your bonus & commission data in several locations within PeopleXD:

Bonus Data

- **People Management** - records will display on the employee records under the Current Salary tab.
- **Insight** – Hr Salary Bonus Commission (Pay) view. This view includes bonus amount, bonus % and effective date for reporting.
- **Pay Planner** - Cycle data screen bonus data is directly accessible.

3. Pay Planner Configuration

Once the appropriate permissions have been configured and data has been migrated access Pay Planner to finalise the set up.

To access Pay Planner from PeopleXD, open the dashboard menu and click **Pay Planner**. The table below outlines the areas available, to an Administrator, in the Pay Planner navigation bar:

Area	Description
Cycles	Allows you to create, edit, and sharing compensation cycles.
Settings	Allows you can configure cycle settings.
Administration	Allows you can manage cycles that you have created or have ownership of.
Help	Links to the Customer Success Portal where you can search product resources.

3.1. Settings

Settings is where you can configure your compensation settings to align with your organisation's pay structures and policies. These settings provide the foundation for all your compensation cycles. Expand the Settings menu to access the 5 available screens.

 **Note:** Changes only apply to new cycles - existing cycles remain unaffected.

3.1.1. General

The General screen allows you to configure general settings for your compensation cycles.

Pay Planner

- Cycles
- Settings
- General**
- Budget
- Incentive plans
- Manager view
- Pay letters
- Administration
- Help

General

Changes to these settings will only apply to newly created cycles. In-progress cycles won't be affected by these changes.

Use pay bands

On ☒

Pay bands help guide compensation decisions with additional insights and tools. If turned off, features like bringing all eligible employees within the pay band and advanced merit matrices won't be available. [Read more.](#)

Compare to pay band

Select how employees are compared to pay bands. Compa-ratio or position in range will also be available as an attribute to build a cycle's merit matrix.

- ☒ **Compa-ratio**
100% represents an employee paid at the midpoint of their pay band. More than 100% represents an employee paid more than the midpoint, and less than 100% represents an employee paid less than the midpoint.
- ☐ **Position in range**
0% represents an employee paid the minimum of their pay band, 50% represents the midpoint, and 100% represents the maximum. Values that are negative or more than 100% represent employees paid outside their pay band.

The **General** screen contains the following fields:

Field	Description
Use pay bands	If enabled, this uses pay bands to provide a structured way to guide compensation decisions, ensuring fairness and alignment with your organisation's pay philosophy. If your organisation doesn't use pay band data, you can turn this setting off to simplify the interface and remove functionality that depends on it.  Note: Pay band data is applicable to the Professional Pay Planner package only, which will be in a future release.
Compare to pay band	Select how to measure employee positioning within their pay bands. There are two options available:

Field	Description
	Compa-ratio – this is on by default and compares salary to band midpoint. A compa-ratio of 100% indicates that the employee is paid at the midpoint, a value greater than 100% shows that the employee's salary exceeds the midpoint, and a value less than 100% means their salary is below the midpoint. This is Best for Organisations focusing on midpoint targeting. Position in range - shows exact position within band. 0% represents the minimum of the pay band, 50% represents the midpoint, and 100% represents the maximum. Any value that is negative or greater than 100% indicates that the employee is being paid outside of their assigned pay band. This is Best for Organisations needing precise range positioning.

3.1.2. Budget

The Budget screen allows you to control budget allocation across your organisation with segmentation.

The **Budget** screen contains the following fields:

Field	Description
Budget segments	Select the attribute to segment your budget by. There are three available segmentation options: • Location – based on employee contract location. • Cost Center – based on employee contract cost centre. • Organisation – select specific levels from your organisation structure. ○ [Level Name] - Direct Reports ▪ You may see entries labelled "[Level Name] - Direct Reports" that appear empty. This is a result of how the system displays organisational structures and can be ignored.

Field	Description
	- Since PeopleXD requires each employee to have a complete organisational assignment, these empty sections won't contain any employee data relevant to your compensation planning. - Unknown - You may see an "Unknown" category that appears empty. This would only contain employees who don't have complete organisational details assigned in PeopleXD, which should not occur.

To set up budget segmentation:

1. From the Budget screen.
2. Select an attribute to segment your budget by e.g. Location.

 **Note:** Once you start creating segments you will not be able to change the attributes, you're segmenting by without starting from scratch.

3. Click **Add budget segment**.
4. Choose the selections you'd like to add to this budget segment. For example, locations in the North of England.
5. Click **Next**.
6. Review your selection. You will be presented with details of the headcount number applicable to your selection.
7. Click **Add**.
8. Expand your Budget segments 3-dot menu and click **Rename**.
9. Enter the name for the budget segment.
10. Repeat steps 3 to 9 for all budget segments required.
11. When you create a new cycle, any pay types you choose will have their budgets automatically segmented. For base pay, you'll be able to specify an overall budget or give segments specific budgets.

Note: Premium Package Customers Only - If bonus' are included in your cycle, you won't be able to configure different budgets for each segment but there will still be separate budgets.

You can provide unique recommendations for each segment, including defining a unique pay philosophy for a segment when setting the overall pay philosophy for a cycle (see [section 4.4.6 Pay Philosophy](#)). Tasks will receive budgets for each segment, and managers will be warned if they go over the budget for any segment. Managers won't see a singular aggregated budget for their task, but you will still get a view of the total budget across cycles.

Configure pay philosophies

Balanced | Follows a pay for performance based pay philosophy.
Change preset

Segment	Average increase	Headcount	
Canada	0 %	1642	View pay philosophy
Rest of the org	0 %	2934	View pay philosophy
United States	0 %	7185	View pay philosophy

3.1.3. Incentive Plans

Note: Incentive Plans are only available to Premium Package Customers.

The Incentive Plans screen allows you to configure bonus calculation methodology for your cycles.

Within the **Same formula** option, the following formulas are available to select:

- Budgeted bonus x company performance x individual performance.

- Budgeted bonus x (company performance x company performance weight + individual performance x individual performance weight).
- Budgeted bonus x (company performance x company performance weight + team performance x team performance weight) x individual performance
- Budgeted bonus x company performance x (team performance x team performance weight + individual performance x individual performance weight)
- Budgeted bonus x company performance x team performance x individual performance

Note: Different formula bonus plan controls are only available to Professional Package Customers, please contact your Customer Success Manager for further details.

The screenshot shows the 'Pay Planner' interface with a sidebar on the left containing 'Cycles', 'Settings', 'General', 'Budget', 'Incentive plans' (selected), 'Manager view', 'Pay letters', 'Administration', and 'Help'. The main area is titled 'Incentive plans' and has a 'Bonus' tab selected. Below the tab is a 'Bonus plan controls' section with the question 'How do you calculate bonus for your employees?'. There are two radio button options: 'Same formula, frequency and proration factors for all employees' (which is selected) and 'Different formula and/or frequency and/or proration factors for groups of employees'. A tooltip message states: 'To be able to configure a different formula and/or frequency and/or proration factors for groups of employees, please talk to our technical support.' Below this is a table with columns: 'Bonus plan', 'Formula', 'Participating employees', 'Prorated', and an edit icon. The table contains one row: 'Overall bonus calculation', 'Budgeted bonus x company pe...', '1,371', and a checkmark.

Bonus plan	Formula	Participating employees	Prorated	
Overall bonus calculation	Budgeted bonus x company pe...	1,371	✓	

To configure your Bonus plan:

1. Click the **Pencil Icon**.
2. Select the required formula, from the dropdown menu.
3. If you have selected a formula with weights, enter one value and the other will auto-fill.
 - Both weights must equal 100%
4. Select the **frequency**, from the dropdown menu, of the bonus period.
5. **Tick** the Employee start date checkbox to base bonus on proration factors, if applicable.
6. Click **Save**.

3.1.4. Manager View

The Manager View screen allows you to customise what managers see during compensation planning. This is the default view, which can be adjusted in each new cycle's setup (see [section 4.4.1 Essentials](#)).

Select and order the data columns managers can see in their tasks. Managers initially see **"Visible by default"** columns in their task. They can manually add columns that are **"Available to managers"**. See [section 7.1 Eligibility Rules](#) for a full list of eligibility criteria.

 - Budget
 - Incentive plans
 - Manager view
 - Pay letters**
- Administration
- Help

Pay letters

Changes to these settings will only apply to newly created cycles. In-progress cycles won't be affected by these changes.

Use pay letters
On

Pay letters summarize the compensation decisions made for an employee in a cycle. Turning this on generates pay letters once a cycle is in the communication stage.

Give managers access to pay letters
On

Turning this on gives managers access to download pay letters in their tasks. Otherwise, only admins have access to pay letters.

The **Pay letters** screen contains the following fields:

Field	Description
Use pay letters	If enabled, the system automatically generates pay letters once a cycle reaches the communication stage.
Give manager access to pay letters	If enabled, managers can access and download pay letters directly through their task interface. When disabled, pay letter access is restricted to administrators only, providing greater control over sensitive compensation communications.

4. Cycles

Compensation cycles are annual or periodic pay review cycles with configurable timelines where you can:

- **Budget Management:** Set overall budgets with holdback amounts and segment by hierarchy/location/cost centre.
- **Pay Philosophy:** Define merit increases, across-the-board raises, and bonus calculations.
- **Eligibility Rules:** Control who participates based on hierarchy, employment status, start dates, etc.
- **Manager Tasks:** Assign compensation decisions to appropriate managers with supporting user access.
- **Review Process:** Administrative oversight with impact analysis and decision monitoring.
- **Communication:** Generate personalised pay letters and export data back to PeopleXD.

4.1. The Cycles Screen

The Cycles screen is where you can create and edit your compensation cycles. It displays all existing compensation cycles detailing the Title, Stage, Status, Next Milestone, Owner and Created date.

Pay Planner		Cycles					+ New cycle ...	
- Cycles - Settings - Administration - Help								
		Title	Stage	Status	Next milestone	Owner	Created on	
		April 2026 - Pay & Bonus Review	Closed	✓ Closed	11/06/2025	J jane.taylor@sb14.com	11/06/2025	
		Salary and Bonus Modelling	Allocation	△ Overdue	10/23/2025	J jane.taylor@sb05.com	10/14/2025	
		2026 Salary Modelling Cycle	Closed	✓ Closed	03/31/2026	J jane.taylor@sb14.com	10/13/2025	
		Salary Modelling Cycle - TEST CYCLE	Closed	✓ Closed	03/31/2026	J jane.taylor@sb14.com	08/19/2025	
		Equality Modelling - TEST CYCLE	Allocation	△ Overdue	10/24/2025	J jane.taylor@sb14.com	06/03/2025	

From here you can:

- Create a new cycle using the New Cycle button.
- Open an existing cycle by clicking on the Title.

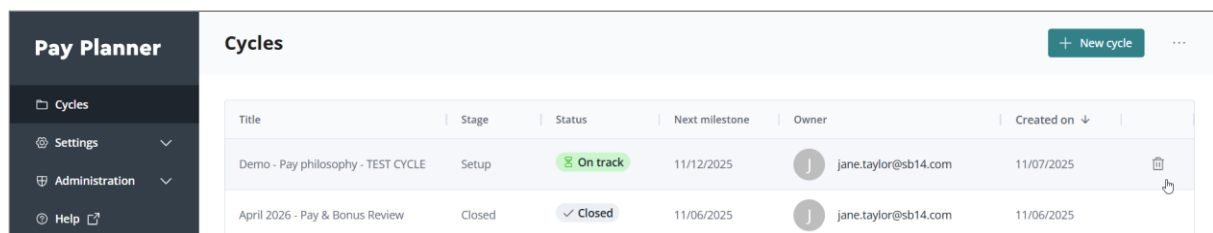

4.1.1. Test Cycle

Before creating your compensations cycles, it is recommended that you create a **Test Cycle** to ensure you are not missing any required data that will impact your cycles performance, review your reporting structures and familiarise yourself with the functionality.

To create a Test Cycle:

1. From the Cycles screen click **New cycle**.
2. Enter the Cycle name and tick **Mark as test project**.
 - This will create a controlled environment for testing purposes without affecting regular compensation activities and reporting. This means that emails and invitations are deactivated, ensuring that it isn't accessible to managers and supporting users.
3. Continue to create your test compensation cycle as outlined in [Create a New Cycle](#).
4. The Test Cycle will open for you to [complete set up](#) and review the data and functionality before rolling out to your organisation.

Once happy with the data and reporting structures, test cycles can be deleted from the cycles screen using the **Trash icon** to the right of the Cycle name.

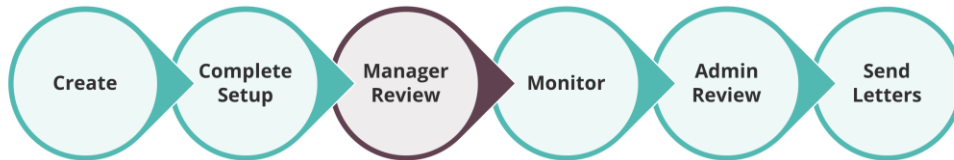

The screenshot shows the 'Pay Planner' interface with a sidebar on the left containing 'Cycles', 'Settings', 'Administration', and 'Help'. The main area is titled 'Cycles' and features a '+ New cycle' button. Below is a table with columns: Title, Stage, Status, Next milestone, Owner, and Created on. Two cycles are listed: 'Demo - Pay philosophy - TEST CYCLE' (Setup, On track, 11/12/2025) and 'April 2026 - Pay & Bonus Review' (Closed, Closed, 11/06/2025). A trash icon is visible next to the first cycle.

Title	Stage	Status	Next milestone	Owner	Created on ↓
Demo - Pay philosophy - TEST CYCLE	Setup	On track	11/12/2025	jane.taylor@sb14.com	11/07/2025
April 2026 - Pay & Bonus Review	Closed	Closed	11/06/2025	jane.taylor@sb14.com	11/06/2025

4.2. A Cycle Lifecycle

This section provides a high-level overview of the key stages of the cycle lifecycle on the Pay Planner platform. As an administrator you will manually move your cycle on to the next stage once all tasks are completed.

Stage	Overview
Create	Opens the New Cycle wizard where you will: • Configure the Cycle Details • Set Up Key Information • Define Eligibility Criteria • Configure Base Pay Budget
Complete Set up	Once you've created your cycle, you can make updates, add collaborators, and review cycle data before adding your Timeline, Pay Philosophy and creating manager Assignments. Once assignments tasks are created you can move your compensation cycle to the Allocation stage by clicking Start allocation. This sends manager notifications and start the Manager Review.
Manager Review	Assigned managers will be responsible for completing the compensation allocation process for their direct reports. If they are a manager of managers, they'll also review their team managers' tasks. They will be responsible for: • Allocate compensation. • Review team managers' tasks, if applicable.

Stage	Overview
Monitor	Allows administrators to track progress, review decisions, and ensure alignment with your organisation's pay philosophy before finalising allocations. When you've completed your monitoring and any necessary adjustments all tasks should be marked as <i>Ready for review</i>. You can then move your compensation cycle to the Review stage by clicking Start Review.
Admin Review	A critical checkpoint in your compensation cycle where administrators evaluate managers' proposed decisions, assess budget impact, and ensure alignment with your organisation's pay philosophy before finalising changes. Once you've completed your review and any necessary adjustments. You can move your compensation cycle to the Communications stage by clicking Start communication.
Send Letters	Finalise your compensation cycle by sharing decisions with employees and integrating data back into PeopleXD. Once the cycle is finished and you have downloaded all the necessary documents. You can move your compensation cycle to Closed by clicking Close cycle.

4.3. Create a New Cycle

To create a new compensation cycle from the Cycles screen, click **+New cycle**. This will open the New cycle wizard to complete.

4.3.1. Step 1 – Details

Complete the following fields to define your compensation cycle.

Setup

Set a snapshot date to choose when your data will be captured

The snapshot date represents a specific point in time when compensation data is captured to make adjustments to employee compensation, allowing the organization to work with consistent data during the compensation review and adjustment process.

Snapshot Date

09/09/2025

📅

Set cycle currency

Individual employees' compensation will be displayed in their local currencies within a task, but the cycle currency is the currency that will be used to calculate and manage all task budgets.

GBP (British Pound) ▼

View currency conversion rates

Select a budgeting method

☒ Uniform budget ⓘ

Each manager's budget is created based on a uniform increase of the total budget for each employee in their task, unless specific guidelines for individual employees apply.

☐ Flexible budget ⓘ

Each task's budget is created by applying the pay philosophy's guidelines to each employee in the task.

Field	Description
Snapshot Date	This field defaults to today's date but can be updated, if required. This defines the specific point in time when compensation data is captured. Select this date first as it shapes your organisational hierarchy and determines participant numbers. For example, entering 13 May 2025 will update eligible headcount based on that date's data, allowing you to adjust eligibility criteria and view participating employee numbers.
Set cycle currency	Select the currency for calculating and managing all task budgets. Employee data displays in their local currencies

Field	Description
	within tasks. View currency conversion rates by clicking <i>View currency conversion rates</i>. See section 2.2 Currency for configuration.
Select a budgeting method	Select how manager budgets are calculated. There are two options available: Uniform: Each manager's budget is determined independently of the pay philosophy recommendations. Budgets are calculated on the employee's base pay, which can diverge from the pay philosophy recommendations. Therefore, managers can have recommendations that put them over or under budget. For example, let's say a manager has two employees on their team. Employee A's base pay is £50K and Employee B's is £100K. If the merit increase is 10%, the budget would be £15K. Flexible: Each manager's budget is calculated according to the pay philosophy recommendations. Budgets may vary based on factors such as performance ratings, so a team with many high performers may consume a larger portion of the total budget.

4.3.3. Step 3 – Eligibility

Complete the following fields to define the eligibility criteria for your compensation cycle. All employees are currently eligible by default unless manual overrides are set. To define eligibility you can:

- Add rules to define eligibility criteria. Rules can be based on hierarchy level, start & end dates, employment status etc.

Note: Premium customers can also set eligibility criteria per pay type.

- Set manual overrides. You can select individual employees and manually include or exclude them.

Eligibility summary

Total headcount 1371

✓ Eligible 1192

✓ Manually eligible 2 / 1192

⚠ Missing base ... 19 / 1192

✗ Ineligible 179

To add an eligibility rule:

1. Select **+ Add rule**.
2. Select from the **Select column** dropdown or select Browse all columns.
3. Select the applicable condition from the **Select condition** dropdown.
4. Define your values for the rule from the **Select values** dropdown.
5. Review the **How this rule impacts eligibility** section to see employee impact.
6. Click **Add rule**.
7. Repeat for all eligibility rules required.

From each eligibility rule created you can:

- **Edit** the rule using the pencil icon.

- **View** how this rule impacts eligibility using the info icon.
- **Delete** the rule using the trash icon.

To add a manual override:

1. Select **+ Add override**.
2. Select either **Manually eligible** or **Manually ineligible**.
3. Select employees from the list or upload a file.
4. Review the **How this rule impacts eligibility** section.
5. Click **Add overrides**.

From the manual overrides created you can **View Details** to see a summary of the employees captured. From here you can:

- **Filter** the results.
- **Remove all overrides** using Actions.
- **Delete** employees from the override using the trash icon.

Page 45 of 92

Field	Description
Define the bonus period	Set the Bonus Period Start Date. The system automatically calculates the bonus period.
Set company performance	Estimate your company's target achievement percentage. Example: 95% achievement reduces the budget by the remaining 5%.
Define holdback for bonus	Turn the Toggle on to set a holdback amount. Then select a percentage of bonus budget to withhold from manager allocations. Achieved by understating company performance. Available for budget overrun situations.
Set team performance	If when configuring your bonus calculation methodology you have selected a formula which includes Team performance, estimate your team's target achievement percentage. You can auto apply team performance changes or manually adjust each Team performance % field. To auto apply changes turn on the <i>Cascade team performance changes</i> toggle and adjust the Overall Team performance % field. The teams will automatically update.
Upload individual proration data	You can upload proration factors for each employee. The file uses a simple two-field format: Employee ID and Factor. The proration factor is applied to the calculated bonus. This functionality enables custom proration scenarios beyond start date, such as leave of absence. This gives you flexibility to define your own proration logic. Max file size is 25MB. Only .csv file type is supported.
Available bonus plans for this cycle	This will list all bonus plans created in 3.1.3 Incentive Plans .

4.3.6. Step 6 – Create

Once happy with the details entered in the above steps. Click **Create** to establish your compensation cycle.

4.4. Complete Set up

Once you've created your cycle it will open for you to review the criteria set up and make updates, add collaborators, and check cycle data before adding your Timeline, Pay Philosophy and creating manager Assignments. This can be completed using the following screens.

4.4.1. Essentials

The Essentials tab is where you can review the core information set up for your cycle.

The screenshot shows the 'Test cycle Sept 25' setup screen in the 'Essentials' tab. The interface includes a top navigation bar with 'Cycles > Test cycle Sept 25', a 'Setup' status indicator, an 'Overdue' warning, and a 'Start allocation' button. Below this is a tabbed interface with 'Essentials', 'Cycle data', 'Eligibility', 'Budget', 'Timeline', 'Pay philosophy', and 'Assignments'. The 'Essentials' tab is active, showing a left sidebar with 'Details', 'Settings', and 'Pay letters'. The main content area is titled 'Cycle details' and includes an 'Edit' button. It contains several sections: 'Cycle name' with a text input field containing 'Test cycle Sept 25'; a checkbox for 'Mark as test project'; a 'Description (optional)' text area; 'Available pay types' with checkboxes for 'Base pay' and 'Bonus'; 'Pay effective dates' with date pickers for 'Pay effective date' and 'Bonus'; and 'Collaborators (optional)' with a text input field.

To update information within these screens click **Edit**, make your updates then click **Save** to capture your changes. Pay letters are also configured here for the compensation cycle.

The **Cycle details** screen contains the following fields:

Field	Description
Fields available to update	Fields available to be updated on Cycle details are: • Cycle name & Description • Pay effective dates • Collaborators
Fields not available to update	It is not possible to update Available pay types included in the creation of your compensation cycle.

The **Settings** screen is where you can configure your cycle behaviour by:

Field	Description
Require justification for compensation deviations	Turn on the toggle to ensure managers provide a note when deviating from the pay philosophy guidance. Otherwise, notes for deviations remain optional.
Auto rounding for final payouts	Turn on the toggle to automatically round final compensation amounts. Auto rounding streamlines final employee payouts, ensuring clean and visually appealing salary figures.
Manager view	Update the Manager view default settings for this specific compensation cycle. Select and order the data columns managers can see in their tasks. Managers initially see " Visible by default " columns in their task. They can manually add columns that are " Available to managers ".

The **Pay letters** screen allows you to update your cycles' [default Pay letter configuration](#) for this specific cycle.

Pay letters provide formal documentation of compensation decisions for individual employees. These letters become available for download once a cycle reaches the communication stage.

The screen contains the following fields:

Field	Description
Use pay letters	Pay letters are enabled by default for all cycles. To disable this feature, turn the toggle Off .
Give manager access to pay letters	If enabled, managers can access and download pay letters directly through their task interface. When disabled, pay letter access is restricted to administrators only, providing greater control over sensitive compensation communications.

Pay Letter Configuration

You have three options for setting up pay letters to meet your organisational needs:

Field	Description
Pre-built template	Use the Pre-built template link to download and customise the standard template. This includes both fixed text and dynamic fields that populate automatically with employee data.
Upload pay letter	Allows you to upload your own custom pay letter. Max file size is 4.5MB. Only .docx file type is supported.
Configuration segmentation	Allows you to use different letter templates for different employee groups e.g., location or contract type.

To Configure segmentation for pay letters

1. Click **Configure segmentation** and choose your segmentation criteria.
2. Click **Recreate configuration**.
3. Use the drop-down to open the segmentation list.
4. For each segment expand the 3-dot menu and upload the appropriate template.
5. Click **Save** to capture any changes.

4.4.2. Cycle Data

The Cycle data screen allows you to review which employees will be included in your cycle to ensure your eligibility criteria are working correctly.

The screenshot displays the 'Cycle data' screen for 'Test cycle Sept 25'. The interface includes tabs for Essentials, Cycle data (active), Eligibility, Budget, Timeline, Pay philosophy, and Assignments. A search bar and filters for Eligible (1212), Ineligible (159), and All (1371) are present. The table lists employees with their IDs, email addresses, and eligibility status. The 'Data health check' panel on the right provides alerts for missing required data, potential quality issues, and missing optional data, each with a 'View details' link.

The data can be filtered using the following options:

Option	Details
Eligible	All employees included in the cycle.
Ineligible	All employees excluded from the cycle and why.
All	Complete employee overview
Search	Use the search feature to find a specific employee, by name or ID, you wish to review.

You can also use further option to tailor your view:

- **Full Screen** – makes the data full screen and removes the data health check panel.
- **Columns** – allows you to tailor the columns displayed on screen.
- **Actions** (3-dot menu) – gives you access to:
 - **Reset columns** – resets all default columns.
 - **Export visible fields** – allows you to download a .csv file for external analysis if needed.

Data Health Check

The system automatically identifies potential issues with your cycle data in the data health check panel. You can directly access areas of concern to review and action:

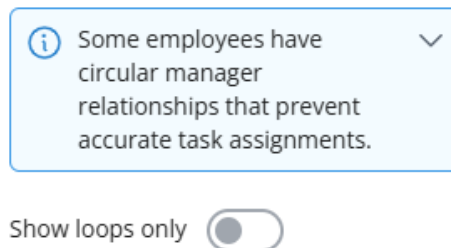

Option	Description
Missing required data	Critical information needed to run the cycle. Missing data doesn't block you from running the cycle, but it does have the following impacts: • Required data is needed to keep employees eligible for this cycle. • Missing data refers to data that's either not provided or cannot be understood or used by the system (e.g. wrong format or unsupported value). • Managers can see employees with missing data but cannot make pay decisions for pay types lacking required information until the data is added. • Pay letters of employees missing required data won't get generated. Review the missing data and make the relevant updates in PeopleXD to ensure it's available. Note: that any data changes can take up to 24 hours to reflect in Pay Planner.
Data quality issues	Inconsistencies that may affect results. • Review FTE ratios that seem unusually high or inconsistent. • Make sure employees' pay uses the appropriate currency.
Missing optional data	Additional data that could improve recommendations. • Missing information relevant to your current cycle configuration. • Missing information that impacts manager decision making. • Missing information that affects analytics and reporting accuracy.

- Circular manager relationships that prevent accurate task assignment. Use the **Show loops only** toggle to identify employees affected by circular reporting. See [Circular Reporting Loops](#) for further guidance.

Circular Reporting Loops

Pay Planner cannot process circular reporting structures. For example, Employee A reports to Employee B, who reports back to Employee A. When detected, affected employees are automatically moved to the "Unknown" category.

If the *Missing optional data* sections displays the below tab, you can use the **Show loops only** toggle to identify the affected users.

Note: The identified employees must have the circular reporting loops removed before you can continue creating your cycle as if not it prevents Pay Planner from building a clear supervisory hierarchy needed for accurate task assignments.

To resolve circular reporting loops in PeopleXD:

1. Create a new workgroup containing employees who should sit at the top level of your hierarchy.
2. Leave the Org Role Owner field blank for this workgroup.
3. Contact your Professional Services consultant to reload the Pay Planner data.
4. Create a new cycle with the updated data in Pay Planner.

Top-level employees will have no reporting line above them, with all other employees reporting up through the correct hierarchy.

Note: Managing Deleted Employee Records - Pay Planner automatically syncs changes to existing employee records from PeopleXD. However, when an employee record is deleted in PeopleXD, this change is not automatically reflected in Pay Planner. Options to resolve this are:

- Mark the employee as ineligible for the current pay cycle within Pay Planner, or
- Request a data reload by raising a Support ticket - this will refresh all employee data and remove deleted records.

4.4.3. Eligibility

The eligibility screen allows you to modify who is included in your compensation cycle. The eligibility rules and manual overrides use the same configuration options as used when you initially [created the cycle](#).

4.4.4. Budget

The budget screen allows you to adjust your compensation budget settings:

- **Budget** - key information that defines your compensation cycle.
- **Base pay** - salary increase parameters.
- **Bonus** - variable compensation settings (Premium package customers only).

4.4.5. Timeline

Once you are happy with your compensation cycle set up and data you can create a visual roadmap for your compensation cycle with key milestones and deadlines. This can be beneficial as it helps you track progress and ensures all stakeholders know key dates.

To set up your timeline:

1. Click **Add milestones**.
2. Enter the **Cycle end date**.
 - The stage durations and end dates will automatically populate.
3. **Adjust** the Duration and End dates for each stage, if required.
4. Click **Save**.

Allocation	30 bus. days	10/28/2025
Review	20 bus. days	11/25/2025
Communication	19 bus. days	12/22/2025

4.4.6. Pay Philosophy

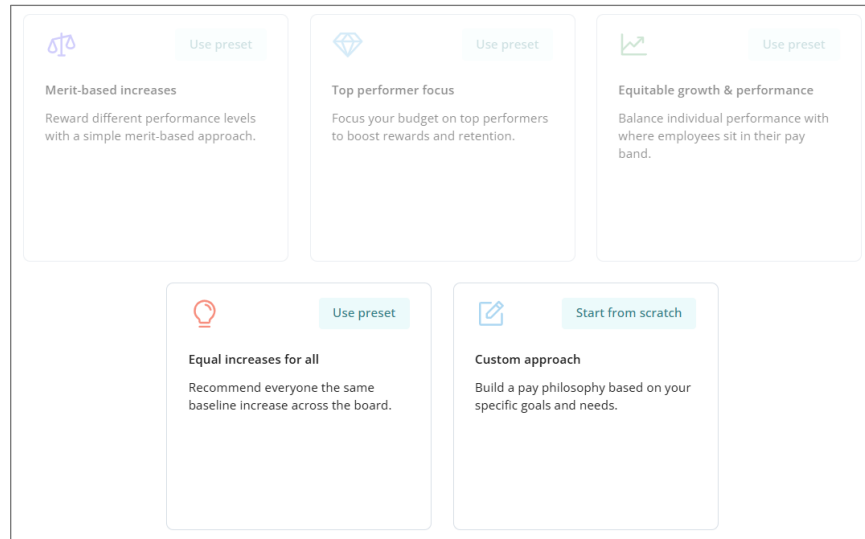

Your pay philosophy defines how your organisation approaches employee compensation. It reflects your company culture, values, and goals whilst helping to attract, retain, and motivate talent. The system uses your pay philosophy to generate recommended pay increases for each employee within your budget.

You can create your pay philosophy using two approaches:

- **Select a preset** - use a proven framework based on your data.
- **Start from scratch** - build a completely custom approach.

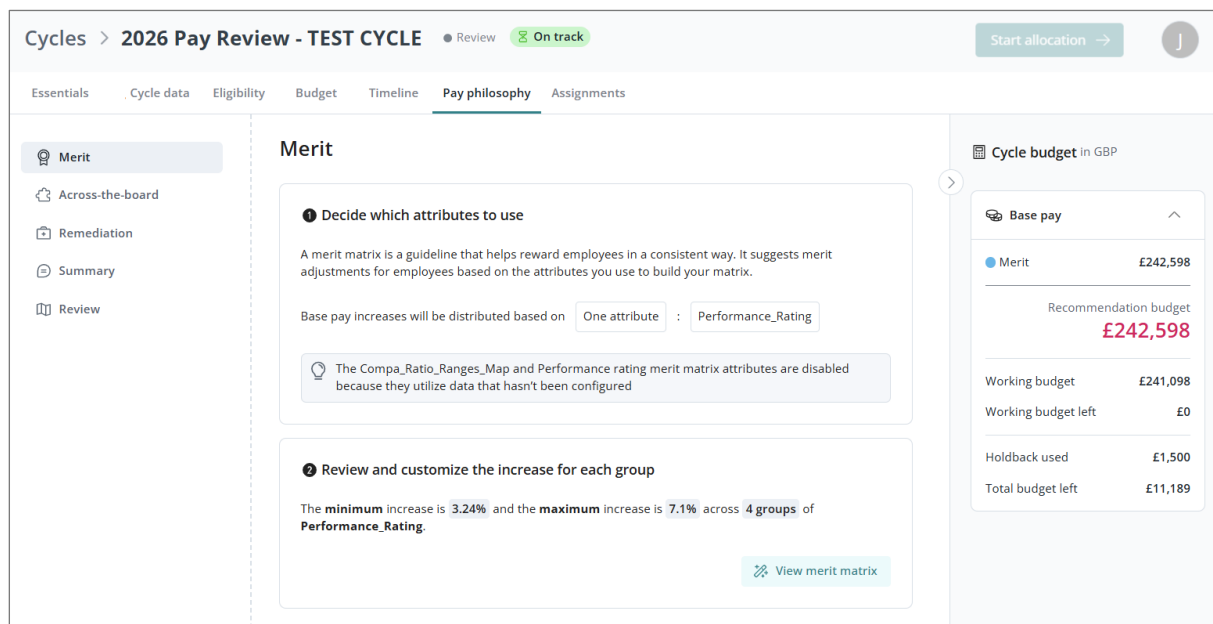

To configure your pay philosophy:

1. Click **Set up pay philosophy**
2. For your chosen option click **Use preset** or **Start from scratch**.

Note: Some presets may be disabled because they utilise data that hasn't been configured in your compensation cycle.

3. You can now customise or add your pay elements:

Element & Description	How to
Merit Reward employees based on performance ratings and their position within the salary	- Click Customize merit matrix. Adjust the percentage increases for the different performance and range position combinations. - Click Close.

Element & Description	How to
range. Higher performers receive larger increases.	
Across-the-board Provide consistent pay rises to all employees, often used for cost-of-living adjustments.	1. Click Add an increase. 2. Select whether to apply company-wide or to specific locations and click Apply. 3. Enter your percentage Increase. 4. Select This is a mandatory minimum increase to create a floor below which no employee's increase can fall, if required. 5. If applied, managers will receive a warning if they try to reduce increases below the mandatory minimum. 6. Repeat as required.
Remediation	Enable the toggle to apply an increase to pay band minimum. This applies to all non-promoted employees whose base pay is less than the pay band minimum. The sum of their base pay guidance is taken into account when calculating this.  Note: Pay band data is applicable to the Professional Pay Planner package only, which will be in a future release.
Bonus Variable compensation based on employee performance and contribution.	1. Click Customise bonus matrix. 2. Adjust the percentage increase for the different group values. 3. Click Close.

4. Add a **Summary** of your approach, if required.
 - Beneficial as the summary will be shared with your managers once they're assigned their tasks, therefore giving them pay philosophy guidelines.
5. **Review** the generated recommendations.
6. Click **Save**.

4.4.7. Assignments

Assign managers to oversee compensation decisions for their teams. Once you release tasks, assigned managers receive notifications to begin their allocation work.

To assign compensation tasks to managers, click **Set assignments**. The *Set task assignment* screen automatically displays task based on your organisational and supervisory hierarchies.

Set task assignments

☒ Cascade assignee changes ⓘ

Task name ⓘ	Headcount ⓘ	Assignee ⓘ	Supporting users ⓘ	Assigned base pay budget
▼ Maintenance - Malachi Goldster	187	Malachi Goldster	+ Add supporting users	£719,796 GBP
▶ Maintenance - Frankie Slide	35	Frankie Slide	+ Add supporting users	£136,854 GBP
▼ Payroll Team - Katherine Douglas	515	Katherine Douglas	+ Add supporting users	£1,689,083 GBP
▶ Nchds - Natasha Osborne	25	Natasha Osborne	+ Add supporting users	£106,892 GBP
▶ Account Management Services - Catrin Price	43	Catrin Price	+ Add supporting users	£156,246 GBP
▶ Online Help Desk - Richard Bassett	50	Richard Bassett	+ Add supporting users	£185,614 GBP
▶ Bid Team - Louise Barton	392	Louise Barton	+ Add supporting users	£1,216,789 GBP

Field	Description
Task name	Click the task name to customise. The name of the task is visible to the task assignee and supporting people.
Headcount	Displays the total number of people that will be allocated for in this task and its subtasks. This is a not editable field.
Assignee	Enable the Cascade assignee changes toggle to automatically apply manager assignments down through all hierarchy levels. Click Assignee and select the appropriate manager for each level. Note: Only employees with the Pay Planner Manager User profile can be selected as an assignee. See User Access for guidance.

Field	Description
Supporting users	This is an optional field. Supporting users have the same permissions as the assigned manager and their assignments automatically cascade to all levels below. Click Add supporting users and select the appropriate HRBPs or other team members, who can assist managers.  Note: Only employees with the Pay Planner Support User profile can be selected as an assignee. See User Access for guidance.

Once complete, click **Save**. You are now ready to move your compensation cycle to the Allocation stage. Click **Start allocation** to send manager notifications and start the Manager Review.

 **Note:** Pay Planner cannot process circular reporting structures. For example, employee A reports to employee B, who reports back to employee A.

If the *Set task assignment* screen displays the below warning message, you will need to resolve the circular reporting loops in PeopleXD before continuing. As this prevents the system from building a clear supervisory hierarchy needed for accurate task assignments. See section [Circular Reporting Loops](#) for guidance on how to resolve.

Set task assignments

 Some employees have circular manager relationships that prevent accurate task assignments.

4.5. Manager Review

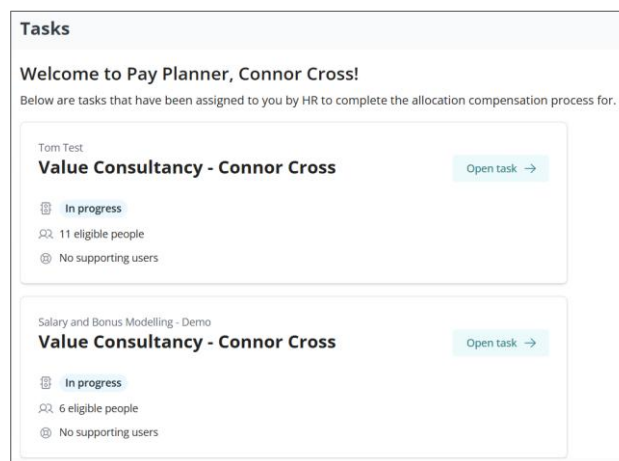

Managers will be responsible for completing the compensation allocation process for their direct reports. If they are a manager of managers (leader), they'll also review their managers' tasks.

Here's what they'll be responsible for:

- Allocate compensation
- Review managers' tasks (if they are a leader)

4.5.1. Review Pay Decisions

Once logged in to Pay Planner managers will be presented with a screen explaining the tasks they need to complete.

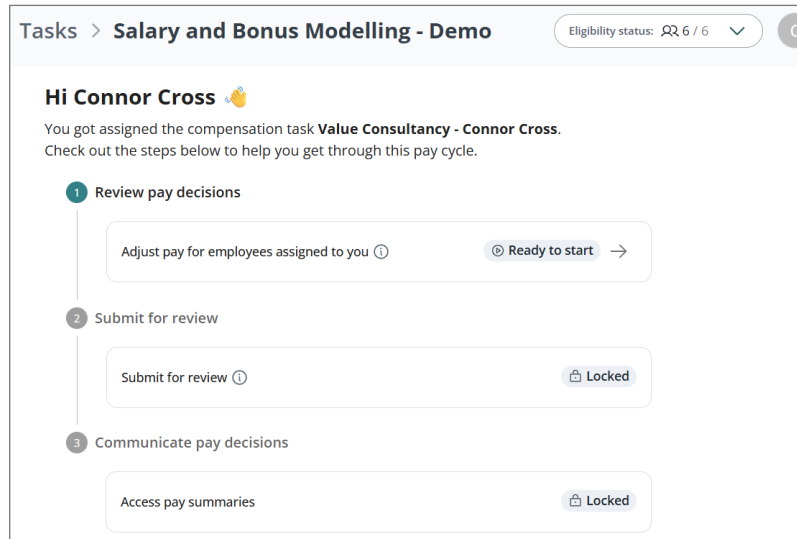

Click **Open task** to access the check list for the relevant pay cycle task.

For each task, the manager is responsible for completing the compensation allocation for the employees assigned to them, typically their direct or indirect reports. During this process, they'll review personalised guidelines made for each employee based on the combination of their company's pay philosophy and each employee's data. They can also make adjustments to create a set of recommendations for approval.

Once they've completed the allocation, they can submit their task for manager review.

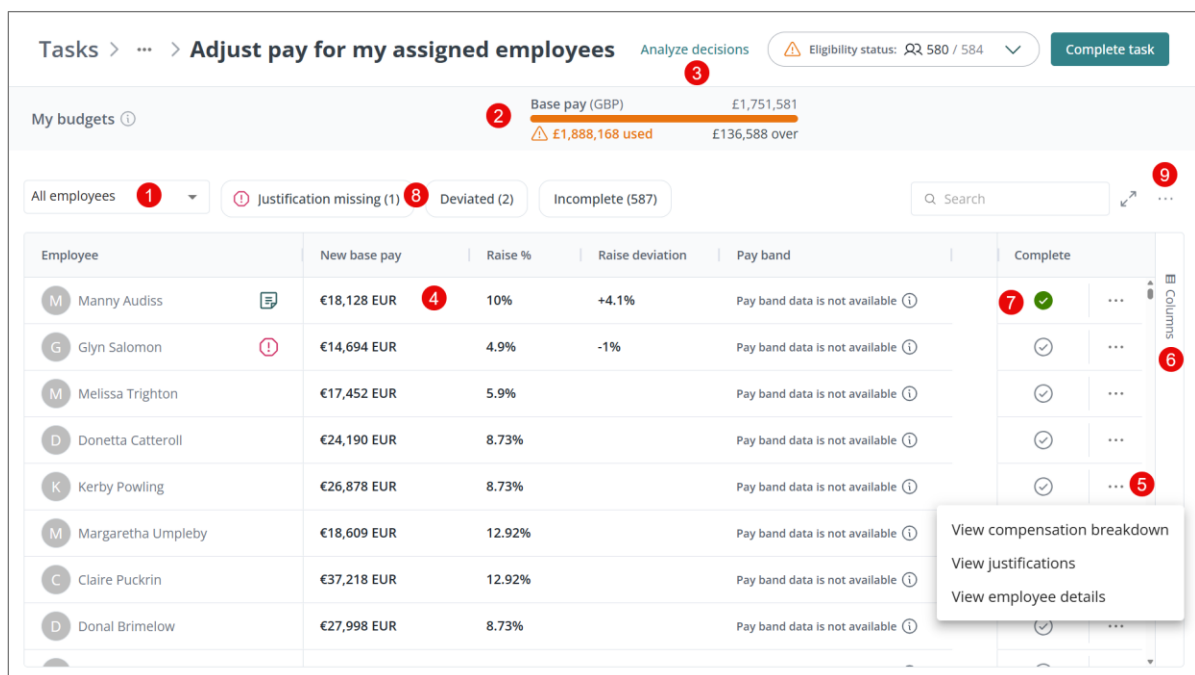

Note: Supporting users can perform this task as well.

To review compensation decisions:

- From the pay cycle check list click **Ready to start**.
- The **Adjust pay for my assigned employees** screen displays.

The **Adjust pay for my assigned employees** contains the following fields that can be used to review your employee compensation pay decisions:

Item	Description
1 Group By	Use the dropdown options to select an attribute to group the table by.

Item	Description
2 Budget	Here you will find the relevant budgets for the task. When there are employees belonging to multiple segments in a task, a budget segment picker will be displayed. The allocated amount dynamically updates as you make inline changes in the table.
3 Analyze Decisions	This allows you to run an analysis on the current state of compensation decisions, view your breakdown of Eligibility and Submit from Review. See Analyze decisions for further guidance.  Note: When loading this screen, it may take a while to appear.
4 Editing	You can double-click on a value in the table to edit it. Special characters, letters, and anything other than numeric input is not accepted in any cells, except for deviations, which can accept (-) for a negative value. Values that would adjust an employee's new base pay to be less than their current base pay are reset to the previous valid value.  Tip: You can navigate the editable cells in the table with keyboard shortcuts. • Use the Arrow keys to move around the cells. • Tab key to move to the next cell in a row. • Enter key to accept the input and move to the next cell down. • Esc key to deselect a cell.
5 3-Dot Menu	Expand the menu to access additional details about an employee, such as: • Compensation breakdown • Justifications • Employee details
6 Columns	Use Columns to select the columns to be displayed in the table.

Item	Description
7 Complete	Mark employees as complete to track your review progress. This is optional, only visible to you, and doesn't affect submission.
8 Justification	Where adjustments have been made to an employee, add a note to justify your deviation from the guidance. Once added the symbol will update to show this has been completed.
9 Actions	Expand the menu to access the Actions options. There are 3 options available: • Convert values to – if applicable, this toggle will allow you to convert to a different currency value. • Reset table view – this allows you to reset the filters and columns to the default settings. This will not impact any adjustments made. • Export visible columns – this allows you to export the table.

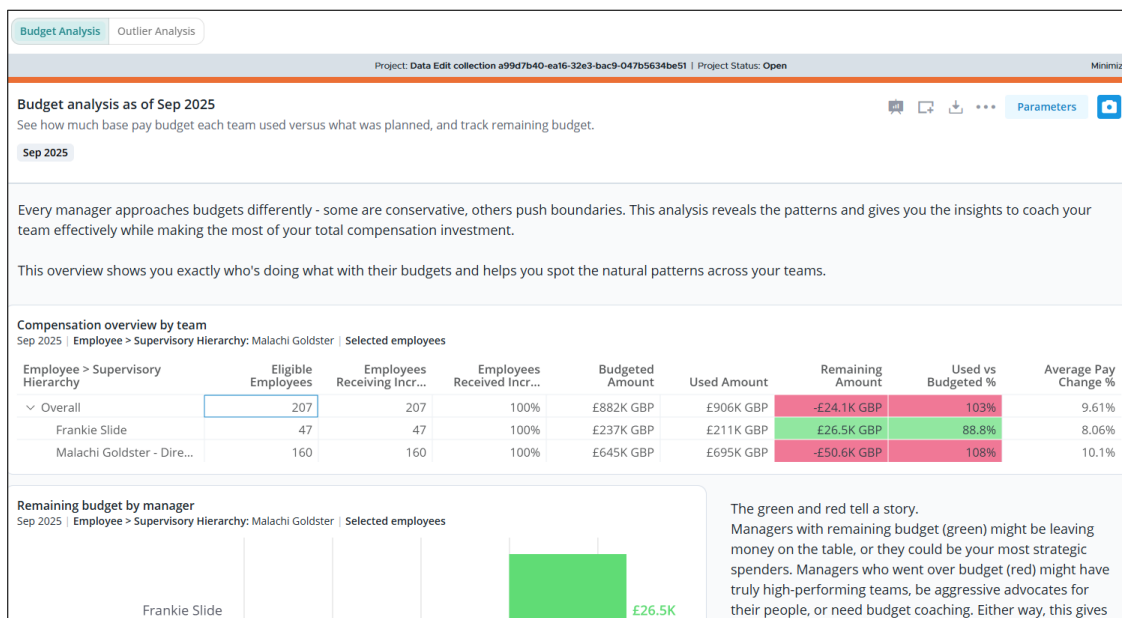

- Once you have reviewed all employees' compensation pay decisions, click **Complete Task**.
- Confirm that everyone has been considered and you are satisfied with all decisions then, click **Submit for review**.
- This will mark *Step 2 Submit for review* with the date you submitted the pay decisions for review.
- Once the review process has been completed managers and supporting users, if granted access, will receive automatic email notifications that pay letters are ready and *Step 3 Communicate pay decisions* will be unlocked for you to access and download the pay letters for your employees. See [Communicate Pay Decisions](#).

4.5.2. Analyse decisions

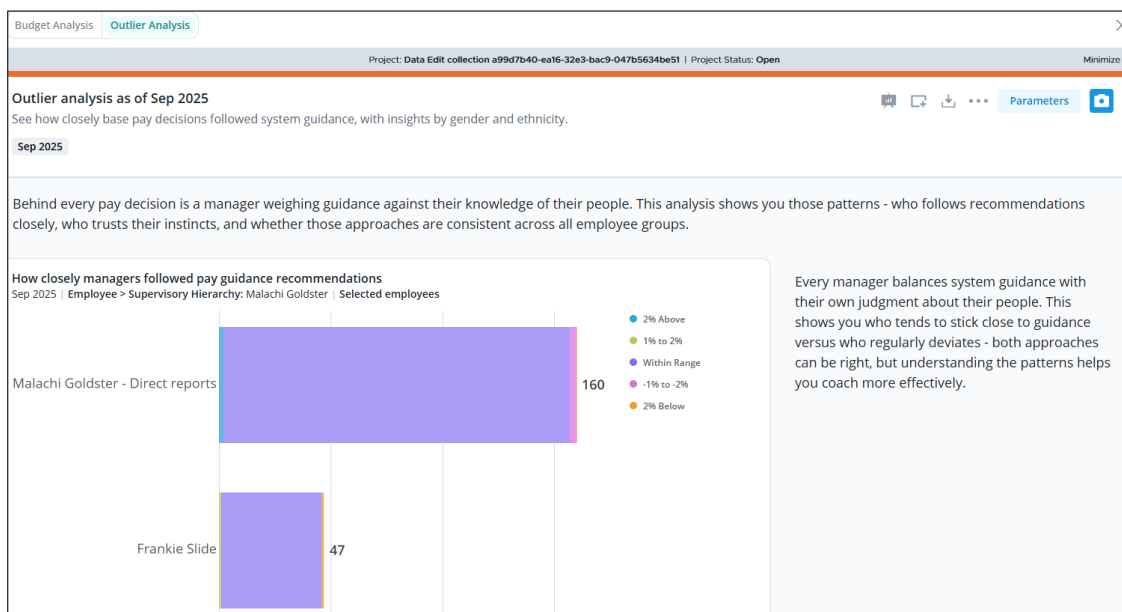

The Analyse Decisions feature provides comprehensive insights into your pay cycle performance through detailed analytics. This functionality offers two key analytical views:

 **Note:** When initially loading this screen, it may take a while to appear.

Budget Analysis - Monitor budget utilisation across your organisation by comparing actual base pay expenditure against planned allocations. Track remaining budget capacity for each team to ensure financial targets are met.

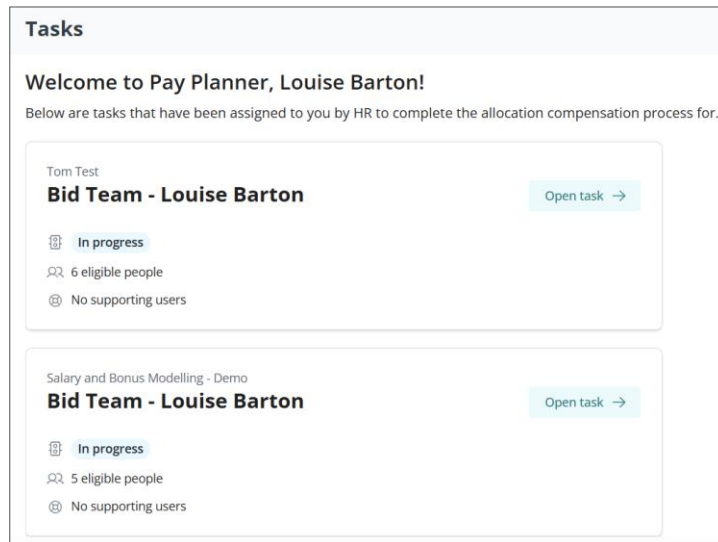

Outlier Analysis - Review how closely pay decisions align with system recommendations, with detailed breakdowns by gender and ethnicity. This analysis helps identify potential bias in decision-making and ensures equitable pay practices.

4.5.3. Leader Review

Once logged in to Pay Planner leaders will be presented with a screen explaining the tasks they need to complete.

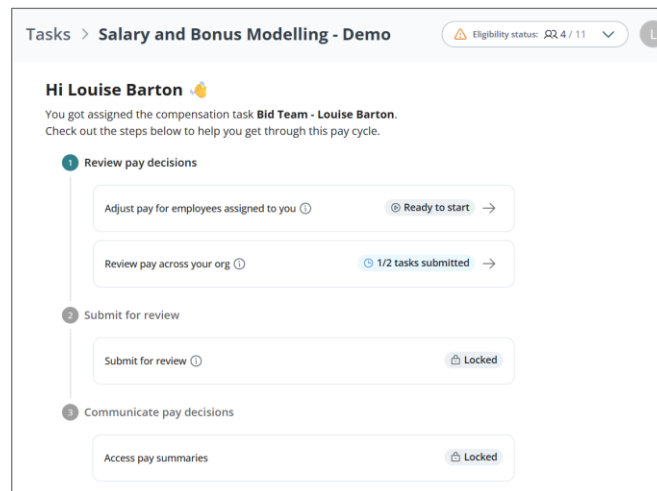

Click **Open task** to access the check list for the relevant pay cycle task.

For leaders who have direct reports on their team who are also managers that have been assigned compensation allocation tasks. They will be able to review these tasks by taking a look at progress, allocation highlights, and compensation decisions to ensure they're progressing on budget, on time, and in line with the pay philosophy suggestions.

They can also complete manager task on their behalf if the manager is unavailable to complete. For example is they are out of the business on absence.

 **Note:** Supporting users can perform this task as well.

To review manager compensation decisions:

1. From the pay cycle check list click **Tasks submitted**.
2. The **Review pay for everyone in my org** screen displays.

Submission status

The following tasks have been assigned to your team managers. Monitor your managers' tasks to ensure they're progressing and completed on time.

Task	Assignee	Progress	Last modified	
Sales Handover Team - Cynthia Whe	C Cynthia Wheeler	0/1 TASKS C...	06/13/2025	View task
Value Consultancy - Connor Cross	C Connor Cross	1/1 TASKS C...	09/18/2025	View task

Clicking **View Task** to make adjustments, if required. This can be completed as outlined in [Review Pay Decisions](#).

Note: Any adjustments made to the managers' submitted tasks are not sent back to the manager for review. These will need to be communicated internally.

- Once you have reviewed all manager submitted tasks, click **Submit for Review**.
- Confirm that everyone has been considered and you are satisfied with all decisions then, click **Submit for review**.
- This will mark *Step 2 Submit for review* with the date you submitted the pay decisions for review.

6. Once the review process has been completed managers and supporting users, if granted access, will receive automatic email notifications that pay letters are ready and *Step 3 Communicate pay decisions* will be unlocked for you to access and download the pay letters for your employees. See [Communicate Pay Decisions](#).

4.5.4. Communicate Pay Decisions

Once the Administrator has closed the Review stage and opened the Communicate stage, managers and supporting users, if configured, will receive automatic email notifications that pay letters are ready to download using the *Communicate pay decisions* section of their task checklist, which will be unlocked.

The screenshot shows a task checklist for 'Tom Test' with an eligibility status of 5/9. The checklist is divided into three main sections: 1. Review pay decisions, 2. Submit for review, and 3. Communicate pay decisions. The first section contains two tasks: 'Adjust pay for employees assigned to you' and 'Review pay across your org', both marked as 'Completed'. The second section contains one task: 'Submit for review', marked as 'Submitted'. The third section contains one task: 'Access pay summaries', which is currently locked and has a right-pointing arrow next to it.

Tasks > Tom Test Eligibility status: 5 / 9

You got assigned the compensation task **Bid Team - Louise Barton**.
Check out the steps below to help you get through this pay cycle.

- 1 Review pay decisions
 - Adjust pay for employees assigned to you Completed →
 - Review pay across your org Completed →
- 2 Submit for review
 - Submit for review Submitted
- 3 Communicate pay decisions
 - Access pay summaries →

To download a pay letter:

1. Click the **Arrow** within *Communicate pay decisions*.
2. The *Communication* screen will display all available pay letters to download.

Tasks > ... > Communication

Eligibility status: 22 5 / 9

Next steps

You'll likely schedule meetings with your team members to discuss their compensation decisions. Review their compensation summaries to help provide guidance on how they can further develop their skills and performance for future cycles.

2 selected [Export pay letters to PDF](#)

	Employee	Job name	Pay letter downloads	
☒	Connor Cross	Solution Consultant	Available	...
☒	James McCormack	HR Manager	Available	...

3 Deliver pay letter

Provide your team member with the pay letters explaining the compensation decisions you discussed.

[Download pay letter \(PDF\)](#)

A compensation summary allows the manager to look at an employee's history of compensation attributes as well as review compensation adjustments.

4.6. Monitor

As an administrator, you have comprehensive oversight of all compensation allocation tasks throughout the cycle. This monitoring capability allows you to track progress, review decisions, and ensure alignment with your organisation's pay philosophy before finalising allocations.

During the allocation stage, you can:

- **Track Progress** - monitor real-time status updates for all manager tasks.
- **Review Highlights** - identify potential deviations from pay philosophy guidelines.
- **Assess Decisions** - evaluate all compensation choices for consistency, fairness, and equity.
- **Make Adjustments** - modify compensation decisions directly when necessary.

Note: Once you click **Start review** to close the allocation phase, managers will no longer be able to make changes to their tasks.

The **Allocations** screen within the compensation cycle gives administrators access to three components to monitor allocations tasks. To monitor compensation allocations click **Watch submissions**.

The screenshot displays the 'Allocation' tab within the 'Bonus Modelling Cycle - Top Performers - TEST CYCLE'. The interface includes a navigation bar with tabs like 'Essentials', 'Cycle data', 'Eligibility', 'Budget', 'Timeline', 'Pay philosophy', 'Assignments', and 'Allocation'. The 'Submission status' section is active, showing a table of tasks and their statuses. A sidebar on the right displays the 'Cycle budget in GBP'.

Task	Assignee	Status	Action
Payroll Team - Katherine Douglas	Katherine Douglas	In progress	View task
Online Help Desk - Richard Bassett	Richard Bassett	In progress	View task
Account Management Services - Catrin Price	Catrin Price	Ready for review	View task
Nchds - Natasha Osborne	Natasha Osborne	In progress	View task
Maintenance - Malachi Goldster	Malachi Goldster	Ready for review	View task
Unknown	jane.taylor@sb14.com	Ready for review	View task

Cycle budget in GBP

Allocation budget	£90,317
Allocated amount	£74,750
Allocation budget left	£15,568
Holdback used	£0
Total budget left	£1,989,650

4.6.1. Submission status

This provides a centralised view of all allocation tasks assigned to managers across your organisation. You'll see:

- A complete list of all manager allocation tasks.
- Real-time status and progress indicators.
- Key task details at a glance.
- Task ownership and assignment information.

Click **View Task** to drill down into specific task details. Where you can review pay decisions submitted or complete activities on behalf of task owners when needed.

When adjustments are needed, you can view and edit tasks from the manager's perspective, ensuring you understand the full context of each decision. Click **View Task** to open the manager's view and make necessary changes to compensation decisions. This is the same process as outlined in [Review Pay Decisions](#) or [Team Managers' Review](#).

Note: Any adjustments made to the managers' submitted tasks are not sent back to the manager for review. These will need to be communicated internally.

4.6.2. Key Highlights

The Key **Highlights** screen automatically identifies compensation decisions that may deviate from your established pay philosophy, helping you maintain consistency across allocations.

The screenshot displays the 'Allocation' tab within the 'Bonus Modelling Cycle - Top Performers - TEST CYCLE'. The interface includes a top navigation bar with tabs for 'Essentials', 'Cycle data', 'Eligibility', 'Budget', 'Timeline', 'Pay philosophy', 'Assignments', and 'Allocation'. A 'Start review' button is visible in the top right corner. The main content area is divided into three sections: 'Key highlights', 'Bonus adjustments', and 'Budget'. The 'Key highlights' section contains a message about highlighted tasks and a note about 3 tasks submitted. The 'Bonus adjustments' section mentions 381 employees whose adjustments deviated from the suggested philosophy, with a 'Show details' link. The 'Budget' section notes that not all managers' tasks have been submitted for review, with another 'Show details' link. On the right side, there is a 'Cycle budget in GBP' summary table.

Cycle budget in GBP	
Allocation budget	£90,317
Allocated amount	£74,658
Allocation budget left	£15,659
Holdback used	£0
Total budget left	£1,989,741

Key Features

- Automated flagging of potential outliers and deviations
- Quick identification of decisions requiring closer review
- Direct access to detailed breakdowns

The *Key highlights* screen is broken down into various sections; these can differ depending on your pay cycle and managers submission tasks.

For **Base pay adjustments**, **Bonus adjustments** or **Equity in pay** - By clicking **Show details** this displays a highlights summary of all flagged decisions. Click **Open breakdown** to view comprehensive decision details. Filters can be applied to these screens using the tab dropdown options to refine your view or select a specific employee.

Base pay adjustments

These comp adjustment decisions aren't in line with what the pay philosophy suggested for your managers

There are **6** employees whose comp adjustments deviated from what the pay philosophy suggested.

Cycle budget in GBP

Base pay
Allocation budget: £241,098
Allocated amount: £239,215
Allocation budget left: £1,883
Holdback used: £0
Total budget left: £14,572

4.7. Admin Review

The review stage is a critical checkpoint in your compensation cycle where you evaluate managers' proposed decisions, assess budget impact, and ensure alignment with your organisation's pay philosophy before finalising changes.

To begin reviewing compensation decisions:

1. Navigate to the **Review** tab of your compensation cycle.
2. Click **Review compensation**.

The screenshot shows the 'Review' stage of a compensation cycle. The top navigation bar includes 'Cycles > 2026 Pay Review - TEST CYCLE' with a 'Review' tab selected and an 'On track' status indicator. A 'Start communication' button is visible. The main content area is titled 'Review compensation decisions and budget' and includes sections for 'Analyze impact of compensation decisions', 'Budget', 'Give additional rewards', and 'Equity in pay'. A right-hand sidebar displays the 'Cycle budget in GBP' with a table showing budget details.

Cycle budget in GBP	
Allocation budget	£241,098
Allocated amount	£239,215
Allocation budget left	£1,883
Holdback used	£0
Total budget left	£14,572

The review process brings together all compensation decisions made during the cycle to give you comprehensive oversight and control.

Understanding Holdback Budget - If you defined a holdback budget during cycle setup, this reserved portion of your total budget was intentionally withheld from manager allocation. During the review stage, this holdback budget becomes available again, giving you flexibility to make strategic compensation adjustments where needed.

Your main tasks during the **Review stage** are to:

- **Run an Impact Analysis** to understand the full implications of proposed changes.
- **Review all Compensation Decisions** against budget and pay philosophy.
- Make necessary adjustments using available budget (including holdback funds).
- **Finalise** the review to proceed to Communication.

4.7.1. Run an Impact Analysis

Before making any compensation adjustments, generate an impact analysis to understand the full scope of proposed changes. To do this:

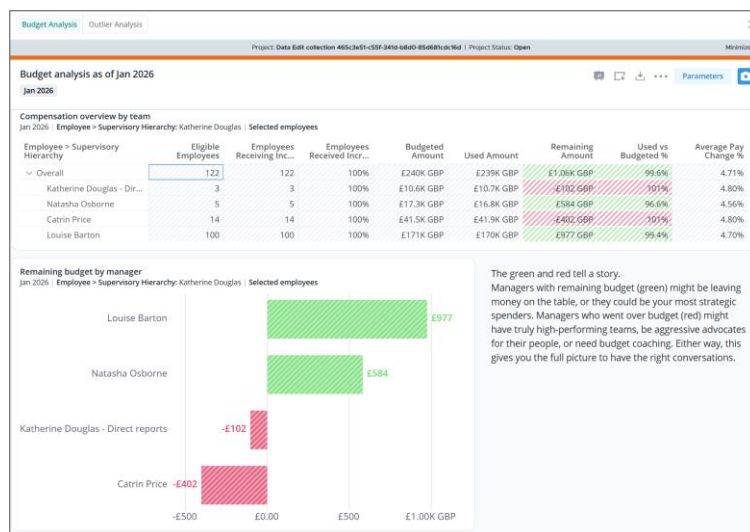

1. Click **Begin impact analysis**
2. Wait for the analysis to complete, this may take a few minutes depending on your data size.

What Impact Analysis Shows You - The impact analysis combines all compensation decisions from the cycle with historical data to reveal:

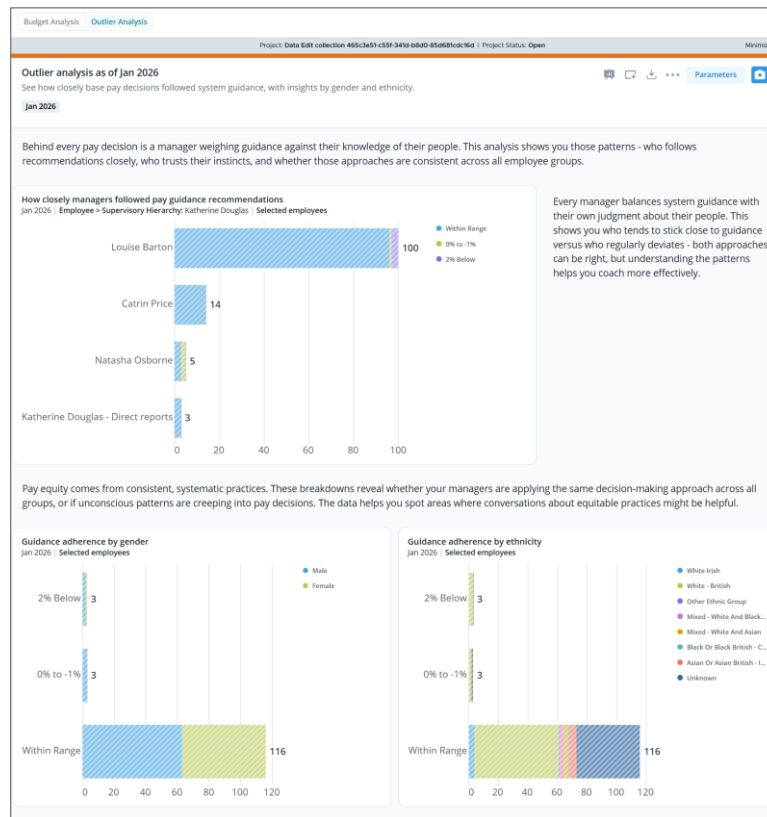

- Effects on employee expectations and satisfaction.
- Changes to compensation ratios across your organisation.
- Overall budget utilisation and distribution.

This functionality offers two key analytical views:

Budget Analysis - Monitor budget utilisation across your organisation by comparing actual base pay expenditure against planned allocations. Track remaining budget capacity for each team to ensure financial targets are met.

Outlier Analysis - Review how closely pay decisions align with system recommendations, with detailed breakdowns by gender and ethnicity. This analysis helps identify potential bias in decision-making and ensures equitable pay practices.

4.7.2. Review Compensation Decisions

With your impact analysis complete and holdback budget available, if applicable, you can now review and refine compensation decisions.

Note: Document your reasoning for any adjustments you make, as you'll need to provide justification for changes.

To see the details and make a change under Budget and Equity:

1. Click **Show details**.
2. Depending on the area choose one of the following:
 - Click **View task** to see all of the details in the task from the assigned manager's perspective and make a change.

- Click **Open breakdown** to see all of the details in the task from the assigned manager's perspective and make a change.
- Filters can be applied to these screens using the tab dropdown options to refine your view. You can also use the radio buttons to display Over or Under budget items.

4.7.3. Finalise Review

Once you've completed your review and made any necessary adjustments. You can then click **Start communication** to close the review stage. You will be asked to confirm you want to proceed with *Finish review and start communication* click **Start communication** to open the **Communication** stage.

4.8. Communicate Compensation Decisions

The Communication stage allows you to finalise your compensation cycle by sharing decisions with employees and integrating data back into PeopleXD. This stage includes downloading personalised pay letters for employees and exporting compensation data for upload to your PeopleXD system.

To wrap up your compensation cycle and communicate to employees:

1. Navigate to the **Communication** tab of your compensation cycle.
2. Click **Wrap up cycle**.

☐	Account Management Services - Catrin Price	C Catrin Price	0/15	Export pay letters to PDF
☐	Bid Team - Louise Barton	L Louise Barton	0/100	...

4.8.1. Download Pay Letters

The *Pay letters* screen gives you access to monitor which pay letters have been downloaded to ensure timely communication. Managers and supporting users, if configured, will receive automatic email notifications that pay letters are ready to download. If managers are not configured to download pay letters this can be completed by administrators from this screen.

You can download pay letters in two ways:

- **Select** the relevant team task(s) and click **Export pay letters to DOCX** or **Export pay letters to PDF**. Beneficial as pay letters can be downloaded in bulk.
- Expand a team task's 3-dot menu and click **Export pay letters to DOCX** or **Export pay letters to PDF**.

You can also access team tasks to view compensation breakdowns, justifications & employee details by using the option within the 3-dot menu to **View task**.

4.8.2. Export Data for PeopleXD

Exporting your compensation changes is a key part of the compensation cycle. The *Export* screen allows you to export all tables available to your computer for example, the salary change and bonus files. The export generates files that conform to the known format of PeopleXD and will contain all compensation changes. You can return at any time and perform a new export.

Cycles > 2026 Pay Review - TEST CYCLE • Communication On track Close cycle →

Essentials △ Cycle data Eligibility Budget Timeline Pay philosophy Assignments Allocation Review **Communication**

✉ Pay letters
📄 Export

Data export

You have configured **PeopleXD** as your target HRIS system. The export generates files that conform to the known format of PeopleXD. You can easily import them manually to your HRIS.

Convert values to GBP ☒

- 1 Export base pay data**
Employees' updated base pay and pay effective dates. 📄 Export data
- 2 Export notes**
Notes for compensation decisions that deviated from the pay philosophy. 📄 Export data
- 3 Export pay bands**
The pay band data includes data that was entered to create pay bands during the cycle. 📄 Export data

How to export to the company's HRIS system?

Be sure to export all tables that are available in this screen.

Click the [Export] button to export the data to a spreadsheet and start an automatic download to your computer. From there, you can manually import the spreadsheets into your company's HRIS system.

You can return at any time and perform a new export.

To export compensation data:

1. Click **Export data**, for **all** available files.
2. **Review** this file before loading as elements such as reason codes will need to be updated. See section [Base Pay Export](#) for further details.

4.8.3. Import Data to PeopleXD

Once your compensation files are exported and reviewed, they can easily be imported to PeopleXD.

For your **Salary Data Import** we would recommend the **Employee Bulk Updates** method.

- Access through the **Bulk Updates Templates** widget in PeopleXD
- Available from the **People Management dashboard**
- Allows efficient upload of salary changes for multiple employees

See our [Employee Bulk Updates](#) guide for further assistance.

For your **Bonus Data Import** we would recommend the **External Timesheet Take-on** method.

- Available from the **Payroll dashboard** in PeopleXD
- Designed to handle bonus and additional payment data

See our [External Timesheet Take-on](#) guide for further assistance.

4.8.4. Creating a notification via iCue's

You can utilise iCue's within PeopleXD to send automated notifications directly to employees once pay rises have been imported into PeopleXD.

To do this follow the steps below:

1. Create the Insight Report

- Navigate to the iCue's section within Insight.
- Build an insight report using either:
 - Your salary reason codes that identify the pay increase
 - The effective date when the increase takes effect

2. Configure the iCue

- Set up filters to capture only employees who received pay rises on your target date
- Include relevant employee details in the report (name, address, new salary amount, etc.)
- These fields can be inserted into the body of the notification email

3. Schedule and Run

- Set the Lcue to run once on your chosen date
- The system will automatically send notifications to eligible employees

4. Disable After Use

- **Important:** Disable the Lcue immediately after it has run
- This prevents duplicate notifications being sent to employees with historical pay changes on the same date

Example Use Case - If implementing pay rises effective 1st July 2025, set your Lcue filter for that specific date and run it once the increases have been processed in PeopleXD.

For detailed guidance on creating and managing Lcue's, please refer to our [PeopleXD Insight User Guide Library](#).

4.8.5. Close Cycle

Once the cycle is finished and you have downloaded all the necessary documents, click **Close cycle**.

 **Note:** You can return to the Communication stage at any time after the cycle is closed to perform a new export or download pay letters.

5. Administration

The Administration tab allows you to manage your cycles in Pay Planner.

The **Manage cycles** screen provides essential controls for cycle administration, including ownership transfer, closure, and deletion. For example, you may need to reassign cycle ownership when team responsibilities change, or handovers are required.

Title	Stage	Status	Owner	Created on
Dublin Bus - Salary modellin...	Allocation	On track	jane.taylor@sb13.c...	09/23/2025
Test - TEST CYCLE	Review	On track	jane.taylor@sb14.c...	09/19/2025
2026 Pay Review - TEST CYCLE	Communication	On track	jane.taylor@sb14.c...	09/15/2025
Pay 2026	Closed	Closed	jane.taylor@sb14.c...	09/12/2025
Test cycle Sept 25	Setup	Overdue	jane.taylor@sb14.c...	09/11/2025
Dec 2025 Bonus Review - TE...	Setup	Overdue	jane.taylor@sb14.c...	09/10/2025

Note: New owner must have Pay Planner Admin Users permissions.

To Transfer Cycle Ownership:

1. Navigate to the **Manage cycles** screen.
2. Expand the 3-dot menu for the cycle that requires ownership transfer.
3. Click **Transfer ownership**.
4. Select the new owner from the available administrators.
5. The cycle ownership has been transferred.

6. Appendix

This section details additional information relating to Eligibility Rules and Pay Letter Variables available in Pay Planner.

6.1. Eligibility Rules

The table below details the most useful Eligibility Criteria and a brief description:

Eligibility Criteria	Description
Analysis Interval Start Date for Change	The start date for intervals within the period other than conceptions.
Analysis Interval Start Date for Conception	The start date for conceptions in the interval within the period.
Birth Date	The employee's date of birth.
Exited In	Whether the employee has an exit record within the specified time window. For this filter to work, the time window must occur after the selected time period of your visual.
In Period Exit Date	The employee's exit date.
In Period Start Date	The employee's start date.
Last Manager Changed Date	The date on which the employee started reporting to their current manager.
Most Recent Start Date	Most Recent Start Date.
Original Hire Date	The date that the employee was first hired by the organisation
Start Date	The date in which the employee joined the organisation
Tenure Start Date	The date that the employee began working at the organisation. This date is used to calculate the tenure of the employee
Career Level	The level of accountability and seniority within the organisation
Category	Category field held on the employee's contract record
Company	Company field held on the employee's contract record. This is a level of the hierarchy.
Cost Centre	Cost Centre field held on the employee's contract record.

Eligibility Criteria	Description
Department	Department field held on the employee's contract record.
Division	Division field held on the employee's contract record.
Bonus Plan	Bonus plan for the employee.
Employee Sub Status	Employee Sub Status field held on the employee's contract record.
Employee Status	The employment status of the employee (e.g. Active, Terminated).
Employment Type	Employee Status field held on the employee's contract record.
Ethnicity	Ethnic Origin field held on the employee's diversity record.
Gender	The gender that the employee identifies with (i.e. male, female, unknown).
Gender Identity	Gender Identity field held on the employee's diversity record.
Job Category	Job Category field held on the employee's contract record.
Job Family	The post title that the employee's contract relates to.
Job Family Description	The post title that the employee's contract relates to.
Job Name	The name of the job based on the functions performed. Job Title held on the employee's contract record.
LGBTQ2+ Identity	The groups within the LGBTQ2+ community that the employee identifies with. Sexual Orientation field in Diversity.
Management Unit	Management Unit field held on the employee's contract record.
Manager Status	Whether the employee is a manager or not.
Nationality	Employee's nationality on HR record.
Organisation	The hierarchy based on your organisations structure. This allows you select any individual level of your hierarchy.
Pay Group	Employee's pay group on their HR record.
Standard Ethnicity	The standard list of ethnicities per country.
Sub Category	Sub Category field held on the employee's contract record.
Supervisory Hierarchy	The supervisory hierarchy based on your organisations structure. This allows you select any individual supervisory level of your hierarchy.
User Field 1 to 4	User Field 1 to 4, fields held on the employee's contract record. Note: this may be relabelled for your organisation.

Eligibility Criteria	Description
Location	Location field held on the employee's contract record
Generation	The generation that the employee belongs to. The default categories are sourced from Pew Research Centre.
Annual Variable Pay Change Range	The percentage change in the value of an employee's annual variable pay based on full-time employment.
Annual Base Pay Change Range	The percentage change in the value of an employee's annual base pay based on full-time employment.
Time in Current Career Level Range	The range of years that an employee has been at their current career level.
Actual Base Pay Range	The range of actual total amount of base pay the employee received
Position in Range	Position in the range is an employee's compensation position relative to the minimum point in the pay range.
Annual Direct Compensation Range	The annual direct compensation for an employee based on full-time employment.
Annual Base Pay Range	The annual base pay for an employee based on full-time employment.
Annual Variable Pay Range	The annual variable pay for employees based on full-time employment.
Tenure Range	The number of years that the employee has worked at the organisation.
Time in Role Range	The range of years that the employee has had their current job name.
Budgeted Base Pay Range	The base pay budgeted for an employee that takes into account their expected work hours (FTE factor).
Annual Direct Compensation Change Range	The percentage change in the value of the employee's annual direct compensation based on full-time employment.
Absence to Worked Hours Ratio Range	The amount of absence hours as a percentage of regular worked hours expressed as a range.

Eligibility Criteria	Description
Budgeted Direct Compensation Range	The annual direct compensation budgeted for an employee that takes into account their expected work hours (FTE factor).
Time Since Last Bonus Range	The range of months that has passed since the employee received a bonus.
Actual Bonus Pay Ratio Range	The range of the employee's actual bonus amount relative to their base pay.
Compa Ratio Range	A ratio representing how close an employee's pay is to their pay level midpoint. A ratio of 100 percent means the employee is paid the same as their pay level midpoint.
Annual Worked Hours Range	The range of hours worked by the analysis population during a full year.

6.2. Pay Letter Variables

The table below details the pay letter variables available and a brief description:

Pay Letter Variable	Description
EmployeeFullName	Full name of the employee
EmployeeRole	Employee's role when the cycle started
EmployeeTenure	Tenure of the employee, in months
EmployeeTotalPayAdjustment	Employee's pay adjustment for this cycle as a percentage of their current base pay
EmployeeTotalPayAdjustmentAmount	Employee's pay adjustment for this cycle as a currency amount
EmployeeBasePayAdjustment	Employee's pay adjustment due to merit and across-the-board increases for this cycle as a percentage of their current base pay
EmployeeBasePayAdjustmentAmount	Employee's pay adjustment due to merit and across-the-board increases for this cycle as a currency amount of their current base pay
EmployeeId	Personnel ID for the employee
EmployeeCareerLevel	Employee's career level when the cycle started

Pay Letter Variable	Description
IsEmployeePromoted	Conditional variable that is true if the employee is being promoted this cycle
EmployeeEmail	Email address of the employee
EmployeePerformance	Performance rating for the employee
EmployeeCurrentPositionInRange	compaRatioDescription: Employee's compa-ratio value at the start of the cycle, positionInRangeDescription: Employee's position in range value at the start of the cycle
EmployeePayRangeMinimum	The minimum value of the employee's pay range at the start of the cycle
EmployeePayRangeMaximum	The maximum value of the employee's pay range at the start of the cycle
EmployeeAdjustedPositionInRange	compaRatioDescription: Employee's compa-ratio value for their adjusted salary at the end of the cycle, positionInRangeDescription: Employee's position in range value for their adjusted salary at the end of the cycle
EmployeeBonusAmount	Bonus amount that the employee will be rewarded with at the end of this cycle
EmployeeTimeInRole	The amount of months for which the employee has held their current role, as of the start of the cycle
EmployeeCity	Employee's current city location
EmployeeCurrentCompensation	Employee's compensation at the start of the cycle
EmployeePotential	Measure of potential for the employee as of the start of the cycle
EmployeeTotalAdjustedCompensation	Employee's adjusted compensation at the end of the cycle
EmployeeBonusTargetAmount	Employee's bonus target for this cycle
EmployeeStartDate	Start date of the employee

Pay Letter Variable	Description
EmployeeCurrencyCode	Local currency code used for the employee's base pay and bonus
EmployeeBasePayCurrencyCode	Local currency code used for the employee's base pay
EmployeeBonusCurrencyCode	Local currency code used for the employee's base bonus
CycleName	Name of the cycle
CycleDescription	Description of the cycle
CycleEffectiveDate	Pay effective date for an employee's base pay
HasBonusAdjustment	Conditional variable that evaluates when an employee is allocated a bonus
HasBasePayAdjustment	Conditional variable that evaluates when an employee has base pay adjustments
EmployeeDirectManagerFullName	Full name of the employee's direct manager
EmployeeDirectManagerEmail	Email address of the employee's direct manager
EmployeeBonusTarget	The current percentage of an employee's base salary that they're eligible to receive as bonus compensation as part of their on-target earnings
EmployeeAdjustedBonusTarget	The updated percentage of an employee's base salary that they're eligible to receive as bonus compensation as part of their on-target earnings
EmployeeOnTargetEarnings	The sum amount of base pay and bonus an employee is eligible to receive if they achieve 100% of their earnings' potential
EmployeeAdjustedOnTargetEarnings	The sum amount of base pay and bonus an employee is eligible to receive if they achieve 100% of their earnings' potential, based on how a manager has updated their base pay and/or bonus target
HasBonusTargetAdjustment	Conditional variable that evaluates whether an employee's bonus target has been adjusted

Pay Letter Variable	Description
BonusEffectiveDate	Pay effective date for an employee's bonus
HasOnTargetEarningsAdjustment	Conditional variable that evaluates whether an employee's total on-target earnings have been adjusted
BonusModifierPercent	Individual modifier used to calculate an employee's bonus for this cycle
BonusCompanyPerformancePercent	Company performance target achieved that's used to calculate bonuses in a cycle
EmployeePreferredName	The chosen or preferred name of the employee
EmployeeIsHourly	An employee who's paid an hourly wage
EmployeeIsSalaried	An employee who's paid an annual salary
BonusAsPercentOfSalary	Bonus amount that the employee will be rewarded with at the end of this cycle, represented as a percentage of their adjusted base pay
EmployeeAdjustedBonusTargetAmount	Employee's updated bonus target for the next pay cycle
EmployeeTargetCompensation	The sum amount of base pay and bonus an employee is eligible to receive if they achieve 100% of their earnings' potential
EmployeeAdjustedTargetCompensation	The sum amount of base pay and bonus an employee is eligible to receive if they achieve 100% of their earnings' potential, based on how a manager has updated their base pay and/or bonus target

6.3. Base Pay Export

Whilst most fields populate automatically (personnel numbers, contract IDs, dates), the **Salary Reason Code** field requires a pre-configured code that matches your PeopleXD system's reference data. Without this, your PeopleXD upload will fail.

- **This is the only manual step needed** - everything else is handled by default values, making the process straightforward once this initial setup is complete.

Field	Description & Defaulting Value	Action required
Personnel No	The employee's personnel number. • Populated by default with employee's personnel number	
Contract ID	The employee's contract/appointment id. • Populated by default with employee's substantive appointment	
Date Effective	Salary date effective date in YYYYMMDD format. • Populated by default with the Pay effective date populated in the cycle under Essentials - > Details -> Pay effective dates	
Salary Type	Should be PR i.e. Personal Rate for all. • Populated by default as PR for all records	
Position Code	• Blank as Pay Planner does not support employees on a Pay Scale and Point	
Position Point	Should be 9999 i.e. solution expects this if Salary Type is PR. • Populated by default as 9999 for all records	
Pay Multiplier	The multiplier value to apply to the Salary Rate. Between 0 and 1. • Populated by default as the FTE	
Salary Value	The actual value of the employee's salary. • Populated by default with new salary value.	
Salary Rate Type	Should be A for annual. • Populated by default as A.	
Salary Reason Code	Populate with the reason code for the Salary Amendment. Only Reason Codes marked as 'Salary' Reasons will be accepted.	Create the new salary reason code and / or update this field with the reason code

Field	Description & Defaulting Value	Action required
	Reference data for this field is available to update under People Management -> Reference -> Reason Codes	
Salary Comments	Comments for the Salary Amendment. Populated by default with the Cycle name populated in the cycle under Essentials -> Details -> Cycle details	

6.4. Bonus Export

Whilst most fields populate automatically (personnel numbers, dates), the **Bonus Pay Code** field requires a pre-configured code that matches your PeopleXD system's reference data. Without this, your PeopleXD upload will fail.

- This is the only manual step needed** - everything else is handled by default values, making the process straightforward once this initial setup is complete.

Field	Description & Defaulting Value	Action required
Pay Group	Populated by default with employee's PeopleXD pay group	
Employee Number	The employee's personnel number. Populated by default with employee's personnel number	
Transaction Date	Bonus date effective date in YYYYMMDD format. Populated by default with the Bonus effective date populated in the cycle under Essentials>Details>Bonus effective dates	
Pay Code	Will default to blank in the export.	Update with the bonus pay code.
Hours/Days/Value	Will default to bonus amount	
Cost Centre	Will default to blank in the export.	

Field	Description & Defaulting Value	Action required
Position	Will default to blank in the export.	
Point	Will default to blank in the export.	
Holiday Periods	Will default to blank in the export.	
Status	Will default to blank in the export.	
Project	Will default to blank in the export.	
Expense	Will default to blank in the export.	
Sub-Category	Will default to blank in the export.	
Appointment ID	Will default to blank in the export.	
Hourly Rate of Pay	Will default to blank in the export.
