1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on the available XD Pensions functions in Insight reports.

 **Note:** This guide is for reference purposes; information on how to use functions and build reports is not included.

1.2. XD Functions Overview

XD functions are standard functions built into Insight. They perform operations using the provided parameters based on XD data fields (e.g. get email address, active pension scheme appointment data etc.). XD functions enable you to define logical columns returning the data without needing knowledge of the underlying data or internal logic.

 **Note:** To avoid complexity and improve performance, it is recommended to get data directly from data views where possible. Before using functions, check to see if the desired information can be returned through the standard views and columns.

XD Functions are used in the following scenarios:

1. Abstract some of the logic for complex operations and data retrieval.
2. Getting data that may not be accessible from the views in your report (for example, employee name or email address).

 **Note:**

- A function isn't capable of retrieving more than one information; that means if you have two different data matching the parameters, the result will be either null or one of them.
- You will need data access to be granted for the function to return a result, for example Expense functions would only return results for the pay groups you have

1.3. List of XD functions not covered

The following functions are not covered in this document:

- PEBI_GET_PPO_STATUS_IND
- PEBI_GET_USER_CODE

Functions for Personnel are covered in [XD Personnel Functions – Reference Guide](#).

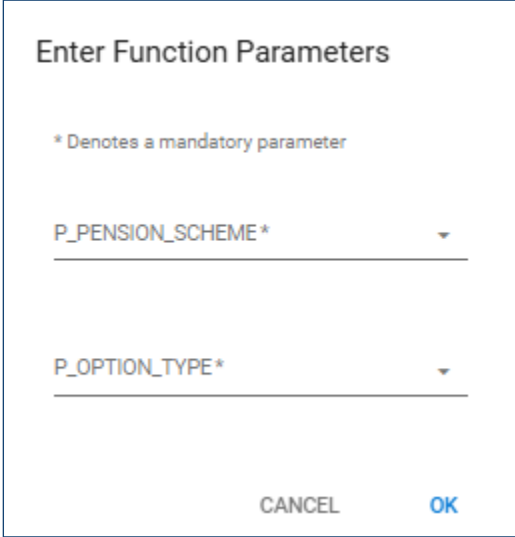

Functions for Payroll are covered in [XD Payroll Functions – Reference Guide](#).

Functions for Expense are covered in [XD Expense Functions – Reference Guide](#).

2. Pension

2.1.1. PEBI_DISP_PENSIONER_OPTIONS

This function will return the description of the item Option Type for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_PENSION_SCHEME*

P_OPTION_TYPE*

CANCEL OK

P_PENSION_SCHEME ← Pension Scheme you are looking at,

P_OPTION_TYPE ← Option Type you want to retrieve the description for,

Example: for the option type EARLYI, you will retrieve the description Incentivised Early Retirement (that's the description for a testing environment I am using).

2.2. Employee Benefit Details

2.2.1. PEBI_GET_GROSS_BENEFIT

This function will return the item Benefit Value from the view Employee Benefits Details from Pension for the parameters entered as such:

PeopleXD Insight: XD Pension Functions - Reference Guide

Enter Function Parameters

P_EMPNO*

P_PENSION_SCHEME*

P_CALC_DATE*

P_EMPLOYEE_STATUS*

P_BENEFIT_TYPE*

CANCEL

OK

P_EMPNO ← Person Reference you are looking at,

P_PENSION_SCHEME ← Pension Scheme you are looking at,

P_CALC_DATE ← Calculated Date you are looking at,

P_EMPLOYEE_STATUS ← Employee Status you are looking at, A for Active, D for Dormant,

P_BENEFIT_TYPE ← Benefit Type you are looking at,

Benefit types can be seen here:

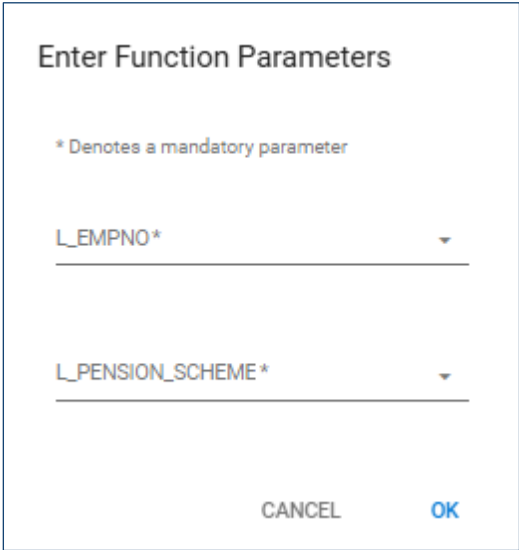

Benefit Types Setup						
Pension Scheme		1000 New Public Sector Pension *2013*				
Benefit Type	Description	----- Activate -----		Heading Code	Commutation Code	Calculation Priority
		View	Setup			
NORMPEN	Pension	☒	☒	A1	A1	1
NORMLS	(Lump Sum)	☒	☒	A2	A2	2
NORMPENCO	Commutated Pension	☐	☐	A3		3
ACCRPEN	Referable Amount (Pension)	☒	☒	B1	B1	4
ACCRLS	Referable Amount (Lump Sum)	☒	☒	B2	B2	5
ACCRPENCN	CNER Pension	☒	☒	B3		6
ACCRLSN	CNER Lump Sum	☒	☒	B4		7
ACCRPENCO	Commutated Pension	☐	☐	B5		8
ACCRPENIM	Pension (Accrued Immediate)	☐	☐	B6	B6	9
ACCRLSIM	Lump Sum (Accrued Immediate)	☐	☐	B7	B7	10
ACCRPENIMCO	Commutated Pension	☐	☐	B8		11
ACCRSPDAR	Pension at Calculation Date	☐	☐	C1		12
NORMSPDAR	Pension at Date of Retirement	☐	☐	C2		13
ILLHSPDAR	III Health Benefits at Calculation Date	☐	☐	C3		20
ILLHPEN	Pension	☐	☐	D1	D1	14

If the Benefit type in parameter is CPDAR then the value for the Benefit Type NORMSPDAR (Pension at Date of Retirement) will be divided by 3, all other cases, the Benefit Value for the Benefit Type entered in parameter will be retrieved.

2.3. Employee Pension Details

2.3.1. PEBI_FIRST_JOINED

This function will return the earliest date of joining from the view Employee Pension Details from Pension for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

L_EMPNO*

L_PENSION_SCHEME*

CANCEL OK

L_EMPNO ← Person Reference you are looking at,

L_PENSION_SCHEME ← Pension Scheme you are looking at,

2.3.2. PEBI_LATEST_END_DATE

This function will return the item Pension End Date from the view Employee Pension Details from Pension for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

L_EMPNO*

L_PENSION_SCHEME*

CANCEL OK

L_EMPNO ← Person Reference you are looking at,

L_PENSION_SCHEME ← Pension Scheme Code you are looking at,

The function will give you the latest Pension End Date for the parameters above (for the latest date of joining the scheme).

2.4. Old Age Pension Rules

2.4.1. PEBI GET PPO STATUS IND

This function will return the item Pension Deduction from the Reference Old Age Pension Rates from Pension for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_PERIOD_START_DATE*

P_PAY_FREQUENCY*

CANCEL OK

P_PERIOD_START_DATE ← Date utilized to align the data,

P_PAY_FREQUENCY ← Pay Frequency you are looking at, M for Monthly, W for Weekly,

For the latest Date Effective greater than or equal to P_PERIOD_START_DATE in parameter, the function will retrieve the value Pension Ded Month if the pay frequency is M, Pension Ded if the pay frequency is W.

2.5. Pen Pension Person Merge

2.5.1. PEBI GET NORM RETIRE DATE

This function will return the item Retirement Date from the view Pen Pension Person Merge from Pension for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_EMPNO*

P_SCHEME*

CANCEL OK

P_EMPNO ← Person Reference you are looking at,

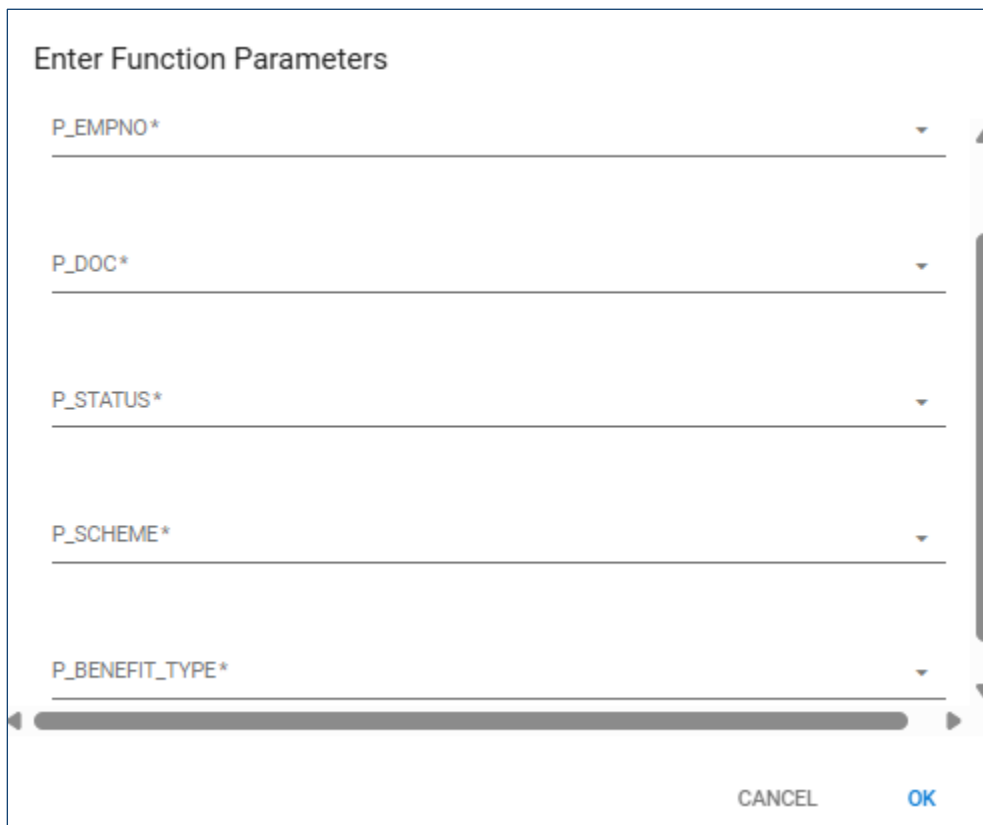

P_SCHEME ← Pension Scheme you are looking at,

For the latest Calculation Date, the function will retrieve the Retirement Date.

2.6. Person Benefits Details

2.6.1. PEBI GROSS VAL FAMILY LAW

This function will return the item Benefit Value from the view Person Benefits Details from Pension for the parameters entered as such:

Enter Function Parameters

P_EMPNO*

P_DOC*

P_STATUS*

P_SCHEME*

P_BENEFIT_TYPE*

CANCEL OK

P_EMPNO ← Person Reference you are looking at,

P_DOC ← Calculation Date you want to use to align the data,

P_STATUS ← Employee Status you are looking at,

P_SCHEME ← Pension Scheme Code you are looking at,

P_BENEFIT_TYPE ← Benefit Type Code you are looking at,

The function will give you the sum of Benefit Values for the parameters above.

2.7. Person Benefits Summary

2.7.1. PEBI_GET_ACTUAL_PEN_SERVICE

This function will return the item Actual Pensionable Service from the view Person Benefits Summary from Pension for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_EMPNO*

P_PENSION_SCHEME*

P_CALC_DATE*

P_EMPLOYEE_STATUS*

CANCEL OK

P_EMPNO ← Person Reference you are looking at,

P_PENSION_SCHEME ← Pension Scheme you are looking at,

P_CALC_DATE ← Calculated Date you are looking at,

P_EMPLOYEE_STATUS ← Employee Status you are looking at, A for Active, D for Dormant.

2.7.2. PEBI_GET_PPP_PEN_END_DATE

This function will return the item Pension End Date from the view Person Benefits Summary from Pension for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_EMPNO*

P_SCHEME*

P_DATE*

CANCEL OK

P_EMPNO ← Person Reference you are looking at,

P_SCHEME ← Pension Scheme you are looking at,

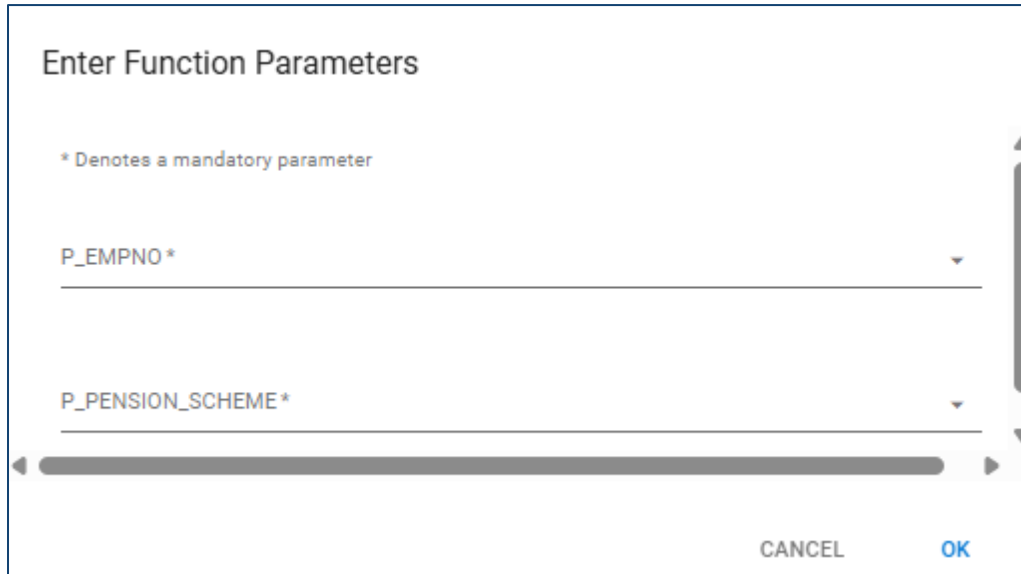

P_DATE ← Has to be not null, won't have an impact on the result,

For the latest Service Sal Calc Date for the parameters above, the function will retrieve the Pension End Date.

2.8. Person Pension Option

2.8.1. PEBI GET MAX PPO STATUS

This function will return the item Pension Option (Pension Status) from the view Person Pension Option from Pension for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_EMPNO*

P_PENSION_SCHEME*

CANCEL OK

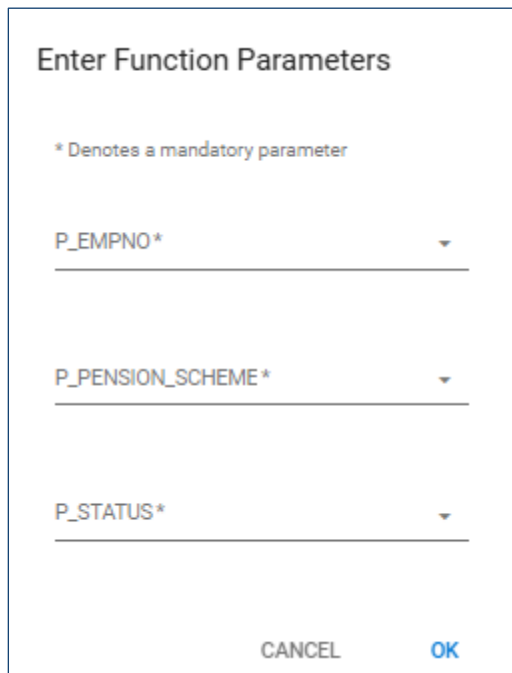

P_EMPNO ← Person Reference you are looking at,

P_PENSION_SCHEME ← Pension Scheme you are looking at,

For the latest Service Sal Calc Date (Item Retirement Date in the view) the function will retrieve the Pension Status.

2.8.2. PEBI GET PPO STATUS IND

This function will return the item Pension Option (Pension Status) from the view Person Pension Option from Pension for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_EMPNO*

P_PENSION_SCHEME*

P_STATUS*

CANCEL OK

P_EMPNO ← Person Reference you are looking at,

P_PENSION_SCHEME ← Pension Scheme you are looking at,

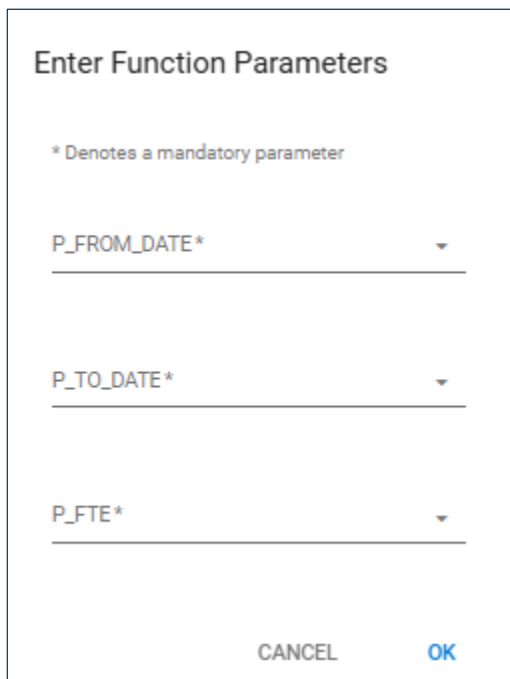

P_STATUS ← Pension Option (Pension Status) you are looking at,

If the Pension Option is not null then it will be retrieved, else you will get the text: No Instance.

2.9. Person Scheme Details

2.9.1. PEBI DATE CALCULATOR

This function will return information depending on items from the view Person Scheme Details from Pension for the parameters entered as such:

The screenshot shows a dialog box titled "Enter Function Parameters". Inside, there is a note: "* Denotes a mandatory parameter". Below this, there are three input fields, each with a dropdown arrow and an asterisk: "P_FROM_DATE*", "P_TO_DATE*", and "P_FTE*". At the bottom of the dialog, there are two buttons: "CANCEL" and "OK".

P_FROM_DATE ← Date utilized as a starting point in time,

P_TO_DATE ← Date utilized as an ending point in time,

P_FTE ← FTE utilized,

The result will be:

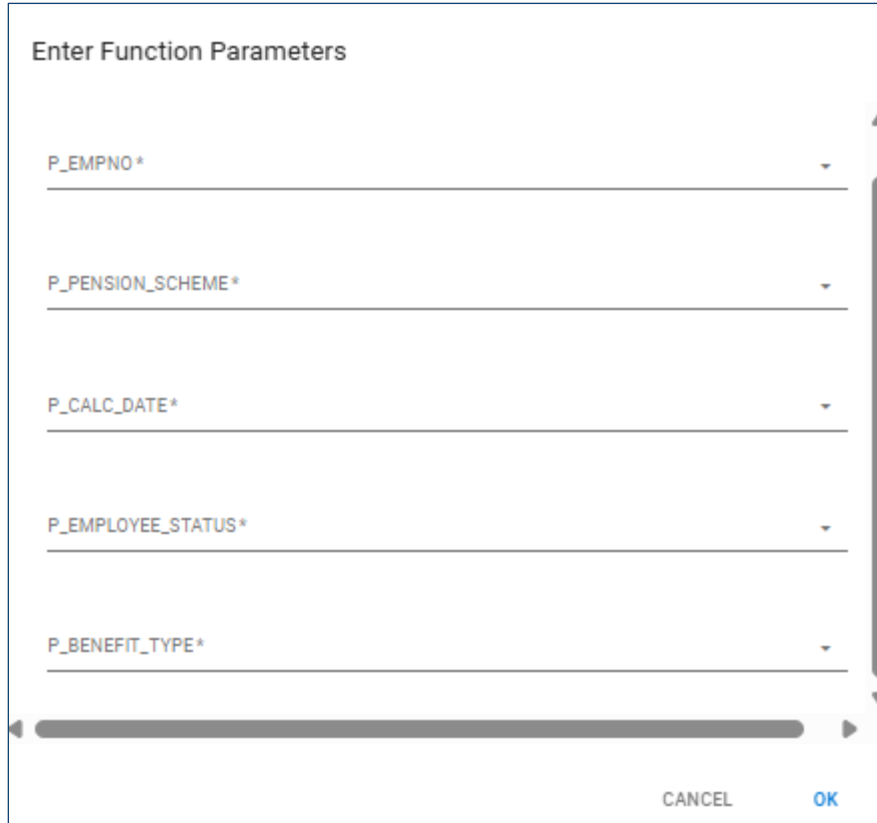

(Total Days between P_FROM_DATE and P_TO_DATE / (Item Pension Days In Year for each year comprised in parameters)) this being rounded to 4 decimals and being the absolute value.

The result will then be multiplied by P_FTE in parameters.

2.10. Person Service Details

2.10.1. PEBI ACTUAL PENSIONABLE SERV

This function will return the item Actual Pensionable Service from the view Person Service Details from Pension for the parameters entered as such:

Enter Function Parameters

P_EMPNO *

P_PENSION_SCHEME *

P_CALC_DATE *

P_EMPLOYEE_STATUS *

P_BENEFIT_TYPE *

CANCEL OK

P_EMPNO ← Person Reference you are looking at,

P_PENSION_SCHEME ← Pension Scheme you are looking at,

P_CALC_DATE ← Calculated Date you are looking at,

P_EMPLOYEE_STATUS ← Employee Status you are looking at,

P_BENEFIT_TYPE ← Benefit Type you are looking at.

2.11. References

2.11.1. PEBI GET REFERENCE DESCRIPTION

This function will return the item Description from the Reference Data from Pension for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_PENSION_SCHEME* ▼

P_REFERENCE_CODE* ▼

P_REFERENCE_TYPE* ▼

CANCEL OK

P_PENSION_SCHEME ← Pension Scheme you are looking at,

P_REFERENCE_CODE ← Reference Code you are looking at,

P_REFERENCE_TYPE ← Reference Type you are looking at,

Example below with scheme 5001, type PENACT, for the list of codes you will get the description accordingly:

PENSION_SCHEME	REF_TYPE	REF_CODE	REF_DESC
5001	PENACT	10	Actuarial Reduction Ns Pension 60
5001	PENACT	20	Actuarial Reduction Ns Lump Sum 60
5001	PENACT	30	Actuarial Reduction Ns Pension 65
5001	PENACT	40	Actuarial Reduction Ns Lump Sum 65
5001	PENACT	50	Cner On Pension Preserved Age Of 60
5001	PENACT	60	Cner On Lump Sum Preserved Age 60
5001	PENACT	100	Max Service Purchasable
5001	PENACT	101	Periodic Age 65 Gross
5001	PENACT	102	Periodic Age 65 Net
5001	PENACT	103	Lump Sum Age 65 Gross
5001	PENACT	105	Periodic Age 60 Net
5001	PENACT	106	Lump Sum Age 60 Gross
5001	PENACT	108	Periodic Age 60 Gross

2.11.2. PEBI GET REFERENCE TEXT

This function will return the item Description from the Reference Data from Pension for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_PENSION_SCHEME *

P_REFERENCE_TYPE *

CANCEL OK

P_PENSION_SCHEME ← Pension Scheme you are looking at,

P_REFERENCE_TYPE ← Reference Code/type you are looking at,

Example below with scheme 1000, code/type PENACT, the function will retrieve the description Actuarial Rates. The difference between that function and the one prior is that here we are looking at the description of the type PENACT not the descriptions of the codes attached to the type PENACT.

REFERENCE_CODE	REFERENCE_1	PENSION_SCHEME
PENACT	Actuarial Rates	1000

2.11.3. PEBI GET SALARY TYPE DESC

This function will return the item Salary Type Description from the Reference Data from Pension for the parameters entered as such:

Enter Function Parameters

* Denotes a mandatory parameter

P_PENSION_SCHEME*

P_SALARY_TYPE*

CANCEL OK

P_PENSION_SCHEME ← Pension Scheme you are looking at,

P_SALARY_TYPE ← Salary Type you are looking at,

The function will retrieve the description from the screen below:
