1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to use the PeopleXD Evo features. PeopleXD Evo incorporates AI features and functionality through Access button.

This includes:

- Access Button
- Copilot
- Feed
- User Access

1.2. Video Content

There are videos available to accompany this user guide:

- [Watch Introducing PeopleXD Evo](#) to learn about the features and benefits included in Evo.

1.3. Mobile App

Employees can also access Access Evo and PeopleXD using the mobile apps. For further details see the following articles:

- [PeopleXD Evo Mobile Apps](#)
- [Access Evo mobile](#)
- [PeopleXD Native App user guide](#)

2. Access Button

2.1. Overview

Access button is your one place for everything you need from Access, including your PeopleXD dashboards as well as your other Access products.

The table below outlines each area of Access Button:

Number	Area	Description
1	Products	Products is where you can find your PeopleXD dashboards, alongside any other Access Evo products.
2	Spaces	Spaces is where you can find your company's shared dashboards and your personal dashboards. Note: This is not applicable if you are using PeopleXD outside of Access Evo (previously called Access Workspace).

Number	Area	Description
3	Copilot	Copilot is a confidential personal assistant that leverages AI.
4	Feed	The Feed helps you keep track of tasks in PeopleXD.

2.2. Navigating PeopleXD Dashboards

To access your PeopleXD dashboards, click **Access button**. Then, from the Products section click the relevant icon to open it.

- Quick Jump is still available for navigation to specific tabs and widgets across all available dashboards.
- The dashboards available to users in Access Button is based on their security menu profile access.

 **Note:** Only dashboards currently available within the PeopleXD dashboard menu will be available in the Button. For example, Security is only available from the Quick Jump.

How PeopleXD opens will depend on you Evo solution.

2.2.1. PeopleXD in an Access Evo tab

When you are using PeopleXD in an Access Evo (previously called Access Workspace) tab:

- Click a PeopleXD dashboard to open it in a new tab.
- When you select a dashboard that is already open in an Access Evo tab, the existing tab will open, rather than launching a new tab.
- You can have multiple PeopleXD tabs open, expand the 3-dot menu and click duplicate to do this. Or open a different dashboard from the Button.

2.2.2. PeopleXD outside of Access Evo

When you are using PeopleXD outside of Access Evo:

- Click a PeopleXD dashboard to open it in the same browser tab.
- You can have multiple PeopleXD tabs open, duplicate a browser tab to do this. Or right click a dashboard from the Button and select open in a new tab.
- When you select a product that isn't PeopleXD this will open in a new browser tab.

3. Copilot

3.1. Overview

Copilot acts as a confidential personal assistant which sits within Access Button, providing answers to day-to-day queries using open AI, as well as retrieving data from your Access products using skills.

The PeopleXD Copilot Skill contains the following plugins:

- HR Documents - allows users to query certain types of documents uploaded to PeopleXD
- XD Assistant - allows users to query certain information against their own record on XD such as balance and payslip information

This enables all users, whether an employee, manager, or administrator, to access vital information quickly.

3.2. How to Use Copilot

3.2.1. Ask a question

To get answers to day-to-day questions, click Access Button, then click Copilot and enter your question. Alternatively, to get answers to questions about PeopleXD data, click PeopleXD Skills and enter your question.

Note: Users are limited to 4000 character limit per message, and 10 messages per conversation. They can start a new conversation after reaching this limit.

The table below outlines the additional functionality available in Copilot:

Number	Item	Description
1	Topic History	Click to view all saved conversations from the past 30 days. To delete a conversation, expand the three-dot menu and click Delete .
2	New Topic	Click to start a new conversation. The messages in your current conversation will be saved to your Topic History.
3	Evo Skills	Select a skill to ask specific questions using the product plugins. For example click PeopleXD Skills to ask questions relating to your PeopleXD documents and data.
4	Pick Skill Menu	Expand the Pick Skill menu to select a skill or change the skill mid conversation.

3.2.2. Example Questions

Plugin	Area	Question
XD Assistant	Profile	Who is on my team?
		What address is against my record on XD
		What bank account is my salary paid to?
		What is my personal email address on XD?
		Show me a summary of the bio I completed about myself
		Do I have onboarding left to complete?
	Leave	What's my annual leave balance?
		How many days did I carry forward this year?
		How many days annual leave have I taken this year?
		How many holiday hours have I accrued?
	Pay	Show me my payslip from May 2024
		Give me a summary of my latest payslip.
		What was the difference between my net pay in April 2024 and May 2024
HR Documents	Documents	Can I buy extra holiday and how would I arrange it?
		How many times can I be off sick?
		When does my holiday balance refresh?
		I've just got married; how do I change my name?
		What is my notice period?
		What is our maternity policy?
Co-Pilot Core	Co-Pilot Core	I need to make a redundancy, what are the key things that I should consider?
		How can I measure employee turnover to ensure that we are improving our retention rates?
		How do I lead a workshop to prioritize our skills strategy?
		How can I build a leadership program that focuses on human-centered leadership?
		What are the top best practices for pay equality?

3.3. HR Documents Plugin

HR documents is a plugin within the PeopleXD Copilot Skill, this allows you to query policy, process, or information documents that have been uploaded to PeopleXD. There are two categories of document that can be uploaded for Copilot:

- Policy Documents - documents used in Social Onboarding or that you want to restrict access to.
- General Documents - other general documents stored in PeopleXD.

For Copilot to generate answers to your employees' and managers' questions, you need to upload your documents to PeopleXD. The sections below provide guidance on where you can manage documents.

Note:

- The Copilot search currently only accepts .pdf and .docx documents.
- Copilot only surfaces answers relevant to users' permission level.
- Copilot does not surface answers from documents held in other areas of PeopleXD e.g. on an employee profile or in Recruitment.

3.3.1. General Documents

General Documents can be managed from the Document Upload widget. These are assigned the General Document Type (ESSG). For further guidance on how to add this to a dashboard [read the article on knowledge base](#).

To add documents:

1. Navigate to the **Document Upload** widget.
2. Click **Upload** and enter a title.
3. Select the relevant file from your device.
4. Click **OK**.

To delete a document so it is no longer available to search from Copilot:

1. Expand the three-dot menu and select **Delete**.

2. Click **Yes** to confirm the change.

3.3.2. Policy Documents

Policy Documents can be uploaded within the People Management Dashboard using Policy Groups. You can:

- Have as many policy groups as required.
- Upload one or multiple documents to a group.
- Assign or restrict access to a policy group using criteria groups.

For example, you can set up a policy group which contains all UK-related policies and restricts access to UK employees only. This would ensure UK employees would only have access to those documents in Copilot.

Note:

Policy groups can also be created and documents uploaded using the Social Hub configuration widget. However, Copilot access to documents can only be configured in People Management.

Create Policy Groups

To create a policy group and upload documents:

1. Go to the Data Centre widget on the People Management Dashboard.
2. Open **HR Admin Setup Settings**.
3. Search for and click **Policy Documents**.

The screenshot shows the 'Policy Documents' page. At the top, there is a breadcrumb trail: 'People Management > HR Admin Setup Settings > Policy Documents'. Below this is a search bar with a magnifying glass icon and an 'ADD' button. The main content area is a table with the following rows:

Title	
Absence Policies - Company A	⋮
Absence Policies - Company B	⋮
Car Parking Policy 1	⋮
Car Parking Policy 2	⋮

4. Click **Add**.
5. Enter a Title and click **OK**.

The screenshot shows the 'Edit Document' page. At the top, there is a breadcrumb trail: 'People Management > HR Admin Setup Settings > Policy Documents > Edit Document'. Below this is an 'UPLOAD' button. The main content area is a form with the following fields:

Title*
UK Expense Policy

Search

Document Name

Company Expense Policy.pdf

Copilot Upload Status

Uploaded

SAVE

6. Click **Upload**, select the relevant file(s) from your device.
7. Click **OK**.
8. Click **Save**.

Assign Criteria Group

To make a policy group available in Copilot you need to assign a criteria group. This can be used to assign access to all employees or restrict access.

Note:

To make a policy group available to all employees in Copilot create a criteria group with no rules and assign it to the relevant groups.

To do this:

1. Go to the Policy Documents screen.
2. Expand the policy groups **3-dot menu** and click **Criteria Groups**.

3. To create a criteria group, click **Manage Criteria Groups**.
 - a. Click **Add**.
 - b. Enter a name and click **OK**.
 - c. Select the element that will be used to identify the employees from the left hand menu e.g. Location.

- d. Select the required values from the *Available* list and click the **Arrow Icon** to move the item to the *Assigned* list.
- e. Repeat for each criteria needed.
- f. Return to the Manage Criteria Groups screen.

4. Click **Assign New Group**.

A dialog box titled "Assign Criteria Group". It contains a label "Criteria Group *" followed by a drop-down menu. At the bottom, there are two buttons: "CANCEL" and "OK".

Assign Criteria Group

Criteria Group *

CANCEL OK

5. Select a Criteria Group from the drop-down list.
6. Click **OK**.
7. The documents in this policy group will now only return in Copilot to employees who meet the criteria.

Upload Existing Policy Documents

Where you are already using the Policy Documents feature your existing documents can be uploaded to Copilot. This will need to be done manually as existing documents aren't automatically uploaded.

To do this:

1. Go to the Policy Documents screen in People Management.
2. Search for the Policy group and expand its 3-dot menu.
3. Click **Edit**.
4. Expand the documents 3-dot menu.
5. Click **Upload**.

People Management Dashboard using Policy Groups. You can:

3.3.3. Copilot Documents Widget

The Copilot Documents widget can be added to dashboards to allow employees to view and download the General and Policy documents that have been uploaded to co-pilot. This will only display documents the employee has access to. For further guidance on how to add this to a dashboard [read the article on knowledge base](#).

When an employee has access to this widget and uses the HR Documents plugin:

- A link to the document(s) referenced in the response is provided in the read more section.

- The link opens in new browser or Access Evo tab.
- The link opens a filtered view of the Copilot Documents widget.

3.4. XD Assistant Plugin

XD Assistant is a plugin within the PeopleXD Copilot Skill, this allows you to retrieve personal or team data by querying the PeopleXD API, for example 'how much annual leave do I have remaining?'. This is relative to the menu profiles and system access that you have been granted, for example a manager would not be able to query a team member's payslip.

Note:

The information the plugin can pull depends on the PeopleXD products you have and the data existing in your system. In the tables below items marked with * are not available to Payroll only customers.

3.4.1. Employee Data

Employees using the plugin can retrieve the following information:

Module	Area	Description
People	Team*	Returns a list of the peers or the team of the person if set.
Leave	Balances*	Users have a certain number of entitlements when submitting different types of leave. This returns a summary of those balances. e.g. a user may have 20 days entitlement for holidays, if they have taken 4 days leave against this entitlement then their balance would be 16 days. Note: Balances and leave types are not a one-to-one relationship, multiple leave types may be taken into consideration when calculating one balance.
	Requests, Holiday, Day Off*	Returns all of the leave requests, days off, and holidays that the user has submitted. Submitted requests do not get deleted if cancelled, they're simply flagged as cancelled.
Profile	Bio	Returns the bio for the current user.
	Address	Returns a user's address details.
	Bank details	Returns a user's bank details within the system.
	Contacts	Returns a user's contact details within the system.
	Appointments*	Returns a user's appointment details within the system.

Module	Area	Description
	Profile Summary	Retrieves information from the user's profile - Reports to Manager, start date with company, job title, department, work location,
Onboarding	Incomplete*	Returns the list of to do items assigned to the logged in user. The response will return all items the user must action. It will also identify the type of each individual item, these can be INPUT, UDF, POLICY, PAGE.
Payslip	Summary	Returns a list containing a high-level summary of the user's payslips from the past 10 months.
Event Diary	Event diary*	Returns a list of all the upcoming company events.
Expense	Expense Summary	Returns a user's expense summary.
WFM	Leave, coworkers	Returns leave information about your colleagues.
	Shifts, person	Retrieves shift and work schedule information for the user.

3.4.2. Manager Data

Managers can be assigned additional menu options that will allow them to retrieve additional information.

Note:

Copilot uses key words to retrieve the correct information for example:

- 'My Team' retrieves information about coworkers e.g. Is anyone in my team on holiday next week
- 'Direct reports/reports to' retrieves information about a manager's team e.g. Is anyone I manage on holiday next week

Managers can retrieve the following information:

Module	Area	Description
WFM	Schedule*	Returns schedule information to the manager for employees reporting to them
	Absence*	Returns absence information to the manager for employees reporting to them

4. Feed

4.1. Overview

Feed is a notification hub across Access products. PeopleXD can deliver personalised prompts and reminders through the Feed to individual users about actions and tasks they may need to complete.

You can customise the alerts that appear through the iCues functionality. For example, you can create an iCue for the following scenarios that will appear in the Feed:

- Alert an employee when they have a large annual leave balance remaining.
- Alert a manager when one of their employees is approaching the sick leave threshold.

You can create iCues using Insight reports that you or your colleagues have created or download them from the Report Store.

4.2. View Feed Notifications

Once you receive an alert from Feed, Access button will appear with a red circle icon to indicate that there is an unread alert. To open it, click **Access button** then click **Feed**.

- If the notification contains a call to action, click the link to be taken to the relevant PeopleXD widget.
- If the notification contains a suggested prompt, click Ask Copilot to pass the question into the Copilot PeopleXD Skill.

Your historical feed notifications will remain visible for 30 days before being automatically removed.

Note:

- Feed will not appear as an option in Access Button until the user receives a feed notification.
- Feed notifications trigger overnight.

4.3. Configure iCues

To configure iCues for the Feed, either download the existing iCues from the Report Store, or configure new or existing iCues to appear in the Feed.

4.3.1. Download iCues from Report store

There are various Feed type iCues available from the Report Store in PeopleXD that you can make available for your organisation, for example you can send employees a prompt in the Feed if they have more than one-quarter of their annual leave balance remaining 3 months before the end of the balance period.

Download iCue

To download an iCue from the report store, follow the below steps:

1. Navigate to the Report Store tab on the Insight dashboard
2. Click the iCues tab
3. Search for and select the iCue you require
4. Click **Download Report**

Activate iCue

After downloading an iCue from the Report Store, it needs to be activated. To do this, follow the below steps:

1. Navigate to the Insight dashboard, then click the iCues tab.
2. Expand the three-dot menu on the relevant iCue then click Manage.
3. Expand the Actions menu then click iCue.
 - a. In the iCue Schedule tab, select how often to run the Feed notification.
 - b. In the iCue Type tab, select Feed and select the intended recipient from the dropdown e.g. Employee or Manager.
 - c. In the iCue Header tab, enter the subject text that the Feed recipient will see.
 - d. In the iCue Body tab, enter body text that the Feed recipient will see.
 - e. In the Suggested Prompt tab, enter a prompt for Copilot where appropriate.
 - f. In the Call-to-Action tab, select a widget in PeopleXD to link to from the Feed item where appropriate.
4. Click **Save** to activate the iCue.

4.3.2. Available iCues

The following iCues are available to download from the Report Centre and to be used for Feed.

Onboarding Incomplete

New starter receives a prompt in the Feed to complete onboarding. Only employees that have not completed all of their onboarding 7 days after their start date receive the prompt.

Suggested configuration:

- **Schedule:** Daily
- **Type:** Feed - Employee
- **Feed Header:** Onboarding Incomplete
- **Feed Body:** Dear Colleague,
You still have some onboarding tasks to complete since you started on «JOIN_DATE»
- **Suggested Prompt:** What onboarding items do I have left to complete?

Feed Outstanding Holiday - 90 Days Before Leave Year End

Employee receives a prompt in the Feed if they have more than one-quarter of their annual leave balance remaining 3 months before the end of the balance period.

Suggested configuration:

- **Schedule:** Daily
- **Type:** Feed - Employee
- **Feed Header:** Outstanding Annual Leave
- **Feed Body:** Dear Colleague,
You still have Annual Leave to be taken prior to the end of your holiday year on
«PERIOD_END_DATE»
Outstanding Balance: «CURRENT_BALANCE»
- **Suggested Prompt:** How much entitlement can I carry forward to the next holiday year?

Feed – Leave Approval Reminder

Manager receives a prompt in the Feed if they have a leave approval unactioned 5 days after submission date

Suggested configuration:

- **Schedule:** Daily
- **Type:** Feed - Manager

- **Feed Header:** Outstanding Leave Request Requiring Action
- **Feed Body:** Dear Colleague,
You have a leave request to action for «FORENAME_AND_SURNAME». They submitted «PAY_CODE_DESCRIPTION» for approval on «LAST_ACTION_DATE».
- **Call To Action:** My Approval Notifications

4.3.3. Configure new or existing iCues

To configure an iCue to appear in the Feed, follow the below steps:

1. Navigate to the Insight dashboard, then click the iCues tab.
2. Expand the three-dot menu on the relevant iCue then click Manage.
3. Expand the Actions menu then click iCue.
4. Click the iCue Type tab then tick Feed.
5. Configure any other settings, for example add a header, body text, and call to action button. These will all appear in the Feed notification.
6. Once finished, click Save.

For further guidance on iCues, see [iCues - User Guide](#).

4.4. Suggested Prompts

You can add a suggested prompts to feed notifications. The user will be able to click on this to pass the prompt into the Copilot PeopleXD Skill. For example, if the feed item alerts an employee when they have a large annual leave balance remaining, you could add a suggested prompt for the employee to ask Copilot to check their annual leave policy.

This can be used as well as a call to action, which would direct the user to a specific PeopleXD widget/area, e.g. Balances or My Requests.

To do this:

1. Navigate to the Insight dashboard, then click the iCues tab.
2. Expand the three-dot menu on the relevant iCue then click **Manage**.
3. Expand the Actions menu then click **iCue**.
4. Click the Suggested Prompt tab.
5. Select the relevant plugin.
6. Enter the prompt text.
7. Click **Save**.

5. User Access

The following menu options are required to access Evo functionality.

Note: These menu options will be added to your default menu profiles during your implementation.

5.1. Copilot XD Assistant

5.1.1. Employee Data

The following menu options are required for the XD assistant plugin to retrieve employee data:

Menu Option ID	System
WS_EVENTDIARY_MENU.GET	Web Services
MAIN_MENU.WS_EVOCONTEXT	Web Services
WS_EVOCONTEXT_MENU.GET_DATA_PROFILE_DETAIL	Web Services
WS_EVOCONTEXT_MENU.GET_DOCSEARCH	Web Services
MAIN_MENU.WS_EXPENSE	Web Services
WS_EXPENSE_MENU.GET_SUMMARY	Web Services
MAIN_MENU.WS_LEAVE	Web Services
WS_LEAVE_MENU.GET_BALANCES	Web Services
WS_LEAVE_MENU.GET_REQUESTS_DETAILS	Web Services
MAIN_MENU.WS_ONBOARDING	Web Services
WS_ONBOARDING_MENU.GET_TODO_INCOMPLETE	Web Services
MAIN_MENU.WS_PAYSLIP	Web Services
WS_PAYSLIP_MENU.GET_SUMMARY	Web Services
MAIN_MENU.WS_PEOPLE	Web Services
WS_PEOPLE_MENU.GET_TEAM	Web Services
MAIN_MENU.WS_PROFILE	Web Services
WS_PROFILE_MENU.GET_ADDRESS	Web Services
WS_PROFILE_MENU.GET_BANKACCOUNT	Web Services
WS_PROFILE_MENU.GET_CONTACTS	Web Services
MAIN_MENU.WS_SYSTEM	Web Services

5.1.2. Manager Data

The following menu options are required for the XD assistant plugin to retrieve manager data:

Menu Option ID	System
WS_EVOCONTEXT_MENU.GET_DATA_PEOPLE	Web Services
WS_EVOCONTEXT_MENU.GET_DATA_LEAVE_ABSENCES_PROXY	Web Services
WS_EVOCONTEXT_MENU.GET_DATA_SHIFTS_PERSON_PROXY	Web Services

5.2. Copilot HR Documents

5.2.1. Policy Documents Configuration

The following menu options are required to upload and manage policy documents, groups and criteria:

Menu Option ID	System
HR_CONFIGURATION_MENU.POLICY_DOCUMENTS	People Management
MAIN_MENU.CRITERIA_ALLOW_MAINTAN	Core Portal
MAIN_MENU.CRITERIA_ALLOW_ASSIGN	Core Portal
MAIN_MENU.ONBOARDING_CONFIGURATION_WIDGET	CorePortal
WS_DOCUMENT_MENU.GET_POLICY_ID	Web Services
WS_DOCUMENT_MENU.DELETE_POLICY_ID_DOCUMENTID	Web Services
WS_DOCUMENT_MENU.POST_POLICY_ID	Web Services
WS_DOCUMENT_MENU.POST_POLICY_CRITERIA	Web Services
WS_DOCUMENT_MENU.DELETE_POLICY_CRITERIA	Web Services
WS_DOCUMENT_MENU.GET_POLICY_CRITERIA_ID	Web Services
WS_ONBOARDING_MENU.POST_POLICY_READ_ID	Web Services
WS_EVOCONTEXT_MENU.POST_DOCUMENTS_ELASTIC_ID	Web Services

5.2.2. Copilot Documents Widget

The following menu options are required for the copilot documents widget:

Menu Option ID	System
MAIN_MENU.COPILOT_DOCUMENTS	CorePortal
MAIN_MENU.WS_EVOCONTEXT	Web Services

Menu Option ID	System
WS_EVOCONTEXT_MENU.GET_DOCUMENTS	Web Services
WS_EVOCONTEXT_MENU.GET_DOCUMENTS_TYPES	Web Services

5.3. Feed

5.3.1. Suggested Prompts

The following menu options are required to access to the suggested prompts area of iCues:

Menu Option ID	System
WS_INSIGHT_MENU.GET_FEED_PLUGINS	Web Services

5.3.2. iCue Configuration

If you do not have access to Insight, including the Store and iCues tabs, the menu options below are required. These will provide limited access to:

- Download iCues from the report store
- Manage and activate the iCue

Menu Option ID	System
MAIN_MENU.HRANALYTICS	CorePortal
MAIN_MENU.ANALYTICS_VIEW_REPORTS	CorePortal
MAIN_MENU.ANALYTICS_EDIT_REPORTS	CorePortal
MAIN_MENU.COREINSIGHTICUE	CorePortal
MAIN_MENU.ANALYTICS_REPORT_STORE	CorePortal
MAIN_MENU.WS_INSIGHT	WebServices
WS_INSIGHT_MENU.GET_TAGS	WebServices
WS_INSIGHT_MENU.GET_FEED_PLUGINS	WebServices

5.4. Access Evo Members

Access Evo administrators can manage a users Access Evo account within the Members area. This includes managing access to Evo features and a users product roles.

5.4.1. Product Roles

To assign a user a product role:

1. In the **Members** area expand the users **3-dot menu**.
2. Click **Manage Roles**.

3. Select a role from one of the drop-down lists.

Note: New starters will automatically be assigned the User role for PeopleXD when they are set up.

4. Click **Save Changes**.

5.4.2. Features

Depending on how your site has been set up you may be able to assign or remove access to Evo features, including Feed and Copilot.

Each feature on your site will be set up with one of the below settings:

- **On for all users** – read only user access.
- **On by default** – with the option to remove user access.
- **Off by default** – with the option to grant user access.

To assign a user access to a feature:

1. In the **Members** area expand the users **3-dot menu**.
2. Click **Manage Features**.

The screenshot shows a modal window titled "Manage Features: Julie Knight". Inside, there is a section labeled "Features" containing a table. The table has two rows: "Button Copilot" and "Button Feed". Each row has a dropdown menu showing "User" and a red information icon. At the bottom of the modal are two buttons: "Cancel" and "Save Changes".

3. Select a role from one of the drop-down lists.

Note: You will only be able to change a users access to a feature if your site has been set up with this permission.

4. Click **Save Changes**.
