1. Overview

1.1. Purpose of the Guide

This document provides guidance on how to setup and use the Report Store in Insight. This includes:

- What is the Report Store?
- How to access the store.
- How to publish a report to the store.
- How to download a report from the store.
- Guidance on the next steps from when you download a report.
- How to set up the Report Store on your instance of PeopleXD.

1.2. What is the Report Store?

The Report Store is a central repository of pre-configured reports, similar to an 'app store'. These reports are created by other users in the PeopleXD community and uploaded to the cloud. You can:

- Browse the reports.
- Download reports for use on your own instance of PeopleXD.
- Publish reports that you have created to the store for other organisations to avail of.

These are essentially report templates. They do not contain any data i.e. the template includes the fields, calculations, filters, formatting etc used to create the report. However, if you download this and run on your environment, the report data will reflect your own organisation's data and your own designated access to data on PeopleXD. You can even choose to edit the downloaded report to further suit your own requirements.

Who can download reports?

Once you have access to the Report Store, you can browse the store and download any reports you require. You can then run these in your version of Insight and edit these as required.

Who Can Publish / Upload Reports to the Report Store?

Only users with access to the *Insight > Admin Area* can publish reports to the Report Store. If you have this access, you can publish any report created by any user in your organisation.

 **Note:** Reports that are imported to Insight using the *Discoverer Importer* tool cannot be published to the Report Store.

2. How to Use

2.1. Accessing the Report Store

The Report Store is available on the Insight dashboard:

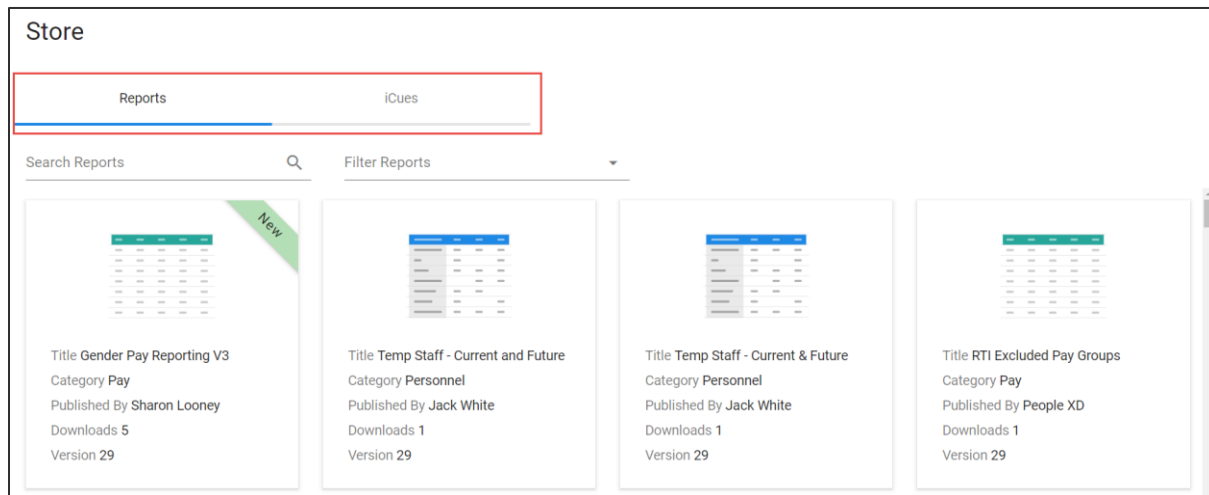

1. Navigate to the Insight dashboard.
2. Click the **Store** tab.

Alternatively, you can search for *Store* in the quick jump menu, to jump straight to the tab from anywhere in Portal.

2.2. Browse the Report Store

The *Store* screen provides a full list of all available report templates and iCues. Click the tabs at the top of the screen to view Reports or iCues.

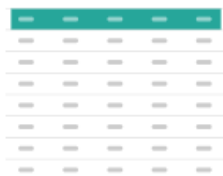

The following details are displayed on each report:

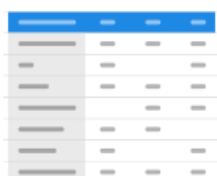

Field	Description
Title	The report name.
Category	The business area / product that this report is based on.
Published By	The PeopleXD user that published the report.
Downloads	The number of times this has been downloaded from the store by any user in the PeopleXD community.
Version	The PeopleXD version that the user created this report on.
New	This indicates that the report has been uploaded in the last 30 days.

The image displayed for the report template reflects the type of report e.g:

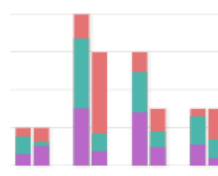

Tabular

Cross-Tabular

Includes Graph

2.2.1. Search for Reports

The *Store* screen provides a full list of all available report templates and iCues.

- Use the **Search** field to do a keyword search based on the report/iCue title and tags e.g. return all reports that include the word “absence” in the title or as a tag.
- The **Filter Reports** drop down list provides a list of all of the standard report categories, which map to CoreInsight business areas. Select one of the options here to show only reports for that area e.g. all “Pay” reports.

2.2.2. View Report

Click on the report to view the full details.

Leaver Reason By Department
CoreInsight > [Leaver Reason By Department](#) [LEAVE FEEDBACK](#)

Description
This report outputs the leavening reason by department. The report is date driven, where the user enters dates to and from when running the report. Max Limit is set to 2,500 rows-this can be increased if required to a maximum of 100,000 rows

The screen provides full details for the report and the option to download it. See the table below for a description of the different elements on this screen.

	Description
Image / Graph	This corresponds to the image on the previous screen i.e. this reflects if this is a tabular or cross-tabular report OR if the report includes a graph. The graph depicted here corresponds to the chart type used on the report e.g. bar chart, pie chart etc.
Description	A description provided by the person that published the report, to provide additional information about what the report includes.
Tags	Any tags provided by the publisher. These are searchable.
Columns	The views and columns used to construct this report.
Download Report button	The option to download the report to your instance of Insight. This also displays the number of times that the report has been downloaded by any user in the PeopleXD community. See section 2.3. Download a Report for further details.
Like button	Click to like the report. If the report has been liked by others, the number of likes are displayed here.
Reports similar to this	A list of suggested reports that are similar to this. These are reports that are in the same <i>Category</i> and have matching <i>Tags</i> .
Leave Feedback button	This gives you the opportunity to send a message to PeopleXD with feedback on this report. This message is not shared with any other users on Insight or the <i>Report Store</i> . This is not shared with the report publisher. See section 2.2.3. Leave Feedback for Reports for further details.

2.2.3. Leave Feedback on Report

To leave feedback on a report:

1. Click **Leave Feedback**.
2. Enter the **Feedback Text**.
3. Click **OK**.

2.3. Download a Report

2.3.1. Who can Download Reports?

Reports can be downloaded by any user that has been given access to the *Store* screen on the Insight dashboard.

See [3. Access to the Report Store](#) for further details of how to grant access.

2.3.2. Download a Report

Follow these steps to download a report:

1. Navigate to *Insight > Store*.
2. Search for a report.
3. Ensure that the report version is compatible with your PeopleXD version.
 - You can only download reports that are for your version and earlier i.e. if you are on v26 you can download v25 and v26 reports, but not v27.
4. Click on the report to open it.
5. Review the report details to confirm that this is a report you would like to download.
6. Click the **Download Report** button.

Leavers by Reason
CoreInsight > Leavers by Reason

LEAVE FEEDBACK

Description
This report lists the leaver reasons per person per department. A bar chart counts the number of leavers per leaving code. Max Limit is set to 250 rows-this can be increased if required to a maximum of 100,000 rows

Columns

View Name	Column Name
PRBL_HR_PERSON_MASTER	LEAVING_CODE_DESCRIPTION

- A message appears on screen to confirm that the report has downloaded successfully and has been added to your reports.
7. Click the **Home** tab.
 8. Search for the report on your *All Reports* list:

9. Click the 3-dot menu and click **View** to run the report.

2.3.3. Important Points for Downloaded Reports

- The data returned when you run the report, reflects your access to data on PeopleXD.
- You are automatically made the Report Owner for reports that you download.
- All report settings are included as part of the template you downloaded i.e. all settings on the *Manage Report* screen.
- As Report Owner, you can edit any of the report settings via the *Manage Report* screen (if you already have access to edit reports on Insight). Reports that you download can be managed the same as reports that you create.
- There is no restriction on the reports that you can download. You can download a report for any business area, even if you don't have access to create reports for that business area.

2.4. Publish a Report

2.4.1. Who Can Publish Reports?

To publish a report to the Report Store, you must have access to the *Admin Area* tab on the Insight dashboard.

If you do not have access to this screen, you cannot publish reports. See [3.2. User Access to Publish Reports](#) for further guidance.

Any reports that have been created by users in your organisation can be published from here. You can publish a report that you or any of your colleagues has created.

These reports can be identified by filtering based on:

- Data reports
- Interface reports

Note: You cannot publish:

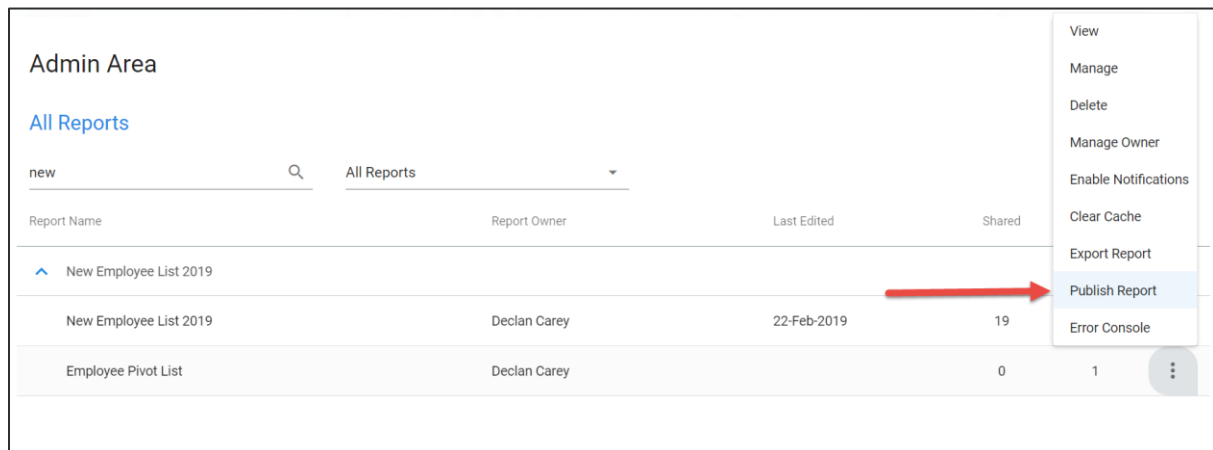

- Reports that have been imported to Insight via the Discoverer Importer tool.
- PeopleXD Standard reports.

2.4.2. Publish a Report

Follow these steps to publish a report to the Report Store:

1. Navigate to *Insight > Admin Area*.
2. Search for the report.
 - You can publish reports created by anyone in your organisation i.e. created by your or anyone else.

3. Click the 3-dot menu then click **Publish Report**.

4. Enter the following details:

Publish Report

Created by Declan Carey	Report Name * New Employee List 2019
Report Description	Report Category
Report Tags	

CANCEL OK

a. **Report Name:**

- This defaults to the reports current name. You can overwrite this to a new name.

b. **Report Description:**

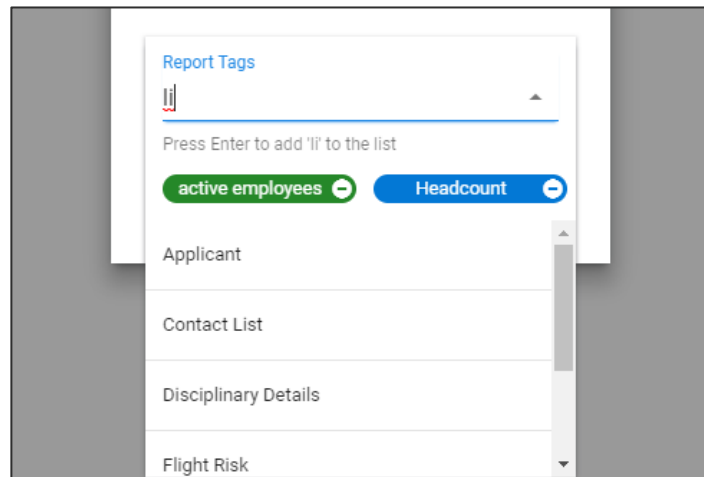

- This defaults to the description already set for the report on the Manage Report screen (if one has been set).
- Use the existing one or provide a new one to give additional information for the report here e.g. what is this report used for, is there a row limit, are there any calculations applied, are filter prompts included etc. This supports another user making a decision about downloaded the report.

c. **Report Category:**

- This is the product / business area that the report is related to.

d. **Report Tags:**

- Select from a list of existing tags. Existing tags you choose will be added as blue labels on the list.
- Create a new tag by typing the keyword and clicking enter to save. Tags you create will appear as green on the selected list.

5. Click **OK** to publish the report.

- A message appears on screen you confirm that the report has been successfully published.

6. Navigate to the *Store* screen.

7. Search for the report.

- This will include the new tag for the next 30 days.

8. Click the report to view the full details.

2.4.3. Unpublish a Report

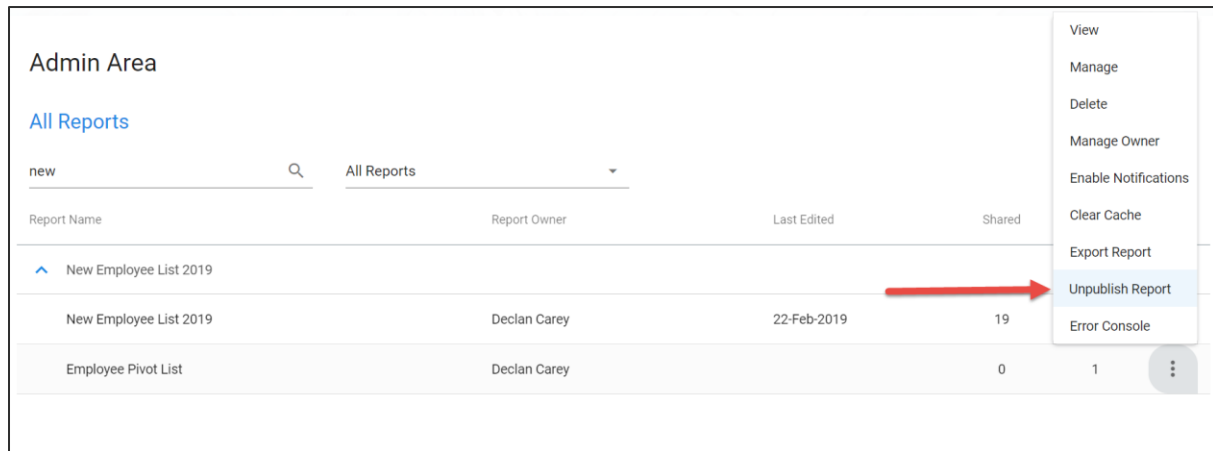

Should you need to remove a report that you have published from the Report Store, there is an **Unpublish Report** option.

To do this

1. Navigate to *Insight > Admin Area*.
2. Search for the report.

3. Click the 3-dot menu button then click **Unpublish Report**.

- The *Unpublish Report* option is only available for reports that have been published.

4. Click **OK** on the prompt to confirm that you wish to unpublish the report.

The report is removed from the *Report Store*.

Note: If other users in the PeopleXD community have downloaded this report, there is no impact to them - they still have access to the report that they downloaded to their instance of PeopleXD. The action prevents further users from downloading the report, by removing it from the Report Store.

2.4.4. Can I Edit a Published Report?

You cannot edit reports on the Report Store e.g. to change the name or description.

Likewise, if you make any changes to the original report on Insight, this has no impact on the Report Store report.

If you need to make changes to a published report, you need to unpublish the report. You can then publish the report again e.g.

- This may be an updated version of the report on your instance of Insight
- OR**
- You may republish only to change details such as the *Report Name*, *Report Description*, *Report Category* and *Report Tags*.

3. Access to the Report Store

3.1. Menu Options Required

The Store tab is controlled by a Security menu option. You will need this menu option enabled on one of your menu profiles to see the Store tab on the Insight dashboard.

Once you have access to the tab, you have full access to that screen i.e. you can browse for reports, download reports and leave feedback.

The below menu option controls access to the Report Store tab:

System	Menu Option
Coreportal	CorePortal - Analytics Report Store

3.2. User Access to Publish Reports

To publish a report, you need to have access to the Admin Area on the Insight dashboard. Once you have access to that dashboard, you automatically have access to the *Publish Report & Unpublish Report* options for reports. There is no additional access needed to see this option.

The below menu option controls access to the Admin Area tab:

System	Menu Option
Coreportal	CorePortal - CoreInsight Admin
