1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on processing the 2025/26 Year End for PeopleXD Expense and preparing for the 2026/27 tax year.

1.2. Overview

This document covers the following:

- Vehicle BIK rate changes for the 2026/27 tax year.
- P11D Changes.
- The checklist to complete before the Year End Rollover.
- How to perform the Year End Rollover.
- The steps required to configure your Expense System correctly for your 2026/27 tax year.

Note:

- This document assumes that the reader is an experienced user of the Expense Module.
- Organisations may have activities that are personal to them which are not mentioned in this document. In such a case, the organisation must understand and agree on the best fit for their activities when performing the year end procedure.
- The following areas of Expense are covered in separate documentation:
 - [Benefit Management](#)
 - [P11D](#)

2. Vehicle BIK Rate Changes for the 2026/27 Tax Year

The following software and rate changes are part of the Year End update.

2.1. BIK Rates for 2026/27 – Payrolling Car Benefits

Note:

This section is only relevant to customers who are Payrolling Car Benefits.

Note the following:

- Details on how to configure your People XD system for Payrolling Benefits is available in section [6. Payrolling Car Benefits Configuration](#).
- If intending to Payroll Benefits (including Car BIK), you must register your intention to do so with HMRC **before** the start of the new tax year.
- The Year End Rollover procedure recalculates the Vehicle Cash Equivalent and Fuel Cash Equivalent values for the new tax year.
- After the Year End Software Delivery, any vehicles which are not assigned a Vehicle Type, default to *Car* for the purposes of calculating Cash Equivalent Values.
- The below BIK rates are held on the database and cannot be viewed or updated through any screen.

2.1.1. Cars First Registered on or after 6th April 2020

The following BIK rates for cars registered from 6th April 2026/27 are loaded as part of the Year End Software Delivery.

C02 (g/km)	Electric Range (miles)	2026/27 (%)
0	N/A	4
1-50	>130	4
1-50	70-129	7
1-50	40-69	10
1-50	30-39	14
1-50	>30	16
51-54		17
55-59		18

C02 (g/km)	Electric Range (miles)	2026/27 (%)
60-64		19
65-69		20
70-74		21
75-79		21
80-84		22
85-89		23
90-94		24
95-99		25
100-104		26
105-109		27
110-114		28
115-119		29
120-124		30
125-129		31
130-134		32
135-139		33
140-144		34
145-149		35
150-154		36
155-159		37
160-164		37
165-169		37
170+		37

Note:

A **4% diesel car tax supplement** (up to a maximum of 37%) applies to non-RDE2 compliant diesels, the vast majority of current diesel models.

2.1.2. Calculating a Vehicles Cash Equivalent Value – Example

In the below 2020/21 tax year example, Approved CO2 Emissions and the Electric Vehicle Range figures are entered in the *P46/P11D* screen and are used in the Cash Equivalent Value calculation.

For example, if the:

- Calculated price (list price, plus accessories, less employee contribution) = £40,000.
- Approved CO2 Emissions = 20.
- Electric Vehicle Range = 80.
- "Date First Registered" is greater than or equal to 06-Apr-2020.

Therefore, the Cash Equivalent of the Vehicle is 4% of the £40,000 (Calculated Price) or £1,600 per annum (Employer NIC @ 13.8% = £220.80).

The screenshot displays the 'P46/P11D Details' screen in a web application. The breadcrumb trail at the top reads 'Administrator Dashboard > P46/P11D Details'. The 'Vehicle Details' section includes fields for 'Claimant Name*' (Ben Galvin), 'Reg No' (VW4587), 'Vehicle Make/Model' (Vw Golf E), and 'P11D Fuel Type' (Zero emission cars (incl electric cars)). Below this is a tabbed interface with four tabs: 'Availability', 'CO2 Emissions', 'Vehicle Costs' (which is active), and 'Free Fuel'. The 'Vehicle Costs' section contains several input fields: 'List Price' (40000), 'Calculated Price' (40000), 'Price of Accessories', 'Employee Payments for Private Use', 'Employee Capital Contributions', 'Cash Equivalent of Vehicle' (1600), and 'Cash Equivalent Override'. The 'Calculated Price' and 'Cash Equivalent of Vehicle' fields are highlighted with red boxes. A green 'SAVE' button is located at the bottom right of the screen.

Vehicle Details	
Claimant Name*	Ben Galvin
Reg No	VW4587
Vehicle Make/Model	Vw Golf E
P11D Fuel Type	Zero emission cars (incl electric cars)

Vehicle Costs	
List Price	40000
Calculated Price	40000
Price of Accessories	
Employee Payments for Private Use	
Employee Capital Contributions	
Cash Equivalent of Vehicle	1600
Cash Equivalent Override	

2.2. Car Fuel Benefit Charge – Configuration Required

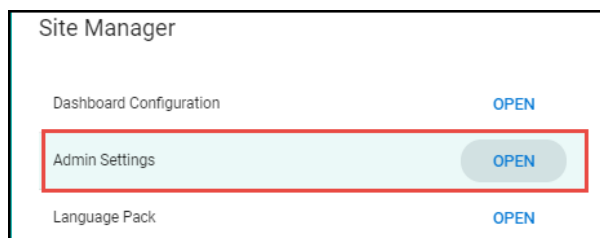

Note:

- The Car Fuel Benefit Charge should be updated **after** the current tax year has been completed and the P11D's have been generated.
- The Car Fuel Benefit Charge is held as a *Portal Parameter* in PeopleXD.
- The Car Fuel Benefit Charge for the 2026/27 tax year rate is £29,200

To update the Car Fuel Benefit Charge for the 2026/27 tax year:

1. Navigate to the *Administrator Dashboard*.
2. On the *Site Manager* widget open **Admin Settings**.

3. Search for parameter code "*cp_p11d_fuel_benefit*".
4. Click **Edit**.

5. Update the *Current Value*.
6. Click **OK**.
7. A message displays "*Parameter has been successfully updated*".

2.3. Van Benefit Charge and Van Fuel Benefit Charge Parameters – Configuration Required

Note:

- The Van Benefit Charge and Van Fuel Benefit Charge should be updated **after** the current tax year has been completed and the P11D's have been generated.
- The Van Benefit Charge and Van Fuel Benefit Charge are held as *Portal Parameters* in PeopleXD.
- The Van Benefit Charge for the 2026/27 tax year rate is £4,170.
- The Van Fuel Benefit Charge for the 2026/27 tax year rate is £798.

To update any of the parameters, follow these steps:

1. Navigate to the *Administrator Dashboard*.
2. On the Site Manager widget open **Admin Settings**.
3. Search for the parameter codes "*cp_van_cash_benefit*" and "*cp_van_fuel_benefit*".
4. Click **Edit**.

Parameter Description	Parameter Code	Product Name	Current Value	
A sum used to calculate the P11D van Cash benefit charge	cp_van_cash_benefit		3490	EDIT
A sum used to calculate the P11D van fuel benefit charge	cp_van_fuel_benefit		666	EDIT

5. Update the *Current Value* of "*cp_van_cash_benefit*".
6. Click **OK**.
7. Update the *Current Value* of "*cp_van_fuel_benefit*".
8. Click **OK**.
9. A message displays "*Parameter has been successfully updated*".

2.4. Vehicle Cash Equivalent and Fuel Cash Equivalent Values

2.4.1. Overview

To access the Vehicle Cash Equivalent and Vehicle Fuel Cash Equivalent values:

1. Navigate to the *Car Administration Centre* widget.
2. Search for the Vehicle and click the relevant 3-dot menu.
3. Click **P46/P11D Details**.

Car Administration Centre ADD NEW VEHICLE

Search by claimant no, name, re... Filter vehicle type

2.4.2. Car Benefit Charge

The Car Benefit Charge is based on the [BIK Rates for 2026/27](#).

This value may vary where:

- The Car was unavailable for at least 30 consecutive days.
- You were providing fuel for private use but stopped doing this.

2.4.3. Car Fuel Benefit Charge

An annual Car Fuel Benefit Charge is based on a multiplier of £29,200 and is reported via the RTI, as per HMRC instructions. The Car Fuel Benefit Charge is calculated by taking the appropriate percentage, see [BIK Rates for 2026/27](#), and multiplying by the fixed figure of £29,200

The Car Fuel Cash Equivalent value can be reduced if:

- The Employee cannot use the Car for 30 days in a row.
- The Employee pays you back for all their private fuel.
- You stopped providing fuel during the tax year.

2.4.4. Van Benefit Charge

An annual Van Benefit Charge of £4,170 is reported via the RTI, as per HMRC instructions.

The Van Cash Equivalent can be reduced if:

- The Employee cannot use the van for 30 days in a row.
- The Employee pays you to use the van privately.
- Other Employees use the van – divide £4,170 by the number of employees.

2.4.5. Van Benefit Charge – Zero Emissions

Since April 2021, there are no Van Benefit Charge for vans that produce zero carbon emissions.

For details on how to overwrite the Cash Equivalent Value, see section [2.4.1. Overview](#).

2.4.6. Van Fuel Benefit Charge

The Van Fuel Benefit Charge of £798 can be reduced if:

- The Employee cannot use the van for 30 days in a row.
- The Employee pays you back for all their private fuel.
- You stopped providing fuel during the tax year.

3. P11D Changes

In order to compile P11D benefit details from Payroll, the P11D section of the benefit Pay Codes must be mapped to the relevant Expense Codes in Expense.

Note:

- For further information, see the [P11D user guide](#):
- Only benefits that are not Payrolled are required to be returned on the electronic P11D. However, the P11D(b) XML section, shows the total benefit value, which is the sum of both Payrolled and non-Payrolled Benefits, reporting the total Class1A NIC due. There is no change to the process for P11D/P11D(b) file generation.

3.1. New P11D Schema for 2025/26

HMRC announced several schema changes to the 2025/26 P11D.

Note:

As part of the Year End Software Delivery, People XD automatically installs the new 2025-26 P11D template.

The changes introduced are:

Section F

Data Item 46. Change to date in title from 2024/25 to 2025/26

Data Item 47. Change to date in title from 2024/25 to 2025/26

Section H

Data Item 53. Change to date in title from 5 April 2024 to 5 April 2025

Data Item 54. Change to date in title from 5 April 2025 to 5 April 2026

Data Item 55. Change to dates in title and business rules from 5 April 2024 and 5 April 2025 to 5 April 2025 and 5 April 2026

Date Item 56. Change to dates in title from 5 April 2024 and 5 April 2025 to 5 April 2025 and 5 April 2026

Data Item 57. Change to date in title from 2024/25 to 2025/26

Data Item 58. Change to date in title from 2024/25 to 2025/26

3.1.1. P11d - Class 1A NIC Rate

The Class 1a NIC rate has been updated to **15.00%**.

The Class 1A NIC rate can be updated in the following locations:

- **Portal:** *Payroll Dashboard > Settings > General > System Configuration > General > P11D Section.*
- **Back Office:** *CorePay > Update > Utilities > System Configuration > General > P11D Section.*

3.1.2. P11d(b) Only

For sites who need to generate a P11d(b) only, please ensure to review the following knowledge article: <https://accessgroup.my.site.com/Support/s/article/PeopleXD-Expense-UK-Generate-P11D-B-XML-file-only>

4. Year End Rollover

4.1. Summary Checklist

These steps are intended as a checklist which can be printed and used as a reference while completing the Year End Rollover tasks.

Step	Task	Action	Complete (Y/N)
1	Year End Legislative Service Pack Update.	PeopleXD provides a <i>Year End Legislative Service Pack</i> to maintain legal compliance. The <i>Year End Legislative Service Pack</i> contains the rate changes.	
2	Payroll Year End	Ensure the <i>Payroll Year End Cleardown</i> is complete, see the UK Payroll Year End user guide.	
3	Generate/Transfer RTI	Ensure all Payroll RTI files are generated and transferred for the final Payroll Period.	
4	Final Expense Run.	Complete the " <i>Final Expense Run</i> ".	
5	Update the <i>Benefit Charge</i> parameters.	Update the <i>Vehicle Benefit Charge</i> and <i>Vehicle Fuel Benefit Charge</i> parameters, see sections: Car Fuel Benefit Charge Van Benefit Charge and Van Fuel Benefit Charge	
6	Review the Car Administration Centre.	Complete a sanity check/data check on vehicle details and BIK records.	
4	<i>Year End Rollover.</i>	Perform the <i>Year End Rollover</i> .  Note: For <i>Car Administration Centre</i> users, this includes a script which updates <i>Cash Equivalent Value</i> calculations.	
5	Report for Monthly Values.	Run a report to extract details to calculate monthly values.	
6	Upload BIK File.	Prepare template and upload BIK records.	
7	Prepare P11D	Load/compile/insert/update/generate P11D details. See the P11D user guide .	

4.2. Legislative Year End Service Pack

PeopleXD provides a Year End Legislative Service Pack to maintain legislative compliance with HMRC directives. Note the following:

- The PeopleXD project team will contact your organisation to discuss implementation details.
- The Year End Legislative Service Pack contains the rate changes.
- The contents of this Year End Legislative Service Pack are outlined in the summary manual in greater detail.

4.3. Final Expense Run

Note:

- It is essential that the Final Expense Run of the current tax year is completed **before** you commence the Year End Rollover.
- Ensure there are **No Expense Payments in Mid-Process** on the system, i.e. ensure that you are not in the middle of a Payment Run. Outstanding trips are fine – if the Generate Payment Claims step has **not** been run.

The Final Expense Run is a business as usual process, containing some of the key elements briefly outlined below, e.g.

- Complete the Final Expense Run.
- All relevant reports must be reviewed and signed off.
- All data outputs are produced and transferred successfully, e.g., GL output, bank file.

4.4. Year End Rollover

Note:

- Ensure the Year End Software Delivery has been applied **before** processing the *Year End Rollover*.
- Update the Vehicle Benefit Charge and Vehicle Fuel Benefit Charge parameters, see sections:
 - [Car Fuel Benefit Charge](#)
 - [Van Benefit Charge and Van Fuel Benefit Charge](#)

To process the Year End Rollover:

1. Go to *Update > Year End Processing*.

Cheque Run Validation

Year End Update

	Old Start Date	Old End Date	New Start Date
Company			
Expense Year			
Kilometres Year			
Run Number			
New PO Sequence			

OK Cancel

Browse

2. Enter the **Company** number or click to select from the LOVs.
3. Press **Enter/Tab**.
4. Verify the *New Start Date* for the *Expense Year* and the *Kilometres Year* are correct.
5. Verify that the *Run Number* is correct, i.e., for 2021, the new run number is 210000.
6. If using the *Car Administration Centre* for Payrolling Car Benefits, click **Browse** and select a CSV file output location. Ensure you have access to the location.

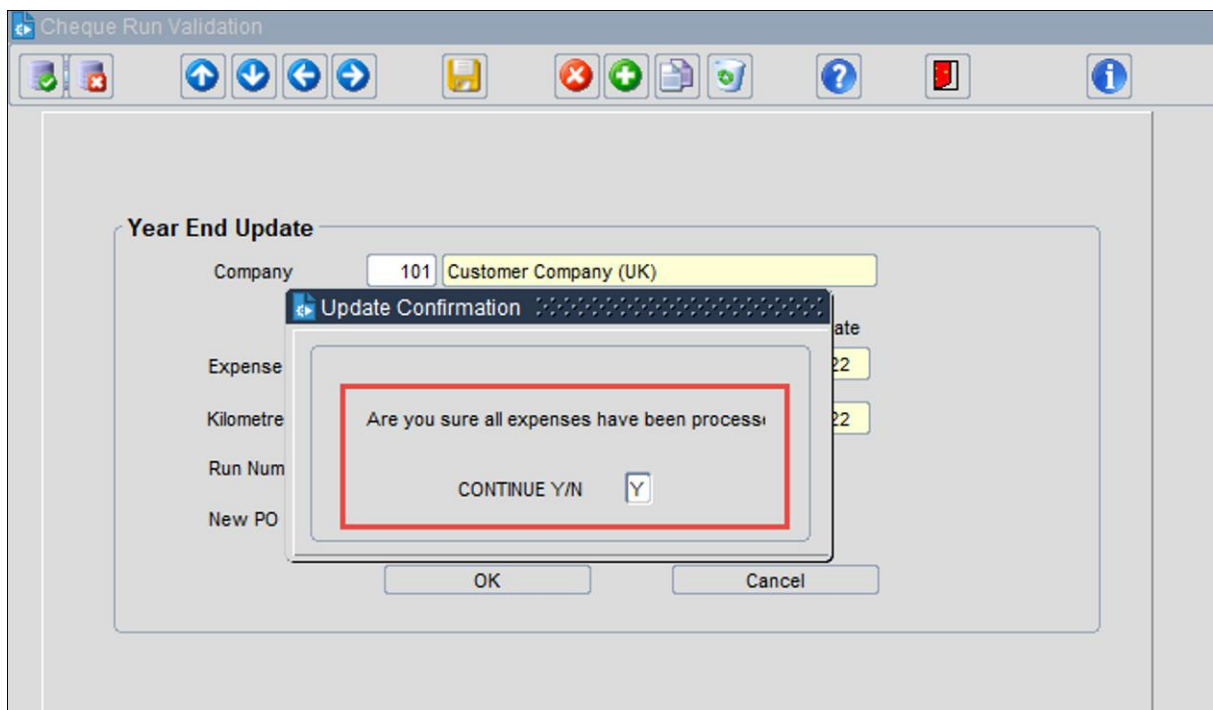

Note:

The CSV File contains the following:

- All Car BIK records that have been updated as part of the Year End Rollover.
- The recalculated cash equivalent and free fuel cash equivalent values for active cars based on the BIK rates.
- The Car BIK records reset as part of the Year End Rollover:
 - Available From (available_from).
 - Days car unavailable (days_car_unavailable).
 - Date Free Fuel Provided (date_free_fuel_prov).
- The **period** cash equivalent and free fuel cash equivalent values are based on pay frequency (rounded to two decimal places).

7. Click **OK**.

The *Update Confirmation* window opens.

8. Enter "Y" and press **Enter**.

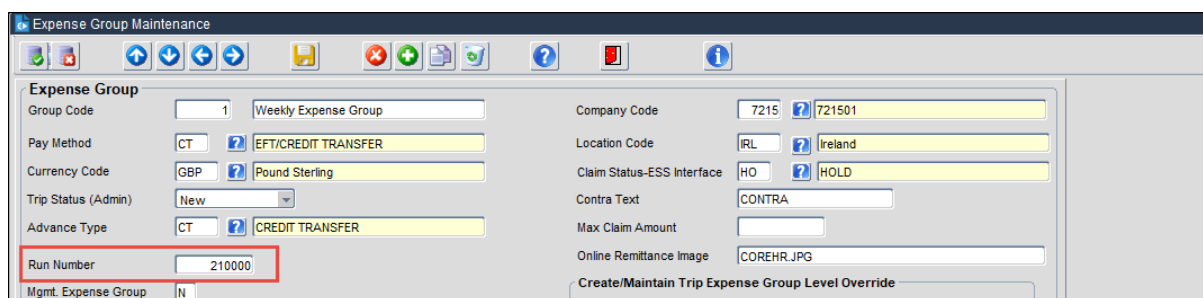

5. Post Year End Rollover Checks

Once your Year End Rollover is complete, perform the following Post Year End checks.

5.1. Run Number

Verify the *Run Number* for all Expense Groups is now reset, e.g., 210000 for the year 2021.

1. Go to *Reference > Reference D-L > Expense Group*.
2. Enter the **Expense Code** in the *Group Code* field or click  to select from the LOVs.
3. Click  to execute the query.

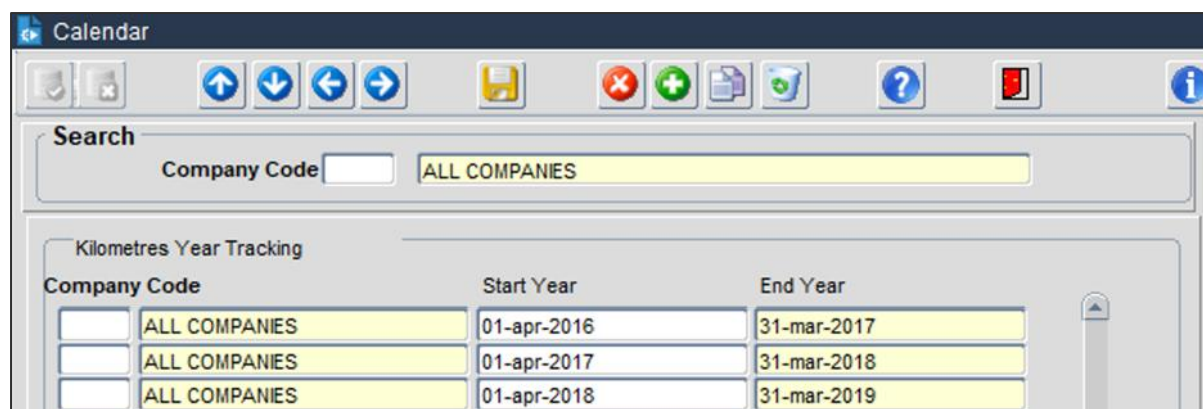

The screenshot shows the 'Expense Group Maintenance' window. The 'Run Number' field is highlighted with a red box and contains the value '210000'. Other fields include 'Group Code' (1), 'Weekly Expense Group', 'Company Code' (7215), 'Location Code' (IRL), 'Currency Code' (GBP), 'Trip Status (Admin)' (New), 'Advance Type' (CT), 'Max Claim Amount', 'Online Remittance Image' (COREHR.JPG), and 'Mgmt. Expense Group' (N).

5.2. Mileage Calendar

Ensure that the new *Kilometres Year* has been set up, e.g., 01-Apr-2023 to 31-Mar-2024.

1. Go to *Reference > Reference M-R > Mileage Calendar*.
2. Enter the **Company Code** or click  to select from the LOVs.
3. Press **Enter/Tab**.

The screenshot below is for illustrative purposes only.

The screenshot shows the 'Calendar' window. The 'Search' section has 'Company Code' set to 'ALL COMPANIES'. The 'Kilometres Year Tracking' table is displayed below.

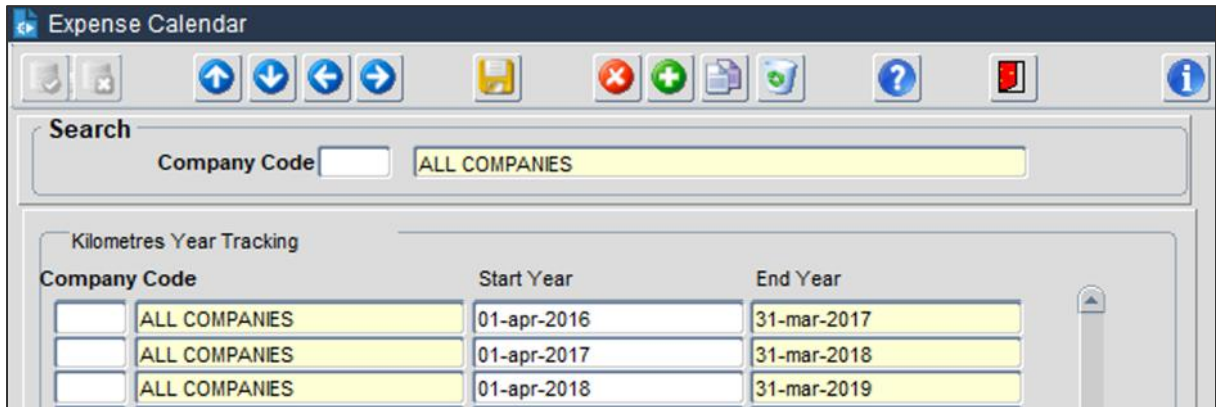

Company Code	Start Year	End Year
ALL COMPANIES	01-apr-2016	31-mar-2017
ALL COMPANIES	01-apr-2017	31-mar-2018
ALL COMPANIES	01-apr-2018	31-mar-2019

5.3. Expense Calendar

Ensure that the new *Expense Year* has been set up, e.g., 01-Apr-2024 to 31-Mar-2025.

1. Go to *Reference > Reference D-L > Expense Calendar*.
2. Enter the **Company Code** or click  to select from the LOVs.
3. Press **Enter/Tab**.

The screenshot below is for illustrative purposes only.

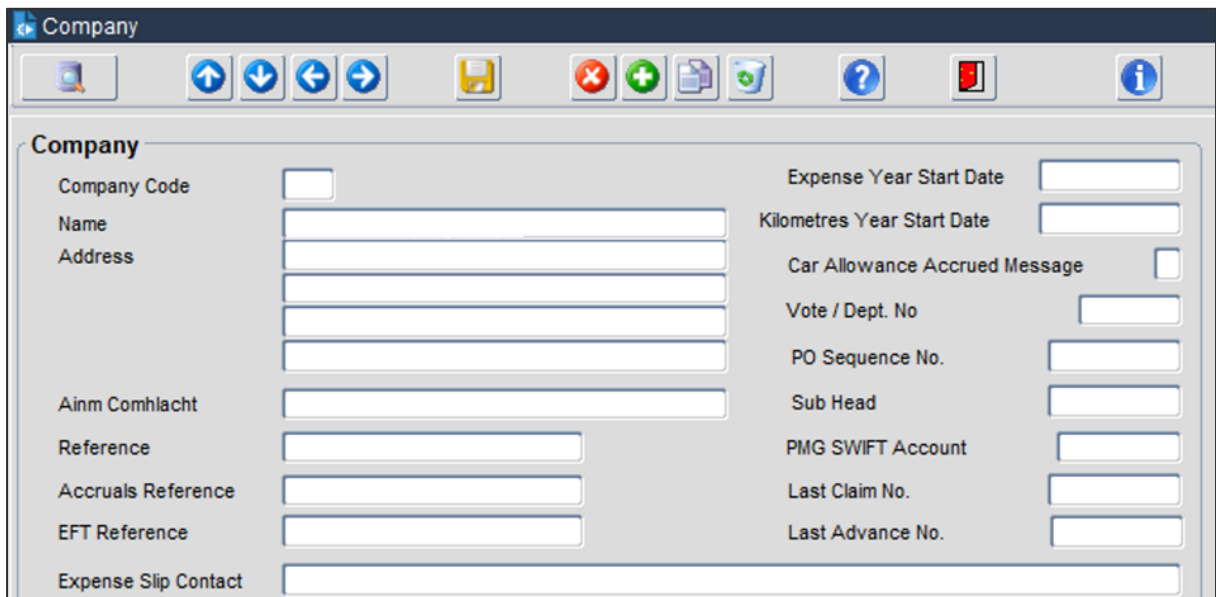

The screenshot shows the 'Expense Calendar' window. It features a search bar with 'Company Code' and a dropdown menu currently showing 'ALL COMPANIES'. Below this is a section titled 'Kilometres Year Tracking' which contains a table with three columns: 'Company Code', 'Start Year', and 'End Year'. The table lists three entries, all with 'ALL COMPANIES' as the company code and dates from 01-apr-2016 to 31-mar-2019.

Company Code	Start Year	End Year
ALL COMPANIES	01-apr-2016	31-mar-2017
ALL COMPANIES	01-apr-2017	31-mar-2018
ALL COMPANIES	01-apr-2018	31-mar-2019

5.4. Company Dates

Ensure that the *Expense Year Start Date* and the *Mileage Year Start Date* are correct, e.g., 01-Jan 2022.

1. Go to *Reference > Reference C-C > Company Code*.

The screenshot shows the 'Company' window. It contains various input fields for company details. On the left, there are fields for 'Company Code', 'Name', 'Address', 'Ainm Comhlacht', 'Reference', 'Accruals Reference', 'EFT Reference', and 'Expense Slip Contact'. On the right, there are fields for 'Expense Year Start Date', 'Kilometres Year Start Date', 'Car Allowance Accrued Message' (a checkbox), 'Vote / Dept. No.', 'PO Sequence No.', 'Sub Head', 'PMG SWIFT Account', 'Last Claim No.', and 'Last Advance No.'.

2. Enter the **Company Code** or click  to select from the LOVs.

- Click  to execute the query.
- Review the *Expense Year Start Date* and *Kilometres Year Start Date* fields.

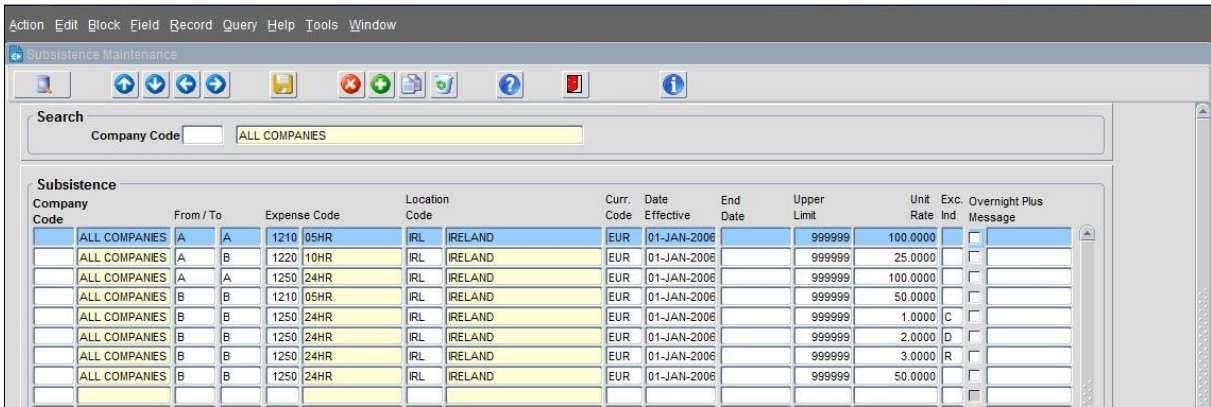

5.5. Rates

Ensure any newly required rates are in place before the first Expense Run. These rates may be legislative or organisational based, e.g., Subsistence, Mileage etc.

5.5.1. Subsistence

- Go to *Reference > Reference S-Z > Subsistence*.
- Enter the **Company Code** or click  to select from the LOVs.
- Click  to execute the query.

The screenshot below is for illustrative purposes only.

The screenshot shows the 'Subsistence Maintenance' window. At the top, there is a search bar with 'Company Code' and a dropdown menu set to 'ALL COMPANIES'. Below this is a table with the following columns: Company Code, From / To, Expense Code, Location Code, Curr. Code, Date Effective, End Date, Upper Limit, Unit Rate, Exc. Ind, Overnight Plus, and Message. The table contains several rows of data for different company codes and expense codes.

Company Code	From / To	Expense Code	Location Code	Curr. Code	Date Effective	End Date	Upper Limit	Unit Rate	Exc. Ind	Overnight Plus	Message
ALL COMPANIES	A A	1210 05HR	IRL IRELAND	EUR	01-JAN-2006		999999	100.0000			
ALL COMPANIES	A B	1220 10HR	IRL IRELAND	EUR	01-JAN-2006		999999	25.0000			
ALL COMPANIES	A A	1250 24HR	IRL IRELAND	EUR	01-JAN-2006		999999	100.0000			
ALL COMPANIES	B B	1210 05HR	IRL IRELAND	EUR	01-JAN-2006		999999	50.0000			
ALL COMPANIES	B B	1250 24HR	IRL IRELAND	EUR	01-JAN-2006		999999	1.0000	C		
ALL COMPANIES	B B	1250 24HR	IRL IRELAND	EUR	01-JAN-2006		999999	2.0000	D		
ALL COMPANIES	B B	1250 24HR	IRL IRELAND	EUR	01-JAN-2006		999999	3.0000	R		
ALL COMPANIES	B B	1250 24HR	IRL IRELAND	EUR	01-JAN-2006		999999	50.0000			

5.5.2. Mileage/Kilometres

- Go to *Reference > Reference M-R > Mileage*.
- Enter the **Company Code** or click  to select from the LOVs.
- Click  to execute the query.

The screenshot below is for illustrative purposes only.

Kilometres Maintenance

Search

5.5.4. Vat Rates

Go to *Reference > Reference S-Z > VAT Rate*.

The screenshot below is for illustrative purposes only.

The screenshot shows a software window titled "VAT Code Rate Maintenance". Inside, there is a table with the following data:

VAT Code	Description	VAT Rate	Date Effective
1	VAT RATE 21	21.0000	01-APR-2019
2	VAT RATE 11	11.0000	01-APR-2017

5.6. Prepare P11D & P11D(b)

Once the Final Expense Run and Year End Rollover steps are complete, you can process the P11D information.

Note:

- For further details on the P11D process, refer to the [P11D User Guide](#).
- If you are Payrolling Benefits, ensure you complete the Payroll Year End before processing your P11D.

For sites who need to generate a P11d(b) only, please ensure to review the following knowledge article: <https://accessgroup.my.site.com/Support/s/article/PeopleXD-Expense-UK-Generate-P11D-B-XML-file-only>

The following table provides technical information for each process:

Prepare P11D	Tables
Load/compile/insert/update P11D details  Note: Once the new legislative rates and cash equivalent values are in place, you can no longer compile P11D data. All changes from this point must be made manually.	Three tables used: • emp_pay_eoy (Payroll table dependency). • P11d_employee_details_temp (load table) • P11d_employee_details
Generate P11D details.	Populates three tables: • P11d_header, • P11d_detail, • P11d_summary (these form the basis of P11D paper/XML file/ and P11D(b).
Review and verify P11D details are correct	

5.7. Load Car BIK Data

Once the Cash Equivalent values are calculated, your organisation can extract this information for loading into your Payroll environment for BIK processing using CoreBI/Insight views.

Note the following points:

- Car BIK records can be manually input or uploaded into Payroll via a *Load BIK File*.
- You can extract vehicle records and data elements from the *Car Administration Centre* using CoreBI/Insight.
- Format the data to be compliant with the data load file format.
- Review and ensure data is processing correctly for the first Payroll of the year.

5.8. Operational Rules

Note the following points:

- All Expense Runs for the year must be completed before the Year End Rollover is run.
- Performing a Year End Rollover without completing the Expense Runs causes a system failure.
- P11D – The Payroll Year End update needs to be completed before the P11D compile can take place.

Note:

Once the new Legislative Rates and Vehicle Benefit Charges are in place, you can no longer compile P11D data. All changes from this point must be made manually.

6. Payroll Car Benefits Configuration

Note:

If intending to Payroll Benefits, including Vehicle BIK, then you must register your intention to do so with HMRC before to the start of the new tax year.

The following configuration is required if you intend to payroll car benefits.

6.1. Configure RTI Parameters

By default, PeopleXD assumes vehicles details are **not** being returned via Payroll. If you intend to Payroll Vehicle Benefits, you must enable the *Return Car Details From Payroll* indicator.

To do this:

1. Go to *Settings > General*.
2. Click **RTI**.

The screenshot shows the 'Redundancy' configuration interface. At the top, there are three input fields: 'Max Redundancy Rate' with the value 475, 'Max Redundancy Weeks' with the value 20, and 'Max Redundancy Years'. Below these fields is a row of six blue buttons: 'Average Pay/Pay Days', 'Redundancy', 'Statutory Recovery', 'Auto Enrolment', 'RTI' (which is highlighted with a red rectangular box), and 'Other'. At the bottom right of the interface is a green 'Save' button.

3. Enable the **Return Car Details from Payroll** indicator.
4. Enter a **Car Audit Start Date**. This is the date from which the system starts auditing changes made to the Car BIK details in the *Car Administration Centre* for RTI purposes.
 - This date should not be changed as part of your year end procedure.

Note:

Before this date, any changes to the Car BIK details are not reported to HMRC via the RTI FPS.

Any changes to the Car BIK details **on or after** this date are reported to HMRC via the RTI FPS.

5. Enable the **Car Portal Admin Centre On** indicator if you use the *Car Portal Admin Centre* for Payrolling car benefits.
6. Click **Save**.
7. Select **Payment Pay Codes** from the drop-down *Select Detail* menu.
8. Enable the **BIK Car Pay Code** indicator to identify the BIK Car Pay Codes.

9. Click **Save**.

6.1.1. Configure RTI Return per Vehicle

Note:

When using the *Car Administration Centre*, you have the option not to return a Company Car on the Full Payment Submission (FPS).

An indicator is available through the *Car Administration Centre*.

To enable/disable the *Return Record on RTI* indicator:

1. Navigate to the *Car Administration Centre*.
2. Search for the Car to update and expand the relevant **3-dot menu**.
3. Click **Additional Details**.

7. Frequently Asked Questions:

Question: What happens if *Expense Claims* are entered for the following year before the *Year End Rollover* took place for the current year?

Answer:

There are several scenarios here:

1. If the *Expense Run* is complete, then information will have been processed in that tax year. Proceed with your *Year End Rollover*.
2. If the *Expense Claims* have been processed, but the *Expense Run* is not complete, you can reverse the *Expense Claims* status. Once reversed, the *Year End Rollover* can occur, allowing the *Expense Run* process to proceed in the correct year.
3. If *Expense Claims* are created but have a status of "new", "submitted", or "approved" then it is perfectly acceptable to complete the *Year End Rollover* and then proceed with the *Expense Run* process.
4. If *Expense Claims* are created for the new tax year, and still have a status of "new", "submitted", or "approved", then it is okay to complete the *Expense Run*, and then run your *Year End Rollover*.

For example, if *Expense Claims* are recorded with 2021 dates and have the status of "new", "submitted", or "approved", then the *Year End Rollover* for 2020 can take place without affecting the 2021 transactions.

Question: What happens if *Claimants* have recorded *Mileage Claims* for 2020 after the *Year End Rollover* for 2020 has taken place, and *Expense Runs* are processed for 2021?

Answer:

In the case of *Mileage Claims*, the trip date will be used to determine the year of examination. When the trip date is 2020, the *Mileage Thresholds* and *Rates* for 2020 are examined and the same year's cumulative totals.
