1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide an overview of the Absence Cut Off Feature in PeopleXD Payroll.

This includes:

- What the Absence Cut Off is.
- How to enable the Absence Cut Off Feature.
- Absence Cut Off on the Payroll Dashboard.

1.2. What is Absence Cut Off

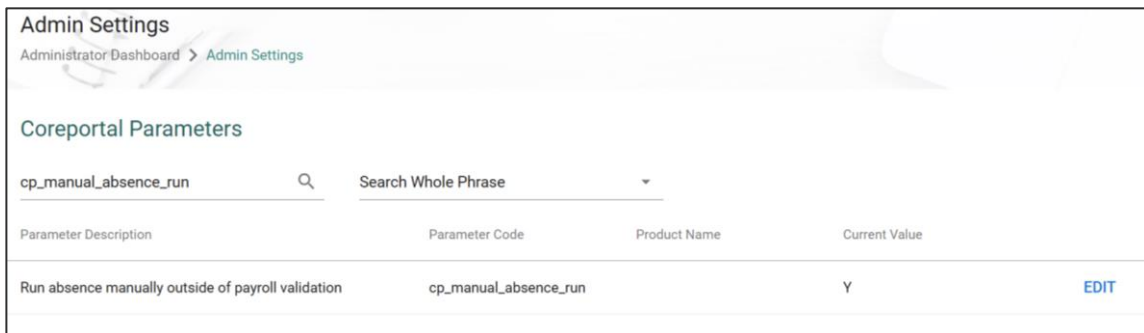

This feature is an enhancement that has been requested by many of our payroll clients who input absences through WFM. When a payroll administrator runs the Payroll Validation, any absences that have been recorded in WFM will be brought through to payroll. This feature allows the Payroll Validation to be run without bringing through the WFM absences, thus giving the payroll administrator more control over the payroll figures and report.

2. Quick Settings and Configuration

Note 1: This development is currently behind a feature flag which means it needs to be turned on in your UAT and LIVE by Access Engineering. (Flag: payroll-absence-validation).

To enable Absence Cut Off:

1. Go to the Administrator Dashboard > Site Manager > Admin Settings.
2. Search for **cp_manual_absence_run**.
3. Click **Edit**.
4. Update the **value to 'Y'**.
5. Click **OK**.

The screenshot shows the 'Admin Settings' page with a breadcrumb trail 'Administrator Dashboard > Admin Settings'. Under the 'Coreportal Parameters' section, there is a search bar containing 'cp_manual_absence_run' and a dropdown menu set to 'Search Whole Phrase'. Below this is a table with the following data:

Parameter Description	Parameter Code	Product Name	Current Value	
Run absence manually outside of payroll validation	cp_manual_absence_run		Y	EDIT

3. Payroll Dashboard Changes

3.1. Payroll Dashboard Changes

The feature is controlled from the payroll dashboard. There is an indicator displayed in the 'Mode' column that shows 'WFM ABSENCE' as Green or Red.

Manage Payroll										TASKS
Pay Groups	Current Period	Key Observati...	Stage	Payroll Completion	Joiners	Leavers	Rejoiners	Mode	Cutoff Date	
1 - Monthly Payroll (Uk) 1	Aug-2021 202121	0	Last Step Payroll Validation Date run 29/11/21 11:21		6	0	0	WFM Ab...		PROCESS ...
10 - Irish Monthly 10	Aug-2021 202135	0	Last Step Salaries & Allowanc... Date run 13/01/24 08:31		0	0	0	WFM Ab...		PROCESS ...
1122 Monthly Payroll (Ireland) 1122	Oct-2020 202044	0	Ready to run Salaries & Allow...		0	0	0	WFM Ab...		PROCESS ...
2021 - Irish Monthly 2021	Jul-2021 202131	0	Last Step Salaries & Allowanc... Date run 09/01/24 12:25		0	0	0	WFM Ab...		PROCESS ...

Green indicates that the last time the Validation was run, the absences were included. If the Validation is run from the Process Payroll screen, absences will be included. Red indicates that the last time the Validation was run, the absences were NOT included. If the Validation is run from the Process Payroll screen, absences will NOT be included.

From the 3-dot menu on the pay group, are options to change the status, to 'Disable WFM Absence' or 'Enable WFM Absence'. The Default at the beginning of each payroll period is that absences are included in the Validation run.

Disable WFM Absence

4. Single Processing with Absence Cut Off

When the Absence Cut-Off feature is enabled, you'll see a new screen during single validation runs. The toggle automatically matches your pay group's WFM absence status setting. You can then choose whether to include or exclude absences for that specific validation.

5. FAQ's

Can I cut off the payroll from a certain date?

- This development is controlled by when you run the absence, so is not date driven.

Can I change my mind once I've stop including Absences in the validation for a period?

- Yes, you can re-include absences in the validation and bring these through to payroll.

Does this impact on absences input by payroll?

- No, this enhancement is focused on WFM absences.

6. Grant Access to the Screens

6.1. Menu Options Required

To access the Absence Cut Off screens and functionality, users require the following menu options:

Menu Option	Menu ID	System
Update paygroup parameter	WS_PAYROLL_MENU.PATCH_PAYGROUP_PARAMETER	Web Services
