Commented [DL1]: When publishing v1.0 I think the Details should read:

"Published to CoreHR University.
This guide is a revision and merge of all user guide previously shared in 2018/2019 for PAYE Modernisation."

PAYE Modernisation (Back Office) - User Guide

Version	Date	Author	Details
2.2	23 rd Mar 2026	Brian O'Keeffe	Amendments to section 6.5 Managing Overpayments/Recoupments

1. PAYE Modernisation Overview

1.1. Purpose of the Section

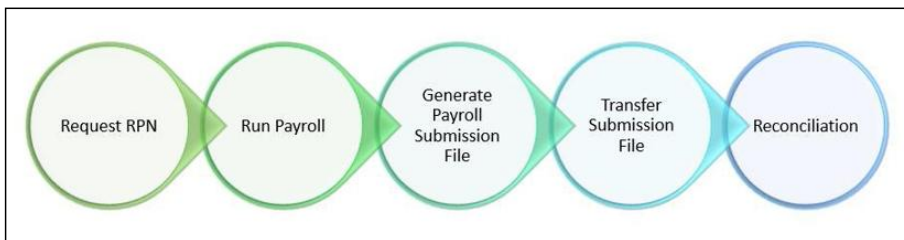

Since January 2019, the introduction of PAYE Modernisation requires real time reporting to Revenue. The purpose of this document is to provide guidance on all of the steps involved in this process.

1.1.1. Real Time Reporting to Revenue

Real time reporting requires employers to submit the details of each employee's pay to Revenue on or before each payday.

1.2. Summary of the Payroll Process

The below illustration outlines the steps involved in the real time reporting process and the sequence to follow:

Step 1: Request Revenue Payroll Notification (RPN)

The Revenue Payroll Notification (RPN) provides you with the necessary information to deduct the correct Tax, USC, and LPT from the employee.

Below are some points to note about the request RPN process:

- Since 1st January 2019, before every payroll run an employer starts by requesting the latest RPN for all employees i.e. any changes since the last payroll run. PeopleXD makes this request directly to Revenue.
- Revenue receives the employer's request and automatically sends the updated RPN to the employer in PeopleXD.

Commented [DL2]: This entire section would need to be rewritten.

This should basically just provide:

- An intro to the guide
- Real-time reporting to Revenue
- How CoreHR Integrates with Revenue: Summary of the touch points e.g. RPNs, submission files etc a process flow might be useful for this.

This should be a briefer version of the content of section 1.2 that includes hyperlinks to jump to the relevant related sections with the guide.

Not needed

Anything under sections 1.1.1, 1.1.2, 1.1.3

PAYE Modernisation (Back Office) - User Guide

- An RPN will not be available where you don't hold the employee's PPSN or the employee is not registered for tax purposes. For example, where the employee has not registered his/her first employment in Ireland online using the Jobs and Pension Service (MyAccount).

There are two steps in this process:

- Retrieve RPN for Existing Employees
- Retrieve New Employee RPN.

For further details on the retrieve, RPN process see section [2. Managing the RPN Process](#)

Note:

From 01st January 2020, you can also "Retrieve RPN by PPSN" to bring back all RPN notifications that exist for an Employment ID and PPSN combination. Use this option if revenue is returning a cessation date on an employee's active employment. See section [2.2.5. Retrieve RPNs by PPSN.](#)

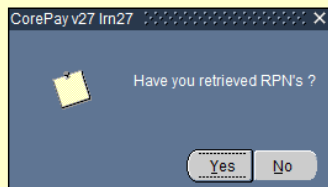

Commented [DB3]:

Step 2: Run Payroll

After you receive an updated RPN, you may start your payroll process.

Notes:

- PeopleXD does not allow you to move past the *Payroll Validation* stage of your payroll process if you have not transferred your Payroll Submission File for the previous payroll period.
- A warning message will appear – 'WARNING ALL PAYE Modernisation submission files for this Pay Group need to be transferred and accepted before the validation is run**!!'
- This message does not appear if the pay group is marked as exempt.
- Before starting the *Payroll Validation* task, PeopleXD asks you to confirm that you have retrieved your RPN's:

Commented [DB4]: On next note: how-ever if a pay group is exempt it can be checked and therefore this validation does not apply. NB only a pay group that is complete exempt from PAYE mod should have this option checked.

Step 3: Generate Payroll Submission File

Submit a Payroll Submission file to *Revenue* for any payment made to an employee on or before the payment date.

Generate a Payroll Submission File **after the *Complete Update*** step in your payroll process.

The Payroll Submission File includes the following;

- Amount of Pay.
- Payment Date.
- Amount of Income Tax.
- USC
- LPT
- Pay Period.

 Note:

Further details on how to generate *Normal Submission* files and *Correction Submission* files is available in section [3. Generate the Payroll Submission File](#).

Step 4: Transfer the Payroll Submission File

Transfer the Payroll Submission File to Revenue **after the *Complete Update*** step in your payroll process and **on/before the payment date**.

Complete this step for every pay group. The high-level steps for this process are outlined below:

1. Transfer Submission File

Transfer the *Original Submission* file to Revenue.

2. Revenue Acknowledges / Rejects File.

Revenue validates the file, and if they find any issues with the data, they notify this to Payroll via the *Submission Status* and provide a report of any exceptions.

Depending on the status, additional steps may be required:

- ***Complete All Valid Payslips*** - all records are in good order and no further actions required.
- ***Complete Invalid Payslips*** - Some employee records have invalid payslips. If this occurs:

PAYE Modernisation (Back Office) - User Guide

- i. Resolve all invalid payslips on PeopleXD.
- ii. Generate a new Submission file for those employees.
- iii. Transfer the new Submission file to Revenue.

Only employees whose payslips are rejected appear on the report. Resolve these errors, generate a new file (as per step 3) and begin the transfer process [again](#). The next Submission file only transfers employees whose records were previously rejected.

Commented [DB5]: Note: If a payslip (i.e. an individual employee) is rejected but the other employees are successfully filed users will see a message re some invalid payslips. only those EEs rejected are resent.

- **Revenue Checks the Submission**

This is an automated reconciliation request, requesting totals at a pay group level.

The *Check Payroll Submission* request submitted by an employer is requesting the totals for Income Tax, PRSI, USC, and LPT for a specific payroll submission.

- **Check Payroll Run Requests** (Optional)

This is a reconciliation request, requesting totals but at the company level. It includes totals from all submission files for all pay groups which made up the payroll run.

Although this is not a mandatory process, it is a suggested standard process to run this monthly,

after all submission files have been transferred and accepted by Revenue.

The response contains information on the individual submissions that made up the payroll run, including the totals of Income Tax, PRSI, USC, and LPT. Summary details on each of the individual submission items that make up the payroll run are shown on the *Check Payroll Run Response*. Payroll Run Number identifies the payroll run for which the employer wishes to request information.

 Note:

Further details on the Generate Original Submission and Correction Submission files is available in section [3. Generate the Payroll Submission Files](#).

2. Managing the RPN Process

2.1. Overview

2.1.1. Purpose of this Section

This section guides how to manage the RPN (Revenue Payroll Notification) process. This includes:

- Employment IDs for employees.
- Retrieving RPNs for employees before every payroll run.
- Review and resolving RPN exceptions.
- Updating employee RPN details.
- RPN cleardown.

Commented [DL6]: Would need to be reworded i.e. This section provides guidance on how to manage the RPNs (Revenue Payroll Notification) process for employee, including:

Commented [B07R6]:

2.1.2. What is the RPN Process?

RPN stands for "Revenue Payroll Notification" and includes the information required to deduct the correct Tax, USC, and LPT from the employee.

Each payroll run requires you to:

- Request the most up to date RPNs for existing employees from Revenue through a Request RPN option.
- Request a new RPN for new employees that are commencing employment and being paid for the first time.

Revenue receives the employer's request and sends the updated RPN to the employer electronically.

Go to *CorePay > Employee > ROS Interfaces > Load Employee PAYE Certificates*.

Updated RPNs are made available via this process. Any of the following may trigger updates:

- Revenue updates, e.g. initial annual RPN creation.
- Employee updates, e.g. PAYE services.
- Employer updates, e.g. payroll submission.

Note:

The RPN gets applied and validated to an Employee's record by the Payroll Validation task (PAY140).

Note:

If an RPN request is not made to Revenue for a new employee as part of onboarding, then the employee will be on an emergency basis.

- Emergency tax continues to apply where an employee does not have a PPSN or is working in the state for the first time.

Once the employee produces a PPSN number. An RPN can be requested by:

- The Employee via MyAccount.
- The Company via PeopleXD "Retrieve New Employee RPN process".

2.1.3. What is an Employment ID?

The Employment ID is used by Revenue to identify an employee's unique employment with a company. This is automatically created by PeopleXD when an employee joins. An Employment ID can only be generated where an employee has a PPSN.

If an employee has multiple employments with a company, they have unique Employment IDs per employment, e.g.

- If an employee leaves and rejoins.
- If an employee has multiple active employments.

Note:

- The Employment ID is set up on PeopleXD when the employee joins and is reported to Revenue when the RPN is first retrieved for the employee, e.g. via the Retrieve New Employee RPN process. The employees' Employment ID is the same as their Employee Number.
- A new Employment ID is set up for rehires. The rehires Employment ID is the Employee Number, followed by the rejoin period.

Commented [DB8]: We should expand on note to clarify employment ID auto created by core on employee set up and rejoin and format used for it. (Note: unless DM in as format historically used)

Commented [DL9]: I think this can be removed

2.2. Retrieve Employee RPNs

The recommended process for retrieving RPNs is as follows:

1. Retrieve Employee RPN: This retrieves any changes to RPNs, since the last request, for existing employees.
2. Retrieve Employee New RPN: This sends a request to Revenue for RPNs for new employees taken into the payroll this period.

You can retrieve Employee RPN's in one of the following:

1. Retrieve Employee RPNs by company (existing employees).
2. Retrieve Employee RPNs by employee (existing employees).
3. Retrieve New Employee RPNs by company.
4. Retrieve New Employee RPNs by employee.

New step added for 2020 payrolls:

1. Retrieve PRN by PPSN by employee.

To Retrieve Employee RPNs:

Go to *CorePay > Employee > ROS Interface > Load Employee PAYE Certificates*.

Load Employee PAYE/RPN Employee Certificates

Load Employee RPN Certificates

☒ Retrieve Employee RPN
☐ Print Revenue Reports
☐ Maintain Employee RPN
☐ Update RPN Details

Company Reference

Company Reference

Employee Reference

Company Date Last Updated ☐ Schedule RPN Retrieval

Note:

The duration of the retrieval process varies depending on the volume of records being retrieved.

2.2.1. **Retrieve Employee RPNs by Company**

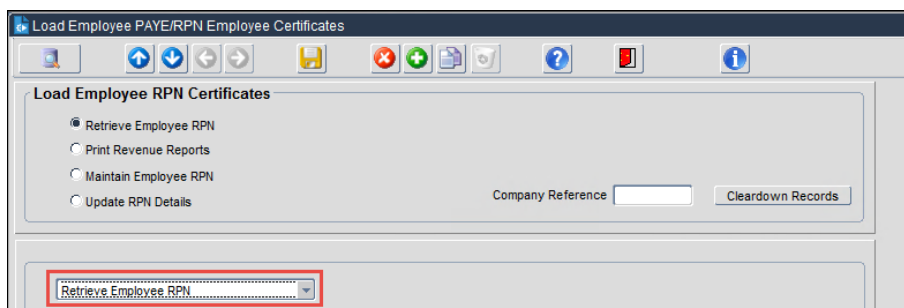

Use this option to retrieve the latest RPNs for all existing employees related to a company number or tax registration number. This picks up any tax cert changes for employees since the date it was last run, i.e. changes since the last payroll.

Note:

The option "Retrieve Employee RPN" is a GET type request to Revenue. This request uses the company's tax registration number (that is why, even when we retrieve by company number, if the company is sharing the tax registration across several companies, we get a larger number of RPN's related to the actual employees in that particular company).

To retrieve RPNs by Company for existing employees:

1. Select *Retrieve Employee RPN* from the drop-down menu.

2. Enter a Company Reference number in the *Company Reference* field and hit *Enter/Tab*.
3. Click on **Browse** and select a location to save your file.

4. Click **OK**.
5. The RPN report is received from Revenue.
 - An excel file version of this report sends to the selected file location [2.2.7 The RPN Report from Revenue](#).
 - Up to date, employee RPN details are available to view on the [2.2.13 Maintain Employee P2C / RPN screen](#).

Note:

- The *Date Last Updated* field automatically updates to show the date that RPNs were last retrieved for this company. Only RPN changes from this date will be returned.
- If this date field is left blank, this retrieves RPNs for all employees in the company, including those where RPN details have not changed since the last retrieval.

2.2.2. Retrieve Employee RPNs by Employee (existing employees)

Use this option to retrieve the latest RPN for an individual employee. Run this to pick up any tax cert changes since the date retrieve RPN was last run, i.e. changes since the previous payroll.

Note:

Use the option "Retrieve Employee RPN" by entering an employee number. This is still a GET type request to revenue, but besides the company tax number, we include on the request, the prsi_number concatenated with smart_paye_empno (basically the PRSI number and the employment id, i.e. 4436686G-000146).

To retrieve an RPN for an existing employee:

1. Select *Retrieve Employee RPN* from the drop-down menu.

Commented [DB10]: Is this right re use where no PPS Number? If so can also be used where an employee has a PPS Number as well

PAYE Modernisation (Back Office) - User Guide

2. Enter a Company Reference number in the *Company Reference* field and hit *Enter/Tab*.
3. Enter an Employee Reference number in the *Employee Reference* field and hit *Enter/Tab*.
4. Click on **Browse** and select a location to save your file.

The screenshot shows a 'Retrieve Employee RPN' dialog box. It contains the following fields and controls:

- Retrieve Employee RPN** (dropdown menu)
- Company Reference**: Text box containing '1236'
- Employee Reference**: Text box containing '2511361'
- Company Date Last Updated**: Text box (empty)
- Schedule RPN Retrieval**: Checkbox (unchecked)
- Browse**: Button (highlighted with a red box)
- OK**: Button (highlighted with a red arrow)
- Cancel**: Button

5. Click **OK**.
6. The RPN report is received from Revenue.
 - o An excel file version of this report sends to the selected file location [2.2.7 The RPN Report from Revenue](#).
 - o Up to date, employee RPN details are available to view on the [2.2.15 Maintain Employee P2C / RPN screen](#).

Note:

When retrieving RPNs at employee level, the *Company Date Last Updated* is unavailable.

2.2.3. Retrieve New Employee RPNs by Company

Use this option to send a request to Revenue for RPNs for new employees taken into the payroll this period. Note the following points about retrieving RPNs for New Employees:

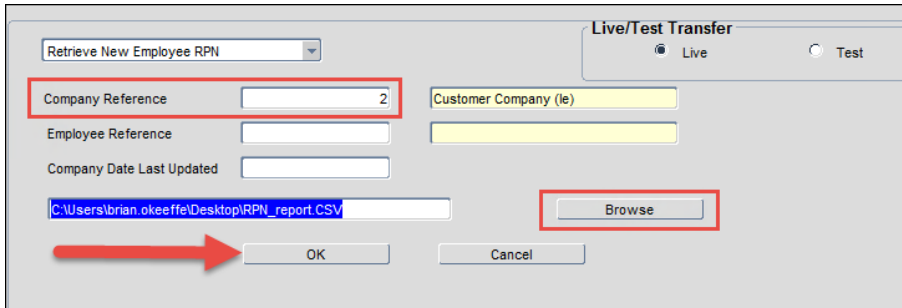

1. If the employee has registered with Revenue, then the PeopleXD retrieves the RPN.
2. If the employee has not registered with Revenue, then this process requests an RPN for them.
3. The employee's employment can also be started with the start date on the Payment Submission file, which will subsequently trigger a new RPN.

Note:

The option "Retrieve New Employee RPN" is a POST type request to revenue and when done at company level, the company tax number is included in the request. Also, the request contains all rejoiners along with their PPSN, Employment ID, first name, and last name of employees requesting the RPN.

To retrieve an RPN for new employees:

1. Select **Retrieve New Employee RPN** from the drop-down menu.
2. Enter a **Company Reference** number and press **Enter** or **Tab**.
3. Click on **Browse** and select a location to save your file.

4. Click **OK**.
5. The RPN report returns from Revenue.
 - a. An excel file version of this report sends to the selected file location [2.2.7 The RPN Report from Revenue](#).
 - b. Up to date, employee RPN details are available to view on the [2.2.15 Maintain Employee P2C / RPN screen](#).

Note:

If you opt to **Retrieve New Employee RPN**, but there are no new employees at company level, then the following message is included in the response file: 'No Re-joiner Employee in the Company'.

2.2.4. Retrieve New Employee RPNs by Employee

Use this option to send an RPN request to Revenue for an individual employee taken into the payroll this period.

Note:

Use this option "Retrieve New Employee RPN" by entering an employee number. This is also a POST type request containing the company tax number in the header, but the difference is in the body of this request, which will include only the employee selected. This can be for an existing employee, and the same as for the company level, the body will include PPSN, Employment ID, first name, and last name of employee selected.

To retrieve an RPN for a new employee:

1. Select **Retrieve New Employee RPN** from the drop-down menu.
2. Enter a **Company Reference** number and press **Enter** or **Tab**.
3. Enter an **Employee Reference** number and press **Enter** or **Tab**.

The screenshot shows a software dialog box titled "Live/Test Transfer". It has two radio buttons, "Live" (selected) and "Test". Below the title bar, there is a dropdown menu set to "Retrieve New Employee RPN". The form contains several input fields: "Company Reference" with the value "2", "Employee Reference" with the value "000207", "Customer Company (le)" with the value "Burke Wyatt", and "Company Date Last Updated" which is empty. Below these is a text field containing the file path "C:\Users\brian.okeeffe\Desktop\RPN_report.CSV" and a "Browse" button. At the bottom of the dialog are "OK" and "Cancel" buttons. A red arrow points to the "OK" button.

4. Click **OK**.
5. The RPN report returns from Revenue.
 - o An excel file version of this report sends to the selected file location [2.2.7 The RPN Report from Revenue](#).
 - o Up to date, employee RPN details are available to view on the [2.2.15 Maintain Employee P2C / RPN screen](#).

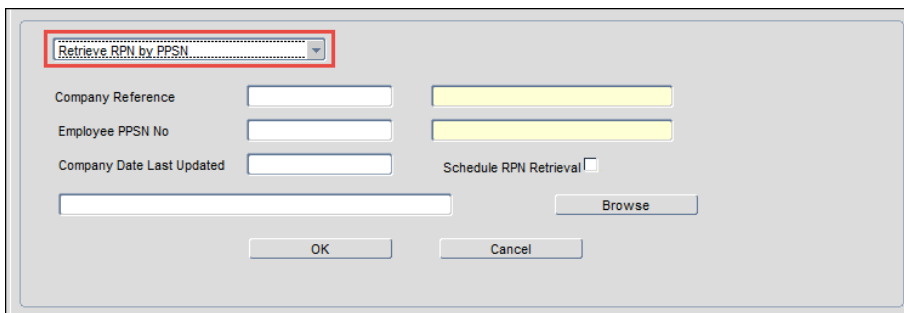

Note:

1. It is recommended that RPNs are retrieved at company level. However, if the return response shows employees with no RPNs, then the next step would be to retrieve RPNs for new employees.
2. Retrieving RPNs at employee level – *Company Last Updated* is unavailable.

2.2.5. Retrieve RPNs by PPSN

The following option was introduced as part of the 2019 year end delivery.

A new call option “Retrieve RPN by PPSN” has been added to the *CorePay > Employee > ROS Interfaces > Load Employee PAYE Certificates Screen*.

The screenshot shows a software interface for loading employee PAYE certificates. At the top, a dropdown menu is open, showing the option 'Retrieve RPN by PPSN' which is highlighted with a red box. Below the dropdown, there are three input fields: 'Company Reference', 'Employee PPSN No', and 'Company Date Last Updated'. To the right of these fields is a checkbox labeled 'Schedule RPN Retrieval'. Below the input fields is a 'Browse' button. At the bottom of the form are 'OK' and 'Cancel' buttons.

The 'Retrieve RPN by PPSN' allows you to bring back all RPN notifications that exist for an Employment ID and PPSN combination. Use this option if revenue is returning a cessation date on an employee's active employment, see section [2.2.8. Employment Cessation Date on RPN](#).

One possible reason for a cessation date on an employee's active employment is the employee may not have been rejoined correctly; therefore, no new Employment ID was created. If you identify an issue with the RPN retrieved, you need to:

1. If employment already exists for the PPSN and Employment ID combination:
2. Contact Revenue to query why a current employee's RPN has a cessation date, i.e. was it ended by the employee or employer.

PAYE Modernisation (Back Office) - User Guide

3. Contact PeopleXD to update the Employment ID. The Employment ID cannot be manually updated.

The below message appears if you attempt to 'Retrieve New Employee RPN' for a PPSN and Employment ID combination that already exists.

PAY529A		CorePay 24 0. Live		User :	Page : 1 Of 1
Version :24.0		RPN Validation Report		Date : 20-DEC-2019 09:17:31	
<u>Employee PPSN</u>	<u>Employment ID</u>	<u>Code</u>	<u>Path</u>	<u>Description</u>	
		4003	EmployeeDetails.EmployeeID[0].PPSN	Invalid PPSN and Employment ID combination, employment already exists for specified details.	
----- End of Report -----					

1. If an employment doesn't exist for the PPSN and Employment ID combination.
2. Create a new RPN employment by using the "Retrieve New Employee RPN" see section [2.2.4. Retrieve New Employee RPNs by Employee.](#)

When the "Retrieve Employee New RPN" is called it pulls all details into *CorePay > Employee > Cumulatives > View Tax Certs* screen to display. Once called, you can either:

- o Cleardown the RPN records see section [2.2.17. Cleardown Records](#) Or
- o Update Employee RPN Details, see section [2.2.15. Update Employee RPN Details.](#)

To Retrieve RPN by PPSN:

1. Go to *CorePay > Employee > ROS Interface > Load Employee PAYE Certificates.*
2. Select **Retrieve Employee RPN by PPSN** from the drop-down menu.

Retrieve RPN by PPSN

Company Reference: 7281 | 7281 Carroll Carroll

Employee PPSN No: 7010773KA | Nolan Jany

Company Date Last Updated: | Schedule RPN Retrieval ☐

C:\Users\david.shorley\Desktop\7281_RPN_report.CSV | Browse

OK Cancel

3. Enter a **Company Reference** number and press **Enter** or **Tab**.
4. Enter the **Employee PPSN** and press **Enter** or **Tab**.
5. Click on **Browse** and select a location to save your file.
6. Click **OK**.
7. The RPN report returns from Revenue.
 - o An excel file version of this report sends to the selected file location [2.2.7 The RPN Report from Revenue](#).
 - o Up to date, employee RPN details are available to view on the [2.2.15 Maintain Employee P2C / RPN screen](#).

2.2.6. Retrieving RPNs for Employees with a Future Start Date

The following change was made in June 2019.

 Note:

This change was made based on Revenue feedback that setting up the employment too far in advance can cause issues for allocation of employee credits.

The 'Retrieve New Employee RPN' process now only sends requests for employees who match the below criteria:

1. New Starters / Rehires.
2. Have a start date in the current payroll period. The employee's pay group determines the payroll period.

Previously, the RPN request was sent for all new employees set up in payroll, including employees with a future start date.

Commented [DB11]: This change was made based on Revenue feedback that setting up the employment too far in advance can cause issues for allocation of employee credits.

On the reminder note: except for the monthly pay group which is always based off calendar

 Examples:

1. **Monthly Payroll:** If an employee is set up on June's payroll, with a start date in July, the employee is not included in the 'Retrieve New Employee RPN' request for June. The employee is instead included in July's 'Retrieve New Employee RPN' request.
2. **Reminder:** Monthly pay groups period end will always be the last day of the month regardless of what dates are on the payroll calendar.
3. **Weekly Payroll:** If an employee is set up with a future week start date, the employee is not included in the "Retrieve New Employee RPN" request for the current week. The employee is instead included in the "Retrieve New Employee RPN" request, during that future week.
4. **Reminder:** The week end date for weekly payroll is determined by the "Company Payroll Calendar" plus/minus any offset days set at pay group level.

2.2.7. The RPN Report from Revenue

An excel file version of this is made available to view at the selected file location.

 Note:

There are limitations with the amount of data that will fit on the PDF report. As such, RPN information is output to an excel file and can be viewed at the location specified at the browse location. This is available to report on in CoreBI/Insight view 'Tax Certs' (PABI_Tax_Cert) see section [2.3 Reporting on RPNs in Insight/CoreBI](#).

PAYE Modernisation (Back Office) - User Guide

Up to date, employee RPN details are available to view on the Maintain Employee RPN screen.

See section [2.2.14. Maintain Employee RPN Details](#)

2.2.8. Employment Cessation Date on RPN

The following change was introduced as part of the 2019 year end delivery:

Following a Revenue instruction, the RPN now includes the date an employee ceases employment. This field populates when the employment, to which the RPN relates, is ceased by either the employer or employee. PeopleXD uses this field, when making a post-cessation payment, to distinguish between RPNs for live and ceased employments.

The cessation date allows you to:

1. Differentiate between RPNs for live employments and ceased employments.
2. Identify potential invalid, duplicate RPNs.
3. Determine if an employee already has an active registered employment.
4. Act before registering a second employment by mistake (either by a new RPN call or Payroll Submission).

PAYE Modernisation (Back Office) - User Guide

It may not always be possible to identify cessations filed manually via ROS or other software systems. The RPN received updates on the payroll unless you delete the RPN record from the **Maintain RPN** screen.

! **Note:**

- If no active RPN is available for the employee, then retrieve a new employment RPN.
- If you believe the employee should have an active employment, use the new API call of **"RPN by PPSN number"** to search for an active employment RPNs for the employee (see **section 2.2.5.Retrieve RPN by PPSN**).

You cannot request your 2020 RPNs before 01/5 Jan 2020. If no 2020 RPN is available, CorePay

3. The RPN Exceptions Report

The RPN Exception report highlights any employment that has a ceased RPN applied.

Under the section "Employees with a Ceased RPN" this report shows the following:

- Employee Reference
- Employment ID
- PPS Number
- Employee Start Date
- Employee Re-join Date
- Employee Leave Date
- RPN Ceased Date
- A total at the end of the section summing the total number of employees.

Pay529	CorePay 27.0.8				User : COREHR	Page : 6 Of 7
Version : 27.0.8.24	Employees with Ceased RPN				Date : 03-OCT-2019 17:27:06	
Employee Reference	Employment ID	PPS Number	Employee Start Date	Employee Leave Date	Employee Re-join Date	RPN Ceased Date
2097001	2097001	7002100JA	01-JAN-18	15-FEB-19		01-DEC-20
2097002	2097002	7002101LA	01-JAN-19			01-DEC-20
Total no of Employees: 2			---End of Report---			

Review the exceptions highlighted:

Post Cessation Payment to Employees with Ceased RPN

1. If the employee left in the current tax and is receiving a post-cessation payment, then no further action is required.
2. If the employee left in a previous tax year and is receiving a post-cessation payment, then create a new one-day employment RPN.

4. BI/Insight

This cessation date field has been added to the BI/Insight view.

2.2.9. Retrieving RPNs for Rejoiners

When you rehire an employee to an organisation, there are two scenarios to consider for RPN, based on how the rejoiner is setup on PeopleXD.

Scenario	Process to Follow
Rejoin Employee with Existing Employee Number Recommended	If the employee is rehired on PeopleXD using the recommended rejoiner process: 1. This reactivates their existing employee record. 2. Records their rejoin date, i.e. their latest start date. 3. Retrieves their new RPN via the "Retrieve New Employee RPNs" process. 4. Creates a new Employment ID by adding the rejoin period to the original Employment ID.
Create a New Employee Record Not Recommended	If a new employee number is generated on PeopleXD for the returning employee, then they are treated as a new employee. 1. Creates a new employee number. 2. Retrieves their new RPN via the "Retrieve New Employee RPNs" process. 3. Creates a new Employment ID.

Commented [DB12]: latest

Commented [DB13]: includes the employee – want to be clear user has to call this step not auto same on create a new employee record

Commented [BO14R13]: I need clarification on this point

Commented [BO15R13]:

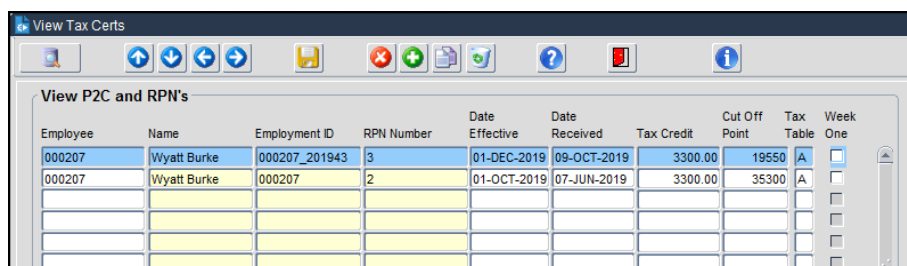

A change was made to increase this field to make the entire Employment ID visible. When an employee rejoins, the employee's Employment ID increases in length because it adds the rejoin period to the previous Employment ID.

The maximum size of employment ID is 20 characters.

PAYE Modernisation (Back Office) - User Guide

						☐			

2.2.10. Retrieving RPNs Post Cessation Payments

When an employee leaves an organisation, transferring the Payroll Submission File for the employee's last pay period notifies Revenue. Revenue updates the employee's RPN details accordingly with a cessation date.

Note:

To make a payment after leaving, you must first Temporary Rejoin the employee. See section [2.2.11. Retrieving RPNs for Temporary Rejoiners](#).

Once you process a leaver on PeopleXD, they will no longer appear on the RPN retrieval.

Post Cessation Payments:

Scenario	Process to Follow
Dormant employee who left in the current tax year	Retrieve the RPN details using the Retrieve Employee RPN option. No new request is needed as they were paid in the current tax year and Revenue returns their latest PRN details. Note: A new RPN request for a dormant employee who left during the current tax year will result in an error message <i>"Only employees who have leaving dates in a prior tax year are eligible for a new RPN. Employee [employee number] has a leave date in the current tax year"</i>.
A dormant employee who left in a previous tax year	Use the Retrieve New Employee RPN option specifying the employee number. Revenue has no RPN details for this employee for the current tax year as the employee is now dormant. No start date outputs as we do not want a new employment, only the RPN details
Dormant Pay Group where the year of Pay Group payroll period is less than current payroll year for Company	RPNs are not retrieved for any employee where their pay group is dormant. If the year of the payroll period for the pay group is 2018 and the year of the company is 2019, then the employees in this Pay Group is not processed. To retrieve an RPN for an employee in a dormant Pay Group, you would need to enter in the Employee Reference.

Retrieving RPNs for Temporary Rejoiners

To make a post cessation payment, you must first rejoin the employee. Follow the below steps:

Scenario	Process to Follow
Temp Rejoin Current Tax Year	1. Retrieve Employee RPN. 2. Enter a Company or Employee Reference. 3. The most recent Employment ID is used for the retrieval of RPN. This is not treated as a new employment. 4. If the employee receives payment after cessation, this outputs on the normal submission file with no Start and original End Date (i.e. anyone who is dormant on PeopleXD when we request a New Employee RPN will have no start date). If no RPN returns, then the employee is placed on emergency tax at the Update RPN step.
Temp Rejoin Previous Year Previous Tax Year	1. Retrieve Employee RPN. 2. Enter a <i>Company</i> or <i>Employee Reference</i>. 3. This is treated as a new employment, and a new Employment ID generates. 4. If the employee receives payment after cessation, this outputs on the normal submission file with a Start/End Date which is equal to the pay date. If no RPN returns, then the employee will be placed on emergency tax at the Update RPN step.

The employee is treated as having a new employment where the following apply:

- Temporary Rejoin or Pay Leavers is set.
- The employee left in the previous tax year
- New EmploymentID is requested for the Retrieve New Employee RPN step.
- Start and End Date on the payroll submission file equal Pay Date for this 1-day payment.
- This population of the Start and End Date inform Revenue of the 1-day employment.

2.2.11. Manual Update of Employee Tax Detail

To manually update the employee tax cert details, go to:

1. Go to CorePay > Employee > Cumulatives > Maintain Tax Details (Future).

3. Click .

Run Validation for the changes to take effect.

Note:

While the employee's tax details can be updated manually, the recommended process is to contact Revenue. Revenue will update RPNs in real time.

2.2.12. Print the RPN Exceptions Report

To print the RPN Exceptions Report.

1. Go to *CorePay > Employee > ROS Interface > Load Employee PAYE Certificates*.

The Load Employee RPN Certificates screen opens.

2. Select a Report Type "PPS Number" or "Employee Reference"

The recommended option is to select the Exception Report by *PPS Number*.

This orders the report by PPSN.

3. (Optional) Select the indicator to **Print CorePay Employees not on Revenue File**.

Enabling this indicator returns employees who do not appear on Revenue's file, e.g. the employee may not be registered with Revenue.

4. Click **OK**.

The report automatically generates and displays on the screen.

<u>Corepay 2000 Report Selection Criteria</u>	
Submitted By	: COREHR
Date	: 18-JUL-2018 11:16:12
Report I.D	: Pay529
Report Name	: Revenue P2C/RPN Exceptions
Report Type	: PPS Number

Employment ID and Total Number of RPNs are available on the Revenue Exceptions report

PAYE Modernisation (Back Office) - User Guide

Pay529	CorePay 21 dev21	User : COREHR	Page : 1 Of 5			
Version : 21.10	Employee's On Revenue File But Not On COREPAY	Date : 18-JUL-2018 11:19:29				
Employee Reference	Employment ID	PPS Number	Annual Tax Credit	Annual Cut Off	Week One	USC Exempt
		7005163CA	1650.00	34550.00	N	N
Total no of Employees: 1		End of Report				

The RPN Excepts report highlights any exceptions found by PeopleXD. Exceptions, which PeopleXD has identified in the upload process, are categorised as follows:

Exception on Report	Action Required
Employees on the Revenue File but not on CorePay	Direct all queries to Revenue.
Duplicate PPS Numbers on Revenue File	Delete the duplicate entries.
Employee References on Revenue File.	Employees on CorePay but not on Revenue File
Employees on CorePay but not on Revenue File.	As the heading states, these employees are in CorePay, but they are not on the Revenue file. This explains why the PAYE details are shown are last years. You should check with Revenue why these employees were not on the file. Also, make sure you have loaded all files received from Revenue. If paper copies have been received these records can be updated manually 2.2.12. Manual Update of Employee Tax Details

Note:

No manual PAYE entries should be made until after the option 'Update Employee PAYE Details' has completed successfully. If you make manual adjustments before you run the option *Update Employee Details*, you run the risk of having these overwritten by the Revenue file.

On the very last page of this report the following information appears:

PAYE Modernisation (Back Office) - User Guide

- Revenue PAYE Takeon Details (Based on Trailer Record)
- Revenue PAYE Takeon Details (Based on Individual Records)

These are control totals based on the data provided on the Revenue file and are for memo purposes only.

2.2.13. Maintain Employee RPN Screen

Go to *CorePay > Employee > ROS Interface > Load Employee PAYE Certificates*.

Here, you can review the latest retrieved RPN details. This screen contains:

- Employment ID
- RPN Number
- Exclusion Order
- PRSI Exemption
- PRSI Class

Field	Description	Context
Employment Id	The value of this field is the <i>EmploymentID</i> provided to Revenue by the employer when setting up the employment. If the RPN is triggered because of the employee setting up the employment via <i>MyAccount</i> or contacting Revenue, the value of this field is set to null.	Used to uniquely identify each employment for the employee.
RPN Number	The number of the RPN issued to the employer in respect of the employee.	Used in conjunction with the <i>Employee PPSN</i> to uniquely identify the instruction issued.
Exclusion Order	PAYE <i>Exclusion Orders</i> tell your employer not to deduct Income Tax or USC from your income.	This indicator is ticked when an exclusion order is in place for an employee.

Field	Description	Context
PRSI Exemption	This is ticked if an employee has been granted an exemption from paying PRSI in Ireland. This field is not included if the employee is not exempt from paying PRSI.	This appears only where DEASP carries out a review and determines that the individual should be exempt from paying PRSI in Ireland.
PRSI Class	PRSI Class	Revenue may update an employee's PRSI class via an RPN.

 Note:

All items above are view only and cannot be amended.

2.2.14. Update Employee RPN Details

Once you retrieve the RPN details from Revenue, follow this process to update the employees' records on PeopleXD with the latest information.

A report generates as part of the update to show all employee records that updated including the old and new values.

1. Go to *CorePay > Employee > ROS Interface > Load Employee PAYE Certificates*.

PAYE Modernisation (Back Office) - User Guide

Load Employee RPN Certificates

☐ Retrieve Employee RPN
☐ Print Revenue Reports
☐ Maintain Employee RPN
☒ Update RPN Details

Company Reference

This option updates the Employee's actual P2C/ RPN record with details loaded from the Revenue File. This option also produces a report showing the old and new P2C/ RPN details for Employee's whose P2C/ RPN details have changed. Once the update has completed successfully, you may also view the Employee's new P2C/ RPN details using the Enquiry screen 'View Tax Certs' or you can make amendments by using the option 'Maintain Tax Details (Future)'.

Records to be Processed 0 Records Processed 0
0% 50% 100%
Start End

2. Select *Update Employee RPN Details*.
3. Enter a Company Number.
4. Select the *Update Type*:
 - PPS
 - Employee Reference
5. Click **OK**.

Note:

The employee records on PeopleXD are updated with new RPN Details. The *Load New RPN Details* report is automatically generated at either PPS or Employee Reference level.

The following information has been added to the *Employees Updated with New P2C/RPN Details* report, for real time reporting:

- Employment Id
- Exclusion Order
- PRSI Class

PAYE Modernisation (Back Office) - User Guide

- PRSI Exempt and Exemptions Reason 'Other'
- No RPN – Employee is put on Emergency tax

Note:

Revenue has advised that PRSI Class returned on the RPN details, upon review from the DEASP, is advisory only and should not be updated to the employee record. The onus is on the employer to manually update PRSI Class until further notice.

2.2.15. View P2C/RPN Certs

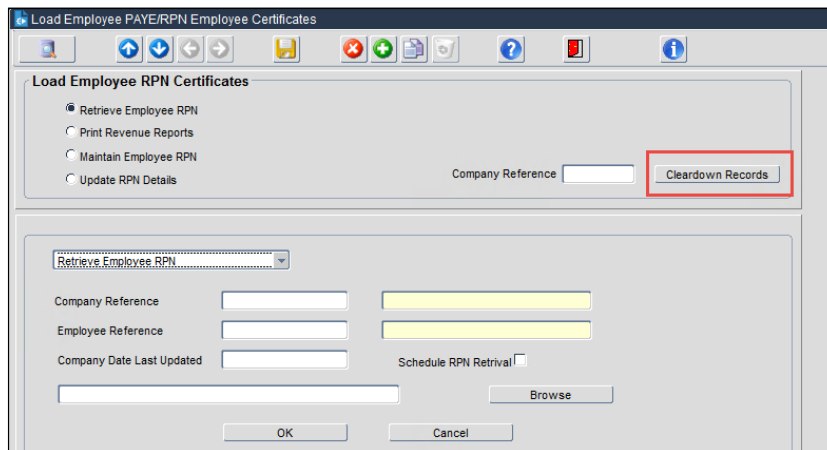

To view a historical list of RPN certs.

- Go to *Employee > Cumulatives > View Tax Certs.*
- Enter a valid Employee or click the  to add an employee.
- Click the  button.

[illegible]

2.2.16. Cleardown Records

Use the **Cleardown Records** button to clear down all returned RPN records where multiple *RPN Retrieval* requests have been run without performing the *Update RPN* process. This removes duplicates before completing the *Update RPN* process.

2.2.17. RPN Cleardown by Company

A new field has been added, as part of the 2019 year end delivery, to give you the ability to clear down the RPNs by company. Previously, the clear down RPN function cleared down RPNs for all companies.

1. Go to *CorePay > Employee > ROS Interface > Load Employee PAYE Certificate*.
- By default, the clear down is for all companies.
 - If clearing down for all companies, there is currently a prompt:
 - "This will clear down all RPNs. Are you sure you wish to continue?"

To clear down for a specific company:

2. Enter a Company Reference in the *Company Reference* field.
3. Select **Cleardown Records**.
 - A message appears "This option will clear down any loaded records from the data file for company X. Do you wish to continue..."
4. Click **OK**

2.3. Reporting on RPNs in Insight / CoreBI

2.3.1. Insight

2.3.1.1. Tax Certs (PABI Tax Cert)

Note:

A list of RPNs will be output to the Insight View called *Tax Certs*.

The following view allows you to report on RPN details for employees:

Business Area: Core Pay

View Name: Tax Certs

Create Report Wizard

1 Report Type

2 Select Area

3 Select Columns

What do you want to report on?

Select the relevant area you wish to report on from the list below

Core Hesa Core Health And Safety Core Medical Welfare

Core Pay Core Pension Core Personnel

tax

View Name

Tax Certs

Core Pay

The following fields in the Tax Cert View are particularly relevant to reporting on RPNs:

- RPN Number
- Date of Cert
- Employment ID
- RSI Number
- Old RSI Number
- Employer Name
- Reference1
- PRSI Exempt

PAYE Modernisation (Back Office) - User Guide

- PRSI Class
- Exempt Ind
- Agent TAIN
- Cessation Date
- Payroll Period

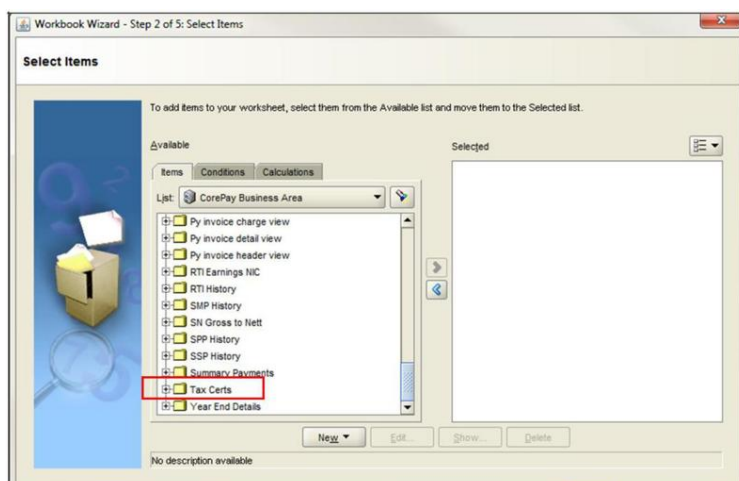

2.3.2. BI Discoverer

2.3.2.1. Tax Certs (PABI Tax Cert)

The following view allows you to report on RPN details for the employee:

Business Area: Core Pay

View Name: Tax Certs

2.4. RPN FAQs

2.4.1. Retrieving First RPNs of the Tax Year

At the start of the tax year, when the Retrieve Employee RPN process is run, this includes all employees. For subsequent payrolls, you have the option to retrieve amended RPNs by adjusting the date last retrieved field.

Commented [DB16]: This is done using the date last retrieved field

2.4.2. Employee Has No RPN

If there is no RPN available for an employee (this would be the case where an employee has not registered their PPS Number on MyAccount), then the employee is put on emergency tax at the *Update Employee RPN* step. If the employee has an exemption order, then this remains in place until a new RPN instruction is received.

Commented [DB17]: Unless the employee has an exemption order in which case that remains in place until a new RPN instruction is sent

2.4.3. Tax Exemptions on RPNs

Exemption Order: An employee with an exemption order will revert to an emergency basis for tax and USC until a 2020 RPN is retrieved.

See *CorePay > Employee > Maintain Employee Details*.

Exclusion Order: Where an employee has an exclusion order applied, continue to apply the exclusion order until you receive a new RPN for the employee. If the employee is on a "single year" tax cert exclusion order, they should revert to the emergency basic until a 2020 RPN is applied.

2.4.4. PRSI Class Updates via RPN Retrieval

Revenue has advised that PRSI Class returned on the RPN details, upon review from the DEASP, is advisory only and should not be updated to the employee record. The onus is on the employer to manually update PRSI Class until further notice.

2.4.5. PRSI Exempt Updates via RPN Retrieval

PRSI Exemption can be on the RPN and will update the employee's record with the reason of 'Other' at the *Update Employee RPN* step.

2.4.6. RPN numbers

RPN numbers are incremented by one each time a new cert is retrieved for an employee.

3. Generate the Payroll Submission File

3.1. Purpose of this Section

This section guides how to generate the payroll *Normal Submission File* and *Full Resubmission File* so that these are available to transfer to Revenue.

This includes:

- An overview of the *Normal Submission File* and *Full Resubmission File*.
- How to generate the files?
- When to regenerate a *Normal Submission File* vs when to generate a *Full Resubmission File*.

Further information is also available in section [6. Managing Corrections](#).

Commented [DB18]: Font looks different

3.2. What are the Submission Files?

At the end of every payroll, transmit a *Payroll Submission File* to report the latest payroll information to Revenue. This transfers through an automated feed that connects seamlessly with Revenue to exchange the required information.

A key feature of the Payroll Submission File is that it reports **'this period only'** values to Revenue. From these periodic values, Revenue accumulates the totals from each periodic submission, thus removing the requirement for an end of year submission.

Generate a Submission File every time you complete a payroll run. This includes the following information for each employee in the pay group:

- Amount of Pay
- Payment Date
- Amount of Income Tax
- USC
- LPT
- Start Date (if applicable)
- Leave Date (if applicable)
- Pay Period

Note:

Generate the *Payroll Submission File* after the 'Complete Update' and on or before the payment date.

This *Payroll Submission File* is transferred to Revenue using 'Direct Pay Reporting'. If any errors are reported by Revenue, then these issues need to be resolved on PeopleXD.

- For "Invalid Payslips" errors, resolved issues, and generate a new *Normal Submission File*.
- If a correction is required, generate a *Full Resubmission File* and transfer it to Revenue (see section [6. Managing Corrections](#)).

3.3. Generate the Payroll Submission Files

3.3.1. Generate a Normal Submission File for Pay Group

To Generate a Normal Submission File:

1. Go to *CorePay > Update > PAYE Modernisation*.

2. Select **Generate Submission File** on the *Generate/Transfer* drop-down list.
3. Select **Normal Submission** from the *Submission Type* drop-down menu.

PAYE Modernisation (Back Office) - User Guide

4. Enter a *Pay Group* and hit *Enter/Tab*.
The Period/Month auto-populates.
5. The default payment date is the Paypath processing date plus the value specified for ESS date paid offset on the Pay Group. You can override if necessary.
6. Click **Browse** to set a location to generate the file.

The screenshot shows the 'PAYE Modernisation' application window. The 'Generate/Transfer' dropdown is set to 'Generate Submission File'. The 'Submission Type' is 'Normal Submission'. The 'Pay Group' is '1237 Irish YE University' and the 'Period/Month' is '201904'. The 'Override Cheque Pay Date' is '31-JAN-2019'. The file path 'C:\Users\brian.okeeffe\Desktop\submission_1237_201904.json' is entered in the text box, and a red arrow points to the 'Browse' button next to it. The 'OK' and 'Cancel' buttons are at the bottom.

7. Click **OK**.
 - The file generates, and the *Submission File* is available in JSON format at the specified location.
 - The *PAYE Modernisation Control Report* populates and displays automatically on the screen. This provides a list of any errors that CoreHR has identified for employees.
 1. See [3.3.12 PAYE Modernisation Control Report](#) for a list of possible errors.
 2. See [3.3.3 Exceptions in the Normal Submission Files](#) for guidance on what to do with exceptions identified.

3.3.2. Generate a Normal Submission File for one Employee

Note:

Use where an employee had invalid payslips in a previous *Submission File*.

To Generate a Normal Submission File:

1. Go to **CorePay > Update > PAYE Modernisation**.
2. Select **Generate Normal Submission File** on the *Generate/Transfer* drop-down list.
3. Select **Normal Submission** from the drop-down menu.
4. Enter a *Pay Group* and hit Enter/Tab.
5. The *Period/Month* auto-populates.
6. Enter the *Employee Reference*.
7. The default payment date is the Paypath processing date plus the value specified for ESS date paid offset on the Pay Group. You can override if necessary.
8. Click **Browse** to set a location to generate the file.

PAYE Modernisation (Back Office) - User Guide

- The file generates, and the *Submission File* is available in JSON format at the specified location.
- The *PAYE Modernisation Control Report* populates and displays automatically on the screen. This provides a list of any errors that PeopleXD has identified for employees.
 1. See [3.3.12 PAYE Modernisation Control Report](#) for a list of possible errors.
 2. See [3.3.3 Exceptions in the Normal Submission Files](#) for guidance on what to do if exceptions are identified.

3.3.3. Exceptions in the Normal Submission File

When the file is generated, exceptions may be identified and presented to you in the *Submission Exception Report*. If exceptions are found, the recommended process is to:

1. Review errors in the report.
2. Resolve the errors on PeopleXD.
3. Generate a new *Normal Submission* file.
4. Repeat these steps until no exceptions remain. It is recommended to resolve all known errors in the file, before transferring to Revenue.

3.3.4. Revenue Validation Checks Report

This report was introduced in June 2019. This file generates automatically in a PDF format when the Submission File is generated. This file generates for all submission types. When you generate the Submission File, exceptions may be identified and presented to you in the Revenue Validation Checks Report. If the file doesn't generate, this means no exceptions were identified in the Revenue Validation [Check](#).

Note:

- This report of data checks is being introduced based on Revenue feedback of typical checks they would apply to a customer's data during a site visit.
- This file is generated to identify potential anomalies in your data and does not necessarily indicate incorrect data. It is recommended that you review all exceptions output, to ensure they are valid, and take corrective action if required.
- The exceptions identified on this report will not prevent you from submitting your file. This is for information purposes to highlight possible data or configuration issues that

Commented [DB19]: Important to stress items on this report may be valid/correct however its highlighting data that Revenue would consider unusual and customers are asked to review any data identified to reassure themselves as to the accuracy of their returns.

PAYE Modernisation (Back Office) - User Guide

The Revenue quality team have provided feedback on data anomalies in payment submission files received from PeopleXD.

Revenue has asked that we provide this feedback to PeopleXD system users to highlight the key trends. Please take time to review the below analysis as it may help to assure accurate returns.

Behaviour Correction and – Payslips do not need to be corrected.

Test Number	Description	Cause
1	Emergency Tax reported with no Income Tax Paid.	• Incorrect reporting of Emergency Tax basis by the employer.
2	Emergency Tax reported with RPN number reported	• Incorrect reporting of Emergency Tax basis by the employer. • Usually, because the RPN has nil credits/rate band.
22	No PPSN reported, but USC paid < 8%.	• Employer not understanding deduction obligations when no PPSN is provided.
23	No PPSN reported, but Income Tax paid < 40%.	• Employer not understanding deduction obligations when no PPSN is provided.

Retrospective Correction – Payslips need to be corrected.

Test Number	Description	Cause
6	Gross Pay < Pay for Income Tax.	• Gross Pay reported as zero. • Employer not including some pay items in Gross Pay (Salary Sacrifice, Overtime, BIK).

Test Number	Description	Cause
7	Gross Pay < Pay for USC	- Gross Pay reported as zero. - Employer not including some pay items in Gross Pay (Salary Sacrifice, Overtime, BIK). - Employer not understanding what pay items are included in Gross Pay or Pay for USC.
14	USC Exempt with USC Paid.	Incorrect reporting of USC Exempt by employers.
16	Pay for USC < Pay for Income Tax.	Employer not understanding what pay items are included in Pay for USC and Pay for Income Tax.
19	Negative Gross Pay	- Usually recoupments of overpayments by employers. - Should only be reported if the funds have been recouped-otherwise, the submission needs to be deleted until funds are recouped.
20	Pay for USC not = Pay for Employee PRSI	- Employer not understanding what pay items are included in Pay for USC and Pay for Employee PRSI. - These figures should almost always be the same.

Note:

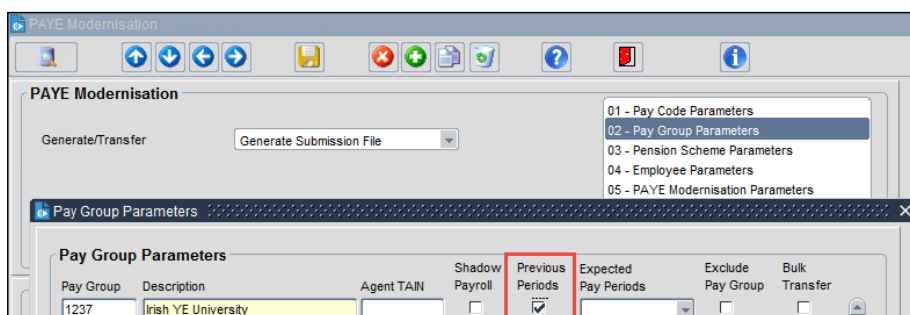

A check only appears on the report, if exceptions have been found for it. If none are found for that check, the check doesn't appear on the report.

3.3.5. Generate a Normal Submission File for a Previous Period

Note:

This option should only be used where the *Normal Submission File* was not generated, transferred, or accepted by Revenue for a previous period.

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select **02 Pay Group Parameters** and ensure that *Previous Periods* is selected for the relevant Pay Group.

3. Return to the *PAYE Modernisation* screen and select **Generate Normal Submission File** on the *Generate/Transfer* drop-down list.
4. Select **Normal Submission** from the *Submission Type* drop-down menu.
5. Enter a *Pay Group* and hit *Enter/Tab*.
 - a. The Period/Month auto-populates. The *Previous Period* also auto-populates with the previous period, and this can be changed if another previous period is required.

PAYE Modernisation (Back Office) - User Guide

Submission Type: Normal Submission

Pay Group: 1237 Irish YE University

Period/Month: 201904 Previous Period: 201903

Employee:

Override Payment Date:

Override Cheque Pay Date:

Please ensure the payment dates are correct as the financial period they fall into determine your liability to Revenue for that period

OK Cancel

6. Click **Browse** to set a location to generate the file.
7. Check the *Override Payment Date* and *Override Cheque Pay Date* on this screen to ensure these are correct.
8. Click **OK**.

3.3.6. When is a Full Resubmission Required?

A *Full Resubmission File* is required when specific amendments (to Pay Date or the Shadow Payroll indicator) has been completed on PeopleXD for an employee. The *Full Resubmission File* can generate at Pay Group or Employee level.

Note:

The *Full Resubmission File* includes only the amendments made since the last *Submission File* was transferred and accepted by Revenue.

Amendments to Pay Date:

If Pay Date was misreported in the last payroll period, it can be overwritten on the Generate Resubmission screen. A delete line item outputs to the *Payroll Submission File*, and a new line item for each employee is output to the new *Full Resubmission File* with the new Pay Date.

Amendments to Shadow Payroll Indicator:

If the Shadow Payroll indicator is amended for a pay group, the *Full Resubmission File* can be generated. The amended status for Shadow Payroll outputs on the *Submission File(s)*, with delete line items on the *Submission File* and new line items with the amended Shadow Payroll status on the new *Full Resubmission File*.

See section [6. Managing Corrections](#).

 Note:

This is not required where PeopleXD has flagged exceptions for a Normal Submission file. See [3.3.3 Exceptions in the Normal Submission File](#).

3.3.7. Generate a Full Resubmission File for Pay Group

Commented [DB20]: clarify for current period

To generate a Full Resubmission File for the current period:

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select **Generate Submission File** on the *Generate/Transfer* drop-down list.
3. Select **Full Resubmission** from the drop-down menu. This generates a *New Submission File* which includes the updated data.
4. Enter a *Pay Group* and hit *Enter/Tab*.
 - a. The Period/Month auto-populates.
5. Click **Browse** to set a location to generate the file.
6. Check the *Override Payment Date* and *Override Cheque Pay Date* on this screen to ensure these are correct.

PAYE Modernisation (Back Office) - User Guide

PAYE Modernisation

C:\Users\brian.okeeffe\Desktop\full_resubmission_1237_201904.json **Browse**

OK **Cancel**

7. Click **OK**.

- The file generates, and the submission file is available in JSON format at the specified location.
- The *PAYE Modernisation Control Report* populates and displays automatically.

Note:

Where a submission has been already generated and transferred to Revenue, if there was no response from Revenue, there will be an error if you try to re-generate the *Submission File*:

"You cannot generate a file for this pay group and period as the last file sent got no response from Revenue – Please run a Check Payroll Submission".

If this happens, check the response on the *Transfer Submission Files* screen for the last file

3.3.8. **Generate a Full Resubmission File for one Employee**

To generate a Full Submission File for one employee:

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select **Generate Submission File** on the *Generate/Transfer* drop-down list.

PAYE Modernisation (Back Office) - User Guide

3. Select **Full Resubmission** from the *Submission Type* drop-down menu. This generates a *New Submission File* which includes the updated data.
4. Enter a *Pay Group* and hit *Enter/Tab*.
The *Period/Month* auto-populates.
5. Enter an employee reference and hit *Enter/Tab*.
6. Click **Browse** to set a location to generate the file.

The screenshot shows the 'PAYE Modernisation' application window. The 'Generate/Transfer' section has a dropdown menu set to 'Generate Submission File'. On the right, a list of parameters is visible: 01 - Pay Code Parameters, 02 - Pay Group Parameters, 03 - Pension Scheme Parameters, 04 - Employee Parameters, 05 - PAYE Modernisation Parameters, 06 - Load Digital Certificate, 07 - Data Mapping, and 08 - Company Parameters.

The main form fields are as follows:

- Submission Type:** Full Resubmission
- Pay Group:** 1237 Irish YE University
- Period/Month:** 201904
- Employee:** 2511300 Aaron O'Shea
- Override Payment Date:** 31-JAN-2019
- Override Cheque Pay Date:** 31-JAN-2019

A note states: "Please ensure the payment dates are correct as the financial period they fall into determine your liability to Revenue for that period".

The file path is: C:\Users\brian.okeeffe\Desktop\full_resubmission_1237_201904.json. A red arrow points to the 'OK' button.

7. Click **OK**.
 - The file generates, and the submission file is available in JSON format at the specified location.
 - The *PAYE Modernisation Control Report* populates and displays automatically.
 - A CSV generates for the *Submissions Exception Report*. This is located in the location as specified on the screen. The name of this report is
PAYGROUP_PAYROLLPERIOD_Submission_Exception.csv or
PAYGROUP_PAYROLLPERIOD_Resubmission_Exception.csv in the case of a resubmission.

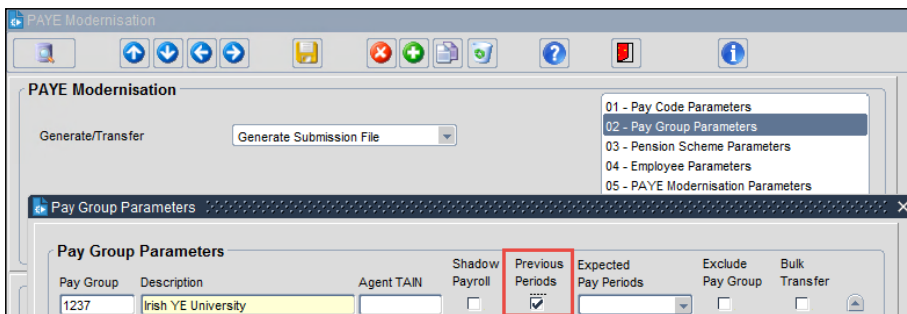

3.3.9. Generate a Full Resubmission File for a Previous Period

Note:

This option should only be used where a Full Resubmission is required for a pay group and the pay group Normal Submission has already been sent to and accepted by Revenue.

To generate a Full Resubmission File for a previous period:

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select **02 Pay Group Parameters** and ensure that *Previous Periods* is selected for the relevant Pay Group.

3. Return to the *PAYE Modernisation* screen and select **Generate Normal Submission File** on the *Generate/Transfer* drop-down list.
4. Select **Generate Submission File** on the *Generate/Transfer* drop-down list.
5. Select **Full Resubmission** from the *Submission Type* drop-down menu.
6. Enter a *Pay Group* and hit *Enter/Tab*.
 - a. The Period/Month auto-populates.
 - b. The Previous Period also auto-populates with the previous period, and this can be changed if another previous period is required.
7. Enter an employee reference and hit *Enter/Tab*.
8. Check the *Override Payment Date* and *Override Cheque Pay Date* on this screen to ensure these are correct.
9. Click **Browse** to set a location to generate the file.
10. Click **OK**.

3.3.10. Generate Delete Submission File

3.3.10.1. When to Generate the Delete Submission File?

The *Delete Submission File* can be generated after the payroll is run and submitted. This must be run:

1. If an employee/pay group should have been excluded but were returned in error.
2. If a *Submission File* was generated and transferred twice for a period in error. The duplicate file can be deleted.

Once the *Delete Submission* file generates, transfer to Revenue, as per the standard transfer process.

3.3.10.2. Scenario 1: Employee Returned in Error

To delete a submission file where the employee should have been excluded:

1. Go to CorePay > Update > PAYE Modernisation.
2. Select *Delete Submission* from the *Submission Type* drop-down menu.
3. Enter a *Pay Group* and hit *Enter/Tab*.
 - a. The Period/Month auto-populates.
4. Enter the *Employee Code* or click the  button to search employees.
5. Enter a *Submission ID* for the submission to be deleted.
6. Click Browse to enter a location to receive the response file.

PAYE Modernisation (Back Office) - User Guide

The screenshot shows the 'PAYE Modernisation' application window. The 'Generate/Transfer' section has a 'Generate Submission File' button highlighted with a red box. On the right, a list of parameters is visible: 01 - Pay Code Parameters, 02 - Pay Group Parameters, 03 - Pension Scheme Parameters, 04 - Employee Parameters, 05 - PAYE Modernisation Parameters, 06 - Load Digital Certificate, 07 - Data Mapping, and 08 - Company Parameters. The 'Submission Type' dropdown is set to 'Delete Submission' and is also highlighted with a red box. Below it, the 'Pay Group' field is empty. The 'Period/Month' field is empty, and the 'Submission ID' field contains '12345678'. The 'Employee' field contains '2511300' and 'Aaron O'Shea'. The 'Override Payment Date' and 'Override Cheque Pay Date' fields are empty. A note states: 'Please ensure the payment dates are correct as the financial period they fall into determine your liability to Revenue for that period'. The file path 'C:\Users\brian.o'keeffe\Desktop\delete_submission_.json' is entered in the file selection field, with a 'Browse' button next to it. A red arrow points to the 'OK' button.

7. Click **OK**.

3.3.10.3. Scenario 2: Pay Group Returned in Error

To delete a *Submission File* where the pay group should have been excluded:

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select *Delete Submission* from the *Submission Type* drop-down menu.
3. Enter a *Pay Group* and hit *Enter/Tab*.
4. The *Period/Month* auto-populates.
5. Enter a *Submission ID* for the submission to be deleted.
6. Click *Browse* to enter a location to receive the response file.
7. Click **OK**.

3.3.10.4. Scenario 3: Delete a Duplicate Submission File

To delete a *Submission File* that has been generated and transferred twice in error:

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select **Delete Submission** from the *Submission Type* drop-down menu.

PAYE Modernisation (Back Office) - User Guide

3. Enter the *Pay Group* code or click the  button to search pay groups.
4. Enter a **Submission ID** for the submission to be deleted.
5. Click Browse to enter a location to receive the response file.
6. Click **OK**.

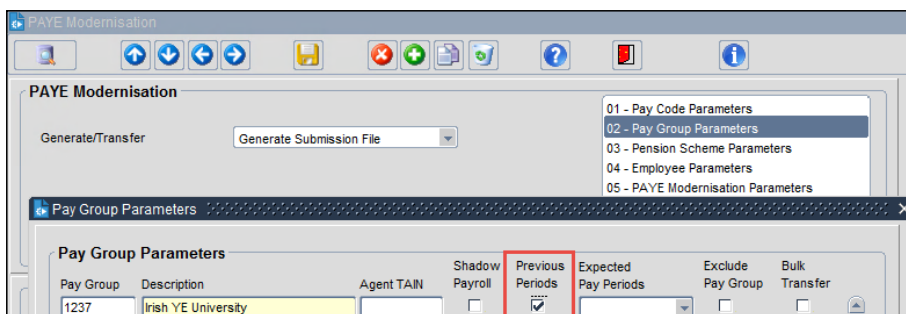

Note:

Click the  button for the *Submission ID* field to show all the submissions previously sent and accepted by revenue for that pay group/payroll period combination.

3.3.11. Generate Delete Submission File for a Previous Period

Follow these steps to generate a Delete Submission file for a previous period:

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select **02 Pay Group Parameters** and ensure that *Previous Periods* is selected for the relevant Pay Group.

3. Return to the *PAYE Modernisation* screen and select **Generate Normal Submission File** on the *Generate/Transfer* drop-down list.
4. Select **Generate Normal Submission File** on the *Generate/Transfer* drop-down list.
5. Select **Delete Submission** from the drop-down menu.
6. Enter the Pay Group and hit *Enter/Tab*.
The Period/Month auto-populates.
The Previous Period also auto-populates with the previous period, and this can be changed if another previous period is required.

PAYE Modernisation (Back Office) - User Guide

7. Enter a Submission ID if known.

The screenshot shows the PAYE Modernisation software interface. The 'Generate/Transfer' dropdown is set to 'Generate Submission File'. The 'Delete Submission' dropdown is selected. The 'Pay Group' is '1237 Irish YE University'. The 'Period/Month' is '201904', 'Previous Period' is '201903', and 'Submission ID' is '12345678'. The 'Override Payment Date' is empty, and 'Override Cheque Pay Date' is '31-JAN-2019'. A red arrow points to the 'OK' button.

8. It is important to check the *Override Payment Date* and *Override Cheque Pay Date* on this screen to ensure these are correct.
9. Click **OK**.

Note:

If no Submission ID is entered, then a file containing delete lines for all submission for that pay group/pay period will be created and deleted from Revenue, if the file is transferred.

3.3.12. **PAYE Modernisation Control Report**

Once a submission file generates, the PAYE Modernisation Control Report generates and is stored in the specified location.

At this point, the *PAYE Modernisation Control Report* generates and appears automatically on the screen in PDF format.

PAYE Modernisation (Back Office) - User Guide

PAYE Modernisation Control Report

Submitted By : COREHR
 Date : 09-AUG-2018 12:02:59
 Report Name : PAYE Modernisation Control Report
 Report Version : .01

Pay3600	CorePay	User : COREHR	1 of 1
Version : .01	PAYE Modernisation Control Report	Date : 09-AUG-2018 12:02:59	
Period 201904 PAYE Modernisation Summary for Pay Group 2242 Payroll Modernisation			
This Period	Total		
Gross Pay	75472.82		
Pay for Income Tax	75247.82		
Income Tax Paid	8901.33		
Pay for Employee PRSI	75775		
Pay for Employer PRSI	75472.82		
Employee PRSI Paid	3031		
Employer PRSI Paid	8188.81		
Pay for USC	75775		
USC Paid	2179.66

Employee AVC	25		
Employee ASC	0		

Value	How it's Derived
Gross Pay	Sum of all pay codes where Taxable Indicator is Y (Taxable) or where PRSIable Indicator is Y (PRSIable). The figure reported is the gross pay before any salary sacrifice elements are deducted.
Pay for Income Tax	Total Gross Pay (from the <i>Gross to Net Report</i>) minus Total Pension/Pre- Tax (from the <i>Gross to Net Report</i>).
Income Tax Paid	Total PAYE.
Pay for Employee PRSI	[Sum of all pay codes where PRSIable Indicator is Y (PRSIable) or R (PRSIable EE, Non-PRSIable ER) and where Taxable Indicator is not populated as I (Income Continuance)] <i>MINUS</i>

Commented [DB21]: The gross pay figure to be reported is before any salary sacrifice elements are taken away .

Value	How it's Derived
	[Sum of all deduction pay codes where Taxable Indicator is I (Income Continuance) and where PRSlable Indicator is N (Non-PRSlable).]
Pay for Employer PRSI	[Sum of all pay codes where PRSlable Indicator is Y (PRSlable) and where Taxable Indicator is I (Income Continuance)] MINUS [Sum of all deduction pay codes where Taxable Indicator is I (Income Continuance) and where PRSlable Indicator is N (Non-PRSlable) or Y (No EE PRSI Relief, Full ER PRSI Relief).]
Employee PRSI Paid	Total Employee PRSI.
Employer PRSI Paid	Total Employer PRSI.
Pay for USC	[Sum of all pay codes where USCable Indicator is Y (USCable)] MINUS [Sum of all deduction pay codes configured as PRSA.]
USC Paid	Total USC.
LPT Deducted	Total LPT.
Employee RBS	Sum of all deduction pay codes configured as Retirement Benefit Scheme.
Employee RAC	Sum of all deduction pay codes configured as Retirement Annuity Contract.

3.3.13. Payroll Submission Exception Report

The report identifies errors before you transfer the file. It performs a series of checks, and the following potential errors are added to the report:

 **Note:** Employees marked as excluded from the submission will be listed on this report.

Exceptions identified in this report, need to be resolved on PeopleXD and a New Submission File generated.

Validation Code	Error	Comment
1004	Invalid format for Employer Registration Number	Employer Registration Number must be in the correct format: 7 digits (including leading zeros) followed by either 1 or 2 letters.
1006	Invalid format for Agent Tain	Retrieve Valid Agent Tain from Revenue
2046	A payroll submission must have at least one payslip to add/ delete	Ensure all <i>Submission Files</i> include all relevant payslips
1010	Invalid format for employee PPSN	Update PPSN number with the valid format, E.g. 1234567A
2010	The address is mandatory when EmployeeID (PPSN & EmploymentID) is not included.	If no PPSN, Address is mandatory. See section 8.7.1 Address Data Configuration & Mapping
2012	CountryCode (for non-Irish addresses) is mandatory for Address.	See section 8.7.1 Address Data Configuration & Mapping
2014	Invalid Eircode format.	Eircode must be a seven-character, alpha-numeric code.
2013	Irish County and non-Irish CountryCode specified. If County specified CountryCode must either be blank or set to IRL (i.e. Ireland).	See section 8.7.1 Address Data Configuration & Mapping
2017	The date of birth must be today or earlier.	Update DOB
2020	LeaveDate cannot be more than 12 months from the date the PayrollSubmissionRequest is submitted.	Update LeaveDate
2023	LeaveDate must be on or after StartDate	Update LeaveDate
2030	Tax Credit field is mandatory when no RPNNumber included.	Update TaxCredit Field
2029	Tax Rate.RateCutOff is mandatory when no RPNNumber included.	Update TaxRateCutOff

Validation Code	Error	Comment
2032	ExclusionOrder marker is mandatory when no RPN Number is included.	Check ExclusionOrder indicator. See 8.6 Manage Employee 'PRSI Exempt' & 'Director' Indicators
2019	Pay Date must be within the Tax Year specified in the header of the PayrollSubmissionRequest.	Amend Pay Date
2043	PRSIExemptionReason is required if PRSIExempt is true.	Add PRSI Exemption Reason. See section 8.6 Manage Employee 'PRSI Exempt' & 'Director' Indicators
2036	The sum of InsurableWeeks for PRSI must be less than or equal to 56, the maximum number of weeks allowed.	Amend the Insurable Weeks for PRSI
2039	Invalid Pension Tracing Number.	The correct format is "PBXXXXXX", where XXXXXX is a number with up to 6 digits.
2047	employeePRSIPaid and employerPRSIPaid are mandatory when PRSIExempt is false	Update EmployeePRSIPaid and EmployerPRSIPaid

Once the *Payroll Submission File* has generated successfully, you can then transfer the file. This is covered in section [4. Transfer the Payroll Submission File](#).

3.5. Generate Submission File FAQs

3.5.1. Sundry Pay/Mid-Month Payments

See Section [7.2 Scenarios Presented to Revenue](#) for full details.

Commented [DL22]: Link to section in guide

3.5.2. Default Payment Date

Where a *Normal Payroll Submission File* has a PPSN error of 'invalid payslip', amend the PPSN and generate and transfer a new *Normal Submission File*.

3.5.3. Arrears Payments

Report all payments on the payment date, not date earned.

3.5.4. Negative Values on Submission Files

Revenue allows negative payments on *Submission Files*.

3.5.5. Generate Submission File Reports

The *Generate Submission File* process generates both the 3600 and 4600 (*Validation Report* and *Control Report*) reports. If there are no exceptions, then only the *Control Report* generates.

3.5.6. User Security

The user can only generate *Payroll Submission Files* for pay groups to which they have access.

3.5.7. Excluding Employees

Non-Taxable, Non-PRSIable, non-pensionable, etc. employees can be excluded from the *Payroll Submission File*. To do this see section [8.6 Manage Employee 'PRSI Exempt' & 'Director' Indicators](#)

3.5.8. How Cessation Payments Treated for Submission Files

There are two scenarios to consider: Was the cessation (leave) date in or outside the current year.

In Year:

If the leave date was within the current year, no start date will be output, and the leave date will output as the current year leave date.

The below change was made in June 2019.

Where an employee is paid after leaving, the system uses the RPN details on the employee's record as per Revenue instruction.

Note:

1. Previously, the payment after leaving was automatically applied on a week 1 basis.
2. All Payments in a week 53, 54 or 56 will still calculate on a week 1 basis.

Out of Year:

If the leave date was in the previous year, then the payment date is output as the start date and the end date on the *Submission File*.

Where an employee is paid after leaving, you should submit a new RPN request and the system uses the new RPN details as per Revenue instruction.

3.5.9. Temp Rejoiners

Where an employee left during the current tax year and temporary rejoined to make a payment, it is correct to show their original leave date on the *Submission File*. It is also correct not to show the start date. The pay date, in this case, is the actual pay date.

3.5.10. Example Scenarios and Expected Outcomes

Scenario 1	An employee is leaving in the period and is also paid.
Expected Outcome	A payslip should generate with payment details and leave date.
Scenario 2	An employee is not paid in the period but is leaving.
Expected Outcome	A payslip with 0 payslip values and the leave date generates.

PAYE Modernisation (Back Office) - User Guide

Scenario 3	An employee is not paid in the period but is leaving. Then the <i>Submission File</i> is transferred and is accepted. A manual payment is then issued.
Expected Outcome	A payslip should get returned, which also has the leave date.

Scenario 4	A user enters a future leave date, but the employee is not leaving yet.
Expected Outcome	Leave date should not be picked up until the period the employee is leaving.

Scenario 5	An employee is leaving in the period and is also paid, and the <i>Submission File</i> is transferred and accepted. Then the leave date is modified. On next file generation, a correction payslip should generate with the same details as the original one transferred to Revenue except it should have the new leave date and a previousLineItemID.
Expected Outcome	○ If generated before the next payroll was complete; this correction should not be reported again in the next pay period. ○ If not generated again until the next payroll was complete, it should be picked up as a correction in the next pay period.

Scenario 6	A user modifies the leave date for a payslip in the past and is not leaving or being paid this period.
Expected Outcome	A correction payslip for the past period with same payslip details should generate except it should have new leave date and previousLineItemID

Scenario 7	An employee is paid in a period and is also leaving, and the <i>Submission File</i> is transferred and accepted. Then PPSN is amended in the same period.
Expected Outcome	This should result in a correction payslip with the new PPSN, previousLineItemID, all other detail the same. The employee now

	has two payslips in the period; one of which was replaced (has previouslineid on latest payslip). Then in a future period leave date is changed retrospectively. This should result in a correction payslip with the new leave date, but the previous line id returned needs to be for the latest payslip in the correction period and not the one that was replaced. I.e. cannot replace the payslip that was already replaced.
Scenario 8	An employee was paid and is leaving, and the file is transferred and accepted. The employee also receives an additional payment which is sent to Revenue with the leave date also. In a future pay period, the leave date is changed retrospectively.
Expected Outcome	Correction payslips should generate where both payslips (the original and additional payment) are being replaced with the new leave date.

3.5.11. I see a duplicate submission file showing on Revenue for the same period. This is incorrect.

1. Use the "delete submission" option in the submission type drop down list and enter one of the submission id's in the submission id field.
2. Once the file has generated transfer it, this will delete the file in revenue for that submission id, leaving just one file in Revenue.

See section [3.3.10 Generate Delete Submission File](#) for further guidance on how to do this.

4. Transfer the Payroll Submission Files

4.1. Overview

4.1.1. Purpose of this Section

This section guides the Transfer Submission File process. This includes:

1. An overview of the transfer process.
2. How to complete a transfer for *Original Submission* and *Correction Submission* files.
3. How to manage exceptions reported by Revenue for the transferred file.
4. Check Payroll Run.

4.1.2. What is the Transfer Submission File Process?

At the end of every payroll, directly report the latest payroll details to Revenue. Transfer the Payroll Submission File to Revenue from within the PeopleXD application.

Revenue validates the file, and if they find any issues, they notify this to PeopleXD via the *Submission Status* and provide a report of any exceptions. Should any errors be found, these need to be resolved in PeopleXD; a new *Normal Submission* file generated and transferred again to Revenue. This submission file includes only the records that changed e.g.

1. 1st Normal Submission only 8/10 records completed successfully.
2. 2nd Normal Submission only includes 2/2 records, i.e. the two records that were invalid on the previous submission.

Note:

If a file has not transferred successfully for all employees **OR** a file has been generated but not transferred to Revenue, it will not be possible to run the next payroll run for that Pay Group. This will be prevented at the *Run Validation* step.

4.2. Transferring Submission Files

To transfer a *Payroll Submission File* to Revenue:

1. Go to *CorePay > Update > PAYE Modernisation*.

PAYE Modernisation

2. Select **Transfer Submission Files** on the *Generate/Transfer* drop-down list.
3. Enter a Company Reference and press *Enter/Tab*.
All the Pay Groups associated with that Company appear on the screen.
The Pay Groups here display based on user access.
For each Pay Group the following details are available:
4. **Period / Month**: This is the pay period just completed.
5. **File Type**: This defaults to the Submission File type that the system expects to be transferred for this Pay Group:
 - 'O' = Original Submission. This appears for all Pay Groups, indicating that the Original Submission file should be provided for the current payroll period.
 - 'F' = Correction Submission. This displays when the Full Resubmission option is selected on the Generate Payroll Submission screen for the current payroll period.
 - 'P' = Previous Period Submission. This appears for all Pay Groups, indicating that the Original Submission file should be provided for a previous payroll period.

PAYE Modernisation (Back Office) - User Guide

- 'FP'= Correction Submission. This displays when the Full Resubmission option is selected on the Generate Payroll Submission screen for a previous payroll period.

Company: **2242 Payroll Modernisation**
Submission ID: **2242_201917_571**

Pay Group	Description	Period/Month	File Type	Transfer File	Transfer Status	Check Payroll Submission	Submission Status	Confirmed
2242	Payroll Moderisation	201904	O	☐		Run Check		☐
2242	Payroll Moderisation	201906	O	☐		Run Check		☐
2242	Payroll Moderisation	201907	O	☐		Run Check		☐
2242	Payroll Moderisation	201908	O	☐		Run Check		☐
				☐		Run Check		☐
				☐		Run Check		☐

C:\Users\alan.burke\Desktop\ **Browse** **Transfer**

1. Tick the **Transfer File** indicator.
2. A Submission ID populates for this submission.
Each file ticked displays a unique Submission ID.

Multiple Pay Groups

It is possible to transfer files for multiple Pay Groups at one time. Select the Transfer File for all Pay Groups to be transferred.

3. Click Browse and select the location to save the response file.
4. Click **Transfer**.

PAYE Modernisation (Back Office) - User Guide

Note:

Clicking transfer will transfer a digital copy of the submission JSON file directly from the database. The file stored in the browse location after generating, is a copy for review only.

This transfers the file(s) to Revenue.

Revenue responds to the transfer. The Transfer Status field populates with either:

1. 'ACKNOWLEDGED': This is a response from Revenue confirming they have received the transfer.
2. 'REJECTED': Revenue has rejected the file. See <https://www.revenue.ie/en/Home.aspx> for Revenue validation errors for Payroll Submission file.
3. 'PENDING': The file has transferred to Revenue; however, it hasn't been processed yet. See step 9 below for next steps.

Pay Group	Description	Period/ Month	File Type	Transfer File	Transfer Status	Check Payroll Submission	Submission Status	Confirmed
2242	Payroll Modernisation	201901	O		ACKNOWLEDGED	Run Check		
						Run Check		
						Run Check		
						Run Check		
						Run Check		

At this time, a Submission Transfer Response report is sent by Revenue.

PAYE Modernisation (Back Office) - User Guide

This can be found in the location that the Submission File was picked up from, i.e. where you browsed to in step 5.

This response generates a '.json' file and contains the following:

1. Acknowledgement Status, i.e. ACKNOWLEDGED
2. Acknowledgement ID.

Note:

The Acknowledge ID is useful if the employer needs to contact PeopleXD Support regarding this file.

3. Check Payroll Submission

The Check Payroll Submission request is generated once you select the Transfer button. This requests an update from Revenue to display a Submission Status.

- This calls the Check Payment Submission web service, which reports on individual files submitted with a Transfer Status of 'Acknowledged'.

Note:

Depending on the number and size of the files to be transferred, the processing time can vary. The system has a built-in cut off time for processing, after which results in a PENDING status. Click Run Check to manually run the web service and request an update from Revenue. **Do not re-generate and re-submit the Submission file.**

The Check Payroll Submission request submitted by an employer is requesting the following totals for the payroll submission:

- Income Tax
- PRSI
- USC
- LPT

PAYE Modernisation (Back Office) - User Guide

- The submission is identified by the Submission ID (generated by the payroll software when the employer runs a payroll event).

Note:

A payroll run can be made up of many submission files i.e. Normal and Full Resubmission files. The Check Payment Submission is requesting Revenue's validation for the selected submission files only.

- While communicating with Revenue, the screen displays a *Processing Data* message. You can leave this screen and return to check the submission status later.
 - A message displays once the Submission has processed successfully.
- Click **OK** on the pop-up, and the Submission Status updates with one of the following values:

Status	Description
Completed – all valid payslips	<u>Submission Completed.</u> All data validated in good order.
Completed – invalid payslips	<u>Submission Completed.</u> Some data items not in good order. Some of the files may include some valid and some invalid payslips. See 'Check Payroll Run Response' json file for details on invalid payslips. Next Steps. Correct data, generate and transfer and a new 'Normal Submission File'.
Pending	<u>Submission Pending.</u> This means the file has been transferred but has not yet been reviewed by Revenue. If the status remains in 'Pending', you can select 'Run Check' to manually check the status of the transfer.

PAYE Modernisation (Back Office) - User Guide

Status	Description
No Response	Where there is no response from Revenue on this screen, the submission will not be allowed to generate again. You will need to click on 'Run Check' to get a response or contact Revenue directly.

Example 1: 'COMPLETED – all valid payslips.'

The transfer completed.

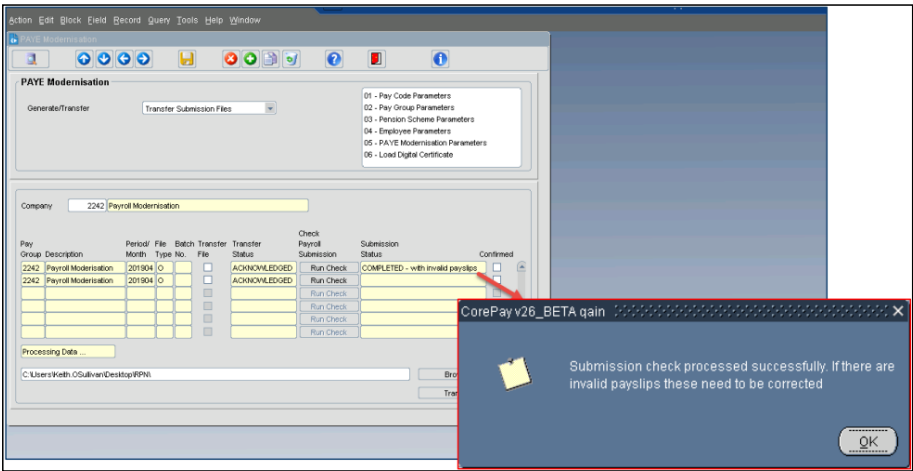

The 'Check Payroll Run Response' file received includes submission totals and employee totals for:

- Tax on Income
- PRSI
- USC
- LPT

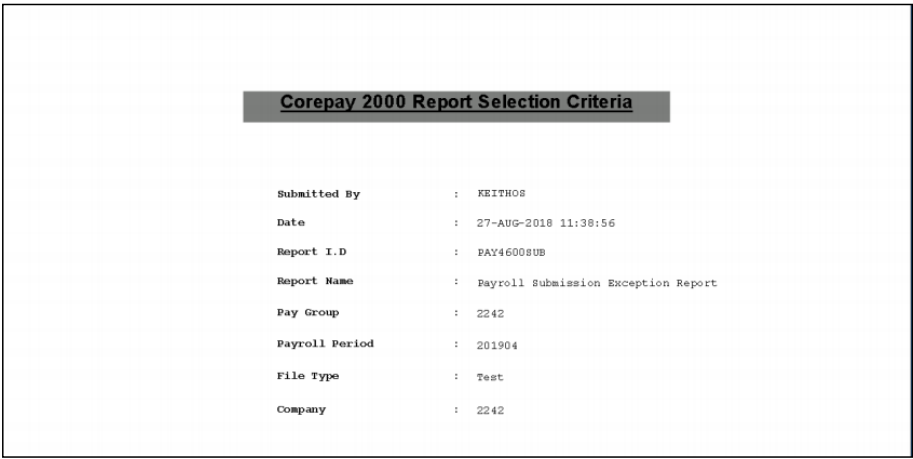

PAYE Modernisation (Back Office) - User Guide

Example 2: 'COMPLETED – with invalid payslips'

The transfer was completed; however, some/all payslips included invalid data.

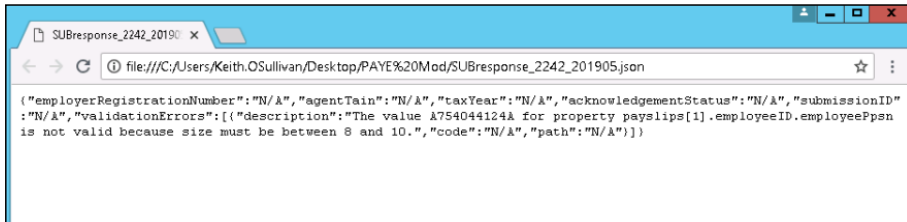

This automatically generates the Payroll Transfer Exceptions Report which outlines the missing/invalid data. This Transfer Validation Exception Report opens on the screen.

- There are 62 possible reasons which could appear in the exceptions report.
- The full list of these rejection reasons can be found in the [documentation supplied by Revenue](#).

PAYE Modernisation (Back Office) - User Guide

If a file transfer has is rejected by Revenue, the following is required:

- a) Review the errors on the *Submission Transfer Response file*.
- b) Resolve the errors on PeopleXD. Resolution steps required are dependent on the errors found.
- c) Generate a new *Original Submission File* for the pay group
- d) Transfer the new *Original Submission File*.

If the new Normal Submission File is rejected, follow the steps outlined above again.

The subsequent normal Submission files include amendments made since the last payroll submission file was accepted by Revenue as per section [6. Manage Corrections](#) section.

4.3. Check Payroll Run

If the payroll run includes multiple submission files, i.e. both *Original Submission* and *Correction Submission* files, it is recommended to complete a *Check Payroll Run* process for reconciliation.

This requests the overall totals of Income Tax, PRSI, USC, and LPT which must be paid to Revenue for the payroll run, i.e. Control Totals.

Follow these steps to complete a Check Payroll Run:

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select **Check Payroll Run** on the *Generate/Transfer* drop-down list.
3. Enter a *Company Reference Number* in the *Company* field.
 - a. Press *tab/enter* to populate the *Company Description*.

PAYE Modernisation (Back Office) - User Guide

PAYE Modernisation

Generate/Transfer: Check Payroll Run

- 01 - Pay Code Parameters
- 02 - Pay Group Parameters
- 03 - Pension Scheme Parameters
- 04 - Employee Parameters
- 05 - PAYE Modernisation Parameters
- 06 - Load Digital Certificate

Company: 2242 Payroll Modernisation

Run Reference:

Live/Test Transfer: ☒ Live ☐ Test

Files linked to run reference

Payroll Run Status:

Pay Group	Description	Period/ Month	File Type	Batch No.	Submission Status	Confirmed
						☐
						☐
						☐
						☐
						☐
						☐

Browse Check Payroll Run

4. Provide the *Run Reference* to be checked.

Note:

PeopleXD uses *Payroll Run Reference* to identify the payroll event to which the submission refers. It also allows you to get summary totals for payroll runs, even if there have been multiple submissions.

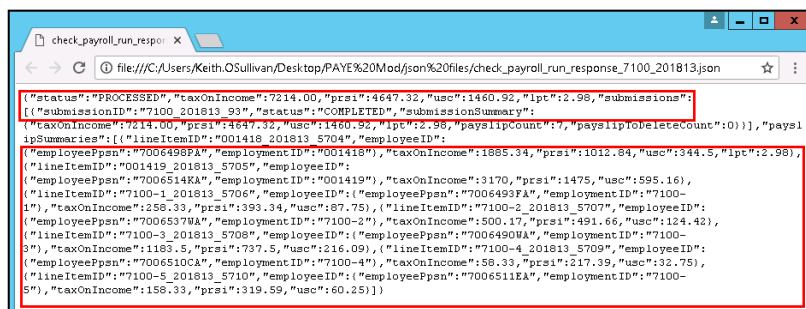

- Click the *Run Reference* field and click the button.
 - Select the appropriate *Run Reference*. Select by Code. The code is made up of Pay Group and Pay Period, e.g. 2242_201904
 - Click **OK**.
 - Any/all files linked to the *Run Reference* populate.
5. Click **Browse** to add a location to save your *Check Payroll Run Response*.
 6. Click **Check Payroll Run** to run the reconciliation.
 7. This runs the *Check Payroll Run Request* web service, which returns a summary of all files submitted for that run reference.
 8. Once complete, the *Payroll Run Status* updates to 'Processed':

PAYE Modernisation (Back Office) - User Guide

9. The *Submission Status* also updates for all submission files which made up the *Payroll Run*.

Status	Description
COMPLETED – all valid payslips	All payslips successfully validated. The process is complete.
COMPLETED – invalid payslips	There are some errors on the payslips. These are visible on the returned json file A new Corrections file needs to be generated and transferred to revenue again.
PENDING	Awaiting validation at Revenue

10. The *Check Payroll Run Response* web service returns the following file.

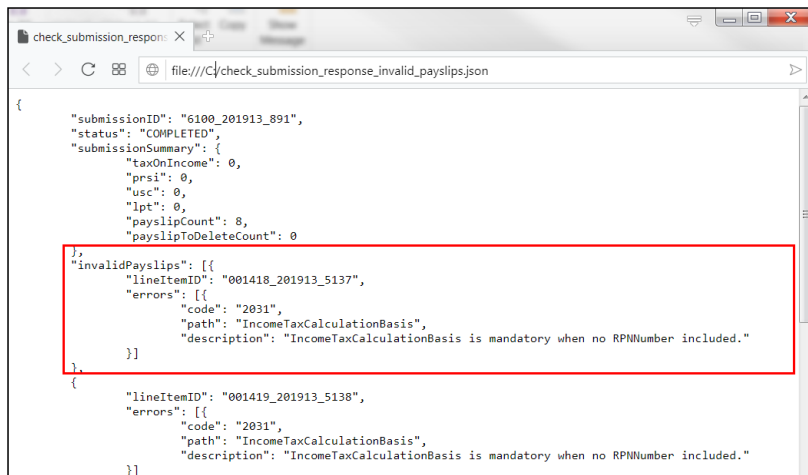

11. The .json file includes the following data:

- Submission ID
- Status
- Totals
- Payslip Count

12. In the case where the status returns as 'COMPLETED – invalid payslips', then the web service returns a file like this:

PAYE Modernisation (Back Office) - User Guide

The .json file includes a different list of data specific to errors:

- Submission ID
- Status
- Summary Totals will be '0' as they will not be validated based on invalid reason.
- Error 'Code'
- Error 'Path'
- Error 'Description' – in this case, the RPN number was missing.

Note:

1. The *Confirmed* indicator cannot be selected here as the Check Payroll Run screen is read only. This option can be selected on the Transfer Submission File screen.
2. No PDF report outputs for Check Payroll Run.

5. Returns Reconciliation Service

5.1. Overview

5.1.1. Purpose of this Section

This section guides on how, and when to use the *Returns Reconciliation Service* process.

5.1.2. Returns Reconciliation Service Overview

The Returns Reconciliation Service process is an optional but recommended process. This provides the employer reconciled values for each Payroll Submission File transferred for that month.

 Note:

1. It is important to note that this is optional because once Revenue have validated the transferred submission file e.g. submission status is *Complete – all valid payslips*, they consider all values to be correct, and require no further updates.
2. However, this is a recommended step for employers to reconcile all values, where the payroll run consisted of multiple submission files.

Run this step any time during the current month, after payroll has run and all relevant *Submission Files* transferred to Revenue. This includes:

1. Normal Payroll Submission files for each:
 - Company
 - Pay Group
2. Full Resubmission files for each:
 - Company
 - Pay Group

Note:

1. The Returns Reconciliation web service links back specifically to the pay dates returned on the submission files (not necessarily the pay period).
2. You should only run the Returns Reconciliation web service for the month which included the pay date e.g. if you run a monthly payroll for November, with a pay date in December, then the Returns Reconciliation Report needs to be run for December.

5.2. Run the Returns Reconciliation Service

To run this web service, complete the following steps:

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select **Returns Reconciliation Service** from the *Generate/Transfer* drop-down menu.
3. Enter a company number in the *Company* field and press tab/enter.
 - The company description and *Year* fields will populate.
 - If a different year is required, update the *Year* field.

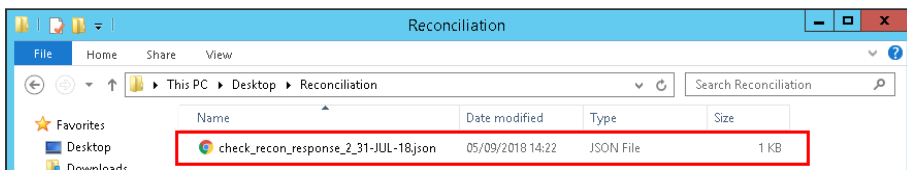

The screenshot shows the 'PAYE Modernisation' window. At the top, there's a toolbar with various icons. Below it, the 'Generate/Transfer' dropdown menu is set to 'Returns Reconciliation Service'. To the right of this dropdown is a list of services: 01 - Pay Code Parameters, 02 - Pay Group Parameters, 03 - Pension Scheme Parameters, 04 - Employee Parameters, 05 - PAYE Modernisation Parameters, 06 - Load Digital Certificate, 07 - Data Mapping, and 08 - Company Parameters. Below the service list, there are three input fields: 'Company' (containing '2242 Payroll Modernisation'), 'Month' (empty), and 'Year' (containing '2018'). These three fields are highlighted with a red rectangle. Below these fields is a text box containing the file path 'N:\Alan BIGA\Payroll Modernisation\' and two buttons: 'Browse' and 'Check Reconciliation'.

Note:

The *Year* field populates by default to the current year. However, you can run the reconciliation service for previous months/years by entering a prior year in the *Year* field.

PAYE Modernisation (Back Office) - User Guide

4. Select the month to be reconciled from the *Month* drop-down menu.
5. By default, this is set to run the process to the live Revenue servers. To perform a test run over test servers, select the **Test** indicator.
6. Click **Browse** to set a location to save the reconciliation response.
7. Click **Check Reconciliation**.
8. The *Check_Recon_Response* file returned is available at the location defined at step 7.

The returned reconciled values are displayed within the file.

The *Check_Recon_Response* also produces a CSV, at the location defined at step 7, with headings such as Employer Reg, Agent Tain, Period Start Date, Period End Date, Version, Tax on Income, PRSI, USC, and LPT. Payroll Run Reference, run date, multi-period, tax on income, PRSI, USC, and LPT.

Note:

Return Reconciliation report should be reconciled with your Payroll records. The Reconciliation report includes all accepted submission items for employees under the employer tax registered number.

6. Managing Corrections

6.1. Overview

6.1.1. Purpose of this Section

This section guides how to manage corrections to Payroll Submission Files already transferred to Revenue. This includes:

- What are corrections?
- When to generate a correction?
- Specific scenarios where corrections are required.
- How to correct on PeopleXD.
- How to report corrections to Revenue.

6.1.2. What are Corrections?

In certain circumstances, it is required to correct data for an employee which has been incorrectly reported to Revenue via a Normal Submission File.

Note:

1. Before transferring a Normal Submission File with amendments, the Original Normal Submission File for the payroll period, must have "All valid payslips" and have been accepted by Revenue as per the Transfer Submission File screen.
2. No corrections are created for employees that have been flagged as excluded.

Corrections are required in the following cases:

1. Something already transferred to Revenue is being replaced or deleted for a previous payroll period.
2. The employer may receive an "Invalid Payslip" errors after transferring the Payroll Submission File to Revenue. The invalid payslips must be corrected before processing the next payroll period.

PAYE Modernisation (Back Office) - User Guide

For the majority of these correction cases, the following steps are required:

1. Correct the data on PeopleXD.
2. Run the next payroll to resolve any payslip issues for the employee.
3. Corrected data is submitted to Revenue in the next *Normal Submission File*, for the next payroll period, i.e. once the data is corrected, this is picked up and passed to Revenue in the next payroll cycle.

For a select set of corrections, it is not possible to wait for the next payroll cycle to resolve the issues and report to Revenue. For these cases, the following steps are required:

1. Correct the data on PeopleXD.
2. Generate a new Normal Submission File, for that pay period.
3. Transfer the new Normal Submission File to Revenue, for that pay period.

6.1.3. Correction Types

There are four correction types. These are covered individually in the next section of this document.

Correction Type	Correction Description
1	Overpayment to an employee that can be fixed in the next payroll run.
2	Underpayment to an employee that can be fixed in the next payroll run.
3	Reporting error that cannot be fixed in the next payroll run.
4	Reporting error that should be fixed in the next payroll run.

 **Note:** The correction types are set by Revenue.

Commented [DL23]: Check that this is still a valid reference

6.1.4. When is a new Submission File Required?

Where a correction is categorised as Correction Type 1, 2 or 4 by Revenue, corrections are picked up in the next payroll cycle. A Full Resubmission file is not required. See section [6.2 Managing Correction Types 1, 2 & 4](#) for further details.

Where a correction is categorised as Correction Type 3, these may sometimes require a new submission file (Normal Submission or Full Resubmission). Correction steps are provided for these in section [6.3. Managing Correction Type 3](#).

6.2. Managing Correction Types 1, 2 & 4

This section guides how to manage corrections which are either overpayments or underpayments to the employee. Once the data is corrected on PeopleXD, submit to Revenue in the next Normal Submission File for the next payroll run.

The following sections outline the data items/scenarios which require action to update in PeopleXD and to report to Revenue.

6.2.1. Correction Type 1: Data Items Which Have Been Overpaid to the Employee

1. A new submission file does not need to be generated or transferred for this payroll period.
2. Changes are picked up in the next payroll run, e.g. the overpayment can be deducted from the employee in the next payroll period (or over several payroll periods).
3. The corrected information is submitted to Revenue via the Payroll Submission File generated for the next payroll period.

This is the list of all overpayment types which are categorised as 'Correction Type 1' by Revenue:

- Gross Pay
- Pay for Income Tax
- Income Tax Paid
- Pay for EE PRSI
- Pay for ER PRSI
- EE PRSI Paid
- ER PRSI Paid
- Pay for USC
- USC Paid
- Gross Medical Insurance
- Amount Contributed by ER to Retirement Benefit Scheme
- Amount Contributed by EE to Retirement Benefit Scheme

PAYE Modernisation (Back Office) - User Guide

- Amount Contributed by ER to PRSA Scheme
- Amount Contributed by EE to PRSA Scheme
- Amount Contributed by ER to RAC Scheme
- Amount Contributed by ER to AVC Scheme

6.2.2. Correction Type 2: Data Items Which Have Been Underpaid to the Employee

1. A new submission file does not need to be generated or transferred for this payroll period.
2. Changes are picked up in the next payroll run, e.g. the underpayment can be paid to the employee in the next payroll period.
3. The corrected information is submitted to Revenue via the Payroll Submission File generated for the next payroll period.

This is the list of all underpayment types which are categorised as 'Correction Type 2' by Revenue:

- Gross Pay
- Pay for Income Tax
- Income Tax Paid
- Pay for EE PRSI
- Pay for ER PRSI
- EE PRSI Paid
- ER PRSI Paid
- Pay for USC
- USC Paid
- Gross Medical Insurance
- Amount Contributed by ER to Retirement Benefit Scheme
- Amount Contributed by EE to Retirement Benefit Scheme
- Amount Contributed by ER to PRSA Scheme
- Amount Contributed by EE to PRSA Scheme
- Amount Contributed by ER to RAC Scheme
- Amount Contributed by ER to AVC Scheme

6.2.3. Correction Type 4: Data items which have been amended

1. A new submission file does not need to be generated or transferred for this payroll period.
2. Changes will be picked up in the next payroll run, e.g. PRSI class has been amended.

3. The corrected information will be submitted to Revenue via the payroll submission file generated for the next payroll period.

This is the list of all correction types which are categorised as 'Correction Type 4' by Revenue:

- First Name
- Surname
- Address
- Date of Birth
- Employee Start Date
- Pay Frequency
- Income Tax Calculation Basis
- Employee Exempt for PRSI Reason
- PRSI Class
- Insurable Weeks
- Expected Number of Pay Period

6.2.4. Incorrect PRSI Class/Insurable Weeks Reported

Where the normal submission file contained an incorrect PRSI Class, the PRSI class/weeks correction can be done in two ways:

Method 1: This can only be used if the correction is for the current payroll period; otherwise, Method 2 must be used.

1. Before the Payroll Submission file is sent to Revenue amend the employee's PRSI via the "Amend PRSI class/weeks" screen (*Core Pay > Employee > Cumulatives > Amend PRSI Class/Weeks*).
2. Generate a Normal Submission File.
3. Print/Save the PDF and CSV file Control reports for your records.
4. Transfer the submission file to Revenue.

Method 2: Correcting PRSI class/weeks for previous payroll periods where the submission file has already been generated and transferred. Revenue advises PRSI class/week corrections can be corrected in next pay period submission.

PAYE Modernisation (Back Office) - User Guide

1. Use the cancel and manual payment screens to correct the PRSI class/weeks for the employee.
2. *CorePay > Update > Advanced Update Features > Cancel Payment.*
3. *CorePay > Update > Advanced Update Features > Issue a Manual Payment.*
4. Generate a normal submission file for the current payroll period.
5. The new PRSI class/weeks is picked up in payment submission file if cancel payment / manual payment has been made. Please check the new file to ensure correct PRSI class/weeks are included.

6.3. Managing Correction Type 3

This section guides how to manage corrections which are reporting errors that should be fixed in real time.

There are three possible corrective actions to take:

1. No action required.
2. Generate a new Normal Submission file.
3. Generate a Full Resubmission file.

See the [table in section 6.3.1 Correction Scenarios](#).

Commented [DL24]: Update section

These require a new submission file to be generated for the pay period when the error occurred.

(See the corrections section [3. Generating the Payroll Submission File](#).)

Note:

For any of the following scenarios, if a new submission file is not generated and transferred, then this amendment will be picked up in the next payroll submission file. Type 3 corrections should be reported in real-time to Revenue.

6.3.1. [Correction Scenarios](#)

The table below provides a list of scenarios which require a new payment submission file to be generated and transferred this payroll period, i.e. the payroll period in which the invalid payslip occurred.

All the items below, if corrected from the previously submitted payslip, are output to the payroll submission file. Revenue will then replace the previous payslip item on their records with the corrected payslip.

	Data Item	Context	Action Required
1	PPSN	Invalid PPSN reported	Where the normal submission file contained an incorrect PPSN, the Revenue response file (JSON file) will contain a validation error. A new normal submission file is required to do this: 1. Amend the PPSN(s). 2. Generate a new normal submission file. 3. Print/Save the PDF and CSV file Control reports for your records. 4. Transfer the submission file to Revenue. If the PPSN was valid and had been assigned incorrectly to the employee, this will not be included in the Revenue response. The same action can be followed below to correct the PPSN. A new normal submission file is required to do this: 1. Amend the PPSN(s). 2. Generate a new normal submission file. 3. Print/Save the PDF and CSV file Control reports for your records. 4. Transfer the submission file to Revenue. 5. In this scenario, contact Revenue by using the My Enquiries option on ROS. See the table in the section below for further information.

PAYE Modernisation (Back Office) - User Guide

	Data Item	Context	Action Required
2	Employer Reference	N/A	Employer Reference will not be corrected for previous payroll periods and will be returned in the next generated submission file.
3	Employment ID	N/A	This is categorised by Revenue as a correction type 3. However, no action is required as Employment ID is generated by PeopleXD and is not amended by the employer.
4	RPN Number	N/A	Invalid/amended RPNs are categorised by Revenue as a correction type 3. However, as RPN Number is generated by Revenue and is added to PeopleXD via the Retrieve RPN web service, no action is required. The employer can not amend RPN Numbers.
5	Leave Date	Incorrect Leave Date or no Leave Date reported	Validations errors will be included in the Revenue response JSON file. 1. Amend the Leave Date. 2. Generate a new normal submission file. 3. Print/Save the PDF and CSV file Control reports for your records. 4. Transfer the submission file to Revenue. See the section below for more details.
6	Pay Date	Incorrect Pay Date reported	1. Generate a Full Resubmission File. 2. Add the new pay date in the override pay date field. 3. Add an Override date for cheques (if applicable). 4. Chose the Browse location for the response file to be generated. 5. Click OK. 6. Save/print the PDF and CSV control reports for your records. 7. Transfer submission file.

	Data Item	Context	Action Required
			This process generates a delete line for the previous pay date entered, and a new payment date is included in the new Full Resubmission file.
7	Pension Tracing Number	Incorrect/missing Pension Tracing Number reported	1. If the pension tracing number is amended on the pension scheme, then this is picked up in the next normal submission file.
8	Shadow Payroll	Shadow Payroll error reported	2. Generate a Full Resubmission File. 3. Tick/Untick the Shadow Payroll Indicator as required in Pay Group Parameters. 4. Chose the Browse location for the response file to be generated. 5. Click OK . 6. Save/print the PDF and CSV control reports for your records. 7. Transfer Full Resubmission file. This process generates a delete line for the previous Shadow Payroll status entered, and a new status is included in the new Full Resubmission file.
9	Director	Incorrect Director status	This will only be corrected if this field has not been entered, or an incorrect Director value has been entered. This will only be corrected going forward in the current period.

6.3.1.1. Invalid PPSN Amendment Scenario

The PPSN is not replaced if there was no PPSN for the employee for previous payroll periods as that was a valid value at the time. i.e. the employee was on emergency tax.

1. A PPSN change means that all periods where the PPSN was different from the new one will be replaced.
2. This will be picked up automatically in the next submission file generated. It outputs the previous payslip items for the employee with the amended PPSN.
3. This will replace the normal payslips with Revenue with the corrected PPSN.

Example:

A 'W' PPSN is a valid PPSN. Upon review, DEASP may amend the W number through the RPN, which is not a correction.

If, however, an invalid payslip error for PPSN is retrieved from Revenue, that can be corrected by amending the PPSN. If that spans over many periods, then a number of normal submission files will be generated in payroll run reference. If the employee had a different PPSN for six payments, then six normal submission files will be generated and will need to be transferred and accepted by Revenue

6.3.1.2. Leave Date Amendments

For situations where a leave date validation error has been returned, the leave date may have been changed, or perhaps the change is required to be processed now.

1. If an employee is paid in period 1 and leaving in period 1, the payroll submission file and CSV report show the leave date and the payment values in the submission file along with all the other employees.
2. If an employee is leaving in period one and not paid, the file shows the leave date and zero for the payment values in the submission file along with all the other employees.
3. If a submission file was already submitted to Revenue for a leaver in period 1 and the leave date was changed subsequently before period 2 is complete, then the leave date is picked up by the next generation of a submission file and output the previous line item ID. The next generation may be before period 2 is complete or part of the submission for period 2.
4. If an employee has left in a previous tax year, and the leave date is amended now, this new leave date will be included on the new normal submission file and transferred to Revenue.
5. A change to a leave date will only correct the period during which the employee left and will update in all payslips for that period.
6. If recording a correction for an originally incorrect leave date, and the corrected end date falls into a new payroll period, the payroll period must also be updated to reflect the period to which the new end date relates.

Note:

If updating an incorrect leave date for an employee and the employee's new leave date falls in to another payroll period, then you need to update the P45 payroll period in *CorePay > Update > Utilities > Employee Utilities* screen.

6.3.2. Type 3 Pay Corrections Which Should be Reported to Revenue Before the Next Payroll Period

Type 3 pay corrections are only relevant where what was reported to Revenue on the payroll submission file did not happen. For example, a payment to an employee was removed from a bank file. However, it was reported to Revenue, and the employee did not receive the payment.

1. Cancel the payment for the employee.
2. Select the 'delete' option on the *Cancel Payment* screen.
3. A delete line item outputs on the submission file.
4. Revenue deletes the relevant submission item for the employee.

Cancel/Re-issue A Payment

Cancel Payment

Previous Year Recoupment	☐	Cheque No.	
PAYE Modernisation deletion	☐	Net Pay	

PAYE Modernisation (Back Office) - User Guide

Note:

- Where any correction affects several previous payroll periods, all relevant submission files will generate separately for each payroll period.

Pay Group	Description	Period	File	Batch	Transfer	Status	Check	Submission	Status	Confirmed
2242	Payroll Modernisation	201904	☐	☒	☒	☐	☐	Run Check	☐	☐
2242	Payroll Modernisation	201905	☐	☒	☒	☐	☐	Run Check	☐	☐
2242	Payroll Modernisation	201907	☐	☒	☒	☐	☐	Run Check	☐	☐
2242	Payroll Modernisation	201908	☐	☒	☒	☐	☐	Run Check	☐	☐

- The generated submission files must be transferred to Revenue by individually ticking **Transfer File** for each file.
- The payroll period being corrected is represented on the transfer screen.
- The reason for this is each payroll period has a payroll run reference. This is used to identify the payroll event to which the submission refers. The payroll run reference is a parameter in the URL that Revenue require.
- The Payroll Run Reference allows employers to get summary totals for payroll runs even if there have been corrections or multiple submissions for that logical payroll period.

6.4. Deleting a Submission File

6.4.1. Where to Delete a Submission File

The Delete Submission File can be generated after the payroll is run and submitted. This must be run:

- If an employee/pay group should have been excluded but were returned in error.
- If a Submission File was generated and transferred twice for a period in error. The duplicate file can be deleted.

Once the Delete Submission file generates, this should be transferred to Revenue, as per the standard transfer process.

Full guidance on how to do this is provided in section [3. Generating the Payroll Submission File](#).

6.5. Overpayments/Recoupments

6.5.1. Cancel/Re-Issue a Payment Screen

The Previous Year Recoupment and PAYE Modernisation deletion indicators will effect Overpayments/Recoupments. They can be found in the Cancel/Re-Issue a Payment Screen.

 Use of PAYE Modernisation Deletion Indicator:

The PAYE Modernisation Deletion indicator controls how the cancellation of a payment is reported to Revenue.

When to Enable: Enable this indicator only where the employee did not receive the original payment.

This includes situations such as:

- The employee was removed from the bank file before payment was made
- The payment was returned by the financial institution
- A cheque was issued but never received

System Behaviour

When enabled: The original payroll submission is deleted for the relevant pay period

A correction file (delete line item) is generated and sent to Revenue

The payment is treated as if it never occurred

Important: Do not enable this indicator where the employee received the payment. In these cases, the correction must be processed through standard reversal or recoupment methods.

Previous Year Recoupment Indicator:

The Previous Year Recoupment indicator is used where an overpayment relates to a previous tax year.

When to Enable: Enable this indicator for full or partial overpayments from a previous year and the original payment was received by the employee.

When enabled:

- The correction is treated as an out-of-year recoupment
- No standard payroll submission values are generated (in most scenarios)
- Adjustments are handled outside normal PAYE reporting requirements
- Year-end cumulatives are not automatically updated

Important: This indicator must only be used for previous year corrections where the employee received the payment. It should not be used for current year adjustments.

6.5.2. Managing Overpayments/Recoupments

 General Position:

The below table sets out Revenue's position regarding the recoupment of an overpayment of emoluments by an employer from an employee.

 Revenue Guidelines:

[Recoupment of Overpayments of Salary by an Employer from an Employee](#)

[PAYE Modernisation – Overpayment / Recoupment Examples](#)

PAYE Modernisation (Back Office) - User Guide

The following is a summary of the overpayments/recoupments process:

#	Recou pment	Alive / Deceas ed	Gross or Nett	Process / Comments
Still in Employment				
Current Year				
1	Full or Partial	Alive	Gross	- Recoup the gross overpayment from the Gross pay in the current year. - Where the overpayment can be processed through payroll going forward enter a negative timesheet for the relevant pay codes, to reduce the current gross pay. - Follow the money – report what is paid, when it is paid. - The recoupment amount is reported in the current payroll period main submission file.
				Overpayments that cannot be recouped through Payroll: Where the overpayment cannot be processed through payroll going forward use Cancel Payment for a full overpayment and Cancel Payment & Manual Payment for a partial overpayment.
				Full: - Where the original payment was received by the employee and is being subsequently recouped, Cancel Payment with PAYE Modernisation Deletion indicator OFF. Do not enable the Previous Year Recoupment indicator. Within the next available main submission file for that pay group, negative values related to the cancel payment will generate. - Where the original payment was not received by the employee (e.g., when an employee is removed from a bank file, the employee's payment was returned by a financial institution, or the cheque was never received) Cancel Payment with PAYE Modernisation Deletion indicator ON. Do not enable the Previous Year Recoupment indicator. Correction file (delete line item) will generate for the original pay period.
				Partial:

PAYE Modernisation (Back Office) - User Guide

				- Where the original payment was received by the employee and is being subsequently recouped, Cancel Payment with PAYE Modernisation Deletion indicator OFF. Do not enable the Previous Year Recoupment indicator. Issue a Manual Payment using the RPN which was used at the time of the original payment and also do not enable the Previous Year Recoupment indicator. Within the next available main submission file for that pay group, (negative values related to combined cancel & manual payment in this instance for the same payroll period) will generate. - Where the original payment was not received by the employee (e.g., when an employee is removed from a bank file, the employee's payment was returned by a financial institution, or the cheque was never received) Cancel Payment with PAYE Modernisation Deletion indicator ON. Do not enable the <i>Previous Year Recoupment</i> indicator. Correction file (delete line item) will generate for the original pay period. See section 6.5.3. Still in Employment – Current Year for a worked example.
Previous Year				
2a	Full or Partial	Alive	Nett	- Assuming the employee is active and being paid, recoup the gross overpayment from the Nett pay in the current year – you may do this over several pay periods if agreed with the employer. - Assuming the employee is active and not being paid currently (off pay) recoup the gross overpayment from the Nett pay in the current year when the person is next being paid – you may do this over several pay periods if agreed with the employer. - Use a voluntary deduction pay code with Previous Year Recoupment enabled – see section 8.3. View/Update Pay Code Parameters. - The recoupment amount is not reported on the submission file as there is no impact on Statutory Deductions. - The employee should contact Revenue for a refund of statutory deductions using a “Statement of Recoupment of Emoluments” from their employer. - The employee should contact DEASP for a refund of PRSI using a “Statement of Recoupment of Emoluments” from their employer.

PAYE Modernisation (Back Office) - User Guide

				- The employer should contact DEASP for a refund of Employer PRSI. - No automatic amendments are applied to the Maintain Year End Cumulatives screen. See section 6.5.4. Still in Employment – Previous Year for a worked example.
2b	Full or Partial	Alive	Gross	Scenario 2(b) Covers where the payment was not received by the employee. If the payment was received, then please revert to scenario 2(a). Assuming the employee is active and being paid, no recoupment is required from their Nett pay, as the overpayment was not received. The employer must amend the previous year's payroll submission to correct the reported gross pay and deductions by means of a cancelled payment. Assuming the employee is active and not currently being paid, no recoupment should be made when the employee returns to pay. No recoupment is required from their net pay when the employee returns to pay as the overpayment was not received. The correction must still be handled by amending the previous year's payroll submission, by means of a cancelled payment. No voluntary deduction pay code is required, as the overpayment was not received and no recoupment from pay will take place. This means the system will not report any recoupment on the submission file, as the correction is made through an amendment to the previous year's payroll submission. No Statement of Recoupment of Emoluments is required, since the employee never received the payment. - The employer must amend the previous year's payroll submission to correct the overstated gross pay and statutory deductions. - Update the Maintain Year End Cumulatives screen to reflect the corrected figures.
Left Employment				
Current Year				
3	Full or Partial	Alive	Nett	The employee may repay the value of the overpayment Net of tax to the employer. See section 6.5.5. Left Employment – Current Year for a worked example. Full:

PAYE Modernisation (Back Office) - User Guide

			- Where the original payment was received by the employee and is being subsequently recouped, Cancel Payment with PAYE Modernisation Deletion indicator OFF. Do not enable the Previous Year Recoupment indicator. Within the next available main submission file for that pay group, negative values related to the cancel payment will generate. - Where the original payment was not received by the employee (e.g., when an employee is removed from a bank file, the employee's payment was returned by a financial institution, or the cheque was never received) Cancel Payment with PAYE Modernisation Deletion indicator ON. Do not enable the <i>Previous Year Recoupment</i> indicator. Correction file (delete line item) will generate for the original pay period.
			Partial: - Where the original payment was received by the employee and is being subsequently recouped, Cancel Payment with PAYE Modernisation Deletion indicator OFF. Do not enable the Previous Year Recoupment indicator. Issue a Manual Payment using the RPN which was used at the time of the original payment and also do not enable the Previous Year Recoupment indicator. Within the next available main submission file for that pay group, (negative values related to combined cancel & manual payment in this instance for the same payroll period) will generate. - Where the original payment was not received by the employee (e.g., when an employee is removed from a bank file, the employee's payment was returned by a financial institution, or the cheque was never received) Cancel Payment with PAYE Modernisation Deletion indicator ON. Do not enable the <i>Previous Year Recoupment</i> indicator. Correction file (delete line item) will generate for the original pay period. A Manual Payment is not relevant as any partial payment due to the person must be processed through payroll in a subsequent payroll period, as a post cessation payment.
Previous Year			
4	Alive	Gross	The gross overpayment is recouped from the individual.

PAYE Modernisation (Back Office) - User Guide

				• The employee should contact Revenue for a refund of statutory deductions using a "Statement of Recoupment of Emoluments" from their employer. • The employee should contact DEASP for a refund of PRSI using a "Statement of Recoupment of Emoluments" from their employer. • The employer should contact DEASP for a refund of Employer PRSI.
				Full: • Where the original payment was received by the employee and is being subsequently recouped, Cancel Payment with PAYE Modernisation Deletion indicator OFF. Enable the <i>Previous Year Recoupment</i> indicator. Submission file details will not generate, No automatic amendments are applied to the Maintain Year End Cumulatives screen. • Where the original payment was not received by the employee (e.g., when an employee is removed from a bank file, the employee's payment was returned by a financial institution, or the cheque was never received) Cancel Payment with PAYE Modernisation Deletion indicator ON. Do not Enable the <i>Previous Year Recoupment</i> indicator. Correction file (delete line item) will generate for the original pay period. 6.5.3. Still in Employment – Current Year

! Example:

In July 2020 it was discovered that Adam had been placed on the wrong pay scale after the award of an increment in March. This had resulted in Adam being overpaid for 17 weeks with a total gross overpayment of €357. As the overpayment was discovered in the year in which it was made, it was agreed between Adam and his employer that he would repay the overpayment in 2020 over a 17 week period. Therefore, the gross amount overpaid to Adam is recouped by deducting €357 from his gross pay.

Prior to discovery of overpayment:			On discovery of overpayment:		
17 weeks March 13 th – July 3 rd			Applies for 17 weeks July 17 th - November 6 th		
Gross Pay:	618.00 p.w.	618.00	Gross Pay:	597.00 p.w.(Correct scale)	597.00
Gross Tax:	123.60		O/P Recoupment:	21.00	
Credit:	63.46		Pay:	576.00	576.00
Net Tax:	60.14		Gross Tax:	115.20	
USC:	14.50		Credit:	63.46	
PRSI:	24.72		Net Tax:	51.74	
			USC:	12.61	
Total Deductions:		99.36	PRSI:	23.04	
			Total Deductions:		87.39
Net Pay:		€518.64 p.w.	Net Pay:		€ 488.61p.w.
			As Adam paid income tax/USC/PRSI on the overpayment of €357, any refund for this will also be made by the employer.		

Table 1: Extract from a payroll submission before discovery of overpayment.

Pay date	Gross pay	Pay for Income Tax	Income Tax paid	Pay for USC	USC paid	Pay for PRSI	Ee PRSI paid @4%	Er Prsi paid @11.05%
13/03/2020	€618.00	€618.00	€60.14	€618.00	€14.50	€618.00	€24.72	€68.29

Table 2: Extract from a payroll submission following discovery of overpayment.

Pay date	Gross pay	Pay for Income Tax	Income Tax paid	Pay for USC	USC paid	Pay for PRSI	Ee PRSI paid @4%	Er Prsi paid @11.05%
17/07/2020	€576.00	€576.00	€51.74	€576.00	€12.61	€576.00	€23.04	€63.65

6.5.4. Still in Employment – Previous Year

Example:

In 2019 Megan was overpaid by a total of €1,200. This was discovered in May 2020. An instalment arrangement to recoup the overpayment was agreed upon between Megan and her employer. She will repay €40.00 per week for the remainder of the year 2020 and thereafter until the total overpayment has been repaid. As the overpayment occurred in a previous year, the out of year recoupment method must be used, i.e. gross overpayment must be collected from her net pay.

	€	€
Gross pay:	650.00 p.w.	650.00
Gross tax:	130.00	
Credits:	<u>63.46</u>	
Net Tax:	66.54	
USC:	15.94	
PRSI:	<u>26.00</u>	
Total Deductions:	108.48	<u>108.48</u>
Net Pay:		€541.52
Net Pay:	€541.52	
O/P Recoupment:	€ <u>40.00</u>	
Take Home Pay:	€501.52	

On completion of the recoupment plan, Megan can apply to Revenue for a refund of any income tax and USC that has been deducted on the €1,200 overpayment. Any out of year overpayment of employee and employer PRSI is a matter for the Department of Social Protection. The recoupment of the gross amount of the overpayment from net pay should not be reported to Revenue on a payroll submission. By recouping the gross amount from the employee, the employer has recouped an amount that includes both the net pay and any payroll taxes operated on the net pay.

Table 3: Extract from a payroll submission following recoupment demonstrating that the gross amount recouped is not reported to Revenue.

Pay date	Gross pay	Pay for Income Tax	Income Tax paid	Pay for USC	USC paid	Pay for PRSI	Ee PRSI paid @4%	Er PRSI paid @11.05%
08/05/2020	€650.00	€650.00	€66.54	€650.00	€15.94	€650.00	€26.00	€71.83

Previous Year – Overpaid for a Full or Partial Period – Still in Same Employment

- Recoup the gross overpayment from the **Nett** pay in the current year – you may do this over several pay periods if agreed with the employer.
- Use a deduction pay code with **Previous Year Recoupment** enabled – see section [8.3. View/Update Pay Code Parameters](#).
- Report as the money is recouped.
- The recoupment amount is **not** reported on the submission file as there is no impact on Statutory Deductions.
- Implement the gross from net pay deduction by either:
 - Entering a timesheet for a negative allowance pay code.
 - Setting up a reducing balance voluntary deduction pay code and using this to record the relevant periodic deduction value and balance due.

Note:

GL interface requirements should dictate whether the negative allowance or deduction pay codes are used.

- Regarding the negative allowance pay code; this should be configured as a non-taxable, non-PRSIable, non-ASCable, non-USCable pay code with a multiplier of -1.
- Regarding the reducing balance deduction pay code; this should be configured as a non-taxable, non-PRSIable, non-ASCable, non-USCable pay code with a multiplier of -1. It should also be configured as **reducing balance**.
- The employee should contact Revenue for a refund of statutory deductions using a "[Statement of Recoupment of Emoluments](#)" from their employer.
- The employee should contact DEASP for a refund of PRSI using a "[Statement of Recoupment of Emoluments](#)" from their employer.
- The employer should contact DEASP for a refund of Employer PRSI.
- No amendments required to *Maintain Year End Cumulatives* screen.

Recoupment Spanning a Number of Years

Where recoupment of an overpayment spans a number of years, recoupment can commence in the year in which the overpayment occurs, employing the current year recoupment method as set out in section [6.5.1. Still in Employment – Current Year](#). Recoupment of an overpayment, or part

of an overpayment, in subsequent years must use the out of year recoupment method as set out in section [6.5.2. Still in Employment – Previous Year](#).

6.5.5. Left Employment – Current Year

Revenue guidance is where an employee leaves employment in the current year and is required to repay an overpayment of salary, the employee may repay the value of the overpayment net of tax to the employer.

Example:

Áine left her employment with an employment ID of 1 in June 2020. In August 2020, her employer discovered that she was paid gross holiday pay of €450 to which she was not entitled. As the overpayment was discovered in the year in which it was made, Áine can repay the net overpayment to that employer in the current year. Áine agrees with the employer that she will repay the net overpayment of €398.52 in one repayment in September 2020.

	€
Gross overpayment:	450.00
Gross tax:	90.00
Credits:	<u>63.46</u>
Net Tax:	26.54
USC:	6.94
PRSI:	<u>18.00</u>
Total deductions:	<u>51.48</u>
Net Pay	398.52

Extract from a payroll submission following recoupment of the overpayment in September 2020.

Cessation date	Employment ID	Pay date	Gross pay	Pay for Income Tax	Income Tax paid	Pay for USC	USC paid	EE PRSI	ER PRSI
30/06/2020	1	20/09/2020	-€450	-€450.00	-€26.54	-€450.00	-€6.94	-€18.00	-€49.73

6.5.6. Deceased Employee – Current Year

! Example:

The following example sets out how the recovery of a payment, made following the death of an employee, should be processed in respect of payroll submissions made after 1 January 2019. An individual died on 31 January 2020, and payments for February 2020 and March 2020 continued to be made by an employer. The gross payment was €200 and the net payment was €150 in each month.

In August 2020, the employer started to receive payments in respect of the February 2020 and March 2020 payments.

Payment	Amount
August	€100
September	€100
October	€100

By September 2020, there has been a full recovery of the net payment for March (i.e. €150), therefore the March payroll can be amended and reduced to nil in September 2020. The employer can report a negative payroll figure of gross €200 with deductions of €50 e.g. income tax €40 and USC €10 (see Table 6 below). This is done without requesting an RPN.

By October 2020, the net payment for February 2020 (i.e. €150) has been recovered in full so the February payroll can be amended and reduced to nil. The employer can report a negative payroll figure of gross €200 with deductions of €50 e.g. income tax €40 and USC €10. This is done without requesting a Revenue Payroll Notification (RPN).

Table 6: Extract from payroll submission.

Cessation date	Employment ID	Pay date	Gross pay	Pay for Income Tax	Income Tax paid	Pay for USC	USC paid
31/01/20	1	01/10/20	-€200	-€200	-€40	-€200	-€10

As a result of this negative payroll submission, the employer's monthly statement will be reduced, and the deceased employee's record will be amended for the year of death.

6.6. Frequently Asked Questions

6.6.1. Amendment to Employee Reference

Question:

In the case where an employee reference is amended, does that impact Employment ID?

Answer:

No, impact on the Employment ID.

6.6.2. Cut-off for Submission Files for Previous Payrolls

Question:

What is the cut-off point at which you can no longer generate an amended submission file for the previous payroll period?

Answer:

Amended submission files can be generated for the previous payroll period, up to the completion of the payroll, i.e. Complete Update step for the current payroll.

6.6.3. End of Year Statements

You cannot generate "End of Year Statements" on PeopleXD. Revenue has confirmed "End of Year Statements" will be made available to employees through MyAccount. If an employee is unable to access MyAccount, they will be able to request a paper statement by contacting Revenue.

7. Advances / Mid-Month Payments

Commented [DL25]: I removed the reference to 'Under PAYE Modernisation'

7.1. Summary

Revenue has clarified the expected treatment for nett pay advances under real time reporting. Their response highlights that such advances are **not allowed** under real time reporting.

This impacts the following areas within the PeopleXD System:

- Where running sundry payments, split mid-month advances or advancing payments in other methods, where not taxed as at the time of payment:
 - Review your internal procedures and processes based on Revenue's advice.
 - Consider stopping advance payments to comply with the regulations.
- Where running a supplementary or pay-on-demand payroll, you can continue to do so as such payments are taxed at the time of payment, which is allowed under Revenue guidance.
 - A submission file is required to be returned at the end of each payment run.
 - The ability to create and return the submission is contained within the software.
- You should run a supplementary payroll where a mid-month payment is required. The supplementary process allows for a separate submission file to be generated/returned to Revenue for the payment. Refer to the **Supplementary Payroll** user guide for further details.

 **Note:** Supplementary payroll is available on Portal only.

7.2. Scenarios Presented to Revenue

Sundry Payments

A nett advance, typically used for late starter notifications where new starters are waiting on their first payment. This nett advance is deducted from the employee the first time they are paid.

7.3. Revenue's Response

1. Advance payment must be reported to Revenue the same as any regular payment, on or before the pay date.
2. Given submissions are reported in real time, and the employer should be able to make an RPN request for their new starter and have the RPN calculations for tax purposes at this point.
3. Therefore, you have the appropriate tax calculations available to correctly run a Payroll Run Submission file to the Revenue Commissioners.
4. You will, therefore, be preparing two separate Payroll Submission files accounting for the respective payments & deductions - one to account for the payment 'in advance' and then one to account for the balance of the salary when that payment becomes due for submission on or before the pay date.
5. Also, this practise is outlined in contravention of the current 2018 PAYE Regulations (See section 3.6.8 of the [Employers Guide to PAYE](#) 'Wage Payments in advance or on account') and continues to be in contravention in 2019 PAYE Regulations if your employer intends to continue the practice. It should be discouraged, and the employer's attention should be drawn to this.

7.3.1. Extract from Employer's Guide to PAYE

Section 3.6.8 of the [Employers Guide to PAYE](#) – Wage payments in Advance or on Account

Payments in advance or on account (including drawings in advance or on account of a director's remuneration and payments to or on behalf of a director in advance of the voting of remuneration) are pay for PAYE purposes. These payments are taxed as income of the income tax week or month in which they are paid and are subject to the operation of PAYE for that week or month.

When the remuneration is subsequently paid (or in the case of a director, voted) any excess over the payment already paid in advance should be treated as pay in the income tax week or month in which it is paid or voted. This remuneration is subject to the operation of PAYE for that week or month even though it may be in a later income tax year than the one in which the payment on account was made.

8. PAYE Modernisation - How to Configure

8.1. Overview

The purpose of this section is to outline the configuration required for PAYE Modernisation. The configuration focuses on the following 7 PAYE Modernisation Parameters:

1. Pay Code Parameters
2. Pay Group Parameters
3. Pension Parameters
4. Employee Parameters
5. PAYE Modernisation Parameters
6. Load Digital Certs
7. Data Mapping

These parameters are all located on the *CorePay > Update > PAYE Modernisation* screen.

The screenshot shows the 'PAYE Modernisation' window. The title bar reads 'PAYE Modernisation'. The window contains a toolbar with icons for navigation and actions. The main area is divided into sections. The top section, 'PAYE Modernisation', contains a 'Generate/Transfer' button and a 'Generate Submission File' dropdown menu. To the right of this section is a list of parameters: 01 - Pay Code Parameters, 02 - Pay Group Parameters, 03 - Pension Scheme Parameters, 04 - Employee Parameters, 05 - PAYE Modernisation Parameters, 06 - Load Digital Certificate, 07 - Data Mapping, and 08 - Company Parameters. The bottom section contains fields for 'Submission Type' (set to 'Normal Submission'), 'Pay Group', 'Period/Month', 'Employee', 'Override Payment Date', and 'Override Cheque Pay Date'. There are also 'OK', 'Cancel', and 'Browse' buttons at the bottom.

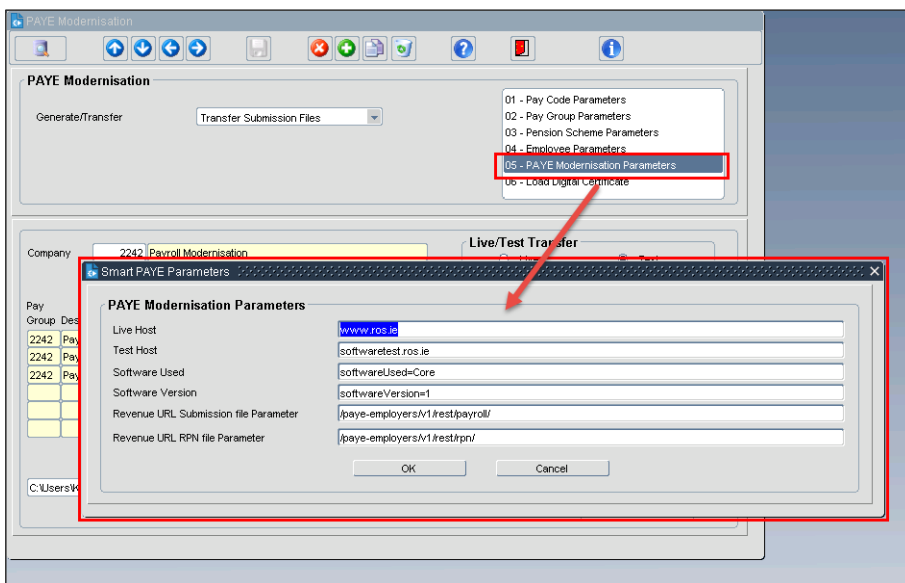

This document also guides the changes required for [Address Configuration](#) and the country mapping that is now required.

8.2. View PAYE Modernisation Parameters

Note: These parameters are preconfigured and do not require any end user input.

To view these parameters, follow the steps below:

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select **05 - PAYE Modernisation Parameters**

8.3. View/Update Pay Code Parameters

All existing Pay Codes need to be reviewed for a number of new parameters and updated as required.

Follow the steps below to view/update these new parameters:

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select **01 - Pay Code Parameters**

The *Pay Code Parameters* screen opens.

Note:

1. This includes a list of all Pay Codes on Payroll and a set of parameters that should be updated for each as required.
2. Pay Code information captured here outputs for employees on the *Payroll Submission File* once generated.
3. An AVC should **not** be mapped to the “pension type” column. AVC contributions should be mapped to EE AVC only

Pay Code	Description	Taxable Lump Sum	Non Taxable Lump Sum	Share Based Remuneration	EE AVC	Taxable Benefit	Medical Insurance	Previous Year Recoupment	Pension Type
50	Scaled Test	☐	☐	☐	☐	☐	☐	☐	
625	Advance Misc	☐	☐	☐	☐	☐	☐	☐	
1000	Salary	☐	☐	☐	☐	☐	☐	☐	
1001	Additional Salary	☐	☐	☐	☐	☐	☐	☐	
1002	Back Pay	☐	☐	☐	☐	☐	☐	☐	
1003	Occupational Salary Offset	☐	☐	☐	☐	☐	☐	☐	
1004	Additional Salary Arrears	☐	☐	☐	☐	☐	☐	☐	
1005	Basic Hours	☐	☐	☐	☐	☐	☐	☐	
1006	Basic Hours Arrears	☐	☐	☐	☐	☐	☐	☐	
1007	Holiday Pay (12.07%)	☐	☐	☐	☐	☐	☐	☐	
1008	Holiday Pay	☐	☐	☐	☐	☐	☐	☐	
1009	Holiday Pay Hours	☐	☐	☐	☐	☐	☐	☐	
1010	Holiday Pay Adjustment	☐	☐	☐	☐	☐	☐	☐	
1011	Holiday Pay Overtaken	☐	☐	☐	☐	☐	☐	☐	
1020	Grossed Up Payment	☐	☐	☐	☐	☐	☐	☐	

1. Review each Pay Code and set the parameters as required.

This table describes each parameter and guidance on when it is required. A list of these is shown below in the table:

Data Item	Description	When is this Required?
Taxable Lump Sum	For pay codes where a lump sum is being paid, and an amount of the taxable lump sum is included in <i>Pay for Income Tax</i> .	For any company where such pay codes are relevant, this parameter is mandatory. When the parameter is enabled, this is included when the <i>Payroll Submission File</i> generates.

Data Item	Description	When is this Required?
Non-Taxable Lump Sum	For Pay Codes where a lump sum is being paid, and an amount of the lump sum is not included in <i>Pay for Income Tax</i> .	For any company where such pay codes are relevant, this parameter is mandatory. When the parameter is enabled, this is included when the <i>Payroll Submission File</i> generates.
EE AVC	Additional Voluntary Contribution (AVC) Pay Code assigned to the employee.	When the parameter is enabled, this is included when the <i>Payroll Submission File</i> generates.
Share-Based Remuneration	Pay Codes where an employee's remuneration consists of shares in the company and is included in <i>Gross Pay</i> .	For any company where such pay codes are relevant, this parameter is mandatory. When the parameter is enabled, this is included when the <i>Payroll Submission File</i> generates.
Taxable Benefit	These <i>Pay Codes</i> consist of the amount of non-cash benefits provided to the employee included in <i>Gross Pay</i> , e.g. company car.	For any company where such pay codes are relevant, this parameter is mandatory. When the parameter is enabled, this is included when the <i>Payroll Submission File</i> generates.
Medical Insurance	Medical Insurance BIK must be associated with relevant Pay Codes.	Enable for the pay codes that are part of <i>Medical Insurance BIK</i> .
Pension Type	The <i>Pension Type</i> must be associated with the relevant pay codes.	Enable for the relevant pay codes. Set the Pension Types are as follows; 1. B - Retirement Benefit Scheme 2. P - PRSA

Data Item	Description	When is this Required?
		3. A - Retirement Annuity Contract
Previous Year Recoupment	This pay code indicator is to be used with a new pay code only.	The gross overpayment is deducted from net pay where an employee is "Living". This gross value will not be output on the payroll submission file, and the tax liability remains between the employee and Revenue. Section 6.5. Managing Overpayments for more details.

Note:

Where *Taxable Lump Sum* and *Non-Taxable Lump Sum* are applicable to the employer, each one requires their own Pay Code to be configured.

8.4. View/Update Pay Group Parameters – Post Year End Configuration Required

Reporting the "Expected Pay Periods" is a **mandatory part** of the post year end process. Select one of the "Expected Pay Period options" so PeopleXD can output this in the Payment Submission File.

Action is required for weekly, fortnightly, and 4-weekly pay groups where a week 53, 54 or 56 scenario is set to arise in the current tax year. If nothing is selected, PeopleXD will default to 52 weeks, 26 fortnights or 13 four-weekly periods depending on the pay frequency. No selection is required for monthly pay groups.

Revenue uses this to determine if a "week 1" or "cumulative" RPN is issued when an employee moves jobs or pay frequencies.

Follow the steps below to view/update these new parameters:

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select **02 - Pay Group Parameters**.

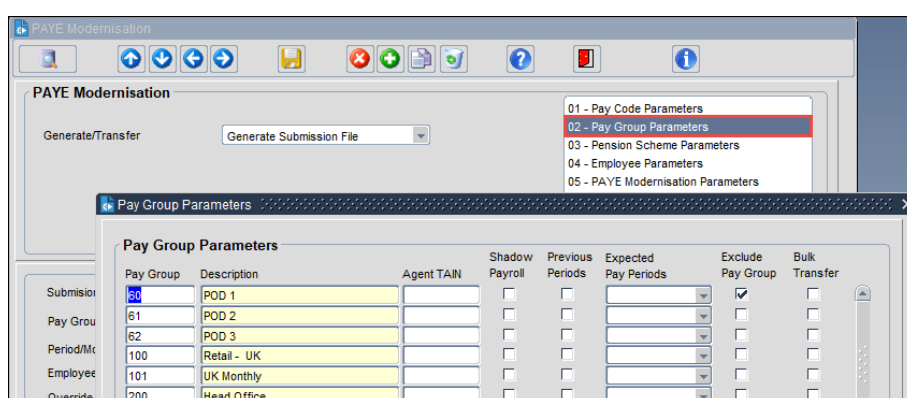

Commented [DL26]: I would remove 'existing'

PAYE Modernisation (Back Office) - User Guide

- a. The *Pay Group Parameters* screen opens. This includes a list of all Pay Groups on Pay and a set of parameters that should be updated for each as required.

Note:

Pay group information captured here is output for employees on the *Payroll Submission File* once generated.

1. Review each Pay Group and set the parameters as required.

This table describes each parameter and guidance on when it is required.

Data Item	Description	When is this Required?
Agent TAIN	TAIN = Tax Advisor Identification Number.	
	This is used to identify the agent if they are submitting on behalf of the employer.	Setting this parameter to enabled is mandatory where an agent is running payroll on behalf of an employer.
	This also ensures there is an established link between the employer and agent for the relevant payroll period.	The agent must enter their <i>Agent TAIN</i> number for their pay groups.

PAYE Modernisation (Back Office) - User Guide

Data Item	Description	When is this Required?
Shadow Payroll	This parameter is used to indicate if the pay group is running for a Shadow Payroll.	Setting this parameter to enabled is mandatory if running payroll for <i>Shadow Payrolls</i> .
Previous Periods	This parameter is used to indicate if the pay group is allowed to be run for Previous Periods.	Setting this parameter to enabled is required if needing to delete previous period submission file.
Expected Pay Periods	This is a mandatory part of the start of year process. Select one of the Expected Pay Period options so PeopleXD can output this on the Submission File if a week 53, 54 or 56 is required. This is used by Revenue to determine whether a 'Week 1' or Cumulative RPN should be provided when an employee moves jobs or pay frequencies. 12 Is not a valid option for Revenue, as monthly will only have a max of 52 weeks. Only monthly can be left blank. These values are cleared out as part of the year end clear-down process.	Select the relevant option from the drop-down menu: 13 14 (If a 14th four-weekly period 2020, i.e. pay date lands on 01st or 2nd of January) 26 27 (If a fortnight 27 is in 2020, i.e. pay date lands on 01st or 2nd of January) 52 53 (If a week 53 is in 2020, i.e. pay date lands on 01st or 2nd of January) No selection required for monthly.
Exclude Pay Group	This parameter is used if the pay group is to be excluded from PAYE Modernisation.	This disables the PAYE Modernisation validation check in the Validation Job for this pay group. There is no requirement for the PAYE Modernisation submission for the

Data Item	Description	When is this Required?
		current period to be made before payroll jobs in the next payroll period is run.
Bulk Transfer	Used in conjunction with Revenue Bulk Transfer of employment functionality. Requires pre-approval.	Only after permission received from Revenue & Core to use the Bulk Transfer of employment functionality. This results in a bulk move of employees between tax registered companies with no start/end dates reported in the final file from old pay group and first file from new pay group.

8.5. Assign Pension Tracing Number to Pension Schemes

Pension Tracing Numbers allow prospective retirees to trace pension entitlement from various employments during their careers.

Note:

From 2019, Pension Tracing Number will be taken from the Pension Scheme and not from the Sundry Profile screen.

Commented [DL27]: I would leave this in

PAYE Modernisation reporting allows the employer to add new *Pension Tracing Numbers* to each pension scheme.

1. These can occur more than once per employee in the *Payroll Submission File*.
2. Approved occupational pension schemes of PRSA's have an associated *Pension Tracing Number*.

Note:

Pension Tracing Numbers will be added to the *Pension Scheme* screen. This replaces the Pension Tracing Number on the Employee Sundry Profile level (defunct post 2018).

Commented [DL28]: I would also leave this in.

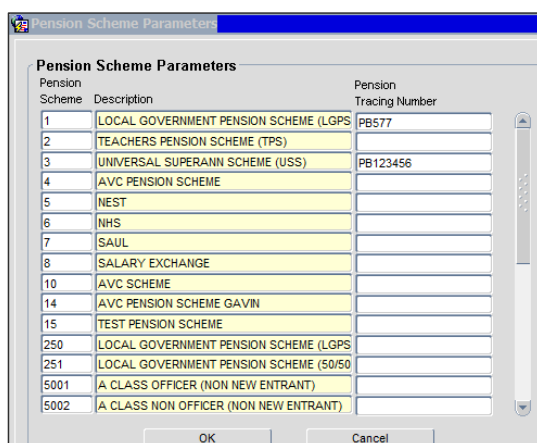

Follow the steps below to view/update the Pension Tracing Number for each Pension Scheme:

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select **03 - Pension Scheme Parameters**.

PAYE Modernisation (Back Office) - User Guide

The *Pension Scheme Parameters* screen opens. This includes a list of all Pension Schemes on Payroll.

3. Enter the *Pension Tracing Number* for each Pension Scheme and click **OK** to save.
 - a. The format for the *Pension Tracing Number* is 'PBXXXXXX' (made up of PB, and up to 6 digits), E.g. PB123456. PB1234 etc.

Pension Scheme	Description	Pension Tracing Number
1	LOCAL GOVERNMENT PENSION SCHEME (LGPS)	PB577
2	TEACHERS PENSION SCHEME (TPS)	
3	UNIVERSAL SUPERANNUATION SCHEME (USS)	PB123456
4	AVC PENSION SCHEME	
5	NEST	
6	NHS	
7	SAUL	
8	SALARY EXCHANGE	
10	AVC SCHEME	
14	AVC PENSION SCHEME GAVIN	
15	TEST PENSION SCHEME	
250	LOCAL GOVERNMENT PENSION SCHEME (LGPS)	
251	LOCAL GOVERNMENT PENSION SCHEME (50/50)	
5001	A CLASS OFFICER (NON NEW ENTRANT)	
5002	A CLASS NON OFFICER (NON NEW ENTRANT)	

8.6. View/Update Employee Parameters

Follow the below steps:

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select *04 - Employee Parameters*.

Commented [DL29]: I would remove 'existing'

PAYE Modernisation (Back Office) - User Guide

- Review the Directorship and PRSI exempt status of employees.
- If an employee is exempt from PRSI, select the appropriate reason from the drop-down menu.
- Enable **Exclude Employee** if an employee is to be excluded from a Payroll Submission.
- Enable **Bulk Transfer Exclusion** if you are doing a bulk transfer for this pay group but need the employee start/end dates to be sent to revenue as they are a starter/leaver.
- Ensure the **Exclusion Order** indicator is ticked for employees to which exclusion orders have been received.

Data Item	Description	When is this Required?
Director	There are two options on this list: Proprietary Director Proprietary Director is the company's beneficial owner or director who can control, directly or indirectly, more than 15% of the company's ordinary share capital.	If the employee is a director, select one of the options from the drop-down menu. If the employee is not a director, leave this blank.
	Non-Proprietary Director	

Data Item	Description	When is this Required?
	These are usually excluded from the obligation to submit an income tax return.	
PRSI Exempt	This identifies if the employee is exempt from PRSI.	 Note 1: The existing indicator can be enabled if employee is exempt from PRSI. For employees that are already flagged as <i>PRSI Exempt</i> on PeopleXD, this will already be enabled.  Note 2: PRSI Class M Employees on PRSI Class M should not be set to PRSI Exempt. Although Class M does not have a PRSI Rate, those employees are not exempt.
PRSI Exemption Reason	This is the reason for the PRSI Exemption in Ireland.	This must be selected if the <i>PRSI exempt</i> indicator is selected. Options include: - A1 Portable Document from EU Member State. - Certificate of coverage under Social Security Bilateral Agreement. - Notification of exemption for posted workers, other than above. - Employment of certain family members. - Under 16 years of age. - Employment on specific social welfare schemes. - Other

Data Item	Description	When is this Required?
		For employees that are already flagged as 'PRSI Exempt' on PeopleXD, these should be reviewed. If the reason is known, then you should select this option from the drop-down menu. Alternatively, if it is unknown, select 'Other'. If an employee is PRSI exempt, this is mandatory, if not selected employer will receive the "invalid payslip" error when transferring submission file to revenue.
Exclude Employee	Indicator to exclude employees from Payroll Submission File.	Employees who are non-taxable, non-PRSIable, non-pensionable etc. can be excluded from being output on the Payroll Submission File. To do this, tick the Exclude Employee indicator beside each relevant employee.
Bulk Transfer Exclusion	Indicator to exclude employees from Bulk Transfer Exclusions	If you are doing a bulk transfer for this pay group but need the employee start/end dates to be sent to revenue as they are a starter/leaver.
Exclusion Order	Indicator to highlight Employees with an Exclusion Order	Ensure the Exclusion Order indicator is ticked for employees to which exclusion orders have been received.

 Note:

The following will be added to the *Sundry Profile* screen:

1. Director Type
 - Proprietary Director
 - Non - Proprietary Director
2. PRSI Exempt Reason

Commented [DL30]: Leave this in

8.7. Address Data Configuration & Mapping

Commented [DL31]: For Pay Portal version of the guide, confirm with Darren what would be needed here.

8.7.1. Why is this Required?

The address is mandatory for employees where there is no PPSN on an employee's record. To support this requirement, some configuration steps must be completed on PeopleXD to ensure that employee address records are recorded correctly and mapped to the input expected by Revenue for the Payroll Submission File.

Note:

You may need to review external HR Interfaces/People Hub, i.e. Interfaces may need to be updated for this - both for address line 5 requirement and the county/country code.

The configuration steps required to be reviewed/updated include:

1. Ensure *Country* is populated as required.
2. Data mapping is required to ensure that where the address is returned to Revenue on the Payroll Submission File, the value matches the allowable Revenue values.

Note:

It is recommended that this configuration be repeated for all address types.

For Example:

If there are multiple address types for an employee, then the formatting of the country should be applied to all address types. There are two scenarios here:

1. The address type is set-up and used therefore must be configured.
2. The address type is set-up but not used, however it is available to use and therefore should still be configured. This will prevent inaccurate address input on the personnel profile.

Employee address reporting is only required where there is no PPSN on the personnel record.

Depending on your version of PeopleXD, the steps required to support differs:

1. V19+ Clients
2. Pre-V19 Clients

PAYE Modernisation (Back Office) - User Guide

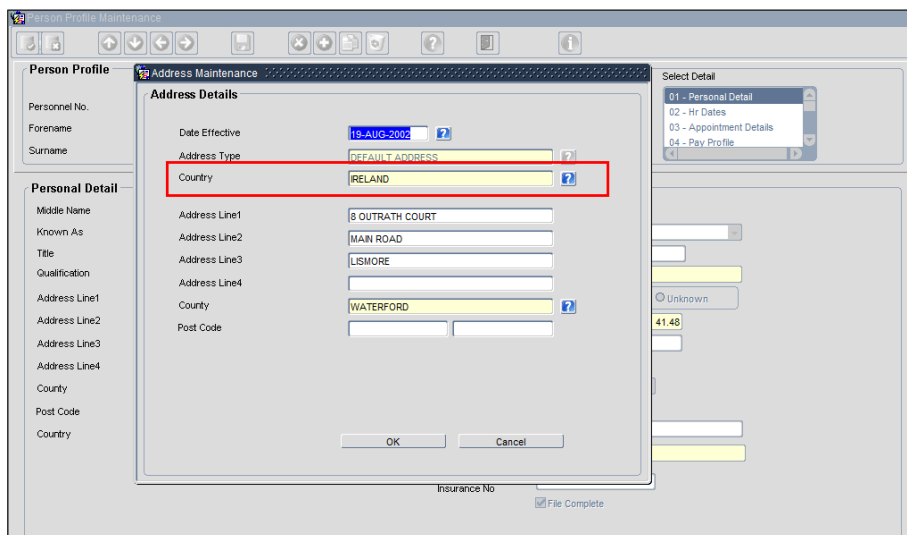

This is because the functionality was introduced in v19 to allow an organisation to configure different address types and layouts per country.

8.7.2. V19+ Clients

8.7.2.1. Map PeopleXD Country Reference Data to Revenue Countries

The country is a reference data item in PeopleXD for all clients.

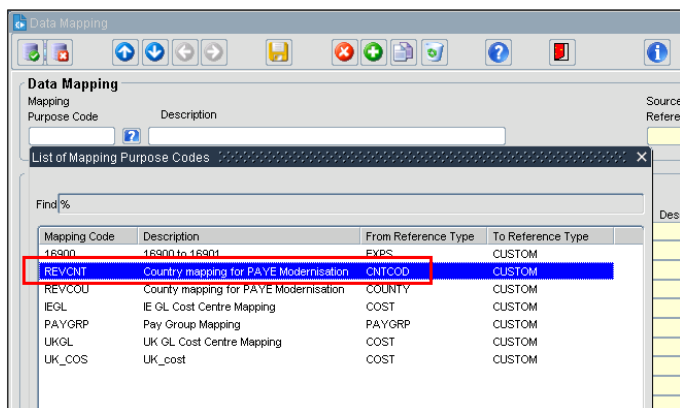

Clients may have employees with no PPSNs and addresses outside of Ireland, so country mapping needs to be configured for each relevant Country. PeopleXD country reference data needs to be mapped to match Revenue's country values who use [ISO 3166 Alpha-3](#).

The following steps are required to map the *Country* data:

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select **07 - Data Mapping** to open the Data Mapping screens.
3. Use the  button to select a *Mapping Purpose Code*.
4. Select "REVCNT" - *Country mapping for PAYE Modernisation*.

PAYE Modernisation (Back Office) - User Guide

5. Click **OK**.
6. Click the  button beside *Source Code*.
7. Search for Ireland.
8. Select IRELAND.
9. Enter *IRL* in the Destination Code field.
10. Press Enter to populate the description field.
11. Repeat Steps 6 – 10 to map all relevant Countries.
12. Click **Save**.

8.7.2.2. Add County to Address Layout

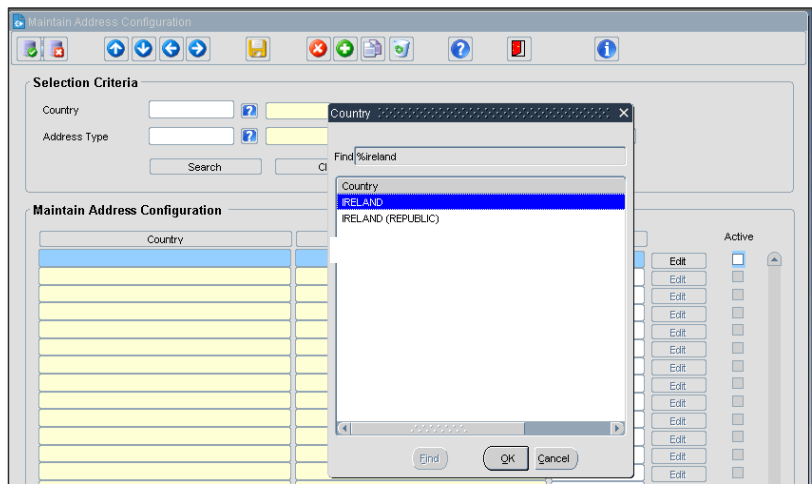

Note:

Revenue have confirmed that County is an optional free text field, so the following procedure is optional.

County is available for all v19+ clients. However, this functionality is configurable, so if *County* is not displaying, it can be configured in People Management.

Use the following steps to configure:

1. Navigate to *CorePersonnel > Reference > Reference A-C > Address Type Codes*.
2. Click the  beside *Country*.
3. Search for the Country – for this example, select *Ireland*.

4. Click **OK**.
5. Click **Search**.
6. In the *Maintain Address Configuration* section, click **Edit** beside the address type to be configured, i.e. as this is configurable, clients could have multiple address types displaying here.

This displays the current configuration.

The screenshot shows the 'Maintain Address Configuration' window with the 'Address Detail' section expanded. The 'Address Header' section contains fields for 'Effective Date' (01-JAN-1900), 'Country' (104), and 'Address Type' (DEFADD). The 'Available Address Elements' list on the left includes 'Organisation Name', 'Post Code', 'Country', and 'Line 5'. The 'Country / State' element is highlighted with a red box. The 'Address Element' table on the right shows the following details:

Line	Address Element	Element Label	Display	Mandatory
Line 1	Line 1	Address Line1	☒	☐
Line 2	Line 2	Address Line2	☒	☐
Line 3	Line 3	Address Line3	☒	☐
Line 4	Line 4	Address Line4	☒	☐
Line 5	Line 5	Address Line5	☒	☐
Line 6	Post Code	Post Code	☒	☐
Line 7	Country	Country	☒	☒
Line 8			☐	☐
Line 9			☐	☐

The 'Country / State' element is highlighted in red in the 'Available Address Elements' list. The 'Address Element' table shows 'Line 5' as 'Country / State'. The 'Country' field is set to '104' and the 'Address Type' is 'DEFADD'. The 'Effective Date' is '01-JAN-1900'. The 'Save' and 'Cancel' buttons are at the bottom.

PAYE Modernisation (Back Office) - User Guide

7. Amend the *Address Configuration* details, i.e. amend the label on Line 5 to display *County*.
8. Click the  button beside *Address Line5*. This deletes the data in this row.
9. Click on *County/State*. This turns blue.
10. Select the *Address Element* field. This populates *Address Element* and *Element Label* as *County/State*.
11. Select the *Display* indicator.
12. Relabel *County/State* to *County* in the *Element Label*.
13. Click **Save**.

Note:

These steps must be repeated for all Countries, not just Ireland. A list of all country codes is available [here](#).

8.7.2.3. Set Up County Code Reference Data

1. Navigate to *CorePersonnel > Reference > Reference Q-Z > Other References*.
2. Click  and search for "County Codes".
3. Click **OK**. This displays any existing county codes.
4. Add *Code* and *Description* for each of the 32 counties.

The screenshot shows the "Reference Code Maintenance" window. The "Reference Type" dropdown is set to "COUNTY". Below it, the "Reference Codes" section contains a table with two rows highlighted in blue:

Code	Description
WD	WATERFORD
KK	KILKENNY

5. Click **Save**.

8.7.2.4. Update Employee Address to Include Country

Now that the Address Layout has been updated to include County and Country (see [Add County to Address Layout](#)), the County field is available to set on the employee's address on *Personal Profile*.

PAYE Modernisation (Back Office) - User Guide

If the County and Country field is not already populated for an employee, follow these steps to update the address:

1. Click **Edit Address** on the *Personnel Profile* screen.
2. Select the relevant *County* and *Country*.

1. Click **OK**.
2. Click **OK** again.
3. Acknowledge the pop-up alert if the original *Date Effective* was used.
4. The address has been updated.

8.7.3. Pre v19 Clients

8.7.3.1. Map Country Reference Data to Revenue Countries

The country is a reference data item in PeopleXD for all clients.

PeopleXD country reference data needs to be mapped to match Revenues country values who use [ISO 3166 Alpha-3](#).

The following steps are required to map the Country data:

1. Go to *CorePay > Update > PAYE Modernisation*
2. Select **07 - Data Mapping** to open the Data Mapping screens.
3. Use the  button to select a *Mapping Purpose Code*.
4. Select "REVCNT" - *Country mapping for PAYE Modernisation*.
5. Click **OK**.
6. Click the  button beside *Source Code*.
7. Search for Ireland.
8. Select *IRELAND*.
9. Enter *IRL* in the Destination Code field.
10. Press Enter to populate the description field.
11. Repeat Steps 6 – 10 to map all relevant Countries.
12. Click **Save**.

8.7.3.2. Update Employee Address to Include County and Country

 Note:

As per above, Revenue have confirmed that County is no longer mandatory. If it is available, it is free text (1-30 characters). County configuration steps below are optional.

In pre v19 versions of PeopleXD, the address layout and country reference data are now available. However, the county is still required to be captured on the employee's address if you wish to return county. In this case, it is required to record the country in *Address Line 5* for all employees.

PAYE Modernisation (Back Office) - User Guide

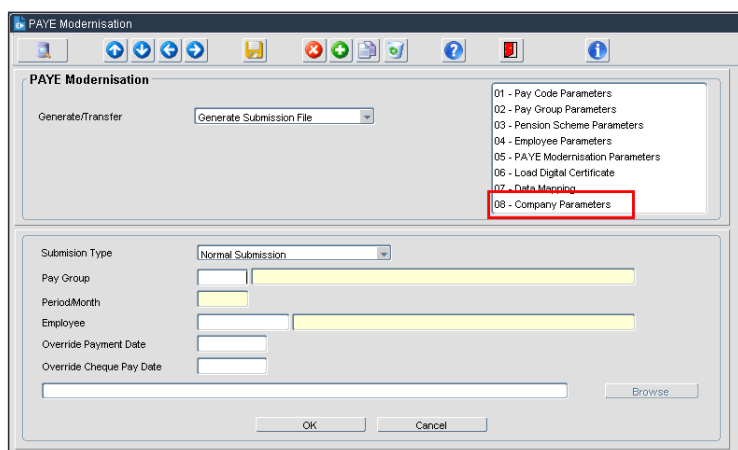

Use the following process to update the address if required:

1. Click **Edit Address** on *Personal Profile*.
2. Type the county in the *Address Line 5* field.
 - a. Take care to use the same County value for all records, as this needs to be mapped to Revenue's expected counties. i.e. always use "Cork", not a mixture of "Cork" and "Co. Cork".
3. Select the *Country* from the list available.
4. Click **OK**.

8.8. Company Parameters – Setting Agent TAIN at Company Level

A Company Parameter is available to allow you to set Agent TAIN at the company level. To do this:

1. Click **08. Company Parameters**.

PAYE Modernisation (Back Office) - User Guide

2. Add *Agent TAIN* to each relevant company.

Company	Description	Agent TAIN
1	Arcadia Group Ltd	
2	Arcadia Group Multiples Ltd	
3	Arcadia Group Ltd	
4	Arcadia Group Ltd Jersey	
5	Arcadia Group Ltd Guernsey	
6	Arcadia Group Ltd France	
8	Arcadia Group Ltd Netherlands	
9	Arcadia Group Ltd Uls	
11	Arcadia Group Ltd Isle Of Man	
200	Arcadia Group Ltd	
201	Arcadia Group Ltd	
1600	1600 UK	
1601	1601 Irish	
1602	1600 UK	
1603	1601 Irish	

3. Click **OK**.

8.9. Configure Proxy Servers

Some customers have proxy servers and may wish to configure the system to accommodate this.

To do this:

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Click **PAYE Modernisation Parameters**.

PAYE Modernisation (Back Office) - User Guide

The screenshot shows the 'Smart PAYE Parameters' dialog box. The 'Generate/Transfer' section has a 'Generate Submission File' button. The 'Smart PAYE Parameters' dialog box is open, showing a list of parameters on the left and input fields on the right. The parameters listed are: Live Host, Test Host, Software Used, Software Version, Revenue URL Submission file Parameter, Revenue URL RPN file Parameter, Proxy URL, Proxy Username, Proxy Password, and Detailed Log. The Proxy URL, Proxy Username, and Proxy Password fields are highlighted with a red rectangle. The Detailed Log checkbox is checked. The dialog has OK and Cancel buttons at the bottom.

3. Add the proxy URL
4. Add a Proxy Username and Password.
5. Click **OK**.
6. Click .

8.10. Digital Certificates

8.10.1. What is a Digital Certificate?

Individuals, companies and other entities need the ROS *Digital Certificate* to access online services for business taxes. It is also required by agents who wish to access online services for their clients.

A Digital Certificate is required for each company. Loading the Digital Certificate is a one-off step. It is required to set up the link between the company and Revenue to allow direct online communications, e.g. for RPN retrieval and transferring of files.

Revenue provides the employer with the relevant Digital Certificate. These are available to the employer via their www.ROS.ie profile. Employers must log in to ROS to retrieve and download the *Digital Certificate* and *Certificate Password*.

Note:

Agents who are running payroll on behalf of a company must log on to ROS and retrieve an *Agent Digital Certificate* and the relevant *Certificate Password* using their Tax Advisor Identification Number (TAIN).

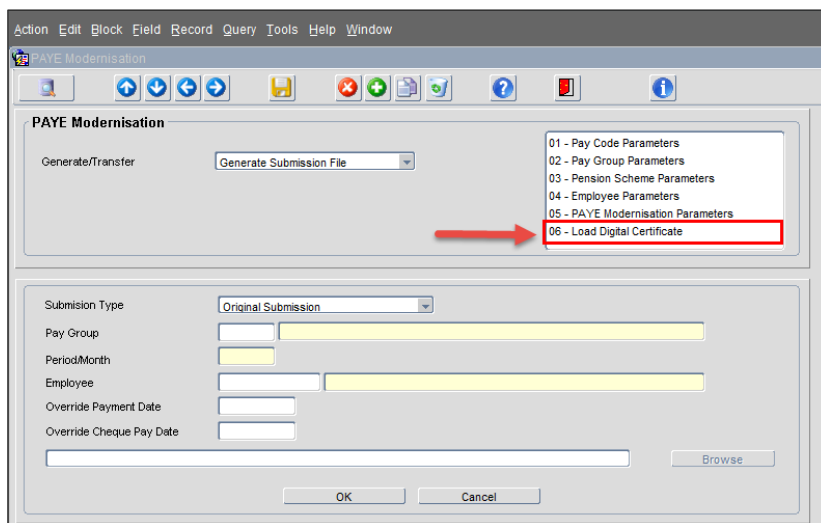

8.10.2. Load Digital Certificates

Follow these steps to load the Digital Certificate(s) to PeopleXD.

Note:

This must be completed for all companies.

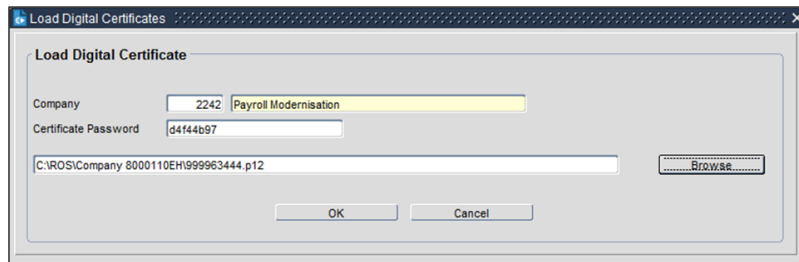

1. Go to *CorePay > Update > PAYE Modernisation*.
2. Select **06 - Load Digital Certificate** from the parameters section.

3. On the *Load Digital Certificates* screen,
 - o Enter the *Company Reference Number* and press *tab/enter* to populate the company details.
 - o Enter the *Certificate Password* provided by ROS.

PAYE Modernisation (Back Office) - User Guide

- Click **Browse** to upload the *Digital Certificate* file from the location where it was downloaded.

4. Click **OK**.

A pop-up message appears to say the '*Digital Certificate has been loaded successfully*'.

5. Repeat the steps above for all companies.

More information is available on [Managing ROS Digital Certs for Employees and Agents](#).

Commented [DL32]: Check this is still valid

8.10.3. Using PREM Certs to Restrict Access to Employees

Where you wish to restrict access, e.g. a director's payroll & staff payroll, a PREM can be used. The PREM cert is linked to a newly created, unique PAYE Registered Number.

Note:

Please note that this option requires the setting up of a new payroll Company on PeopleXD and taking the employees through the leaver and re-joiner process to move them from their current Company in to the new Company.

Please refer to Revenue guidance on how to create a PREM Certificate (Via My Enquiries).

Once created, please upload the PREM Cert, using the normal Load Digital Cert process outlined above.

PAYE Modernisation (Back Office) - User Guide

8.10.4. Digital Cert Expiry

Digital certs expire after two years. An expired digital cert is flagged in the return response json file.

Process for amending:

1. Retrieve new cert from Revenue.
2. Load new digital cert.
3. Transfer the same original submission file.

Commented [DL33]: I would move this under the main digital cert section as , after PREM certs

8.11. How to Configure FAQs

8.11.1. User Access to PAYE Modernisation Screens

The *Update > PAYE Modernisation* screen is controlled via a menu option:

Menu Option	System
Installed System	CorePay
Menu Option	<i>Update – PAYE Modernisation</i>

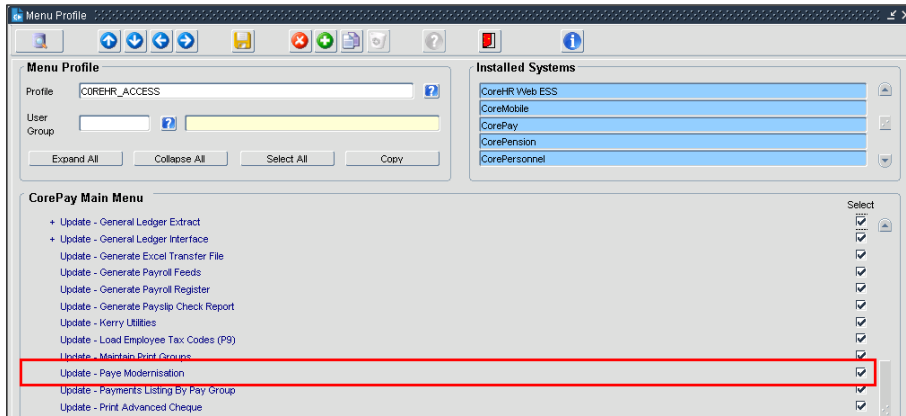

Commented [DL34]: See comments below – we might be able to remove this section.

This is needed to see this option on the Update menu.

The Super User should follow the steps below to add this menu option to the necessary Menu Profiles.

1. Go to *CoreSecurity > Profile > Menu Profile*.
2. Enter the required menu profile in the *Profile* field or click the  button.
3. Select *CorePay* from Installed Systems.
4. Expand *Main Menu – Update*.
5. Enable the *Update – PAYE Modernisation* by checking the box.

PAYE Modernisation (Back Office) - User Guide

6. Click the  button to save.

The *PAYE Modernisation* menu option is now available under *Update* in Payroll for users who have the Menu Profile selected for their Username.

8.11.2. I.T. Requirements

The transformation of how Revenue accepts and transfer information in and out of Payroll requires a significant change in the form of a new technical interface. The changes are managed primarily through the PeopleXD software updates and the cloud solution that Revenue is providing.

Note:

In accordance with the PeopleXD N-2 policy, a Legacy Support Service came into effect for a number of PeopleXD versions from Dec 31st of 2018. Issues raised in 2019 by customers on these versions relating to the PAYE Modernisation and Year End software update, will be addressed by the Customer Support team in accordance with the definition of Legacy Support, i.e. responses will be managed on a “reasonable endeavours” basis. For further information on the PeopleXD N-2 Policy and how you can sign up, please contact your PeopleXD Account Manager.

Commented [DL35]: Can you review this section with Darren to see if it should still be included. It probably should as a reference point. However, it might be better to push to a later stage in the guide as it's not something that existing customers or new customers should have to focus on initially in config.

Commented [B036R35]: Added to the list to ask Darren.

Commented [B037R35]:

PAYE Modernisation (Back Office) - User Guide

For **on-premise clients** only, there are four elements that you need to put in place to support the new interface, and those are listed below.

- **Open SSL**

OpenSSL is required to be implemented to decrypt the Asymmetric Keys used to sign the Json messages sent to Revenue with the individual Users Revenue Key Pair.

Clients that use a Windows-based platform for their PeopleXD database will need to install OpenSSL on the database servers. After the installation of *OpenSSL* on Windows, you need to ensure it can be called from any location by adding it to the path system variable, if not already included.

The Payroll Listener Service needs to be restarted after the installation of the path system variable.

- **Web-Based Access**

You need to ensure that you enable access to the Smart Pay Web Service End Point URLs from the database server tiers.

You must allow Port 443 to have web-based access from the database tiers to the relevant URLs. This must be configured for each LIVE and UAT environment. The current URLs (subject to change by Revenue) are below, and further detail is provided by Revenue on <https://revenue-ie.github.io/payee-employers-documentation>. Endpoints are covered in the *Web Service Integration Guide* in the *PAYE Web Service Specifications* section.

TEST: <https://softwaretest.ros.ie>

LIVE: <https://www.ros.ie>

- **Oracle Version**

Please ensure the version of Oracle that is installed on the PeopleXD server is 11.2.0.4 or higher. If you require a patch to be applied, please raise a support case with a Request Type of "Live Technical Request". For hosted clients, this is managed by PeopleXD, so no further action is required.

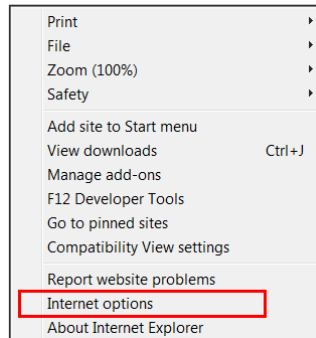

PAYE Modernisation (Back Office) - User Guide

- **Enable TLS 1.2 on IE Browser**

The following IE security parameter is required but may be disabled by default: *Use TLS 1.2*.

Follow these steps to enable this parameter

- In Internet Explorer, click  to open the **Tools** menu.

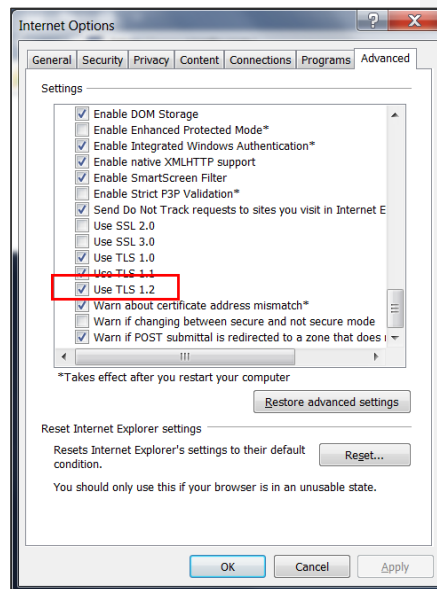

- Select **Internet Options**.

- Click the **Advanced** tab.

- Scroll down to the *Security Parameters*.

- Enable the *Use TLS 1.2* setting and click **OK**.

5. Database Server Operating System Time

Note:

For on-premise sites, ensure that the operating system that the Database Server runs on is keeping accurate time with GMT.

Revenue will accept files as long as the header timestamps are no more than 1 minute ahead of or behind the time of their server. If the timestamp is in the future, Revenue will not accept the file.

8.11.3. User Security

Retrieval of RPNs is based on Pay group access.

Commented [DL38]: Not sure this is required.

Commented [BO39R38]: Added to list of questions for Darren

8.11.4. County Mapping

There is no longer a requirement to do so, as the field is now optional however the guidance for mapping county in to the address structure will still be available in the University Content if you wish to do this.

Commented [BO40R38]:

Commented [DL41]: Not sure this this still required

8.11.5. Duplicate PPSNs

From 2019, removing a suffix of from a PPSN may result in duplicate PPSNs, i.e. in cases where an employee has dual employments. There are two parameters in PeopleXD to allow for duplicate PPSNs. To set these:

CorePersonnel:

1. Go to *CorePersonnel > Reference > Reference Q-Z > System Parameters*.
2. Set *NI Validate Rule* = "Allow duplicates but warn".
3. Save changes.

PAYE Modernisation (Back Office) - User Guide

CorePay:

1. Go to *CorePay > Update > Utilities > System Configuration > General Tab*.
2. Set Duplicate PPS Numbers to 'N' or leave this blank. ('Y' does not allow duplicate PPS numbers on the Personal Profile screen).
3. Click **Save**.

Note:

Even though suffixes have been removed from the PPSN after the clear down, the tax year end returns for 2018 (e.g. P35) are picked up from the *Maintain Year End Cumulatives* screen where the previous PPSs, including suffixes, will be retained for 2018. If employers submit an employee listing (alignment report) to Revenue this will highlight any personnel with dual employments. See Revenue's [Employment ID Guide](#) for further details.

Note:

If employers submit an employee listing (alignment report) to Revenue this will highlight any personnel with dual employments. See Revenue's [Employment ID Guide](#) for further details.

8.11.6. Setting Agent TAIN (Tax Advisor Identification Number) at Company Level

Agent TAIN should be set at company level, to identify the agent who is submitting on behalf of the employer and ensuring that an agent link exists for this employer-agent relationship. This is configured on the Company Parameters screen. To do this:

1. Click **08. Company Parameters**.

PAYE Modernisation

Generate/Transfer Generate Submission File

- 01 - Pay Code Parameters
- 02 - Pay Group Parameters
- 03 - Pension Scheme Parameters
- 04 - Employee Parameters

2. Add Agent TAIN to each relevant company.

[illegible]

3. Click **OK**.

You are required to contact Revenue for the Agent TAIN. See www.Revenue.ie for more detail.

8.11.7. Cancel Payments

Cancel payments is not new, but the existing cancel payments functionality has been enhanced to include the following changes:

- The employer must select if the cancellation of the payment is a deletion, i.e. the payment never occurred, and a delete line item will be output on the Correction Submission File. Otherwise, the cancel payment values will be reduced on the submission file for the employee.
- The cancel payment functionality was amended so that if a cancellation is made, PRSI Class and PRSI Weeks are written out to the Payroll Submission File as negative values as per Revenue guidelines for PRSI.
- If a recoupment is received from an employee for the previous year, then the Previous Year Recoupment Indicator must be selected for the correct treatment of tax liability.
- If the cancel payment is a recoupment for previous years, and the employee is deceased, then recoupment will be output on the Correction Submission File with negative values.

8.11.8. Manual Payment

Manual payments are not new, but the existing Manual Payments functionality has been enhanced to include the following changes:

1. The Manual Payment functionality was amended so that if a manual payment is issued the PRSI Class and PRSI Weeks are written out to the Payroll Submission File as negative values or positive values where applicable as per Revenue guidelines for PRSI.
2. Manual payment negative net pay can be saved.
3. If a manual payment is issued the PRSI Class and PRSI Weeks are written out to the Payroll Submission File as negative values or positive values where applicable as per Revenue guidelines for PRSI.
4. A new Previous Year Recoupment Indicator has been added to the Manual Payment screen.
 - The following validation rules have been added to the Manual Payment Screen as well:
 - Users can't enable the previous year recoupment indicator when recording a manual payment if the payroll period recorded is in the current tax year.

PAYE Modernisation (Back Office) - User Guide

- Users can't record an issue (payment) date on the main payment screen for the current tax year if enabling the previous year recoupment indicator.
5. If a manual payment is a Recoupment, and the employee is deceased, then the recoupment will be output with negative values. Otherwise, it will not be returned on the Payroll Submission File if the employee has no date of death recorded or deceased indicator selected.
 6. An amendment has been made to ensure the employer enters the PRSI pay code for employer and employee if EE is not PRSI exempt.
 7. PRSible value for Employee PRSI and Employer PRSI is now required on the Manual Payment screen.

8.11.9. Allow Negative Payments at Employee Level

Employers may be required to add negative Nett Pay values, e.g. where an employee has been overpaid but has since reimbursed the company. This value will need to be entered as a negative value and returned to Revenue as such in a Payroll Submission File.

Use the following process to apply:

1. *Employee > Advanced Employee Features > Amend Employee Sundry Profile*
2. Click the Additional Work Details tab
3. Tick the **Allow Negative** indicator

The screenshot shows the 'Maintain Sundry Employee Details' window. The 'Sundry Details' section at the top includes fields for 'Employee Reference' and 'Name'. Below this, the 'Additional Work Details' tab is selected. The 'Work Details' section contains various input fields for employee information, including 'Out of Benefit Ind.', 'OOB Effective Date', 'Print Payslip Periods', 'Annual Leave', 'Annual Leave YTD', 'Alt. Cost Centre', 'Payable Order', 'Vote', 'GL Code', 'Exclude APTH', 'Job share', 'Commission', 'Increment Due Date', 'Deferral Counter', 'Agresso CAT_6', 'Abatement Calculation', 'Abatement Ceiling', 'Pensioner Start Date', 'Bonus Year', 'Pension Tracing Number', 'Free Fuel Reinstated Indicator', and 'PSPR Category'. The 'Allow Negative' checkbox is highlighted with a red box, and a red arrow points to it, indicating that it should be checked to allow negative payments.

PAYE Modernisation (Back Office) - User Guide

This can also be set at pay group level.

1. Reference > Pay Groups

The screenshot shows the 'Pay Groups' form in the PAYE Modernisation (Back Office) system. The form is titled 'Pay Groups' and has a menu bar with 'Action', 'Edit', 'Block', 'Field', 'Record', 'Query', 'Tools', 'Help', and 'Window'. Below the menu bar is a toolbar with various icons. The form contains several fields for data entry, including 'Pay Group Code' (1002), 'Company Reference', 'Pay Frequency Indicator', 'Wages/Salary Indicator', 'Start Period', 'Input Period', 'Completed Input', 'Completed Update', 'Payroll Period', 'Maximum Hours', 'Maximum Gross', 'Maximum Nett', 'Annual Allowance In', 'Validation Bypass', 'Pay on Timesheet only', 'Pay Leavers', 'Allow Negative' (checked), 'Status', 'Payslip', 'Message', 'Pay Period Hours', 'Pay Period Days', 'Days in Year', 'Positive Input', 'Retrospection Indicator', 'Employee Shift Indicator', 'Unprocess Zero Gross', 'Telephone Number', and 'Extension Number'. A red arrow points to the 'Allow Negative' checkbox, which is checked and highlighted with a red box.

8.11.10. Employer Gross Medical Insurance

Gross Medical Insurance, paid by an employer for the employee, must be reported on the Payroll Submission File. This is mandatory if applicable. Employers must ensure this value is supplied to them from their health insurance provider.

The Gross Medical Insurance value paid by the employer is used to cross-check the amount paid when the employee applies for medical insurance relief credit.

Note:

This is different than the medical insurance reporting for P35 2018 where the amount of medical insurance eligible for tax relief paid by the employer is included as notional pay for the employee during the year.

9. Software Changes for the 2020 Tax Year

9.1. Transitioning Employees from 2019 to 2020

Revenue has confirmed you need to request 2020 RPNs for all employees, under each employer registration number, for the first payroll run of 2020. If you receive no 2020 RPN for an employee, or if the tax credits on the 2020 RPN are zero, you cannot use the 2019 RPN. 2020 RPNs will be available from December 2019.

 **Note:** If no 2020 RPN is available, PeopleXD will operate PAYE and USC on an emergency basis.

 **Exemption Order:** An employee with an exemption order will revert to an emergency basis for tax and USC until a 2020 RPN is retrieved.

 **Exclusion Order:** Where an employee has an exclusion order applied, continue to apply the exclusion order until you receive a new RPN for the employee. If the employee is on a single year tax cert exclusion order, they should revert to the emergency basis until a 2020 RPN is applied.

9.2. Emergency Basis Roll Over

Revenue has issued new instruction that affects employees on an emergency basis when payroll rolls over into a new tax year. The emergency tax “week number” count, no longer resets to zero at the beginning of a new tax year but continues from the last period of the previous tax year. To cater for this, the Year End Cleardown no longer resets the emergency week to zero.

Example: A weekly paid employee who provides their employer with a PPS number but is not registered with Revenue, i.e. no RPN available, commences work in income tax week 46 of 2019 and leaves in week 5 of 2020. The emergency basis applies throughout:

1. Weeks 46, 47, 48 and 49 are the first four weeks of employment for the purposes of the emergency procedure
2. Weeks 50, 51 and 52 are weeks five, six and seven for the purposes of the emergency procedure
3. Weeks 1, 2, 3 and 4 of 2020 are weeks eight, nine, ten and eleven of the emergency procedure.

To view the emergency week number count:

1. Go to *CorePay > Employee > Cumulatives > Amend Cumulative Pay Details*.

Maintain Current Employment Cumulatives

Note: The emergency tax week number increments each week, starting from the date joined, regardless of whether the employee works.

9.3. Employment Cessation Date on RPN

Following a Revenue instruction, the RPN now includes the date an employee ceases employment. This field populates when the employment, to which the RPN relates, is ceased by either the employer or employee. PeopleXD uses this field, when making a post-cessation payment, to distinguish between RPNs for live and ceased employments. See section [2.2.9. Employment Cessation Date on RPN](#)

9.4. Retrieve RPN by PPSN

A new call option "Retrieve RPN by PPSN" is has been added to the *Load Employee PAYE/RPN Certificates* Screen. See section [2.2.5. Retrieve RPNs by PPSN](#)

9.5. PAYE Modernisation Submission Changes

A new column has been added to the payment submission file for the pay period. The reported pay period will be used by Revenue for in-year reconciliation to determine the allocation of tax credits and SRCOPs.

 **Note:** The pay period is determined by both the pay date and the pay frequency.

The Revenue reporting rules are as follows:

1. 1 – 53 where pay freq is weekly
2. 1 – 52 where pay freq is quarterly, bi-annual, annual, other
3. 1 - 27 where pay freq is fortnightly
4. 1 – 12 where pay freq is monthly
5. 1 – 14 where pay freq is four-weekly

 **Note:** In the case of employees on a week one basis, Revenue Services can accurately determine if a week one basis can be removed.

Points to note:

1. This change only applies to 2020 submissions.
2. The payroll period reported for an employee is the pay period in which the payroll is operating regardless of whether an employee is on a week one, cumulative, or emergency tax basis.
3. For holidays paid in advance, the "Pay Period" is reported as the period number of the last week of holidays. For example, in Week 20, you are paying an employee one week of normal pay plus two weeks of holiday pay. In this case, you would report the "Pay Period" as 22.
4. This field "Pay Period", appears on the PDF/excel file produced when you generate the Payment Submission file.
5. This field "Pay Period", has been added to the PAYE Modernisation History BI/Insight view.

See the [Revenue guidance](#) on Weekly and monthly income tax calendars.

9.6. RPN Cleardown by Company

A new field has been added to give you the ability to clear down the RPNs by company. Previously, the cleardown RPN function cleared down RPNs for all companies.

See section [2.2.18. RPN Cleardown by Company](#)

9.7. Expected Payroll Periods – PAYE Modernisation 02 - Pay Group Parameters

Reporting the "Expected Pay Periods" is a **mandatory part** of the post year end process. Select one of the "Expected Pay Period options" so PeopleXD can output this in the Payment Submission File.

Action is required for weekly, fortnightly, and 4-weekly pay groups where a week 53, 54 or 56 scenario is set to arise in the current tax year. If nothing is selected, PeopleXD will default to 52 weeks, 26 fortnights or 13 four-weekly periods depending on the pay frequency. No selection is

required for monthly pay groups. Revenue uses this to determine if a “week 1” or “cumulative” RPN is issued when an employee moves jobs or pay frequencies.

Update to section [8.4. View/Update Pay Group Parameters – Year End Configuration Required](#) to highlight that Year End Configuration is required.

9.8. EmploymentID Field

A change was made to increase the visible size of the EmploymentID field. See section [2.2.10. Retrieving RPNs for Rejoiners](#)

9.9. Employees Moving Pay Groups

A change has been introduced as part of year end delivery to prevent an active employee from between two pay groups where the pay groups are in different companies. An employee can still move between two pay groups of the same company.

This change ensures that an employee is first reported as a leaver in the relevant Payroll Submission. This change was made to prevent issues whereby the correct process of ending the employee in company A first before moving them into company B is not followed.

9.10. Start/Leave Dates to Roll Over Year

Revenue has issued an instruction permitting the reporting of start and leave dates from a previous tax year from January 2020.

Example Scenarios

Scenario A:

On the calendar date 31st, December 2019, an employee is updated to record a leave date of the 28th December 2019. The employee is paid for the full month of December 2019, and the recalculation is actioned January 2020.

Result: Revenue confirmed that it is correct to report this leave date in the January 2020 submission file.

Scenario B:

On the calendar date, 1st January 2020, an employee is updated to record a leave date of the 28th December 2019. The employee is paid for the full month of December 2019, and the recalculation is actioned in January 2020.

Result: Revenue confirmed that it is correct to report this leave date in the January 2020 submission file.

Scenario C:

On the calendar date 31st, December 2019, an employee is set up with a start date of the 28th December 2019. The employee is paid for the first time in January 2020.

Result: Revenue confirmed that it is correct to report this start date in the January 2020 submission file.

Scenario D:

On the calendar date, 1st January 2020, an employee is set up with a start date of the 28th December 2019. The employee is paid for the first time in January 2020.

Result: Revenue confirmed that it is correct to report this start date in the January 2020 submission file.

9.11. PAYE Modernisation – Week 53, 54 and 56

PeopleXD grant Week 53, 54 and 56 tax credits, SRCOPs, and USC COPs on a “Week 1” basis (i.e. employees on a “Cumulative” basis in week 52 switch to a “Week 1” basis in week 53).

Assuming an updated RPN has not been received:

- Employees on a “Week 1” basis in week 52, stay on the week one basis in week 53.
- Employees on an “Emergency” basis in week 52, stay on the emergency basis in week 53
- Employees with a USC exemption, continue to be exempt in week 53.

9.12. End of Year Statement

You cannot generate “End of Year Statements” on PeopleXD. Revenue has confirmed “End of Year Statements” will be made available to employees through *MyAccount*. If an employee is unable to

access *MyAccount*, they may request a paper statement by contacting Revenue. This will include details of your pay and deductions from all employments for that tax year.

9.13. RPN call for 2019 in 2020

After 1st Jan 2020, it will no longer be possible to call 2019 RPNs. This change applies to both services, retrieve RPNs and create new RPNs, and will continue in subsequent years.

10. Appendix

10.1. Statement of Recoupment of Emoluments

Name of Employee		
PPS Number of Employee		
Name of Employer		
Employer's Registered Number		
Amount of overpayment in respect of the year ____.		
Years and Amounts in which the Years Amounts overpayment is/will be recouped from net pay.	Years	Amounts

10.2. Making a Claim for a Repayment of Tax/USC

A claim for a repayment of income tax and USC is only relevant where the recoupment refers to prior year overpayments. Where out of year recoupment occurs, the employee can make a claim to Revenue for any repayment of income tax and USC that may be due. He or she should submit their claim to Revenue by post or through Myenquiries with the appropriate statement from their employer setting out full details of the amount of emoluments overpaid and the timeframe for recoupment of the overpayment.

Revenue must apply the statutory 4-year time limit for making a claim for repayment of tax e.g. in 2020, a repayment of tax can be made for the years 2016 – 2019. Where an individual makes a valid claim for a year (e.g. a claim for year 2016 must be made by 31 December 2020), but the overpayment will not be totally recouped from him or her for a number of years, Revenue can make a refund at a later date, but only after the overpayment has been repaid in full to the employer - see example 3 below. However, a repayment can only be made where Revenue holds a valid claim.

PAYE Modernisation (Back Office) - User Guide

To make a valid claim for repayment of PAYE and/or USC, the employee must contact Revenue and provide full details of the claim. Where the recoupment is made in full within the 4-year time limit, Revenue will make any refund that may be due. Where the recoupment extends beyond the 4-year time limit, an employee should:

1. advise Revenue that they wish to make a claim for repayment of tax for the relevant year e.g. 2016, but that the overpayment will not be fully recouped from him or her by the employer for a number of years e.g. extending to 2021,
2. forward the statement from the employer as set out in the Appendix,
3. when the overpayment has been totally recouped by the employer, e.g. in 2021, the employee should then request Revenue to make any repayment that may be due in respect of the relevant year e.g. year 2016.

Further information on the statutory 4-year time limit, and making a valid claim, is available in Tax and Duty Manual Part [37-00-30](#) on the Revenue website.

Example:

Refund for an overpayment spanning a number of years.

In July 2020, it was discovered that John has been on the wrong pay scale since 2014. This has resulted in an overpayment of emoluments to him of €7,200 (see Table below). John and his employer came to an agreement that he would repay this over the course of 4 years from 2020 to 2023 as follows:

Year 2020

For the remainder of 2020, the recoupments in respect of January to June 2020, are deducted from his gross pay under the current year recoupment method outlined in section [6.5.1. Still in Employment – Current Year](#).

Year 2021 and subsequent years

For the remainder of the instalment arrangement, the out of year recoupment method set out in section [6.5.2. Still in Employment – Previous Year](#).

John needs to make a valid claim to Revenue.

PAYE Modernisation (Back Office) - User Guide

Overpayment to John by his employer spanning a number of years.

Year	Amount Overpaid €	Latest date to forward Valid Claim to Revenue	Valid Claim Y/N	Refund to be made by:
2020	900	N/A	N/A	Employer
2019	1,500	31/12/2023	Y	Revenue
2018	1,400	31/12/2022	Y	Revenue
2017	1,200	31/12/2021	Y	Revenue
2016	1,000	31/12/2020	Y	Revenue
2015	800	31/12/2019	N	N/A - outside the 4-year time limit
2014	400	31/12/2018	N	N/A - outside the 4-year time limit
Total	7,200			

On completion of the repayment for each individual year, John will be able to claim any overpaid tax back from Revenue, i.e. once 2016's overpayment has been recouped in full, John can claim for a refund of tax for 2016. However, John will not be able to claim for a refund of tax for the years 2014 and 2015 as these years are outside the 4-year time limit. John will however be able to submit a valid claim for the subsequent years, e.g. a claim for year 2016 must be made to Revenue by 31 December 2020, even though the overpayment will not be totally recouped from him for a number of years. Provided Revenue hold a valid claim for the year 2016, any refund that may be due can be made later, after the overpayment has been paid back in full e.g. in/after 2023.

10.3. Unlinked Payslips

Unlinked payslips are when records in Revenue are unmatched this occurs when a submission is made for an employee and they do not have a PPS number. The following is an explanation from Revenue on how they manage unlinked payslips:

Unlinked payslips occur when the PPSN is not included on the payslip/s submitted. This can lead to issues for employees, for example:

- Incorrect Statements of liability to issue
- Incorrect Employment Detail Summaries to issue
- Incorrect PRSI contributions reported to Department of Social Protection

PAYE Modernisation (Back Office) - User Guide

It can also have short or long term consequences for the employee when trying to access state benefits.

This can be rectified retrospectively by adding the PPSN to each payslip once the PPSN has been supplied.

In cases where an employer makes a submission without a PPSN for the employee the following details must be submitted on the payslip. The employees:

- First Name
- Family Name
- Date of Birth
- Address
- Employer Reference

Revenue use the Employer Reference and name for auto matching purposes. When the employer is reporting the PPSN to Revenue for the first time, they must ensure that the employees Employment Reference and Name match the details on all previously submitted payslips. If these details do not match, these submissions will remain unlinked until corrected by the Employer and/or the PPSN is added.

To maintain the employees records it is vital that employers check the information they have. Any errors in the spelling of the first or family name and/or DOB can be corrected on previously submitted payslips before the submission of the PPSN for the first time. Where this is not done the employer must make the amendments to the previous payslips and ensure the records are correct on all future submissions.

Where manual matching by Revenue is required the 'First Name', 'Family Name', 'Date of Birth' and 'Address' are used.

Below are some possible scenarios that could occur leading to unlinked payslips:

Scenario 1:

An employer submitted payslips for John Ryan on 1, 8, and 15 September without a PPSN. The payslips contained John's First Name, Family Name, Date of Birth, Address, and a unique Employer Reference. John provided his PPSN before the 22 September pay run. However, the Employer Reference on the 22 September payslip did not match. The Employer corrected the Employer Reference on the 22 September payslip to match the previous submissions and these payslips can now be linked and recorded on the employee record.

PAYE Modernisation (Back Office) - User Guide

Payslip Items	1, 8, & 15 September Payslips	22 September Payslip	Corrected 22 September Payslip
First Name	John	John	John
Family Name	Ryan	Ryan	Ryan
DOB	01/01/88	01/01/88	01/01/88
PPSN	Not provided	Not provided	1234567S
Employer Reference	10	<u>12</u>	10

Scenario 2:

Jane Walsh joins ABC Corp in July without a PPSN. Her first payslip on 8 July includes her First Name, Family Name and DOB, along with a unique ERN. Jane notifies her Employer of a misspelled Family Name on the 8 July payslip. The Employer corrects this on the 15 July payslip. Jane PPSN is reported on the 22 July payslip. However, the linking fails due to a mismatch in Family Names between the 8 July and 22 July payslips. To update the records correctly, the Employer must a/mend the Family Name and included the PPSN on the 8 July payslip to ensure linking is successful.

Payslip Items	8 July Payslip	15 July Payslip	22 July Payslip	Corrected 8 July Payslip
First Name	Jane	Jane	Jane	Jane
Family Name	Walshe	Walsh	Walsh	Walsh
DOB	21/06/95	21/06/95	21/06/95	21/06/95
PPSN	Not provided	Not provided	6543210A	
Employer Reference	ABCCorp1	ABCCorp1	ABCCorp1	ABCCorp1
