1. Overview

This document contains the details of how Real Time Information (RTI) works within the PeopleXD application.

This document covers the following:

- RTI Preparation
- RTI Data Files
- Configuring RTI
- Generating and Transferring Submission Files
- Process Reminders
- Non Standard Payments
- HMRC Feedback
- RTI Schema Changes
- Insight

2. RTI Preparation

2.1. Preparing Payroll for RTI

2.1.1. Register with the HMRC gateway

Ensure user is registered with the HMRC for each company tax number. This is carried out on the HMRC website (<http://www.hmrc.gov.uk/online/index.htm>). As part of this process HMRC will provide you with a username and password which are required in order to be able to successfully return the RTI files.

2.1.2. Accessing the HMRC gateway

Your IT department must confirm the technical pre-requisites have been completed. Please see technical guide for further details on this. Below is a summary of those requirements.

1. Confirm with their DBA team that they can connect to the internet directly from the database server, or alternatively,
Ensure that they allow any databases to submit to the following URLs in order to ensure clients can successfully access the HMRC Internet Gateway:
 - The live site is <https://transaction-engine.tax.service.gov.UK/submission>
 - The test site is <https://transaction-engine.tax.service.gov.uk/submission>
2. Confirm with their DBA team that they can connect to the internet directly from the PeopleXD database server;
 - Ensure users have access to **dbms crypto** package.
 - Ensure users have access to access **dbms lock** package.
3. Clients on version 16.1.1 or higher must ensure to execute the required ACLs so that files can be transferred to HMRC as well. Please contact for further details on this.

This must be completed as soon as possible and in advance of implementation.

2.1.3. Download HMRC software

Your organisation's payroll department will need the ability to retrieve notifications of national insurance number (NINO) updates from HMRC; this is made possible by using the PDV tool (provided by HMRC), which needs to be installed on the payroll user(s) PC. This tool allows you to view any DPS notifications (i.e. National Insurance Number updates) and will allow for these notices to be retrieved or downloaded. Further details on the PDV tool are available at <http://www.hmrc.gov.uk/payerti/tools/pdv/index.htm#1>

2.1.4. Transmitting Data Files

PeopleXD have developed a package and system to provide you with this service which eliminates the need for Third Party Providers to transmit outbound RTI related information to the HMRC Internet Gateway.

2.2. **BACS Provider**

The BACS file is created by the payroll application and then transmitted by a third-party tool. You must contact your third-party provider and confirm they can handle one of the following file layouts. It is important to schedule these changes with your provider directly to ensure you are ready for go-live. For further information the BACS requirements can be found on HMRC site (<http://www.hmrc.gov.uk/rti/cross-reference.pdf>).

2.2.1. BACS Layout 1

- Employee Sort Code
- Employee Account Number
- Employee Constant
 - Format – 099
- Company Sort Code
- Company Account Number
- Company Constant
 - Format – 0000
- Payment Value
- Company Description

- Building Society Reference
- Employee Name
- RTI HASH Tag
 - System generated random 4 digit string used as a cross reference with the Internet Gateway Submission.

2.2.2. BACS Layout 2

- Employee Sort Code
- Employee Account Number
- Employee Account Name
- Payment Value
- Building Society Reference
- Reference
 - Employee ID
- RTI HASH Tag
 - System generated random 4 digit string used as a cross reference with the Internet Gateway Submission.

2.3. Multiple Periods of Employment

This subject matter is very relevant to how RTI returns are made as per the question and answer below from the HMRC FAQ on RTI. See <http://www.hmrc.gov.uk/rti/employerfaqs.htm>

This is a fundamental part of RTI and hence it is the first item we highlight in this document.

Q: How will the system cope with an employee who resigns and is rehired in the same month with two corresponding payslips (two separate contracts)?

A: The system will count the two employments as separate by operating on the information submitted by the employer. The last payment from the first employment should have a date of leaving. The first payment from the new employment should include the starting information including start date and should not take into account pay and tax information from the previous

contract when calculating the year to date figures. If the employer is using payroll ids they must ensure the second contract is set up using a different payroll id.

Essentially all employee cumulative pay and deduction details i.e. Pay, SSP, SMP, PAYE, NIC EE/ER, Student Loans and so forth need to be split and reported into:

- Previous Employment This Employer
And
- Current Employment This Employer

This is because, on the FPS returns the cumulative details reported to HMRC, are as follows:

Return	Cumulative Details	Comment
Normal FPS	Current Employees Only	Current Employment only.

2.3.1. Leave & Rejoin Process

Because of the requirement to split employee cumulative details into the different periods of employment i.e. previous employments and current employment, an employee must get a P45 produced in the payroll in which they are leaving.

Some organisations have a rule where, if the days between contracts are greater than X days then it breaks the employee's service, in which case the employee must get issued with a P45. A parameter called **"Service Break Days"** in the Personnel system parameters screen facilitates this requirement. (See later in this document how this parameter is configured).

RTI requirements for splitting an employees pay into different employments will have an impact on the HR rejoining process. When an employee however has a leave and rejoin date recorded (ending one contract and starting another) and the dates are in the SAME pay period this will have an impact for the end user as illustrated in the following examples:

This has implications for the HR process and how employees are made dormant.

If an employee is leaving and rejoining in the same pay period then, in order to ensure that:

1. The employee gets a P45 representing cumulative details up to their leave date and
2. The employee cumulative details from their rejoin date only are represented on the next FPS

HR **must** do one of the following:

- a. Do not REJOIN the employee until AFTER the payroll has been run and completed and the P45 produced i.e. wait until the next pay run (i.e. pay the employee the arrears in the following pay period)

OR

- b. Assign a **new** employee reference to the person

2.3.2. Service Break Days

The simple answer is to decide how many days between leave and rejoin breaks the employee's service and enter this as the "Service Break Days" Parameter.

Example 1

Assume Leaving **05 Aug** and Rejoining **06 Aug i.e. 1 day gap**

Service Break Days	End User Continuous Employment Decision	Restriction
0	User won't be asked. The system decides it is not continuous employment	Cannot enter rejoin date until after Aug Payroll is processed
1	As above	As above
2	User will be asked to decide if Continuous Employment or not.	If Continuous Employment then Rejoin date can be recorded immediately else (Not Continuous Employment) Rejoin date cannot be recorded until after Aug Payroll. (P45 will be issued as part of Aug Payroll) End if

Example 2

Assume Leaving **05 Aug** and Rejoining **08 Aug i.e. 3 day gap**

Service Break Days	End User Continuous Employment Decision	Restriction
0	User won't be asked. The system decides it is not continuous employment	Cannot enter rejoin date until after Aug Payroll is processed
1	As above	As above
2	As above	As above
3	As above	As above
4	User will be asked to decide if Continuous Employment or not.	If Continuous Employment then Rejoin date can be recorded immediately else (Not Continuous Employment) Rejoin date cannot be recorded until after Aug Payroll. (P45 will be issued as part of Aug Payroll). End if

Example 3

Assume Leaving **05 Aug** and Rejoining **18 Aug i.e. 13 day gap**

Service Break Days	End User Continuous Employment Decision	Restriction
0	User won't be asked. The system decides it is not continuous employment	Cannot enter rejoin date until after Aug Payroll is processed
1	As above	As above
2	As above	As above
3	As above	As above
4	As above	As above
5	As above	As above

Service Break Days	End User Continuous Employment Decision	Restriction
6	As above	As above
7	As above	As above
8	As above	As above
9	As above	As above
10	As above	As above
11	As above	As above
12	As above	As above
13	As above	As above
14	User will be asked to decide if Continuous Employment or not.	If Continuous Employment then Rejoin date can be recorded immediately else (Not Continuous Employment) Rejoin date cannot be recorded until after Aug Payroll. (P45 will be issued as part of Aug Payroll) End if

Example 4

Assume Leaving **19 Aug** and Rejoining **1 Sep i.e. 13 day gap**

Service Break Days	End User Continuous Employment Decision	Restriction
0	User won't be asked. The system knows that the dates are in different pay periods in which case payroll issue a P45 in the Aug payroll.	Can enter rejoin date immediately
1	As above	As above
2	As above	As above
3	As above	As above
4	As above	As above

Service Break Days	End User Continuous Employment Decision	Restriction
5	As above	As above
6	As above	As above
7	As above	As above
8	As above	As above
9	As above	As above
10	As above	As above
11	As above	As above
12	As above	As above
13	As above	As above
14	User will be asked to decide if Continuous Employment or not.	If Continuous Employment then Rejoin date can be recorded immediately else (Not Continuous Employment) Rejoin date cannot be recorded until after Aug Payroll. (P45 will be issued as part of Aug Payroll) End if

2.4. RTI Payment Date

The RTI Payment Date is set by the user when they generate the RTI FPS File.

- Go to *Update > Real Time Information (RTI)*. 2.
- Select FPS from the File Type drop-down menu.
- Enter the Pay Group in the Pay Group field or click to select a Pay Group from the LOVs.

The screenshot shows the 'Generate RTI Files' dialog box. It has a title bar with standard window controls. Below the title bar is a toolbar with icons for file operations. The main area contains several sections: 'Generate/Transfer' with a dropdown set to 'Generate RTI'; 'File Type' with a dropdown set to 'FPS'; 'FPS Type' with a dropdown set to 'Normal FPS'; 'Live/Test Run' with radio buttons for 'Live' (selected) and 'Test'; 'Pay Group' with a text box containing '1230' and a dropdown showing '1230 University UK'; 'Period/Month' with a text box containing '202003'; 'Late Reason Code' with an empty text box; 'Payment Date' with a text box containing '30-JUN-2020' (highlighted with a red box); and an 'Employee Parameters' button. At the bottom are 'OK' and 'Cancel' buttons.

Where no payment date is provided by the user when generating the RTI File then the payment date reported back to HMRC in the RTI FPS file is the processing date + ESS Date Paid Offset.

Example: If the processing date used for the pay group is Thursday and the ESS Date paid offset is set as 1 then the RTI file will report back payment date as Friday.

ESS Date Paid Offset is found at *Reference -> Pay group -> Page 3*.

To ensure the correct payment date is being returned to HMRC please review the ESS Date paid offset for all pay groups.

2.5. Claim Employment Allowance

Companies claiming the employment allowance must ensure they have configured the system to specify which companies they are claiming for

Reference Menu > Maintain SSP/SMP Parameters > RTI Parameters > Company Details

Next, identify if the organisation is claiming the employment allowance. It is up to you to decide which company or charity will claim the allowance.

- 'Yes' - If a company is claiming the employment allowance.
- Blank – If a company is not claiming the employment allowance.
- 'No' – If a company has previously claimed the employment allowance but was not eligible to do so.

No action is needed here if the employment allowance is not being claimed.

Note:

The RTI file only flags if the allowance is being claimed. HMRC will upon receiving notification of the claim automatically apply the reduction based on the Employment Allowance.

You will see on the EPS report how much, if any, employment allowance can be used to reduce payment owed to HMRC.

Pay3600EPS	CorePay 20.x.x(COREHEAD)				User : COREHR		Page : 1 of 1

————— End of Report —————								

3. RTI Data Files

3.1. Outbound Files

3.1.1. Normal Full Payment Summary (FPS)

The normal FPS shows the employees **current employment cumulative only** (from the start of the tax year or since the employee rejoined) and also the equivalent figures processed in the current pay period.

The normal FPS must be submitted **before** you move on to processing your next pay period.

What employees are included on this submission?

- Only employees who were paid in the current pay period.
- All employees deemed to be irregular paid employees (see configuration rules screen section for this) regardless of whether they have been paid or not. These employees have to be included or otherwise HMRC will deem them to be dormant after 13 weeks.

3.1.2. Employer Payment Summary (EPS)

EPS stands for Employer Payment Summary. An Employer Payment Summary (EPS) can be sent if no payments are made to any employees in a tax month or you want to recover statutory payments, NICs compensation on statutory payments. If an EPS is submitted before the 19th day of the applicable month (on time) then the recoveries will be offset from the FPS payments. If the EPS is sent after the 20th day then HMRC will apply the offset in the following month.

A client will only need to submit an EPS where the circumstances detailed above apply.

However, at the end of the tax year a Final EPS must be submitted prior to running the year end clear down. This step is referenced in the Year End User Guide.

3.1.3. Earlier Year Update (EYU)

EYU stands for Earlier Year Update. It is required if an adjustment needs to be made to a previous RTI tax year. This will only apply for corrections in previous years where a client was returning PAYE using RTI.

An FPS can only be sent up until 19th April following the end of a tax year. After this any corrections need to be made on an EYU. Non-RTI years will still be corrected via amended P35/P14s as per the existing PAYE arrangement.

Note:

From April 2021 the EYU file is defunct and replaced by a Prior Year FPS. This means that corrections for previous tax years 2020 or higher will now be made via Prior Year FPS file submissions. Corrections for years prior to this will continue to be made via the EYU file.

3.1.4. Prior Year FPS

From April 2021 Prior Year Corrections are now made via the FPS File Submission. A key part of this change is that this now means when reporting the correction, we now report the final Year To Date figure back to HMRC. Whereas the EYU use to report the value of the adjustment to be made. The UK Year End user guide will cover the Prior Year FPS in more detail.

3.2. **Inbound Files**

3.2.1. NINO Verification

When you submit an FPS HMRC will automatically create a file for you to retrieve NINO updates for employees who have an incorrect NINO or have no NINO.

Download HMRC software

Your organisation's payroll department will need the ability to retrieve notifications of national insurance number (NINO) updates from HMRC. This is made possible by using the PDV tool (provided by HMRC), which needs to be installed on the payroll user(s) PC. This tool allows you to view any DPS notifications (i.e. National Insurance Number

updates) and will allow for these notices to be retrieved or downloaded. The software can be downloaded from the HMRC website (<http://www.hmrc.gov.uk/payee/tools/pdv/> and <http://www.hmrc.gov.uk/payerti/getting-started/using-payee-online.htm>).

3.2.2. NINO Verification Load File Facility

To load the file PeopleXD will develop an upload facility. For more on this see solution details section underneath.

3.3. Forms Replaced by RTI

3.3.1. P14, P35, P45, P46

All of the above electronic returns to HMRC are now all returned on the RTI FPS options so these forms on the XD Payroll HMRC Interfaces menu can now be discontinued.

You will still need however to generate the paper version of the P45 Part 1 and arrange for this to be given directly to an employee.

4. Configuring RTI

4.1. RTI System Parameters

4.1.1. Continuous Employment

“Service Break Days” Parameter:

Menu path: **CorePersonnel -> Reference -> Reference Q-Z -> System Parameters**

By default this parameter will be set to 0.

Please also refer to example and guide on setting this parameter as outlined earlier in this document.

4.1.2. Multiple Periods of Employment

“Multiple Periods of Employment” is automatically enabled in all sites and is configured based on the steps outlined underneath.

Note:

This configuration is held at company and/or system level. If you turn on “Multiple Periods of Employment” at System Level then this will be invoked for all companies.

Note:

Users should **NOT** turn this functionality off.

System Level Configuration:

Menu path: **CorePay > Update > Utilities > System Configuration > General tab**

Configuration Option	Value / Status
Client Code	PACKAGE
Duplicate PPS Numbers	☐
Country	UK
Currency Code	
Organisation Hierarchy Type E, C or K	☐
Default Adjustment Indicator	☐
Hide PRS/NI Totals	☐
End Date D/A/P for Leaver	☐

Pay Multiplier Limit		ER PRSI Relief % for EE Pension	
Multiple Periods of Employment	☒		
Department Payslip Heading1			
Department Payslip Heading2			
Salary Foregoing Pay Code			
Negative Nett Recovery			
Childcare Voucher Pay Code			

4.1.3. Irregular Paid Employees

This is required because HMRC check their returns from an employer to see if an employee has been paid in the last 13 weeks. If an employee has not been paid, HMRC will deem this person to be a leaver and will initiate the leaving process for the employee.

Obviously a lot of employers have Irregular paid employees with large gaps in payments so to prevent HMRC from issuing leave notifications it is possible to flag employees as Irregular Paid which is recognised by HMRC so as not to trigger the leaver process.

The RTI Solution allows this to be set up as a rule where the employer can select a reference item to identify the employees who are Irregular employees. (It does not have to be flagged at individual employee level but can if required as this field is also on the Employee Sundry Profile Screen).

Menu path: **CorePay > Reference > Maintain Statutory Pay Parameters > RTI Parameters tab**

Job Title	Irregular Pay
0001 ADMINISTRATOR	☐
0002 APPLICATIONS DEVELOPER	☐
0003 EMPLOYABILITY ASSISTANT	☐
0004 EQUALITY AND DIVERSITY ADMINISTRATOR	☐
0005 ESTATES DEVELOPMENT MANAGER	☐
0006 FININACE ASSISTANT	☐
0007 FINANCIAL ACCOUNTANT	☐
0008 SENIOR ACCOUNTANT	☐
0009	☐
0010	☐

4.1.4. Mapping & Grouping Hours

One of the fields in the RTI FPS returns relates to the average hours an employee works in a week.

HMRC have 4 groupings to represent this categorisation as set out underneath.

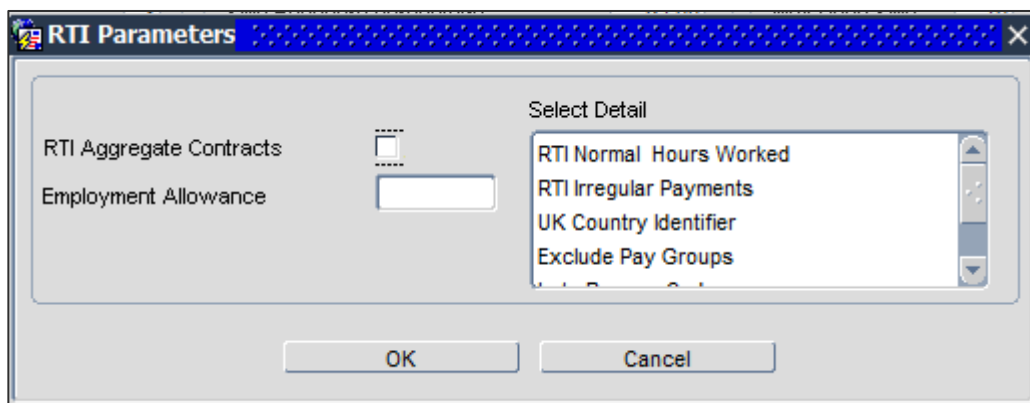

Menu path: **CorePay > Reference > Maintain Statutory Pay Parameters > RTI Parameters tab**

HRMC RTI Value	From	To
A	0.00	15.99
B	16.00	23.99
C	24.00	29.99
D	30.00	998.00
E	998.01	999.99

The RTI FPS program will check the employees contract hours to identify the correct HMRC category code.

In terms of employees who have Multiple Contracts, by default, the system will look at each employee's individual contract. There is the option of combining the hours for all contracts. This can be configured globally as set out in the screen shot underneath or can be configured at individual employee level.

The global parameter which determines this is called "RTI Aggregate Contracts".

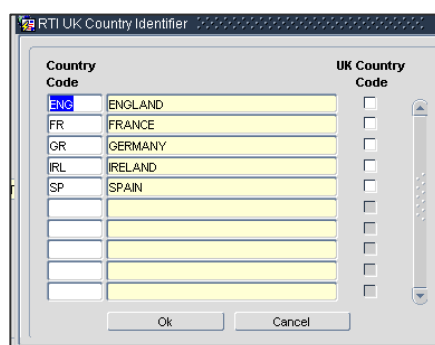

4.1.5. Country Codes

Menu path: **CorePay > Reference > Maintain Statutory Pay Parameters > RTI Parameters tab**

Country Code is a required field where the Country is not UK. As different codes can be used for UK (e.g. GB, GBR etc...) we allow the user to identify what country codes are UK Country Codes. The impact of this is the country field is not output in the RTI file for these.

Click on the RTI UK Country Identifier option and tick the country codes that represent the UK.

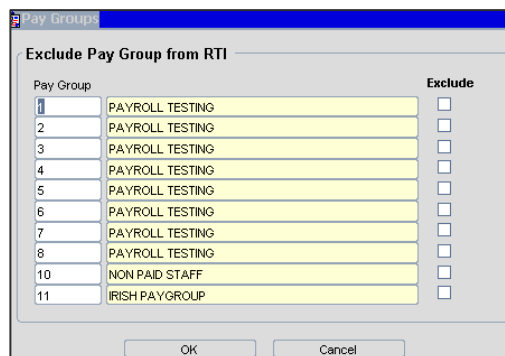

4.1.6. Exclude Pay Groups

Menu path: **CorePay > Reference > Maintain Statutory Pay Parameters > RTI Parameters tab**

If you have a pay group for employees who are to be excluded from RTI returns you can do so by marking the pay group as exempt. Click on the Exclude Pay Groups option and tick the relevant Pay Groups.

Note:

Any ROI legislative payrolls are automatically exempt. It is only if you have a UK legislative pay group which you wish to exclude.

Pay Group	Exclude
1 PAYROLL TESTING	☐
2 PAYROLL TESTING	☐
3 PAYROLL TESTING	☐
4 PAYROLL TESTING	☐
5 PAYROLL TESTING	☐
6 PAYROLL TESTING	☐
7 PAYROLL TESTING	☐
8 PAYROLL TESTING	☐
10 NON PAID STAFF	☐
11 IRISH PAYGROUP	☐

4.1.7. Statutory Pay Code Configuration

One of the requirements of RTI is to report back Pay after statutory deductions. This option is defined by HMRC as your employee's net pay after statutory deductions for PAYE, National Insurance and Student Loans only. (As per data items definition: <http://www.hmrc.gov.uk/softwaredevelopers/rti/rti-dataitem-13-14.pdf>)

In order to cater for this a new identifier has been added to the Pay Codes screen, Deduction tab.

Menu path: **CorePay > Reference > Pay Codes**

The field is labelled "RTI Statutory Deduction" and needs to be ticked for all PAYE, National Insurance and Student Loan pay codes.

This allows users to identify what pay codes are to be considered as statutory for the purposes of this RTI calculation.

This is only for Employee Statutory Deductions. DO NOT configure this option for ER statutory deductions.

4.1.9. Maintain Organisation Details

Two new fields have been added to the “Maintain Organisations” screen, which must be populated in order to transmit the RTI files from PeopleXD to HMRC.

Menu path: **CorePay > Reference > Corporate Menu > Organisations**

Field	Description
RTI Username	The username provided by HMRC for this organisation.
RTI Password	The username provided by HMRC for this organisation.
RTI Sender Type:	• This should be set as Employer where a client processes their own payroll. • This should be set as Bureau for all clients whose payroll is processed by a Bureau.
Corp Tax Ref	This is the corporate Tax number (if applicable); for example if you are a limited company.

4.2. People Management Employee Data

The fields listed on the screen below are all relevant for RTI purposes in terms of employee maintenance. This screen is available from the Select Detail area of the People Management Personal Profile screen

Menu path: **CorePersonnel > Maintenance > Personal Profile** or
CorePay > Employee > Personnel Profile

The screenshot displays a web form titled "Payroll Legislative Options". The form is organized into four main sections:

- Personal Details:** Includes input fields for Title, Forename (pre-filled with "JESSICA"), Middle Name, and Surname (pre-filled with "STONE").
- RTI Details:** Includes a Passport Number field, a Country Code dropdown (pre-filled with "IRL" and a tooltip for "Ireland"), an Occupational Pension Indicator checkbox, a Starter Declaration dropdown, and a SCOT field.
- Secondment Details:** Contains explanatory text: "A Seconded Employee is someone who has been sent to work in the UK by their overseas employer but still has a contract with their overseas employer. RTI SPECIFIC: DO NOT POPULATE THIS SECTION UNLESS YOUR EMPLOYEE IS SECONDED". It lists several categories with checkboxes: "Living in UK for 6 months or more", "Living in UK for less than 6 months", "Working both in and out of the UK but living abroad", "European Economic Area or Commonwealth Citizen", "EPM6(Modified) Scheme", and "Expat Indicator".
- Auto Enrolment Details:** Includes an "Exempt from Auto Enrolment" dropdown and a "Multiple Post Aggregate Earnings" checkbox.

At the bottom of the form are "Save" and "Cancel" buttons.

4.3. Government Gateway Adaptor and Transmission Service

PeopleXD have developed an optional facility that allows you to transfer the RTI XML files directly from Payroll to the HMRC Internet Gateway.

This is an additional service now provided which to date has been provided by Third Parties, upon successful generation of the data files in PeopleXD.

To use this additional module, you will need to ensure:

- Your Server must be able to talk to HMRC Gateway website.
- RTI username and password to be assigned on the Maintain Organisations screen.
- PeopleXD configuration of Transfer option including software.

The next step is to select the file type which is to be transferred. This file type field defaults to FPS as the FPS file is the most common file type to be sent.

A screenshot of a web form element. It consists of a rectangular box with a light gray background. On the left side of the box, the text 'File Type' is displayed in a standard black font. To the right of this text is a dropdown menu. The dropdown menu is currently open, showing the text 'FPS' in a blue font. A small downward-pointing arrow is visible on the right side of the dropdown menu's border.

5. Generating and Transferring Submission Files

There is one screen for the Generation and Transfer of RTI files.

Menu path: **CorePay > Update > Real Time Information (RTI)**

The processing screen by default has the options to generate the relevant files as set out underneath.

File Type	Description
FPS	Full Payment Summary
EPS	Employer Payment Summary
EYU	Earlier Year Update
Load NINO Details	Load National Insurance Number Details

Note:

PLEASE NOTE THAT YOU SHOULD ONLY GENERATE AND SEND A TEST FILE ON TEST. DO NOT SEND A LIVE FILE FROM YOUR TEST SYSTEM.

Note:

When sending the LIVE file each screen will ask you to confirm beforehand.

5.1. Full Payment Summary

Return Type	Cumulative	When to Return
Normal FPS	Current Employment Cumulatives with your organisation	After each payment run

5.2. Normal Full Payment Summary

5.2.1. Timing

The normal FPS file is the default payment file that will be returned. This file is required every time you make a payment. The normal FPS file should be generated after the complete update has been run.

What is the submission window between making a Bacs payment and making an RTI Submission?

RTI Submissions should be made on or before the time of payment. Where the payment is made by Bacs, the payment will be for a given settlement date and the RTI submission should be submitted by that date.

Note:

In terms of the payroll you must generate and transmit the FPS **BEFORE** running the validation of the next pay period. Be particularly careful if you are operating weekly pay groups.

5.2.2. Generating

To generate a normal FPS file:

1. Select **Generate RTI**
2. Select **FPS** File Type
Select either **Live** or **Test Run**

We are now ready to generate the normal FPS files. The FPS is a return per pay group.

The screenshot shows the 'Generate RTI F...' dialog box. It has a title bar with standard window controls. The main area contains several sections: 'Generate/Transfer' with a dropdown set to 'Generate RTI'; 'File Type' with a dropdown set to 'FPS'; 'FPS Type' with a dropdown set to 'Normal FPS'; 'Live/Test Run' with radio buttons for 'Live' (selected) and 'Test'; input fields for 'Pay Group', 'Period/Month', and 'Late Reason Code' each followed by a yellow highlight bar; a 'Browse' button next to the 'Late Reason Code' field; 'Employee/Reason' and 'Browse' buttons at the bottom right; and 'OK' and 'Cancel' buttons at the bottom center.

4. Enter the **pay group** or use the list of values to select the pay group.
5. Enter the **Period** that is to be returned.
6. The browse location on this screen is where a copy of the file to be sent is generated to.
7. Click **OK**.
8. On the confirmation message click **OK**.
9. Repeat these steps for all pay groups which are to be returned.

Note:

Each pay group must be generated as a separate FPS File.

5.2.3. Exception Handling

A list of errors are diagnosed by the RTI validation program which will highlight invalid data characters and also exceptions such as:

- No NI Number
- No Date of Birth

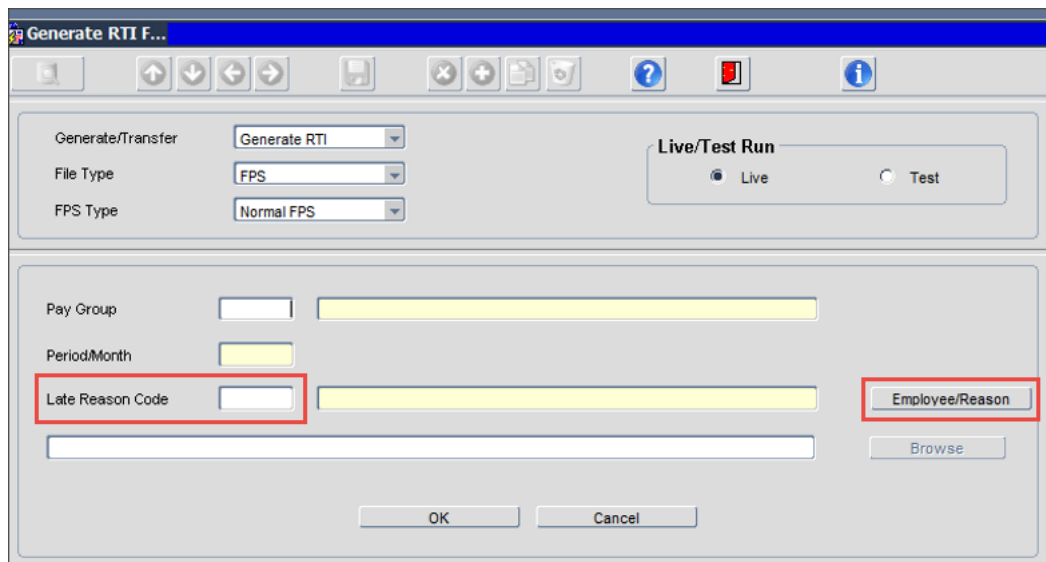

This report should be reviewed and action taken to correct exceptions before continuing.

5.2.4. Late Submissions

If submitting an FPS file late then the user is required to select a "Late Reason Code". To do so for an entire pay group click in to the late reason code field and click on the List of Values LOV icon

To do so for individual employees select the Employee/Reason option and populate the employees and reason code to be returned. Note: The employee list of late reason codes is cleared down upon successful file transmission to HMRC so any employees marked in the Employee/Reason list are only being marked for that period.

A screenshot of the 'Generate RTI F...' dialog box. The dialog has a title bar with standard window controls. Below the title bar is a toolbar with icons for navigation and help. The main area contains several sections: 'Generate/Transfer' with a dropdown set to 'Generate RTI'; 'File Type' with a dropdown set to 'FPS'; 'FPS Type' with a dropdown set to 'Normal FPS'; a 'Live/Test Run' section with radio buttons for 'Live' (selected) and 'Test'; a 'Pay Group' section with a text field and a yellow highlight; a 'Period/Month' section with a text field and a yellow highlight; a 'Late Reason Code' section with a text field and a yellow highlight, which is also enclosed in a red box; an 'Employee/Reason' section with a text field and a yellow highlight, also enclosed in a red box; a 'Browse' button; and 'OK' and 'Cancel' buttons at the bottom.

5.2.5. Regenerating

Why regenerate?

If you have fixed up exceptions such as those listed in the exceptions report i.e. NI Number, name, address etc then you will need to regenerate the Normal FPS file. To do this, simply generate the FPS file following the same process as above.

It's important to note that regenerating will NOT pick up any amendments or corrections made to employee monetary pay data until the NEXT pay run. See section above in this document called **"Amendments to Pay After Closing Payroll"** which explains the reasons.

A facility exists to re-generate the FPS but you must remember any **amendments to pay** will not be reflected until the **next** pay period.

5.2.6. Balancing & Control Reports

What output does the system generate?

- The actual HMRC FPS output XML data file.
- A Control report which is a summary of all related monetary items for Latest/Current Employments only and for the current period.
- An Excel file is automatically created listing a breakdown of each of the figures on the pdf control report per employee with an overall total.

Who appears on this report?

It reports any employee who has been paid this period plus it also lists any employees who are deemed to be 'Irregular' paid employees regardless of whether they have been paid or not.

Note: Employees who were notified retrospectively as leavers will appear on this file even though they are not getting paid in the relevant period.

What data does it show?

It shows employee cumulative data for **Latest/Current employments** this employee had since the start of the tax year or since they **rejoined** with your organisation. It does not include earnings with other employers.

What existing reports can I compare it to in XD Payroll?

In terms of the **period** figures it should agree with the FINAL **Gross to Net report** and the equivalent period figures on the Final **Detailed Observation Report**.

The **cumulative** data on this report does not have any corresponding existing report in the application because on this FPS it is only for employees who are paid this pay period plus employees who are deemed to be 'Irregular' employees, regardless of whether they have been paid or not, and any employees with late notification of a leave date, for example the employee was last paid in June but the leave date was not recorded until July.

5.2.7. Transferring

To transfer a FPS file:

1. Select **Transfer RTI Files**.
2. Select **FPS** File Type
3. Enter the **Company**.

A list of the FPS files waiting to be transferred. The mode field identifies if the file has been generated in Live or Test mode.

The screenshot shows the 'Generate/Transfer' section of the RTI (Back Office) interface. It includes dropdown menus for 'Transfer RTI Files', 'FPS', and 'Normal FPS'. Below these, the 'Company' field is set to '2630 2630 UK COMPANY'. A table lists FPS files with columns for Pay Group, Description, Period/Month/Year, Mode, No. Parts, File Type, Transfer, HMRC Rejected, HMRC Accepted, and Confirmed. The table contains two rows: '2639 2639 NI letters' and '2640 0-2640 uk'. Both rows are in 'Live' mode and have 'FPS' as the file type. The 'Transfer' column has checkboxes for each row. Below the table is a 'Transfer' button. At the bottom, there is a text field showing the file path 'C:\Users\A.Chinnamokandy\OneDrive - Access UK Ltd\Desktop\...' and a 'Browse' button.

Pay Group	Description	Period/Month/Year	Mode	No. Parts	File Type	Transfer	HMRC Rejected	HMRC Accepted	Confirmed
2639	2639 NI letters	202201	Live		FPS	☐	☐	☐	☐
2640	0-2640 uk	202302	Live		FPS	☐	☐	☐	☐
						☐	☐	☐	☐
						☐	☐	☐	☐
						☐	☐	☐	☐
						☐	☐	☐	☐

4. Select the files that you wish to submit to HMRC by checking the **Transfer** box.
5. Click **Transfer**.

A message will appear asking to confirm if they wish to transfer the files.

- Click **Cancel** to stop.
 - Click **OK** to transfer.
6. Once the transfer has taken place you will get a message transfer complete. Click OK.

5.2.8. Review Transfer Status

The final step is to confirm that the files have been successfully sent with no error.

- HMRC send e-mail confirmation that the files have been accepted as a live or test submission.
- PeopleXD will also show confirmation of acceptance or rejection of the RTI file.

In this example below the file has now been Accepted by HMRC.

Pay Group	Description	Period/Month	Mode	Transferred	HMRC Accepted	HMRC Rejected	Accepted
1000	SCENARIO1	201301	Test	☒	☒	☐	☐
				☐	☐	☐	☐
				☐	☐	☐	☐
				☐	☐	☐	☐
				☐	☐	☐	☐

Transfer

C:\WPFSresponse_1000_201304.xml

Browse

5.2.9. Update Status to Accepted

Once this email confirmation has been received for the live submission the file needs to be updated to accepted on the Transfer RTI screen.

To do this:

1. Select **Transfer RTI Files**.
2. Select **FPS** File Type
3. Enter the **Company**.
4. Tick the **Accepted** option against the relevant pay groups that you have submitted.

5. Click **Save**.

Generate/Transfer: Transfer RTI Files

File Type: FPS

FPS Type: Normal FPS

Company: 1000 HALEY'S HUMONGOUS HIPPO HOUSE

Pay Group	Description	Period/Month	Mode	Transferred	HMRC Accepted	HMRC Rejected	Accepted
1000	SCENARIO1	201301	Test	☒	☒	☐	☒
				☐	☐	☐	☐
				☐	☐	☐	☐
				☐	☐	☐	☐
				☐	☐	☐	☐
				☐	☐	☐	☐

Transfer

C:\FPSresponse_1000_201304.xml

Browse

This means the file will no longer appear under the transfer option as it has now been successfully sent to HMRC.

5.3. Employer Payment Summary

Note:

You only need to submit an EPS if there is something to reclaim. Except at the end of the year when all clients are required to submit a final EPS before running the year end clear down.

EPS stands for Employer Payment Summary. An Employer Payment Summary (EPS) is generated by Company (not pay group) and can be sent if no payments are made to any employees in a tax month or you want to recover statutory payments or NICs compensation on statutory payments. If an EPS is submitted before the 19th day of the applicable month (on time) then the recoveries will be offset from the FPS payments. If the EPS is sent after the 20th day then HMRC will apply the offset in the following month.

A client will only need to submit an EPS where the circumstances detailed above apply.

However, at the end of the tax year a Final EPS must be submitted prior to running the year end clear down. This step will be referenced in the 2013-2014 Year End User Guide.

5.3.1. Timing

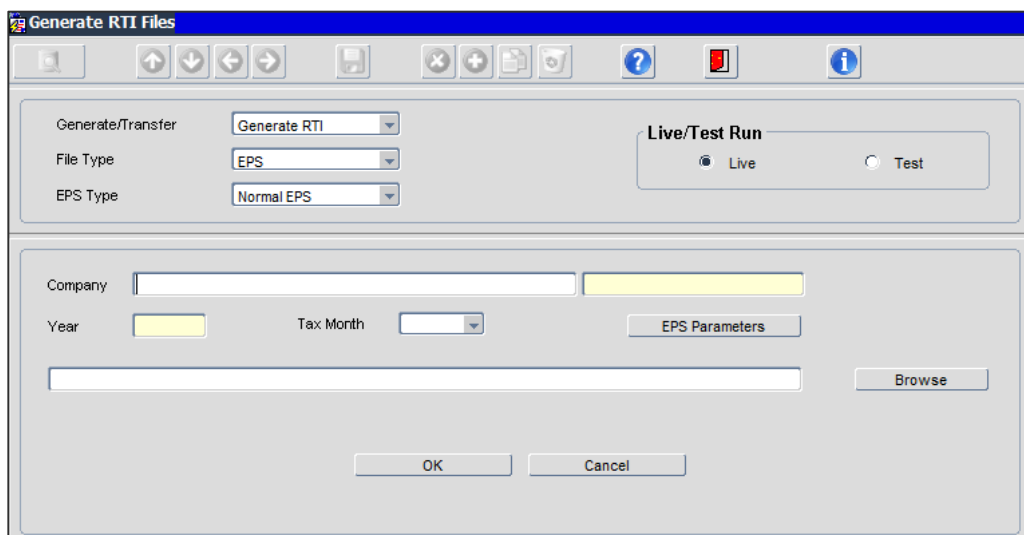

This file, where required, must be submitted before the 19th of the applicable month.

5.3.2. Generating

To generate an EPS file:

1. Select **Generate RTI**
2. Select **EPS** File Type
3. Select either **Live** or **Test Run**

We are now ready to generate the EPS files. The EPS is a return per Company.

4. Enter a value in the company field or use the list of values to select the company.
5. Select Tax Month EPS return is for if applicable. The Tax Month selected determines the period HMRC treat the EPS for. If left NULL HMRC will use the date of the file submission to determine what tax month the EPS is allocated to.
6. Review EPS Parameters if relevant. See section [5.3.3 EPS Parameters](#).
7. The browse location on this screen is where a copy of the file to be sent is generated to.
8. Click OK.
9. You should get a message saying file created which you can click OK to.
10. Repeat these steps for all companies which are to be returned.

5.3.3. EPS Parameters

There are a number of sections to the EPS Parameters.

Non Payment Details:

These fields are only required to be populated if you are reporting periods of no payment or inactivity to HMRC.

Note:

Unless this scenario applies you should leave these fields blank.

No Payment date:

This is for reporting no payment in the current period or previous periods.

Field	Description
No Payment Dates From	If you have set the 'No payment for period' field to 'Yes', enter a start date of the 6th of the first month in which no payments were made. For example, if you didn't pay anyone between 6th April and 5th May you should enter 5th May here.

Field	Description
No Payment Dates To	If you have set the 'No payment for period' field to 'Yes' enter the date of the last day in the preceding tax month. This date must be 5th as a tax month always ends on the 5th of a calendar month. For example, if you didn't pay anyone between 6th April and 5th May you should enter 5th May here.

Period Inactivity:

If they are using the Period inactivity this is for reporting no payments for future months and will be made for anything up to a max of 6 months.

Field	Description
Period of Inactivity From	If for a future period of one or more complete tax months within the tax year, you will have no paid employees or directors, so there will be no FPS return to make. You can submit an EPS now to let HMRC know you won't be sending any FPS's for these months. Enter the start date of the first tax month of your 'period of inactivity'. This date must be the start of the next tax month, that is the 6th of the next calendar month, not including today.
Period of Inactivity To	If you have entered a date in the 'Period of Inactivity From' field you must enter the end date of the last tax month of you 'period of inactivity'. This date must be the end of a tax month, that is the 5th of the relevant calendar month. The date must be later than the date in the 'Period of Inactivity From' field.

Recovery Payments Override:

This section is normally only used where a client is live on multiple payroll systems with the one tax registered number. HMRC require 1 EPS submission with combined figures.

For this reason, we provide users with the option of keying in the figures to be returned in the EPS file. By keying in values into the override field the EPS file will take these figures and will not do a system calculation. Therefore, it's important that the figures are reviewed each time you are generating an EPS file.

Final Parameters:

There are two reasons why this section should be used:

1. The company is ceasing trading.
In this scenario tick the option company ceased and record the date company ceased trading.
2. The final EPS file of the tax year. NB: In this scenario **do not** tick company ceased.
In this scenario review the parameters to identify if any of the options are applicable to the company.

These parameters are held per company so if you have multiple companies you must update these for each of the companies.

5.3.4. Regenerating

To do this, generate the EPS file following the same process as above.

5.3.5. Balancing & Control Reports

What output does the system generate?

- The actual HMRC EPS output XML data file.
- A control report which is a summary of all related monetary recovery items year to date.

5.3.6. Transferring

To transfer a EPS file:

1. Select **Transfer RTI Files**.
2. Select **EPS** File Type
3. Enter the **Company**.

A list of the FPS files waiting to be transferred. The mode field identifies if the file has been generated in Live or Test mode.

4. Select the files that you wish to submit to HMRC by checking the **Transfer** box.
5. Click **Transfer**.

A message will appear asking to confirm if they wish to transfer the files.

- Click **Cancel** to stop.
- Click **OK** to transfer.

6. Once the transfer has taken place you will get a message transfer complete. Click OK.

5.3.7. Review Transfer Status

The final step is to confirm that the files have been successfully sent with no error.

- HMRC send e-mail confirmation that the files have been accepted as a live or test submission.
- PeopleXD will also show confirmation of acceptance or rejection of the RTI file.

In this example below the file has now been Accepted by HMRC.

The screenshot shows a software window titled 'Generate/Transfer' with a dropdown menu set to 'Transfer RTI Files'. Below this, 'File Type' is set to 'EPS' and 'EPS Type' is set to 'Normal EPS'. The main area contains a table with the following columns: Company, Description, Mode, Transferred, HMRC Accepted, HMRC Rejected, and Accepted. The table lists four entries, all with 'Test' mode and 'Transferred' status. The 'HMRC Rejected' column has checkmarks for all four entries, while 'HMRC Accepted' and 'Accepted' are empty. A 'Transfer' button is located below the table. At the bottom, a text field shows 'C:\WEPSresponse_5001.xml' and a 'Browse' button is next to it.

Company	Description	Mode	Transferred	HMRC Accepted	HMRC Rejected	Accepted
2001	WHITFIELDS WACKY WHALE WAREHOUSE	Test	☒	☐	☒	☐
3000	KIRKUP'S KINGDOM OF KARAOKE KOALA'S	Test	☒	☐	☒	☐
4001	MCGOWAN'S MAGIC MEERKAT MOTEL	Test	☒	☐	☒	☐
5001	PATCHETT'S PLUSH PENGUIN PALACE	Test	☒	☐	☒	☐
			☐	☐	☐	☐
			☐	☐	☐	☐

Transfer

C:\WEPSresponse_5001.xml Browse

5.3.8. Update Status to Accepted

Once this email confirmation has been received for the live submission the file needs to be updated to accepted on the Transfer RTI screen.

To do this:

1. Select **Transfer RTI Files**.
2. Select **EPS** File Type
3. Enter the **Company**.
4. Tick the **Accepted** option against the relevant pay groups that you have submitted.
5. Click **Save**.

The screenshot shows the 'Transfer RTI Files' window. At the top, there are three dropdown menus: 'Generate/Transfer' set to 'Transfer RTI Files', 'File Type' set to 'FPS', and 'FPS Type' set to 'Normal FPS'. Below these is a 'Company' section with a text box containing '1000' and a highlighted yellow box containing 'HALEY'S HUMONGOUS HIPPO HOUSE'. The main part of the window is a table with the following columns: 'Pay Group', 'Description', 'Period/Month', 'Mode', 'Transferred', 'HMRC Accepted', 'HMRC Rejected', and 'Accepted'. The first row is highlighted in yellow and contains the following data: '1000', 'SCENARIO1', '201301', 'Test', a checked box for 'Transferred', a checked box for 'HMRC Accepted', an unchecked box for 'HMRC Rejected', and a checked box for 'Accepted'. Below the table is a 'Transfer' button. At the bottom, there is a text box containing the file path 'C:\FPSResponse_1000_201304.xml' and a 'Browse' button.

This means the file will no longer appear under the transfer option as it has now been successfully sent to HMRC.

5.4. Earlier Year Update

The earlier year update file is used to make corrections for a previous tax year.

EYU stands for Earlier Year Update. It is required if an adjustment needs to be made to a previous RTI tax year. This will only apply for corrections in previous years where you were returning PAYE using RTI.

An FPS can only be sent up until 19th April following the end of a tax year. After this any corrections need to be made on an EYU. Non-RTI years will still be corrected via amended P35/P14s as per the existing PAYE arrangement.

See the EYU User Guide for details of how this process works.

Note:

The EYU is defunct from April 2021 when its replaced by the prior year FPS.

5.5. Load NINO Details

To load NINO Details:

1. Navigate to *Update > Real Time Information* screen.
2. Select the file type "Load NINO Details".
3. Click **browse** and select the file.
4. Click **OK**.

This will generate a PDF report of the records loaded and will automatically update the NINO number held on the employee records.

5.6. Common Error Messages

5.6.1. Browse Location

If when generating RTI files (EAS, FPS or EPS) you are presented with an error message similar to the below the reason for this is likely because of the browse location path selected. The location path must not have any spaces in the file path.

In the below example the path goes into a folder documents and settings. This causes an error as an oracle package reference for requires a path with no spaces used. If the folder was called documents_and_settings then this file path would be valid.

To resolve, you should change the browse location to a path with no spaces.

5.6.2. Generating a Normal FPS before Payroll is processed

If when generating a Normal FPS you are presented with an error message similar to the below.

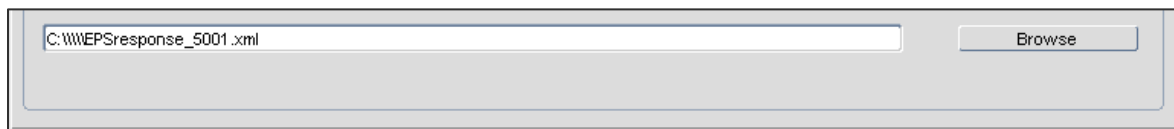

This error message is correct as it means that you do not have data yet to create the RTI file. This data is built up during the normal payroll cycle and the Normal FPS should only be run after you have finished the Complete Update step of the cycle. Do not try to generate a Normal FPS file until you have completed the payroll period.

5.7. Rejected Files for RTI

What to do?

If you have any RTI files rejected in the transfer process please contact the helpdesk **immediately**.

The reason the file was rejected can be found by looking at the file location at the browse option displayed on screen e.g. in the above screen shot you will find the file is in the C drive and called EPSRESPONSE_5001.XML.

This document should be included in any query to the help desk.

6. Process Reminders

6.1. JMLs

There is no longer any requirement to send a P45 / P46 to HMRC for leavers or joiners.

Instead when you send an FPS file it will contain details of any leavers or new starters.

6.1.1. Leavers

Employees who leave will be returned in the FPS file. If an employee's leave date is recorded after their final payment leave date then the employee will be returned as a leaver in the next FPS file sent (with period figures showing as 0).

6.1.2. Payment after leaving

Where an employee has left but is due an additional payment, for example annual leave, they must be temporary rejoined using the Set Employment Status for an Employee screen (Menu path: *CorePay > Employee > Advanced Employee Features > Set Employment Status for an Employee*). This is because an employee who is paid after leaving must be flagged as such to HMRC.

6.1.3. Joiners

As part of the new starter process the user must record a starter declaration for each new employee.

For each new employee starter, the user must select if:

- a. This is their first job since the start of the tax year (6th April) or
- b. This is currently their only job or
- c. They have another job or pension

This starter declaration field is available on the latest version of the Personnel Profile screen.

It is available on:

- The New Starter Wizard when an employee is first set up:

Expat Indicator ☐

Auto Enrolment Details

Exempt from Auto Enrolment

Multiple Post Aggregate Earnings ☐

6.1.4. Re-joiners

A re-joiner in the same tax year cannot be returned to HMRC with the same employee number. This would cause duplication records for the same employee to be created in the HMRC system. The user has two options around this:

- Use a new employee number where someone rejoins in the same tax year.
- With multiple periods of employment configured: rejoin the existing employee number and the system will use a unique RTI Employee Reference field so that a unique record is returned to HMRC for the employees current period earnings. The Employee Reference on

employee records will remain unchanged from a user's perspective but the RTI files created will utilise this RTI Employee Reference field.

For more on amendments please see section [7. Non Standard Payments.](#)

When making amendments to previous pay periods you must NEVER amend detail using the employee cumulative screen as using this screen will not amend the underlying pay history records. You must only use the cancel and manual payments screens as using these screens will amend the cumulative data and the underlying pay history data.

6.1.5. ASPP - Record Partner Details

When ASPP is being recorded on the system the user is now required to record Partner Details. To cater for this "Partner Detail" fields have now been added to the Maintain Statutory Paternity Pay Details screen as set out below.

Maintain Statutory Paternity Pay Details	
Type	ASPP Birth
Employee	
Baby Due Date	
Notice Date	
15th Week	
Birth Date	
Average Weekly Earnings	
Leave Start Date	
Payment Start Date	
Payment End Date	
PRI Start Date	
Still Birth	☐
Higher Rate	
Paid Days	0 Weeks 0 Days 0
ASPP Weeks To Be Paid	19
Partner Surname/Family Name for ASPP	
Partner Forename/Given Name for ASPP	
Partner Second Forename/Given Name for ASPP	
Partner National Insurance Number for ASPP	
Mothers Details	
Mothers Return to Work Date	
SMP Start Date	
SMP End Date	

6.2. Timing of FPS Submissions

It is recommended that you generate and subsequently transmit all FPS submissions each pay period immediately after sending your BACS file.

Note:

Any amendments made affecting payments made to employees in previous pay periods will only be picked up in the FPS for the next pay period.

What is the submission window between making a Bacs payment and making an RTI Submission?

RTI Submissions should be made on or before the time of payment. Where the payment is made by Bacs, the payment will be for a given settlement date and the RTI submission should be submitted by that date.

7. Non-Standard Payments

7.1. Payments made after leaving

From April 2013 the steps to follow are:

1. Deduct PAYE tax using code OT on a week 1/month 1 basis.
2. Enter this as the amended code, including the payment and the PAYE tax and NICs you've deducted on the employee's payroll record.
3. Include this additional payment and the tax deducted on the FPS and in the pay and tax in this period - ensure the revised year to date figures include the additional payment. If you make a payment after leaving in a subsequent tax year the year to date figures on the FPS should only reflect the additional payment.
4. Give the employee a letter showing the date of the payment, the gross amount, and the PAYE tax you have deducted and confirmation that the payment is a post-leaving payment.
5. Include the details, set the 'Payment after leaving' indicator and show the original date of leaving on the FPS when you make the payment. You must not give the employee another form P45.

7.2. Amendments to Pay Details after Payroll is Closed

It is important to distinguish between amendments to **what was paid** to an employee as opposed to amendments to other data such as middle name, gender, date of birth.

When making amendments to pay relating to previous pay periods you must NEVER amend detail using the employee cumulative screen as using this screen will not amend the underlying pay history records.

You must only use the cancel and manual payments screens as using these screens will amend the cumulative data and the underlying pay history data.

Amendments made to pay details, after closing a payroll period, will not be picked up until the FPS of the **next** pay period.

For pay it may come down to the type of amendment, the basic rule is that every payment made to an employee must have a corresponding FPS entry e.g. Employee is paid £1,000 in May therefore FPS return issued denoting this payment.

3 days later an error is corrected which results in an additional payment being issued for £20. This will require an FPS to be created for this £20 but this will be reflected in the NEXT period FPS only. It is unrealistic to expect employers to send an additional FPS each time there is such an amendment; hence these are all included in the next FPS.

If however, there was simply some error in one of the fields that did not require any payment to be made to the individual (say for instance an employee is paid £1,000 per month regardless of being eligible for SMP) if the SMP figure quoted was incorrect and needed to be increased by £20 then technically we would not need an FPS to be produced at that time, it would also be corrected as part of the next FPS produced.

The following document is the key: <http://www.hmrc.gov.uk/payerti/on-or-before.pdf>

Does a loan need to be reported to HMRC?

A loan from the employer to the employee is not subject to PAYE and not does need to be reported to HMRC. A loan is an amount of money given by an employer to an employee with the expectation that this amount is repaid to the employer.

When do the payments have to be reported?

The next time the regular payroll is run.

A loan from the employer to the employee does not need to be reported.

8. HMRC Feedback

8.1. Changes to Payroll Data

If there is a variance between one FPS and a subsequent FPS, HMRC have advised that the NPS 'might' create a new data record. Simply, the NPS will read conflicting information on the FPSs and, where it is not possible to align the records, they will create a new employment. This is especially true in terms of the date of birth field. The NPS will not expect this field to change from one FPS to the next and could interpret a change as representing advice of a new employee.

For example, Mrs J Smith starts and payroll is told her DOB is 15/05/64. However, subsequently, it is found that that it is 05/05/64. Payroll departments will just change this in their systems, understandably; however, HMRC's systems 'might' create a new employment record. This is because HMRC's systems are not expecting this field to ever change once it has been submitted for the first time.

Things to note:

- It is, therefore, very important to recognize that data consistency is important between one FPS and the next.
- If data changes in respect of the above items, it is important that employers note and pass on the corrective action that will be needed, as follows:
 - **Name** – this is the employee's responsibility to notify HMRC. We need to be advising employees of this obligation when, say, Miss Jones becomes Mrs Smith
 - **Date of Birth** – this is the employer's responsibility to notify HMRC. The current guidance is that we should be making this notification via the Employer Helpline on 08457 143 143
 - **Address** – this is the employee's responsibility to notify HMRC. We need to be advising Mrs Smith that she should contact HMRC to advise of a change in address information (if, indeed, she wants them to register this address information)

9. RTI SCHEMA CHANGES 2015-16

The following are changes made for RTI for the 2015/16 tax year. No configuration is required on the system for this section by the user however users should be familiar with the key changes as outlined below.

9.1. FPS File

HMRC have made a number of changes to the file for 2015/16.

The main change relates to the introduction of Shared Parental Pay. A number of data items have been assigned new tags due to this and the related validation rules have also changed to cater for this.

In addition, new validation rules have been introduced due to the introduction of the new NIC letters for the NIC U21 changes.

9.2. Late Reason Code

Menu Path: *Update > Real Time Information (RTI) > File Type FPS*

Late Reason Code can now be assigned at an employee level. Previously this option was only available at a pay group level.

File Type: FPS
FPS Type: Normal FPS
Pay Group:
Period/Month:
Late Reason Code: Employee/Reason

Here the user can select an employee reference (using the List of Values or keying an employee number) and select a Late Reason Code from the List of values.

Employee Reference	Late Reason	Description

OK Cancel

This table is cleared down upon successful transmission of an RTI File.

9.3. EPS File

HMRC have made a number of changes to the EPS file for 2015/16.

The main change relates to the introduction of Shared Parental Pay. A number of data items have been assigned new tags due to this and the related validation rules have also changed to cater for this.

EPS - year-on-year changes between 2014/15 and 2015/16

9.4. Tax Month

Menu Path: *Update > Real Time Information (RTI) > File Type EPS*

Users can now select which Tax Month the EPS return is applicable to. If no tax month is selected the EPS will be allocated based on the date of the EPS file submission as currently occurs.

The screenshot shows a software interface for generating RTI (Real Time Information) files. It includes several dropdown menus and buttons. The 'Generate/Transfer' dropdown is set to 'Generate RTI'. The 'File Type' dropdown is set to 'EPS'. The 'EPS Type' dropdown is set to 'Normal EPS'. There is a 'Live/Test Run' section with radio buttons for 'Live' and 'Test'. Below this, there are input fields for 'Company', 'Year', and 'Tax Month'. There is also an 'EPS Parameters' button and a 'Browse' button. At the bottom, there are 'OK' and 'Cancel' buttons.

9.5. EYU File

HMRC have made a number of changes to the EYU file for 2014/15 (The Earlier Year Update - EYU is for correcting a previous tax year).

EYU - year-on-year changes between 2013/14 and 2014/15				
Data Item/Field	Description of change	2013/14 RIM distribution: 2014-v3-2 EYU version: 2014-v3-1	2014/15 RIM distribution: 2015-v4-3 EYU version: 2015-v1.0

123 SSP	Data Item removed	.../EarlierYearUpdate/Employee/Employment/Payment/SSP	n/a	

10. RTI Schema Changes 2016-2017

The following are changes made for RTI for the 2016/17 tax year. Users should be familiar with the key changes as outlined below.

10.1. FPS File

HMRC have made a number of changes to the FPS file for 2016/17.

The main change relates to the introduction of the new FPS section called Flexible Drawdown. From April 2015 people aged 55 and above have been allowed to access their money purchase pension savings as they wish (Announced in 2014 Budget).

The inclusion of this data item in Full Payment Submission (FPS) is currently optional in appropriate submissions for 2015-16, but will become mandatory from 2016-17.

A number of data items have been assigned to new tags due to this and the related validation rules have also changed to cater for this.

10.2. Flexible Drawdown

This section consists of the following new configuration elements;

10.2.1. Pension Death Benefit

A new 'Pension Death Benefit' Indicator is introduced to enable identification where payment to an employee relates to pension death benefit payments.

Location:

Employee > Personnel Profile > Payroll Legislative Details > Flexible Drawdown > Pension Death Benefit

10.2.2. Flexible Drawdown Payment Codes

For 2016-17 a number of new data items are being introduced so certain pension benefits can be reported through RTI.

In order to identify and report about flexibility assessed pension payments through RTI, two new value fields have been introduced 'Flexible drawdown taxable payment' and 'Flexible drawdown non-taxable'

Where an identified pay code is used, details of the taxable and non-taxable elements of the payment will be output on the FPS file.

Location:

Reference > Maintain Statutory Pay Parameters > RTI > Flexible Drawdown Payment Pay codes > Flexible Payment Pay Codes

Indicator	Description
Flex Payment Taxable	Pay Code is used for recording Flexible drawdown taxable payments
Flex Payment Non-Taxable	Pay Code is used for recording Flexible drawdown non-taxable payments
BIK Vehicle Pay Code	Pay Code is used for Vehicle Benefit in Kind.
Trivial Comm Lump Sum	Pay Code is used for Trivial commutation payments
Other Lump Sum Occ	Pay Code is used for Other Lump Sum Occupational Payments
Other Lump Sum Non Occ	Pay Code is used for Other Lump Sum Non-Occupation Payments
Serious Ill Health Lump Sum	Pay Code is used for processing Serious Ill Health Lump Sum Payments
Student Loan Plan Type 1	Pay Code is used for processing Student Loan Plan Types 1.
Student Loan Plan Type 2	Pay Code is used for processing Student Loan Plan Types 2.
Student Loan Plan Type 4	Pay Code is used for processing Student Loan Plan Types 4.
Off Payroll Worker	Pay Code is used for paying off payroll worker. This is used for reporting to HMRC that this is an Off Payroll Worker (IR35)
Strike Day Indicator	Pay Code is used for recording strike days. This is used for reporting to HMRC that employees pay this period is reduced due to strike day(s)

In addition the following are amended:

- ECON and SCON are no longer mandatory and NI Letters D,E,L,N & O are removed.
- The following elements are removed <PTtoUAPYTD> and <UAPtoUELYTD> and there is a new field <PTtoUELYTD>

Document intended to highlight areas of change, for full solution please refer to the relevant RIM artefacts.

10.4. EYU File

HMRC have made a number of changes to the EYU file for 2015/16 (The Earlier Year Update - EYU is for correcting a previous tax year).

The main change relates to the inclusion of 'Pension Accessing pension rights'.

Document intended to highlight areas of change, for full solution please refer to the relevant RIM artefacts.

11. RTI Schema Changes 2017-2018

11.1. FPS File

HMRC have made a number of changes to the FPS file for 2017/18.

The main change relates to the introduction of the new FPS section with the addition of new elements for Car BIK.

From April 2017 people will have the ability to return car BIK elements when submitting a payroll to HMRC.

The inclusion of this data item in FPS for the Car BIK elements are currently optional in appropriate submissions for 2017-18 but will become mandatory from 2018-19.

New data items have been assigned to new tags for the FPS submission due to this and the related validation rules have also changed to cater for this. The new car related fields are listed below:

Data Item	Description	Comments
177	Fuel type	Fuel type of car you are payrolling
178	Car identifier	A unique identifier for the car you are payrolling, car registration number is recommended
179	Amendment indicator	To be used to indicate that the information you are reporting is an amendment to payrolled car data reported in an earlier FPS submission.
180	Calculated price	List price added to price of any accessories, minus capital contribution paid by the employee
181	Date car was available from	First date car was made available to employee within tax year

Data Item	Description	Comments
182	Cash equivalent of car	Value of car benefit to be payrolled during tax year
183	Date car was available to	Last date payrolled car was available to employee within tax year
184	Date free fuel provided	First date payrolled free fuel was made available to employee within tax year
185	Cash equivalent of fuel	Value of fuel benefit to be payrolled during tax year
186	Date free fuel withdrawn	Last date payrolled fuel was available to employee within tax year

11.2. Car BIK Details

There have been a number of new screen additions to facilitate Car BIK payrolling. Car BIK details can setup and submitted via payroll if a user does not want to submit via expense (P11D). Note: The user can only submit via Payroll or P46/P11D.

11.2.1. RTI Parameters

There is Car BIK Pay Code option to the RTI Parameters screen. This can be accessed via the below menu from the Reference Menu:

The screenshot shows the 'RTI Parameters' dialog box. A red rectangle highlights the 'Return Car Details From Payroll' checkbox, which is checked. Other visible fields include 'RTI Aggregate Contracts' (unchecked), 'Employment Allowance' (3000), 'Car Audit Start Date' (06-JAN-2017), and a 'Select Detail' list with options like 'RTI Normal Hours Worked', 'RTI Irregular Payments', 'UK Country Identifier', and 'Exclude Pay Groups'. The 'OK' and 'Cancel' buttons are at the bottom.

From this screen there are 2 new fields:

1. Return Car Details from Payroll

This gives the user the ability to return car details from payroll if required or do not wish to submit via expense for P46/P11D. The default for 'Return Car Details from Payroll' is unchecked -> this option should be checked if the user wants to return the Car BIK details via payroll.

2. Car Audit Start Date

The Car Audit Start Date has a default value for the beginning of the tax year however if the user wants to override this they have the ability to do so as this value is configurable. The Car Audit Start Date is the date we start reading from for comparing previous FPS submissions when comparing successful FPS returns to identify changes for the FPS submission.

As the Car Audit Start Date has a default value for the beginning of the tax year, the user is not required to update this value manually again in future years.

Location: *Reference > Maintain Statutory Pay Parameters > RTI*

11.2.2. Payment Pay Codes

A new field has been added with the option to check BIK Car Pay Code in Flexible Payment Pay Codes to flag the BIK Car Allowance applies to that Pay Code. To enable the user to edit/setup car BIK details for a Pay Code via the Employee BIK screen for an employee the option must be selected. Only one Pay Code can be applied per car, however multiple Pay Codes can be selected.

Pay Code	Description	Flex Payment Taxable	Flex Payment NonTaxable	BIK Car Pay Code	Trivial Comm Lump Sum	Other Lump Sum Occ	Other Lump Sum NonOcc

Save Cancel

Location: *Reference > Maintain Statutory Pay Parameters > RTI > Drawdown Payment Pay Codes*

11.2.3. Maintain Employee BIK

When the user selects a Car BIK enabled Pay Code, two new fields will appear with the Car Reg Number and Cars Listed for Employees which shows all the active cars listed for the employee.

For users with more than one car, a different Reference for the same Pay Code must be assigned to the BIK Car Pay Code. Each car should have a different Reference but the References can be linked to the same Pay Code i.e. One Pay Code can have many References.

The user can select or add the registration number from the Car Reg Number field.

For employees with more than one active car listed it is possible to view the list of the cars assigned to them via the Cars Listed for Employee field.

Maintain Employee BIK Details

Employee Reference: 000119 Name: DECLAN MGR APP2

To view the different cars for each employee the user can navigate through the records using the arrow keys  on the menu at the top of the page.

Location: Employee > Employee BIK Details > Maintain Employee BIK Details

11.3. Load Car BIK Fields into Payroll

The Load Employee BIK Details menu has been modified enable a new load option for Car BIK Details.

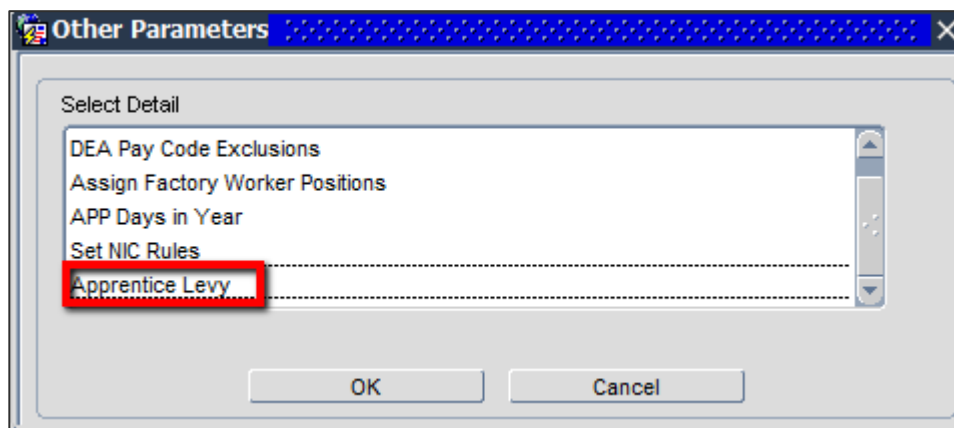

See Load BIK User Guide and Benefit Management User Guide for further details and file formats in relation to this.

11.4. Apprenticeship Levy

A new requirement from the 2016 budget requires all employers to pay a levy of 0.5% where their annual spend greater than £3m during the current tax year or greater than £2.8m the preceding tax year. This will be paid to HRMC. All employers which are liable from this payment are expected to pay from April 2018.

In PeopleXD the default is that all UK Pay Groups will be subject to the Apprentice Levy, users have the ability to disable this at a system or company level if required.

11.4.1. Apprentice Levy

Location: *Reference > Maintain Statutory Pay Parameters > Other > Apprentice Levy*

See the UK year End user guide for full details on the apprentice levy functionality.

11.5. Three New Indicators in Drawdown Payment Pay Codes Option

There are three new indicators to the Drawdown Payment Pay Codes screen to identify the Pay Code types.

Pay Code	Description	Flex Payment Taxable	Flex Payment NonTaxable	BIK Car Pay Code	Trivial Comm Lump Sum	Other Lump Sum Occ	Other Lump Sum NonOcc
1	LGPS	☐	☐	☐	☐	☐	☐

25	ABSENT ONCALL	☐	☐	☐	☐	☐	☐
26	PH1 ONSITE @1	☐	☐	☐	☐	☐	☐

- The 'Flexible Drawdown Payment Pay Codes' have been re-labelled to 'Flex Payment Taxable'.
- The 'Taxable and Non-Taxable to Flex Payment Taxable' have been re-labelled to 'Flex Payment Non-Taxable'.
- The word flexible has been removed from the window and the frame.

Location: Maintain Statutory Parameters > RTI > Flexible Drawdown Payment Pay Code

The three new indicators on the screen are as follows:

- **Trivial Commutation Lump Sum (TCLS)**
Database Field: Trivial_Comm_Lump_Sum (Yes/No)
- **Other Lump Sum (Personal/Non-Occupational)**
Database Field: Other_Lump_Sum_NonOcc (Yes/No)
- **Other Lump Sum (Occupational/Public Service)**
Database Field: Other_Lump_Sum_Occ (Yes/No)

In addition to the above three fields there is also a new field added for Car BIK:

- **BIK Car Pay Code**
Database Field: CAR_BIK_INDICATOR (Yes/No)

11.6. RTI - EYU File for Previous Tax Years

For previous versions of PeopleXD, the software could only make a return for the previous tax year for the EYU (Earlier Year Update). It is now possible to identify if we can create an Earlier Year Update file for earlier tax years.

- **Screen Change:** The previous tax year is defaulted in but allows users to select what tax year the EYU return is for.
- **Procedure Change:** When reading day history to identify manual / cancel payments the procedure checks based on the relevant tax year selected.

There is now ability to make an EYU submission for any tax year.

The changes have been made to the below procedures:

1. Pay3600.fmb – Select file type EYU and on that canvas “EYU Year” field
 - a. Changed to still default in the previous tax year (same as previous versions) however it is now editable so the user can now input a year as an override year.

11.7. RTI EYU Changes

The RTI Earlier Year Update File is being modified for the 2017 tax year. The changes are as follows:

Note:

Document intended to highlight areas of change. For full solution please refer to the relevant RIM artefacts.

EYU - year-on-year changes between 2015/16 and 2016/17:

Data item	Field	Description of change	2015/16 RIM distribution: 2016-v1.4 EYU version: 2016-v1.0	2016/17 RIM distribution: 2017-v2.2 EYU version: 1.0
78	Partner's NINO	Description changed	Partner's NINO for Additional Statutory Paternity Pay / Shared Parental Pay claim	Partner's NINO for Shared Parental Pay claim
127	ShPP	Description changed	Value of Additional Statutory Paternity pay / Shared Parental pay (ASPP/ShPP)	Value of Shared Parental pay (ShPP)

11.8. RTI EYU - Amend Issue Manual Payment for New Indicator 'NI Refunded'

The below changes have been applied to the EYU for the RTI submission.

- Label - EYU NI Refund
- Database Field: This is an existing column - EE_EYU_NI_Refund on Day History
- Values - Drop down Options: Yes / No.
- Default Value - Yes.
- Validation: This field should only display for UK Pay Groups.

New rule for NI Refunds in the Earlier Year Update: To cater for this in the software requires the following changes:

Change 1: Changes of the Issue Manual Payment Screen. Mockup below:

Label - NIC Refunded EYU.

- Values - Drop down Options: No / Null. Default Value – Null
- Hint Message: Users are required to mark as No if NI Refund not given to Employee but due. NIC Refunds are reported as Yes in EYU by default.
- Database Field: This is an existing column - EE_EYU_NI_Refund on Day History on the NI Row.
- Validation: This field should only display for UK Pay Groups. (The section it's being added to already only displays for UK)

Change 2: Procedure PY_RTI_EYU.sql

- Currently we output yes if the EYU NIC amount is negative
--PRSI refund 143
 if en_rec.prsi_period < 0 then
 g_eyu_employee_line := '<NICRefund>yes</NICRefund>';
 utl_file.put_raw(g_eyu_file,utl_raw.cast_to_raw(g_eyu_employee_line));
 end if;
- The requirement is that we still output yes where the EYU NIC amount is negative unless the user has selected NO on the RTI NI refunded option. In which case (assuming the EYU NIC amount is negative) we output no for NIC refund.

The NIC Refund tag currently doesn't output at all if NIC amount is not less than 0 and that remains the case after this change.

12. RTI Schema Changes 2018-2019

The following are the RTI changes for the 2018 tax year.

12.1. FPS File – User Configuration Required

HMRC have made a number of changes to the FPS file for 2018/19. The main change relates to the introduction of the new student loan plan type. This means from April 2018 the student loan plan type is reported for new starter employees who are on a student loan deduction.

Users are asked to review the Pay Codes option (at the **Location: Maintain Statutory Parameters -> RTI -> Pay Codes**) and identify what pay code(s) are used for student loan Plan Type 1 and 2.

Pay Code	Description	Flex Payment Taxable	Flex Payment NonTaxable	BLK Car Pay Code	Trivial Comm Lump Sum	Other Lump Sum	Other Lump Sum NonOcc	Serious Ill Health Lump Sum	Student Loan Plan 1	Student Loan Plan 2
343	EXAM SUPERVISION	☐	☐		☐	☐	☐	☐	☐	☐
625	ADVANCE MISC	☐	☐		☐	☐	☐	☐	☐	☐
1000	SALARY	☐	☒		☐	☐	☐	☒	☐	☐
1001	ADDITIONAL SALARY	☐	☐		☐	☐	☐	☐	☐	☐
1002	BACK PAY	☐	☐		☐	☐	☐	☐	☐	☐
1003	OCCUPATIONAL SALARY OFFSET	☐	☐		☐	☐	☐	☐	☐	☐
1004	ADDITIONAL SALARY ARREARS	☐	☐		☐	☐	☐	☐	☐	☐
1005	BASIC HOURS	☐	☐		☐	☐	☐	☐	☐	☐
1006	BASIC HOURS ARREARS	☐	☐		☐	☐	☐	☐	☐	☐
1007	HOLIDAY PAY (12.07%)	☐	☐		☐	☐	☐	☐	☐	☐

The other changes made to the FPS relate to new validation from moving into the new tax year.

FPS - year-on-year changes between 2017/18 and 2018/19				
Data item	Field	Description of change	2017/18 RIM distribution: 2018-v1.4 FPS version: 2018-v1.4	2018/19 RIM distribution: 2019-v0-1 FPS version: 2019-v0-1

186	Date free fuel withdrawn	Changed to reflect new tax year	<xsd:minInclusive value="2017-04-06"/> <xsd:maxInclusive value="2018-04-05"/>	<xsd:minInclusive value="2018-04-06"/> <xsd:maxInclusive value="2019-04-05"/>

12.2. Excel Report Generated from RTI Screen

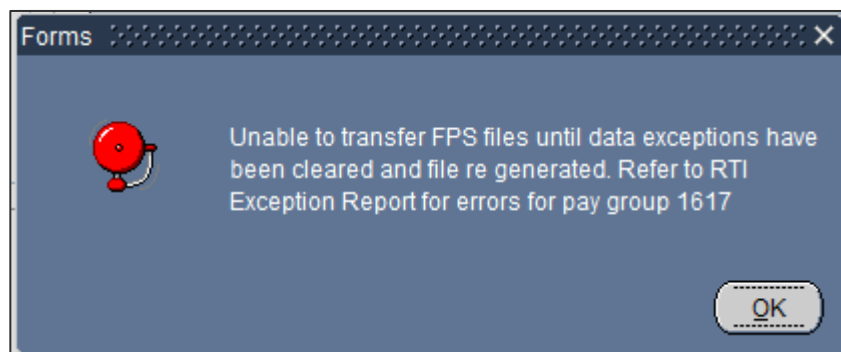

The excel file generated from RTI Screen for file type FPS has been amended to add the new indicators and values that are being outputted to the file for the student loan plan type.

In addition, RTI EMPNO & NINO have been added to the excel output as well.

12.3. RTI Transfer

The RTI Transfer option will now prevent users from attempting to transfer an FPS file where the FPS exception report had identified errors that would have caused the file to reject.

Instead, users will be given a warning message for the pay group which contained issues, for example for pay group 1617:

Users will be required in this case to go back to the RTI FPS, review the exception report generated from that and take correction action on the issues highlighted.

After this has been they can regenerate the RTI FPS File and only then will they be able to successfully transfer the RTI FPS File to HMRC.

12.4. EPS Changes

The EPS validation rules have been amended to reflect the move in to the new tax year.

EPS - year-on-year changes between 2017/18 and 2018/19				
Data item	Field	Description of change	2017/18 RIM distribution: 2018-v1.4 EPS version: 2018-v1.0	2018/19 RIM distribution: 2019-v0-1 EPS version: 2019-v0-1
	Namespace	Changed to reflect new tax year	...RTI/EmployerPaymentSummary/17-18/1	...RTI/EmployerPaymentSummary/18-19/1
18A	Related Tax year	Changed to reflect new tax year	17-18	18-19
137	No payment dates from	Changed to reflect new tax year	<xsd:minInclusive value="2017-04-06"/>	<xsd:minInclusive value="2018-04-06"/>
137a	No payment dates to	Changed to reflect new tax year	<xsd:maxInclusive value="2018-04-05"/>	<xsd:maxInclusive value="2019-04-05"/>
			<xsd:maxInclusive value="2018-04-05"/>	<xsd:maxInclusive value="2019-04-05"/>
119	Date Scheme Ceased	Changed to reflect new tax year	<xsd:minInclusive value="2017-04-06"/>	<xsd:minInclusive value="2018-04-06"/>

In addition to this a change was made so that users now have the ability to generate an EPS file for a prior tax year.

Note:

An EPS file for the prior tax year is always a Tax Month 12 return. i.e. the full position at the end of the tax year is returned. This is the HMRC requirement.

12.5. EYU Changes

The validation rules for the EYU have been updated to reflect the move into the new tax year.

In addition, the serious ill health lump sum tags introduced into the FPS file last year have now been added to the EYU file this year. No new configuration is required for this as part of the UK Year end configuration last year required the identification of the pay codes used for this for the FPS.

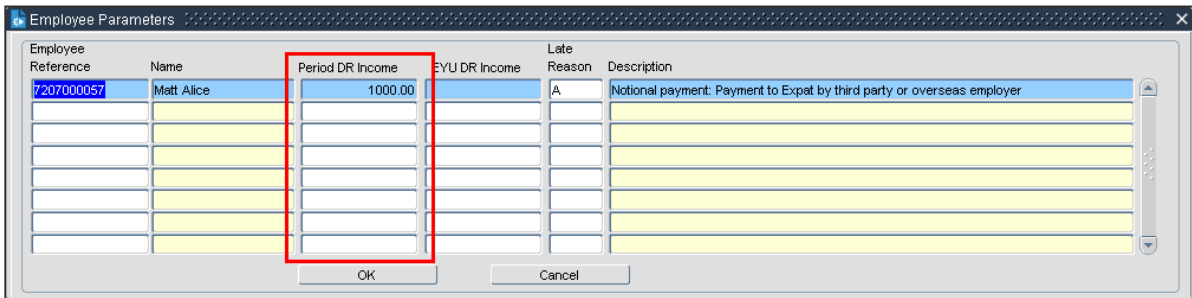

EYU - year-on-year changes between 2016/17 and 2017/18

13. RTI Schema Changes 2019-2020

The following changes have been made to RTI for the new tax year:

13.1. FPS

- The FPS file will include the new post graduate loan details if the new Post Graduate Loan Indicator is enabled.
- The FPS file will accommodate the introduction of the 'C' prefix as part of the Welsh devolution.
- The new allowable fuel types introduced for payrollling benefits will be output on the file.
- Disguised Remuneration: New reporting requirements have been introduced, which require that any outstanding Disguised Remuneration amounts as of April 2019 are reported to HMRC. The new Period DR Income field has been added to the Employee Parameters screen.

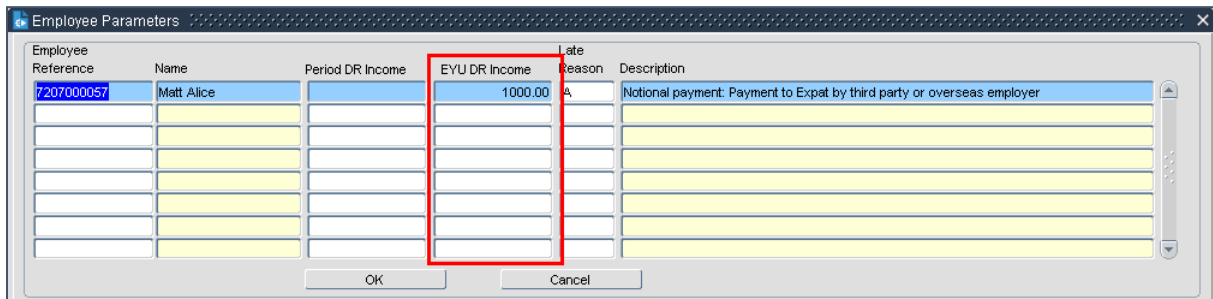

The screenshot shows the 'Employee Parameters' window. It contains a table with the following columns: Employee Reference, Name, Period DR Income, EYU DR Income, Late Reason, and Description. The first row is highlighted in blue and contains the following data: Employee Reference: 7207000057, Name: Matt Alice, Period DR Income: 1000.00, EYU DR Income: (empty), Late Reason: A, Description: Notional payment: Payment to Expat by third party or overseas employer. The 'Period DR Income' column is highlighted with a red box.

Employee Reference	Name	Period DR Income	EYU DR Income	Late Reason	Description
7207000057	Matt Alice	1000.00		A	Notional payment: Payment to Expat by third party or overseas employer

13.2. EYU

Where Earlier Year Updates are used, the *EYU DR Income* field must be completed before generating the EYU file.

The screenshot shows the 'Employee Parameters' window. It contains a table with the following columns: Employee Reference, Name, Period DR Income, EYU DR Income, Late Reason, and Description. The first row is highlighted in blue and contains the following data: Employee Reference: 7207000057, Name: Matt Alice, Period DR Income: (empty), EYU DR Income: 1000.00, Late Reason: A, Description: Notional payment: Payment to Expat by third party or overseas employer. The 'EYU DR Income' column is highlighted with a red box.

Employee Reference	Name	Period DR Income	EYU DR Income	Late Reason	Description
7207000057	Matt Alice		1000.00	A	Notional payment: Payment to Expat by third party or overseas employer

The other changes made to the EYU process relate to Namespace and new validation for moving into the new tax year. These changes will be applied automatically by PeopleXD once the payroll company has moved into the new tax year.

Please check.

14.3. EYU – No Action Required

New data item fields have been added to the EYU for Welsh Devolution and Postgraduate Loans. These were introduced in the 2019/20 tax year, and from April 2020 are included in an EYU.

Note:

No additional configuration is required.

Other changes made to the EYU process relate to *Namespace* and a new validation for moving into the new tax year. These changes are applied automatically by PeopleXD once the payroll company moves into the new tax year.

EYU - year-on-year changes between 2018/19 and 2019/20				
Data item	Field	Description of change	2018/19 RIM distribution: 2019-v1-4 EYU version: 2019 v1.0	2019/20 RIM distribution: 2020-v1-1 EYU version: 2020 v1.0

14.4. Identify Off-Payroll Workers Pay Codes – User Action Required

Identify the pay codes used to pay *Off-Payroll Workers* for RTI reporting. Any worker receiving payment against the specified pay code is reported with this new data item.

To identify a pay code used to pay *Off-Payroll Workers*:

1. Go to *Reference > Maintain Statutory Pay Parameters*.
2. Select **RTI**.

3. Select *Drawdown Payment Pay Codes* from the *Select Detail* menu.

14.5. Employment Allowance Update

From 2020/21, the government is limiting access to the Employment Allowance (EA). The EA will only be available to businesses and charities with an employer's Class 1 NIC liability of below £100,000 in the preceding tax year.

The reason for this change is the EA is now considered a form of de minimis state aid. There is a ceiling on how much state aid any organisation can receive under the de minimis rules. For most businesses, this ceiling will be €200,000 over a three-year rolling period (different levels apply for the agriculture, fisheries, road transport, and industrial sectors).

 Note:

If claiming the EA, it is your responsibility to check:

- Your secondary Class 1 NICs liability for the previous tax year was less than £100,000.
- You have space to accommodate the full £3,000 within your relevant three-year ceiling, regardless of how much EA you claim each year if you receive any other form of de minimis state aid.

You are restricted from claiming the EA if:

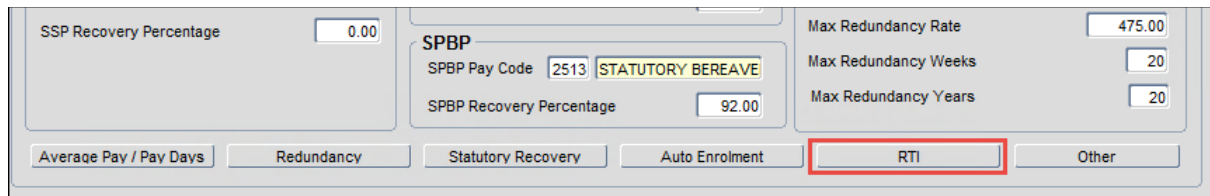

1. You are the director and the only employee paid above the 'Secondary Threshold'.
2. You employ someone for personal, household, or domestic work unless they are a care or support worker.
3. You are a public body or business doing more than half your work in the public sector unless you are a charity.
4. You are a service company working under 'IR35 rules' and your only income is the earnings of the intermediary (such as your personal service company, limited company, or partnership).

 Note:

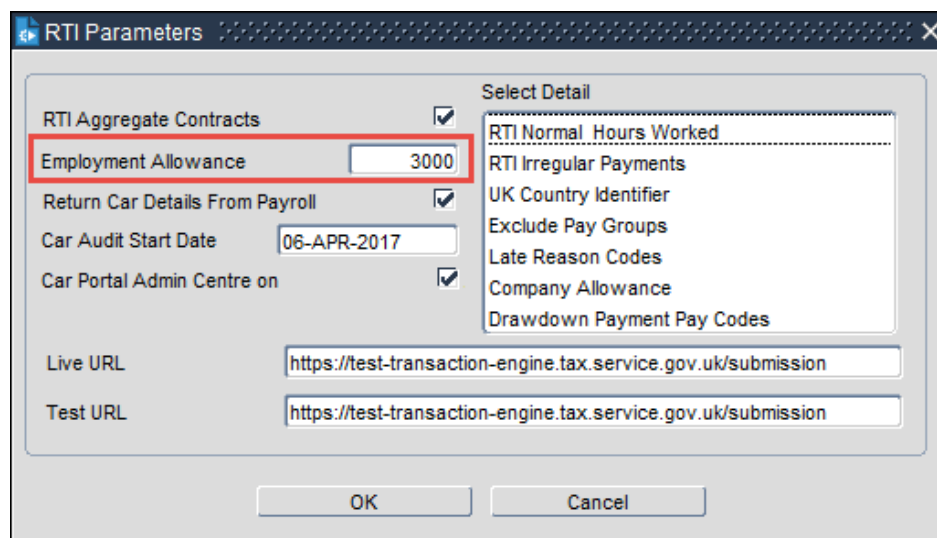

Review your organisation's eligibility for claiming the EA, and update the system parameter.

Review and update the EA entitlement indicator in Payroll, to ensure HMRC are accurately informed regarding the claim:

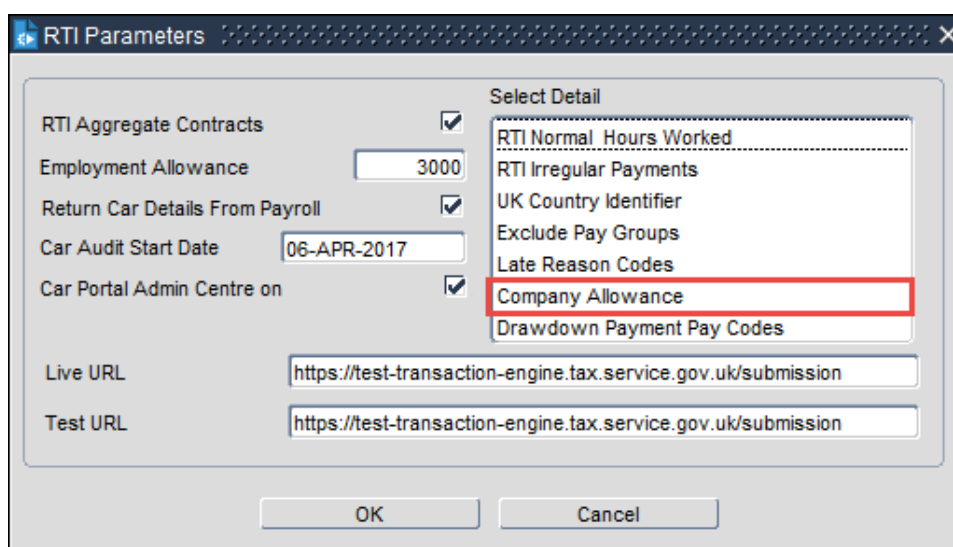

1. Go to *Reference > Maintain Statutory Pay Parameters*.
2. Select **RTI**.

3. Review the EA figure currently being claimed.

4. Select *Company Allowance* from the *Select Detail* menu.

5. Select Yes to claim the Employment Allowance.

Company	Description	Employee Allowance	Employer Sector for State Aid Rule
1237	Irish Year End 2019 University		
1238	UK YE 2020 University		
1239	1239 University UK	Yes	State Aid Rules Do Not Apply
1240	1240 University UK	Yes	State Aid Rules Do Not Apply
1242	1242 Irish		
1326	Unit Test Company 7274		
1406	LARGE COMPANY & CO	Yes	State Aid Rules Do Not Apply
1407	RR1662 UK		
1417	UK YE 2020 1417 DS	Yes	State Aid Rules Do Not Apply
1418	UK YE 2020 1418 DS	Yes	Road Transport

Note:

- If claiming the EA, you must confirm if your organisation is competing in one of the outlined 'Employer Sectors for State Aid Rules'.
- HMRC require this as de minimis State aid rules apply if you are involved in economic activity, which means you are putting goods or services on the market. The EA is classed as de minimis state aid, and therefore, you must provide the employer sector, if these rules apply to you.

6. Select one of the following employment sectors, if applicable, from the *Employment Sector for State Aid Rule* drop-down menu.
 - a. The employer is in the agriculture sector.
 - b. The employer is in the fisheries and aquaculture sector.
 - c. The employer is in the road transport sector.
 - d. The employer is in the industrial sector.
 - e. State aid rules do not apply.

Company	Description	Employee Allowance	Employer Sector for State Aid Rule
1239	1239 University UK	Yes

202	Employer is in the industrial sector	New data item added	n/a	<xsd:element name="Indust">
203	State aid rules do not apply to Employer	New data item added	n/a	<xsd:element name="NA">
204	Amount of De minimis State aid (in claim year and previous 2 years) in Euros	New data item added	n/a	<xsd:element name="Aid">
205	Currency of amount of De minimis State aid - always Euros	New attribute added	n/a	<xsd:attribute name="Cur">

Note:

Based on HMRC feedback, new data field items for "Amount of De Minimis State Aid" and "Currency of Amount of De Minimis State Aid" were add to the EPS. HMRC have since advised these won't be used and should always be returned with an amount of 0.00 and currency of €. PeopleXD will automatically populate these data items with the values requested by HMRC when you generate your EPS.

14.7. Termination Payments and Sporting Testimonial Awards

14.7.1. Termination Payments – User Action Required

From 2020/21, Class 1A employer NIC will be payable on termination payments over £30,000.

Note the following points:

- The first £30,000 of a termination payment remains exempt from income tax.
- Termination payments continue to have an unlimited employee NI exemption.

Note:

- Any payment that the employee receives in place of their notice period, even if the employee is asked to leave their employment immediately or partway through their notice period, is subject to tax and Class 1 NICs.
- Termination payments do not contribute to the apprentice levy, nor do they attract a student / postgraduate loan deduction. Ensure the pay codes are configured to reflect this.

Termination Pay Codes – User Action Required

Two pay codes are required to make termination payments.

Use **Pay Code A** to post the first £30,000 of the termination payment, set as:

- Non-Taxable and Non-NIable.
- *Taxable Redundancy/Sporting Testimonial* **not** enabled.

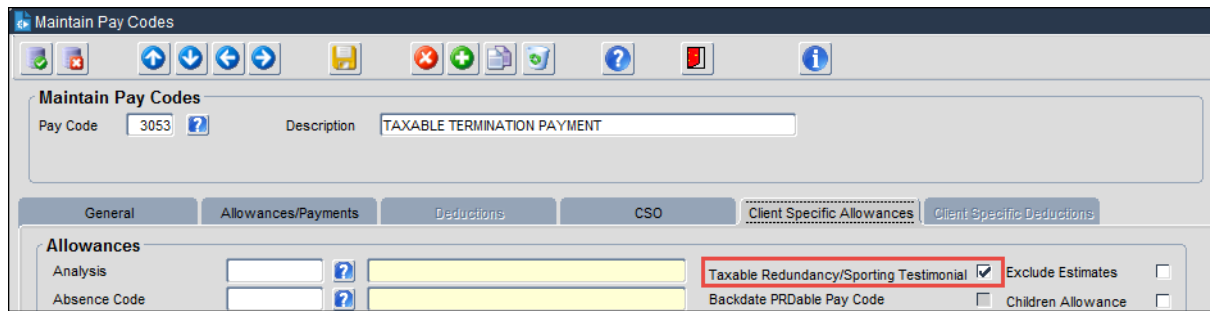

Use **Pay Code B** to post the remaining figure, set as:

- Taxable and Non-NIable.
- *Taxable Redundancy/Sporting Testimonial* **is** enabled. When enabled, the calculation will apply the Class 1A NI rate (currently 13.8%).

To enable the *Taxable Redundancy/Sporting Testimonial* indicator:

1. Go to *Reference > Pay Codes*.
2. Select the *Client Specific Allowances* tab.

3. Enable the *Taxable Redundancy/Sporting Testimonial* indicator.

The screenshot shows the 'Maintain Pay Codes' window. The 'Pay Code' field contains '3053' and the 'Description' field contains 'TAXABLE TERMINATION PAYMENT'. The 'Allowances' tab is active, showing a table with columns for 'Analysis', 'Absence Code', and 'Taxable Redundancy/Sporting Testimonial'. The 'Taxable Redundancy/Sporting Testimonial' checkbox is checked. Other options like 'Exclude Estimates' and 'Children Allowance' are unchecked.

Example:

If an individual receives a termination payment of £39,000, the employee pays income tax on £9,000, as this is the amount above the threshold.

In this case two timesheets are recorded:

- **Pay Code A:** £30,000 – No tax or NI is due on this amount.
- **Pay Code B:** £9,000 – EE tax and ER NI is due on this amount.

14.7.2. Sporting Testimonial Awards – User Action Required

From 2020/21, Class 1A employer NIC will be payable on sporting testimonial awards over £100,000. Note the following points:

- The first £100,000 of the sporting testimonial award remains exempt from income tax.
- Sporting testimonial awards continue to have an unlimited employee NICs exemption.

Note:

- This NI threshold only apply to one testimonial in a lifetime, which could come from one event or a series of events held over a 12 month calendar 'testimonial year'.
- Sporting Testimonial Awards do not contribute to the apprentice levy, nor do they attract a student / postgraduate loan deduction. Ensure the pay codes are configured to reflect this.

Sporting Testimonial Awards Pay Codes – User Action Required

Two pay codes are required to configure the *Sporting Testimonial Awards* pay codes:

Use **Pay Code A** to post the first £100,000 of the sporting testimonial awards, set as:

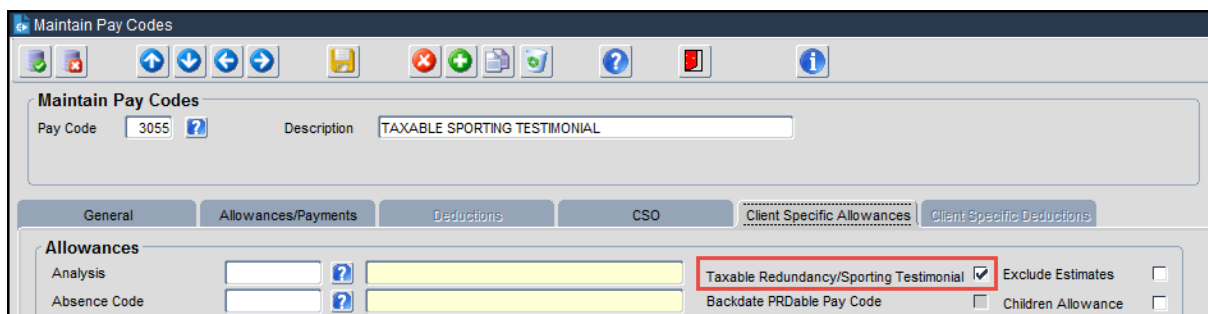

- Non-Taxable and Non-NIable.
- Taxable Redundancy/Sporting Testimonial indicator **not** enabled.

Use **Pay Code B** to post the remaining figure, set as:

- Taxable and Non-NIable.
- *Taxable Redundancy/Sporting Testimonial* indicator **is** enabled. When enabled, the calculation will apply the Class 1A NI rate (currently 13.8%).

To enable the Taxable Redundancy/Sporting Testimonial indicator:

1. Go to *Reference > Pay Codes*.
2. Select the *Client Specific Allowances* tab.
3. Enable the *Taxable Redundancy/Sporting Testimonial* indicator.

Example:

If an individual receives a sporting testimonial award of £145,000, the employee pays income tax on £40,000, as this is the amount above the threshold.

In this case two timesheets are recorded:

- **Pay Code A:** £100,000 – No tax or NI is due on this amount.
- **Pay Code B:** £45,000 – EE tax and ER NI is due on this amount.

14.7.3. Screen Changes

14.8.1. Real Time Information (RTI) and Insight Reporting

Full Payment Submission (FPS)

Class 1A NICs are already reported and collected on expenses and benefits as part of the annual P11D(b) process. The Class 1A NICs on termination payments / sporting testimonials will be calculated, reported, and paid as part of the existing PAYE cycle (referred to as “real-time Class 1A NICs”).

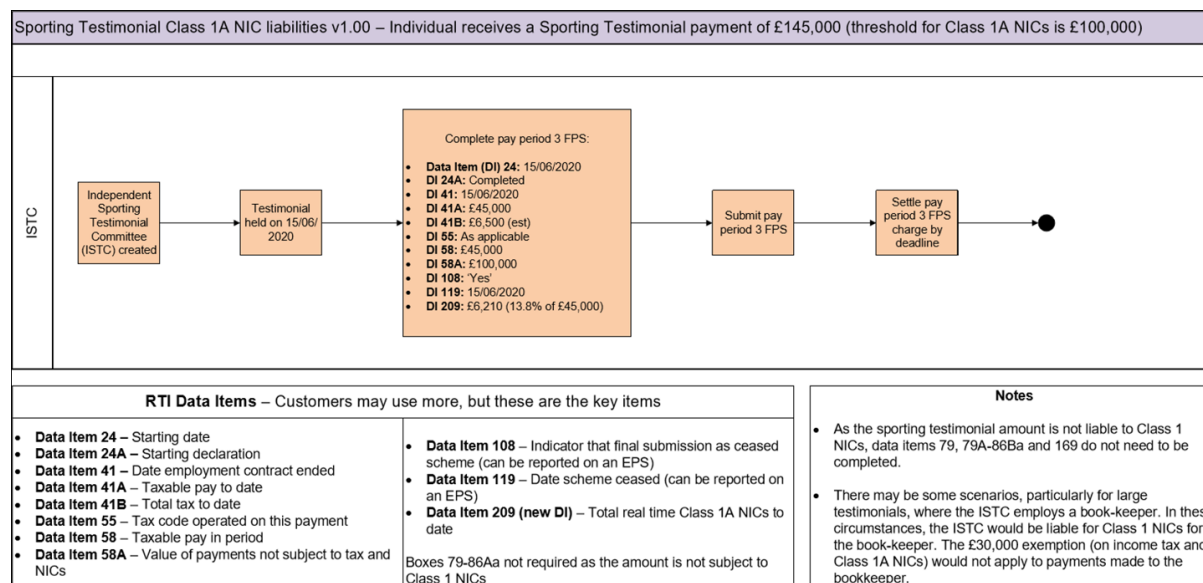

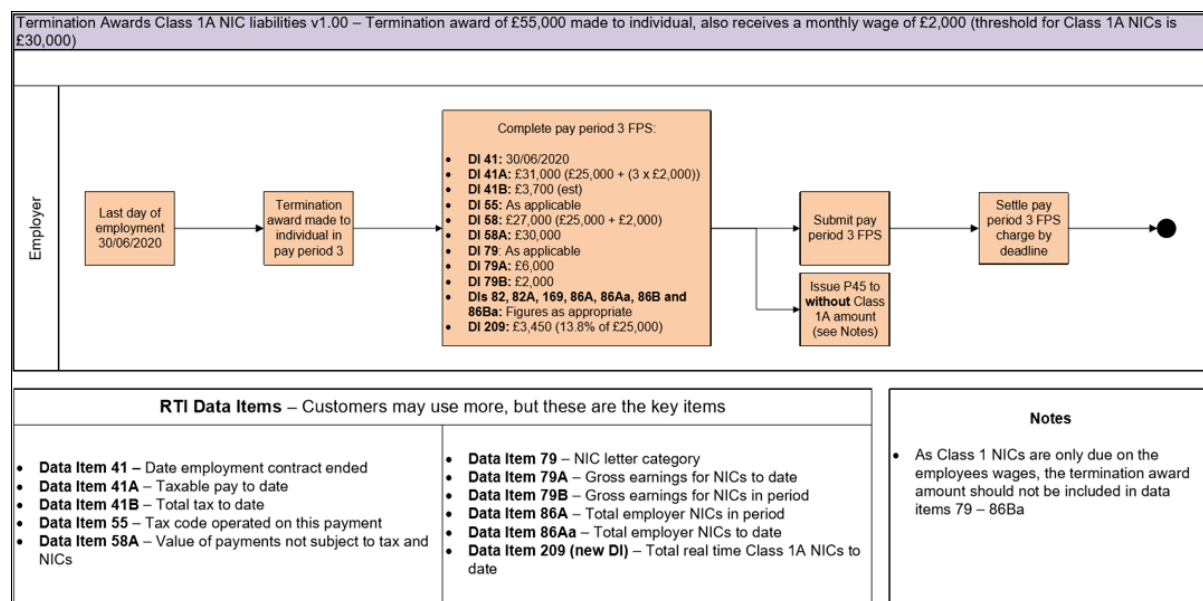

Data Item	Field	Description
209	Total real time Class 1a NICs to date.	New data field added.

A new column for Data Item 209 has been added to the FPS CSV file:

Note:

The new Data Item 209 will be available to report on from BI/Insight through the RTI history folder.

14.9. Statutory Parental Bereavement Pay (SPBP) – User Action Required

From 2020/21, parents or carers suffering the bereavement of a child under the age of 18, or suffering a stillbirth from 24 weeks of pregnancy, will be entitled to two weeks Statutory Parental Bereavement Leave.

Parental Bereavement Leave is a statutory day one entitlement. Employees with 26 weeks' continuous service and average weekly earnings (AWE) above the LEL will be entitled to paid leave at the statutory rate.

 Note:

The statutory leave is paid at the lower of £151.20 a week or 90% of salary.

Note the following points:

- The policy will use a broad definition of a 'bereaved parent.'
- Parental bereavement leave and pay can be taken as a single block, or as two separate weeks.
- Employed parents will have a window of 56 weeks to use the entitlement.
- Notice requirements will be flexible and will distinguish between leave taken very soon and leave taken at a later period
- Evidence requirements will mirror existing requirements used for other family leave and pay rights, where it is practicable to do so.

14.9.1. Set up a Statutory Parental Bereavement Pay (SPBP) pay code:

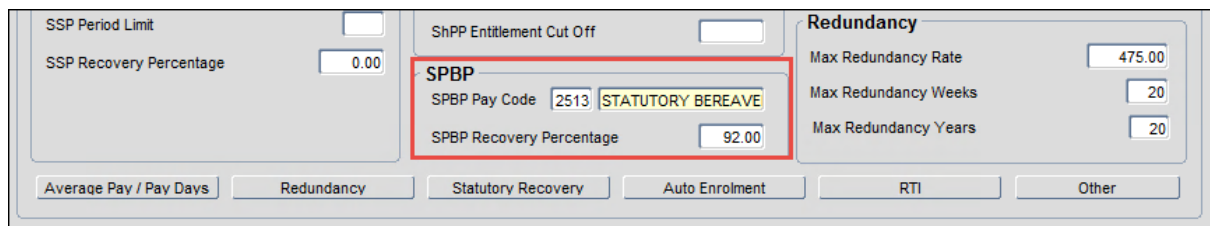

It is best practise to clone an existing pay code with similar characteristics, such as Statutory Maternity Pay (SMP). To clone/duplicate a pay code:

1. Go to *Reference > Pay Codes*.
2. Enter the SMP Pay Code in the Pay Code field or click  to select the SMP Pay Code from the LOVs.
3. Click  to execute the query.
4. Select  to create a new record.

5. Select  to duplicate the previous record.
6. Overwrite the pay code number, pay code description, and review all other fields.
7. Click **Save**.

Once the pay code is configured:

1. Go to *Reference > Maintain Statutory Pay Parameters*.
2. Enter the newly created *SPBP Pay Code* and the *SPBP Recovery Percentage*, i.e. 92%.

Note:

- Once the pay code is configured, employees can be paid SPBP by entering a timesheet through the Input > Timesheets > Maintain Timesheets screen.
- The system automatically calculates the recovery / compensation (if applicable) amount.
- V29 statutory absences use the "Tupe Date" indicator. Payroll looks at the TUPE date if populated.

14.9.2. Full Payment Submission

A new data item "SPBP YTD" has been added to the FPS file.

Data Item	Field	Description
212	Value of Statutory Parental Bereavement pay (SPBP) year to date.	New data field added. <xsd:element name="SPBPYTD">

14.10. Date First Registered and Low Emission Vehicles

The following fields have been added to the Full Payment Submission (FPS):

Data Item	Field Name	Description
214	Date first registered.	New data field added. <xsd:element name="FirstRegd">
211	Zero emissions mileage	New data field added. <xsd:element name="ZeroEmissionsMileage">

A new column for Data Item 214 and 211 has been added to the FPS CSV file:

AP	AQ	AR	AS	AT	AU	AV	AW
BIK Car Model	BIK Car Approved Co2 Emissions	Zero Emissions Range	BIK Car HMRC Fuel Type	BIK Car Reg	BIK Amendment Indicator	BIK Calculated Price	Date First Registered

Note:

The new Data Item 214 and 211 will be available to report on from BI/Insight through the 'RTI History' folder.

The following fields have been updated to reflect the current tax year on the Full Payment Submission (FPS):

Data Item	Field Name	Description
181	Date car was available from	Changed to reflect new tax year. <xsd:maxInclusive value="2021-04-05"> <xsd:minInclusive value="2020-04-06">
183	Date car was available to	Changed to reflect new tax year. <xsd:maxInclusive value="2021-04-05"> <xsd:minInclusive value="2020-04-06">

Note:

- Validation on data items 181 and 183 is linked to the payroll tax year. Once the Year End Cleardown completes, and the tax year moves on, PeopleXD ensures data items 181 and 183 report the new tax year to meet HMRC's validation rules.
- The new Data Item 181 and 183 are currently available to report on from BI/Insight through the RTI history folder.

14.10.1. Date First Registered

There is a new requirement to report the “Date First Registered” through the RTI FPS File.

This existing field in PeopleXD has now been made mandatory.

Note:

The “Date First Registered” field is now mandatory as it affects the BIK percentage rate used when calculating the cash equivalent value of the vehicle.

Users should review the updated Vehicle Management and Load BIK user guides for full details of managing vehicles on the system.

15. RTI Schema Changes 2021-2022

The following changes have been made to RTI for the new tax year:

15.1. FPS – Action Required to Identify Student Loan Plan Type 4.

The main changes made to the FPS process relate to Namespace and new validation for moving into the new tax year. These changes are applied automatically by PeopleXD once the payroll company moves into the new tax year.

The Disguised Remuneration Income has also been removed from the schema as well as it is no longer to be reported going forward.

Final the Student Loan Plan Types have been extended to include Student Loan Plan Type 4. This requires users identify the pay codes used for the Student Loan Plan Type 4 under Reference > Maintain Statutory Pay Parameters > RTI > Payment Pay Code.

17.2. EPS – No Action Required

Changes made to the EPS process relate to *Namespace* and a new validation for moving into the new tax year. These changes are applied automatically by PeopleXD once the payroll company moves into the new tax year.

Table 2: EPS changes

Data Item	Field	Description of change	2023-24 RIM distribution: 2023-v1.0 EPS version: 2023-v1.0	2023-24 RIM distribution: 2024-v2.0 EPS version: 2024-v1.0

18. Insight

18.1. RTI Data Views

A new insight data view folder has been added to the payroll business area for the RTI tables. They are RTI History and RTI Earnings NIC. These views hold all details of the RTI files created on the system. Below is an example of the fields available within that view.

18.2. New Fields

The following is an example of the fields contained in the Pay Person Profile details or Pay Person Master depending on the version of the Insight software you are using.

Label
Middle Name
Passport Number
Starter Declaration
Living in UK 6Mths or More
Living in UK 6Mths or Less
Working in UK Living Abroad
European Commonwealth Citizen
EPM6 Scheme
Period Rejoined Company
Irregular Paid Employee
EPM6 Scheme
Period Rejoined Company
Irregular Paid Employee

19. Appendix

19.1. FPS Control Report Sample

Year To Date Section:

Period 201503 Final Payment Summary for Pay Group 50 UK MONTHLY PAYROLL		
Cumulative	RTI Reference	Total
Taxable Pay	41A	220885.74
Employee Pension Contributions	150	1460.48
Paye	41B	76629.35
Employee NIC	86Ba	15731.99
Student Loan	41C	0
Employer NIC	86Aa	23407.16
SSP	69	0
SMP	70	0
SPP	71	0
SAP	72	0
ShPP	73	0
Gross Earnings for NIC	79A	222346.22
Benefits Value Taxed	149	0
Non Net Pay Pension	151	0

Period Section:

This Period	RTI Reference	Total
Taxable Pay	58	153103.17
Payment Value not subject to Tax or NIC	58A	0
Employee Pension Contributions	61	730.24
Pay After Statutory Deductions	59	90794.59

Non Net Pay Pension	65	0
Employment Allowance	166	0

19.2. Continuous and Non Continuous Employment Examples

Example of Leaving and Rejoining which is Continuous Employment (No P45)

Employment Period	Pay Period	Activity	PAY	PAYE
1	April	Paid as normal	£2,000	£400
	May	Leaves 05 May and gets P45 via RTI	£400	£80
		FIRST period of employment returned to HMRC	£2,400	£480
2	July	Rejoins and gets paid in July	£2,000	£400
	Aug	Leaving 5 th Aug and Rejoining 8 th Aug. User decides NOT SPLIT employments i.e. is continuous employment so both leave and rejoin date entered THIS pay period. NO P45 issued.	£950	£190
	Sept	Paid as normal	£2,000	£400

Example of Leaving and Rejoining which is not Continuous Employment and which requires P45

Employment Period	Pay Period	Activity	PAY	PAYE
1	April	Paid as normal	£2,000	£300
	May	Leaves 05 May and gets P45 via RTI	£400	£80
		FIRST period of employment returned to HMRC	£2,400	£380
2	July	Rejoins and gets paid in July	£2,000	£400
	Aug	Leaving 5 th Aug and Rejoining 8 th Aug. User decides SPLIT employments / NOT continuous employment. Employee will get P45 Issued in Aug. Rejoin Date will be entered NEXT pay period.	£500	£100

Employment Period	Pay Period	Activity	PAY	PAYE
		SECOND period of employment returned to HMRC	£2,500	£500
3	Sept	Rejoins in September retrospectively commencing third period of employment	£2,450	£590

Note:

Any amendments made affecting payments made to employees in previous pay periods will only be picked up in the FPS for the next pay period.
