1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to configure Analysis Codes.

Items covered include:

- How to add an Analysis Code.
- How to duplicate an Analysis Code.
- How to delete an Analysis Code.

1.2. What is an Analysis Code?

Analysis Codes are used to group a set of Pay Codes that are configured with similar characteristics.

For example:

- A pay code for adoption leave would be assigned to an Analysis Code of "Absence Management."
- A pay code for basic hours would be assigned an Analysis Code of "Basic Pay".

All Pay Codes must be associated with an Analysis Code. You can add Analysis Codes as required, but they must be associated with one of the following specific Analysis Types:

- GP - Gross Pay
- BK – Benefit in Kind
- NT - Non-Taxable
- DN – Deduction (statutory & voluntary)
- BK – Benefit in Kind
- TR - Tax Relief (tax relief deductions e.g. pension & AVC)
- NP - Nett Pay
- EN - Employer Pension
- ER - Employer NI/PRSI
- AL – Apprentice Levy

Payroll: Configuring Analysis Codes

The Analysis Type identifies groups of Analysis Codes and is used to provide the major headings on the 'Payroll Update Control Report'. Analysis Types are also used to post the payroll journal details to your Financial Management System (FMS).

PeopleXD provides a set of pre-configured Analysis Codes on the install of PeopleXD. However, these can be reviewed, updated, and added to as per your requirements.

These are also used to extract data for management information, ad hoc reporting, and in the posting of the General Ledger.

2. Maintain Analysis Codes

2.1. The Analysis Code Screen

To access the Analysis Codes screen:

1. Go to *Settings > Codes > Analysis Code*

The *Analysis Codes* screen opens.

Analysis Code	Analysis Type	Pay Type	Overtime Indicator
Code 1000 Description Basic Pay	Type GP Description GROSS PAY		☐
Code 1500 Description Salary Sacrifice	Type GP Description GROSS PAY		☐
Code 2000 Description Overtime	Type GP Description GROSS PAY		☒
Code 2500 Description Statutory Pay	Type GP Description GROSS PAY		☐
Code 3000 Description Other Pay	Type GP Description GROSS PAY		☐
Code 3500 Description Benefit In Kind	Type BK Description BENEFIT IN KIND		☐

Each Analysis Code displays the following fields:

- Analysis Code
 - Description
- Analysis Type
 - Description
- Pay Type
- Overtime Indicator

2.1.1. Filtering the Analysis Code Screen

Click the filter icon to filter the screen by:

- Analysis Code
- Description
- Analysis Type
- Pay Type

2.2. Add an Analysis Code

To add a new Analysis Code:

1. Go to *Settings > Codes > Analysis Codes*.
2. Click the **Add Analysis Code** button.
3. Enter a new unique **Analysis Code**. (Maximum of 4 digits).
4. Add a description in the **Analysis Code Description** field. (Maximum of 30 characters).
5. Select an **Analysis Type** using a relevant code from the table below. An error message will be displayed for all other entries.

Analysis Type	Description
GP	Gross Pay
NT	Non-Taxable
DN	Deduction
TR	Tax Relief (Relates to superannuation deductions)
NP	Nett Pay
EN	Employer Pension
ER	Employer NI (UK) PRSI (Ireland)
AL	Apprentice Levy

6. Enter optional details:
 - a. **Pay Type** - For standard implementations, this field will not be populated. It can be used to differentiate between 2 'Analysis Codes' of the same 'Analysis Type' (Client specific).
7. Click **OK**.
8. If required enable the **Overtime Indicator** if this Analysis Code is for overtime payments (Optional).

2.3. Delete an Analysis Code

To delete an Analysis Code:

1. Go to *Settings > Codes > Analysis Codes*.
2. Click the relevant 3 dot menu.
3. Click **Delete**.

3. Menu Options Required

The following menu option is required for an employee to access the Analysis Code screens from the Settings tab.

System	Menu Option
CorePortal Pay	Settings - Analysis Code
