1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to configure Expense/GL Codes which can be assigned to an employee's salary.

Items covered include:

- How to add an Expense / GL Code.
- How to edit an Expense / GL Code.
- How to duplicate an Expense / GL Code.
- How to delete an Expense / GL Code.

1.2. What are Expense Codes?

Expense Codes are used to summarise transactions into groups of expenses/costs and liabilities, so they can be posted GL (Profit & Loss and Balance Sheet) in the form of Debits and Credits. The following points should be taken into consideration regarding Expense Codes:

- An Expense Code is not associated with an employee. It's possible to have a different Expense Code for every element of pay an employee receives.
- Expense Codes are used in conjunction with the Cost Centres, i.e. one Expense Code may be used in many different Cost Centres.
- The Expense Code is normally derived based on the type of employee and the type of pay that the employee receives.
- An Expense Code is an 8-digit number field. Data mapping can be used to ensure the Expense Code output by CoreHR matches the Expense Code in your FMS.

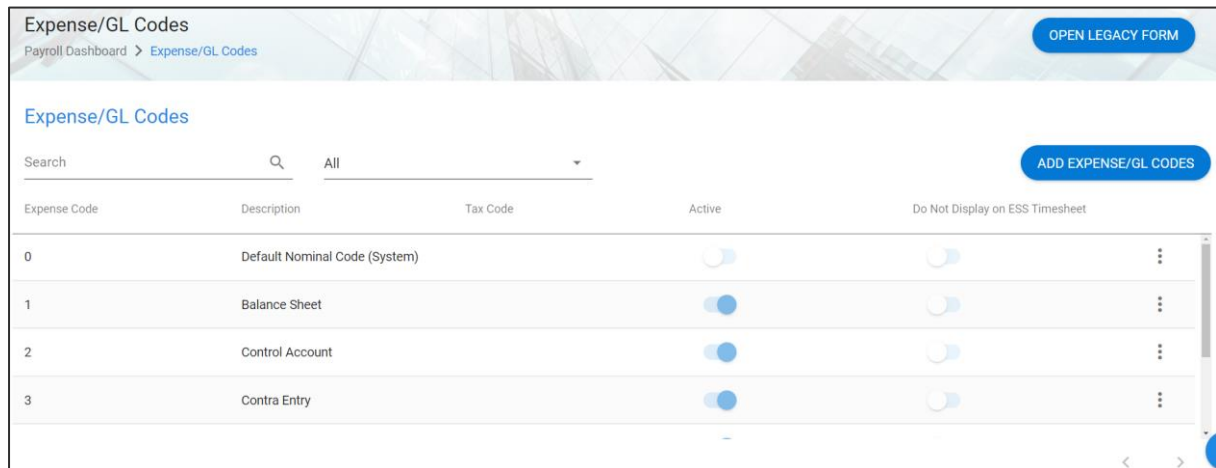

2. Maintain Expense/GL Codes

2.1. The Expense/GL Codes Screen

A client may have many Expense / GL codes and can choose to configure as many as is required.

To access the Expense/GL Codes screen:

1. Go to *Settings > General Ledger Costing > Expense/GL Codes*.

Expense Code	Description	Tax Code	Active	Do Not Display on ESS Timesheet	
0	Default Nominal Code (System)		☐	☐	⋮
1	Balance Sheet		☒	☐	⋮
2	Control Account		☒	☐	⋮
3	Contra Entry		☒	☐	⋮

Each Expense/GL code displays the following fields:

- Expense Code
- Description
- Tax Code
- Active Indicator
- 'Do Not Display on ESS Timesheet' indicator

2.2. Add an Expense/GL Code

To add a new Expense/GL Code:

1. Go to *Settings > General Ledger Costing > Expense/GL Codes*.
2. Click **Add Expense/GL Codes**.
3. Enter a unique **Expense/GL Code** (Maximum 12 digits)
4. Add a description in the **Description** field. (Maximum of 30 characters).
5. If required enter a **Tax Code**.
6. Enable the **Active Indicator**.
7. If required enable the **Do Not Display on ESS Timesheet Indicator**
8. Click **OK**.

2.3. Edit an Expense/GL Code

To edit an Expense/GL Code:

1. Go to *Settings > General Ledger Costing > Expense/GL Codes*.
2. Click the relevant 3 dot menu.
3. Click **Edit**.
4. Update the relevant data.
5. Click **OK**.

2.4. Disable an Expense/GL Code

To disable an Expense/GL Code:

1. Go to *Settings > General Ledger Costing > Expense/GL Codes*.
2. Disable the **Active Indicator**

Note:

Always ensure Expense/GL Codes are not currently in use before deactivating.

3. Menu Options Required

The following menu option is required for a user to access the Expense/GL Codes screen from the Settings tab.

System	Menu Option
CorePortal Pay	Settings - Expense/GL Codes
