1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to configure Project Codes which can be assigned to an employee's salary.

Items covered include:

- How to add a Project Code.
- How to edit a Project Code.
- How to disable a Project Code.

1.2. What are Project Codes?

Project Codes allow an organisation to charge employees costs to specific projects. A project is typically a temporary endeavour with a defined beginning and end.

Points to note:

- Employees are assigned to a project code against their contract in HR.
- Like Cost Centres; *Cost Allocations*, *Timesheet Current Period*, and *Pay Code* configuration allow you to allocate an employee's pay to a project code(s) other than what is on the employee's contract.
- Project Codes are typically used for cost centre sub-analysis in Financial Management Systems (FMS).

Example:

A software developer may work on different projects throughout the year. When the employee starts work on a new project, they may need to be assigned a new Project

2. Maintain Project Codes

2.1. The Projects Screen

A client may have many projects which they wish to assign to employees' salaries, and as such, can choose to configure multiple Project Codes.

To access the Projects screen:

1. Go to *Settings > General Ledger Costing > Projects*.

Project	Client Ref	Analysis	Activity	Rate	Cost Centre	Budget Value	Recoup	Active
Default Project Code 1						☐	☐	☒
Project A 2						☐	☐	☒

Each Project Code displays the following fields:

- Project Code
 - Description
- Client Ref.
- Analysis Code
 - Description
- Activity
 - Description
- Rate
- Cost Centre
- Budget Value
- Recoup Indicator
- Active Indicator

2.2. Add a Project Code

To add a new Project Code:

1. Go to *Settings > General Ledger Costing > Projects*.
2. Click **Add Project**.
3. Enter a unique **Project Code** (Maximum 12 digits).
4. Add a description in the **Project Description** field. (Maximum of 30 characters).
5. Enter optional details:
 - a. **Client Ref** (Maximum 13 characters).
 - b. **Analysis Code**
 - c. **Activity Code**
 - d. **Rate**
 - e. **Cost Centre**
 - f. **Budget Value**
6. Enable the **Active Indicator**
7. Click **OK**.

2.3. Edit a Project Code

To edit a Project Code:

1. Go to *Settings > General Ledger Costing > Projects*.
2. Click the relevant 3 dot menu.
3. Click **Edit**.
4. Update the relevant data.
5. Click **OK**.

2.4. Disable a Project Code

To disable a Project Code:

1. Go to *Settings > General Ledger Costing > Projects*.
2. Disable the **Active Indicator**

Note:

Use caution when updating the Active indicator to deactivate project codes. If there are currently employees assigned to an inactive project code, errors will be generated:

- On the employee record
- Payroll Validation
- When generating the General Ledger

3. Menu Options Required

The following menu option is required for an employee to access the *Project Code* screen from the Settings tab.

System	Menu Option
CorePortal Pay	Settings - Project Code
