1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to configure Payroll Calendars for a company.

Items covered include:

- How to add a Payroll Calendar.
- How to edit a Payroll Calendar.
- How to duplicate a Payroll Calendar.

1.2. What is a Payroll Calendar?

A payroll calendar must be generated for each company within an organisation. The following points should be noted:

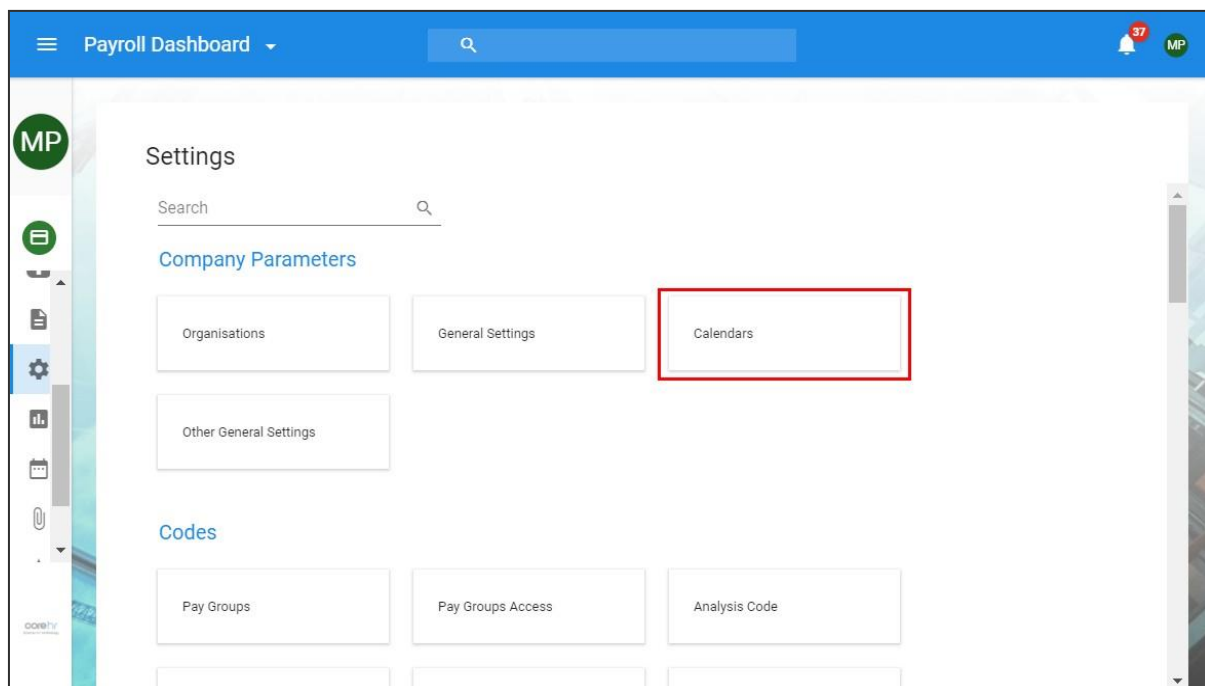

- A payroll calendar must be generated for each company within an organisation.
- The calendar consists of the year broken up into week numbers, e.g. 202001, 202002, 202003 etc.
- The calendar tracks the period end date for weekly, fortnightly, and four-weekly pay groups. The period end date for monthly pay groups will always be the last day of the month.
- The payroll calendar does not track the payment date.
- Period end dates can be offset at a pay group level.
- The calendar will always contain at least the current year and future years.

2. Provide Access to Calendar Configuration

2.1. Access to Calendars on the Settings Tab

The following menu option is required for an employee to access the Calendar screen from the Settings tab.

System	Menu Option
CorePortal Pay	Settings - Calendars

Status	Impact
Enabled	The user will have full view and edit access to the Calendar screen.
Disabled	The user can still access the screen, but a 'You do not have access to this screen' message will be displayed.

3. Maintain Payroll Calendars

To add a Payroll Calendar:

Go to *Settings > Company Parameters > Calendars*.

3.1. Payroll Calendar Overview

Note:

Payroll Calendars are always preconfigured as part of the year end software delivery. Upon initial set up of PeopleXD software, a calendar will be configured, however, the details below may need to be edited.

To view a Payroll Calendar:

1. Go to: *Settings > Company Parameters > Payroll Calendars*.
2. Select the relevant company from the drop-down menu.

Column	Description
Week Number	The calendar will have one entry per payroll week for the current year. The format is YYYYWW where YYYY is the Year Number and WW is the Week Number.

	The standard year will contain 52 entries. If a week 53 or fortnight 27 is required, then the additional entries for week 53 and week 54 must be added to the calendar
Tax Period	The tax period is the month number into which the payroll week falls. A tax period will consist of 4 or 5 payroll weeks.
Calendar Period	Calendar Period or Finance Period will usually run alongside the annual calendar, i.e. April is month 4.
Week End Date	The week ending date is the date up to which the employees are paid for that week. The week end date is not relevant for monthly payroll.
Production Week	Though this is no longer used in payroll, some organisations use this for reporting purposes, e.g. if an organisation's financial year is August to July, then production week could be set to 202001 for each of the August weeks.
Mth Seq	The monthly sequence is the sequence of payroll weeks in a tax month. The sequence will generally go 4,4,5,4,4,5 etc. The payment date determines what tax month into which a payroll week falls.
Qtr Seq	The quarterly indicator is a sequence of the weeks in a quarter and will go from 1 to 13 etc.
FNtly Ind.	- Add Y for the weeks when a fortnightly payroll is due to be run. OR - Add N for the weeks in a fortnight where payroll is not to be run. - E.g. for fortnightly payrolls, week 1 '201801' may be marked as N, and week 2 '201802' to Y to identify the payroll run.
4 Wkly Ind	- Add Y for each of the weeks when a 4-weekly payroll is due to be run. OR - Add N for the weeks where payroll is not to be run.
Monthly Ind	Add Y for the last week of the month when the payroll is to be run.
Multi Run	This is an optional indicator used to denote a week in which multiple Pay

Periods will be processed in the one payroll run. It is typically used in weekly Pay Groups where payroll wants to pay an additional one or more weeks in the current week. For example, at Christmas, you may want to run two weeks in one period. In that case, you would set multi-run to 1. It identifies the number of additional periods to be paid in the current run. The value specified here will also determine the additional Tax Credits, Cut-Offs, PRSI Credits to be applied in the current run.

The  button allows you to **Duplicate** the week. This new week can then be edited.

Calendars

Company: Customer Company (UK) Amend Dates Build / Rebuild Year

Week Number	Tax Period	Calendar Period	Week End Date	Production Week	Mth. Seq.	Qtr. Seq.	FNtly Ind.	4 Wkly Ind.	Mont... Ind.	Multi Run	
201901	201901	201904	27-Mar-2019	201901	1	1	N	N	N		
201902	201901	201904	03-Apr-2019	201902	2	2	Y	N	N		
201903	201901	201904	10-Apr-2019	201903	3	3	N	N	N		

3.1.1. Amend Dates

As mentioned earlier, Calendars will automatically build for the next payroll year as part of the year end process. However, calendars can be amended in certain circumstances. For example, situations where the weeks are different, i.e. leap years or year, which requires a week 53 / 54 where extra days need to be added to the year. To do this:

1. Click **Amend Dates**.

Calendars

Company: Customer Company (UK) Amend Dates Build / Rebuild Year

Week Number	Tax Period	Calendar Period	Week End Date	Production Week	Mth. Seq.	Qtr. Seq.	FNtly Ind.	4 Wkly Ind.	Mont... Ind.	Multi Run	
-------------	------------	-----------------	---------------	-----------------	-----------	-----------	------------	-------------	--------------	-----------	--

2. Add the number of days to the *No of Days* field.

3. Add the *From Period* and *To Period* where the days are to be added / subtracted.

Change Date

No of Days	From Period	To Period
-1	202001	202052

4. Click **OK**.

3.1.2. Build/Rebuild Year

The system provides an option to essentially copy / build a calendar from one year to the next. For example: to create a new calendar for 2020 as a copy of the existing 2019 calendar:

1. Click **Build/Rebuild Year**.

Calendars

Company
 Customer Company (Uk)

Week Number	Tax Period	Calendar Period	Week End Date	Production Week	Mth. Seq.	Qtr. Seq.	FNtly Ind.	4 Wkly Ind.	Mont... Ind.	Multi Run	
201901	201901	201904	27-Mar-2019	201901	1	1	N	N	N		...
201902	201901	201904	03-Apr-2019	201902	2	2	Y	N	N		...

2. Add the *Base Year* (2019).
3. Add the *New Year* (2020).

Build/Rebuild Year

Base Year New Year

4. Click **OK**.
5. The new calendar for 2020 will be generated which can then be amended to reflect the requirements for 2020.
