1.2	20 th March 2023	Isabelle Grey	Update to formatting. Updates to section 3.8. Court Order Pay Code .

1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide an overview of the *Pay Code Wizard* functionality in *Payroll* and how to use the *Pay Code Wizard* to create pay codes. This includes:

- What is the *Pay Code Wizard*?
- Customising the *Pay Code Library* view.
- Searching pay codes by *Payment Type* and *Subset Type*.
- How to clone and edit existing pay codes.
- Creating new pay codes using *the Pay Code Wizard*.
- Appendix of all pay code rules available.

1.2. What is a Pay Code?

Pay codes are used to define each pay element/type within Payroll. New pay codes may be defined and configured as required. When creating new pay codes, it is common practice to clone a similar existing pay code. Once a pay code is defined, it becomes available within all areas of payroll, i.e. within all pay groups and companies.

 **Note:** It is best practice to code Pay Codes in line with Analysis Codes. For example, if non-statutory deductions are designated analysis code 700, then all non-statutory deductions are in range 700-799.

1.3. What are Pay Formulas?

Pay codes carry 403 indicators and fields that can be defined for use within Payroll. The *Pay Code Wizard* creates pay codes by filtering down the available fields and indicators as the *Payment Type*, and *Subset Type* are defined.

Once the pay code type is defined, you can:

- Add elements to the *Pay Code Wizard* to create the *Pay Code Formula*, i.e. units, multiplier, value etc.
- Edit pre-defined rules or add new rules from the library list, e.g. Taxable, PRSIable / NIable. Set rules to define how this pay code writes out to the General Ledger for posting to your Financial Management System (FMS).

2. Accessing the Pay Code Wizard

2.1. Menu Options Required

Note:

System users require the following web service menu options to access and use both the *Pay Code Wizard* and *Classic Pay Code* screens.

To access and use both the *Pay Code Wizard* and *Classic Pay Code* screens, the user requires the following menu options. The following menu profile is available to enable all of the menu options required to access and use the *Pay Code Wizard* and *Classic Pay Code* screens. This menu profile is called: *PAYCODE_WIZARD_PROFILE*.

Menu Option	Description
Delete Pay Code groups items	Payroll > Delete paycode groups items
Delete paycode aeo	Payroll > Delete paycode aeo
Delete paycode nettscaledelements	Payroll > Delete paycode nettscaledelements
Delete paycode percentage elements	Payroll > Delete paycode percentage elements

Create paycode scaled rates deduction rates	Payroll > Create paycode scaled rates deduction rates

3. The Pay Code Library

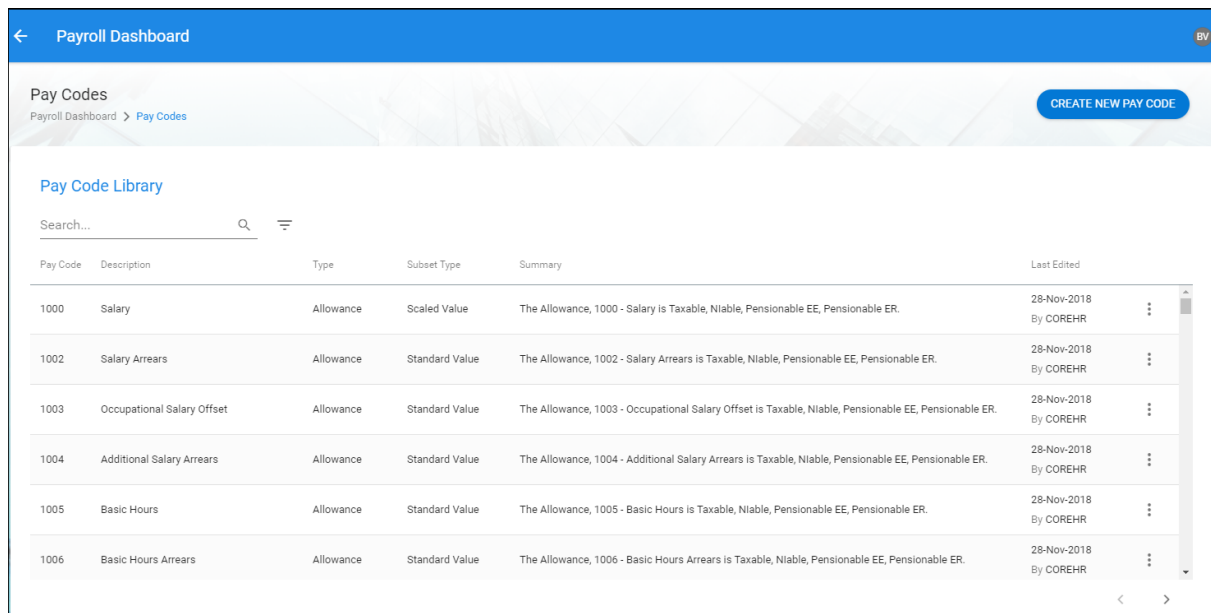

The *Pay Code Library* changes how pay codes are presented on the screen, allowing you to add and remove display options. The *Pay Code Library* also allows you to perform a filtered search of pay codes based on *Payment Type* and *Subset Type*.

3.1. Accessing the Pay Code Library

To access the *Pay Code Library*:

Go to *Payroll Dashboard > Settings > Pay Codes*.

The *Pay Code Library* opens.

The screenshot shows the 'Payroll Dashboard' header with a back arrow and a user icon 'BV'. Below the header, the 'Pay Codes' section includes a breadcrumb 'Payroll Dashboard > Pay Codes' and a 'CREATE NEW PAY CODE' button. The 'Pay Code Library' section features a search bar and a table with the following data:

Pay Code	Description	Type	Subset Type	Summary	Last Edited
1000	Salary	Allowance	Scaled Value	The Allowance, 1000 - Salary is Taxable, Niable, Pensionable EE, Pensionable ER.	28-Nov-2018 By COREHR
1002	Salary Arrears	Allowance	Standard Value	The Allowance, 1002 - Salary Arrears is Taxable, Niable, Pensionable EE, Pensionable ER.	28-Nov-2018 By COREHR
1003	Occupational Salary Offset	Allowance	Standard Value	The Allowance, 1003 - Occupational Salary Offset is Taxable, Niable, Pensionable EE, Pensionable ER.	28-Nov-2018 By COREHR
1004	Additional Salary Arrears	Allowance	Standard Value	The Allowance, 1004 - Additional Salary Arrears is Taxable, Niable, Pensionable EE, Pensionable ER.	28-Nov-2018 By COREHR
1005	Basic Hours	Allowance	Standard Value	The Allowance, 1005 - Basic Hours is Taxable, Niable, Pensionable EE, Pensionable ER.	28-Nov-2018 By COREHR
1006	Basic Hours Arrears	Allowance	Standard Value	The Allowance, 1006 - Basic Hours Arrears is Taxable, Niable, Pensionable EE, Pensionable ER.	28-Nov-2018 By COREHR

3.2. How Pay Codes are Presented in the Pay Code Library

The *Pay Code Library* changes how pay codes are presented on the screen, allowing you to:

- Use the filter options to sort pay codes in ascending or descending order.
- Add and remove filter options.

The table below displays the filter options available:

Filter Options	Description
Pay Code	Displays the pay code number.
Description	Displays the pay code description.
Type	Displays the pay code type: • Allowance/Payment • Deduction • Benefit in Kind • Court Order • Voluntary Order
Subset Type	Displays the subset type: • Percentage • Scaled • Standard Value
Summary	Displays a summary of the pay code • Pay Code Type • Pay Code number • Pay Code description • Taxable or Non-Taxable • NIable/PRSlable or Non-NIable/Non-PRSlable • Pensionable EE/Non-Pensionable EE • Pensionable ER/Non-Pensionable ER
Last Edited	The date the pay code was last edited and by whom.

3.2.1. Use the Filter Options to Sort Pay Codes

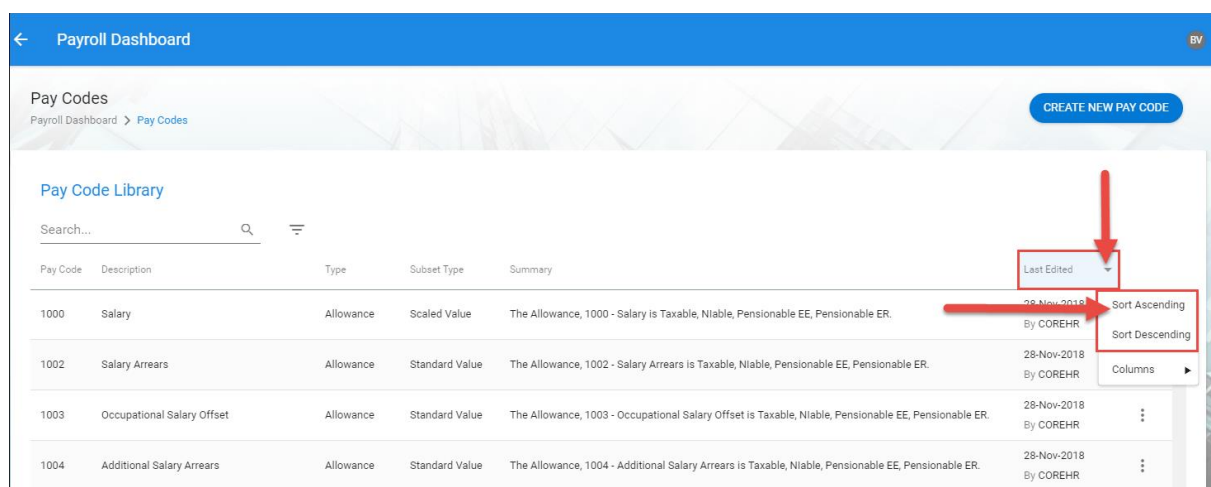

By default, the *Pay Code Library* displays pay codes by pay code number in ascending order. Each of the filter options allows you to sort pay codes in ascending or descending order.

For example, you can sort the list of pay codes by last edited, displaying the last edited pay code at the top of the list.

To sort the pay codes in ascending order of *Last Edited*:

1. Hover over the *Last Edited* filter option.

2. Click on .

3. Click **Sort Ascending**.

The pay codes now display in sequential order of last edited.

To turn off the ascending or descending filter:

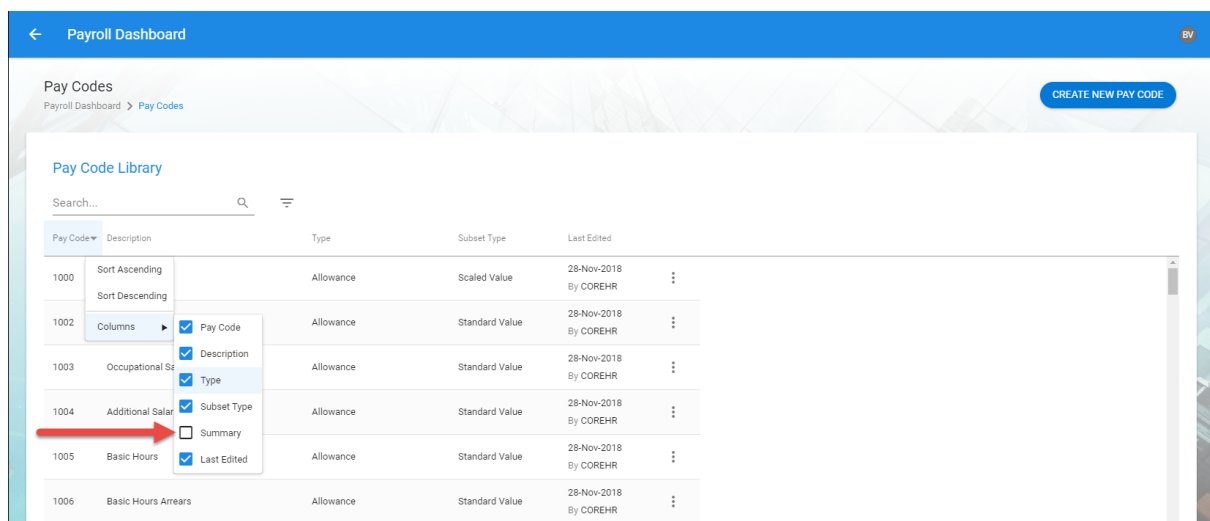

- Exit and re-enter the *Pay Code Library* **OR**
- Sort the *Pay Code* filter option in ascending order.

3.2.2. Add and Remove Display Options

The *Pay Code Library* allows you to add and remove which filter options display on the screen. For example, you can remove the filter option *Summary*, so it no longer appears on the screen.

To remove the filter option *Summary*.

1. Hover over any of the filter options displayed on the screen.
2. Click on .
3. Click **Columns**.
4. Untick **Summary**.

The filter option *Summary* no longer appears in the *Pay Code Library*.

3.3. How to Search the Pay Code Library

3.3.1. Search Field

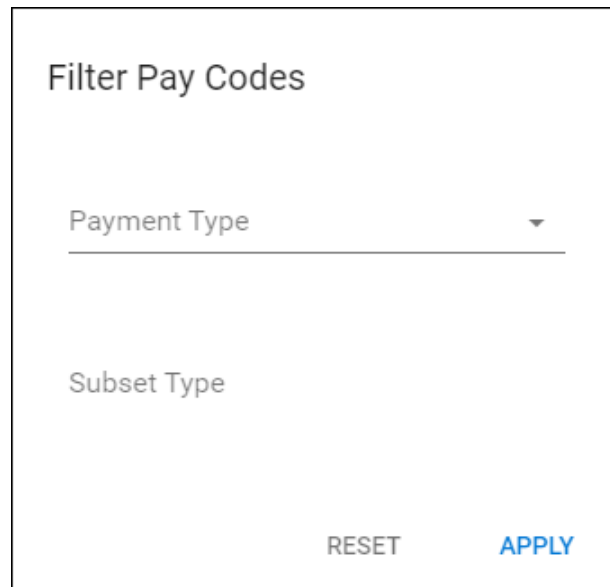

The search field at the top of the screen allows you to complete a keyword search for pay codes, using the following:

- Pay Code Number
- Description

3.3.2. Filtered Pay Code Search

1. Click on the  button to open the *Filter Pay Codes* screen.

This allows *Payment Type* and *Subset Type* to be applied to search for pay codes.

2. Select the pay code *Payment Type*, and if necessary, the *Subset Type*.
3. Click **Apply**.

The *Pay Code Library* will now only display pay codes with a *Payment Type* of *Allowance/Payment*, and a *Subset Type* of *Standard Value*.

The blue dot next to the Pay Code Filter  indicates that the filter is on.

3.3.3. Switch Off the Pay Code Filter

To switch off the Pay Code Filter:

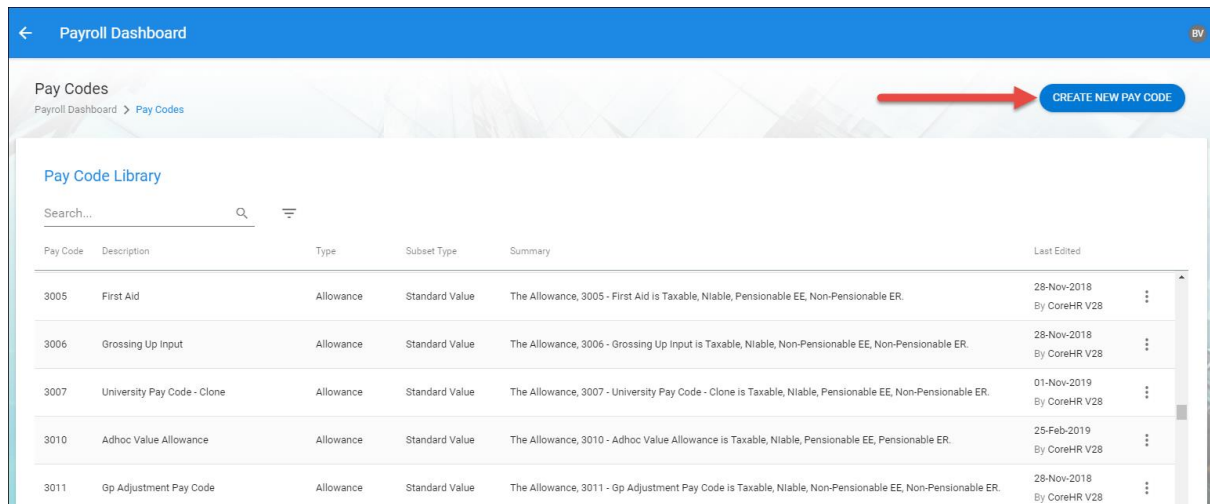

1. Click on the Pay Code Filter .
2. Select **Reset**.
3. Select **Apply**.

3.4. How to Create New Pay Codes

The *Pay Code Library* allows you to create new pay codes.

To create a new pay code:

1. Go to *Payroll Dashboard > Settings > Pay Code*.
2. Select the **Create New Pay Code**.

The *Create New Pay Code* screen opens.

Create New Pay Code

Payment Type*

Payment Subset Type*

Pay Code*

Description

CANCEL

OK

Populate the *Create New Pay Code* screen with the following:

- Payment Type
 - Allowance/Payment
 - Deduction
 - Benefit in Kind
 - Court Order
 - Voluntary Order
- Payment Subset Type
 - Percentage
 - Standard Value
 - Scaled
- Pay Code Number
- Description

3. Click **OK**.

The *Pay Code Wizard* screen opens containing three options:

1. **Pay Code Formula**
2. **Rules**
3. **General Ledger**

The screenshot displays the 'Pay Code Wizard' interface. On the left, a sidebar contains three numbered options: 1. Pay Code Formula (highlighted with a red box), 2. Rules, and 3. General Ledger. The main area is titled 'Details' and contains the following fields:

- Pay Code ***: 7008
- Pay Code Description ***: Trade Union
- Analysis Code ***: Analysis Code

Below these fields, a text description reads: 'The Deduction, 7008 - Trade Union is Non-Taxable, Non-PRSIable, Non-Pensionable EE, Non-Pensionable ER, Non-USCable.'

The 'Hours / Days / Units / Value *' section includes:

- Value**: A dropdown menu with 'Value' selected.
- Hours Days Limit**: A dropdown menu.
- Multiplier ***: A dropdown menu with '-1' selected.
- Standard Value**: A dropdown menu.

Below this, there is a 'Select a value type' label and a toggle switch for 'Update EEs with custom value' which is currently turned off.

The 'Formula' section at the bottom states: 'This Deduction is calculated on Value, multiplied by a Multiplier of -1.'

At the bottom right, there is a 'NEXT' button and a 'cancel' link.

3.4.1. 1. Add the Pay Code Formula

The first row of the *Pay Code Formula* screen allows you to edit the pay code details.

Add or edit the following details:

Details	Description
Pay Code	Edit the pay code number.
Pay Code Description	Edit the pay code description.
Analysis Code	Link the pay code to an analysis code.

The second row in the *Pay Code Formula* screen allows you to add elements that affect how the pay code calculates.

The following *Pay Code Formula* elements can be added:

Note: The pay code formula fields that appear on the screen are dependent on both the *Payment Type* and *Subset Type* of the pay code.

Payment Type	Subset Type	Indicator	Description
Allowance/ Payment	Standard Value	Hours/Days/Units/Value	This represents the type of payment on which the pay code is based.
		Hours Days Limit	This is required if the pay code is set up as an hourly/daily pay code. If the pay code exceeds the limit specified here, a warning message will appear in the observation report, when viewing gross to nett output.
		Multiplier	Pay Multiplier will default to 1 for normal pay but may be changed. For

Payment Type	Subset Type	Indicator	Description
			example, enter 1.5 to calculate overtime at time and a half.
		Standard Value	Add the standard value associated with the allowance. This can be overwritten at the employee level.
	Percentage Allowance	Pay Codes	Select the pay codes on which to base the calculation.
		Multiplier	Add the multiplier.
		Standard Percentage	Add the standard percentage. This can be overwritten at the employee level.
		Percentage Ceiling	Populate if a ceiling applies to this percentage calculation.
	Scaled Value	Hours/Days/Units/Value	This represents the type of payment on which the pay code is based.
		Value Limit	Enter a limit for <i>Hours</i> or <i>Days</i> pay code types.
		Multiplier	Add the multiplier.
		Add	Add scale points see section 2.7. Scaled Pay Codes
Deduction	Standard Value	Hours/Days/Units/Value	This represents the type of payment on which the pay code is based.
		Hours Days Limit	Add the hours or days limit.
		Multiplier	For deductions, set the multiplier to -1.
		Standard Value	Add the standard value. This can be overwritten at employee level.
		Update EEs with custom value	Enable to update all employees with the pay code assigned to reflect the configured standard value. This will overwrite all values, including custom

Payment Type	Subset Type	Indicator	Description
			values previously entered on an employee's record.  Note: When disabled only employees with the standard value assigned will be updated.
	Percentage Deduction	Pay Codes	Select the pay codes on which to base the calculation.
		Multiplier	For deductions, set the multiplier to -1.
		Standard Percentage	Add the standard percentage. This can be overwritten at the employee level.
		Percentage Ceiling	Populate if a ceiling applies to this percentage calculation.
	Scaled Value	Pay Codes	Select the pay codes on which the percentage deduction calculates.
		Hours/Days/Units/Value	This represents the type of payment on which the pay code is based.
		Value Limit	Add the hours or days limit.
		Multiplier	For deductions, set the multiplier to -1.
		Add	Add scale points see section 2.7. Scaled Pay Codes
Benefit in Kind	Standard Value	Hours/Days/Units/Value	Add hours, days, units or value.
		Hours Days Limit	Add the hours or days limit.
		Multiplier	Add the multiplier.
		Standard Value	Add the standard value.
Court Order	Court Order	Hours/Days/Units/Value	Add hours, days, units or value.
		Hours Days Limit	Add the hours or days limit.
		Multiplier	Add the multiplier.
		Standard Value	Add the standard value.

Note: As the *Pay Code Formula* indicators update, the text below also updates.

Note: The default pay code rules that appear on the screen are dependent on both the *Payment Type* and *Subset Type* of the pay code. To edit a default rules see step 6.

- Click **Add** to add a new rule.

The screenshot shows the 'Pay Codes' section with the 'Pay Code Wizard' sub-section. The 'Rules' tab is selected. A table lists various rules with their descriptions and values. An 'ADD' button is highlighted with a red box and a red arrow pointing to it.

Rule	Description	Value	
Taxable	Enter Taxable, Non-Taxable, Pre-Tax or Income Continuance	Taxable	EDIT
PRSIable	Enter PRSIable (Y), Non-PRSIable (N), Non-PRSIable EE / PRSIable ER (S) or PRSIable EE / Non PRSIable ER (R)	PRSIable	EDIT
Pensionable for Employee	Select if Employee Pensionable or Non-Employee Pensionable	Non-Pensionable EE	EDIT
Pensionable for Employer	Select if Employer Pensionable or Non-Employer Pensionable	Non-Pensionable ER	EDIT
Disable for Timesheets	Select if the Pay Code is to be Disabled or Enabled for Timesheets	Disable for Timesheets	EDIT
USCable	Select Usable or Non-Usable	USCable	EDIT
Max Value	Enter the Maximum Value allowed on any one Timesheet entry for this Pay Code	999999.99	EDIT
Min Value	Enter the Minimum Value allowed on any one Timesheet entry for this Pay Code	-999999.99	EDIT

- Click on  and select a rule from the drop-down menu **OR**
- Type the name of the rule into the search field.

The 'Add Rule' dialog box is shown. The 'Rule' field contains 'Pay In Full'. Below it, the description reads: 'Check if this Payment is to be paid in FULL... FULL regardless of the employees Pay Multipliers'. There is a toggle switch and 'CANCEL' and 'OK' buttons at the bottom.

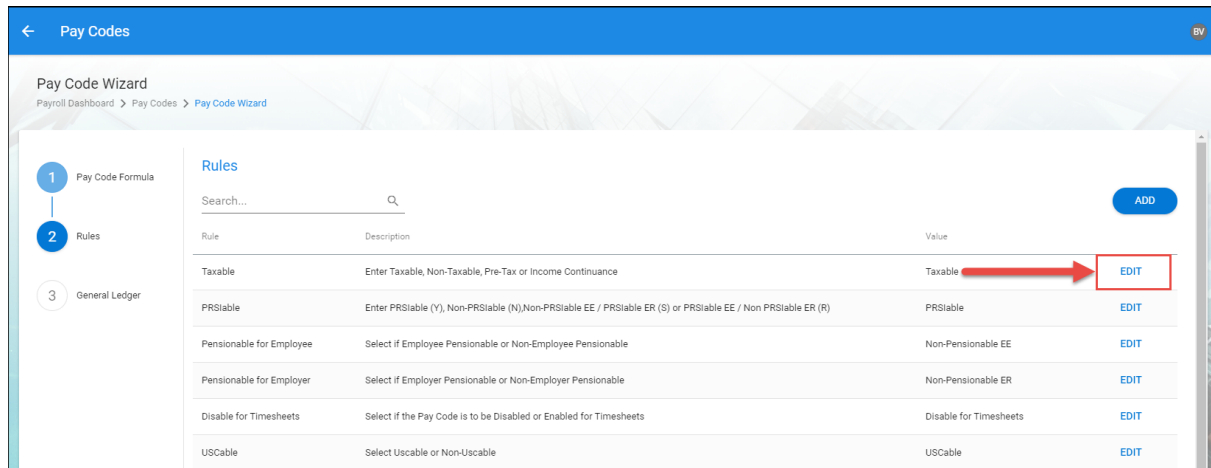

- Click **OK**.

XD Payroll: Pay Code Wizard - User Guide

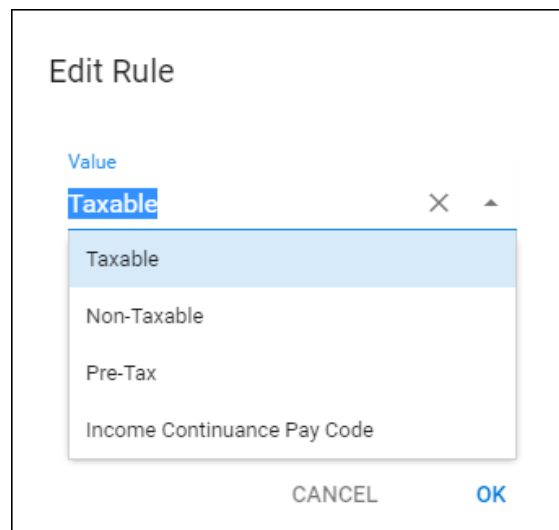

For a full list of rules that can be added, see section [3. Pay Code Rules Appendix](#).

To Edit an existing rule:

1. Click **Edit** next to the rule you want to edit.

2. Click on  and select a value from the drop-down menu.

3. Select a Value, e.g. Taxable.
4. Click **OK**.

3.4.3. 3. Add the General Ledger Rules

To add General Ledger rules:

1. Click on **General Ledger** or **Next**.

The screenshot shows the 'Pay Code Wizard' interface with the 'Rules' tab selected. The left sidebar has three steps: 1. Pay Code Formula, 2. Rules, and 3. General Ledger. The 'General Ledger' step is highlighted with a red box and a red arrow points to the 'Next' button at the bottom right. The main area displays a table of rules with columns for Rule, Description, Value, and an EDIT button. The rules include Taxable, PRSIable, Pensionable for Employee, Pensionable for Employer, Disable for Timesheets, USCable, Max Value, Min Value, and Calculation Priority. A red arrow points to the 'Next' button at the bottom right.

Rule	Description	Value	
Taxable	Enter Taxable, Non-Taxable, Pre-Tax or Income Continuation	Taxable	EDIT
PRSIable	Enter PRSIable (Y), Non-PRSIable (N), Non-PRSIable EE / PRSIable ER (S) or PRSIable EE / Non PRSIable ER (R)	PRSIable	EDIT
Pensionable for Employee	Select if Employee Pensionable or Non-Employee Pensionable	Non-Pensionable EE	EDIT
Pensionable for Employer	Select if Employer Pensionable or Non-Employer Pensionable	Non-Pensionable ER	EDIT
Disable for Timesheets	Select if the Pay Code is to be Disabled or Enabled for Timesheets	Disable for Timesheets	EDIT
USCable	Select USCable or Non-USCable	USCable	EDIT
Max Value	Enter the Maximum Value allowed on any one Timesheet entry for this Pay Code	999999.99	EDIT
Min Value	Enter the Minimum Value allowed on any one Timesheet entry for this Pay Code	-999999.99	EDIT
Calculation Priority	Enter the calculation Priority in order of importance e.g. 1,2,3 for each allowance	1	EDIT

The General Ledger screen opens.

The screenshot shows the 'Pay Code Wizard' interface with the 'General Ledger' tab selected. The left sidebar has three steps: 1. Pay Code Formula, 2. Rules, and 3. General Ledger. The 'General Ledger' step is highlighted with a red box. The main area displays the 'General Ledger' settings, including a toggle for 'GL Posting Override', dropdown menus for 'Cost Centre', 'Project', and 'Expense', and several other settings like 'Calculate Employer Savings', 'Do Not Include Employer Cost...', 'Allocate over Employee Cost AL...', 'Group Deduction by Employee ...', and 'Post to Employee Cost Centre'. A red box highlights the General Ledger settings area.

2. Enable the General Ledger Indicators and select values from the drop-down lists as required.

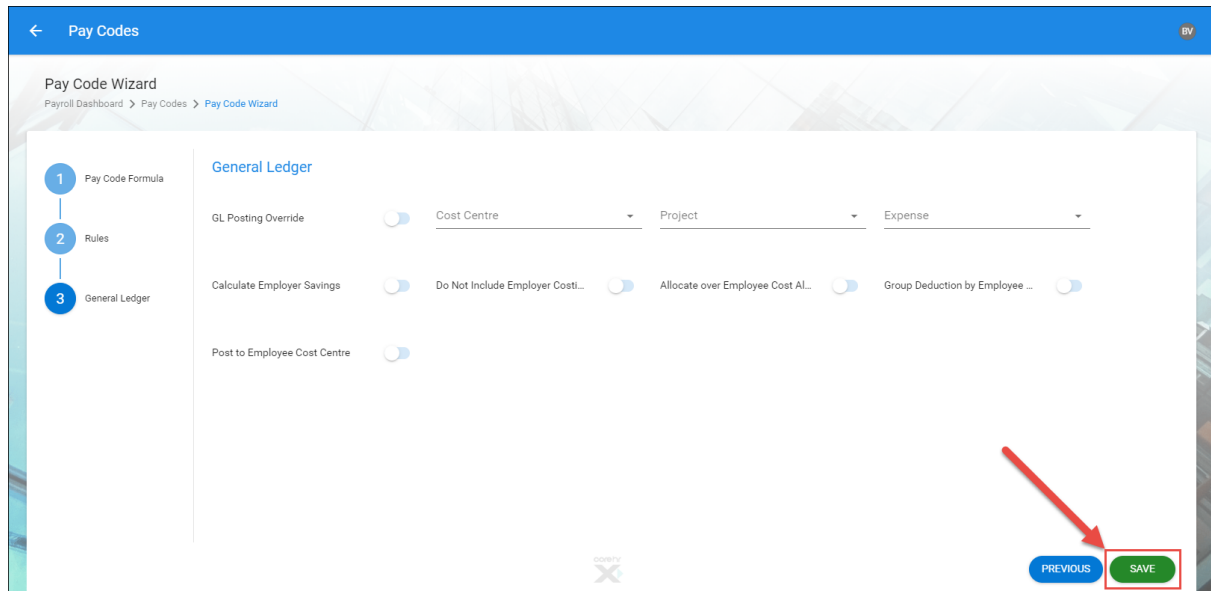

Indicators	Description
GL Posting Override	Enable if the cost centre, project code, and expense code on this pay code are to take precedence for allowance and timesheet entries.
Cost Centre	Enter a cost centre for allowances (positive and negative). This cost centre will be used if 'GL Posting Override' is enabled, and no cost centre is assigned to the allowance. For a once-off timesheet entries, if you enter a cost centre here and the field 'GL Posting Override' is enabled, this will overwrite the employee's home cost centre. For deductions, this cost centre will be used regardless of whether the 'GL Posting Override' is enabled.
Project Code	Enter a project for allowances (positive and negative). This project will be used if 'GL Posting Override' is enabled, and no project is assigned to the allowance. For once-off timesheet entries, if you enter a project here and the field 'GL Posting Override' is enabled, this will overwrite the employee's home project. For deductions, this project will be used regardless of whether the 'GL Posting Override' is enabled.
Expense Code	Enter an Expense for allowances (positive and negative). This Expense will be used if 'GL Posting Override' is enabled, and no Expense is assigned to the allowance. For once-off timesheet entries, if you enter a project here and the field 'GL Posting Override' is enabled, then this expense code will be used regardless of whether there is an entry for this pay code on the General Ledger Matrix Screen. (Expense codes are not associated with an employee's appointment record). For deductions, this expense code will be used regardless of whether the 'GL Posting Override' is enabled. In the case of an employer pension P&L Item or an employer's NIC /PRSI P&L Item, these are normally posted to the expense code of the

Indicators	Description
	underlying timesheet/gross pay entries, but if the 'GL Posting Override' field is turned on, and the expense code is entered, then it will be used.
Calculate Employer Savings	Enable if employer NI/PRSI savings applies to this pay code in the case of salary sacrifice. If enabled Core will calculate the amount of employer NI/PRSI savings relating to the salary sacrifice and post it to the GL.
Do Not Include in Employer Costings	Enable for Allowance/Payment type pay codes where you do not a proportion of their cost centre, project code, and expense code used for costing ER NI/PRSI and ER pension. The default in Payroll is that the costing of ER NI/PRSI and ER pension is distributed proportionally over each employee pay combination.
Allocate over Employee Cost Allocation	Enable for once-off timesheet entry pay codes, to ensure a cost allocation applies for costing, where a cost allocation exists on the employee's contract.
Group Deduction by Employee Reference	Enable if this balance sheet pay code is to group by employee reference. GL file will split the balance sheet liability (deduction or nett pay) by employee.
Post to Employee Cost Centre	Enable if this balance sheet pay code is to follow the employee's cost centre. The GL file posts the balance sheet liability (deduction or nett pay) to the employee's cost centre.

3.4.4. Save the New Pay Code

Once your *Pay Code Formula*, *Pay Code Rules*, and *General Ledger* rules are defined, you can now save the new pay code.

1. Click **Save**.

The new pay code now appears in the *Pay Code Library*.

3.5. How to Edit an Existing Pay Code

To edit an existing pay code:

1. Go to *Payroll Dashboard > Settings > Pay Code*.
2. Search for the Pay Code you want to edit.
3. Click the relevant 3 dot menu.
4. Click **Edit**.

The *Pay Code Wizard* screen opens containing three options.

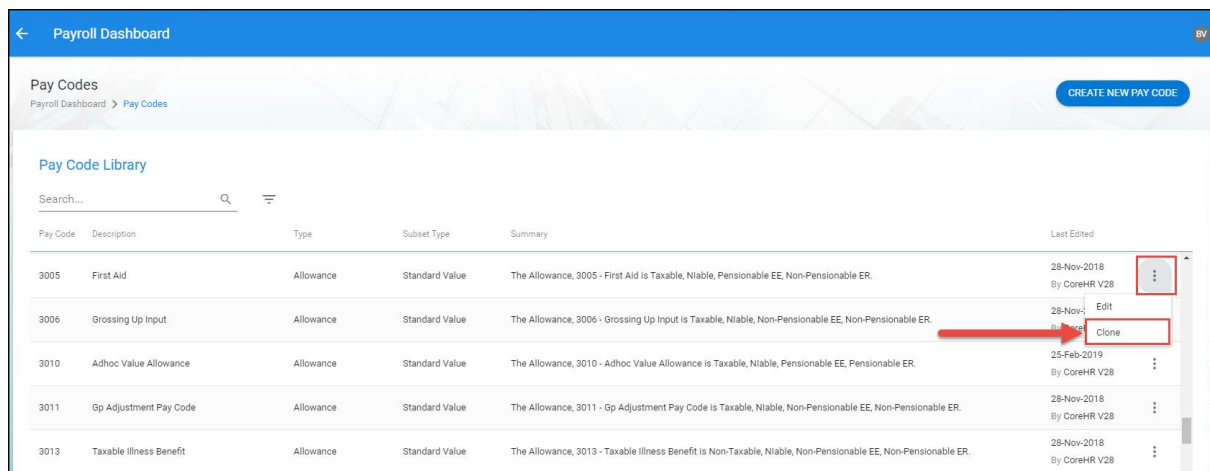

5. Edit the Pay Code Formulas, Rules, and General Ledger indicators as required. For further information on the options are available, see section [3.4. How to Create New Pay Codes](#).

3.6. How to Clone an Existing Pay Code

When creating new pay codes, it is best practise to clone an existing pay code with similar elements.

To clone an existing pay code:

1. Go to *Payroll Dashboard > Settings > Pay Code*.
2. Search for the Pay Code you want to clone.
3. Click the relevant 3 dot menu.
4. Click **Clone**

5. Enter a new **Pay Code Number**.
6. Enter a new **Pay Code Description**.

The 'Copy Pay Code' dialog box is shown. It has a title 'Copy Pay Code' and a subtitle 'Create a new Paycode based on 3005 - First Aid'. There are two main input fields: 'New Pay Code *' which is populated with '3007' and has a note 'Populated with suggested pay code', and 'Pay Code Description *' which contains 'University Pay Code - Clone' and a placeholder 'Please enter pay code description.'. At the bottom, there are 'CANCEL' and 'OK' buttons. A red arrow points to the 'OK' button.

7. Click **OK**.

A message appears "Pay Code Successfully Cloned."

You can now edit the cloned pay code, see section [3.5. How to Edit an Existing Pay Code](#).

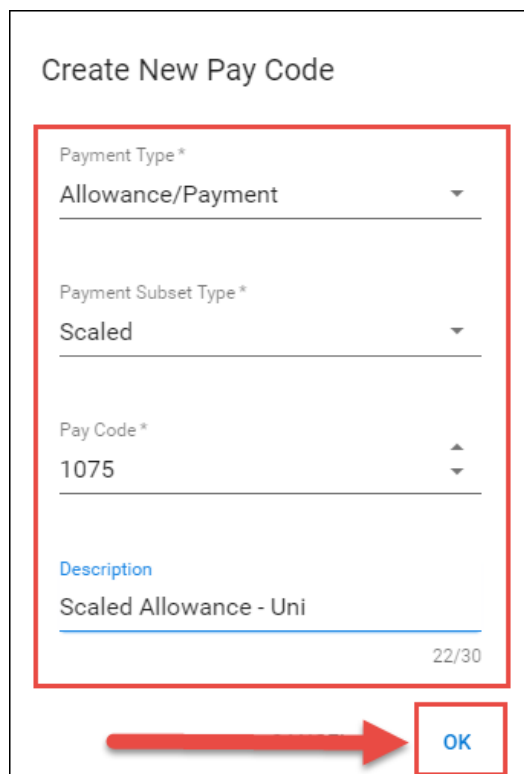

3.7. Scaled Pay Codes

Allowance and deduction pay codes with a *Subset Type* of *Scaled* allows you to add scale points to a pay code.

3.7.1. Scaled Allowance Pay Codes

To create a new Scaled Allowance pay code:

1. Go to *Payroll Dashboard > Settings > Pay Code*.
2. Click the **Create New Pay Code**.
3. Select the *Payment Type*, **Allowance**.
4. Select the *Subset Type*, **Scaled**.
5. Enter a **Pay Code Number** and **Pay Code Description**.

The screenshot shows the 'Create New Pay Code' form. A red rectangular box highlights the following fields: 'Payment Type*' with the value 'Allowance/Payment', 'Payment Subset Type*' with the value 'Scaled', 'Pay Code*' with the value '1075', and 'Description' with the value 'Scaled Allowance - Uni'. Below the description field, the text '22/30' is visible. A red arrow points from the bottom of the red box to the 'OK' button, which is also highlighted with a red box.

6. Click **OK**.

7. Select the Pay Codes on which the calculation is based.

The screenshot shows the 'Pay Code Wizard' interface. On the left, a sidebar contains three steps: '1 Pay Code Formula', '2 Rules', and '3 General Ledger'. A red arrow points to the 'Pay Codes' section within the 'General Ledger' step. The main area is titled 'Details' and shows the 'Pay Code' as '7014' with the description 'Scaled Deduction - Uni'. Below this, a list of pay codes is displayed, including '1000 - Salary', '1002 - Salary Arrears', '1003 - Occupational Salary Offset', '1004 - Additional Salary Arrears', '1005 - Basic Hours', '1006 - Basic Hours Arrears', '1007 - Holiday Pay (17.00%)', '1008 - Holiday Pay Value', and '1009 - Holiday Pay Hours'. The '1000 - Salary' option is selected. To the right of the list, there are fields for 'Hours / Days / Units / Value', 'Value Limit', and 'Multiplier'. The 'Value' field is set to 'Value', 'Value Limit' is set to '1', and 'Multiplier' is set to '-1'. A summary text states: 'The sum of the following Pay Codes: Salary (1000) fall between on the grid below, multiplied by multiplier -1.' Below this, there is a table with columns for 'Monthly Limit', 'Weekly Rate', and 'Monthly Rate'. An 'ADD' button is located at the bottom right of the table. A 'NEXT' button is at the bottom right of the entire wizard.

8. Click **Add** to add deduction scale points.

The screenshot shows the 'Add Scale Point' dialog box. It has a title bar 'Add Scale Point'. Inside, there are four input fields with labels: 'Weekly Limit *', 'Monthly Limit *', 'Weekly Rate *', and 'Monthly Rate *'. Each field has a small up/down arrow icon to its right. At the bottom of the dialog, there are two buttons: 'CANCEL' and 'OK'.

The following options are available when adding scale points to the deduction:

Options	Description
Weekly Limit (Mandatory)	Enter a Weekly Limit.
Monthly Limit (Mandatory)	Enter a Monthly Limit.
Weekly Rate (Mandatory)	Enter a Weekly Rate.
Monthly Rate (Mandatory)	Enter a Monthly Rate.

9. Enter details of the first scale point.
10. Click **OK**.
11. Repeat the above steps until all of the scale points are entered.

3.8. Court Order Pay Code

To create a new *Court Order* pay code:

1. Go to *Payroll Dashboard > Settings > Pay Code*.
2. Select the **Create New Pay Code**.
3. Select the *Payment Type*, **Court Order**.
4. Enter a **Pay Code Number** and **Pay Code Description**.

5. Click **OK**.

The *Pay Code Wizard* screen opens.

Note:

Option 2 in the *Pay Code Wizard* is now **Payment Orders**.

6. Click **Payment Order**.

The following options are available when setting up a Court Order.

Options	Description
Admin Charge	Enter the administration charge if an administration charge applies, e.g. £1.
Admin Code and Description	Select the pay code to which the admin charge is to be posted.
Nett Earnings	Enable if this AEO/Court Order/Council Tax is based on a set of scales applicable to the employee's net earnings. If enabled, then the add button becomes available for recording the Net Earning threshold details. (see below)
AEO Code	Enable if this is a deduction (Attachment of Earnings Order) AEO Code. Once enabled, a new field called Calc Codes will become available to allow you to enter the pay codes which qualify for this AEO calculation.
Scottish Arrestment Order	Enable if this pay code is a Scottish Arrestment Order.
Protection of Earnings Type %	If this order is subject to a % of net earnings, select DEO where a fixed value deduction amount applies, otherwise select DEA where a percentage based on an Earnings Table applies.

Options	Description
Protection Earnings %	Enter the Protected Earnings percentage value.

To set up Nett Deduction Rates:

1. Enable the **Nett Earnings** toggle.
2. Click **Add**.

3. Enter the required details.
4. Click **OK**.
5. Repeat the above steps until all of the scale points are entered.
6. Save the Pay Code.

3.8.1. Attachment of Earnings Order (AEO) (Magistrates Court)

AEOs issued under the Courts Act 2003 ("the 2003 Act") by the magistrates' courts in England and Wales. They are deductible by fixed tables, in a similar way to Council Tax attachments currently deducted by employers.

Note:

The correct Nett Deduction Rates will need to be set up and maintained for this Pay Code.

3.8.2. Council Tax Attachment of Earnings (CTAEO)

Where there is non-payment of council tax, a magistrates' court may grant a liability order referred to as a Council Tax AEO (CTAEO).

**Note:**

The correct Nett Deduction Rates will need to be set up and maintained for this Pay Code.

The screenshot shows the 'Pay Code Wizard' interface. On the left, there is a sidebar with four steps: 1. Pay Code Formula, 2. Payment Orders (selected), 3. Rules, and 4. General Ledger. The main area is divided into two sections: 'Payment Orders' and 'Nett Deduction Rates'. The 'Payment Orders' section includes fields for 'Court / Voluntary', 'Admin Charge', 'Admin Code and Description', 'Nett Earnings' (with a toggle switch), 'AEO Code', 'Scottish Arrestment Order' (with a toggle switch), 'Protected Earnings Type %', and 'Protected Earnings %'. The 'Nett Deduction Rates' section features a table with columns: 'Nett Earnings Wee...', 'Nett Earnings Week ...', 'Lower Band Week', 'Nett Earnings Mont...', 'Nett Earnings Mont...', 'Lower Band Month', 'Percent Lower', 'Lower Value', 'Balance', and 'The Sum'. There are four rows of data in the table. An 'ADD' button is located at the bottom right of the table.

Nett Earnings Wee...	Nett Earnings Week ...	Lower Band Week	Nett Earnings Mont...	Nett Earnings Mont...	Lower Band Month	Percent Lower	Lower Value	Balance	The Sum
0	75	0	0	300	0	0	0	0

135	185	0	550	740	0	5	0	0	
185	225	0	740	900	0	7	0	0	

3.8.3. Deduction from Earnings Order (DEO) - Child Support

A DEO is a deduction of earnings order from the child support agency.

To set up a DEO pay code, you must do the following:

1. Enter the Protected Earnings Rules.

Rules	Description
Protected Earnings Type %	DEO
Protected Earnings %	Enter the % earnings as stated on the order, e.g. 60%.

2. Disable the **Nett Earnings** toggle.

- When enabled, this will calculate as Council Tax which will always exclude Non-Taxable Earnings

3.8.4. Direct Earnings Attachment (DEA)

DEA's are used to recover money owed to the Department for Work and Pensions (DWP). A DEA operates differently from other orders such as Deduction from Earnings Order (DEO), Attachment of Earnings Order (AEO), and Council Tax Attachment of Earnings Order (CTAEO).

There are two deduction percentage rates for calculation – Standard Rate and Higher Rate.

To set up a DEA pay code, you must do the following:

1. Enter the Protected Earnings Rules:

Rules	Description
Protected Earnings Type %	DEA
Protected Earnings %	Enter the % earnings as stated on the order, e.g. 60%.

2. Enter the Nett Deduction Rates:

- Enable the **Nett Earnings** toggle.
- Enter the **Nett Deductions Rates**.

Note:

The correct Nett Deduction Rates will need to be set up and maintained for this Pay Code.

c. **Save** the Pay Code.

Note:

When enabled, the *Nett Earnings* indicator will calculate as Council Tax which will always exclude Non-Taxable Earnings. The indicator will need to be disabled after the rates are saved.

- d. **Edit** the Pay Code and click step 2 **Payment Orders**.
 - e. Disable the **Nett Earnings** toggle.
 - f. **Save** the Pay Code.
3. Exclude Pay Codes from the calculation:
- a. Go to *Settings > General*.
 - b. Click **Other** at the bottom of the page.
 - c. Select **DEA Pay Code Exclusions** from the drop-down menu.

- d. Enable the **Exclude from Nett Earnings** toggle to exclude pay codes from the calculation.

1011	Part Time Lecturer	☐

3.8.5. Earnings Arrestment (EA) (Scotland)

An earnings arrestment is a type of diligence that orders an employer to make regular deductions from an employee's earnings to pay a debt. When served, the employer must make deductions from the debtor's earnings and forward the amount of those deductions to the creditor.

Note:

To support the calculation for Scottish Arrestment Orders for different pay freqs. a Pay Code should be set up for each frequency required e.g. one monthly Pay Code, one weekly Pay Code.

Note:

The correct Nett Deduction Rates will need to be set up and maintained for this Pay Code.

3.8.6. Reducing Balance Court Orders

Attachment of Earnings Order (County Court)

Civil Judgment. AEOs issued under the "1971 Act" allows a court to order you, or your company, to make deductions from the earnings of an employee to recover unpaid civil judgment debts.

Attachment of Earnings (Northern Ireland)

A court to order the judgment to make deductions from the judgment debtor's earnings. If the court makes an order, the employer has to make deductions, at weekly or monthly intervals (or whenever they are paid).

- Apply the Protected Earnings Rules.

Rules	Description
Protected Earnings Type %	DEA
Protected Earnings %	Enter the % earnings as stated on the order, e.g. 60%.

- Enable the Reducing Balance rule.

The screenshot shows the 'Pay Code Wizard' interface with the 'Rules' step selected. The 'Reducing Balance' rule is highlighted with a red box. The rule details are as follows:

Rule	Description	Value	Action
Reducing Balance	Toggle on if this is a reducing balance Pay Code	On	EDIT
Calculation Priority	Enter the calculation Priority in order of importance e.g. 1,2,3 for each allowance	1	EDIT
Taxable	Enter Taxable, Non-Taxable, Pre-Tax or Income Continuance	Non-Taxable	EDIT
Niable	Enter Niable (Y), Non-Niable (N), Non-Niable EE / Niable ER (S) or Niable EE / Non Niable ER (R)	Non-Niable	EDIT

3.9. Third Party Returns

The following rules can be updated for Third Party Returns:

Rules	Description	Default
Third Party Returns	Select from the drop-down menu, select a value of "Yes", "No", "Weekly", "Monthly", "Quarterly" or "Annually" if the deduction is to be paid to a third party via EFT on a weekly, monthly, quarterly or annual basis.	No
Account Number	Enter the account number of the bank account of the third party provider.	Null
Sort Code	Enter the sort code of the bank account of the third party provider.	Null
BIC	Enter the BIC of the bank account of the third party provider. *Will only be available for Irish Third Party Providers.	Null
IBAN	Enter the IBAN of the bank account of the third party provider. *Will only be available for Irish Third Party Providers.	Null
Reference	Enter the applicable Reference to appear on the Bank file when paying over this Deduction. This is the reference that will appear on the third party bank account's statement.	Null

3.10. Student Loan

The following rules can be updated for Student Loan pay codes:

Rules	Description	Default
Student Loan Indicator	Enable if this deduction represents loan repayments for student loans.	Off
Student Loan Weekly Threshold	Enter Student Loan Weekly Threshold.	Null
Student Loan Monthly Threshold	Enter Student Loan Monthly Threshold.	Null
Student Loan Excess Earnings	Enter Student Loan Excess Earnings.	Null
Postgrad Loan		
Postgrad Loan Indicator	Enable if this is a post grad Loan.	Off
Postgrad Loan Weekly Threshold	Enter post grad Loan Weekly Threshold.	Null
Postgrad Loan Monthly Threshold	Enter the post grad Loan Monthly Threshold.	Null
Postgrad Loan Excess Earnings	Enter post grad Loan Excess Earnings.	Null

3.11. Absence Pay Codes

3.11.1. Recording Absence Pay Code

Create a pay code for each type of occupational absence to be handled by the Occupational Absence module, i.e. each type of absence for which a company policy exists, such as:

- Sick
- Maternity
- Adoption
- Paternity

These pay codes can be broken down as required by your organisation. For instance, if certified sick leave and uncertified sick leave are treated separately, then two sick leave pay codes can be set-up rather than one.

Rules	Description
Hours/Days/Units/Value	Select either Hours or Days, depending on the method used to record absences.
Multiplier	Set absence management recording pay codes to a Multiplier of 0.
Analysis Code	Select the 'Absence Management' analysis code. If required, another analysis code may be used, but it must be set-up with Analysis Type 'GP'.
General Absence Type	Associate the pay code with the general absence type, e.g. Sick. This links the WFM recording pay code to the Payroll pay code which pays the absence.
SSP (UK Only)	Switch On, if this WFM recording absence pay code is used for recording sick pay.

3.11.2. Paying Absence Pay Code

Set up a payment absence pay code for each absence type defined in your environment.

Rules	Description
Hours/Days/Units/Value	Select Value.
Multiplier	Set absence paying pay codes to a Multiplier of 1.
Analysis Code	Select the 'Absence Management' analysis code. If required, another analysis code may be used, but it must be set-up with Analysis Type 'GP'.

3.11.3. Salary Offset Pay Code

For any employee receiving a salary or basic pay, and also occupational absence pay, the system generates a salary offset to negate the salary paid for absence days.

This ensures the employee is not overpaid when absent. The amount offset is posted to the salary offset pay code.

Rules	Description
Hours/Days/Units/Value	Select Value.
Multiplier	Set salary offset pay code to a Multiplier of 1.

Rules	Description
Analysis Code	Select a 'basic pay' analysis code. If required, another analysis code may be used, but it must be set-up with Analysis Type 'GP'.

3.11.4. Public Holiday Pay Code (Optional)

The Public Holiday pay code may be used to pay absences which occur on public holidays.

The payment rate for sickness on a public holiday may differ from the payment rate for an absence on a day which is not a public holiday. For example, if an employee is sick from the 1st of Jan (public holiday) to the 10th of Jan, the employee could get paid:

- 1 day @ Public Holiday pay code.
- 9 days @ Sick pay code.

Rules	Description
Hours/Days/Units/Value	Select Value.
Multiplier	Set public holiday pay code to a Multiplier of 1.
Analysis Code	Select a 'basic pay' analysis code. If required, another analysis code may be used, but it must be set-up with Analysis Type 'GP'.

3.11.5. Qualify Allowance Pay Code

A qualifying allowance pay code is included when determining a person's daily/hourly rate of pay.

Rules	Description
Qualifying Basic Pay Code	• Enable if this pay code is to be reckonable for the occupational basic rate calculation. • This indicator is not applicable to the period daily rate calculation.

3.11.6. Statutory Offset Pay Codes (UK Only)

When an employee receives occupational absence pay, the employee's statutory pay needs to offset, to prevent the employee from being overpaid.

Rules	Description
Hours/Days/Units/Value	Select Value.
Multiplier	Set statutory offset pay code to a Multiplier of 1.
Analysis Code	Select a 'statutory pay' analysis code. If required, another analysis code may be used, but it must be set-up with Analysis Type 'GP'.

3.12. Illness and Maternity Benefit – Irish Only

3.12.1. Where the Employee Keeps the Benefit Payment

Payroll deducts the amount from the employees pay on the basis that he/she is receiving full pay and retaining the Social Welfare cheque.

Set up a Negative Allowance Pay Code:

Rules	Description
Hours/Days/Units/Value	Select Value.
Multiplier	Multiplier of -1.
Taxable	Taxable
PRSIable	PRSIable
USCable	USCable
ASCable (Public Sector Only)	ASCable

Note:

The pay code can be linked to an analysis code which has a 'NT' analysis type. This is for illustrative purposes only.

3.12.2. Where the Employer Receives the Illness Benefit

A dual entry timesheet is required to ensure the employee is treated correctly for Tax, PRSI, USC and ASC and the employee's pay is offset back by the amount of illness benefit.

Set up a Negative Allowance Pay Code:

Rules	Description
Hours/Days/Units/Value	Select Value.
Multiplier	Multiplier of -1.
Taxable	Taxable
PRSIable	PRSIable
USCable	USCable
ASCable (Public Sector Only)	ASCable

 Note:

The pay code can be linked to an analysis code which has a 'NT' analysis type. This is for illustrative purposes only.

Second Pay Code

Set up an Allowance Pay Code:

Rules	Description
Hours/Days/Units/Value	Select Value.
Multiplier	Multiplier of 1.
Taxable	Non-Taxable
PRSIable	Non-PRSIable
USCable	Non-USCable
ASCable (Public Sector Only)	Non ASCable

 Note:

The pay code can be linked to an analysis code which has a 'NT' analysis type. This is for illustrative purposes only.

4. Pay Code Rules Appendix

4.1. Standard Allowance Rules

Rules	Description	Default
Taxable	Does the pay code represent income on which the employee must pay tax? Select Taxable, Non-Taxable, Pre-Tax or Income Continuance pay code. Income Continuance applies to pay codes that are eligible for tax relief. For example, voluntary deductions for a registered charity.	Taxable
PRSIable/NIable	Indicate whether the pay code will impact employee or employer NI/PRSI calculations. Like the taxable indicator, select one of the following: • PRSIable/NIable • Non- PRSIable/Non-NIable • Non-PRSI EE and PRSIable ER/ Non-NIable EE and NIable ER • PRSI EE and Non-PRSIable ER/NIable EE and Non-NIable ER	PRSIable/NIable
Pensionable for Employee	Select Pensionable EE or Non-Pensionable EE. Select Pensionable EE if this pay code counts towards an employee's pensionable pay for any pension scheme. Where a pay code does not count towards the calculation for a specific pension scheme but has been marked as pensionable, it can be "excluded" at the pension scheme level when setting up the pension scheme. Similarly, if set to Non-Pensionable EE, the pay code can count towards an employee's pensionable pay if it is listed as "included" at the pension scheme level.	On

Rules	Description	Default
Pensionable for Employer	Select Pensionable ER or Non-Pensionable ER. (Same as above)	Off
USCable (Irish only)	Select USCable or Non-USCable. Select if the USC is to be calculated based on this pay code.	On
ASCable (Irish only)	Select ASCable or Non-ASCable. Select if the ASC is to be calculated based on this pay code.	On
Minimum Living Wage Check	Enable if this pay code is to be included in the minimum/living wage check. This is to only be used for allowances or salary sacrifice pay codes.	On
Calculation Priority	Enter the calculation priority in the order of importance, e.g. 1, 2 or 3 for each allowance.	1
Maximum Value	Enter the Maximum Value allowed on any one timesheet entry for this pay code.	9999999.99
Minimum Value	Enter the Minimum Value allowed on any one timesheet entry for this pay code.	-9999999.99
Disable for Allowance Screen	Enable if this pay code is NOT to be used to enter an Allowance in the Employee Allowance screen.	Off
Disable for Timesheets	Enable for any pay code which cannot be entered via a timesheet into the system. For example, the Employer NI pay code.	Off
Retrospection Pay Code & Description	For payments, each pay code is to have its own unique retrospection VALUE pay code. Enter a pay code which represents the back-pay pay code associated with the pay code being created. Every pay code of type "value" and "allowance" must have its own unique Retrospection value pay code assigned against it. A retrospection pay code is simply another value allowance pay code.	Null

Rules	Description	Default
Social Welfare	This applies to ROI payrolls only. This is relevant to the Payroll <i>AUTO Social Welfare Module</i> , which calculates an employee's Social Welfare deduction based on daily absences recorded in WFM or Payroll. If you are using the Payroll <i>Auto Social Welfare Deduction</i> module, then you must use this field to identify pay codes which are Sickness related. These pay codes trigger the calculation of the Social Welfare Deduction for an employee.	Off
General Absence Type	This is linked to the <i>Social Welfare Module (ROI)</i> and the <i>Payroll Occupational Absence Pay Modules</i> . For <i>Social Welfare (ROI)</i> , each pay code must be linked to a <i>General Absence Type</i> for reporting purposes. <i>General Absence Types</i> do not affect the calculation of <i>Social Welfare (ROI)</i> but establish the link for reporting purposes. For the <i>Payroll Occupational Module</i> , you must link each absence pay code to a <i>General Absence Type</i> . This determines how the <i>Occupational Absence</i> is paid, i.e. they form part of the <i>Occupational Absence Rule</i> .	Null
SSP (UK only)	Enable if this is an Absence pay code in WFM which integrates with the Payroll SSP calculation.	Off
SSP Absence Type (UK only)	This field is only populated if the preceding 'SSP' field is enabled. Enter an appropriate SSP Absence Type for grouping and analysing SSP Payments.	Null
Qualifying Basic Pay Code	Enable if this pay code is an allowance pay code paid to an employee which can be used for Occupational Basic Rate Calculation.	Off
Rate Sequence Number	Enter 1 unless paying timesheets at alternative rates to an employee standard.	Field

Rules	Description	Default
Overtime Indicator	Enable if paying Composite Overtime and this pay code is a Composite Overtime Payment. Composite Overtime in Payroll is overtime, which is based not just on basic pay, but also other pay elements.	Off
Overtime Element	Enable only if paying Composite Overtime and this pay code is a Composite Overtime payment element.	Null
Holiday Periods Type	Select the holiday indicator, which allows this pay code to enter holiday periods on an employee's timesheet.	Null
Holiday Pay	Enable if the pay code qualifies as an element in the calculation of holiday pay as per the generate holiday pay module.	Off

4.2. Other Allowance Rules

Rules	Description
Reducing Balance	Enable if this is a reducing balance pay code.
Pro-Rata Indicator	Enable if this pay code is a permanent/recurring Allowance payment which is to be pro-rated by the employee's contract hours. For example, if an employee's contract hours are 39, but they have only worked 20 hours, then the employee will get paid 20/39 of the value of this allowance.
Pro-Rata Element	• Enable if this payment is an hourly / daily pay code qualifying for the pro-rata indicator calculation, i.e. the hours for this pay code qualify for making up the 20 hours in the example above. • This field is only to be enabled if the pay code is Hours or Days.
Pro-Rata Calculation	Enable if the pro-rata calculation on this allowance is to be based on the number of days the allowance is being paid for. Otherwise, the calculation is based on the number of days in the period.
Acting Up	Enable to pay the difference between an "Acting Up" grade and point and the employee's normal grade and point. This applies to both reoccurring

Rules	Description
	allowances and once-off timesheet entries. When recording timesheets for this type of pay code, you enter a position/point on the timesheets screen. Instead of it acting as an override, the employee will get paid the difference between the position/point entered and their normal position/point.
Additional Salary	Enable if this is the pay code for Additional Salaries, i.e. for employees who have more than one contract.
Ad Hoc Update	Enable if this payment is used in the Core ADHOC/Global Rate Increase module.
Location Specific	Enable if this is a location-specific allowance code.
Exclude for Council Tax	Enable if this pay code is to be excluded from the calculation of council tax. For example, this may be selected for Statutory Maternity Pay.
Position Specific	Enable if this is a position-specific allowance pay code.
Pension Related Transaction Check	Enable on if this pay code is to be excluded from the Pension Related Deduction calculation if the transaction date is prior to 01-MAR-2009.
Share-Based Remuneration	Enable if this pay code is to be used for share-based remuneration for an employee's current company.
Taxable Benefit	Enable if this pay code is to be used for Taxable Benefits.
Previous Year Recoupment	Enable if this pay code is to be used in the previous tax year recoupment only, otherwise leave blank.
PRSI/NI Class	Enter the PRSI/NI class if it is always associated with this pay code.
Grossing Up Method	Select the appropriate option from the drop-down menu. • Normal Nett: Employee is guaranteed a nett amount. • BIK: The employer covers the cost of the BIK for any employee by paying them an extra Gross Adjustment.

Rules	Description
	• Social Welfare: Where an employee is in receipt of Social Welfare (Sickness or Maternity) Payroll will create a minus Gross Adjustment to ensure the employee is not financially better off. • ER NIC No Impact: Enable for the Grossing up calculation to have no impact on ER NIC.
Gross Adjustment Code	available if the label "Spread Gross Adjustment over Multiple Pay Codes" is in the system configuration screen. Enter an appropriate value, allowance, non-allowance to which calculated gross adjustment will be posted. This allows you to link a pay code to a corresponding <i>Gross Adjustment Code</i>, which allows the gross adjustment to be reported/analysed separately for posting to your FMS. Equally, the Gross Adjustment can be spread over the range of cost centres, project codes, and expense codes on the timesheet entries.
Print Rate	Select the appropriate option which dictates the rate that is displayed on the employee payslip in the case that the pay code is not marked as a value pay code. • Flat Rate (Value Earned/Hours Worked * Pay Multiplier) • Base Hourly (This is the hourly rate as derived from the rate of pay assigned to the employee record. If an employee is on an annual salary, the hourly rate is derived as follows: (e.g. annual salary / days in year * days in week / hours = employee's hourly rate). • Basic Rate: (Base Hourly * Pay Code Multiplier) • Multiplier Rate (Value Earned/Hours Worked)
Rounding Method	The value of this field determines how the allowance will be rounded. • None: No Rounding • Round up: to the nearest whole unit. • Round down: to the nearest whole unit. • Round Annual Scaled Allowance: Where scaled rates apply.
Salary Sacrifice	Enable for salary sacrifice pay codes.

Rules	Description
Pay in Full	Enable if this Payment is to be paid in FULL, regardless of the employees Pay Multipliers. For example, if a job sharer (FTE of 0.5) is entitled to the full value of the uniform allowance rather than 50% of it.
Illness Benefit	Enable if Illness Benefit.
Payslip Code Override	Override payslip pay code value displayed on the pay code.
Payslip Description Override	Override payslip pay code description displayed on the pay code.
USC Adjustment	Enable if this Payment is an USCable Adjustment.
Labour Cost Group	Enter a valid Labour Cost Group if you want to group payments using this field.
Holiday Period Types	Enter an appropriate Holiday Indicator which allows this code to enter Holiday Periods on an Employees Timesheet.
Allowance Cumulative Grouping Description	Enter a description if this Pay Code needs to be output as a Tax year Cumulative value
FPP Ind.	Enable if this is an FPP Pay Ind. And to be included as per the Haddington Road agreement.
GSS Pay Element	Enable if a GSS (Government Shared Services) Pay Element
PSPRable	Enable on if this Pay Code is to be used in the PSPR Calculation.

4.3. CSO Allowance

Rules	Description
CSO Payment Type	Select the payment type from the drop-down menu, required for CSO Returns.
CSO BIK Type	Select the BIK type from the drop-down menu, required for CSO Returns.
CSO Hours Multiplier	Enter the value associated with one hours work, only applies to value pay codes.
CSO Units Multiplier	Enter the value associated with one units work, only applies to unit pay codes.
CSO Absence	Enable if this pay code is defined as a CSO absence, i.e. paid leave.
CSO Hours Value	Enable for CSO hour values. Only applies to value pay codes.
CSO Exclude Hours	Enable to exclude these hours from your CSO return.
CSO NES Exclude	Enable if this pay code is to be excluded from the gross pay on your CSO NES return.
Basic Pay	Enable for basic pay.

4.4. Client Specific Allowances

Rules	Description
Analysis	Select a valid Agresso Analysis Code or choose one from the list of values.
Absence Code	Select a valid Absence Code or select from the drop-down menu.
Special Leave Pay Code	Select a valid Absence Code or select from the drop-down menu.
OT Premium Pay Code	Select the overtime premium Pay Code for this Pay Code.
Project Expense	Select a valid project expense or choose one from the drop-down menu.
Location	Select a valid location.
Subhead	Select a valid Subhead value or choose one from the drop-down menu.
Classification	Select the appropriate Classification or leave blank.

Rules	Description
HRA Value Code	For all Scaled Allowance pay codes which will be ended by the Haddington Road Agreement, enter the corresponding VALUE pay code for the new reduced allowance.
Ledger Posting	Enable if the pay code is to be included in the SAP PD extract file.
Accrual Type	Select an Accrual Type or leave blank.
Average Holiday Entitlement	Select a value for average holiday entitlement.
Assignment Code	Select the Assignment Code.
Reducing Balance Code	Select the Reducing Balance Code for SLWP.
PRP Reduction Code	Select the pay code to be used for PRP Reduction.
PRP Payment Code	Select the pay code to be used for PRP Payment.
Fixed Value	Enter a Fixed Value amount for child allowance.
Allowance Cumulative Grouping Desc	Enter a description if this pay code needs to be output as a tax year cumulative value.
Overtime Hourly Payment	Enable if this pay code is an Overtime Hourly Payment used in the calculation of Shift Overtime Payments.
Part-Time OAP Element Indicator	Enable to identify as an element to be used in the calculation of Part-Time OAP pay multiplier.
Clinical APA	To identify payments that are Clinical APA. Pay code can have a scalable allowance multiplier when setting an allowance in HR.
Sundry Indicator	Enter a value for Sundry Indicator, valid values A-Z or leave blank.
Age Limit	Select the Age Limit for the allowance.
Allowance Group Ind.	Select the Allowance Group for this pay code
Claim Frequency	Select monthly, quarterly or leave blank for Garda Allowance.
House Loan Interest Code	Select the House Loan Interest pay code.
Mutually Exclusive	Select a mutually exclusive pay code.
Forecasting Field	Select the Field Number for forecasting interface.
Service Pension	Select Yes or leave blank
Disability/Annuity	Select Annuity, Disability or leave blank.

Rules	Description
Recoups Eligible	Select if the pay code is recoupable.
Pay Code Instances	Enable it to be included in pay code instances on paper payslip and the Gross Pay statement.
Shift Allowance	Enable if this pay code is a Shift Allowance used in the calculation of shift overtime payments.
Shift Allowance Payment Pay Code	Select the pay code that will be used for the payment of Shift Overtime.
Taxable Redundancy	Enable if this Pay Code is to be included in an employee's cumulative Taxable Redundancy.
Backdate PRDable Pay Code	Enable if PRD rates are to be applied at PRD rates of relevant year where the transaction is a previous PRD year.
Foregoing Revenue Limit	Enable if this Pay Code is to be included for the foregoing revenue limit.
Proportion Allowance	Enable if this is an allowance Pay Code.
Client Specific Ind.	Enable if client specific level 2 Pay Code.
Offset Days	Enable to record offset days.
Basic Percent	Enable on if Basic Percent Allowance.
Substitution Ind.	Enable if Allowance qualifies for substitution.
SSS Pension Scheme	Enter a Pension Scheme to be used for outputting the calculated Salary Sacrifice Saving.
Project Ledger Posting	Enable if the Pay Code is to be included in the SAP PD extract file.
Union Code	Enable if this is a Union Membership Pay Code.
Environment Allowance	Enable if this is an Environment Allowance.
Qualification Allowance	Enable if this is a Qualification Allowance.
Term Time Process	Enable if Term Time is to be used in Pay Code calculation.
Acc. S.W. Entitlement and Not Ded	Enable if this is to be counted as part of the employee entitlement but not to be deducted from the employee's sick pay.
Batch Allocate	Enable on to indicate that Timesheets are to be allocated on Cost Allocations.
TVI Code	Enable if this is a TVI Pay Code.

Rules	Description
Premium Payment	Enable if a Pay Element is to be valued at the high rate of pay.
FPP Ind.	Enable if this is an FPP Pay Ind. and is to be included as per the Haddington Road agreement.
Special Daily Rate	Enable if this Pay Code is to be included as a special rate allowance.
Exclude Estimates	Enable to exclude from estimates.
Children Allowance	Enable on for Children Allowance.
APTH Indicator	Enable if this is an APTH Allowance Pay Code.
Sick Pay	Enable if this is a sick pay Pay Code.
Accrual	Enable if this is an Accrual Pay Code.
Disallowed Code	Enable if this Pay Code relates to disallowed days.
Hide Payslip Hours	Enable if hours are to be hidden on Pay Code.
Exclusion Ind. (Pro Rata)	Enable to exclude from pro-rata update.
Higher Duty	Enable if Higher Duty Pay Code.
Overtime Hours	Enable if overtime hours used to determine the overtime rate.
PPF Indicator	Enable if allowance is to be paid in lump sum percentage increase.
Net Hours	Enable if net hours indicator.
Transferable	Enable if a transferable pay code.
GSS Pay Element	Enable if a GSS (Government Shared Services) Pay Element.
Bonus Pay Element	Enable if a Bonus Pay element.
House Loan	Enable if House Loan indicator.
Home Posting	Enable if the cost centre on the pay code is to be output to payroll history.
Exclude from AWE Calculation	Enable to exclude from Average Weekly Earnings in the Occupational Absence calculation.
Shift Allowance	Enable if this pay code is a Shift Allowance used in the calculation of shift overtime payments.
Special Rate	Enable if this pay code is to be included as a special rate allowance.
Group Pay Code	Enable to Group Pay Code.
Backdate PRDable Pay Code	Enable if PRD rates are to be applied at PRD rates of relevant year where a transaction is a previous PRD year.

4.5. P11D Allowances

Rules	Description
P11D Section	To compile P11D benefit/expense details from Payroll, map the P11D section on the relevant pay codes. See the P11 Configuration and user guide for further information.
Amount Made Good	Enable on if the "Amount Made Good" applies to this pay code for the purpose of P11D Expenses and Benefits.
Inland Revenue Paypath Ind.	Select if included on the ALBACS revenue file.
Recovery Percentage	Enter a % which is applied to the pay code to calculate the value for the ALBACS Revenue File. If not entered default is 100%.

4.6. Standard Deductions Rules

Rules	Description	Default
Taxable	Is this deduction to be taken from the employee's gross pay before tax? Select Taxable, Non-Taxable, Pre-Taxable or Income Continuance pay code. Pensions are typically Pre-Taxable. Income Continuance deductions can be used to set up salary sacrifices.	Non-Taxable
PRSIable/NIable	Select one of the following: • PRSIable/NIable • Non- PRSIable/Non-NIable • Non-PRSI EE and PRSIable ER/ Non-NIable EE and NIable ER • PRSI EE and Non-PRSIable ER/NIable EE and Non-NIable ER.	Non-PRSIable/ Non-NIable
Pensionable for Employee	Select Pensionable EE or Non-Pensionable EE.	Off

Rules	Description	Default
Pensionable for Employer	Select Pensionable ER or Non-Pensionable ER.	Off
Calculation Priority	Enter the calculation priority in the order of importance, e.g. 1, 2 or 3 for each allowance.	1
Maximum Value	Enter the Maximum Value allowed on any one timesheet entry for this pay code.	9999999.99
Minimum Value	Enter the Minimum Value allowed on any one timesheet entry for this pay code.	-9999999.99
Disable for Timesheets	Enable to allow timesheet entries.	Off
Disable for Allowance Screen	Enable if this pay code is NOT to be used to enter an Allowance in the Employee Allowance screen.	Off
Disable for Timesheets	Enable if this pay code is NOT to be used for Timesheets.	Off
Retrospection Pay Code & Description	For payments, each pay code can have its own unique retrospection VALUE pay code.	Null

4.7. Benefit in Kind

Rules	Description	Default
Taxable	Select Taxable, Non-Taxable, Pre-Tax or Income Continuance Pay Code.	Taxable
PRSIable/NIable	Select one of the following: • PRSIable/NIable • Non- PRSIable/Non-NIable • Non-PRSI EE and PRSIable ER/ Non-NIable EE and NIable ER • PRSI EE and Non-PRSIable ER/NIable EE and Non-NIable ER.	PRSIable/ NIable
Pensionable for Employee	Select Pensionable EE or Non-Pensionable EE.	Off

Rules	Description	Default
Pensionable for Employer	Select Pensionable ER or Non-Pensionable ER.	Off
USCable (Irish only)	Select USCable or Non-USCable.	On
ASCable (Irish only)	Select ASCable or Non-ASCable.	On
Calculation Priority	Enter the calculation priority in the order of importance, e.g. 1, 2 or 3 for each allowance.	1
Maximum Value	Enter the Maximum Value allowed on any one timesheet entry for this pay code.	9999999.99
Minimum Value	Enter the Minimum Value allowed on any one timesheet entry for this pay code.	-9999999.99
Disable for Timesheets	Enable to allow timesheet entries.	Off
Disable for Allowance Screen	Enable if this pay code is NOT to be used to enter Allowances on the <i>Employee Allowance</i> screen.	Off

4.8. Deduction Court Order

Rules	Description	Default
Taxable	Select Taxable, Non-Taxable, Pre-Tax or Income Continuance Pay Code.	Non-Taxable
PRSIable/NIable	Select one of the following: PRSIable/NIable Non- PRSIable/Non-NIable Non-PRSI EE and PRSIable ER/ Non-NIable EE and NIable ER PRSI EE and Non-PRSIable ER/NIable EE and Non-NIable ER.	Non-PRSIable/Non-NIable
Pensionable for Employee	Select Pensionable EE or Non-Pensionable EE.	Off

Rules	Description	Default
Pensionable for Employer	Select Pensionable ER or Non-Pensionable ER.	Off
Calculation Priority	Enter the calculation priority in the order of importance, e.g. 1, 2 or 3 for each allowance.	1
Maximum Value	Enter the Maximum Value allowed on any one timesheet entry for this pay code.	9999999.99
Minimum Value	Enter the Minimum Value allowed on any one timesheet entry for this pay code.	-9999999.99
Disable for Timesheets	Enable to allow timesheet entries.	Off
Disable for Deductions Screen	Enable if this Pay Code is NOT to be used to enter Deductions on, i.e. on the Employee Deductions screen.	Off
Reducing Balance	Enable if this is a Reducing Balance pay code. A reducing balance deduction is used in the case where a total annual amount is specified to be paid for the specific deduction. The capital sum represents the total value to be deducted. The Balance due is automatically set to this value initially and will be decremented each payroll run until it reaches zero. The deduction will cease at this point.	Off
Loan Recovery	For Reducing Balance or Spreadable Deductions Toggle if the Outstanding Balance is taken in full when the employee is leaving.	Off

4.9. Deduction Voluntary Order

Rules	Description	Default
Taxable	Select Taxable, Non-Taxable, Pre-Tax or Income Continuance Pay Code.	Non-Taxable

Rules	Description	Default
PRSIable/NIable	Select one of the following: • PRSIable/NIable • Non- PRSIable/Non-NIable • Non-PRSI EE and PRSIable ER/ Non-NIable EE and NIable ER • PRSI EE and Non-PRSIable ER/NIable EE and Non-NIable ER.	Non-PRSIable/Non-NIable
Pensionable for Employee	Select Pensionable EE or Non-Pensionable EE.	Off
Pensionable for Employer	Select Pensionable ER or Non-Pensionable ER.	Off
Calculation Priority	Enter the calculation priority in the order of importance, e.g. 1, 2 or 3 for each allowance.	1
Maximum Value	Enter the Maximum Value allowed on any one timesheet entry for this pay code.	9999999.99
Minimum Value	Enter the Minimum Value allowed on any one timesheet entry for this pay code.	-9999999.99
Disable for Timesheets	Enable to allow timesheet entries.	Off
Disable for Deductions Screen	Enable if this Pay Code is NOT to be used to enter Deductions on, i.e. on the Employee Deductions screen.	Off
Retrospection Pay Code & Description	For payments, each pay code can have its own unique retrospection VALUE pay code.	Null
Reducing Balance	Enable if this is a Reducing Balance pay code. A reducing balance deduction is used in the case where a total annual amount is specified to be paid for the specific deduction. The capital sum represents the total value to be deducted. The Balance due is automatically set to this value initially and will be decremented each payroll run until it reaches zero. The deduction will cease at this point.	Off

Rules	Description	Default
Rounding Method	The value of this field determines how the allowance will be rounded. None: No Rounding Round up: to the nearest whole unit. Round down: to the nearest whole unit. Round Annual Scaled Allowance: Where scaled rates apply.	None

4.10. Other Deduction Rules

Rules	Description	Default
Scaled Rounding Method	This is only relevant if the deduction is a scaled deduction. Select one of the following values "None", "Round Up", "Round Down" from the drop-down list. This field determines whether the scaled deduction will be rounded up to the near pound/euro or rounded down to the nearest pound/euro. For example, the Student Loan pay code can be "Round Down".	Null
Loan Recovery	For Reducing Balance or Spreadable Deductions enable on if the Outstanding Balance is taken in full when the employee is leaving.	Off
OAP Adjustment Indicator	Enable if OAP applies to this pay code.	Off
Reducing Balance	Enable if this is a Reducing Balance pay code. A reducing balance deduction is used in the case where a total annual amount is specified to be paid for the specific deduction. The capital sum represents the total value to be deducted. The Balance due is automatically set to this value initially and will be decremented each payroll run until it reaches zero. The deduction will cease at this point.	Off

Rules	Description	Default
Spreadable Deduction	Select from the drop-down list, a value of "Calendar Year", "Tax Year" or "variable spread" to indicate the period over which the deduction is spread. Variable Spread: This would be assigned to deductions that are spread over a period which is not a calendar year or tax year (e.g. between two mid-year dates) A spreadable deduction takes an annual figure and divides it over the remaining number of periods in the deduction year (which can be either a calendar year or tax year). If a deduction period is missed, it recalculates the periodic amount by the remaining number of pay periods. This will ensure that the deduction is always paid by the end of the year.	Null
Accumulate Unpaid	Enable if this deduction is to accumulate all contributions not taken. If "YES" is selected from the drop-down menu, an attempt will be made to take the amount owed during the next payroll. This process will continue until enough money is available to take for the deduction. For example, this field can be selected for the LPT pay code.	No
Cumulative Deduction	Enable if this pay code is to be configured as a cumulative voluntary deduction, i.e. where the periodic contribution is derived as a standard value divided by the number of periods in the tax year.	Off
No. of Deduction Weeks	For fixed period deductions enter the number of weeks that the annual value (on the employee's deduction record) is to be divided by to establish the employee's periodic contribution. This is relevant for weekly, Fortnightly, and Four Weekly pay groups.	Null
No. of Deduction Months	For fixed period deductions enter the number of months that the annual value (on the employee's deduction record) is to be divided by to establish the employee's periodic contribution. This is relevant for Monthly and Bi-Monthly pay groups.	Null
Pro-Rata Deduction	Enable if the pay code is to be prorated or to have arrears calculated for cash values set up in arrears for monthly frequencies only.	Off

Rules	Description	Default
Instalment Deduction	Enable if this deduction is to be processed based on a number of deductions (instalments) entered. If a period is missed, the amount is NOT accumulated as unpaid.	Off
RTI Statutory Deduction	Enable if the pay code represents a statutory pay code which must be submitted to the HMRC as part of RTI.	
Student Loan	Enable if this deduction represents loan repayments for student loans.	Off
Postgrad Loan Thresholds	Enter the pay period Monthly or Weekly threshold exemption or Percentage (up to which student loan is not calculated) once earnings exceed the MAX postgrad loan scale ...	Off
Periodic Maximum	If the annual max field is populated, then you also have the option to turn on the Periodic Maximum option. If selected, the annual max is divided by the total number of pay periods for an employee in a year to provide the periodic maximum. During any payroll, the total value of this deduction for an employee cannot exceed this periodic maximum value. For example, if the annual max is 1200. The period maximum will be calculated to be $1200/12 = 100$, i.e. in one month, no more than 100 can be taken from the employee for this deduction.	Off
Annual Maximum	If applicable, enter a maximum amount that can be taken from an employee in a year for a deduction. For example, if set at 100 EUR, a deduction reduces an employee's salary until the deduction has reached a value of 100 EUR, at this point the deduction will not impact an employee for the remainder of the year.	Null
Timesheet Override	Enable to use the cost centre, project and expense code for Timesheets and Deductions.	Off
USC Adjustment	Enable if Pay Code has been used to adjust employees Universal Social Charge.	Off

4.11. Client Specific Deductions

Rules	Description	Default
Deduction Print Order	Select a Deduction Print Order, i.e. employee or reference.	Null
Start of Deduction Year	Enter the start of Deduction Year for this pay code.	Null
Deduction Scheme Number	Enter Deduction Scheme Number if applicable enter value from (1 to 9999).	Null
Superannuation Indicator	Enable on to identify Superannuation Code ...	Null
Payover Indicator	Enable on if a Payover pay code.	Null
Employee Cost Centre Posting for Deductions	Enable if the employee's cost centre for this pay code is to override the pay code level.	Null
Supplier ID	Enter the ledger supplier ID.	Null
Cumulative Grouping Description	Enter a description if this pay code needs to be output as a Tax year Cumulative value.	Null
Deduction Supplier Code	This field is only applicable to Agresso interfaces and is the Agresso Supplier field for Deduction.	Null
Recoupable Indicator	Enable this indicator if this pay code is utilised for the Recoups GL.	Null
Term Time Process	Enable if this Pay Code is used in the Term Time calculation.	Null
Location Code	Enter a valid location.	Null
