1. Overview

1.1. Purpose of the Guide

The Purpose of this document is to provide guidance on how to use the Payroll Filters functionality in Payroll.

Items covered include how to:

- Apply Payroll Filters
- Create a Payroll Filter
- Edit a Payroll Filter
- Delete a Payroll Filter

1.2. What is a Payroll Filter

Payroll Filters allow you to filter various screens based on certain criteria making it easier to input and review payroll data. These filters are fully configurable and allow for additional screen filtering without a change to a users security settings or pay group access. Multiple criteria can be applied to a Payroll Filter allowing them to be as granular as needed.

2. Payroll Filters

Payroll filters can be applied in the following ways:

- Default, a filter that is applied to the Manage Payroll screen and effects the input screens.
- Input Screen, a filter that is applied on the input screen.
- Employee tab, a filter that is applied to the Employee tab.

2.1. Apply a Default Filter

A Payroll Filter can be applied at a default level on the Payroll Dashboard. Applying the filter at this level will automatically apply the filter to the appropriate screens of the available pay groups. Once a filter is applied pay groups will only display employees where they meet the criteria of the filter. Filters applied at a default level will retain after a user moves away from the manage payroll screen or logs out. Filters are applied to the users view only and does not affect the view of other users.

Applying a default filter will automatically filter the following screens:

- Joiners
- Rejoiners
- Pay Changes
- Manage Payroll Employees

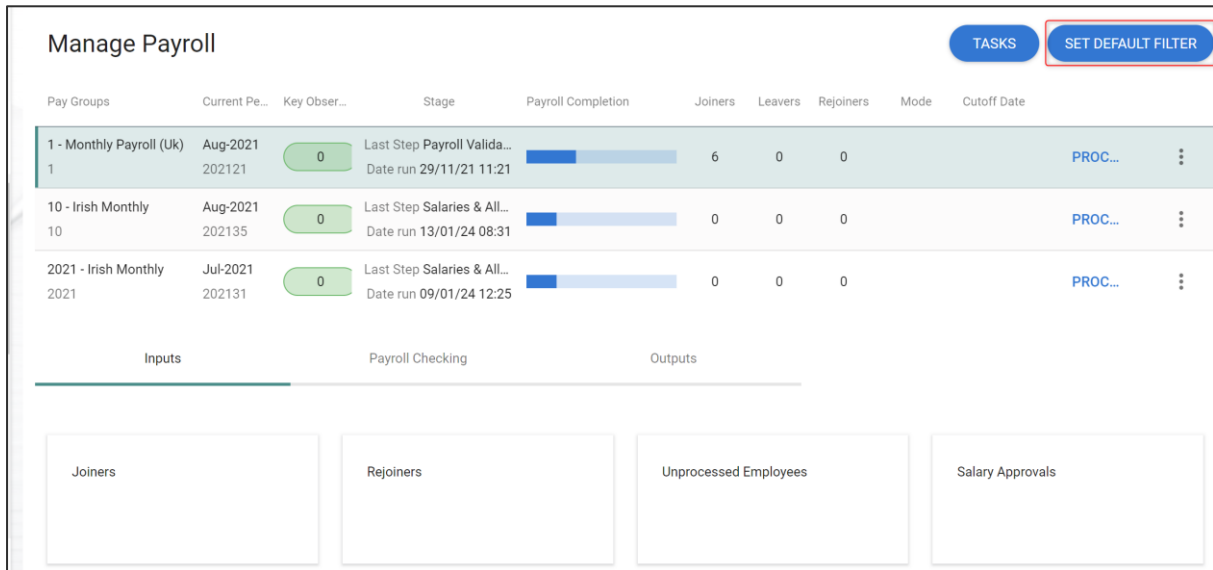

Note:

Payroll Filters are only available on the new screens included in Enhanced Joiners, Movers, and Leavers (JML).

When a Payroll Filter is deleted or renamed, this filter will be removed as the default filter where users have it applied. If the criteria selected in a Payroll Filter is amended, the filter will be refreshed to reflect those changes for any users that have the filter applied.

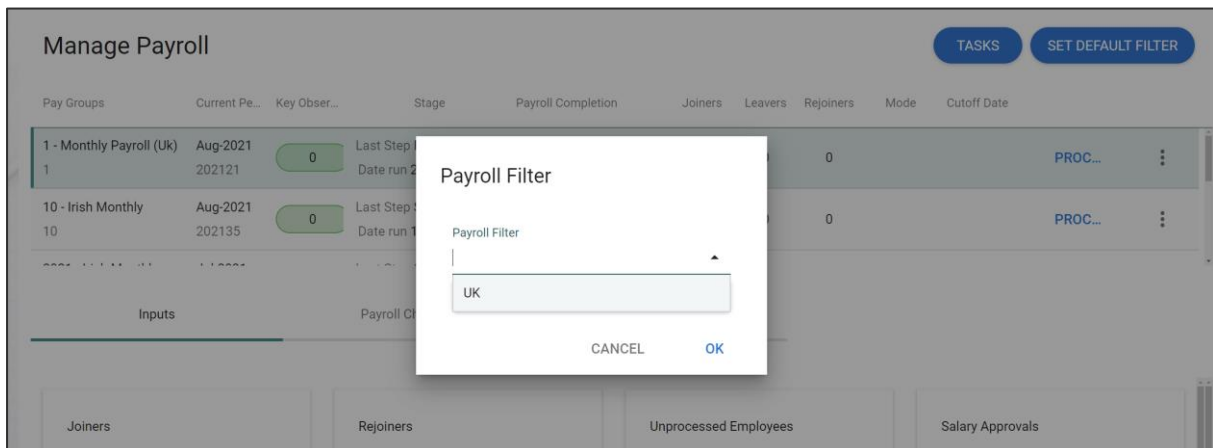

To apply a Default Filter:

1. Go to the **Payroll Dashboard** and click the **Manage Payroll** tab.
2. Click **Set Default Filter**.

The screenshot shows the 'Manage Payroll' interface. At the top right, there are two buttons: 'TASKS' and 'SET DEFAULT FILTER'. Below these is a table with columns: Pay Groups, Current Pe..., Key Obser..., Stage, Payroll Completion, Joiners, Leavers, Rejoiners, Mode, and Cutoff Date. The table lists three payroll runs: '1 - Monthly Payroll (Uk)', '10 - Irish Monthly', and '2021 - Irish Monthly'. Each row has a progress bar and a 'PROC...' button. Below the table, there are four boxes labeled 'Joiners', 'Rejoiners', 'Unprocessed Employees', and 'Salary Approvals'.

3. Select a **Payroll Filter** from the drop-down list.

The screenshot shows the 'Manage Payroll' interface with a 'Payroll Filter' dialog box open. The dialog box has a title 'Payroll Filter' and a dropdown menu with 'UK' selected. There are 'CANCEL' and 'OK' buttons at the bottom of the dialog box. The background shows the same table and buttons as the previous screenshot.

4. Click **OK**.

2.2. Filter the Input Screen

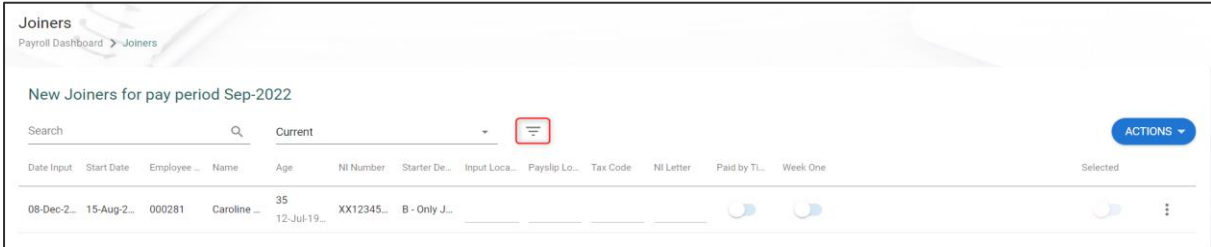

Payroll Filters can be applied to the input screens within the Payroll Dashboard. Input screens where the filters can be applied are:

- Joiners
- Rejoiners
- Pay Changes
- Manage Employees.

If a Default filter has been set, these screens will already be filtered in accordance with the default filter. The Default filter can be removed, and a new filter selected, however if the user moves away from the input screen, the filter will be reset back to the default.

2.2.1. Apply a new Payroll Filter to the input screen

1. Go to the **Payroll Dashboard** and click the **Manage Payroll** tab.
2. Select a **Pay Group** and click the **Inputs** tab.
3. Click one applicable input screen tiles.
4. Click the **Filter** Icon.

The screenshot shows the 'Joiners' input screen. At the top, it says 'Joiners' and 'Payroll Dashboard > Joiners'. Below that, it says 'New Joiners for pay period Sep-2022'. There is a search bar and a 'Current' filter dropdown. A red box highlights the 'Filter' icon (a funnel with a minus sign) in the top right corner of the table header area. The table has columns: Date Input, Start Date, Employee ID, Name, Age, NI Number, Starter De..., Input Loca..., Payslip Lo..., Tax Code, NI Letter, Paid by Ti..., Week One, and Selected. The first row of data shows: 08-Dec-2..., 15-Aug-2..., 000281, Caroline..., 35, XX12345..., B - Only J..., and some toggle switches.

5. Expand the **Payroll Filter** drop-down.
 - If you have set a default filter click **X** to remove this.

RESET APPLY

6. Select a filter from the **Payroll Filter** drop down list.
7. Click **Apply**.

The screen will display the relevant employees that meet the criteria of the filter.

2.3. Filter the Employee Screen

Payroll filters can be applied to the Employee screen. If accessed from the side menu and not the Manage Payroll screen, Default Filters are not applied.

To apply a filter the Employee screen:

1. Go to the **Payroll Dashboard**.
2. Click the **Employee** tab.
3. Click the **Filter** icon.

5. Click **Apply**

The Employee screen will display the relevant employees that meet the criteria of the filter.

3. Configure Payroll Filters

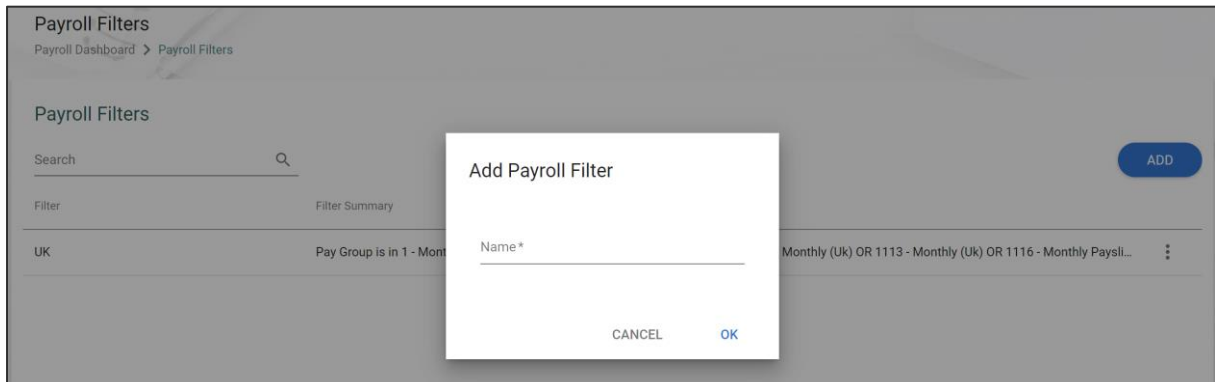

3.1. Create a Payroll Filter

To create a payroll filter:

1. Go to the **Payroll Dashboard**
2. Click the **Settings** tab.
3. Click the **Payroll Filters** tile.
4. Click **Add**.

5. Enter a name and click **OK**.

6. From the left-hand menu, select the required reference data.
7. Select the Available fields you want to include.
8. Click the **arrow icon** to move your selection to the Assigned column.

9. Repeat for all reference data types to be included in the filter.
 - Changes are saved automatically.

3.2. Edit a Payroll Filter

To Edit a Payroll Filter:

1. Go to the **Payroll Filters** screen.
2. Search for the filter and expand its **3-Dot menu**.
3. Click **Edit**.
4. Amend the criteria as required.
 - Changes are saved automatically.

3.3. Delete a Payroll Filter

To delete a payroll filter:

1. Go to the **Payroll Filters** Screen.
2. Search for the filter and expand its **3-dot menu**.
3. Click **Delete**.
4. Click **Yes**.
