Version	Date	Author	Details
1.0	15 th Aug 2023	Isabelle Grey	Published to customer success portal.
1.1	22 nd Sept 2023	Isabelle Grey	New section added 1.5. SSP in a New Tax Year . Update to calculation example in section 2.2.1. Category B Calculation .

1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to process Statutory Sick Pay for Irish Pay Groups using the phase 2 'New Method'.

We released our [Phase 1 SSP solution](#) in November 2022, based on the available information at the time. The phase 2 solution is an update to those calculations based on the SSP Regulations which have now been produced by the Department.

This document covers the following:

- Statutory Sick Pay requirements.
- Software changes introduced to assist employers operate Statutory Sick Pay.
- Steps required to configure PeopleXD for Statutory Sick Pay.

**Note:**

Users have the ability to override the system SSP calculation should they wish to do so.

1.2. Overview of New Method

The 'New Method' allows you to categorise Employees into 3 categories.:

Category	Description	How daily rate is calculated
A	Salary employees: • Employees with a salary and who are not paid by timesheet. • Do not fall into category C rules.	Based on last worked day before sickness.
B	Paid by Timesheet: • Employees whose hours are taken from their WFM roster.	Based on projected earnings based on scheduled hours on day of sickness.

Category	Description	How daily rate is calculated
	Do not fall into category C rules.	
C	User Defined Rule: Employees who fit the system rule created to identify category C.	Based on 13 week average from before the day of sickness.

Note:

For employees that are on a company sick scheme are considered to already be on better T&C than the SSP scheme. Should this not be the case users can override the system and record SSP for the employee. For further details see section [2.4. Company Absence Scheme](#).

1.2.1. Category A (Salary Employees)

This is when the employee's pay is calculated by reference to:

- A fixed wage, salary, allowance or bonus for each week, month or any other fixed period.

Or

- A fixed hourly or other time rate for a set number of hours (or other period of time) per week, month or any other fixed period, the gross amount payable in respect of any statutory sick leave day shall be the lesser of €110 or 70% of the sum (including any regular bonus or allowance the amount of which does not vary in relation to the work done by the employee but excluding any pay for overtime or commission) paid to the employee in respect of the normal daily hours last worked by them before the statutory sick leave day.

1.2.2. Category B (Paid by Timesheet Employees)

This is when the employee's pay is calculated by reference to a fixed hourly or other time rate for a variable number of hours (or other period of time) per week, month or any other fixed period, the gross amount payable in respect of any statutory sick leave day shall be the lesser of €110 or 70% of the sum (including any regular bonus or allowance the amount of which does not vary in relation to the work done by the employee but excluding any pay for overtime or commission) that would have been payable to the employee had he or she worked the statutory sick leave day;

1.2.3. Category C (User Defined Rule Employees)

This is when the employee's pay is not calculated by reference to any of the matters referred to in categories A or B. If so, the gross amount payable in respect of statutory sick leave shall be the lesser of €110 or the sum that is equal to 70% of the average hourly rate of pay (including any regular bonus or allowance the amount of which does not vary in relation to the work done by the employee but excluding any overtime or commission) of the employee, calculated over:

- The period of 13 weeks ending immediately before the statutory sick leave day commences.

Or

- If no time was worked by the employee during that period, the period of 13 weeks ending on the day on which time was last worked by the employee before the statutory sick leave day commences multiplied by the number of hours that they were due to work on the statutory sick leave day.

1.3. Irish Statutory Sick Pay

1.3.1. SSP Requirements

- Sick pay will be paid by employers at a rate of 70% of an employee's wage, subject to a daily threshold of €110 which is based on 2019 mean weekly earnings of €786.33 which equates to an annual salary of €40,889.16 (weekly salary of €786.33 divided by 5 days multiplied by 70% = €110.08).
- It will start with three days payable per year in 2023. Only certified sick days are eligible for SSP.
- The entitlement for payment of sick pay is subject to the employee having worked for their employer for a minimum of 13 weeks.
- Once entitlement to sick pay from their employer ends, employees who need to take more time off may qualify for illness benefit from the Department of Social Protection subject to PRSI contributions.
- The legislation does not prevent employers offering better terms or unions negotiating for more through a collective agreement.

1.4. SSP Eligibility

The following eligibility checks must be passed for the system to deem an employee eligible for SSP.

- **Employee Service**

An Employee must have a minimum of 13 weeks continuous service. The system checks for the first match of an employees:

- TUPE Date - if the 'Enable TUPE Date' parameter is turned on
- Latest Start Date
- Employee Start Date

- **SSP Days**

- An employee is eligible for up to 3 SSP days per calendar year.
- From day 4 no SSP will be paid.

- **Duplicate Claim**

- SSP can only be claimed once for a transaction date.
- If a record is created with a transaction date where SSP has already been paid the system will not pay SSP again.

- **Pre 1st January 2023 Records**

- SSP cannot be claimed pre 1st January 2023.
- If a SSP transaction date is before 1st January 2023 SSP will not be paid.

- **SSP Override**

- If a timesheet is created using the SSP override payment Pay Code no system calculation is made.

- **Sickness Category Code**

- Irish Statutory Sick Pay does not generate for employees who have a Company Absence Scheme selected on the Employee Sundry Profile screen.
- If the Sickness category code is populated for an employee, payroll excludes them from SSP calculation and an exception message will generate.

1.4.1. View Gross to Nett Messages

For certain circumstances the system generates messages in the view gross to nett exception to inform you when an employee is not eligible for SSP.

To view gross to nett messages:

1. Navigate to the **Payroll Dashboard**.
2. Select the relevant **Pay Group**.
3. Click the **Payroll Checking** tab.
4. Click **View Gross to Nett**.

Message	Description
SSP for ' date ' is not entitled to SSP as service <13 weeks	Employee is not entitled to SSP as they have not met the minimum continuous service.
SSP for ' date ' is not entitled to SSP as allowable days 3 exceeded	Employee is not entitled to SSP as they have exceeded the yearly claim limit.
SSP for ' date ' is before 1/1/2023, not eligible for payment	Employee is not entitled to SSP as the transaction date is before 1 st January 2023.
SSP for ' date ' is already paid	Employee is not entitled to SSP for the displayed transaction date as it has already been paid in a previous period.
SSP date ' date ' is already claimed	Employee is not entitled to SSP for the displayed transaction date as there is a duplicate entry.
Illness Category Employee - No SSP Entitlement	Sickness category code is populated for the employee excluding them from SSP calculation.
No SSP entitlement as no Rostered Hours	No roster hours exist for the employee.

1.5. SSP in a New Tax Year

Statutory Sick Pay (SSP) has no basis or instruction from Revenue around how to link SSP claims to previous illnesses. This is important as it means that each sick record is treated as a separate illness which means that rolling into a new tax year will result in SSP being paid for the first number of SSP days claimed within that tax year for sick days recorded, up to the allowed max number of SSP days for that tax year.

- PeopleXD operates based on the transaction date, making it clear whether the illness falls within the previous or current tax year.
 - If the transaction date is from the previous year, it will be treated as last year's sickness, and if it falls within the current year, it will be considered for the ongoing tax year.
- Therefore, each new tax year will see SSP paid for new illnesses recorded, up to the allowed number of SSP days for that specific tax year.
- To get around this there is the flexibility to record timesheets to adjust or override the system if you wish to prevent SSP being paid in a new tax year.

2. Employee Categories

The New SSP Method allows you to categorise Employees as follows:

- Category A (Salary Employees)
- Category B (Paid by Timesheet Employees)
- Category C (User Defined Rule Employees)

For employees that are on a company sick scheme are considered to already be on better T&C than the SSP scheme. Should this not be the case users can override the system and record SSP for the employee.

Note:

By default, the system uses the 'Old' method. To change to the new method [configuration](#) is required.

2.1. Category A

Category A is used for salary paid employees.

- An Employee will be considered Category A when not marked as a timesheet employee (i.e. positive input) and do not meet the Category C rule defined in PeopleXD.
- Once the employee meets the eligibility criteria to be entitled to SSP, Payroll calculates the daily rate of pay for the employee on the day before the SSP transaction date.
- Where the employee has multiple SSP days, Payroll uses the daily rate of pay for the employee on the on the day before the first absence.

Example:

- When a sick day recorded on the 24th of February, Payroll takes the employee's daily rate on 23rd of February.
- When sick days are recorded on the 24th and 25th of February, Payroll takes the employee's daily rate on 23rd of February.

- When sick days are recorded on the 24th (Friday) and the 27th of February (Monday), Payroll takes the employee's daily rate on 23rd of February for the first illness and the 26th of February for the second illness.

2.1.1. Calculation

SSP is calculated at 70% of the daily rate up to a maximum €110 per day.

Note the following:

- There is no change to how the daily rate is calculated only the transaction date used.
- The date used for the SSP calculation for Category A is the day before the sick date record.
- Permanent allowances are included when calculating the daily rate.
- Where an employee has multiple contracts, payroll uses the employee's substantive contract for calculating the daily rate.
- The SSP Override Pay Code can be used to override payroll calculations.
- No SSP payment generates when the employee is part of a company absence scheme. See section [Company Absence Scheme](#).
- Permanent percentage allowances (e.g., shift premium) can be included in the calculation if the pay code is configured as an SSP element.

Calculation Example:

Annual Salary	Hourly Rate	Daily Rate	Percentage Allowance	Daily Rate (Including Allowance)	at 70%
20,800	10.00	80.00	20%	96.00	67.20

Note:

Annual salary to daily/hourly rate will depend on the days in the year, pay period days and pay period hours configuration on a pay group.

2.1.2. Category A Configuration Required

To configure Payroll to calculate using Category A for salary employees:

1. [Turn on the New Method.](#)
2. [Apply Multiplier.](#)
 - A new indicator has been added to allow you to reduce the employee's daily rate by multiplying it by the employee's FTE.
3. [Select SSP Offset Code.](#)
 - Where an employee continues to receive their salary while on sick leave, you have the option to offset the calculated SSP value. When set this means no SSP will generate for an employee in a company sick scheme as employees on a company sick scheme are considered to already be on better T&C than the SSP scheme. Should this not be the case users can override the system and record SSP for the employee.
 - This is calculated as one day of the employee's salary and allowances based on the SSP pay code elements configured. This will be per sick day recorded.

Note:

This is applicable for salary staff only as they are getting paid their full normally salary already if we paid them SSP they would be paid more while out sick than working so this offset reduces their salary by 1 day for each sick day so that the SSP payment doesn't result in them being over paid.

4. [Review Permanent Percentage Allowance Pay Codes.](#)

2.2. **Category B**

Category B is used for 'Paid by Timesheet' employees whose work hours are taken from their Workforce Management (WFM) roster, who do not meet the Category C rule defined in PeopleXD.

Category B employees must have:

- The 'Paid by Timesheet' indicator turned on at the Pay Group or Employee Level.
- The 'SSP Hours from WFM Enabled' indicator switched on at the Pay Group or Employee Level.

- If the employee is '[Paid by Timesheet](#)' and the '[SSP Hours from WFM Enabled](#)' indicator is turned off, then the same day transaction date is used and the daily rate is calculated from the employee's contract.

2.2.1. Calculation

The calculation is done in three steps:

1. Payroll will calculate the employee's hourly rate:
 - $\text{Daily Rate (2 d.p.)} = \text{Annual Rate} / \text{Days in Year}$
 - $\text{Hourly Rate (2 d.p.)} = \text{Daily Rate} / \text{Hours in Day}$
2. It then looks up the WFM Roster table for the hours that the employee was scheduled worked on the transaction date of the sickness, and multiplies the hourly rate by the employee's rostered hours.
 - $\text{Daily Rate (2 d.p.)} = \text{Hourly Rate} * \text{Rostered Hours}$
3. SSP is calculated using the Daily Rate figure.

Note the following:

- Where the 'SSP Hours from WFM Enabled' indicator is turned off, Payroll uses the hours from the employee's contract.
- In addition to the rostered hours for that day the employee may also have a permanent percentage allowance (e.g., shift premium) which can be included in the calculation if the pay code is configured as an SSP element.

Calculation Example:

	Annual Rate	Days in Year	Hours in Day	Daily Rate	Rostered Hours
	39,000	260	8	150	8
Hourly Rate	18.75				
Daily Rate	150				

Daily Rate	Percentage Allowance	Daily Rate (Including Allowance)	At 70%
150	20%	180	126

**Note:**

Where no roster hours exist the [Gross to Nett message](#) 'No SSP entitlement as no Rostered Hours' will generate.

2.2.2. Category B Configuration Required

To configure Payroll to calculate using Category B for paid by timesheet employees:

1. [Turn on the New Method.](#)
2. [SSP Hours from WFM Enabled.](#)
3. [Review Paid by Timesheet Indicator.](#)
 - Category B employees must have either:
 - Positive Input indicator turned on at Pay Group level.
 - Paid from Timesheet Input indicator turned on at employee level.
4. [Review Permanent Percentage Allowance Pay Codes.](#)

2.3. **Category C**

Category C can be used for employees who are not salaried and do not have a fixed hourly rate. Category C calculates an average hourly rate for employees by taking their total pay over an historical period (e.g. 13 weeks) and dividing it by their work hours. Payroll takes this calculated hourly rate and multiplies by the number of hours that the employee was due to work on the statutory sick leave day. The values used for the calculation are taken from the pay history.

Note the following:

- A system rule is created to identify which types of employees fall in to the Method C calculation. This is based on a reference type you configure, e.g., Pay Group, Department, Job Title etc.
- The system will check if an employee fits into the category C rules before checking if they fall into the A or B category.
- The historical periods used in the calculation is configuration for each pay frequency.
- The historical hours used in the calculation must be available on payroll history.

- Permanent percentage allowances (e.g., shift premium) can be included in the calculation if the pay code is configured as an SSP element.

2.3.1. Calculation

Payroll Period	Hours	Value	Average Hourly Rate
202301	30	310	
202302	20	250	
202303	10	120	
202304	30	350	
202305	40	410	
202306	30	350	
202307	20	260	
202308	10	110	
202309	30	370	
202310	40	400	
202311	20	250	
202312	30	310	
202313	10	110	
Total	320	3,580	11.19

Note:

When employee moves pay groups, we take the end period of the employees new pay group and include the previous 13 weeks (are whatever historical period value is set in section Set the Average Hourly Historical Pay Periods)

2.3.2. Category C Configuration Required

To configure Payroll to calculate using Category C for salary employees:

1. [Turn on the New Method.](#)
2. [Method C Rules.](#)

Employees can be assigned to Category C based on your selected reference type. The types available are:

- Pay Group
- Job Title
- Position
- Department
- Location
- Category
- Sub-Category
- Status
- Sub- Status
- Pension
- UDF

3. [Average Hourly Pay Historical Periods.](#)
4. [Review Permanent Percentage Allowance Pay Codes.](#)

2.4. Company Absence Scheme

Irish Statutory Sick Pay does not generate for employees who have a Company Absence Scheme selected on the Employee Sundry Profile screen.

To view this:

1. Navigate to the Payroll Dashboard and click the **Employee** tab.
2. Search for the relevant employee and click **View**.
3. Click the **Sundry Profile** tab.
4. Review the *Sickness Category Code* field.

The screenshot shows the 'Sundry Profile' tab for employee Amelia May. The 'Sickness Category Code' field is highlighted with a red box and contains the value 'Absence Category 1'. Other fields visible include 'SW Code', 'Sick Bonus Daily Average', 'Working Week', 'Sick Entitlement', and 'Apply Sick Bonus'.

If the sickness category code field is populated for an employee, payroll excludes them from SSP calculation and [generates an exception message](#) when the Payroll is ran.

3. Processing Irish SSP

Once recorded Irish SSP is calculated when the Payroll Validation task is run as part of the Payroll Process. This can then be reviewed and amended before the Payroll is closed.

3.1. Record SSP

Certified SSP can be recorded in People Management, WFM or Payroll. It is the recording of transactions against Certified Sick Pay Codes in either People Management, WFM or Payroll that will trigger a potential SSP payment.

For further details on how to record SSP see the below articles:

- [Record SSP in People Management.](#)
- [Record SSP in Payroll](#)
- [Record SSP in the WFM Admin Dashboard.](#)

 Note:

When recording absence in WFM it is important to [review your transfer hours configuration](#) for SSP to calculate correctly.

See the [configuration section](#) for how to configure Certified Sick Pay Codes on the system.

 Note:

If SSP is recorded after the confirm timesheet task is run, then it will not be calculated until the next payroll period.

3.2. SSP Calculation Task

Once a sickness absence is recorded using certified sick Pay Codes SSP will be calculated when the Payroll Validation task is run as part of the Payroll Process.

**Note:**

The SSP software will only run for:

- Irish Pay Groups.
- Where the SSP Rules have been configured

The SSP calculation task completes the following:

1. Calculates the number of SSP days.
2. Calculates a daily rate of payment based on an employee's category:
 - a. Category A (Salary Employees)
 - b. Category B (Paid by Timesheet Employees)
 - c. Category C (User Defined Rule Employees)
3. Calculates the SSP Payment Total.
4. Compares the total to the daily payment cap.
5. Creates an SSP timesheet.

3.2.1. SSP Days Calculation

An employee is eligible for up to 3 SSP days. The system will calculate how many SSP days the sickness record contains and compare to the total number of SSP days the employee has taken in the calendar year.

3.2.2. Daily Rate of Pay Calculation

The system calculates the daily rate of pay for the employee on the SSP days.

Only pay codes configured as SSP elements are included in this calculation.

The calculation varies based on how an employee is paid:

- a. Category A (Salary Employees)

- b. Category B (Paid by Timesheet Employees)
- c. Category C (User Defined Rule Employees)

3.2.3. Calculate SSP Payment Total

The 2023 rate of payment for statutory sick leave is 70% of normal wages to be paid by employers (up to a maximum €110 per day).

The system will calculate the SSP Payment total using the daily rate of pay and the SSP payment percentage.

3.2.4. Compare SSP Payment Total to Maximum Payment Cap

The 2023 maximum daily payment is €110. The system will compare the SSP Payment Total to this figure. If the SSP Payment Total exceeds the cap the maximum daily payment cap will be used for payment.

3.2.5. SSP Payment Timesheet

A timesheet is then created for the SSP Payment against the SSP Payment Pay Code.

The payment is costed against the Cost Centre, Project, Expense Code, transaction date from the appointment.

3.3. **View/Review SSP Timesheet**

Once the Payroll Validation task has been run all SSP for the period is calculated and timesheets are created on employee records.

To view a SSP record:

1. Navigate to *Payroll Dashboard > Employee*
2. Search for the relevant employee and click **View**.
3. Click the **Timesheets Current Period** tab.

3.4. Add Manual SSP Timesheet

If you want to manually record SSP the SSP override Pay Code can be used to create a timesheet on an employee's record.

When you record a timesheet for SSP against the override Pay Code the system will take the value used on the time sheet and will not perform any system calculation.

3.5. Rerunning Payroll Validation Task

Rerunning the Payroll Validation task will delete system created SSP timesheets.

- Where **no Override Pay Code** timesheet exists: A new system generated timesheet will be created on the employee's record.
- Where **an Override Pay Code** timesheet exists: The system will not perform a calculation or generate a SSP timesheet.

4. Configure Irish SSP New Method

4.1. Create SSP Pay Codes

You will need to create two Pay Codes for Irish SSP:

1. SPP Payment Pay Code
2. SSP Override Payment Pay Code

Note:

For further guidance on creating Pay Codes refer to the [Pay Code Wizard - User Guide](#).

To create the Pay Codes:

1. Navigate to the Payroll Dashboard and click the **Settings** tab.
2. Click **Pay Codes**.
3. Click **Create New Pay Code**.
4. Populate the details:
 - a. Payment Type = Allowance
 - b. Payment Subset Type = Standard Value
5. Click **OK**.
6. Update the **Pay Code Formula**.
7. Add the following **Rules**:
 - a. Taxable
 - b. USCable
 - c. PRSlable
 - d. Included in Gross Pay
8. Add the **General Ledger Rules**.
9. Click **Save**.
10. Repeat for the second Pay Code.

Note:

You will also need to consider impact on their general ledger and review/update the matrix if applicable.

4.2. Statutory Sick Pay Settings

The *Irish Statutory Sick Pay Settings* screen is used to configure the all parameters and codes used for Irish SSP.

**Note:**

The screen is available on Portal only. Sites operating payroll on back office still need to use the Portal screen to turn on the SSP rules. To access the screen users will require:

1. [Portal Access](#)
2. [Menu Profile Access](#)

To access the screen:

1. Navigate to *Payroll Dashboard > Settings*
2. In the *Absence Configuration* section, click **Irish Statutory Sick Pay Settings**.

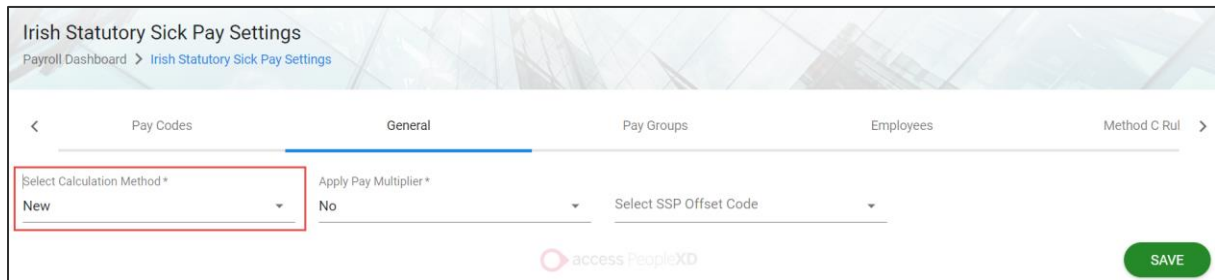

The *Irish Statutory Sick Pay Settings* screen opens:

Date Effective	SSP Days	Qualifying Weeks	Payment Percent	Max Payment
01-Jan-2023	3	13	70	110
01-Jan-2024	5	13	70	110
01-Jan-2025	7	13	70	110
01-Jan-2026	10	13	70	110

4.3. Turn on the New Method

To turned on the 'New Method' for calculating Irish Statutory Sick Pay:

1. Navigate to the *Statutory Sick Pay Settings* Screen.
2. Click the **General** tab.
3. Select **New** from the *Select Calculation Method* drop-down menu.

Irish Statutory Sick Pay Settings

Payroll Dashboard > Irish Statutory Sick Pay Settings

< Pay Codes **General** Pay Groups Employees Method C Rul >

Select Calculation Method *
New

Apply Pay Multiplier *
No

Select SSP Offset Code

access PeopleXD

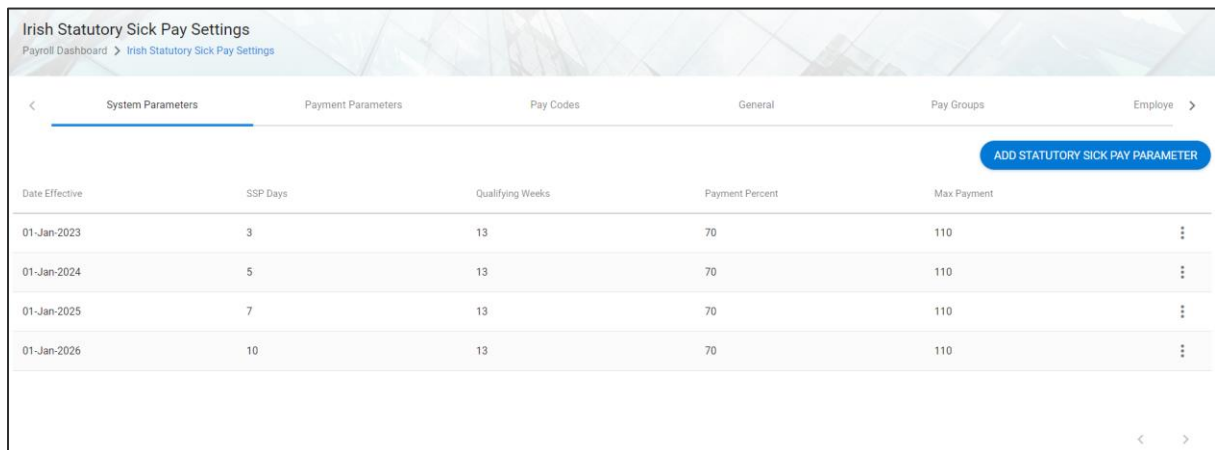

SAVE

4. Click **Save**.

4.4. Update System Parameters

To update the Irish SSP system parameters:

1. Navigate to the *Irish Statutory Sick Pay Settings* Screen.
2. Click the **System Parameters** tab.

Irish Statutory Sick Pay Settings

Payroll Dashboard > Irish Statutory Sick Pay Settings

< **System Parameters** Payment Parameters Pay Codes General Pay Groups Employee >

ADD STATUTORY SICK PAY PARAMETER

Date Effective	SSP Days	Qualifying Weeks	Payment Percent	Max Payment	
01-Jan-2023	3	13	70	110	⋮
01-Jan-2024	5	13	70	110	⋮
01-Jan-2025	7	13	70	110	⋮
01-Jan-2026	10	13	70	110	⋮

< >

3. Click the relevant 3 dot menu.
4. Click **Edit**.
5. Enter the new details.
6. Click **OK**.

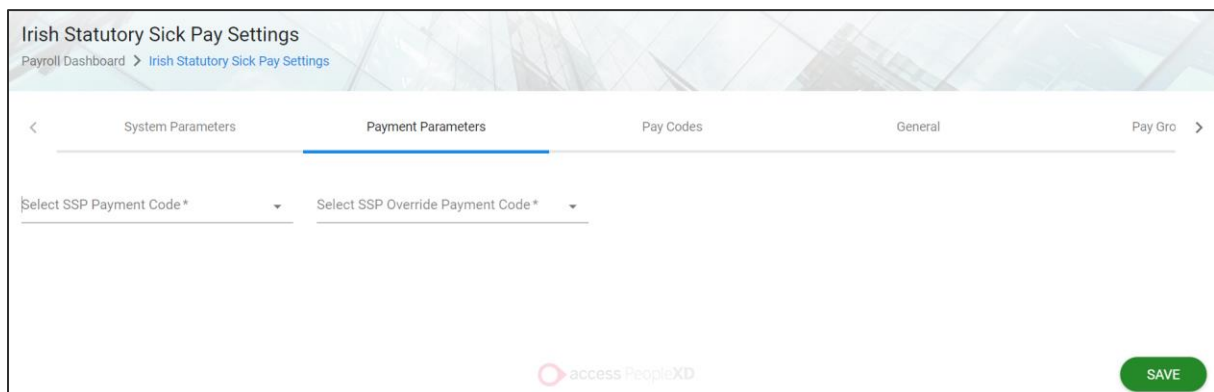

The fields available on the *System Parameters* screen are:

Field	Description
Date Effective	This is the date effective of the rule.
SSP Days	This is the maximum number of SSP days allowable.
Qualifying Weeks	This is the qualifying weeks to be eligible
Payment Percent	This is the percent to be used in the SSP payment calculation
Max Payment	This is the capped max daily rate to be used in the SSP payment calculation

4.5. Update Payment Parameters

To update the Irish SSP payment parameters:

1. Navigate to the *Irish Statutory Sick Pay Settings* Screen.
2. Click the **Payment Parameters** tab.

The screenshot shows the 'Irish Statutory Sick Pay Settings' screen. At the top, there's a breadcrumb trail: 'Payroll Dashboard > Irish Statutory Sick Pay Settings'. Below this is a horizontal tab bar with five tabs: 'System Parameters', 'Payment Parameters' (which is selected and highlighted with a blue underline), 'Pay Codes', 'General', and 'Pay Gro'. The main content area contains two dropdown menus: 'Select SSP Payment Code *' and 'Select SSP Override Payment Code *'. At the bottom right, there is a green 'SAVE' button. The PeopleXD logo is visible at the bottom center.

3. Select a pay code from the relevant drop down menu.
4. Click **Save**.

The fields available on the *Payment Parameters* screen are:

Field	Description
Select SSP Payment Code	This is the pay code that the system will generate a timesheet against for the calculated SSP payment value.
Select SSP Override Payment Code	When a user records a timesheet for SSP against this override pay code the system will take the value used on this time sheet and will not perform any system calculation

4.6. Update the SSP Element and SSP Absence Pay Codes

To update the Irish SSP Pay Codes:

1. Navigate to the *Irish Statutory Sick Pay Settings* Screen.
2. Click the **Pay Codes** tab.

Pay Code	SSP Element	SSP Absence	
2244 SOCIAL WELFARE 2244			
3444 Uni 3444			
Add. Paternity Leave (Unpaid) 3750			

3. Click the relevant 3 dot menu.
4. Click **Edit Row**.
5. Turn on/off the relevant toggles.
6. Click **OK**.
7. Repeat for all relevant SSP Pay Codes

The fields available on the *Pay Codes* screen are:

Indicator	Description
SSP Element	Turn on to identify pay codes to be included in the system relevant pay calculation.
SSP Absence	Turn on to identify the pay codes that will be used for Certified sick. SSP will only calculate for claims against the SSP Absence pay code.

Note:

The employee must provide their employer with a certificate from a registered medical practitioner and the certificate must state that the employee named is unfit to work due to their illness or injury. For this reason, users need to define what Time or Pay Codes are eligible for certified sick.

4.7. Category A Configuration

4.7.1. Apply Multiplier

A new indicator has been added to allow you to reduce the employee's daily rate by multiplying it by the employee's FTE.

Note:

By default, the employee's daily rate is not affected by the employee's Full Time Equivalent (FTE).

Example:

Where an employee's daily rate is calculated as €100, and the employee has an FTE of (0.8), the daily rate is prorated to €80.

To turn on the 'Apply Multiplier' for calculating Irish Statutory Sick Pay:

1. Navigate to the *Irish Statutory Sick Pay Settings* Screen.
2. Click the **General** tab.
3. Select **Yes** from the *Apply Pay Multiplier* drop-down menu.

The screenshot shows the 'Irish Statutory Sick Pay Settings' screen with the 'General' tab selected. The 'Apply Pay Multiplier' dropdown menu is highlighted with a red box and set to 'Yes'. The 'Select Calculation Method' dropdown is set to 'New'. The 'Select SSP Offset Code' dropdown is empty. A 'SAVE' button is visible in the bottom right corner.

4. Click **Save**.

4.7.2. Select SSP Offset Code

Where an employee continues to receive their salary while on sick leave, you have the option to offset the calculated SSP value.

To offset the SSP value:

1. Navigate to the *Irish Statutory Sick Pay Settings* Screen.

PeopleXD Payroll: Irish Statutory Sick Pay - User Guide

- Click the **General** tab.
- Select an Pay Code from the *Select SSP Offset Code* drop-down menu.

The screenshot shows the 'Irish Statutory Sick Pay Settings' page with the 'General' tab selected. The page has a breadcrumb trail: 'Payroll Dashboard > Irish Statutory Sick Pay Settings'. Below the breadcrumb, there are four tabs: 'System Parameters', 'Payment Parameters', 'Pay Codes', and 'General'. The 'General' tab is active. In the 'General' tab, there are three dropdown menus: 'Select Calculation Method *' (set to 'New'), 'Apply Pay Multiplier *' (set to 'Yes'), and 'Select SSP Offset Code' (set to 'Arrears'). The 'Select SSP Offset Code' dropdown is highlighted with a red box. At the bottom right, there is a green 'SAVE' button.

- Click **Save**.

Note:

If an SSP override payment pay code is used, PeopleXD does not generate any offset.

Below is an example of a Sick Pay Offset Pay Code:

The screenshot shows the 'Pay Code Wizard' page with the 'Details' tab selected. The page has a breadcrumb trail: 'Payroll Dashboard > Pay Codes > Pay Code Wizard'. On the left, there are three steps: '1 Pay Code Formula', '2 Rules', and '3 General Ledger'. The 'Details' tab is active. It shows the following fields: 'Pay Code *' (2526), 'Pay Code Description *' (STATUTORY OFFSET IRISH), and 'Analysis Code *' (Statutory Pay). Below these fields, there is a text description: 'The Allowance, 2526 - STATUTORY OFFSET IRISH is Taxable, PRSIable, Non-Pensionable EE, Non-Pensionable ER, USCable.' Below this, there are four dropdown menus: 'Hours / Days / Units / Value *' (set to 'Value'), 'Hours Days Limit' (set to '1'), 'Multiplier *' (set to '1'), and 'Standard Value' (set to 'Standard Value'). Below these dropdowns, there is a 'Formula' section with the text: 'This Allowance is calculated on Value, multiplied by a Multiplier of 1.'

The screenshot shows the 'Pay Code Wizard' page with the 'Rules' tab selected. The page has a breadcrumb trail: 'Payroll Dashboard > Pay Codes > Pay Code Wizard'. On the left, there are three steps: '1 Pay Code Formula', '2 Rules', and '3 General Ledger'. The 'Rules' tab is active. It shows a table with the following columns: 'Rule', 'Description', and 'Value'. The table contains the following rows:

Rule	Description	Value
Taxable	Enter Taxable, Non-Taxable, Pre-Tax or Income Continuance	Taxable
PRSIable	Enter PRSIable, Non-PRSIable, Non-PRSIable EE / PRSIable ER or PRSIable EE / Non PRSIable ER	PRSIable
Pensionable for Employee	Select if this Pay Code Pensionable or Non-Pensionable for the Employees Pension Contributions	Non-Pensionable EE
Pensionable for Employer	Select if this Pay Code is Pensionable or Non-Pensionable for the Employers Pension Contributions	Non-Pensionable ER
USCable	Select USCable or Non-USCable	USCable
Max Value Warning	Enter the Maximum Value allowed on any one Timesheet entry for this Pay Code	999999.99
Min Value Warning	Enter the Minimum Value allowed on any one Timesheet entry for this Pay Code	-999999.99
Enable/Disable for Timesheets	Select if the Pay Code is to be Disabled or Enabled for Timesheets	Enable for Timesheets
Calculation Priority	Enter the calculation Priority in order of importance e.g. 1,2,3 for each allowance	1
Rate Seq Number	Enter 1 unless paying timesheets at alternative rates to an employee standard	1

Below is an example of the calculation generated:

PRSI Weeks

PRSI Band Override: 0 ☐ Zero PRSI Band

4.8. Category B Configuration

4.8.1. SSP Hours from WFM Enabled

Category B Employees must have the 'SSP Hours from WFM Enabled' indicator turned on at Pay Group or Employee level.

To turn on the indicator at Pay Group level.

1. Navigate to the *Irish Statutory Sick Pay Settings* Screen.
2. Click the **Pay Groups** tab.

Irish Statutory Sick Pay Settings

Payroll Dashboard > Irish Statutory Sick Pay Settings

< General **Pay Groups** Employees Method C Rules SSP Method C - Aver >

Search Pay Group

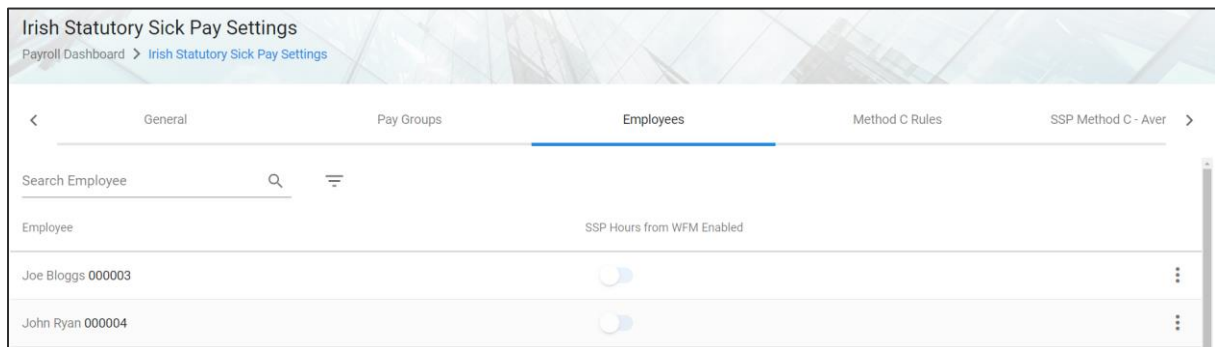

Pay Group	SSP Hours from WFM Enabled	
1 - Monthly Payroll (Uk) 1	☐	⋮
10 - Irish Monthly 10	☐	⋮

3. Expand the relevant 3 dot-menu and click **Edit Row**.
4. Turn on the *SSP Hours from WFM Enabled* toggle.
5. Click **OK**.
6. Repeat for all relevant Category B Pay Groups.

To turn on the indicator at Employee level.

1. Navigate to the *Irish Statutory Sick Pay Settings* Screen.

2. Click the **Employees** tab.

3. Expand the relevant 3 dot-menu and click **Edit Row**.
4. Turn on the *SSP Hours from WFM Enabled* toggle.
5. Click **OK**.
6. Repeat for all relevant Category B employees.

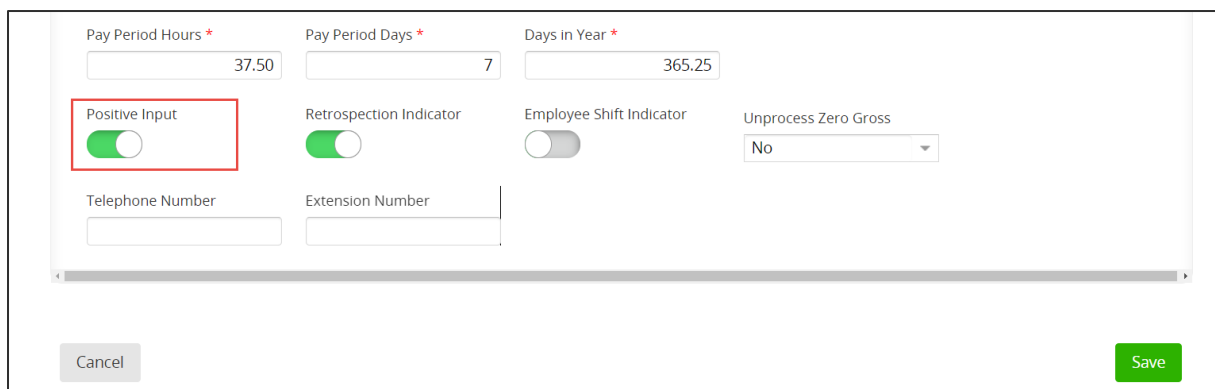

4.8.2. Review Paid by Timesheet Indicator

Category B Employees must have the 'Paid by Timesheet' indicator turned on at Pay Group or Employee level.

Pay Group:

To view the indicator at Pay Group level:

1. Navigate to the Payroll Dashboard and click the **Settings** tab.
2. Click **Pay Groups**.
3. Select a *Pay Group Code* from the drop-down menu.
4. At the bottom of the page review the *Positive Input* toggle.

Employee:

To view the indicator on an employee's record:

1. Navigate to the Payroll Dashboard and click the **Employee** tab.
2. Search for the employee and click **View**.
3. Click the **Tax Details** tab.
4. Review the *Paid from Timesheet Input* toggle.

The screenshot shows the 'Tax Details' tab for an employee named Amelia May. The page includes a sidebar with navigation options like 'Year to Date Cumula...', 'Payslip Message', 'Instructional Forms', 'Banking Details', and 'Tax Details'. The main content area displays employee information (Employee Reference No 000265, PPS Number 1234567L, Date of Birth 10-Mar-1980) and a toggle for 'Paid from Timesheet Input' which is currently turned on. Below this, there is a 'Pay Details' section with a table showing Position (Grade 1), Point (3), and Rate (65000).

4.9. Category C Configuration

4.9.1. Method C Rules

To configure the reference type used for Category C:

1. Navigate to the *Irish Statutory Sick Pay Settings* Screen.
2. Click the **Method C Rules** tab.
3. Select a *Rule Type* from the drop-down menu.

The screenshot shows the 'Irish Statutory Sick Pay Settings' screen, specifically the 'Method C Rules' tab. The page has a breadcrumb trail: 'Payroll Dashboard > Irish Statutory Sick Pay Settings'. Below the breadcrumb, there are tabs for 'General', 'Pay Groups', 'Employees', 'Method C Rules' (which is active), and 'SSP Method C - Average Periods'. A search bar labeled 'Search Rule element' is present. A red box highlights the 'Select Rule type*' dropdown menu. Below the search bar, there is a table with columns for 'Rule element' and 'Method C'.

To configure the Category C Rule Elements:

1. Follow steps 1-2 above.
2. Expand the relevant 3 dot-menu and click **Edit Row**.
3. Turn on the *Method C* toggle.
4. Click **OK**.
5. Repeat for all relevant Category C rule elements.

4.9.2. Set the Average Hourly Pay Historical Periods

To set how many historical periods to use the in the Category C calculation:

1. Navigate to the *Irish Statutory Sick Pay Settings* Screen.
2. Click the **Method C – Average Periods** tab.

Irish Statutory Sick Pay Settings
Payroll Dashboard > Irish Statutory Sick Pay Settings

General Pay Groups Employees Method C Rules **SSP Method C - Average Periods**

Monthly* 0 Four Weekly* Bimonthly* Fortnightly* Weekly*

access PeopleXD SAVE

3. Update the values e.g. 12 weeks for weekly pay groups, 6 weeks for fortnightly pay groups.
4. Click **Save**.

4.10. Review Percentage Allowance Pay Codes

When setting up a percentage allowance to be included in the daily rate calculation, ensure the sick leave pay code is included as an element. To review this:

1. Navigate to the Payroll Dashboard.
2. Click the **Settings** tab.
3. Click Pay **Codes**.
4. Search for the Pay Code.
5. Expand the 3-dot menu and click Edit.
6. In *Step 1 – Pay Code Formula* review the *Assigned Calculation Elements*.

Pay Code Wizard
Payroll Dashboard > Pay Codes > Pay Code Wizard

1 Pay Code Formula 2 Rules 3 General Ledger

Details

Pay Code* 8888 Pay Code Description* Percentage Allowance Analysis Code* Overtime

The Allowance, 8888 - Percentage Allowance is Taxable, PRSable, Non-Pensionable EE, Non-Pensionable ER, USCable.

Available Calculation Elements

Search

- ☐ University Holiday Arrears Code 1020
- ☐ Maternity Leave Code 3720

Assigned Calculation Elements

Search

- ☐ SICK LEAVE 3710 Code 3710
- ☐ Salary Code 1000

4.11. Review WFM Transfer Hours

If you record SSP in WFM it is important to review your configuration to ensure SSP is calculated correctly. When recording hours in WFM there are two configuration options:

- Transfer hours – hours are transferred from WFM into Payroll.
- Non transfer hours – hours are held only in WFM and not transferred to Payroll.

To review which configuration your WFM system has:

1. Go to the **WFM Admin Dashboard**.
2. Click the **WFM Configuration** tab.
3. Click **Pay Codes**.
4. Review the *Pay Code Indicator* field for the pay codes.
 - **Decimal** – transfer hours.
 - **Minutes** – transfers hours.
 - **Non Payroll** – Non transfers hours.

The system can be configured for SSP to process in either setup. The configuration options below ensure SSP will process correctly:

Note:

There may be a wider impact on changing the configuration of these indicators. Please contact a consultant for additional guidance if this would require you to change your configuration.

4.11.1. Transfer Hours to Payroll – Turned Off

SSP will calculate correctly if you do not send timesheets to Payroll as this means the records are picked up straight from WFM. The below configuration is required for this option:

Indicator	On/Off
CHECK SICK SCHEME AND PAYROLL INPUT PERIOD IN TRIGGER CT_CALC_HOURS_TRIGGER	On

To review this:

1. Navigate to the WFM Admin Dashboard and click the **WFM Configuration** tab.
2. Click **Company and Calendar Config**.
3. Search for a company.
4. Expand the 3-dot menu and click **View/Edit**.
5. Click the **Advanced Options** tab.
6. Search for the indicator and review the configuration.

Note:

If this indicator is not enabled SSP will not calculate correctly as there will be no payroll input period for the absence.

4.11.2. Transfer Hours to Payroll – Turned On

SSP will calculate correctly if you send timesheets to Payroll and you do not group timesheets. The below configuration is required for this option:

Indicator	On/Off
NON GROUPED TIMESHEETS TO COREPAY	On

To review this:

1. Navigate to the WFM Admin Dashboard and click the **WFM Configuration** tab.
2. Click **Company and Calendar Config**.
3. Search for a company.
4. Expand the 3-dot menu and click **View/Edit**.
5. Click the **Advanced Options** tab.
6. Search for the indicator and review the configuration.

5. Further Information

5.1. Portal Access

Sites with a Portal user:

- If you do not currently have a Portal account then the Portal User Security Administrator in your company will be able to set you up with a Portal user account.
- If, when you log in to Portal, you do not have access to the statutory sick pay screen then they will need to assign the correct Menu Profile to your Portal account.

Note:

For further guidance on creating a new Portal user refer to the [Security user guide](#).

Sites with no Portal user:

- If your site does not currently have any Portal users, you will need to raise a ticket with Access for us to create a Portal user.
- Please raise the ticket with the
 - Subject: SSP in Ireland – Portal Menu Profile Request
 - Details: Comment on the ticket that this is raised for the attention of the Legislation Team
- On receipt of the request, we will create the first Portal user for you and confirm the username/password
- Any additional Portal users required should then be created by the nominated Portal user.

5.2. Menu Profile

The below Menu Profile turns on all available menu options by default. Once a user has the menu profile turned on in Security they will have full access to the Statutory Sick Pay Settings screen.

Menu Profile

STAT_SICK_PAY_IE_USER

5.3. Menu Options

To access the *Irish Statutory Sick Pay Settings* screen, users require the following menu options:

Menu Option	System
MAIN_MENU.SETTINGS	CorePortal Pay
SETTINGS_MENU.STATUTORYSICKPAY	CorePortal Pay
WS_PAYROLL_MENU.GET_COMPANY	Web Services
WS_PAYROLL_MENU.GET_SETTINGS_STATSICKPAY	Web Services
WS_PAYROLL_MENU.GET_SETTINGS_STATSICKPAY_PAYMENTPARAMS	Web Services
WS_PAYROLL_MENU.GETPAYCODE	Web Services

WS_PAYROLL_MENU.PATCH_SETTINGS_STATSICKPAY_GENERALPARAMS	Web Services
WS_PAYROLL_MENU.PATCH_SETTINGS_STATSICKPAY_AVGPERIODSMETHODC	Web Services

Note:

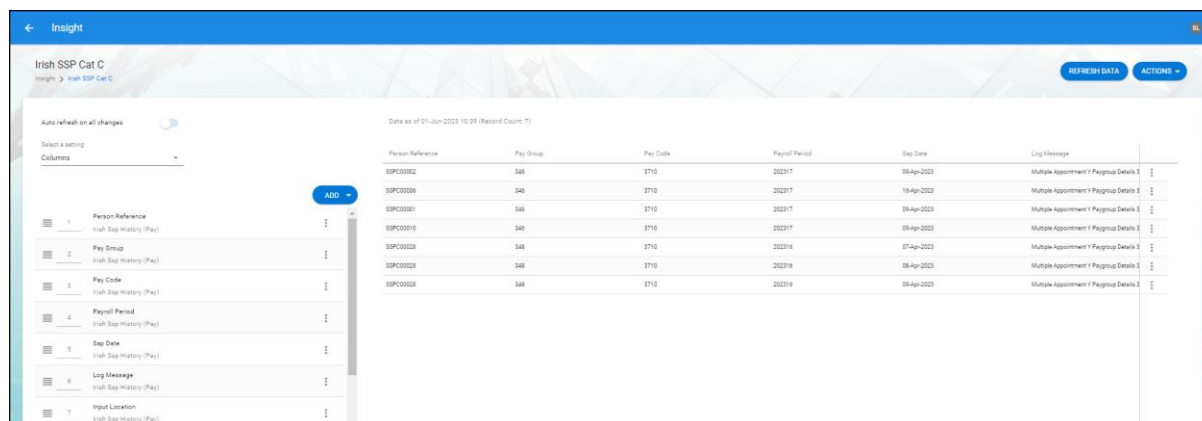

As part of the release these menu options have been automatically turned on for anyone with access to the Statutory Sick Pay screens.

5.4. Insight Reporting

New views have been added to Insight to support you in reporting on SSP. For further guidance on using Insight see the [Insight Fundamentals User Guide](#).

The following view allows you to report on the sick pay calculation details:

- Business Area: Pay
- View Name: Irish SSP History (Pay)

Person Reference	Pay Group	Pay Code	Payroll Period	Sick Date	Log Message
SSPC0002	345	3710	202317	09-Apr-2023	Multiple Appointment / Paygroup Details 3
SSPC0009	345	3710	202317	16-Apr-2023	Multiple Appointment / Paygroup Details 3
SSPC0001	345	3710	202317	09-Apr-2023	Multiple Appointment / Paygroup Details 3
SSPC0010	345	3710	202317	09-Apr-2023	Multiple Appointment / Paygroup Details 3
SSPC0028	345	3710	202318	07-Apr-2023	Multiple Appointment / Paygroup Details 3
SSPC0029	345	3710	202318	08-Apr-2023	Multiple Appointment / Paygroup Details 3
SSPC0028	345	3710	202318	09-Apr-2023	Multiple Appointment / Paygroup Details 3

The 'Log Message' column contains the SSP calculation for each sick day.
