1. Overview

1.1. Purpose of This Guide

This user guide provides comprehensive instructions for implementing and managing Ireland's Auto Enrolment (AE) pension system within PeopleXD Payroll.

1.2. Who Should Use This Guide

This guide is designed for:

- **Payroll Administrators** – responsible for processing payroll and managing employee pension deductions
- **HR Professionals** – overseeing employee benefits and pension scheme administration
- **System Configurators** – setting up and maintaining PeopleXD system parameters
- **Compliance Officers** – ensuring adherence to NAERSA and Department of Social Protection requirements

1.3. What This Guide Covers

This guide provides step-by-step instructions for all aspects of Auto Enrolment processing, including:

- **System Setup and Configuration**
 - Creating pay codes and pension schemes for Auto Enrolment
 - Configuring system parameters, pension rules, and pay group settings
 - Setting up general ledger integration
 - Managing digital certificates and security requirement
- **Integration with NAERSA**
 - Understanding and using Auto Enrolment APIs
 - Authenticating and connecting to NAERSA systems
 - Managing data exchange protocols and security
- **Operational Processes**
 - Retrieving and applying Auto Enrolment Payroll Notifications (AEPNs)
 - Processing employee enrolments, opt-outs, and status changes
 - Calculating employee and employer contributions
 - Handling special cases and exceptions
- **Reporting and Compliance**

- Generating Contribution Submission Files
- Transferring data to NAERSA
- Managing corrections, amendments, and deadline requirements
- Reconciling contributions and validating submissions
- Meeting payslip and employee notification obligations
- **Employer and Employee Responsibilities**
 - Understanding statutory obligations
 - Managing employer and employee portals
 - Handling employee communications

1.4. How to Use This Guide

This guide is organized to support both initial implementation and ongoing operations:

- **For initial setup:** Follow the configuration sections ([Section 12. Auto Enrolment Configuration](#)) before processing your first payroll.
- **For daily operations:** Refer to Sections 4-7 for routine AEPN retrieval and submission processes.
- **For troubleshooting:** Use Section [13. Handling Special Cases](#) .
- **For go-live preparation:** Review section [21. Checklist for Go Live](#).

By following the procedures outlined in this guide, you will be able to configure, test, and operate Auto Enrolment processes efficiently while maintaining full compliance with all statutory requirements.

2. Introduction to Auto Enrolment

2.1. What is Auto Enrolment?

Auto Enrolment is Ireland's mandatory workplace pension scheme, known as **MyFuture Fund**. It automatically enrolls eligible employees into a pension savings plan, ensuring they build retirement savings throughout their working life.

2.1.1. Who is Automatically Enrolled?

Employees are automatically enrolled if they meet **all three** of these criteria:

Criterion	Requirement
Age	Between 23 and 60 years old
Earnings	€20,000 or more per year
Pension Status	Not already contributing to another pension scheme

2.1.2. How Contributions Work

Auto Enrolment requires contributions from three sources:

Contributor	Initial Rate (Years 1-3)	Who Pays
Employee	1.5% of gross pay	Deducted from salary
Employer	1.5% of gross pay	Paid by the company
State	0.5% of gross pay	Provided as a top-up

 **Note:** Contribution rates will increase every three years. NAERSA will notify you of rate changes through updated AEPN instructions.

2.2. Key Deadlines and Payment Rules

2.2.1. Critical Timing Requirements

Understanding and meeting these deadlines is essential for compliance:

Action	Deadline	Consequence of Missing
Retrieve AEPNs	Before running each payroll	Incorrect or missing deductions
Submit contribution file	On or before employee pay date	Compliance review by NAERSA
Funds received by NAERSA	By 6:30 PM on pay date	Late submission flags

2.2.2. How Payment Works

1. You submit the contribution file to NAERSA on (or before) pay date
2. NAERSA calculates the total amount due
3. NAERSA initiates a **direct debit** from your registered bank account
4. Funds are collected automatically based on your submission

 **Note:** You cannot make corrections after 6:30 PM on the pay date. Plan your payroll schedule accordingly.

2.3. Understanding the Rules

2.3.1. Rule 1: NAERSA Determines Eligibility

You must not assess eligibility yourself. Only NAERSA has the authority to determine who should be enrolled.

How it works:

- Revenue shares payroll data with NAERSA for employees aged 23-60
- NAERSA assesses earnings and pension status across all employments
- NAERSA issues an AEPN (instruction) when someone should be enrolled
- You must act on NAERSA's instructions only

 **Note:** Attempting to assess eligibility independently may result in non-compliance.

2.3.2. Rule 2: Follow AEPN Instructions Exactly

Always operate on NAERSA's instructions, even when they seem incorrect.

Key scenarios:

Situation	What You Must Do
Employee earns over €80,000	Continue contributions until NAERSA issues a stop instruction
Employee joins another pension	Continue Auto Enrolment until NAERSA issues a stop instruction
Employee leaves employment	Continue for post-employment payments if AEPN says "Left Employment - Extended"
You think an employee shouldn't be enrolled	Continue as instructed; contact NAERSA if you believe there's an error

2.3.3. Rule 3: Pot Follows Member

Each employee's pension savings are linked to their **PPSN (Personal Public Service Number)** and move with them between jobs.

What this means for you:

- Employees without a valid PPSN cannot be enrolled in Auto Enrolment
- Savings accumulate across multiple employments
- You're only responsible for contributions during their time with your company

2.4. Employee Rights and Options

2.4.1. Opting Out

Employees can choose to leave the scheme during specific windows:

Opt-Out Window	Timing	What Happens
Initial opt-out	Months 7-8 after enrolment	Employee contribution refunded
Rate increase opt-out	Months 7-8 after rate changes	Employee contribution refunded
Automatic re-enrolment	After 2 years	Employee automatically re-enrolled

Note:

- Only **employee contributions** are refunded; employer and State contributions remain invested
- Employees manage opt-outs through the NAERSA portal (not through you)
- NAERSA will send you an AEPN instruction to stop deductions
- Employees can also opt back in at any time

2.4.2. Pausing Contributions

After 6 months of saving, employees can **pause** contributions for up to 2 years.

Key differences from opting out:

Feature	Opt-Out	Pause
Refund	Yes (employee portion only)	No
Duration	Until re-enrolment (2 years)	Up to 2 years
Previous savings	Remain invested	Remain invested

 **Note:** NAERSA will send you an AEPN instruction to pause, suspend, or recommence contributions. Simply follow the instruction.

2.5. Legal Framework

Auto Enrolment is governed by the Auto Enrolment Retirement Savings System Act 2024.

Key Legal Points

- **Mandatory:** All eligible employees must be enrolled
- **Administered by:** NAERSA (National Automatic Enrolment Retirement Savings Authority)
- **Penalties:** Non-compliance can result in fines and enforcement action
- **State support:** The government provides a top-up to employee contributions

Where to Find More Information

- **Legislation:** [View the Auto Enrolment Bill](#)
- **NAERSA Support:** Contact the NAERSA helpdesk for registration and compliance queries
- **Revenue Integration:** Auto Enrolment uses your existing PAYE Modernisation infrastructure

 **Note:** Before processing your first Auto Enrolment payroll, complete the configuration steps in Section [12. Auto Enrolment Configuration](#).

3. Your Payroll Process with Auto Enrolment

3.1. The Two New Steps You Need to Add

Auto Enrolment adds **two mandatory steps** to your existing payroll routine. These steps must be completed for every payroll run.

Your Updated Payroll Workflow

3.2. Retrieve AEPN Instructions

3.2.1. What is an AEPN?

AEPN stands for **Auto Enrolment Payroll Notification**. It's the official instruction from NAERSA telling you:

- Which employees to enrol
- Which employees to stop deductions for
- What contribution rates to apply
- Any status changes (opt-outs, suspensions, etc.)

3.2.2. When to Retrieve AEPNs

Before every payroll run – even if you think nothing has changed.

Scenario	Must Retrieve AEPN?
Weekly payroll	✓ Yes, every week
Fortnightly payroll	✓ Yes, every fortnight
Monthly payroll	✓ Yes, every month
Supplementary/off-cycle payroll	✓ Yes, every time
All employees already in company pension	✓ Yes, still required

3.2.3. What Happens When You Retrieve AEPNs

1. **You request:** PeopleXD sends a request to NAERSA for your tax registration number
2. **NAERSA responds:** Returns all current AEPN instructions for your employees
3. **System stores:** Instructions are saved to a temporary holding table
4. **You review:** Check the AEPN Update Report for any changes
5. **System applies:** During payroll validation, instructions are applied automatically

Note: NAERSA updates AEPNs every night. Always retrieve the latest version before processing payroll.

3.3. **Submit Contribution File**

3.3.1. What is a Contribution Submission File?

This file contains the calculated contribution amounts for each employee enrolled in Auto Enrolment. It tells NAERSA:

- Who received pay this period
- How much gross pay they earned
- Employee contribution amount
- Employer contribution amount
- Payment date

3.3.2. When to Submit

 **Note: Critical deadline:** Submit on or before the employee's pay date, ensuring NAERSA receives funds by **6:30 PM** on that date.

Pay Frequency	Example Pay Date	Latest Submission Time
Weekly	Friday	Friday, 6:30 PM
Fortnightly	Thursday	Thursday, 6:30 PM
Monthly	Last day of month	Last day, 6:30 PM

 **Note: Warning:** After 6:30 PM on pay date, you cannot make corrections through the system. Any errors must be resolved manually through the NAERSA Employer Portal.

3.3.3. What Happens After Submission

1. **Validation:** NAERSA checks your submission for errors
2. **Confirmation:** You receive a status response (Success, Error, or Partial)
3. **Direct Debit:** NAERSA initiates collection from your registered bank account
4. **Allocation:** Funds are allocated to employee pension pots

3.4. Understanding the Auto Enrolment APIs

3.4.1. What is an API?

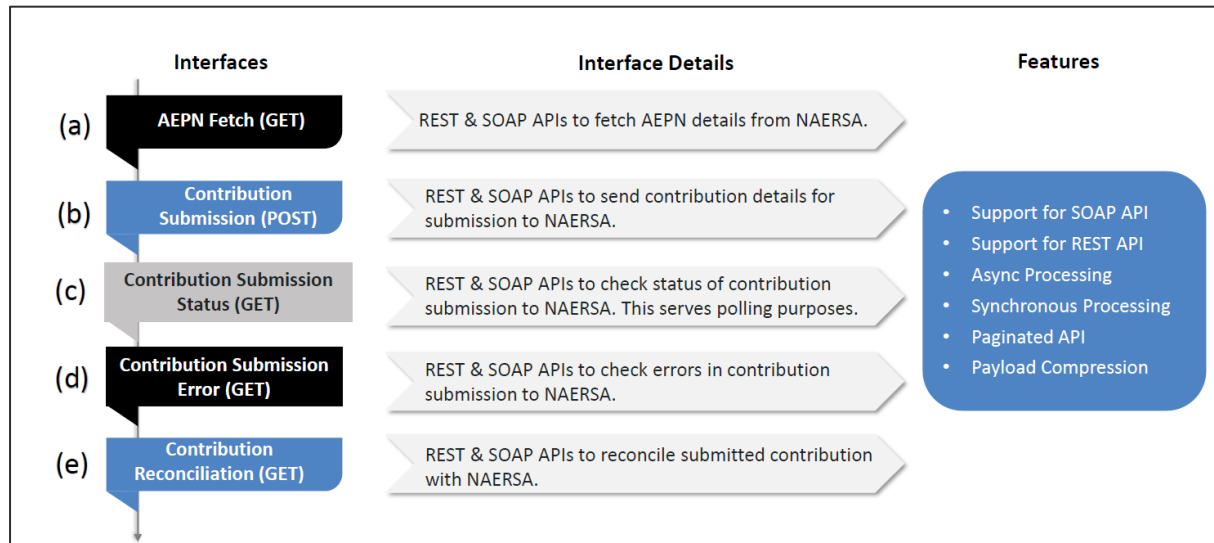

An **API** (Application Programming Interface) is how PeopleXD communicates with NAERSA's systems. Think of it as a secure digital conversation between the two systems.

3.4.2. The Six APIs You'll Use

PeopleXD handles these automatically, but it's helpful to understand what each one does:

API Name	What It Does	When It's Used
AEPN Download	Retrieves enrolment instructions for all employees	Before each payroll run
Contribution Submission	Sends employee/employer contribution details	After completing payroll
Submission Status	Checks if your submission was successful	After transferring contributions
Submission Error Details	Lists any errors that need fixing	When status shows errors
Reconciliation Summary	Provides employer-level totals for a period	For monthly/quarterly reconciliation
Reconciliation Details	Shows employee-level contribution results	For detailed audit trails

3.4.3. How API Communication Works

Important Technical Points

Batch Size Limits:

- Maximum **12,000 records** per submission
- Maximum **8 MB** file size
- Large employers must split submissions into multiple batches

Processing Rules:

- NAERSA processes valid records and rejects only those with errors
- Partial processing is allowed (some records accepted, others rejected)
- You only need to resubmit rejected records

Response Times:

- Most validations occur immediately
- Some processing may take a few minutes
- Always check Submission Status before proceeding

3.5. Key Differences from Regular Payroll

3.5.1. What Makes Auto Enrolment Unique

Aspect	Regular Payroll	Auto Enrolment
Authority	You determine pension eligibility	Only NAERSA determines eligibility
Instructions	Set up once, rarely changes	Must retrieve new instructions every run
Deadline	Payment date (flexible)	6:30 PM on pay date (strict)
Corrections	Can adjust in next payroll	Cannot correct after 6:30 PM
Payment method	Your normal process	Automatic direct debit by NAERSA
Gross pay basis	Pensionable pay (configurable)	Revenue Gross Pay (fixed definition)

3.5.2. Common Questions

Q: Do I need to retrieve AEPNs if all my employees are already in a company pension?

A: Yes. The Department requires all employers to call AEPNs before every payroll run, even if you expect zero enrolments. If the call returns "no records found," you can proceed normally without submitting a contribution file.

Q: What if I have multiple pay groups with different frequencies?

A: Retrieve AEPNs every time you process a payroll. For example:

- Retrieve AEPNs for weekly staff every week
- Retrieve AEPNs for monthly staff every month
- Submit separate contribution files for each pay group

Q: Can I test the API connection before going live?

A: No. NAERSA does not provide a test environment due to GDPR restrictions. All API calls connect to the live production system. However, PeopleXD prevents you from transferring contribution files from non-production environments to avoid accidental submissions.

3.6. What You Need Before Starting

3.6.1. System Requirements

Once these requirements are met, you're ready to process your first Auto Enrolment payroll:

Requirement	Description	Where to Complete
PeopleXD Configuration	Auto Enrolment pay codes, pension schemes, and parameters set up	Section 12.2
ROS Digital Certificate	Valid certificate loaded (same cert used for PAYE Modernisation)	Already in place for PAYE
NAERSA Registration	Employer registered on NAERSA system	NAERSA Employer Portal
Bank Details	Account details provided to NAERSA for direct debit collection	NAERSA Employer Portal
User Permissions	Menu profile assigned for Auto Enrolment functions	Section 17

4. Working with AEPN Instructions

4.1. Understanding How Eligibility is Assessed

4.1.1. The Assessment Process

NAERSA—not you—determines who should be enrolled in Auto Enrolment. Here's how the process works:

1. Data Sharing

- 1.1. Revenue automatically shares payroll data for employees aged 23-60
- 1.2. Only employees with eligible PRSI classes are included (A, B, C, D, H, J)

2. NAERSA Assessment NAERSA evaluates two key criteria:

Assessment	What NAERSA Checks
Earnings Test	Total gross pay across all employments over a rolling 13-week period
Pension Status Test	Whether the employee contributes to any pension scheme (occupational, PRSA, PEPP, RAC, AVC, or ASC)

3. AEPN Issued If an employee meets the eligibility criteria in any employment, NAERSA issues an **AEPN instruction** that you must apply in your next payroll run.

4.1.2. Important Timing Notes

- The first AEPNs for 2026 will be issued in **early December 2025** following Revenue's Q4 assessment
- NAERSA updates AEPNs **nightly** through an automated batch process
- Changes can occur due to:
 - New enrolments
 - Re-enrolments after opt-out periods
 - Rate changes
 - Employees reaching the €80,000 annual earnings limit
 - Opt-outs or suspensions

 **Note: Your obligation:** Always retrieve the latest AEPN before processing each payroll to ensure compliance.

4.2. What is an AEPN?

4.2.1. AEPN Definition

AEPN = Auto Enrolment Payroll Notification

An AEPN is NAERSA's official instruction that tells you exactly what to do for each employee's Auto Enrolment pension.

4.2.2. What Information Does an AEPN Contain?

Each AEPN instruction includes:

Field	What It Tells You
Employee PPSN	Identifies the employee
Employment ID	Specific employment relationship
AEPN Number	Unique identifier tracking status changes
AEPN Status	Current enrolment state (Active, Opted Out, Suspended, etc.)
Employee Rate	Current EE contribution percentage
Employer Rate	Current ER contribution percentage
Download Timestamp	When this instruction was issued

4.2.3. AEPN Status Types

Status	What It Means	Action Required
ACTIVE	Enrolled and contributing	Deduct contributions
OPTED_OUT	Employee has opted out	Stop deductions (0.00% rate)
SUSPENDED	Contributions paused	Stop deductions (0.00% rate)
LEFT_EMPLOYMENT_EXTENDED	Employee left but may receive payments	Continue deductions if payments made
AEL_BREACH	Reached €80,000 annual cap	Stop deductions for remainder of tax year
DE-ENROLMENT	Removal of Employee from AE scheme.	Stop deductions (0.00% rate)

Status	What It Means	Action Required
EXEMPT	Ending of AE scheme for Exempt reason	Stop deductions (0.00% rate)
RETIREMENT	Ending of AE scheme for retirement	Stop deductions (0.00% rate)
DEATH	Ending of AE scheme due to death	Stop deductions (0.00% rate)

4.3. Must I Call AEPNs If All Employees Have Company Pensions?

Yes - This is Mandatory.

The Department requires ALL employers to retrieve AEPNs before every payroll run, regardless of whether you believe any employees are eligible.

4.3.1. What Happens in This Scenario

Situation	AEPN Response	What You Do
No employees eligible	"No records found"	Proceed with normal payroll - no contribution file needed
Some employees eligible	AEPN instructions returned	Apply instructions and submit contribution file

Why this matters: NAERSA may identify employees you didn't expect to be eligible (e.g., due to earnings across multiple jobs). Skipping the AEPN call could result in non-compliance.

4.4. How to Retrieve AEPNs

This process sends a request to **NAERSA** for all **AEPNs** linked to the specified tax registration number. When retrieved, AEPN instructions are first loaded into an **interim (holding) system table** before being applied in payroll as part of the payroll validation run.

The recommended process for retrieving AEPN is as follows:

1. Go to *Payroll Dashboard > Uploads > Load Employee AEPN Certificates*.
2. Enter a Company Reference number in the dropdown *Company* field.
3. Click **OK**.

4.4.1. AEPN Retrieval Rules

Rule	Explanation
Employer-level only	Cannot filter by individual employee or date
Complete download	NAERSA returns all AEPNs every time (even unchanged ones)
Multiple databases	If your payroll spans multiple databases under one tax registration, all AEPNs are returned together
Application is separate	AEPNs are applied at pay group level during payroll validation (not immediately)

4.5. Print NAERSA Exceptions Reports

Once AEPNs are retrieved, the NAESRA AEPN Exceptions report can be printed for your selected company. To print the NAESRA AEPN Exceptions report:

1. Go to *Payroll Dashboard > Uploads > Load Employee AEPN Certificates*.
2. Click the Print **NAESRA Reports** tab.
3. Enter a Company Reference number in the dropdown *Company* field
4. Click **OK**.

The screenshot shows the 'Load Employee AEPN Certificates' window. At the top, there are three tabs: 'Retrieve Employee AEPN', 'Print NAERSA Reports' (which is active), and 'QuickView Employee AEPN'. Below the tabs, there is a 'Company' dropdown menu with the text 'STOKES, STOKES AND STOKES'. A red arrow points to this dropdown. At the bottom of the window, there is a red arrow pointing to the 'OK' button, with a 'CANCEL' button next to it. The 'access PeopleXP' logo is visible at the bottom center.

The NAERSA Report generates to the Report Centre.

NAERSA Report	
Submitted By:	sharon.looney7205
Date:	19-NOV-2025 11:25:47
Report ID:	Pay529
Report Name:	NAERSA Report
Company:	2540

4.5.1. What the Exception Report Shows

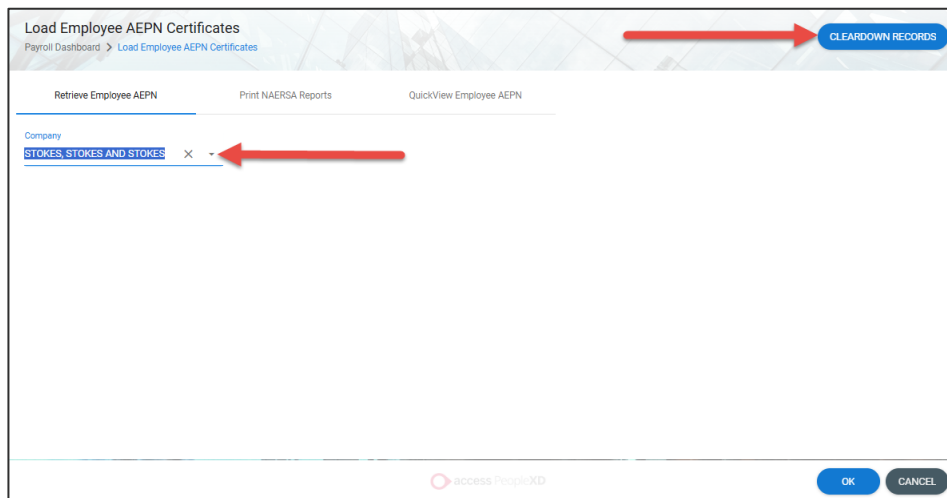

Section	What It Contains
Employees on NAERSA File but not in PeopleXD	Possible new hires or terminated employees still in NAERSA system
Duplicate PPS Numbers	Data quality issues requiring investigation
Employee ID Mismatches	Employment IDs don't match between systems

 **Note:** You should investigate and resolve all exceptions before proceeding with payroll.

4.6. Cleardown AEPN Records

To clear down records in the interim holding table, users can enter the payroll company and clear down the table.

1. Go to *Payroll Dashboard > Uploads > Load Employee AEPN Certificates*.
2. Enter the Company Number in the dropdown Company field.
3. Click **Cleardown Records**.

4.7. QuickView Employee AEPN

The AEPN file from NAERSA is loaded into an **interim holding table** in PeopleXD. The QuickView Employee AEPN screen allows you to view Employee AEPN along with the following details:

- Employment ID
- Employee PPSN
- Employee Reference
- Name
- AEPN Change Event
- EE and ER Rates

4.10. AEPN Events and System Actions

Event	Status	Rate	What Happens in PeopleXD	Key Details
Auto Enrolment	Active	1.5% / 1.5%	Creates new pension record with enrolment date	Triggers when employee first meets eligibility criteria
Opt Out	Opted Out	0.00% / 0.00%	Adds end date, sets rates to zero	Occurs months 7-8 after enrolment/rate change. Employee contribution refunded by NAERSA (ER/State portions remain invested)
Suspension	Suspended	0.00% / 0.00%	Sets rates to zero (no end date)	Employee paused contributions (after 6 months saving). No refund. Pension stays open
Re-enrolment	Active	1.5% / 1.5%	Removes end date, restores rates	Happens after 2-year opt-out period
AEL Breach	Active	0.00% / 0.00%	Sets rates to zero for remainder of tax year	When gross pay reaches €80K. Example: €78.5K by July + €4K in August = NAERSA accepts contributions on €4K that breaches limit, then issues 0.00% AEPN
Next Year post Breach	Active	1.5% / 1.5%	Restores rates in new tax year	Automatic restoration after €80K breach year ends
Rate Change 1	Active	3.0% / 3.0%	Updates rates (Years 4-6)	Contribution increase after 3 years
Rate Change 2	Active	4.5% / 4.5%	Updates rates (Years 7-9)	Contribution increase after 6 years

Auto Enrolment in Ireland - User Guide

Event	Status	Rate	What Happens in PeopleXD	Key Details
Rate Change 3	Active	6.0% / 6.0%	Updates rates (Years 10+)	Final contribution increase after 9 years
Left Employment	Left Employment - Extended	Regular	Keeps pension active for up to 12 months	NAERSA continues issuing AEPNs. Deduct contributions on any post-cessation payments. Only cease when employee stops appearing in AEPN file

5. Applying AEPN Instructions to Payroll

5.1. How AEPN Updates Work

5.1.1. The Two-Stage Process

AEPNs are **retrieved** at employer level but **applied** at pay group level during payroll validation:

Stage	What Happens	When
Stage 1: Retrieval	All AEPNs downloaded for your tax registration number and stored in a temporary holding table	Before payroll processing
Stage 2: Application	AEPNs applied to employee pension records for the specific pay group being processed	During payroll validation (Pay140)

5.1.2. Why Apply at Pay Group Level?

Different pay groups run at different times:

Scenario	Why Pay Group Level Application is Needed
Different pay frequencies	Weekly staff processed every week, monthly staff once per month
Staggered schedules	Pay groups may be at different stages of the payroll cycle
Independent validation	Each pay group validates separately, applying only relevant AEPNs

Example: Company has weekly and monthly pay groups. All AEPNs are retrieved together, but applied separately—once during weekly validation, again during monthly validation.

5.2. Running Payroll Validation

5.2.1. What Happens During Validation

When you run **Payroll Validation (Pay140)** for a pay group, the system automatically:

1. **Matches AEPNs** to employees in the pay group
2. **Creates new pension records** for newly enrolled employees
3. **Reopens existing records** for re-enrolled employees
4. **Updates rates** according to AEPN instructions (including 0.00% for opt-outs/suspensions)

5. **Stores AEPN details** (number and timestamp) for reporting and submission

5.2.2. Viewing the Results

After validation completes, two reports are available:

1. AEPN Update Report:

- 1.1. *Payroll Dashboard > Manage Payroll > Payroll Checking > Control Reports.*
- 1.2. AEPN UPDATE REPORT.

Shows:

- Employees with updated AEPN instructions this period
- Any exceptions that occurred when updating pension records
- Available in PDF and CSV formats

AUTOEN250	Schultz Kristina	1153.85	17.31	1.50	17.31	1.50	
Overall Totals:		5769.25	86.55		86.55		

5.3. Important Timing and Compliance Notes

5.3.1. Critical Deadlines

Requirement	Timing	Consequence
Retrieve AEPNs	Before validation	Incorrect deductions, non-compliance
Submit contribution file	If AEPN retrieved but not submitted	Compliance investigation by NAERSA
Corrections	Before 6:30 PM on pay date	After deadline, rejected by system

5.3.2. Dormant Employees

When an employee leaves, NAERSA continues issuing "Left Employment - Extended" AEPNs with regular contribution rates for **up to 12 months**.

What you must do:

- Continue updating AEPNs for dormant employees if included in the AEPN file
- Apply contributions to any post-cessation payments made during this period
- Only permanently cease Auto Enrolment when employee stops appearing in AEPN file

Note: The 12-month period is determined by NAERSA, not by you.

5.4. PRSI Classes and Auto Enrolment

Only employees with the following PRSI classes are eligible for Auto Enrolment assessment:

Eligible PRSI Classes: A, B, C, D, H, J. Employees on other PRSI classes will not receive AEPN instructions from NAERSA.

5.5. Reporting in Insight

Auto Enrolment data is available in Insight for reporting purposes.

View Name	Business area
AEPN Cert	Pay

Key fields for AEPN reporting:

- AEPN Number
- AEPN Status
- AEPN Download Timestamp
- Employee and Employer contribution rates
- AEPN Change Event

 **Note:** Employers may need to use this view to report on the enrolment date to inform employees that they have been enrolled.

Auto Enrolment History View:

Business Area	Pay
View Name	Auto Enrol Irl History

Key Auto Enrolment History reporting:

- Employment ID
- Line ID
- Submission ID
- EE & ER Contribution

6. Generating and Submitting Contribution Files

6.1. Overview

After completing each payroll run, you must generate and submit a contribution file to NAERSA.

This file reports:

- Employees who received pay
- Gross pay amounts
- Employee and employer contributions calculated
- Payment date

NAERSA uses this information to initiate direct debit collection from your registered bank account.

6.2. Types of Submission Files

File Type	Code	When to Use	Deadline
Normal Submission	O	Standard submission after every payroll run	On or before pay date, 6:30 PM
Full Resubmission	F	Replace entire submission before 6:30 PM deadline	Before 6:30 PM on original pay date
Delete Submission	D	Remove entire submission before 6:30 PM deadline	Before 6:30 PM on original pay date
Previous Period Submission	P	Submit data for an earlier period (late submission)	After 6:30 PM deadline (flags compliance)

Critical Rule: Full Resubmission and Delete files can **only** be processed before 6:30 PM on the pay date. After this time, corrections must be made manually through the NAERSA Employer Portal.

6.3. How to Generate Any Submission File

6.3.1. Common Steps (All File Types)

To Navigate to the Submission File Screen:

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Auto Enrolment Submissions*.
2. Select **Generate Submission File** from the **Auto Enrolment Pension** drop-down menu.

The Process for generating submission files will be the same for each type, selecting alternate submission types will generate the different outputs. To generate submission files:

1. **Select Submission Type** from dropdown:
 - Normal Submission (most common)
 - Full Resubmission
 - Delete Submission
 - Previous Period Submission
2. **Enter Pay Group** and press Enter/Tab
 - Period/Month auto-populates
3. **Set Payment Date**
 - System defaults to: Pay processing date + ESS date paid offset
 - You can override if needed
4. **Optional: Individual Employee**
 - Leave blank to process all employees
 - Or enter Employee Number for single employee submission

5. Click OK

- System generates files and reports

Normal Submission (File Type: O)

Use for: Every standard payroll run

When: After completing payroll and before pay date

Process: Follow common steps in Section 7.3, select "Normal Submission"

Configuration required: None

Full Resubmission (File Type: F)

Use for: Completely replacing a previous submission (e.g., incorrect payment date, wrong PPSN)

Deadline: Before 6:30 PM on the **original** pay date

Configuration required:

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Auto Enrolment Submissions*.
2. Select Pay Group Parameters
3. Enable **Allow Full Resubmission** indicator
4. Click **Save**

Process: Follow common steps in Section 6.3.1, select "Full Resubmission"

Note: After 6:30 PM deadline, use NAERSA Employer Portal for corrections.

Previous Period Submission (File Type: P)

Use for: Late submission of data for an earlier period

When: After 6:30 PM deadline has passed

Configuration required:

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Auto Enrolment Submissions*.
2. Select Pay Group Parameters

3. Enable **Previous Periods** indicator
4. Click **Save**

Process:

1. Follow common steps in Section 6.3.1, select "Normal Submission"
2. Enter the **Previous Period** in the Previous Periods field
3. Set appropriate payment date

Note: Late submissions are flagged for compliance review by NAERSA. Always submit on time when possible.

The screenshot shows the 'Auto Enrolment Submissions' interface. At the top, there's a search bar with '2540' and a magnifying glass icon. Below it, there's a table with columns: 'Pay group', 'Exclude pay group', 'Previous Periods', 'Allow Deletes', and 'Allow Full Resubmission'. The 'Pay group' column shows 'Pay Group 2540'. The 'Previous Periods' column has a blue toggle switch turned on. The 'Allow Deletes' and 'Allow Full Resubmission' columns have grey toggle switches turned off. At the bottom right, there's a green 'SAVE' button. The page also includes a sidebar with links like 'Auto Enrolment Pension', 'Pay Group Parameters', 'Pension Scheme Rules', 'Employee Parameters', 'Auto Enrolment Parameters', and 'Overwrite Submission'.

6.3.2. What Gets Generated

After clicking OK, you receive:

Output	Format	Purpose
Submission File	JSON & CSV	Data to transfer to NAERSA
Control Report	PDF	Summary of totals for reconciliation
Exception Report	PDF	Errors and warnings (if any exist)

6.4. Understanding Reports

6.4.1. Control Report

Shows submission totals for reconciliation:

- Total Revenue Gross Pay
- Total Employee Contributions
- Total Employer Contributions
- Number of employees included

Purpose: Verify totals before transferring to NAERSA

6.4.2. Exception Report

Lists errors and warnings at employee level:

Errors (blocking issues):

- Missing PPSN
- Invalid data that prevents portal update
- Must be corrected before transfer (ideally) or fixed manually on portal after

Warnings (non-blocking issues):

- AEPN number not current
- Optional data missing
- Employee data still updates on portal

Recommended action:

1. Review all errors and warnings
2. Correct issues in PeopleXD where possible
3. Regenerate submission file
4. If error cannot be resolved, note that manual correction on Employer Portal will be required after transfer

6.5. Overriding Submission Data

6.5.1. When to Use Override

Use the Override function to manually correct submission data **before** transferring to NAERSA.

Common scenarios:

- Contribution amount is incorrect

- Need to change reason code (e.g., INPA for insufficient net pay)
- Need to remove an exit date
- Late adjustment that wasn't captured in payroll

6.5.2. How to Override

Navigation:

1. Go to the *Payroll Dashboard > Manage Payroll > Outputs > ROS > Auto Enrolment Submissions*.
2. Select Override Submission

Employer Ref.	Employment ID	Forename	Surname	AEPN Number	AEPN Download	Gross Pay	EE Contribution	ER Contribution	Pay Reason	Link Tax Year	Link Payroll Run	Link Line Item ID	Exit Date
005090	005090	Xavier	Hettinger	1	01-JUL-25	769.23	11.54	11.54					
AUTOEN202	AUTOEN202	Vida	Hegmann	1	24-SEP-25	961.54	14.42	14.42					
AUTOEN202	AUTOEN202	Vida	Hegmann	1	24-SEP-25	961.54	14.42	14.42					
AUTOEN203	AUTOEN203	Adalberto	Becker	1	24-SEP-25	769.23	11.54	11.54					
AUTOEN203	AUTOEN203	Adalberto	Murphy	1	24-SEP-25	769.23	11.54	11.54					
AUTOEN204	AUTOEN204.2	Rogelio	Bini	2	24-SEP-25	1538.46	23.08	23.08					

Steps:

1. **Enter Pay Group Reference**
 - Select a Pay Group from the dropdown Pay Group menu.
 2. **Locate Employee**
 - Use the search field to find your employee
 3. **Edit Fields** (Select Edit from the 3-dot menu):
 - Gross Pay
 - EE/ER contribution amounts
 - Exit date
 - Pay Reason (e.g., INPA, PAADJ, ROEED)
 - Link to previous period (for insufficient net pay recovery)
- a) This screen allows you to edit the following records:
- Gross Pay
 - EE/ER contribution amounts.
 - Exit date
- b) Where a record relates to a previous period, i.e. where insufficient nett pay (INPA) has occurred:
- Pay Reason (e.g., change from blank to INPA).
 - Link Tax Year

- Link Payroll Run Reference
- Link Line-Item ID

4. **Click OK** to save changes
5. **Regenerate submission file** with corrected data
6. **Transfer updated file** to NAERSA

Note:

- You can only use Overwrite Submission before transferring the file to NAERSA.
- Once transferred, the only way to make further changes is via the Employer Portal.
- Overwrites should still match NAERSA's scheme rules, if your amendments create invalid data, NAERSA will reject those lines as errors at an employee level.
- You can regenerate the submission file once. Doing it again will undo your edits and restore the original data.

6.5.3. Removal of an End Date

The override submission screen can be used from the removal of an employee's leave date reported to NAERSA. When removing an employee exit date, use the reason code ROEED.

The screenshot displays the 'Auto Enrolment Submissions' interface. A modal window titled 'Edit Overwrite Submission' is open, showing fields for 'Gross Pay' (1153.85), 'EE Contribution' (17.31), and a 'Pay Reason' dropdown menu. The 'Pay Reason' dropdown is open, showing options: RPA, PAADJ, and ROEED. A red arrow points to the 'ROEED' option. The background shows a table of employee data with columns: Employer Refers..., Employment ID, Forename, Surname, Pay Reason, Link Tax Year, Link Payroll Run Ph..., Link Line Item ID, and Exit Date.

6.6. Special Payroll Scenarios

6.6.1. Supplementary Payroll

Supplementary (off-cycle) payrolls **must** include Auto Enrolment contributions.

Process:

1. Retrieve latest AEPNs before processing supplementary payment
2. Process supplementary payroll (system calculates AE contributions automatically)
3. Generate submission file
4. Transfer to NAERSA on or before payment date

6.6.2. Mid-Month Payments

For organizations using **Allocated Pay Path** (split monthly payment across two dates):

How to check:

1. Go to the *Payroll Dashboard > Settings > Pay Groups*.
2. Enable **Allocated Pay Path** indicator
3. Click **Save**

The screenshot displays the 'Payroll Settings' form, specifically the 'PAYMENT DAYS' and 'SUNDARY PARAMETERS' sections. The 'PAYMENT DAYS' section includes fields for 'Payslips', 'Payslips/Cheques', 'Credit Transfers', 'Personal Cheques', and 'Cheque to Bank', each with a 'Print Order' field. The 'SUNDARY PARAMETERS' section includes fields for 'Temp Allowance Max', 'Payroll ID', 'Currency Identifier', 'RSI Empref Indicator', 'Travel Adj. Days', 'Pay Group Type', 'Service Pav', 'Sundrv Indicator', and 'Pavopath Text'. The 'Allocated Paypath' toggle switch is located in the 'SUNDARY PARAMETERS' section and is currently enabled (green). A red arrow points to the 'Allocated Paypath' toggle switch.

Result: Submission file will show employee across two rows with different payment dates, reflecting the split payment.

Note: Sites not currently using this functionality should not turn it on.

- This section is just to show sites how to check if they are set up this way currently.

6.6.3. Arrears Payments

Arrears are processed on a "**when paid**" basis. The contribution is calculated and submitted in the period the payment is made, not when it was earned.

6.6.4. Payments After Leaving

Post-cessation payments for employees with "Left Employment - Extended" status:

- Continue applying Auto Enrolment contributions for up to 12 months (as assessed by NAERSA)
- NAERSA will continue issuing AEPNs during this period
- Include these payments in your submission file
- Only cease when employee stops appearing in AEPN file

6.7. File Format and Technical Details

6.7.1. Batch Size Limits

- **Maximum 12,000 records** per submission
- **Maximum 8 MB** file size
- Large employers must split into multiple batches

6.7.2. File Contents

Each submission line includes:

Field	Description
Line-Item ID	Unique identifier for this contribution record
Employee PPSN	Employee identifier
Employment ID	Specific employment relationship

Field	Description
Employee Name	First name and family name
Pay Date	When employee is paid
Payment Frequency	Weekly, fortnightly, monthly, etc.
AEPN Number	Current AEPN instruction number
AEPN Download Timestamp	When AEPN was retrieved
Gross Pay	Revenue Gross Pay amount
EE Contribution	Employee contribution amount
ER Contribution	Employer contribution amount
Exit Date	If employee has left (optional)
Pay Reason	INPA, PAADJ, etc. (optional)

6.7.3. Output Formats

All submission files are generated in both:

- **JSON format** (for system transfer)
- **CSV format** (for human review)

Both files save to your selected browse location.

7. Transferring Submission Files to NAERSA

7.1. Overview

After generating a contribution submission file, you must **transfer** it to NAERSA. The transfer process:

1. Sends the file from PeopleXD to NAERSA via secure API
2. Receives acknowledgment and validation results from NAERSA
3. Allows you to check submission status and review any errors

Note: Transferring the file triggers NAERSA to:

- Validate the submission data
- Calculate total contributions due
- Initiate direct debit collection from your registered bank account

7.2. Response Times and Processing

7.2.1. What to Expect

Stage	Timing	What Happens
Transfer acknowledgment	Immediate	System confirms file received
Initial validation	Within seconds	Basic format and structure checks
Full processing	Up to several minutes	Line-by-line validation and status determination
Direct debit initiation	On pay date	NAERSA collects funds from your bank

Note: Responses may not be instant. If no confirmation appears immediately, use the **Run Check** button to refresh the status.

7.3. How to Transfer Submission Files

7.3.1. Step-by-Step Process

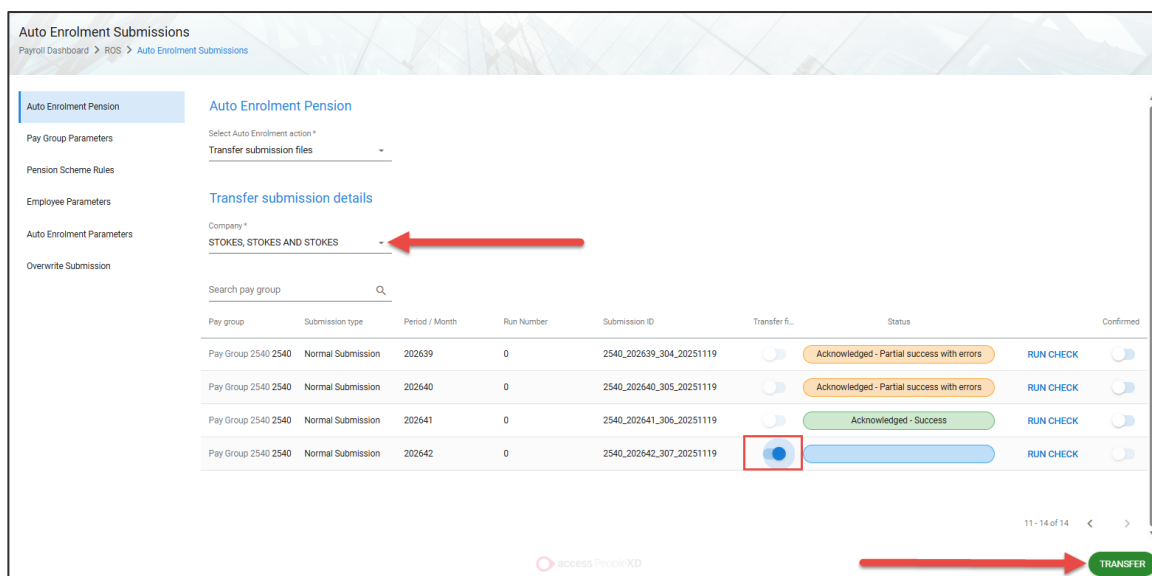

To transfer Submission files navigate to:

1. Go to the *Payroll Dashboard > Manage Payroll > Outputs > ROS > Auto Enrolment Submissions*.
2. Select **Transfer Submission File** from the **Auto Enrolment Pension** drop-down menu.

The screenshot shows the 'Auto Enrolment Submissions' page. On the left is a sidebar with a menu. The 'Auto Enrolment Pension' menu item is selected, and its dropdown is visible. The dropdown contains four items: 'Generate submission file', 'Transfer submission files' (which is highlighted with a red rectangular box and a red arrow pointing to it), 'Contribution Reconciliation Details', and 'Contribution Reconciliation Summary'. Below the dropdown, the main form area has several input fields: 'Pay group' and 'Employee' (both dropdowns), 'Period / Month' and 'Run No' (text inputs), 'Override payment date' and 'Override cheque pay date' (date pickers). At the bottom right of the form is a green 'OK' button.

Steps:

1. **Select from Generate/Transfer dropdown:**
 - Choose "Transfer Submission Files"
2. **Enter Company Reference**
 - Select your Company from the dropdown Company menu.
 - All pay groups for that company appear
3. **Review Available Files**
 - System shows all generated files ready for transfer
 - Displays only pay groups you have access to
4. **Select Files to Transfer**
 - Tick the **Transfer File** checkbox for each file you want to send
 - Each ticked file receives a unique **Submission ID**
5. **Review File Details:**
 - Period/Month: The payroll period just completed
 - File Type: Shows submission type (O, F, D, or P)
 - Submission ID: Unique identifier for this submission
6. **Click Transfer**
 - System sends files to NAERSA
 - Transfer response files save to your selected location

7.3.2. What Gets Generated

After transfer, you receive:

Output	Format	Purpose
Transfer Response File	JSON/CSV	NAERSA's acknowledgment and validation results
Transfer Exception Report	PDF	Lists any errors or warnings (if present)

7.4. Understanding Submission Status

7.4.1. Transfer Status

Immediately after transfer, the **Transfer Status** updates to:

- **Acknowledged:** NAERSA received the file and is processing it
- **Pending:** Still awaiting response (use Run Check to refresh)

7.4.2. Submission Status

Once NAERSA completes validation, **Submission Status** shows one of these results:

Status	What It Means	What to Do
Success	All records accepted, no issues	✓ Complete - no action needed
Success with warnings	All records accepted, but non-critical issues found (e.g., AEPN number mismatch)	Review warnings via Error Details API for information only

Status	What It Means	What to Do
Partial success with errors	Some records accepted, others rejected	Call Error Details API, fix rejected records manually on Employer Portal
Partial success with errors and warnings	Mixed: some accepted, some rejected, some with warnings	Call Error Details API, fix rejected records, review warnings
Error	Fatal error prevented processing (e.g., bad file structure, >12,000 records, missing employer details)	Call Error Details API, correct issues, regenerate and retransfer entire file
In-Progress	File still being validated/processed	Wait and check status again in a few minutes
No Data Found	Submission not found (wrong parameters or not received yet)	Verify identifiers (taxYear, employerReg, payrollRunReference, submissionID) and retry

7.4.3. Checking Transfer Status

If a file has a Transfer Status of 'Pending'. You can click the Run Check button. This requests an update from NAERSA on the Transfer Status of the submission.

The screenshot shows the 'Auto Enrolment Submissions' interface. On the left, there's a sidebar with navigation links: 'Auto Enrolment Pension', 'Pay Group Parameters', 'Pension Scheme Rules', 'Employee Parameters', 'Auto Enrolment Parameters', and 'Overwrite Submission'. The main area is titled 'Auto Enrolment Pension' and contains a 'Select Auto Enrolment action*' dropdown menu with 'Transfer submission files' selected. Below this is a 'Transfer submission details' section with a 'Company*' dropdown menu set to 'STOKES, STOKES AND STOKES' and a 'Search pay group' input field. The main content is a table with columns: 'Pay group', 'Submission type', 'Period / Month', 'Run Number', 'Submission ID', 'Transfer E...', 'Status', and 'Confirmed'. The table lists four submissions. The first two have a status of 'Acknowledged - Partial success with errors' and a 'RUN CHECK' button. The third has a status of 'Acknowledged - Success' and a 'RUN CHECK' button. The fourth has a status of 'Acknowledged -' and a 'RUN CHECK' button. A red arrow points to the 'RUN CHECK' button for the fourth submission. At the bottom right, there's a 'TRANSFER' button and a page indicator '11 - 14 of 14'.

Pay group	Submission type	Period / Month	Run Number	Submission ID	Transfer E...	Status	Confirmed
Pay Group 2540 2540	Normal Submission	202639	0	2540_202639_304_20251119	☐	Acknowledged - Partial success with errors	RUN CHECK ☐
Pay Group 2540 2540	Normal Submission	202640	0	2540_202640_305_20251119	☒	Acknowledged - Partial success with errors	RUN CHECK ☐
Pay Group 2540 2540	Normal Submission	202641	0	2540_202641_306_20251119	☐	Acknowledged - Success	RUN CHECK ☐
Pay Group 2540 2540	Normal Submission	202642	0	2540_202642_307_20251119	☐	Acknowledged -	RUN CHECK ☐

7.5. Handling Errors and Warnings

7.5.1. Reviewing the Transfer Exception Report

If errors or warnings exist, the **Transfer Exception Report** displays automatically after transfer.

Report contents:

Information Shown	Description
Employee name and reference	Identifies which employee has the issue
Specific error or warning message	Describes the problem
Field(s) with issues	Which data element is incorrect
Severity level	Error (blocking) vs Warning (non-blocking)

7.5.2. Understanding Error Types

Type	Impact	Processing Result	Action Required	Examples
Error (Blocking)	Prevents employee record from being processed	Employee contribution will NOT update on Employer Portal	Must be corrected - ideally before transfer, or manually on portal after	- Missing PPSN - Invalid Employment ID - Negative contribution amounts - Required field blank
Warning (Non-Blocking)	Employee record still accepted and processed	Contribution WILL update on Employer Portal	Review for awareness; correction optional	- AEPN number not the latest version - Optional field missing - Data quality concern

7.5.3. What to Do About Errors

Option	When to Use	Process Steps	Pros	Cons
Option 1: Fix Before Transfer (Recommended)	When you have time before the 6:30 PM deadline	1. Review Exception Report after generating file 2. Correct issues in PeopleXD 3. Regenerate submission file 4. Transfer corrected file	• All records accepted on first transfer • Cleaner audit trail • Automated correction	Requires time before deadline
Option 2: Fix After Transfer	When deadline is approaching or issues discovered after transfer	1. Transfer file despite errors 2. Valid records accepted, invalid records rejected 3. Log into NAERSA Employer Portal 4. Manually correct rejected records on portal	• Ensures valid records are processed on time • Can fix errors later	• Manual portal work required • Cannot retransfer same period • More time-consuming

 **Note:** If you fix after transfer, you must use the Employer Portal. You cannot regenerate and retransfer the same period (unless it's a Full Resubmission before 6:30 PM deadline).

7.6. Partial Processing

NAERSA processes submissions on a **line-by-line basis**:

Record Type	NAERSA Action	What You Need to Do
Valid records	Accepted and processed	✓ Nothing - already complete
Invalid records	Rejected at line level	Fix manually on Employer Portal
Other records	Continue to process normally	✓ Nothing - processed successfully

7.6.1. Key Points

- You **don't need to resubmit** the entire file if only some records have errors
- Only **rejected records** need correction
- **Valid records** are already processed and **cannot be changed**

7.6.2. Example Scenario

What Happened	Result
Submitted 100 employees	Total submission
95 accepted	Success
5 rejected (missing PPSN)	Errors
Status displayed	"Partial success with errors"
Action required	Fix the 5 rejected records manually on Employer Portal

7.7. File Rejection vs. Line Rejection

Rejection Type	Common Causes	Status Result	What Gets Processed	Action Required
Entire File Rejected	- File structure is invalid - Exceeds 12,000 record limit - Exceeds 8 MB size limit - Missing required employer-level information - File format errors	"Error"	Nothing - entire submission rejected	Fix the issue, regenerate entire file, and retransfer
Individual Lines Rejected	- Specific employee data is invalid - Missing required fields at employee level - Data validation failures	"Partial success with errors"	Valid records processed, invalid records rejected	Fix only the rejected employees (manually on portal or via next payroll if applicable)

7.8. Important Timing Rules

7.8.1. The 6:30 PM Deadline

Action	Before 6:30 PM on Pay Date	After 6:30 PM on Pay Date
Normal Submissions	✓ Preferred	△ Accepted but flagged as late
Full Resubmissions	✓ Allowed	✗ REJECTED
Delete Submissions	✓ Allowed	✗ REJECTED
Corrections	✗ Cannot be made via system	Must be made manually on Employer Portal

7.8.2. Future-Dated Submissions

You can submit data with **future pay dates**:

Feature	How It Works
Submission	File accepted immediately on submission
Processing	Occurs on the specified pay date (not immediately)
Benefit	Allows advance preparation of payroll submissions

7.9. Key Transfer Reminders

- ✓ **Always check status** - Use Run Check if status doesn't update immediately
- ✓ **Review Exception Report** - Address errors before transferring when possible
- ✓ **Partial processing is normal** - Valid records accepted even if some fail
- ✓ **After 6:30 PM, options are limited** - Full Resubmission and Delete are rejected
- ✓ **Use Employer Portal for post-transfer corrections** - Cannot retransfer same period
- ✓ **File rejection ≠ Line rejection** - Understand the difference and appropriate response
- ✓ **Future dating allowed** - Can submit in advance of pay date
- ✓ **Transfer triggers direct debit** - NAERSA collects funds based on your submission

8. Reconciliation Services

8.1. Overview

NAERSA provides two reconciliation APIs to help you verify that contributions were submitted and processed correctly:

API	Scope	Use Case
Reconciliation Summary	Employer-level totals across tax months	High-level reconciliation for a period
Reconciliation Details	Employee-level results for a specific payroll run	Detailed audit trail and verification

Both APIs confirm whether contributions were accepted, rejected, or settled (paid).

**Note:**

When it comes to NAERSA data, **NAERSA is the single source of truth**, as amendments may occur outside of PeopleXD, for example, refunds, case adjustments, or updates made through the Employer Portal.

8.2. Contribution Reconciliation Details

8.2.1. Purpose

Returns **employee-level** contribution results for a specific payroll run reference. Use this to:

- Verify which employee contributions were accepted
- Identify rejected records (INVALID status)
- Confirm payment settlement (SETTLED status)
- Maintain detailed audit trail
- Investigate discrepancies at individual level

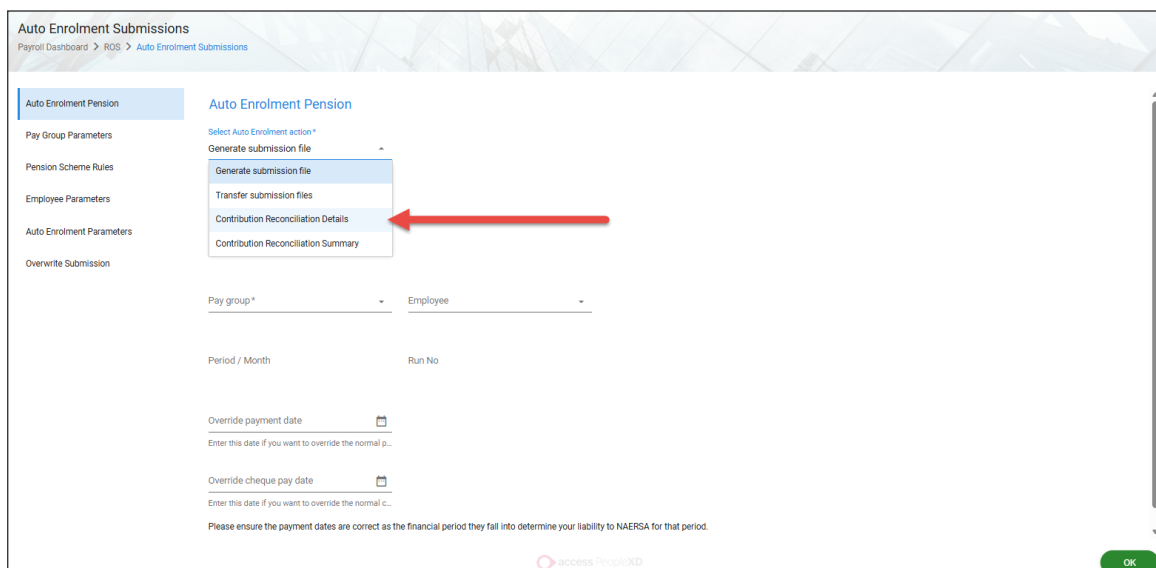

8.2.2. Status Meanings

Status	What It Means
INVALID	Line rejected and not processed (check Error Details API for reason)
CONDUE	Accepted, awaiting payment collection
SETTLED	Payment received and allocated to employee pension pot
Deleted	This record previously existed but has since been deleted.

8.2.3. How to Generate Reconciliation Details

To generate reconciliation details, Navigate to:

1. *Payroll Dashboard > Manage Payroll > Outputs > ROS > Auto Enrolment Submissions.*
2. Select Contribution Reconciliation Details from the Generate/Transfer dropdown menu.

Steps:

1. **Enter Company Reference**
 - Select a Company from the dropdown Company menu.
2. **Select Run Reference**
 - Select a Run Reference from the dropdown Run Reference menu.
 - Format: PayGroup_Period (e.g., "2540_202610")
3. **Click Check**
 - System sends request to NAERSA
 - Processes and returns detailed results
4. **Review Status**

- Payroll Run Status updates to "Success" when complete
- Response files generate to the Report Centre

The screenshot displays the 'Auto Enrolment Submissions' page. On the left, there is a sidebar with navigation links: 'Auto Enrolment Pension', 'Pay Group Parameters', 'Pension Scheme Rules', 'Employee Parameters', 'Auto Enrolment Parameters', and 'Overwrite Submission'. The main content area is titled 'Auto Enrolment Pension' and includes a 'Select Auto Enrolment action*' dropdown set to 'Contribution Reconciliation Details'. Below this, there are fields for 'Company*' (STOKES, STOKES AND STOKES) and 'Run reference*' (2540_202642). A 'Search play group' field is also present. A table lists submission details with columns: 'Play group', 'Period / Month', 'Submission type', 'Batch no.', 'Submission status', 'Payroll run status', and 'Confirmed'. The first row shows 'Play Group 2540 2540', '202642', 'Normal Submission', and a 'Success' status in a green box. A red arrow points to this 'Success' status. At the bottom right, there is a 'CHECK' button in a green box, also indicated by a red arrow. The page footer shows '1 - 1 of 1' and a small 'access Point ID' icon.

8.2.4. Output Files

File	Format	Contents
Reconciliation Details	JSON & CSV	Employee-level contribution status, amounts, and settlement details

8.2.5. What the Details Include

For each employee:

- Employee PPSN and Name
- Employment ID
- Gross Pay
- Employee Contribution
- Employer Contribution
- Pay Date
- Status (INVALID, CONDUE, or SETTLED)
- Exit Date (if applicable)
- Pay Reason (INPA, PAADJ, etc.)

8.3. Contribution Reconciliation Summary

8.3.1. Purpose

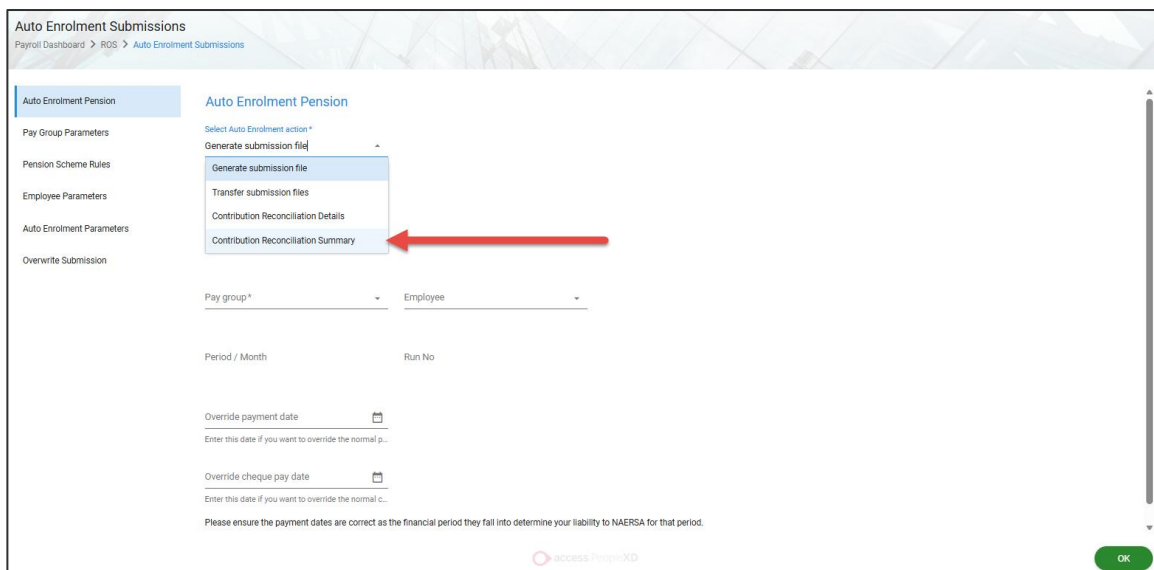

Returns **employer-level totals** across specified tax months. Use this to:

- View high-level contribution totals for a period
- Support monthly/quarterly reconciliation
- Compare against payroll reports
- Provide summary for financial reporting
- Avoid retrieving detailed employee records when not needed

8.3.2. How to Generate Reconciliation Summary

To generate Reconciliation Summary, Navigate to:

1. *Payroll Dashboard > Manage Payroll > Outputs > ROS > Auto Enrolment Submissions.*
2. Select Contribution Reconciliation Summary from the Generate/Transfer dropdown menu.

The screenshot shows the 'Auto Enrolment Submissions' interface. On the left, there is a sidebar with a menu containing 'Auto Enrolment Pension', 'Pay Group Parameters', 'Pension Scheme Rules', 'Employee Parameters', 'Auto Enrolment Parameters', and 'Overwrite Submission'. The main area is titled 'Auto Enrolment Pension' and contains a dropdown menu labeled 'Select Auto Enrolment action*'. The dropdown menu is open, showing options: 'Generate submission file', 'Transfer submission files', 'Contribution Reconciliation Details', and 'Contribution Reconciliation Summary'. A red arrow points to the 'Contribution Reconciliation Summary' option. Below the dropdown, there are fields for 'Pay group*' and 'Employee', and a 'Run No' field. There are also date pickers for 'Override payment date' and 'Override cheque pay date'. At the bottom, there is a note: 'Please ensure the payment dates are correct as the financial period they fall into determine your liability to NAERSA for that period.' and an 'OK' button.

Steps:

1. **Enter Company Reference**
 - Select a Company from the dropdown Company menu.
2. **Select Tax Month**
 - Choose the month to reconcile from dropdown menu
 - Select a Tax Year.
3. **Click Check**

- System sends request to NAERSA
- Returns aggregated totals

4. Review Results

- Response files are sent to the Report Centre

The screenshot shows the 'Auto Enrolment Submissions' interface. On the left is a sidebar with navigation links: 'Auto Enrolment Pension', 'Pay Group Parameters', 'Pension Scheme Rules', 'Employee Parameters', 'Auto Enrolment Parameters', and 'Overwrite Submission'. The main area is titled 'Auto Enrolment Pension' and contains a 'Contribution Reconciliation Summary' section. Within this section, a red box highlights the 'Reconciliation details' area, which has three dropdown menus: 'Company *' (selected: STOKES, STOKES AND STOKES), 'Month *' (selected: October), and 'Year *' (selected: 2025). At the bottom right of the interface, there is a green 'CHECK' button, with a red arrow pointing towards it from the left.

8.3.3. Output Files

File	Format	Contents
Reconciliation Summary	JSON & CSV	Aggregated totals by tax month

8.3.4. What the Summary Includes

For each tax month:

- Total Gross Pay
- Total Employee Contributions
- Total Employer Contributions
- Number of Records Submitted
- Tax Year
- Tax Month

8.4. Common Reconciliation Scenarios

8.4.1. Scenario 1: Monthly Reconciliation

Goal: Verify all monthly submissions were processed correctly

Process:

1. Run **Reconciliation Summary** for the tax month
2. Compare totals against your payroll reports
3. If discrepancy found, run **Reconciliation Details** for specific payroll runs
4. Identify and correct any issues

8.4.2. Scenario 2: Investigating Rejected Records

Goal: Find out why some employee records were rejected

Process:

1. Run **Reconciliation Details** for the payroll run reference
2. Filter for status = "INVALID"
3. Review Error Details API for rejection reasons
4. Correct on NAERSA Employer Portal

8.4.3. Scenario 3: Payment Settlement Verification

Goal: Confirm NAERSA collected and allocated contributions

Process:

1. Run **Reconciliation Details** for payroll run
2. Check status for each employee
3. **CONDUE** = payment pending
4. **SETTLED** = payment completed and allocated

8.4.4. Scenario 4: Year-End Audit

Goal: Verify all contributions for the tax year

Process:

1. Run **Reconciliation Summary** for all tax months in the year
2. Export CSV files for each month
3. Aggregate totals

4. Compare against financial records
5. Investigate any discrepancies using Details API

8.5. Troubleshooting Reconciliation Issues

8.5.1. Issue: "No Data Found" Response

Possible causes:

- Incorrect tax year entered
- Wrong employer registration number
- Payroll run reference doesn't exist
- Submission not yet received by NAERSA

Solution:

- Verify all identifiers are correct
- Check submission was transferred successfully
- Allow time for NAERSA processing

8.5.2. Issue: Totals Don't Match Payroll Reports

Possible causes:

- Some records rejected (status = INVALID)
- Late submission not yet processed
- Data correction made on Employer Portal not reflected

Solution:

- Run Reconciliation Details to see line-level status
- Check for INVALID records
- Verify all submissions were successful

8.5.3. Issue: Records Still Show CONDUE

Possible causes:

- Direct debit collection hasn't occurred yet
- Payment date hasn't arrived
- Banking processing time

Solution:

- Check after pay date has passed

- Allow 1-2 business days for settlement
- Contact NAERSA if status doesn't update

8.6. Reconciliation Best Practices

- ✓ **Reconcile regularly** - Monthly reconciliation catches issues early
- ✓ **Keep CSV exports** - Maintain audit trail for compliance
- ✓ **Check settlement status** - Verify CONDUE records become SETTLED
- ✓ **Investigate INVALID records** - Follow up on rejected contributions
- ✓ **Use Summary first** - Start with high-level view, drill down to Details if needed
- ✓ **Compare against payroll** - Cross-check totals with internal reports
- ✓ **Document discrepancies** - Keep records of issues and resolutions

9. Auto Enrolment Contribution Calculations

9.1. Understanding the Contribution Rules

9.1.1. Key Differences from Other Pensions

Feature	Regular Company Pension	Auto Enrolment
Tax Relief	Yes - pre-tax deduction	No - post-tax deduction (like a sundry deduction)
Pensionable Pay Basis	Configurable (can exclude bonuses, overtime, BIK)	Revenue Gross Pay (includes ALL taxable pay)
Rate Setting	Employer decides	NAERSA sets rates via AEPN
Annual Cap	Usually none	€80,000 per tax year as assessed by NAERSA

9.1.2. Contribution Rates Over Time

Period	Employee	Employer	State	Total
Years 1-3	1.5%	1.5%	0.5%	3.5%
Years 4-6	3.0%	3.0%	1.0%	7.0%
Years 7-9	4.5%	4.5%	1.5%	13.5%
Years 10+	6.0%	6.0%	2.0%	14.0%

Example: Employee earning €20,000/year in Years 1-3:

- Employee pays: €300/year (€25/month)
- Employer pays: €300/year (€25/month)
- State adds: €100/year (€8.33/month)
- **Total saved: €700/year**

9.2. What is Revenue Gross Pay?

Revenue Gross Pay = All pay included in your Revenue Payroll Submission Return (PSR)

This includes all taxable payments which you might normally exclude from regular pension schemes such as:

- Company Car (BIK)
- Medical Insurance (BIK)
- Other benefits

 **Note:** You cannot configure what's included. If Revenue taxes it, Auto Enrolment calculates on it.

9.2.1. Annual Cap: €80,000

Contributions stop when gross pay reaches **€80,000 in a tax year**.

How it works:

1. NAERSA monitors total gross pay through Auto Enrolment Contribution Submission files returned
2. When €80K reached, NAERSA issues AEPN with 0.00% rates
3. Contributions automatically resume in next tax year

Example:

- July: Employee has earned €78,500 YTD
- August: Employee earns €4,000 (total now €82,500)
- **NAERSA Action:** Accepts contributions on the €4,000 that breaches €80K, then issues 0.00% AEPN
- Next tax year: Contributions resume automatically

 **Note:** Employers should take care when making any large payments (such as stock or bonus payments) via payroll as EE/ER Auto Enrolment will apply on the full payment amount if the employee has not yet exceeded the 80k threshold.

9.3. Calculation Examples by Pay Frequency

9.3.1. Monthly Paid Employee

Gross Pay: €4,000/month

Contribution	Calculation	Amount
Employee	$€4,000 \times 1.5\%$	€60.00
Employer	$€4,000 \times 1.5\%$	€60.00
State (via NAERSA)	$€4,000 \times 0.5\%$	€20.00
Total to pension		€140.00

9.3.2. Weekly Paid Employee

Gross Pay: €500/week

Contribution	Calculation	Amount
Employee	$€500 \times 1.5\%$	€7.50
Employer	$€500 \times 1.5\%$	€7.50
State (via NAERSA)	$€500 \times 0.5\%$	€2.50
Total to pension		€17.50

9.3.3. Annual Breakdown Example

Employee earning €30,000/year:

Year Range	Rate	Employee Annual	Employer Annual	State Annual	Total Annual
Years 1-3	1.5% / 1.5% / 0.5%	€450	€450	€150	€1,050
Years 4-6	3.0% / 3.0% / 1.0%	€900	€900	€300	€2,100
Years 7-9	4.5% / 4.5% / 1.5%	€1,350	€1,350	€450	€3,150
Years 10+	6.0% / 6.0% / 2.0%	€1,800	€1,800	€600	€4,200

9.4. Special Calculation Scenarios

9.4.1. Supplementary Payroll

Rule: Auto Enrolment contributions **must be calculated** on all supplementary (off-cycle) payments.

Process:

1. Retrieve latest AEPNs before processing supplementary payment
2. System automatically calculates contributions if employee has AE pension
3. Generate and submit contribution file on or before payment date

Applies to:

- Bonus payments
- Arrears payments
- Commission payments
- Any off-cycle payment

9.4.2. Arrears Payments

Rule: Arrears are calculated on a "**when paid**" basis, not when earned.

Scenario	Correct Period for Contribution
€1,000 owed from March, paid in June	June payroll (when actually paid)
Backdated pay increase from January, paid in April	April payroll (when actually paid)

9.4.3. Grossing Up

When applicable: Employee's net pay is contractually guaranteed (net pay agreement)

What happens: System automatically calculates additional gross pay needed to ensure employee receives guaranteed net amount after Auto Enrolment deductions.

Note: No manual intervention required - system handles automatically.

9.4.4. Insufficient Net Pay

Scenario: Employee doesn't have enough net pay to cover Auto Enrolment deduction.

Result: Shortfall can be recovered in a future payroll period.

See: Section [10. Insufficient Net Pay](#) for detailed handling of insufficient net pay scenarios.

9.5. Deduction Priority in Payroll

Auto Enrolment deductions are processed in a specific order:

Priority	Deduction Type	Notes
1	Tax (PAYE)	Deducted first
2	PRSI	Deducted second
3	Auto Enrolment	Deducted third
4	Court orders and attachments	Deducted after AE

Note: Auto Enrolment is deducted **after** tax and PRSI but **before** court orders.

9.6. Key Calculation Reminders

Rule	Explanation
No tax relief	Auto Enrolment is a post-tax deduction (like sundry deductions)
Revenue Gross Pay basis	Includes ALL taxable pay elements (bonuses, overtime, BIK) - not configurable
€80K annual cap	NAERSA monitors and issues stop instruction automatically when reached
Supplementary payrolls included	All payments require contributions
Deducted after tax/PRSI	But before court orders
Rounding to 2 decimals	Standard rounding rules apply (≥ 0.5 rounds up)
"When paid" basis	Arrears calculated in period actually paid, not when earned
Rates set by NAERSA	You cannot change contribution percentages

10. Insufficient Net Pay

10.1. What is Insufficient Net Pay?

Insufficient Net Pay occurs when an employee doesn't have enough net pay remaining (after tax, PRSI, and other deductions) to cover their Auto Enrolment contribution.

10.1.1. When This Happens

Scenario	Example
Low hours worked	Part-time employee works only a few hours in the period
High deductions	Multiple court orders or attachments reduce net pay significantly
Unpaid leave	Employee on partial unpaid leave
Negative net pay	Total deductions exceed gross pay

 **Note:** Auto Enrolment contributions are deducted **after** tax and PRSI but **before** court orders.

10.2. How the System Handles Shortfalls

10.2.1. Automatic Processing

When insufficient net pay occurs:

1. **System calculates** the Auto Enrolment contribution as normal
2. **Identifies shortfall** if net pay insufficient to cover full amount
3. **Deducts partial amount** (or zero if no net pay available)
4. **Records shortfall** for future recovery
5. **Generates submission** with reason code **INPA**

10.2.2. What Gets Submitted to NAERSA

Field	Value When Insufficient Net Pay
Gross Pay	Full amount employee earned
Employee Contribution	Actual amount deducted (may be partial or zero)
Employer Contribution	Full calculated amount (not affected by employee shortfall)
Pay Reason	INPA (Insufficient Net Pay Amount)

 **Note:** Employer contribution is **always calculated and submitted in full**, regardless of employee shortfall.

10.3. 11.3 Reason Codes

The Two Reason Codes for Net Pay Issues

Code	Full Name	When Used	What It Means
INPA	Insufficient Net Pay Amount	When shortfall first occurs	Contribution is lower than expected due to insufficient, zero, or negative net pay. The remaining amount will be adjusted in the next payroll.
PAADJ	Pay Adjustment	When recovering previous shortfall	Used to submit a higher contribution in a later payroll run to make up for a previous INPA shortfall.

10.4. Recovering Shortfalls

When recovering a shortfall, you must **link back to the original INPA submission**.

 **Note:**
If the link to the original INPA submission is missing, NAERSA will ignore the adjustment and calculate the direct debit based on its own assessment.

Example:

Shortfall submission 1:

Auto Enrolment in Ireland - User Guide

Run Reference	Tax Year	Line Item ID	PPSN	Pay Date	Gross Pay	ER Contr	EE Contr	Reason Cd	Linked Reference	Linked Line Item ID	Linked Tax Year
JAN-2025	2025	12345	1234567X A	14-Jan-2025	€1,000.0 0	€15.00	€5.00	INPA			

Shortfall submission 2:

Run Reference	Tax Year	Line Item ID	PPSN	Pay Date	Gross Pay	ER Contr	EE Contr	Reason Cd	Linked Reference	Linked Line Item ID	Linked Tax Year
FEB-2025	2025	42356	1234567X A	14-Jan-2025	€1,000.0 0	€15.00	€5.00	INPA			

Adjustment in subsequent period:

Run Reference	Tax Year	Line Item ID	PPSN	Pay Date	Gross Pay	ER Contr	EE Contr	Reason Cd	Linked Reference	Linked Line Item ID	Linked Tax Year
MAR-2025	2025	23456	1234567X A	14-Jan-2025	€1,000.0 0	€15.00	€15.00				
MAR-2025	2025	23457	1234567X A	14-Jan-2025	€0.00	€0.00	€10.00	PADJ	JAN-2025	12345	2025
MAR-2025	2025	23458	1234567X A	14-Jan-2025	€0.00	€0.00	€10.00	PADJ	FEB-2025	42356	2025

Where an employee has insufficient nett pay the submission file outputs a reason code of 'INPA'. You can view this on the Payroll Submission File.

Json Example:

```

2:
lineItemID: "AUTOEN098_202517_49900"
employeePPSN: "71156835A"
employmentID: "AUTOEN098"
employeeFirstName: "Lowell"
employeeFamilyName: "Morissette"
payDate: "2025-04-16"
frequency: "Monthly"
aepnNumber: "1"
aepnDownloadDateTime: "2025-07-17 15:20:48"
grossPay: 1000
erContribution: 150
eeContribution: 50
payReason: "INPA"

```

The Pay Reason field can also be viewed on the Override Submission screen.

Auto Enrolment Submissions												
Payroll Dashboard > ROS > Auto Enrolment Submissions												
Auto Enrolment Parameters	Pay Group: Pay Group 2540											
Pay Group Parameters	Overwrite Submission											
Payroll Scheme Rules	Search:											
Employee Parameters												
Auto Enrolment Parameters												
Overwrite Submission	Employment Reference	Employment ID	Forename	Surname	AEPN Number	AEPN Download Date	Gross Pay	ER Contribution	EE Contribution	Pay Reason	Link Tax Year	Link Payroll Run ID
	AUTOEN043	AUTOEN043A	Hyman	Jakubowski	1	18-NOV-25	1153.85	17.31	17.31			
	AUTOEN044	AUTOEN044A	Jonathan	Polich	1	18-NOV-25	1153.85	17.31	17.31			
	AUTOEN046	AUTOEN046A	Randy	Morar	1	18-NOV-25	100	0	1.5	INPA		
	AUTOEN048	AUTOEN048A	Dion	Gaughey	1	18-NOV-25	1153.85	17.31	17.31			
	AUTOEN050	AUTOEN050A	Kristina	Schultz	1	18-NOV-25	1153.85	17.31	17.31			

Note: The system will attempt to automatically report insufficient nett pay and subsequent recoupment in line with NAERSA requirements where all payroll periods have been processed in PeopleXD. If previous payroll periods have not been processed in PeopleXD, employers must manage these cases either by using the override submission screen or by submitting a manual return to NAERSA through the employer portal.

11. Employer Obligations

11.1. Register with NAERSA

In addition to the required PeopleXD configuration steps, employers must also register with NAERSA. As part of the registration process, employers must provide bank details through the Employer Portal. These details will be used to facilitate the collection of Auto Enrolment contributions via Direct Debit. All queries relating to this registration process should be directed to the NAERSA helpdesk.

11.2. Apply latest AEPNs

Employers are obligated to ensure they retrieve the latest AEPN instruction every time they are making a new payment.

11.3. Immediate Pay Over

Employers are obligated to ensure they send a contribution submission report on or before the employee's payment date. The Department will raise a direct debit to collect the EE/ER contribution funds based on the information provided in that contribution submission report and the bank details ER registered with when signing up via the Employer Portal for the auto enrolment system.

11.4. Payslips

The Department have requested *MyFuture Fund* is used as the payslip description for auto enrolment contributions being deducted.

Tax Treatment: Auto Enrolment is NOT a pre-tax deduction, so it will not build up under pre-tax deduction cumulatives on the payslip.

Display Name: The system should display the scheme as "MyFuture Fund" on payslips but not Mandatory, The Department advised that there is no legal obligation to state the ER auto enrolment contribution on the payslip.

Note:

Sites with a custom payslip or cheques may need to assess if they need to arrange for new statutory and a software change request to cater for the auto enrolment requirements. Employers should discuss this with their account manager.

11.4.1. ESS Payslips Example

Hyman Jakubowski House Street Town IRELAND Cost Centre: Cost Centre 1 7272		Personnel No: AUTOEN243 PPS Number: 7125231MA Pay Group: Pay Group 2540 Payslip Date: 21-NOV-26 Pay Period: 202638 Reg No:9039768PH Company name: STOKES, STOKES AND STOKES

Gross Pay for PAYE:	1,153.85			

Net Pay	EUR 534.24	Message from your Employer
---------	------------	----------------------------

11.5. Employee Notification Requirements

Employers must inform employees of their enrolment date in a timely manner.

 **Note:** Including information on the payslip alone is **not acceptable** per the Department. Separate communication is required.

11.5.1. Notification Methods

Method	How To
PeopleXD Letter/EMS Module	Configure templates and automate notifications from within PeopleXD
Manual Process	Use Insight reporting to identify enrolled employees, then notify via your own process

11.5.2. Emails/Letters

 **Note:** Employers must notify employees of their enrolment and the enrolment date.

The Department has advised that including this information on the employee's payslip is not acceptable. Employers should therefore arrange to send separate communications, such as emails or letters, to inform employees of their enrolment and the changes.

NAERSA Letter Template

Below is a template of provided by NAERAS:

Subject: Welcome to MyFutureFund

Welcome to MyFutureFund

Dear [first name, surname name]

We are pleased to inform you that you have been automatically enrolled in MyFutureFund on [Scheme Enrolment Date] based on your employment with employer [Employer Name]. Your Personal Public Service number (PPSN) is [PPSN number].

How MyFutureFund works

- You now have a MyFutureFund account. It's like a savings account. You, your employer and the State pay money into it. This money belongs to you. It's invested for your future and remains in your account until you reach State Pension Age, when it can be drawn down.
- You pay a percentage of your gross earnings in each pay period. This is deducted from your net pay automatically. Your employer matches your contribution in each pay period on top of your normal earnings, and the State will contribute one-third of your contribution in each pay period.
- These contributions will change as follows:

	Employee	Employer	State
January 2026- December 2028	1.5%	1.5%	0.5%
January 2029 to December 2031	3%	3%	1%
January 2032- December 2034	4.5%	4.5%	1.5%
January 2035 onwards	6%	6%	2%

Your contributions will be invested in the default strategy. (See New Member Guide on www.myfuturefund.ie website for more information)

All contributions to MyFutureFund will stop once you reach State Pension Age, currently 66. You will be able to draw down your savings from MyFutureFund on 66.

You can opt out of MyFutureFund during the opt-out period, in months seven and eight, after you have been saving for six months. If you opt out, your contributions will stop and so will contributions from your employer(s) and the State, and as a result, your retirement savings will be lower. You may want to take financial advice to help you make this decision as it's important to understand what you may miss out on.

If you start to contribute to another qualifying retirement savings scheme through payroll, this employment will become exempt and your contributions to MyFutureFund in this employment will stop.

To learn more about MyFutureFund along with some important timelines, you can refer to the New Member guide on www.myfuturefund.ie.

Yours sincerely,

[Employer signature]

11.5.3. Event Management System

Overview

AEPN Email Trigger

Auto Enrolment notification emails are sent only when a new AEPN number is generated by NAERSA. A new AEPN number is created when an employee receives a new Auto Enrolment event. For example, when they first meet the eligibility criteria and must be enrolled in MyFutureFund.

Actions That Do Not Trigger an Email

Manually adding an Auto Enrolment pension record on the employee screen does not create a new AEPN number. Because no new AEPN number is generated in this case, no email notification is sent.

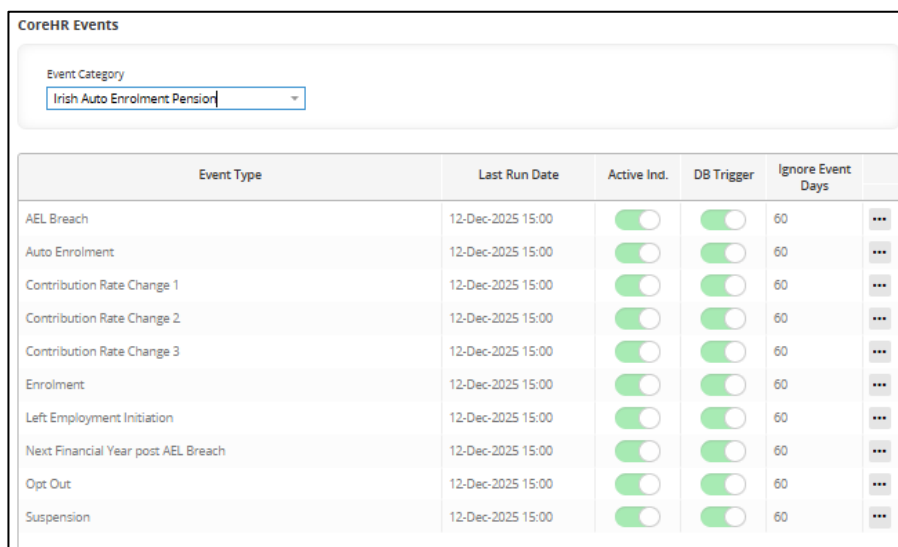

Email Queueing

Once a new AEPN number has been received and the Complete Update process has finished, the related Auto Enrolment email event is automatically added to the EMS email queue for delivery.

Configuration Requirements

An EMS event for Auto Enrolment has been added to the Events Categories:

1. Go to *People Management > Data Centre > View All > HR Event Configuration*
2. Select Auto Enrolment Pension from the Event Category dropdown menu.

Event Type	Last Run Date	Active Ind.	DB Trigger	Ignore Event Days	
AEL Breach	12-Dec-2025 15:00	☒	☒	60	...
Auto Enrolment	12-Dec-2025 15:00	☒	☒	60	...
Contribution Rate Change 1	12-Dec-2025 15:00	☒	☒	60	...
Contribution Rate Change 2	12-Dec-2025 15:00	☒	☒	60	...
Contribution Rate Change 3	12-Dec-2025 15:00	☒	☒	60	...
Enrolment	12-Dec-2025 15:00	☒	☒	60	...
Left Employment Initiation	12-Dec-2025 15:00	☒	☒	60	...
Next Financial Year post AEL Breach	12-Dec-2025 15:00	☒	☒	60	...
Opt Out	12-Dec-2025 15:00	☒	☒	60	...
Suspension	12-Dec-2025 15:00	☒	☒	60	...

3. Select Edit next to an Event Type.

The screenshot shows the 'Event Maintenance' window with the 'Event Type' section. The 'Event Type Name' is 'Auto Enrolled', 'Last Run Date' is '19-Nov-2025 16:01', and 'Description' is 'Auto Enrolled'. The 'Database Trigger' is enabled, 'Active Indicator' is enabled, and 'Ignore Event Days' is set to 60. Below these are seven toggle switches for 'Run On' days: Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, and Sunday. The 'Event Notifications' section shows a table with one notification:

Notification ID	Subject	Active	Test Mode	Notification Type	Recipient	No Of Days	Before / After
AUTEN001-001	Auto-enrolment into a pension scheme	☒	☐	EMPLOYEE		0	Before

4. Click Edit to Edit an existing Notification or Select the **Add New Notification** button. The Event Notification screen opens.

The screenshot shows the 'Event Notification' window. The 'Notification ID' is 'AUTEN001-001 - Auto Enrolled'. There is a 'View Test Email' button. Below are fields for 'Generate Notification' (set to 0), 'Days' (set to Before), 'Active Indicator' (enabled), and 'Test Mode Indicator' (disabled). At the bottom, there are tabs for 'Recipient', 'Message', and 'Conditions'. The 'Notification Type' dropdown is set to 'Employee'.

5. Use the Configure Subject and Configure Message buttons to configure the notification subject and body - for each select the view from the Select Data Source dropdown, insert your Subject Text and Message Text, and add the Available Items as required.
6. Ensure that the Active Indicator is selected and click on Save Changes

12. Auto Enrolment Configuration

12.1. Overview

Before processing your first Auto Enrolment payroll, you must configure PeopleXD with the necessary pay codes, pension schemes, and system parameters.

12.1.1. Pre-Configuration Checklist

Before you start the following configuration steps in PeopleXD, make sure:

#	Task	Status
1	Your organisation is registered with NAERSA via the Employer Portal (including bank details for direct debit).	☐
2	Ensure you have a valid ROS Digital Certificate for API authentication. This is the same certificate used for Pay Modernisation and does not need to be reloaded into PeopleXD	☐
3	Your payroll teams understand AEPN processing.	☐
4	You know whether you need just one global scheme or multiple schemes for costing/reporting.	☐

12.1.2. Configuration Checklist

Use this checklist to ensure all configuration steps are complete before go-live:

Step	Task	Status
1	Create employee contribution pay code	☐
2	Create employer contribution pay code	☐
3	Create Auto Enrolment pension scheme	☐
4	Enable Irish Auto Enrolment indicator on scheme	☐
5	Set default pension scheme in rules	☐
6	Configure pay group parameters (if excluding groups)	☐
7	Configure employee parameters (if excluding employees)	☐
8	Review Auto Enrolment parameters	☐
9	Configure proxy settings (if applicable)	☐
10	Configure salary sacrifice pay codes (if applicable)	☐

Step	Task	Status
11	Set up general ledger integration	☐
12	Assign menu profile to users	☐
13	Verify IT requirements met	☐
14	Register with NAERSA (external)	☐

12.2. Create Pay Codes for Auto Enrolment

You need to create **new** two pay codes: one for employee contributions and one for employer contributions.

 Note:

Using new pay codes is essential, as existing employee and employer codes may be configured for PAYE Modernisation. Reusing them could result in incorrect Auto Enrolment reporting to Revenue and impact the AEPNs issued.

12.2.1. Employee Contribution Pay Code

To create Auto Enrolment Pay Codes for the Employee Contribution

1. Go to Payroll Dashboard > Settings > Pay Code
2. Search for a current Employee Pension deduction pay code you want to copy.
3. Select the 3-dot menu and select Clone.
4. Populate the new pay code number in the New Pay Code field and click OK.
5. You can now edit the new pay code by going to the 3-dot menu and clicking edit.
6. The employee contribution pay code should be set to pre taxable.

 Note:

The employee pension deduction pay code should be set up as follows:

- Pre -Taxable
- Non - PRSlable
- Non - USCable

Once the Irish Auto Enrolment Pension Scheme is configured, it becomes Non-Taxable under relief-at-source rules i.e., contributions are a deduction from Nett Pay.

Example:

Pay Code	Description	Type	Subset Type	Summary	Last Edited
7582	MY FUTURE FUND EE	Deduction	Value	The Deduction, 7582 - MY FUTURE FUND EE is Pre Tax, Non-PRSIable, Non-Pensionable EE, Non-Pensionable ER, Non-USCable	06-Nov-2023 By: COREHR

12.2.2. Employer Contribution Pay Code

To create Auto Enrolment Pay Codes for the Employer Contributions

1. Go to Payroll Dashboard > Settings > Pay Code
2. Search for a current Employer Pension deduction pay code you want to copy.
3. Select the 3-dot menu and select Clone.
4. Populate the new pay code number in the New Pay Code field and click OK.
5. You can now edit the new pay code by going to the 3-dot menu and clicking edit.

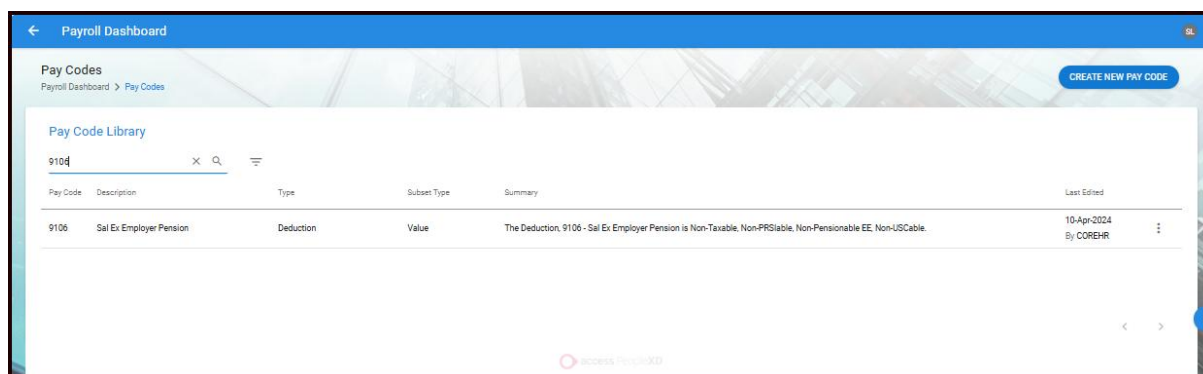

Note:

The employer pension Contribution pay code should be set up as follows:

- Non -Taxable
- Non - PRSIable
- Non – USCable

The Analysis Code on the Employer Pension Contribution pay code should be linked to the Analysis Type = 'EN'.

Example:

Pay Code	Description	Type	Subset Type	Summary	Last Edited
9106	Sal Ex Employer Pension	Deduction	Value	The Deduction, 9106 - Sal Ex Employer Pension is Non-Taxable, Non-PRSIable, Non-Pensionable EE, Non-USCable	10-Apr-2024 By: COREHR

12.3. Create an Auto Enrolment Pension Scheme

To create an Auto Enrolment Pension Scheme:

1. Go to *Payroll Dashboard > Settings > Pension Scheme*.
2. Enter an existing Irish Pension scheme number in the pension code field.
3. Click Duplicate, and when prompted, confirm with OK.
4. Update the pension code and description.
5. Enter the Employee and Employer Pay Codes previously created

Field	Value
Scheme Number	New unique number
Scheme Name	e.g., "Irish Auto Enrolment"
Irish Auto Enrolment indicator	✓ Enabled
Employee Pay Code (Deduction 1 field)	Enter employee pay code created in 13.2
Employer Pay Code (Deduction field)	Enter employer pay code created in 13.2

6. Click Save

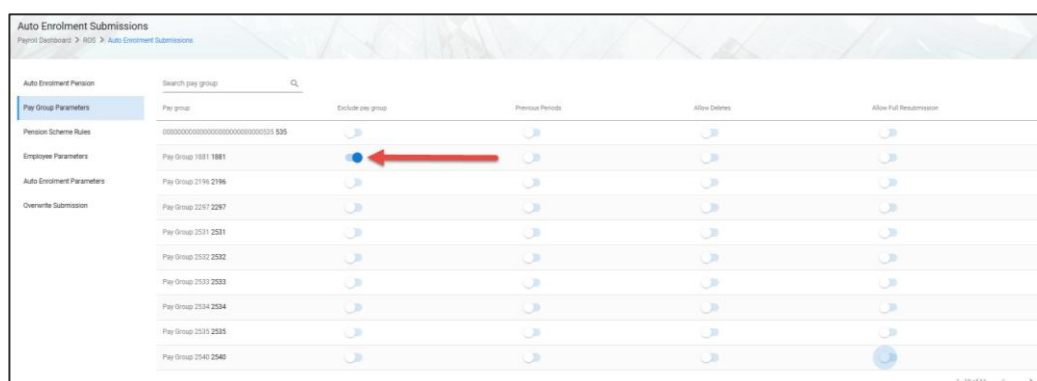

Note:

There is no requirement to set the EE and ER Deduction percentages on the pension as these rates will be received from NAERSA during the AEPN retrieval Process

12.4. Excluding Pay Group (Optional)

All pay groups should be subject to Auto Enrolment assessment. However, you can exclude specific pay groups if required. To exclude a pay group from Auto Enrolment Go to:

1. *Payroll Dashboard > Manage Payroll > Outputs > ROS > Auto Enrolment Submissions.*
2. Select Pay Group Parameters
3. Enable the 'Exclude Pay Group' indicator next to the pay group you want to exempt.
4. Click **Save**.

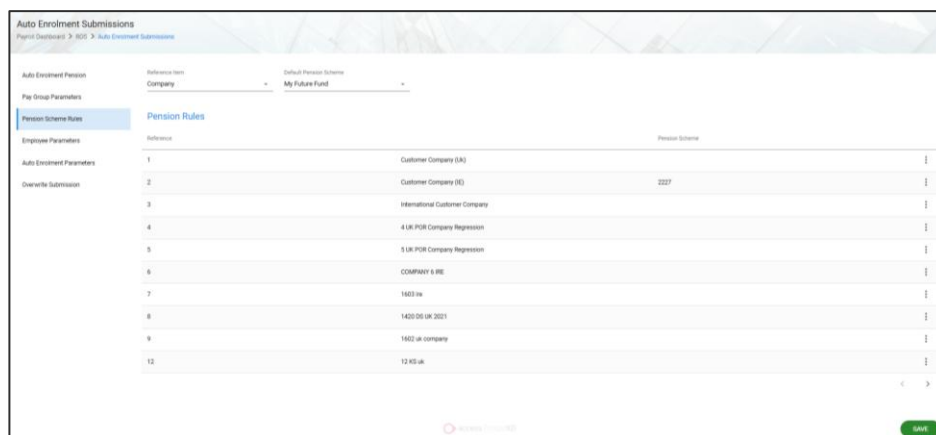

12.5. Pension Rules

12.5.1. Overview

A single global Auto Enrolment pension scheme is sufficient in most cases. However, if specific sites require additional schemes for purposes such as costing, rule-level configuration can be applied.

1. *Payroll Dashboard > Manage Payroll > Outputs > ROS > Auto Enrolment Submissions.*
2. Select Pension Rules Parameters

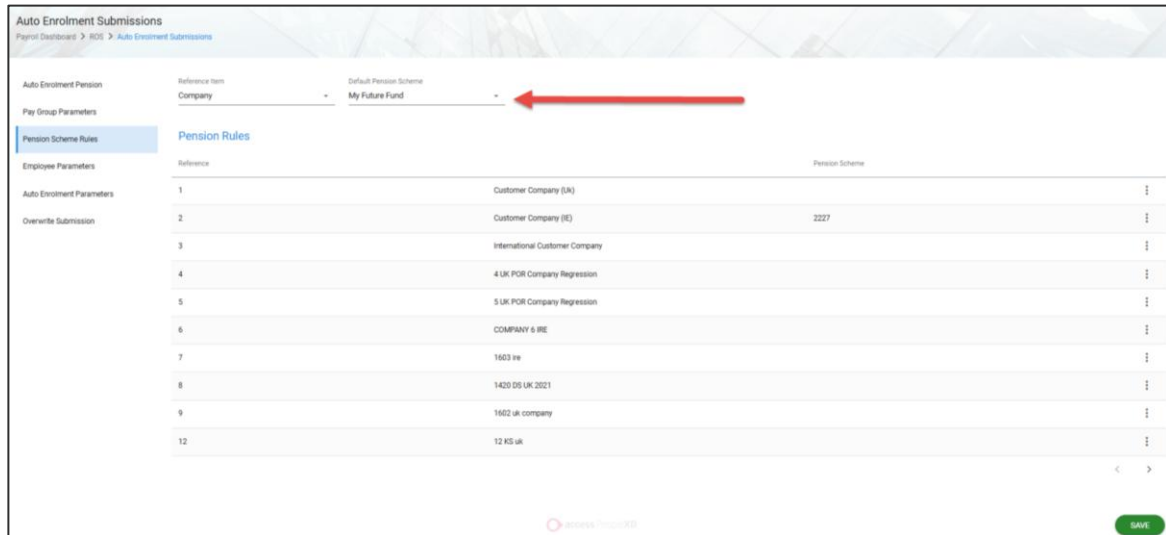

The Pension Rules screen opens.

12.5.2. Global System Level – Default Pension Scheme

For most sites, they only need to assign one new pension scheme for auto enrolment at a global system level. To do this:

1. Populate your Auto Enrolment Scheme number in the Default Pension scheme field.
2. Click **Save**.

The screenshot shows the 'Auto Enrolment Submissions' interface. At the top, there's a breadcrumb trail: 'Payroll Dashboard > ROI > Auto Enrolment Submissions'. Below this, there's a section for 'Auto Enrolment Pension' with a 'Reference Item' dropdown set to 'Company' and a 'Default Pension Scheme' dropdown set to 'My Future Fund'. A red arrow points to the 'Default Pension Scheme' dropdown. Below this, there's a 'Pension Rules' section with a table of reference items and their corresponding pension schemes.

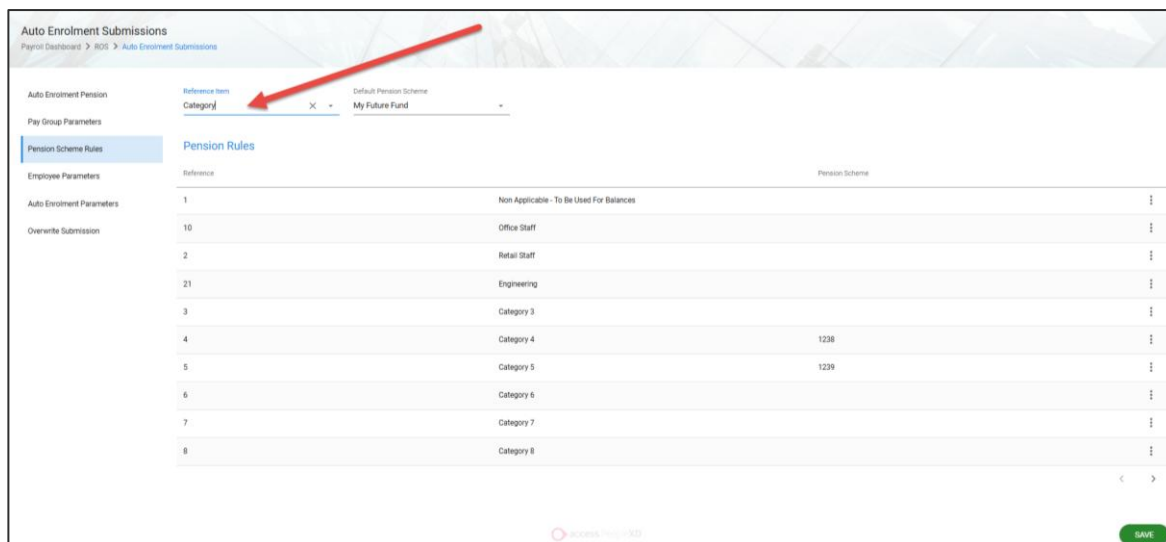

Reference	Pension Scheme
1	Customer Company (UK)
2	Customer Company (IE) 2227
3	International Customer Company
4	4 UK POR Company Regression
5	5 UK POR Company Regression
6	COMPANY & IRE
7	1603 ire
8	1420 DS UK 2021
9	1602 uk company
12	12 KS uk

12.5.3. Rule Level (Optional)

If you need multiple Auto Enrolment schemes for costing or reporting purposes, you can assign schemes based on reference data. To assign default pension schemes based on your select reference data.:

1. Select your choose Reference Item from the drop-down Reference Item menu
2. Use the Pension Scheme field next to the reference item number to enter the required default pension scheme.
3. Click **Save**.

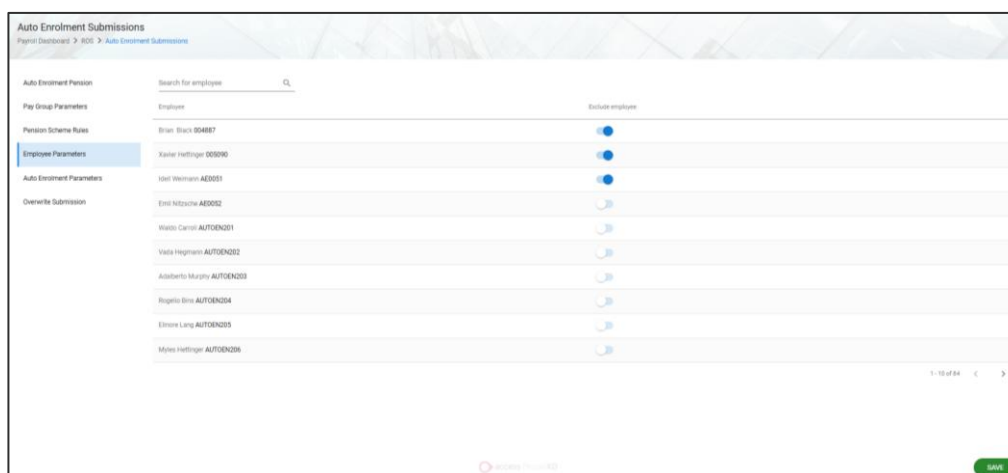

Note: Where no pension scheme exists for a reference item, the default pension scheme will be used.

12.6. Exclude Employee (Optional)

All employees should be subject to Auto Enrolment assessment. However, you can exclude specific employees if required. To exclude an employee from Auto Enrolment go to:

1. Payroll Dashboard > Manage Payroll > Outputs > ROS > Auto Enrolment Submissions.
2. Select Employee Parameters
3. Enable the 'Exclude Employee' indicator next to the employee you want to exempt.

4. Click **OK**.

Note: It is important to note that NAERSA does not recognise any valid reason for excluding an employee once an AE instruction has been issued. This system functionality exists only to support genuine, exceptional cases and should be used only in rare circumstances.

12.7. Auto Enrolment Parameters

Note: These parameters are preconfigured and do not require any end user input.

To view these parameters, follow the steps below:

1. *Payroll Dashboard > Manage Payroll > Outputs > ROS > Auto Enrolment Submissions.*
2. Select Employee Parameters

The screenshot displays the 'Auto Enrolment Submissions' page within the 'Payroll Dashboard'. The page is divided into a left sidebar with navigation links and a main content area. The sidebar includes links for 'Auto Enrolment Pension', 'Pay Group Parameters', 'Pension Scheme Rules', 'Employee Parameters', 'Auto Enrolment Parameters' (which is highlighted), and 'Override Submission'. The main content area is titled 'Auto Enrolment Pension Parameters' and contains several input fields and a 'Save' button. The fields are organized into two columns. The left column includes 'Live host' (b2b.myfuturefund-nongprod.ie), 'Software used' (softwareUsed=people), 'NADERGA URL submission file parameter' (/payrollapi/v1/contributions/updatecontri...), 'Proxy URL' (with a note: 'If you are using a proxy server and it has a username...'), and a 'Detailed log' toggle switch. The right column includes 'Test host' (b2b.myfuturefund-nongprod.ie), 'Software version' (softwareVersion=1), 'NADERGA URL API parameter' (/payrollapi/v1/api/downloadpayrollapi...), 'Proxy Username' (with a note: 'If you are using a proxy server and it has a username...'), 'Proxy Password' (with a note: 'If you are using a proxy server and it has a password...'), and 'Auto Enrolment Effective Date' (01-Jan-2025). A 'Save' button is located at the bottom right of the page.

12.8. Digital Certificates

Ensure you have a valid **ROS Digital Certificate** for API authentication. This is the same certificate used for **Pay Modernisation** and does not need to be reloaded into PeopleXD.

12.9. Proxy Servers

If your organization uses a proxy server for internet connectivity, you will need to configure the proxy settings. To do this:

1. *Payroll Dashboard > Manage Payroll > Outputs > ROS > Auto Enrolment Submissions.*
2. Select Auto Enrolment Parameters

The screenshot displays the 'Auto Enrolment Submissions' configuration page. The left sidebar contains a navigation menu with options: 'Auto Enrolment Pension', 'Pay Group Parameters', 'Pension Scheme Rules', 'Employee Parameters', 'Auto Enrolment Parameters' (selected), and 'Overwrite Submission'. The main content area is titled 'Auto Enrolment Pension Parameters' and includes several input fields for configuration. A red rectangular box highlights the 'Proxy URL', 'Proxy Username', and 'Proxy Password' fields, which are currently empty. Below these fields is a 'Detailed log' toggle switch and an 'Auto Enrolment Effective Date' field set to '01-Jan-2025'. A 'Save' button is visible in the bottom right corner.

7. Add the proxy URL.
8. Add a Proxy Username and Password.
9. Click **Save**.

12.10. Salary Sacrifice Pay Codes

If your organization operates salary sacrifice arrangements, you must configure these pay codes correctly to ensure the right gross pay figure is reported in the Revenue PSR and for the Auto Enrolment calculations.

12.10.1. Salary Sacrifice via Negative Allowances

 **Note:** **Requirement:** The **salary sacrifice indicator** must be enabled on the pay code. This ensures Auto Enrolment calculates on Revenue Gross Pay (before salary sacrifice deduction).

Example:

- Employee salary: €1,000
- Salary sacrifice: €-200 (negative allowance)
- Revenue Gross Pay for AE: €1,000 (not €800)

12.10.2. Salary Sacrifice via Deductions

There is no need to set the salary sacrifice indicator where salary sacrifice is set up as a deduction. This is as deductions are not part of the Revenue Gross Pay figure.

 **Note:** Auto Enrolment is calculated per Revenue employment, with no appointment ID on

What this means:

- AE applies to all Revenue Gross Pay earnings for that employment
- Cannot split or exclude specific appointments within one employment

12.11. General Ledger Configuration

Auto Enrolment contributions must be posted to your general ledger.

12.11.1. Configuration Requirements

Configure GL posting for:

- **Employee Pension** (Balance Sheet)
- **Employer Pension** (Balance Sheet)
- **Employer Pension** (Profit & Loss)

12.11.2. Where Costs Are Allocated

Balance Sheet:

Element	Cost Centre Source	Project Source	GL Expense Source
Employee Pension	Pay code deduction timesheet override > Pay Code	Pay code deduction timesheet override > Pay Code	Pay code deduction timesheet override > Balance Sheet GL matrix > Pay Code
Employer Pension	Pension Scheme > Payroll Parameters	Pension Scheme > Payroll Parameters	Balance Sheet GL matrix > Pension Scheme > Payroll Parameters

Profit & Loss:

Element	Cost Centre Source	Project Source	GL Expense Source
Employer Pension	Pay code deduction timesheet override > Pay code	Pay code deduction timesheet override > Pay code	Pay code deduction timesheet override > Pay code > Use expense code from Balance Sheet GL matrix > Pay code

12.12. Employee Pension Configuration

The employee pension scheme allows you view an employee's pension details retrieved through the AEPN process. This screen also allows you to create an employee's auto enrolment pension for testing purposes.

To Maintain Employee Pension:

1. Go to *Payroll Dashboard > Employee > View > Search for your employee.*
2. Select Pension from the side menu.
3. Select Edit from the 3 dot Menu.
4. Select the Irish Auto Enrolment Tab.

Edit Pension

Payroll Dashboard > Manage Payroll Employees > Hyman Jakubowski > Edit Pension

Select Scheme: My Future Fund

Appointment: Appointment ID: Start Date*: 06-Sep-2025

End Date: Payroll End Date:

Employee Contributions

Percentage One: 1.5 Scheme Standard: Override

Percentage Two: Scheme Standard: Override

Percentage Three: Scheme Standard: Override

13. Handling Special Cases

13.1. Overview

This section explains how PeopleXD and NAERSA handle various special scenarios in Auto Enrolment.

13.2. Cancel and Manual Payments

13.2.1. Overview

Any cancelled or manual payments processed in PeopleXD will **not be included in the standard Auto Enrolment submission files**. This is because contribution processing is **locked by NAERSA at 6:30 p.m. on pay day**. If these cancel or manual payments result in changes to employee or employer pension contributions, the necessary adjustments must be made **directly through the MyFutureFund Employer Portal** to ensure that all contributions and corrections are accurately recorded with NAERSA.

Warnings will be displayed in PeopleXD when manual intervention through the MyFutureFund Employer Portal is required.

13.2.2. Cancel Payment

Warning Message:

Cancel Payment

Employee Reference: AUTOEN241 Name: Makayla Turcotte

Payroll Period: 202615 Address: House

Pay Group: 2540 Street:

Previous Employment: ☐ Issue Date: 13-APR-2025

Previous Year Recoupment: ☐ Cheque No.:

PAYE Modernisation deletion: ☐ Net Pay: 536.55

Pay Code	Description	PRD Reference	Hours	Value	Scheme
7500	Salary		0	1153.85	0

This transaction includes Irish Auto Enrolment pension scheme. After the manual payment, you must manually update in the Employer Portal

OK

Nett Pav Reset Copy Payslip

13.3. Common Special Cases

13.3.1. New Starter Employees

No AEPN until after first payroll reported to Revenue.

Timeline	What Happens
First payroll	No AEPN available
After Revenue receives data	NAERSA assesses eligibility
Next payroll	AEPN instruction available

Same applies to re-joiners - treated as new employment.

Technical Note for Re-joiners:

When an employee leaves and later rejoins, they receive a new Employment ID. On the first payroll run after rejoining:

- Old AEPN references old Employment ID
- System detects Employment ID mismatch
- No pension calculated, employee excluded from submission file

Once new AEPN received with new Employment ID:

- Employment IDs match
- Pension deductions applied
- Employee included in submission file correctly

13.3.2. Person-Based Calculation

Auto Enrolment is calculated **per person** based on Revenue PSR Gross Pay, with no appointment ID on AE pension schemes. All earnings for the person under that employment are included.

13.3.3. Moving from AE to Company Scheme

You cannot end the AE scheme - only NAERSA can issue a stop instruction. As such, where an employee is currently on the AE scheme and wishes to move to the company pension scheme, then the employer must set up the company pension alongside the AE scheme. This will mean a minimum of 1 payroll period during which both schemes are active (and two sets of EE/ER contributions are deducted).

Only after the next Payroll Submission Return (PSR) is made to Revenue and the weekly feed sent to NAERSA will an updated AEPN instruction be available which will allow the ER end the AE scheme. ss

Period	AE Scheme	Company Scheme	Employee Pays
Before company scheme	Active	-	AE only
After joining company scheme	Still active	Active	Both schemes
After NAERSA stop AEPN	Ended	Active	Company only

Process: Keep AE scheme open and contributing until NAERSA sends stop instruction.

13.4. Dual Employments

Auto Enrolment applies **separately to each employer relationship**.

- Each employment assessed independently
- Separate AEPN issued for each
- Each employer deducts for their employment only
- Employee's pot linked to PPSN across all employments

13.5. Leaves and Rejoiners

- **Employee Leaves and Rejoins – Question**

What happens when an employee leaves and later rejoins and the AEPN and NAERSA records still reference the old Employment ID.

On the **first payroll run after rejoining**, the Employment ID on the pension record does not match the Employment ID held on People XD for the employee. As a result:

- No pension is calculated,
- The employee is excluded from the submission file, and
- No Auto Enrolment (AE) deduction is made for the new employment.

Once a new AEPN is received with the **new Employment ID**, we update the pension table. At this point:

- The Employment ID matches the Employment ID held on People XD for the employee.
- Pension deductions are applied.
- The new Employment ID is correctly included in the submission file.

13.6. No PPSN

Employees **without a valid PPSN** cannot be enrolled in Auto Enrolment. No AEPN event issued by NAERSA.

Action: Ensure all employees have valid PPSN numbers.

13.7. Exclusion Orders

Employees on exclusion orders have **zero Revenue Gross Pay**. No contribution amounts due (€0 gross pay = €0 AE contribution).

13.8. Multiple Employments / Sources of Income

What Employers See	What NAERSA Sees
Only their own employment	All employments across all employers
Their pension contributions only	All pension contributions
Their earnings only	Total earnings across all sources

Your responsibility: Follow AEPN instructions exactly. Direct queries about multiple employments to NAERSA.

13.9. Change of PPSN Number

Changes are picked up going forward automatically after next Revenue PSR.

For historical corrections: Raise case with NAERSA for manual review. Cannot correct previous submissions through software.

13.10. Refunds

Employers/vendors are not allowed to process refunds.

Refund Type	Who Handles	What Gets Refunded
Opt-out refunds	NAERSA only	Employee contribution only (ER and State remain invested)
Overpayments	NAERSA only	Per case review
Any refund request	NAERSA only	Direct employee to NAERSA portal

Employer action: None. Do not process refunds through payroll.

14. General Technical Considerations

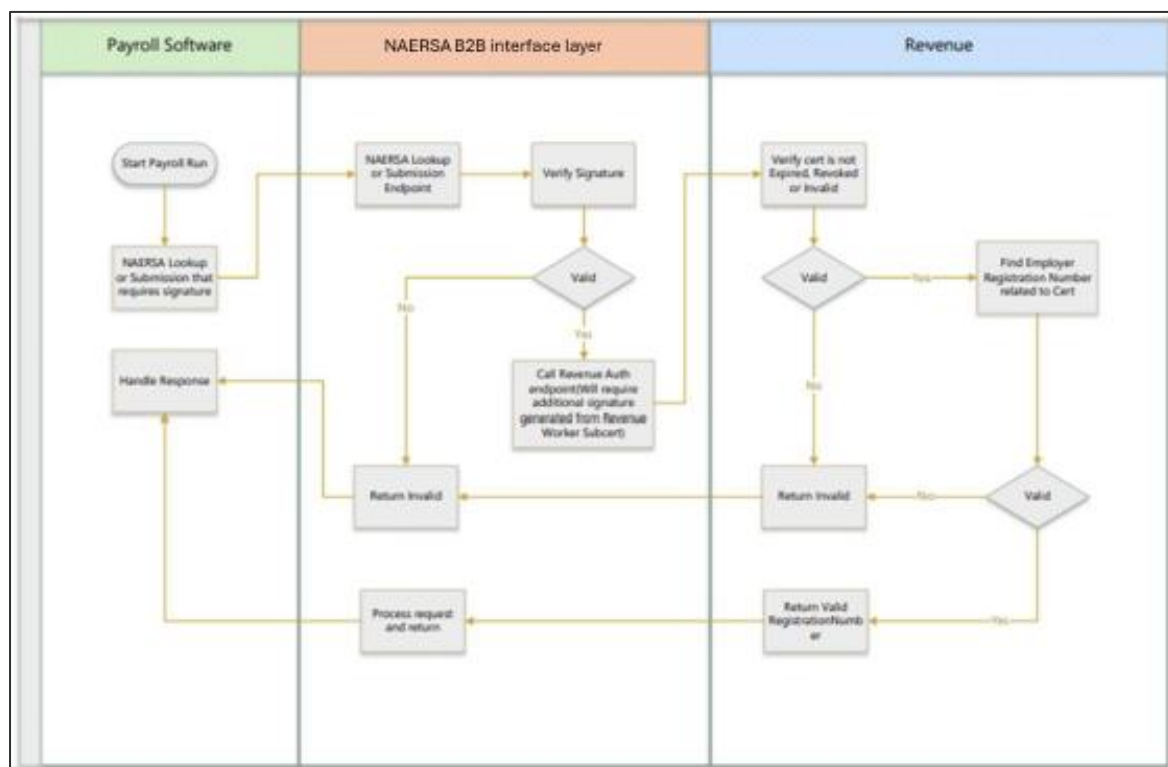

The connection between payroll software and the REST and SOAP will be encrypted using transport layer security (TLS) 1.1 and TLS 1.2 (all the other versions of TLS will be disabled as will all versions of secure sockets layer (SSL)).

14.1. Request authentication and authorisation

All incoming requests will be authenticated using the ROS digital certificates which have been issued to the employers and agents, by Revenue. Payroll software also needs to send digital signatures as per the current Revenue specifications. The digital signature of the incoming requests will also be validated as per the current integration pattern with Revenue. It will include the following:

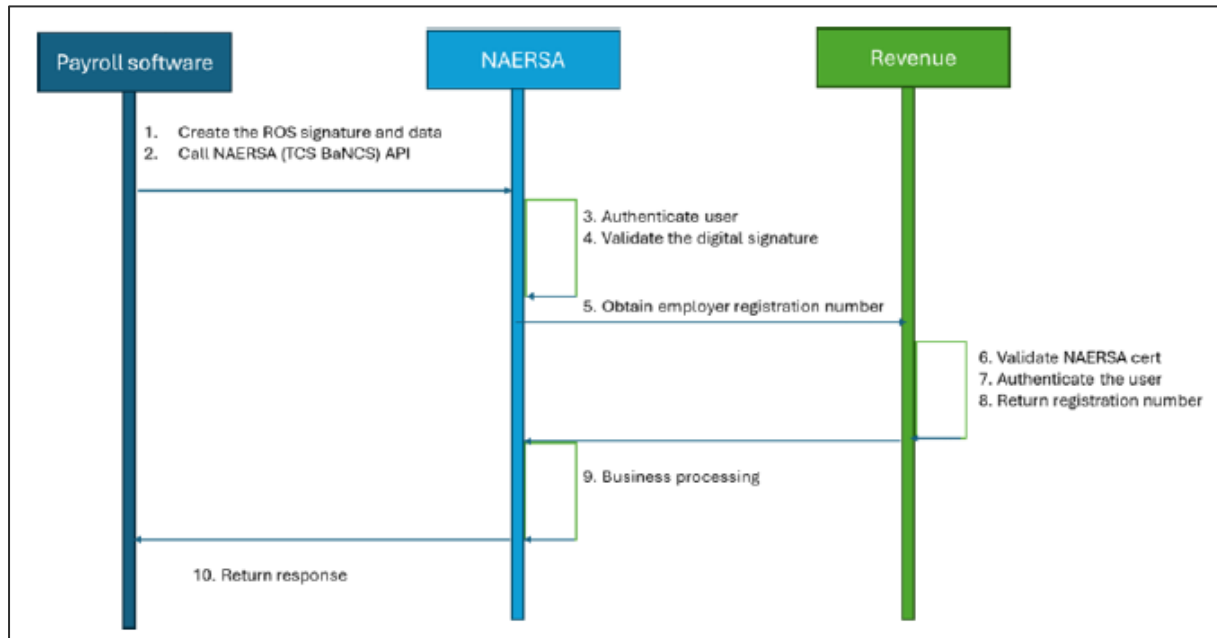

- Electronic Signature Verification – Verify Signature in request matches re-generated string.
- Verify cert is not Expired, Revoked, Valid or Expiring.
- Verify cert is tied to Employer Registration Number and Agent Tain (if present).

Given below is the sequence flow for this process.

14.2. Request and response processing

Post authentication and authorisation, incoming requests will be processed for the business content. Generic sequence flow is given below.

14.2.1. Requests

The PeopleXD solution will support requests in the REST format. Connecting to the Individual API endpoints. Details of the APIs are below in later sections.

14.2.2. Responses

The PeopleXD solution will support responses in the JSON format as per the incoming requests. Details for each API are given below.

14.2.3. Error response

HTTP status codes will be used to indicate error responses for each API call. The response of the "error details" API call to return the business validation errors for the contribution data is different:

- For the 4xx error codes, client software is expected to make necessary corrections and resubmit the request.
 - 400 Bad request. Invalid path, parameter or value supplied. Mandatory parameters not present.

- 401 Authentication is required or has failed.
 - 403 Insufficient permissions to process request. Authorisation has failed.
 - 404 Resource not found.
 - 405 Request method is not supported for the requested resource.
- For the 500 error code, client software can resubmit the request without making any corrections as they are server related errors.
 - 500 Unhandled Exceptions in processing the request.
 - It will also be returned for the following scenarios:
 - TCS Certificate and signature verification by Revenue API did not succeed.
 - Revenue API is unavailable or not responding.

15. Employer & Employee Portal

 **Note:** All queries relating to these areas should be directed to NAERSA.

15.1. Employer Portal

Employers must register on the Employer Portal and provide their bank account details, which will be used for Auto Enrolment direct debit payments.

Once registered, employers will be able to:

- View information submitted to NAERSA
- Access details processed by NAERSA

Guidance on the Employer Portal, including registration steps, will be issued directly by NAERSA/The Department.

15.1.1. Employer Portal for Manual Submission

The PeopleXD solution is B2B API integration: meaning submissions are sent directly from payroll software. Should users wish to make a manual return they'll need to log on to the NAERSA Employer Portal and follow.

15.2. Employee Portal

Employees must register for a **MyGovID** account to access the Auto Enrolment portal. Through this portal, they can:

- View their contributions
- Access dashboards and information
- Submit an event such as an opt-out request (only within designated opt-out windows)

Further details on the portal will be provided directly by NAERSA/The Department.

16. Checklist for Go Live

16.1. Checklist

The following is a checklist for actions employers must take before go-live.

#	Description	Comment	Completed
1	Register each Employer with NAERSA, once the Employer system is available.	This is done via the Employer portal and includes providing bank details which NAERSA will use to raise the direct debit to collect AE contributions. Details of the employer portal will be made available from NAERSA in 2025 Q4.	
2	Ensure active Digital Cert available.	The existing PAYE Mod digital cert is used. No additional digital cert needs to be loaded.	
3	Create new EE and ER Pay Code(s)	These are the new pay codes that will be assigned to the auto enrolment pension scheme.	
4	Create new Auto Enrolment Pension Scheme	Set up new Auto Enrolment Pension scheme. Ensure auto enrolment indicator is checked on.	
5	Assign Auto Enrolment Pension Scheme Rule	One default pension scheme is required though users can create a rule if they wish to have additional for costing purposes.	
6	Review Auto Enrolment Parameters	These are defaulted in. No user action is required unless a proxy server is used.	
7	Assign Auto Enrolment Menu Profile.	Grant the new auto enrolment menu profile to any user who requires access to AEPNs or Generate/Transfer of the Contribution submission file.	
8	Event Management System (EMS) - if applicable / Auto	Complete configuration of the Auto Enrolment EMS communication or review	

#	Description	Comment	Completed
	Enrolment Communications	process for how Auto Enrolment Communications will be managed.	
The following steps should only be completed AFTER the year end cleardown for 2025 has been run.			
9	Retrieve AEPNs	Retrieve AEPNs for the 2026 tax year	

16.2. Testing Timelines

There is no test environment provided by NAERSA for sending customer data, as this is restricted by the Department/NAERSA for GDPR reasons.

Employers can therefore test Auto Enrolment processes only up to the point of producing the PeopleXD output. Any connections to NAERSA will always operate on a live (Production) basis.

This means that:

- The AEPN call will return live AEPN data.
- Transfers and returns for Auto Enrolment can only be processed end to end in Production.

To protect against accidental submission of test data, PeopleXD has implemented a safeguard that prevents users from transferring the Auto Enrolment Contribution file to NAERSA from non-production environments.

17. CSO EHECS

Once the Employer Pension Contribution pay code is assigned an Analysis Code linked to the analysis type **'EN'**, the contribution will appear on the CSO EHECS return under **Employer**

Contributions to Pension Fund.

0	0	APPRENTICES/TRAINEES All paid Leave	0	0	0
0	0	Part 5 - Employer's Pension Contributions, cost to employer only			
0	0	EMPLOYER'S CONTRIBUTIONS TO PENSION FUNDS	Managers, Prof's & Assoc Prof's	Clerical, Sales &	Production, Transport, Craft&Trades Other Manual
0	0	ALL Employees(including apprentices/trainees)	2513	0	0
0	0	Part 6 - Employer's Liability Insurance			
		Employers' liability insurance premiums paid in quarter			0

18. Menu Profile Required

The following new user security menu profile has been added to the system. This new menu security profile should be assigned to any system user requiring access to operate auto enrolment within the PeopleXD system.

- AUTO_ENROL_IE_MENU
