1.1	13 th Mar 2024	James Martin	Update to section 1.4 Advances

1. Overview

1.1. Purpose of the Guide

From January 2024, the introduction of Enhanced Reporting Requirements (ERR) requires real time reporting to Revenue. The purpose of this document is to provide guidance on all of the steps involved in this process.

1.2. Enhanced Reporting Requirements

Enhanced Reporting Requirements (ERR) requires employers to submit the details of any relevant employee payments to Revenue on or before each payday. This reporting requirement is regardless of what system is used to make the payment. I.e. if running a monthly payroll but weekly expense group then assuming it contains relevant payment items, the weekly expense group payment information must be returned to Revenue on or before each weekly payment that employees receive.

1.3. What information do you need to report?

Phase one will apply to any payments you make to an employee and, or director under any of the following categories:

1.3.1. Small benefit exemption

Revenue Guidance:

The small benefit exemption The small benefit exemption provides that employers may make tax-free benefits to employees in the form of vouchers or other benefits within the remit of section 112B TCA 1997. Guidance on this measure is available in TDM Part 05-01-01e -The small benefit exemption. <https://www.revenue.ie/en/tax-professionals/tdm/income-tax-capital-gains-tax-corporation-tax/part-05/05-01-01e.pdf>

What you need to report.

You must submit details of the date paid and value of this benefit.

1.3.2. Remote Working daily allowance

Revenue Guidance:

€3.20 remote working allowance Revenue operates an administrative practice which allows an employer to make payments up to €3.20 to employees, for each day worked from home, subject to certain conditions being satisfied, without the need to deduct PAYE, PRSI or USC. Guidance for this measure is available in Tax and Duty Manual (TDM) Part 05-02-13 Remote Working Relief.

<https://www.revenue.ie/en/tax-professionals/tdm/income-tax-capital-gains-tax-corporation-tax/part-05/05-02-13.pdf>

What you need to report.

When you are paying a Remote Working daily allowance, you must report the following:

- Total number of days
- Amount paid
- and
- Date paid

1.3.3. Travel and subsistence

Revenue Guidance:

Travel and subsistence payments where an office holder or employee, in the performance of the duties of his/her office or employment, incurs expenses of travel and subsistence, such amounts can, subject to conditions, be reimbursed without deduction of PAYE, PRSI and USC. Guidance for this measure is available in TDM Part 05-01-06 Tax treatment of the reimbursement of expenses of travel and subsistence to office holders and employees. <https://www.revenue.ie/en/tax-professionals/tdm/income-tax-capital-gains-tax-corporation-tax/part-05/05-01-06.pdf>

What you need to report.

You must submit the following Travel and subsistence items, including the date paid and amount of each payment for:

1. Travel vouched
2. Travel unvouched
3. Subsistence vouched
4. Subsistence unvouched
5. Site-based employees - including "Country money"

6. Emergency travel
7. Eating on site.

Revenue have confirmed that:

- Payments made using a Company Credit Card do not fall under ERR reporting requirement.
- Expenses to non-employees/Directors do not fall under ERR reporting requirements

1.4. Advances

Revenue has clarified that non-taxable advances will be allowed in certain scenarios. This change is being implemented following feedback on the ERR release in relation to advanced not being allowed.

Irish Revenue will introduce an optional administrative practice allowing the processing of non-taxable advances under certain conditions.

Further guidance is covered in the [Revenue Tax Duty Manual \(TDM\) part 38-03-33](#).

Note:

Revenue have not yet released the method to process non-taxable advances. Until this is released it is not possible to process advances.

Employers deciding to operate advances must report all advance travel and subsistence payments under ERR once their chosen reporting mechanism becomes available. For further information please see the [Processing Non-Taxable Advances](#) guide.

1.5. How will you submit payment details to Revenue?

Payment details can be reported to Revenue in one of two ways.

1. Manual Return

- Revenue provide a means of manually submitting Enhanced Reporting Requirements (ERR) details via ROS. This facility is similar to that used currently for payroll reporting.

2. Software Providers

- A facility is available to enable software providers to integration with Revenue systems for this new reporting requirement.

- Users would need to check with the software provider to see if they are providing a solution via their application.

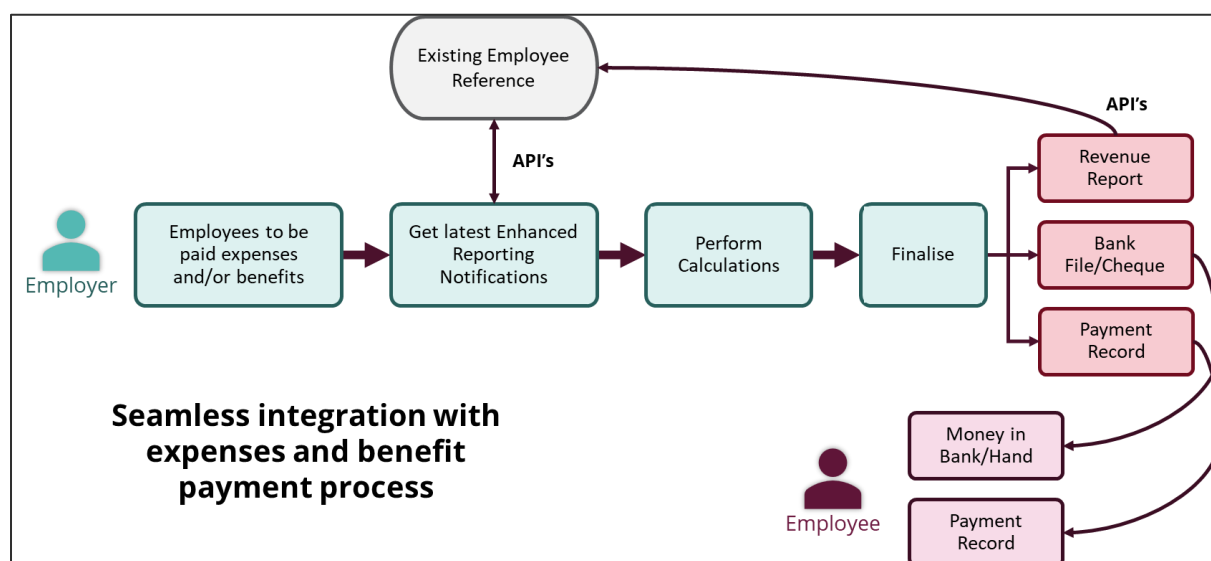

1.6. Why is this information required?

This information will:

- Enhance Revenue's Compliance Intervention Framework by directing resources away from compliant employers.
- Provide quality high level data in support of effective and informed policy decisions by the Department of Finance.
- and
- Increase visibility and assurance for employees in relation to non-taxable payments.

1.7. Summary of Payroll Process

The below illustration outlines the steps involved in the real time reporting process using software and the sequence to follow:

Things to note:

- This process is regardless of the system being used to make payment.
- However, the Enhanced Reporting Notifications (ERN) API process is not applicable for Payroll systems as this is used for non payroll systems to retrieve from Revenue the Revenue Employment ID to be used when reporting returns. A payroll system doesn't

require this as the Revenue employment ID is generated by the payroll system.

- This user guide will cover the process for Payroll returns from the People XD system. The Expense user guide should be reviewed by any sites using the PeopleXD Expense system for how returns are configured and managed on the PeopleXD Expense system.

2. Generate ERR File

2.1. Generate Enhanced Reporting Requirements (ERR)

2.1.1. Purpose of this section

An Enhanced Reporting Requirements submission return is required after any relevant payment, regardless of what system is used to make the payment. This section guides how to generate the Enhanced Reporting Requirements (ERR) Normal Submission File and Full Resubmission File where a relevant payment has been made via the PeopleXD Payroll system so that these are available to transfer to Revenue.

This includes:

- An overview of the Normal Submission File and Full Resubmission File.
- How to generate the files?
- When to regenerate a Normal Submission File vs when a generate Full Resubmission File.

2.1.2. What are the Submission Files?

At the end of every payroll, transmit an Enhanced Reporting Requirements (ERR) Submission File to report the latest payment information to Revenue. This transfers through an automated feed that connects seamlessly with Revenue to exchange the required information.

A key feature of the ERR Submission File is that it reports *'this period only'* values to Revenue. From these periodic values, Revenue accumulates the totals from each periodic submission, thus removing the requirement for an end of year submission.

A ERR Submission File should be generated:

- Every payroll run, where there is a relevant payment made during the run. If no relevant payment has been made then no file needs to be generated/transferred.
- After the Complete Update task.
- On or before the payment date.

**Note:**

Ensure all ERR files are transferred on or before the payment date as required by Revenue.

This ERR Submission File is transferred to Revenue using 'Direct Reporting'. If any errors are reported by Revenue, then these issues need to be resolved on PeopleXD.

- For "Invalid Expenses" errors – resolve the issues, and generate a new Normal Submission File.
- If a correction is required, generate a Full Resubmission File and transfer it to Revenue

2.1.3. What is included in the Submission File?

The file includes the following information for each employee in the pay group with a relevant payment:

- PPSN
- Employment ID
- Date of Payment.
- Payment Value.
- Category:
 - Travel & Subsistence
 - Remote working daily allowance
 - Small Benefits Exemption
 - Travel & Subsistence
- Sub Category – For Travel & Subsistence payments only:
 - Travel Vouched
 - Travel Unvouched
 - Subsistence Vouched
 - Subsistence Unvouched
 - Site Based Employees
 - Emergency Travel
 - Eating on Site
- Number of Days - For Remote Working Daily Allowance payments only.

Note:

Pay Codes will need to be reviewed or created to ensure they are configured to capture/record the information required for ERR reporting. This may also impact existing processes if they do not capture/record the information required for ERR.

2.2. Generate ERR Submission Files

2.2.1. Generate a Normal Submission File for Pay Group

To generate a Normal Submission File:

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Enhanced Reporting Requirements*.
2. Click the **ERR Files Process** tab.

Enhanced Reporting Requirements

Payroll Dashboard > ROS > Enhanced Reporting Requirements

3. Select **Generate Submission File** from the *Select ERR action* drop-down menu.
4. Select **Normal Submission** from the *Submission Type* drop-down list.
5. Select a **Pay Group** from the drop-down list.
 - The Period/Month auto-populates.
6. Enter a **Payment Date** in the *Override Payment Date* field if required.
7. Click **OK** - A confirmation message will display.

8. Once generated you will receive a notification when the files are available to download and view from the Report Centre.

The submission file and [ERR Control Report](#) generate in the Report Centre.

- See [2.2.3 Exceptions in the Normal Submission Files](#) for guidance on what to do with exceptions identified.

2.2.2. Generate ERR Submission File for One Employee

Note:

Use this option where an employee had invalid expenses in a previous *Submission File*.

To Generate a Normal Submission File for one employee:

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Enhanced Reporting Requirements*.
2. Click the **ERR Files Process** tab.
3. Select **Generate Submission File** from the *Select ERR action* drop-down menu.
4. Select **Normal Submission** from the *Submission Type* drop-down list.
5. Select a **Pay Group** from the drop-down list.
 - The Period/Month auto-populates.
6. Select an **Employee** from the drop-down list.
7. Enter a **Payment Date** in the *Override Payment Date* field.
8. Click **OK** – a confirmation message displays.
9. Once generated you will receive a notification when the files are available to download and view from the Report Centre.

The submission file and [ERR Control Report](#) generate in the Report Centre.

- See [2.2.3 Exceptions in the Normal Submission Files](#) for guidance on what to do with exceptions identified.

2.2.3. Exemptions in Normal Submission Files

When the file is generated, exceptions may be identified and presented to you in the [ERR Submission Exception Report](#). If exceptions are found, the recommended process is to:

1. Review errors in the report.

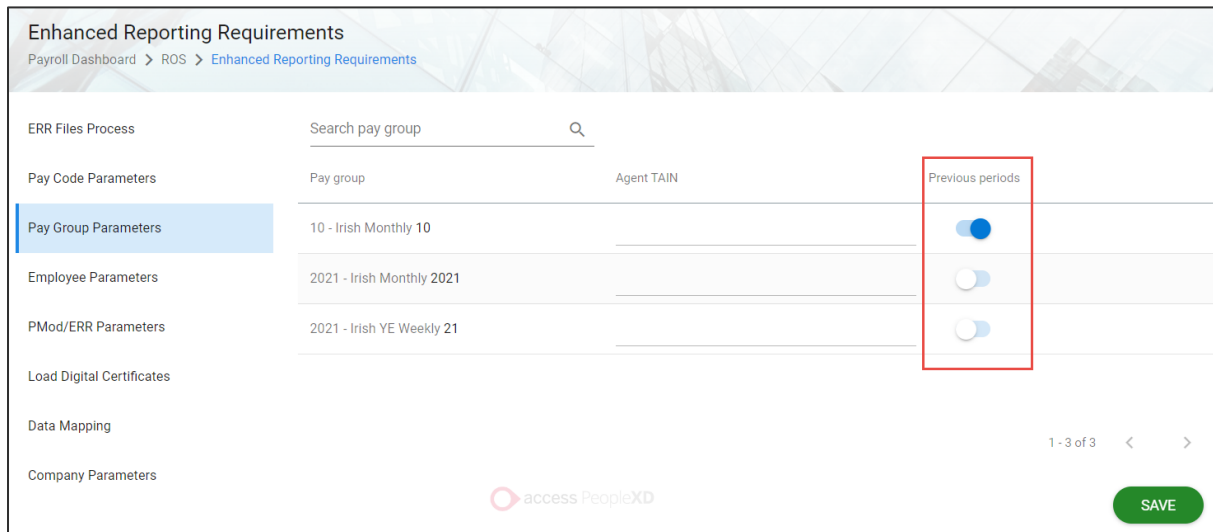

2. Resolve the errors on PeopleXD.
3. Generate a new Normal Submission file.
4. Repeat these steps until no exceptions remain. It is recommended to resolve all known errors in the file, before transferring to Revenue.

2.2.4. Generate a Normal Submission File for a Previous Period

Note:

This option should only be used where the Normal Submission File was not generated, transferred, or accepted by Revenue for a previous period.

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Enhanced Reporting Requirements*.
2. Click the **Pay Group Parameters** tab.

3. Ensure the *Previous Periods* toggle is enabled for the relevant Pay Group.
4. Click **Save** – A confirmation message displays.
5. Click the **ERR Files Process** tab and select **Generate Submission File** from the *Select ERR action* drop-down menu.
6. Select **Normal Submission** from the *Submission Type* drop-down list.
7. Select the **Pay Group** from the drop-down list.
 - The Period/Month auto-populates. The *Previous Period* also auto-populates, this can be changed if another previous period is required.

8. Enter the **Override Payment Date** and **Override Cheque Pay Date** if required.
9. Click **OK** – a confirmation message displays.
10. Once generated you will receive a notification when the files are available to download and view from the Report Centre.

The submission file and [ERR Control Report](#) generate in the Report Centre.

- See [2.2.3 Exceptions in the Normal Submission Files](#) for guidance on what to do with exceptions identified.

2.3. When is a Full Resubmission Required

A Full Resubmission File is required when specific amendments (to Pay Date) have been completed on PeopleXD for an employee. The Full Resubmission File can generate at Pay Group or Employee level.

Note:

The Full Resubmission File includes only the amendments made since the last Submission File was transferred and accepted by Revenue.

Amendments to Pay Date:

- If Pay Date was misreported in the last payroll period, it can be overwritten on the Generate Resubmission screen.
- A delete line item outputs to the Payroll Submission File, and a new line item for each employee is output to the new Full Resubmission File with the new Pay Date.

2.3.1. Generate a Full Resubmission File for Pay Group

To generate a Full Resubmission File for the current period:

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Enhanced Reporting Requirements*.
2. Click the **ERR Files Process** tab.
3. Select **Generate Submission File** from the *Select ERR action* drop-down menu.

4. Select **Full Resubmission** from the *Submission Type* drop-down list. This generates a New Submission File which includes the updated data.
5. Select a **Pay Group** from the drop-down list.
 - The Period/Month auto-populates.
6. Enter the **Override Payment Date** and **Override Cheque Pay Date**.

The screenshot shows the 'Enhanced Reporting Requirements' form within the 'ERR Files Process' tab. The form is divided into several sections: 'Pay Code Parameters', 'Pay Group Parameters', 'Employee Parameters', 'PMod/ERR Parameters', 'Load Digital Certificates', 'Data Mapping', and 'Company Parameters'. The 'Generate submission file' section is active, showing a dropdown for 'Submission type*' set to 'Full Resubmission'. Below this, the 'Pay group*' dropdown is set to '10 - Irish Monthly', which has auto-populated the 'Period / Month' field with '202106'. The 'Run No' field is set to '0'. The 'Override payment date' and 'Override cheque pay date' fields are both set to '16-Oct-2023'. The form includes an 'OK' button at the bottom right.

7. Click **OK** – a confirmation message displays.
8. Once generated, the files are available download and view from the Report Centre.

Note:

Where a submission has been already generated and transferred to Revenue, if there was no response from Revenue, there will be an error if you try to re-generate the *Submission File*:

"You cannot generate a file for this pay group and period as the last file sent got no response from Revenue – Please run a Check ERR Run".

If this happens, check the response on the *Transfer Submission Files* screen for the last file transferred.

2.3.2. Generate a Full Resubmission File for one Employee

To generate a Full Submission File for one employee:

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Enhanced Reporting Requirements*.
2. Click the **ERR Files Process** tab.

3. Select **Generate Submission File** from the *Select ERR action* drop-down menu.
4. Select **Full Resubmission** from the *Submission Type* drop-down list. This generates a New Submission File which includes the updated data.
5. Select a **Pay Group** from the drop-down list.
 - The Period/Month auto-populates.
6. Select an **Employee** from the drop-down list.
7. Enter the **Override Payment Date** and **Override Cheque Pay Date**.
8. Click **OK** – a confirmation message displays.
9. Once generated, the submission file is available to download and view from the Report Centre.

2.3.3. Generate a Full Resubmission File for a Previous Period

Note:

This option should only be used where a Full Resubmission is required for a pay group and the pay group Normal Submission has already been sent to and accepted by Revenue.

To generate a Full Resubmission File for a previous period:

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Enhanced Reporting Requirements*.
2. Click the **Pay Group Parameters** tab.
3. Ensure the *Previous Periods* toggle is enabled for the relevant Pay Group.

ERR Files Process	Search pay group		Q
Pay Code Parameters	Pay group	Agent TAIN	Previous periods
Pay Group Parameters	10 - Irish Monthly 10		☒
Employee Parameters	2021 - Irish Monthly 2021		☐
PMod/ERR Parameters	2021 - Irish YE Weekly 21		☐
Load Digital Certificates			

4. Click **Save** – a confirmation message displays.
5. Click the **ERR Files Process** tab and select **Generate Submission File** from the *Select ERR action* drop-down menu.
6. Select **Full Resubmission** from the *Submission Type* drop-down list.
7. Select a **Pay Group** from the drop-down list.

- The Period/Month auto-populates. The Previous Period also auto-populates with the previous period, this can be changed if another previous period is required.
8. Select an Employee from the drop-down list.
 9. Enter the **Override Payment Date** and **Override Cheque Pay Date**.
 10. Click **OK** – a confirmation message displays.
 11. Once complete, the submission files are available to download and view from the Report Centre.

2.4. Generate Delete Submission File

2.4.1. When to Generate the Delete Submission File?

The Delete Submission File can be generated after the payroll is run and submitted. This must be run:

- If an employee/pay group should have been excluded but were returned in error.
- If a Submission File was generated and transferred twice for a period in error. The duplicate file can be deleted.

Once the Delete Submission file generates, transfer to Revenue, as per the standard transfer process.

2.4.2. Scenario 1: Employee returned in error

To delete a submission file where the employee should have been excluded:

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Enhanced Reporting Requirements*.
2. Click the **ERR Files Process** tab.
3. Select **Generate Submission File** from the *Select ERR Action* drop-down menu.
4. Select **Delete Submission** from the *Submission Type* drop-down list.
5. Select a **Pay Group** from the drop-down list.
 - The Period/Month auto-populates.
6. Select an **Employee** from the drop-down list.
7. Select the **Submission ID** from the drop-down list.

8. Click **OK** – a confirmation message displays.
9. Once generated, the submission file is available to download and view from the Report Centre.

2.4.3. Scenario 2: Pay Group returned in error

To delete a Submission File where the pay group should have been excluded:

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Enhanced Reporting Requirements*.
2. Click the **ERR Files Process** tab.
3. Select **Generate Submission File** from the *Select ERR Action* drop-down menu.
4. Select **Delete Submission** from the *Submission Type* drop-down list.
5. Select a **Pay Group** from the drop-down list.
 - The Period/Month auto-populates.
6. Select the **Submission ID** from the drop-down list.
7. Click **OK** – a confirmation message displays.
8. Once generated, the submission file is available to download and view from the Report Centre.

2.4.4. Scenario 3: To delete a duplicate File

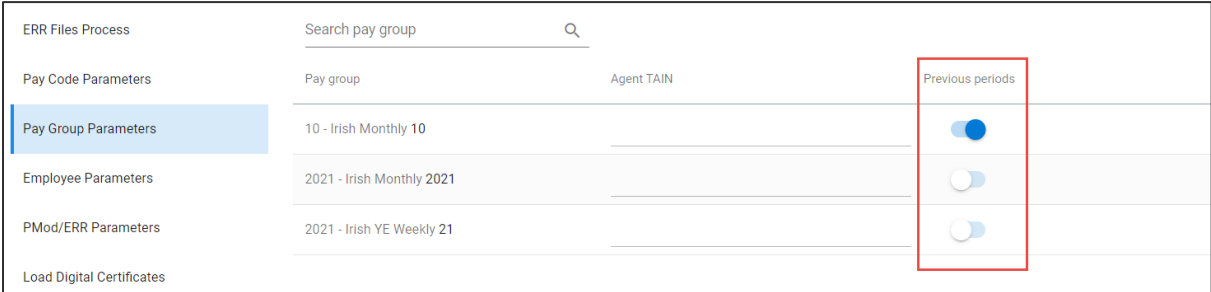

To delete a Submission File that has been generated and transferred twice in error:

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Enhanced Reporting Requirements*.
2. Click the **ERR Files Process** tab.
3. Select **Generate Submission File** from the *Select ERR Action* drop-down menu.
4. Select **Delete Submission** from the *Submission Type* drop-down list.
5. Select a **Pay Group** from the drop-down list.
 - The Period/Month auto-populates.
6. Select the **Submission ID** from the drop-down list.
7. Click **OK** – a confirmation message displays.
8. Once generated, the submission file is available to download and view from the Report Centre.

2.4.5. Scenario 4: Delete Submission file for a previous period

To Delete a Submission file for a previous period:

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Enhanced Reporting Requirements*.
2. Click the **Pay Group Parameters** tab.
3. Ensure the *Previous Periods* toggle is enabled for the relevant Pay Group

The screenshot shows the 'Pay Group Parameters' section of the system. It features a table with columns for 'Pay group' and 'Agent TAIN'. The first row is highlighted and shows '10 - Irish Monthly 10'. To the right of this row, there is a 'Previous periods' toggle switch, which is currently turned on (blue). A red box highlights this toggle switch. Below the first row, there are two more rows: '2021 - Irish Monthly 2021' and '2021 - Irish YE Weekly 21', both with their respective toggle switches turned off (grey).

Pay group	Agent TAIN	Previous periods
10 - Irish Monthly 10		☒
2021 - Irish Monthly 2021		☐
2021 - Irish YE Weekly 21		☐

4. Click **Save** – A confirmation message displays.
5. Click the **ERR Files Process** tab and select **Delete Submission** from the *Select ERR action* drop-down list.
6. Select a **Pay Group** from the drop-down list.
 - The Period/Month auto-populates. The Previous Period also populates with the previous period. This can be changed if another previous period is required.
7. Select the **Submission ID** from the drop-down list.
8. It is important to review the *Override Payment Date* and *Override Cheque Pay Date* to ensure these are correct.

9. Click **OK** – A confirmation message displays.
10. Once generated, the submission file is available to download and view from the Report Centre.

2.5. ERR Control Report

Once a submission file generates, the ERR Control Report generates to the Report Centre.

Cancel/Re-issue Payments for Remote Working	Sum of all cancel/reissue payment values for reporting period of all remote working pay codes.

2.6. ERR Submission Exception Report

The report identifies errors before you transfer the file. Exceptions identified in this report, need to be resolved on PeopleXD and a New Submission File generated.

Severity	Employee Reference	Error Code	Error Description
Error	ERR0012	2016	Invalid Country Code. Codes must follow the International Standard ISO 3166 Alpha-3.
Error	ERR0012	2016	Invalid Country Code. Codes must follow the International Standard ISO 3166 Alpha-3.
Warning	ERR0012	2045	Warning: Must provide PPSN, if known for Employee.
Warning	ERR0012	2045	Warning: Must provide PPSN, if known for Employee.
----- End of Report -----			

2.7. Reporting in Insight

2.7.1. New View

The following view can be used to report on Enhanced Reporting Requirements History. It contains a history of all Payroll and Expense generated ERR returns:

Business Area: Pay

View Name: Enhanced Reporting Requirements History

2.7.2. Updated Views

Existing views have also been updated to contain the following fields:

Pay:

- Pay Code Reference: Added ERR Category and Subcategory
- Person Master: Added ERR Exclusion

Expense:

- Expense Code Details: Added ERR Category and Subcategory
- Claimant Master: Added Company Reg Override, ERR Exclusion, Employment ID, Override Employment ID

3. Transfer the ERR Submission Files

3.1. Overview

3.1.1. Purpose of this Section

This section guides the Transfer Submission File process. This includes:

- An overview of the transfer process.
- How to complete a transfer for Original Submission and Correction Submission files.
- How to manage exceptions reported by Revenue for the transferred file.
- Check Run.

3.1.2. What is the Transfer Submission File Process?

At the end of every payroll, where ERR qualifying payments are paid, you need to directly report the latest ERR details to Revenue. This is done by transferring the ERR Submission File to Revenue from within the PeopleXD application.

Revenue validates the file, and if they find any issues, they notify this to Payroll via the Submission Status and provide a report of any exceptions. Should any errors be found, these need to be resolved in PeopleXD; a new Normal Submission file generated and transferred again to Revenue. This submission file includes only the records that changed e.g.

- 1st Normal Submission only 8/10 records completed successfully.
- 2nd Normal Submission only includes 2/2 records, i.e. the two records that were invalid on the previous submission.

Note:

If a file has not transferred successfully for all employees **OR** a file has been generated but not transferred to Revenue, it will not be possible to run the next payroll run for that Pay Group. This will be prevented at the *Payroll Validation* step.

3.2. Transferring Submission Files

To transfer an ERR Submission File to Revenue:

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Enhanced Reporting Requirements*.
2. Click the **ERR Files Process** tab.
3. Select **Transfer Submission File** from the *Select ERR Action* drop-down menu.

The screenshot shows the 'Enhanced Reporting Requirements' page. At the top, there is a dropdown menu labeled 'Select ERR action *' with 'Transfer submission files' selected. Below this is the 'Transfer submission details' section, which includes a 'Company *' dropdown menu showing '2114 IRISH YEAR END'. A search bar for 'Search pay group' is also present. Below the search bar is a table with the following columns: Pay group, Submission type, Period / Month, Run Number, Submission ID, Transfer fi., Status, and Confirmed. The table contains one row for '2021 - Irish Monthly ...' with a 'Normal Submission' type, '202105' period, '0' run number, and '2021_202122_62_20220726' submission ID. The 'Transfer fi.' column for this row has a blue toggle switch. To the right of the table, there is a 'RUN CHECK' button and a 'Confirmed' toggle switch. At the bottom right, there is a green 'TRANSFER' button.

4. Select a **Company Reference** from the *Company* drop-down list. Note the following:
 - All the Pay Groups associated with that Company appear on the screen.
 - The Pay Groups here display based on user access.
 - For each Pay Group the following details are available:
 - **Period / Month:** This is the pay period just completed.
 - **Submission Type:** This defaults to the Submission File type that the system expects to be transferred for this Pay Group:
 - **Normal Submission:** This appears for all Pay Groups, indicating that the Normal Submission file should be provided for the current payroll period.
 - **Full Resubmission:** This displays when the Full Resubmission option is selected on the *Generate Payroll Submission* screen for the current payroll period.
 - **Past Period Submission:** This appears for all Pay Groups, indicating that the Normal Submission file should be provided for a previous payroll period.

- **Prev. Full Resubmission:** This displays when the Full Resubmission option is selected on the *Generate Payroll Submission* screen for a previous payroll period.

5. Enable the **Transfer File** toggle.
6. Click **Transfer** – A confirmation message displays.

Transfer Submission File

Are you sure you wish to transfer files to the LIVE Revenue web service?

NO YES

7. Click **Yes** to transfer the file.

Revenue will respond to the transfer and the *Status* field populates with either:

- **Transferred** - This is a response from Revenue confirming they have received the transfer.
- **Rejected** - Revenue has rejected the file - the reason displays in the status.
- **Pending** - The file has transferred to Revenue; however, it hasn't been processed yet

Company * 2114 IRISH YEAR END							
Search pay group							
Pay group	Submission type	Period / Month	Run Number	Submission ID	Transfer	Status	Confir...
2021 - Irish	Normal Submission	201904	0	2242_201917_571	☐	Rejected Internal Server Error	RUN CHECK ☐
Irish Monthly	Normal Submission	201906	0	2242_201925_649	☐	Transferred	RUN CHECK ☐

Note:

Depending on the number and size of the files to be transferred, the processing time can vary. The system has a built-in cut off time for processing, after which results in a PENDING status. Click Run Check to manually run the web service and request an update from Revenue. **Do not re-generate and re-submit the Submission file.**

At this time, a *Submission Transfer Response* report is sent by Revenue.

Enhanced Reporting Requirements - User Guide

Once the submission file is transferred and acknowledged by Revenue, a response file is generated in the Report Centre. It generates a '.json' file and contains the following:

- Acknowledgement Status, i.e. ACKNOWLEDGED
- Acknowledgement ID.

Note:

The Acknowledge ID is useful if you need to contact PeopleXD Support regarding this file.

The file Status updates to 'Accepted.'

The screenshot shows the 'Transfer submission details' page. At the top, there's a 'Company' dropdown set to '2114 IRISH YEAR END' and a 'Search pay group' field. Below is a table with columns: Pay group, Submission type, Period / Month, Run Number, Submission ID, Transfer fi..., Status, and Confirmed. The first row of data shows '2021 - Irish Monthly ...', 'Normal Submission', '202105', '0', '2021_202122_62_20220726', a toggle switch, and a green button labeled 'Accepted' which is highlighted with a red box. To the right of the 'Accepted' button is a 'RUN CHECK' button and a 'Confirmed' toggle switch.

8. **Run Check** - This request is generated automatically once the status is 'Transferred.' This requests an update from Revenue.

- The submission is identified by the Submission ID.

Note:

A payroll run can be made up of many submission files i.e. Normal and Full Resubmission files. The Run Check is requesting Revenue's validation for the selected submission files only.

Once processed, the submission Status updates with one of the following values:

Status	Description
Accepted Completed – all valid expenses	<u>Submission Completed.</u> All data validated in good order.
Accepted Completed – invalid expenses	<u>Submission Completed.</u> Some data items not in good order. Some of the files may include some valid and some invalid expenses. See 'Check Run Response' json file for details on invalid expenses.

Status	Description
	Next Steps. Correct data, generate and transfer a new Normal Submission File.
Pending	<u>Submission Pending.</u> This means the file has been transferred but has not yet been reviewed by Revenue. If the status remains in 'Pending', you can click <i>Run Check</i> to manually check the status of the transfer.
No Response	Where there is no response from Revenue on this screen, the submission will not be allowed to generate again. You will need to click <i>Run Check</i> to get a response or contact Revenue directly.

3.2.1. Multiple Pay Groups

It is possible to transfer files for multiple Pay Groups at one time.

1. Enable the *Transfer File* toggle for all Pay Groups to be transferred.

Search pay group									
Pay group	Submission type	Period / Month	Run Number	Submission ID	Transfer file	Status	Confirmed		
1236 - Irish YE Univers...	Normal Submission	202004	0	1236_202017_806_20200121	☒	Pending	RUN CHECK	☐	
1237 - Irish YE University	Normal Submission	202004	0	1236_202017_806_20200100	☒	Pending	RUN CHECK	☐	

2. Click **Transfer**.
3. Click **Yes** on the confirmation message.

Note:

This transfers a digital copy of the submission JSON file directly from the database.

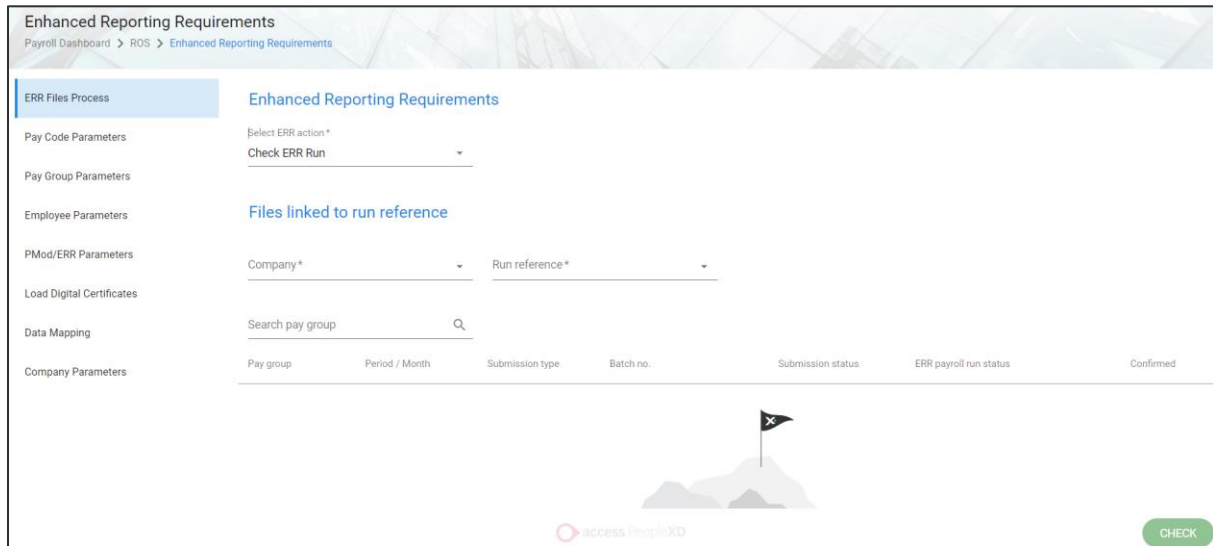

3.3. Check ERR Run

If the payroll run includes multiple submission files, i.e. both Original Submission and Correction Submission files, it is recommended to complete a Check ERR Run process for reconciliation. This requests the overall ERR totals reported to Revenue for the payroll run, i.e. Control Totals.

Follow these steps to complete a Check ERR Run:

Enhanced Reporting Requirements - User Guide

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Enhanced Reporting Requirements*.
2. Click the **ERR Files Process** tab.
3. Select **Check ERR Run** from the *Select ERR action* drop-down menu.

4. Select a **Company Reference** from the drop-down list.
5. Select the **Run Reference** from the drop-down list.

Note:

PeopleXD uses the Payroll Run Reference to identify the payroll event to which the submission refers. It also allows you to get summary totals for payroll runs, even if there have been multiple submissions.

6. Click **Check** to run the reconciliation.
 - This runs the Check Payroll Run Request web service, which returns a summary of all files submitted for that run reference.
7. Click **Yes** on the confirmation message.
 - Once complete, the Payroll Run Status updates to 'Processed'
8. The *Submission Status* also updates for all submission files which made up the Payroll Run.

Status	Description
COMPLETED – all valid expenses	All expenses successfully validated. The process is complete.

Status	Description
COMPLETED – invalid expenses	There are some errors on the expenses. These are visible on the returned json file A new Corrections file needs to be generated and transferred to revenue again.
PENDING	Awaiting validation at Revenue

9. The Check ERR Run response file is generated to the Report Centre in the following formats:

- CSV file
- Json file

```
check_err_run_response_505_202404_202404_v2.json
1 [{"status": "PROCESSED", "amount": 200, "expenseBenefitSubmissions": [{"submissionID": "505_202404_350_20230927", "status": "COMPLETED",
"expenseBenefitSubmissionSummary": {"amount": 200, "expensesBenefitsCount": 2, "expensesBenefitsToDeleteCount": 0}}, {"expenseBenefitSummaries": [
{"lineItemID": "ERR0012_202404_13376", "employeeID": {"employeePpsn": "7063334GA", "employmentID": "ERR0012", "employerReference": "ERR0012",
"category": "TRAVEL_AND_SUBSISTENCE", "subCategory": "TRAVEL_VOUCHER", "amount": 100}, {"lineItemID": "ERR0011_202404_13375", "employeeID":
{"employeePpsn": "7063333EA", "employmentID": "ERR0011", "employerReference": "ERR0011", "category": "TRAVEL_AND_SUBSISTENCE",
"subCategory": "TRAVEL_VOUCHER", "amount": 100}}]]]
```

10. In the case where the status returns as 'COMPLETED – invalid payslips', then the file will detail the invalid code and reason.

Note:

The *Confirmed* toggle cannot be enabled here, as the *Check Payroll Run* screen is read only.

3.4. Confirm Transfer

Once the file is transferred, and the Check ERR Run is complete, you can confirm the transfer to remove it from your list.

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Enhanced Reporting Requirements*.
2. Click the **ERR Files Process** tab.
3. Select **Transfer Submission Files** from the *Select ERR Action* drop-down menu.
4. Enable the **Confirmed** indicator.

Transfer submission details

Company*
2114 IRISH YEAR END

Search pay group

Pay group	Submission type	Period / Month	Run Number	Submission ID	Transfer fi...	Status	Confirmed
2021 - Irish Monthly ...	Normal Submission	202105	0	2021_202122_62_20220726	☒	Accepted	☐

5. Click **Yes** on the confirmation message to remove the file from your list.

Note:

The Confirmed indicator can only be select from the *Transfer Submission File* screen. The *Check ERR Run* screen is read only.

3.5. ERR Monthly Report

The ERR Monthly Report process is optional but recommended. This provides the employer reconciled values for each ERR Submission File transferred for that month. Please note that you can only run this service for a month from the 1st of the next month. For example I can run the January Reconciliation service from the 1st of February.

To run this web service, complete the following steps:

1. Go to *Payroll Dashboard > Manage Payroll > Outputs > ROS > Enhanced Reporting Requirements*.
2. Click the **ERR Files Process** tab.
3. Select **ERR Monthly Report** from the *Select ERR action* drop-down list.

Enhanced Reporting Requirements - User Guide

Enhanced Reporting Requirements

Payroll Dashboard > ROS > Enhanced Reporting Requirements

ERR Files Process

Enhanced Reporting Requirements

Select ERR action *

ERR Monthly Report

ERR Monthly Report

Company * Month * Year *

2114 IRISH YEAR END January 2024

access PeopleXO

RUN

4. Select a **Company** from the drop-down list.
 - The Year field populates by default to the current year. However, you can run this reconciliation service for previous months/years by entering a prior year.
5. Click **Run**.

The ERR Monthly Response files generate to the Report Centre in the following formats:

- CSV file
- Json File

The returned, reconciled values are displayed in the file.

```
err_monthly_report_response_505_SEPTMBER_2023_v1 (2).json
1 [{"employerRegistrationNumber":"9014856VH","taxYear":2023,"month":"SEPTEMBER",
  "dateTimeEffective":"2023-10-31T15:42:05.478Z","numberOfExpensesBenefits":6,"totalAmount":458.02,
  "categoryBreakdowns":{"TRAVEL_AND_SUBSISTENCE":{"totalAmount":458.02,"subCategoryBreakdown":
    {"SITE_BASED_EMPLOYEES":28.02,"TRAVEL_VOUCHERED":430}}}, "runReferenceBreakdowns":{"505_000487":
    {"submissionDate":"2023-10-02","totalAmount":129.01}, "505_000308":{"submissionDate":"2023-09-26","totalAmount":200},
    "505_000475":{"submissionDate":"2023-10-02","totalAmount":129.01}}}]
```

Note:

The monthly report includes all accepted submission items for employees under the company tax registered number made via any system/method (i.e. not just payroll system returns).

4. How to Configure ERR

4.1. Overview

The purpose of this section is to outline the configuration required for Enhanced Reporting Requirements. The configuration focuses on the below ERR Parameters:

1. Pay Code Parameters
2. Pay Group Parameters
3. Employee Parameters
4. PMod/ERR Parameters
5. Load Digital Certs
6. Data Mapping
7. Company Parameters

These parameters are all located on the *Payroll Dashboard > Manage Payroll > Outputs > ROS > Enhanced Reporting Requirements* screen.

Enhanced Reporting Requirements

Payroll Dashboard > ROS > Enhanced Reporting Requirements

ERR Files Process

- Pay Code Parameters
- Pay Group Parameters
- Employee Parameters
- PMod/ERR Parameters
- Load Digital Certificates
- Data Mapping
- Company Parameters

Enhanced Reporting Requirements

Select ERR action*

Generate submission file

Generate submission details

Submission type*

Normal Submission

Pay group* Employee

Period / Month Run No

4.2. Pay Code Parameters

**Note:**

ERR is the reporting of non taxable benefits to Revenue. It is therefore important that you ensure the pay code configuration is correct to ensure that they are not also reported in the PSR (PAYE Mod) submission. Pay Codes used for ERR should:

- Have a Non Taxable Analysis Type
- Be Non taxable
- Be Non PRSable
- Be Non USCable

All Pay Codes need to be reviewed for new parameters and updated as required. Follow the steps below to view/update these new parameters:

1. Go to the **Enhanced Reporting Requirements** screen and click the **Pay Code Parameters** tab.
2. Search for the relevant **Pay Code**.
3. Select the **Category** from the drop-down list.
 - a. If the Category is Travel and Subsistence, select a *Subcategory*.

**Note:**

A Subcategory can only be selected when the Travel and Subsistence is selected as the Category. A 404 error will display when an incorrect Category/Subcategory combination is selected.

4. Repeat for all pay codes to be included in the ERR return to Revenue.

Enhanced Reporting Requirements - User Guide

Enhanced Reporting Requirements

Payroll Dashboard > ROS > Enhanced Reporting Requirements

Data Mapping	Allowance - Scaled Value - Uni 1022	Travel and Subsistence	Travel Vouched
Company Parameters	Allowance Percentage 1094	Travel and Subsistence	Subsistence Vouched

access PeopleXDD

SAVE

5. Click **Save**.

The table below details the configuration available:

Category	Subcategory
Remote Working Daily Allowance	N/A
Small Benefits Exemption	N/A
Travel and Subsistence	Eating On Site
	Emergency Travel
	Site Based Employees
	Subsistence Unvouched
	Subsistence Vouched
	Travel Unvouched
	Travel Vouched

4.3. Pay Group Parameters

All Pay Groups need to be reviewed and updated as required. To do this:

1. Go to the **Enhanced Reporting Requirements** screen and click the **Pay Group Parameters** tab.

Pay group	Agent TAIN	Previous periods
10 - Irish Monthly 10		☒
2021 - Irish Monthly 2021		☒
2021 - Irish YE Weekly 21		☒

2. Search for the relevant **Pay Group**.
3. Amend the parameters:
 - a. Agent TAIN
 - b. Previous Periods

Note:

If you need to exclude a pay group from ERR you will need to raise a case on the customer success portal as this option is not available by default.

4. Click **Save**.

4.4. Employee Parameters

If required an employee can be excluded from the ERR return. To do this:

1. Go to the **Enhanced Reporting Requirements** screen and click the **Employee Parameters** tab.
2. Search for the relevant employee and enable the **Exclude employee** toggle.

Enhanced Reporting Requirements - User Guide

The screenshot shows the 'Enhanced Reporting Requirements' interface. On the left is a sidebar with tabs: 'ERR Files Process', 'Pay Code Parameters', 'Pay Group Parameters', 'Employee Parameters' (selected), 'PMod/ERR Parameters', 'Load Digital Certificates', 'Data Mapping', and 'Company Parameters'. The main area displays a table with two rows of employee data. The first row is for 'John May 000264' with a toggle switch turned on. The second row is for 'Amelia May 000265' with a toggle switch turned off. At the top right of the main area is a search bar with the text 'may' and a magnifying glass icon. At the bottom right is a green 'SAVE' button. The footer includes the 'access PeopleXD' logo and pagination '1 - 2 of 2'.

ERR Files Process	may	
Pay Code Parameters	Employee	Exclude employee
Pay Group Parameters	John May 000264	☒
Employee Parameters	Amelia May 000265	☐

3. Click **Save**.

4.5. View PMOD/ERR Parameters

To view these parameters, follow the steps below:

1. Navigate to the **Enhanced Reporting Requirements** screen and click the **PMOD/ERR Parameters** tab.

The screenshot shows the 'Enhanced Reporting Requirements' interface with the 'PMod/ERR Parameters' tab selected. The main area contains various configuration fields. At the top, there are 'Live host' (www.ros.ie) and 'Test host' (softwaretest.ros.ie) fields. Below these are 'Software used' (softwareUsed=Core) and 'Software version' (softwareVersion=5) fields. The 'Revenue URL' section contains three fields: 'Revenue URL submission file parameter' (/paye-employers/v1/rest/payroll/), 'Revenue URL RPN file parameter' (/paye-employers/v1/rest/rpn/), and 'Revenue URL ERR submission file parameter' (/paye-employers/v1/rest/enhanced_report...). The 'Proxy' section includes 'Proxy URL', 'Proxy Username', and 'Proxy Password' fields, each with a placeholder text. Below these are two toggle switches: 'Detailed log' (turned on) and 'PPSN Correction Disable' (turned off). At the bottom, there are four 'Gross pay threshold' fields with up/down arrows: 'Gross pay threshold, no tax paid', 'Gross pay threshold, negative tax paid', 'Gross pay threshold, no USC paid', and 'Gross pay threshold, negative USC paid'. A 'Register New Employee RPN in Adv...' field is also present. A green 'SAVE' button is at the bottom right. The footer includes the 'access PeopleXD' logo.

Note:

These parameters are preconfigured and do not require any user configuration.

4.6. Digital Certificates

4.6.1. What is a Digital Certificate?

Individuals, companies and other entities need the ROS Digital Certificate to access online services for business taxes. It is also required by agents who wish to access online services for their clients.

A Digital Certificate is required for each company. Loading the Digital Certificate is a one-off step. It is required to set up the link between the company and Revenue to allow direct online communications, e.g. for ERN retrieval and ERR transferring of files.

Revenue provides the employer with the relevant Digital Certificate. These are available to the employer via their www.ROS.ie profile. Employers must log in to ROS to retrieve and download the Digital Certificate and Certificate Password.

Note:

Agents who are running payroll on behalf of a company must log on to ROS and retrieve an Agent Digital Certificate and the relevant Certificate Password using their Tax Advisor Identification Number (TAIN).

4.6.2. ERR Digital Certificates

Enhanced Reporting Requirements will appear as an additional permission under the Employer ROS certificate. Revenue have advised that they will have these ERR permissions automatically applied to the Employer certificate and the permissions will be available for assignment to any sub certificate under the Employer certificate.

To assign ERR to any sub certificate you will need to log into their ROS permissions screen.

Within PeopleXD, where an Employer Cert or Sub Cert is going to be used you will need to upload the digital cert for ERR into PeopleXD for or all relevant companies. This may be the same digital cert as used for PMOD returns but it will still need to be uploaded for ERR returns to be successful.

Depending on your site you may need to do this in both Payroll and Expense:

1. Standalone Expense or Payroll on a different database:
 - Upload digital certs into **Expense** using the *ERR Load Digital Certs* screen.

And

 - Upload digital certs into **Payroll** using the *ERR Load Digital Certs* screen.
2. Payroll on the same database as Expense:
 - Upload digital certs into Payroll using the *ERR Load Digital Certs* screen. This will be used in Expense.

Note:

For ERR returns to be successful a digital cert must exist on the database for each company tax registration.

Note:

The ERR Digital Cert File Extension must be .p12. When you download the file if it has another extension e.g. .p12.bac, you will need to save the file as the file type p12 before loading the digital cert.

4.6.2.1. Upload ERR Digital Certificates

To upload ERR Digital Certificate(s):

1. Go to the **Enhanced Reporting Requirements** screen and click the **Load Digital Certificates** tab.

The screenshot shows the 'Enhanced Reporting Requirements' screen. The breadcrumb trail is 'Payroll Dashboard > ROS > Enhanced Reporting Requirements'. On the left, a sidebar lists several options: 'ERR Files Process', 'Pay Code Parameters', 'Pay Group Parameters', 'Employee Parameters', 'PMod/ERR Parameters', 'Load Digital Certificates' (which is highlighted with a blue bar), 'Data Mapping', and 'Company Parameters'. The main content area has a header 'ERR Files Process' and contains a 'Company*' dropdown menu, a 'Certificate Password*' text field, and a 'Select a file ...*' button with an upload icon. Below the button is a 'Browse for file' link. At the bottom right, there is an 'OK' button and the 'access PeopleXD' logo.

2. Select a **Company** from the drop-down list.

3. Enter the **Certificate Password** provided by ROS.
4. Click the **Upload** icon to select the Digital Certificate file from the location where it was downloaded.
5. Click **Save** – A confirmation message displays.
6. Repeat the steps above for all companies

4.7. Data Mapping

The data mapping screen is available to allow mapping of Address Data to identify the county field in an employees address. This is not mandatory however and as such it is recommended not to configure this for ERR returns if it is not already configured for PAYE Modernisation returns.

For guidance on how to configure this refer to section 8.7. Address Data Configuration & Mapping in the [PAYE Modernisation \(Portal\) User Guide](#).

4.8. Company Parameters

TAIN is a tax agent's tax advisor identification number. Where applicable, this TAIN can be recorded on PeopleXD using the *Company Parameters* screen. To do this:

1. Go to the **Enhanced Reporting Requirements** screen and click the **Company Parameters** tab.

Company	Agent TAIN
1114 - UNIVERSITY IRISH 1114	
2114 IRISH YEAR END 2114	
Abc Solutions 1000	
Customer Company (Ie) 1237	
Training Company Irish 2023	
University Irish 2	

2. Fill in the **Agent TAIN** field for each relevant company
3. Click **Save**.

5. Grant Access to the ERR Screens

5.1. Menu Profiles

The below Menu Profile turns on all ERR menu options by default. Once a user has the menu profile turned on in Security they will have full access to the ERR screens and functionality:

Menu Profile
ERR_PAY_USER

5.2. Menu Options

To access the Enhanced Reporting Requirements screen and functionality, users require the following menu options:
