1. Introduction

1.1. Purpose of this Guide

The purpose of this document is to provide guidance on how to use the *Single Processing* task in Payroll.

1.2. Overview of Single Employee Processing

The *Single Processing* task, which replaces the previous *Trial Payroll* task, allows you to calculate payroll for a single employee, by processing the following task(s):

- **5-Step Payroll:** The *Salaries & Allowances* and *Payroll Validation* tasks.
- **3-Step Payroll:** The *Calculate Payroll* task.

The *Single Processing* task eliminates the need to rerun the *Payroll Validation* task for the entire pay group when a single employee is recalculated. Therefore, speeding up the overall payroll process.

Note:

The *Single Processing* task does not allow you to change the sequence in which payroll tasks are processed, e.g. you cannot process a single employee once the *Confirm Timesheet* task is complete

Previously to this change:

- Running a *Trial Payroll* for a single employee cleared out any gross to nett details populated by the *Payroll Validation* task, replacing them with gross to nett details populated by employee's *Trial Payroll*.

Payroll: Single Employee Processing

- Any changes to an employee's calculated payroll required the *Payroll Validation* task to be rerun for the entire pay group.

The *Single Processing* task no longer clears out the previously processed gross to nett details for other employees in the pay group, i.e. the calculated payroll tables are updated with the newly calculated details, rather than cleared down.

Note:

- You should regenerate and recheck the control reports.
- Previously generated reports are not updated.

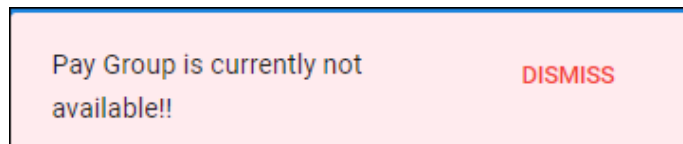

1.3. Important Considerations

1.3.1. The Payroll Process

Where the *Salaries & Allowances* task is complete for a pay group, and a *Single Processing* task has been run without completing the *Payroll Validation* task, note the following:

- The final run indicator does not reset for the pay group.
- Payroll will allow you to continue with your payroll, i.e. run your *Confirm Timesheet* task.
- Only the employee for which the *Single Processing* task was run will be processed for the pay group.

If you attempt to run the *Single Processing* task twice in quick succession, the following notification message generates:

Note:

Where this notification message generates, wait a minute before generating *Single Processing* task again

1.3.2. Cost Allocation

Where an employee's cost allocation has changed after the *Salaries & Allowances* task is complete, note the following:

- The final run indicator resets for the pay group.
- The *Salaries & Allowances* task must be rerun for the pay group.
- Generating the *Single Processing* task

1.3.3. Payroll Messages

Once the *Salaries & Allowances* task completes, the following payroll messages generate:

Payroll: Single Employee Processing

Message Number	Message	Number of Employees	Message Categories	Classification
254	{val1} Employee(s) processed			System ***
255	{val1} Timesheet(s) committed			System ***

1.4. Configuration Required

No additional configuration is required to use the *Single Processing* task.

2. Single Employee Processing

2.1. Overview

Where an issue has been identified with a single employee's calculated payroll, the single employee's payroll can now be recalculated, without the need to rerun the *Payroll Validation* task for the entire pay group.

2.2. Single Employee Processing

Example:

In the below example, an additional taxable allowance of €100 has been added to employee Wade Doyle's payslip after the *Payroll Validation* task is complete.

To recalculate payroll for a single employee:

1. Go to *Payroll Dashboard > Employee > View*.
2. Select **Actions**.
3. Select *Single Processing*.

2.3. Report Centre

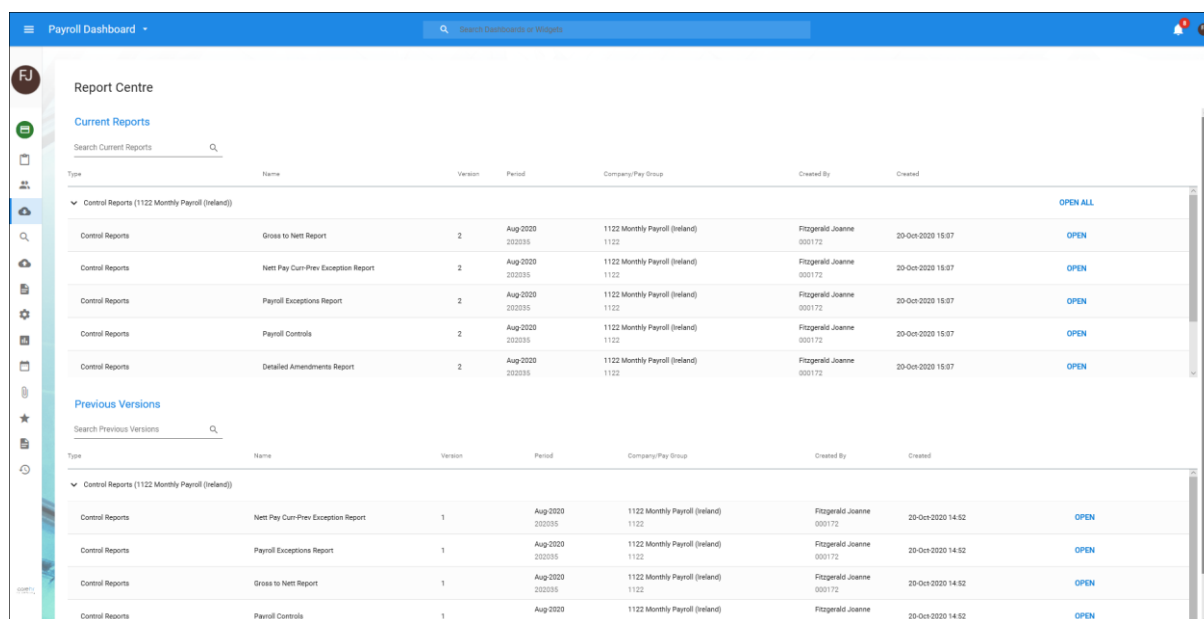

Note:

- You should regenerate and recheck the control reports.
- Previously generated reports are not updated.

Payroll: Single Employee Processing

To help identify the most recently generated payroll reports, the *Report Centre* groups payroll reports into two sections:

- **Current Reports:** This section contains the most recent version of the payroll reports generated for the pay group.
- **Previous Versions:** If the payroll reports are regenerated for the pay group, then the older versions of the payroll reports move to the *Previous Versions* section.

The screenshot displays the 'Report Centre' interface within a 'Payroll Dashboard'. It is divided into two main sections: 'Current Reports' and 'Previous Versions'. Both sections feature a search bar and a table of reports. The 'Current Reports' section shows five reports for '1122 Monthly Payroll (Ireland)' with version 2, all created on 20-Oct-2020 at 15:07. The 'Previous Versions' section shows four reports for the same payroll with version 1, all created on 20-Oct-2020 at 14:52. Each report entry includes a table with columns for Type, Name, Version, Period, Company/Pay Group, Created By, and Created, followed by an 'OPEN' link.

3. Back Office – Trial Payroll

The *Trial Payroll Task* in *Back Office* no longer clears out the previously processed gross to nett details for other employees in the pay group, i.e. the calculated payroll tables are updated with the newly calculated details, rather than cleared down.

Previously to this change:

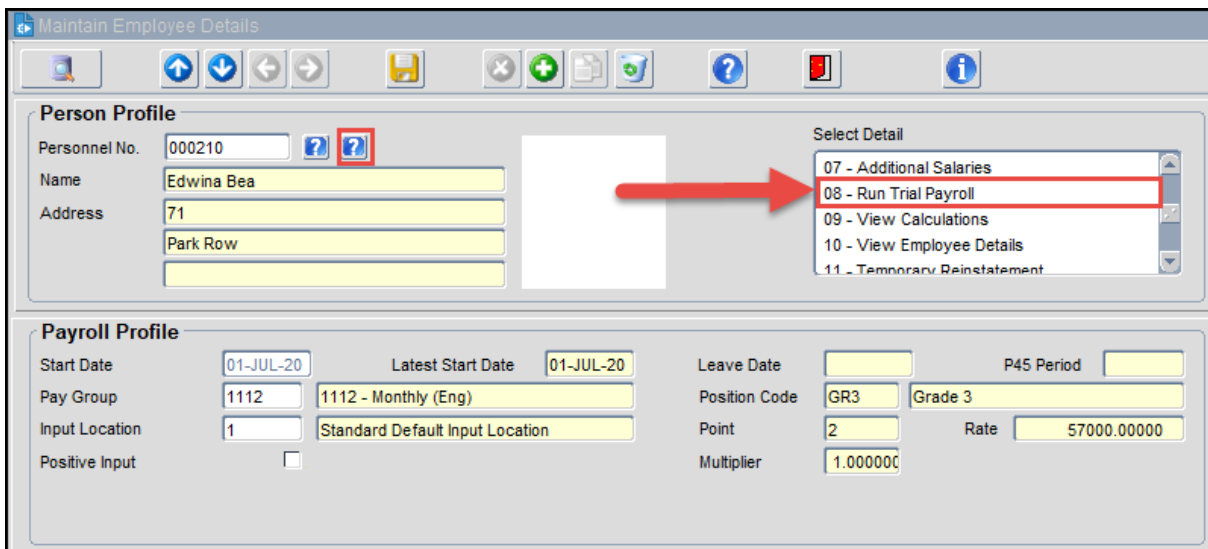

- Running a *Trial Payroll* for a single employee cleared out any gross to nett details populated by the *Payroll Validation* task, replacing them with gross to nett details populated by employee's *Trial Payroll*.

Note:

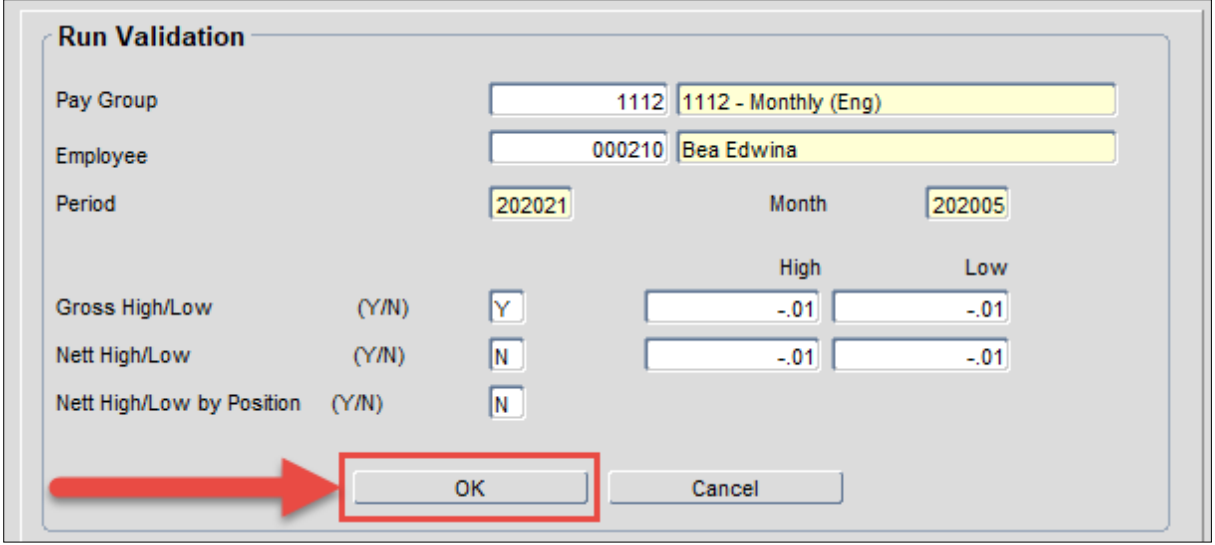

Running a *Trial Payroll* for a single employee requires the *Payroll Validation* task to be rerun for the entire pay group before you can complete the *Confirm Timesheets* task.

To run a *Trial Payroll* in Back Office:

- Go to CorePay > Employee > Maintain Employee Details.
- Enter the *Employee Reference* or select the  button on the right-hand side to select an *Employee* from the LOVs.
- Hit Enter/Tab.
- Select *08 – Run Trial Payroll* from the *Select Detail* menu.

The *Run Validation* screen opens.

The 'Run Validation' dialog box contains the following fields and controls:

- Pay Group:** 1112, 1112 - Monthly (Eng)
- Employee:** 000210, Bea Edwina
- Period:** 202021, **Month:** 202005
- Gross High/Low:** (Y/N) Y, High: -.01, Low: -.01
- Nett High/Low:** (Y/N) N, High: -.01, Low: -.01
- Nett High/Low by Position:** (Y/N) N
- Buttons:** OK (highlighted with a red box and a red arrow pointing to it), Cancel

Note:

You can also access this screen by going to:

1. CorePay > Input > Run Validation.
2. Enter the Employee Reference or click  to select an *Employee* from the LOVs.

5. Click **OK**.
