1. Overview

1.1. Purpose of the Guide

The Purpose of this document is to provide guidance on the software and configuration for an employee Social Welfare entitlement for Sickness days.

The Social Welfare Guide and module relates to the calculation of Social Welfare for Sickness absence only and does not cover other calculation of social welfare entitlements for other absences such as Maternity, Parental Leave.

1.2. Costing

In terms of costing by default all Social Welfare Sickness calculations are posted to the employee default appointment cost centre. In PeopleXD Payroll there is a facility to allocate non 'Salary and Permanent Allowance' type transactions i.e. Social Welfare, Hourly Payments/once off timesheets etc over split codes but this currently works on the following basis:

One timesheet is created for all the Social Welfare periods of absence for the employee i.e. assume an employee in a monthly payroll is sick for week 1, back to work in week 2 and sick again in week 3 and that the employee has a split costing set up to only start in week 3.

Because ONE payment record covering week 1 and week 3 is generated (as opposed to 1 for each day/occurrence of absence) the entire payment (week 1 and week 3) will be split over the costing split which only came into effect in week 3 i.e. the system will use the latest cost allocation record up to the end of the month and apply this to the entire timesheet amount.

If in conjunction with the Sickness Social Welfare Module one is also licensed to use the Grossing up aspect of the SW Module, there is a facility to allocate the calculated grossed down **adjustment over the underlying cost codes split of the affecting Social Welfare transactions.**

For example, if the Social Welfare transaction is split over cost code A and B then the Gross Adjustment can also be split over cost code A and B.

1.3. Waiting Days

The following are example of Social Welfare waiting days in practice:

- If the employee has been employed for less than the SSP qualifying weeks (13), then the standard waiting days (3) will apply.
- Where the employee qualifies for SSP, and the employee is absent for the first time in the tax year, the SSP Days (5) will apply as waiting days for this absence.
- For the next new absence and subsequent new absences, the SSP Days (5) will be reduced by the number of sick days taken in the tax year giving the current absence waiting days. If the current absence waiting days are greater than the standard waiting days (3) then those waiting days are applied.
- Where the current absence waiting days are less or equal to the standard waiting days, then the standard waiting days will be applied.

These values are the 2024 parameters for SSP and Social Welfare. These values may change annually.

For further information please see the [Government website](#).

2. Social Welfare Configuration

2.1. Set up Welfare Codes

To set up Social Welfare codes:

1. Go to the **People Management Dashboard**.
2. Click the **Data Centre tab**.
3. Click **Open** next to the **Reference Data** option.
4. Click the **Other References** tile.
5. Select **Social Welfare Class** from the *Reference Type* drop-down menu.
6. Click **Add**.

Save

7. Enter a **Code** and **Description**.
8. Click **Save**.

2.2. Maintain Social Welfare Rates

To Maintain Social Welfare rates:

1. Go to the **Payroll Dashboard**.
2. Click the **Settings** tab.
3. Click the **Social Welfare Rates** tile.
4. Enter a **Year Number** and press **Tab**.

Social Welfare Rates

Payroll Dashboard > Social Welfare Rates

Social Welfare

Year Number *

2024

Code	Description	Rate (Tax)	Rate (Non Tax)	Date Effective	
M1	Married 1 Child	33.83	6.00	01-JAN-20	...
S0	Single 0 Children	33.83	0.00	01-JAN-20	...

Cancel

Copy Year ...

Add

Save

5. Update the rates as required:
 - a. Amend a rate - Click into the field and amend the data.
 - b. Add a rate - Click **Add** and fill in the new line.
 - c. Click **Copy Year** then click **Yes**.
6. Click **Save**.

The relevant rates need to be assigned to each Social Welfare Code as described above.

Column	Description
Code	Social Welfare rate reference code.
Description	Social Welfare code description.
Rate(Tax)	The taxable rate relates to the individual's daily SW rate.
Rate(Non Tax)	The non-taxable relates to the additional amount (above the basic €188.00/6=31.33) of the employees daily SW rate which is attributable to a qualifying child and remains un-taxable.
Date Effective	The effective date of the Social Welfare code.

2.3. Social Welfare Offset Days

A number of offset days at Pay Group level. The offset days will be added to the sickness date and the 'new' date will then determine the period into which the transaction falls. This may be particularly useful where payrolls are run a week or more in advance.

For example, current payroll period in a fortnightly group, 201120 pays 8th May to 21st May.

User records sick pay for 9th to 13th May but does not want them paid until period 201122.

In this case, the offset days are set to 14 which has the effect of adding 14 to the sick pay dates.

These dates then assign the transactions to payroll period 201122.

To Amend the Social Welfare offset days:

1. Go to the **Payroll Dashboard**.
2. Click the **Settings** Tab.
3. Click the **Pay Group** Tile.
4. Select a Pay Group from the drop-down list.
5. Click **Next Page**.
6. Amend the **Social Welfare Offset Days**.

The screenshot shows the 'Pay Groups' settings page. The breadcrumb trail is 'Payroll Dashboard > Pay Groups'. The page contains several input fields and toggle switches. The 'Social Welfare Offset Days' field is highlighted with a red box. The fields include:

- Notional Pay (text input)
- Payable Order No. (dropdown)
- Payable Ord. Grp No (text input)
- Vote (dropdown)
- Divisor (text input)
- Auto Increment (text input)
- GL Code (dropdown)
- Transfer History Indicator (toggle)
- Legacy Supplementary Run (toggle)
- Turn Off No Associated Timesheets (toggle)
- Periodic Employee Hours (toggle)
- Payslip Tolerance (text input)
- Reprocess Indicator (toggle)
- Shared Services (toggle)
- PSPR Exclusion Indicator (toggle)
- Social Welfare Offset Days (text input, highlighted with a red box)

At the bottom, there is a 'Map Pay Groups' button, a 'Cancel' button, and a 'Save' button.

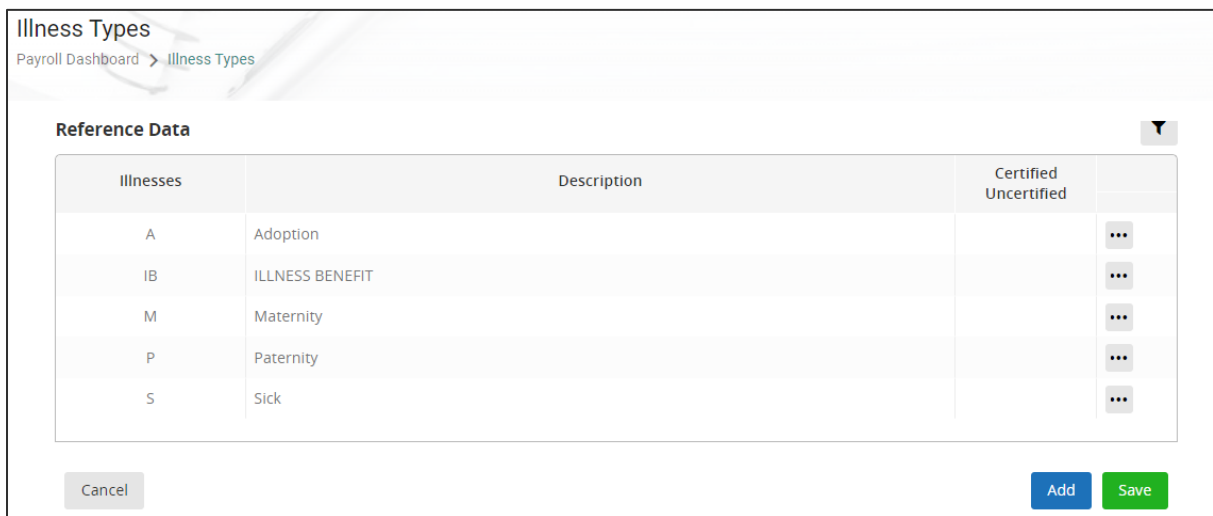

7. Click **Save**.

2.4. Illness Types

Illness Types must be set up for the purpose of grouping sickness absence pay codes which are deemed to be reckonable for Social Welfare deductions. Therefore, you must first set up these Illness Types and subsequently link your input/recording sickness absence pay codes to these.

Different Illness are usually due to different reasons. You can create several different Illness types from the Payroll Dashboard as follows:

1. Go to the **Settings** Tab.
2. Click the **Illness Types** tile.

Illness Types

Payroll Dashboard > Illness Types

Reference Data

Illnesses	Description	Certified	Uncertified
A	Adoption		...
IB	ILLNESS BENEFIT		...
M	Maternity		...
P	Paternity		...
S	Sick		...

Cancel Add Save

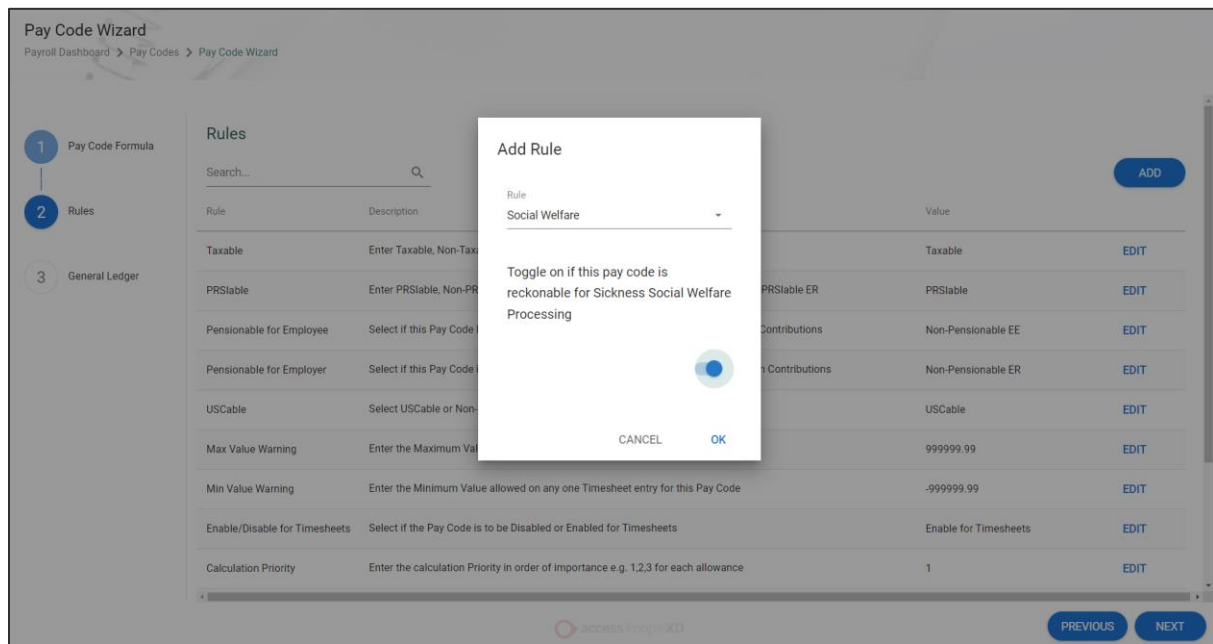

3. Click **Add**.
4. Enter an **Illness** and **Description**.
5. Click **Save**.

2.5. Configure Pay Codes - Payroll

All Pay Codes which are used to record an absence and which in turn are deemed to be sickness absence, qualifying for Social Welfare, must have the Social Welfare indicator enabled.

To enable the Social Welfare indicator:

1. Go to the **Payroll Dashboard**.
2. Go to the **Settings** Tab.
3. Click the **Pay Codes** Tile.
4. Search for the absence pay code and expand its **3-dot menu**.
5. Click **Edit**.
6. Click **Step 2 Rules**.
7. Click **Add**.
8. Select **Social Welfare** from the *Rule* drop-down menu.
9. Enable the Toggle.
10. Click **OK**.

2.6. Configure Pay Codes – WFM

2.6.1. Review the Payroll Indicator

Social welfare pay codes will typically be **Hourly or Daily** type pay codes. Where you are an integrated WFM site these should also be marked as 'Non Payroll' Pay codes as they are used for Recording the Sickness/Absence in WFM and are not passed to Payroll.

The Payroll Validation task will generate timesheets for these absences depending on how they are set up:

- Absence requires approval – The absence will need to be approved for a timesheet to generate in Payroll as part of the payroll validation task.
- Absence does not require approval – A timesheet is generated when the payroll validation task is run.

To review WFM pay code configuration:

1. Go to the WFM Admin Dashboard and click the **WFM Configuration** tab.
2. Click **Pay Codes**.
3. Search for the relevant pay code.
4. Review the **Payroll Indicator** field.

2.6.2. Amend the Absence Type

Pay Codes Created in Payroll need to be linked to the appropriate Absence Type in WFM. The absence type refers to the Illness Types configured in payroll above in section [2.4 Illness Types](#). The purpose of this link is to allow reporting and grouping of illness and absence only.

Note:

If you have created a new pay code this will need to be [imported into WFM from Payroll](#).

To configure the absence Pay Code in WFM:

1. Go to the **WFM Admin Dashboard** and click the **WFM Configuration** tab.
2. Click **Pay Codes**.
3. Search for the pay code.
4. Enable the **Absence** toggle.

2.6.3. Configure Company Settings

You will need to allocate pay codes and configure social welfare settings for each relevant company.

To do this:

1. Go to the **Payroll Dashboard**.
2. Click to the **Settings** Tab.
3. Click the **General Settings** Tile.
4. Select a **Company** from the drop-down list.
5. Click **Next Page**.
6. Fill in the **Corepay Social Welfare Parameters** section.
7. Click **Save**.

PeopleXD Payroll: Social Welfare - User Guide

The table details the Parameters inputs:

Input	Description
S.W Taxable	Select the pay code that social welfare taxable payments will appear on the payslip. This pay code should be a Value Pay code with a Multiplier of -1. Taxable should be 'N' and Prsiable indicator should be 'Y' (because the multiplier is -1).  Note: If applying grossing up, set Grossing Up Method on Pay Code to Social Welfare. You must ensure that a Gross Adjustment pay code has been set up in and assigned in: Payroll Dashboard>Settings>System Configuration>Payroll Validation Update.
S.W Non-Taxable	Select the pay code that social welfare non taxable payments will appear on the payslip. This pay code should be a Value Pay code with a Multiplier of -1. Taxable and Prsiable indicators should both be 'Y' (because the multiplier is -1)

PeopleXD Payroll: Social Welfare - User Guide

Input	Description
	 Note: If applying grossing up, set Grossing Up Method on Pay Code to Social Welfare. You must ensure that a Gross Adjustment pay code has been set up in and assigned in: Payroll Dashboard>Settings>System Configuration>Payroll Validation Update.
S.W Net Adjustment	Select the pay code that is used when an employee hands back their social welfare cheque to their company. They will receive a refund for the value of the cheque. Assuming all employees are keeping the Social Welfare cheque then there is no need to set up or specify a pay code here.
Non Taxable Days	Enter the number of social welfare days an employee is entitled to before being taxed on their payments. This should be set to 0.
Number of Unpaid Social Welfare Days	These are referred to as Waiting Days. Enter the number of days at the start of a 'New' illness that are not paid social welfare.
Number of Social Welfare Days Between Illness	Enter the number days allowed between illnesses before the illness is deemed to be 'New' and the waiting days apply again.

PeopleXD Payroll: Social Welfare - User Guide

Input	Description
Social Welfare Entitlement	Enable for Social Welfare Entitlements to be enforced.
Exclude Saturdays	Enable to Exclude Saturdays.
Exclude Sundays	Enable to Exclude Sundays.
Apply Extra S.W Day	When enabled, extra Social Welfare days for each Friday absence will be automatically generated. You would only need to tick this if the Absence Recording system, you are using is not generating the Saturday entry or the managers are only recording the weekday entries. It is only applicable if at source when recording the absence that the person recording the absence is not recording the Saturday. For example, if an employee works Monday to Friday and their manager records sickness for Monday to Friday only then if this indicator is ticked, the Payroll Validation will automatically generate the extra day/occurrence for the Saturday. In most sites where the absence is recorded in Core Time the Core Time Record Absence Screen will automatically generate the Social Welfare occurrence for the Saturday and for all Rest days as dictated by the employees work pattern. Therefore, where Core Time does this the 'Extra Social Welfare Day' indicator above should be left blank.

PeopleXD Payroll: Social Welfare - User Guide

Input	Description
S.W Out of Sequence	If the toggle is not Enabled the system will allow for the recording of out of sequence illness but will not value the illness. While there is not a deduction/payment made for these illnesses, the relevant days will be considered in the calculation of any future illness deduction/payment. If the above indicator is turned on, then: 1. If the illness is a continuation of a previous illness, then no waiting days will be applied, all sick days will be deemed to be deductible for Social Welfare, e.g. - Previous Illnesses processed in February. • 29th to 30th January • 20th to 28th February - Current Illness 1st to 5th February to be processed in March. This is deemed to be out of sequence due to previous illness of 20th to 28th February. - As this is a continuation of the illness of 30th January, no Waiting Days will be applied, therefore 5 Social Welfare days will be deducted. 2. If the illness is not a continuation of a previous illness, then waiting days will be applied, e.g. - Previous Illnesses processed in March. • 29th to 30th January • 20th to 28th March - Current Illness 22nd to 27th February to be processed in April. This is deemed to be out of sequence due to previous illness of 20th to 28th March. - As this is not a continuation of the illness of 30th January, 3 Waiting Days will be applied, therefore 3 Social Welfare days will be deducted.

PeopleXD Payroll: Social Welfare - User Guide

Input	Description
	3. If the illness is not a continuation of a previous illness, then waiting days will be applied, unless the illness is deemed to be continued by an existing illness, e.g. Previous Illnesses processed in March. • 29th to 30th January • 20th to 28th March Current Illness 15th to 19th March to be processed in April. This is deemed to be out of sequence due to previous illness of 20th to 28th March. This is not a continuation of the illness of 30th January; however it will be deemed to be continued by the illness of 20th to 28th March, therefore no Waiting Days will be applied and 5 Social Welfare days will be deducted.
Exclude Public Holidays	Enable to exclude public holidays.
Generate Extras S.W for Rest Days	Enable to generate extra Social Welfare for rest days.
Include Public Holidays in Waiting Days	Enable to Include Public Holidays in Waiting Days.

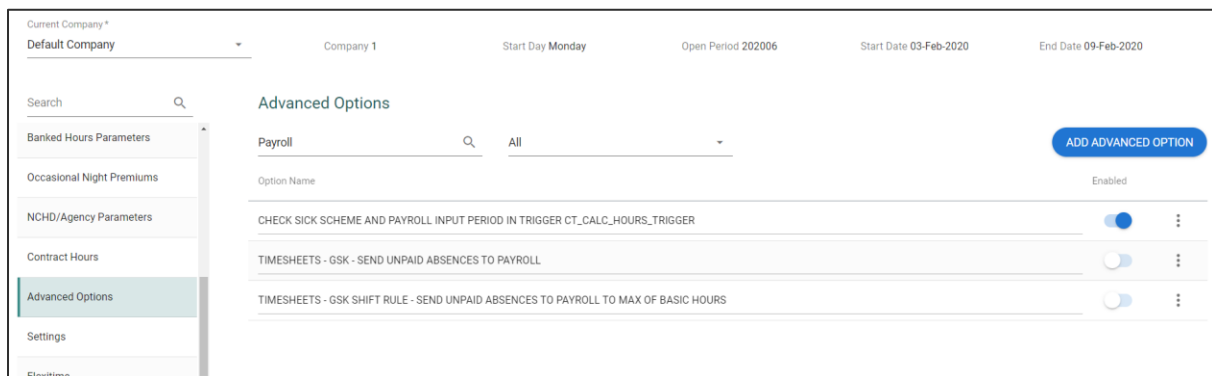

2.7. WFM Configuration

2.7.1. Payroll Input Period

If integrating with WFM the field Enable Payroll Periods must be configured so that all Sickness recorded in WFM is posted to the open payroll period as the time of input.

To do this:

1. Go to the **WFM Amin Dashboard**.
2. Go to the **WFM Configuration** Tab.
3. Click the **Company and Calendar Config** Tile.
4. Expand the **3-dot Menu** next to the relevant company and click **View/Edit**.
5. Click the **Advanced options tab**.
6. Search for CHECK SICK SCHEME AND PAYROLL INPUT PERIOD IN TRIGGER CT_CALC_HOURS_TRIGGER.
7. Enable the toggle.

Once enabled all social welfare configured pay codes that are subsequently recorded will transfer across to payroll.

Note:

Balances cannot be marked as Include Rest Days - this is not compatible with the SW advanced option as cannot recalculate balances if configured.

3. Employees Social Welfare Code

Each employee must be assigned the relevant Social Welfare Code to ensure that the system can calculate the employee's social welfare entitlement.

Most employers assign each employee the default code of Single no children and have Social Welfare deducted at this rate.

To assign a Social Welfare code to an employee:

1. Go to the **Payroll Dashboard**.
2. Click the **Employees** tab.
3. Search for the employee and click **View**.
4. Click the **Sundry Profile** tab.
5. Select the required Social Welfare code from the **SW Code** Drop-Down list.

The screenshot displays the 'Sundry Profile' tab for an employee named John Horatio. The interface includes a sidebar with navigation options like 'Statutory Payment Pr...', 'SSP History', 'SSP Detail', 'Occupational Detail', 'Sundry Profile' (selected), and 'Absence Rate Override'. The main content area is divided into three sections: 'Work Details', 'Additional Work Details', and 'UK Parameters'. In the 'Work Details' section, the 'SW Code' dropdown menu is highlighted with a red box, with a prompt 'Enter Social Welfare Code or choose one from the ...'. Other fields in this section include 'Sick Bonus Daily Average' and 'Uncertified Entitlement'. The 'Additional Work Details' section contains 'Sickness Category Code', 'Working Week', and 'CSO Ind'. The 'UK Parameters' section includes 'Apply Sick Bonus' (a toggle switch), 'Sick Entitlement', and 'CSO Employee Status'. Employee details at the top include 'Employee * John Horatio', 'Employee Reference No 000237', 'Original Start Date 01-Sep-20...', 'Latest Start Date 01-Sep-20...', 'NI Number PD234323E', 'Hours 37.5', 'Date of Birth 02-May-1990', 'FTE Hours', 'Increment Date', and 'Location'.

4. Processing Social Welfare

Once recorded Social Welfare is calculated when the Payroll Validation task is run as part of the Payroll Process. This can then be reviewed and amended before the Payroll is closed.

4.1. Record Social Welfare

Social Welfare can be recorded in People Management, WFM or Payroll. It is the recording of transactions against Certified Sick Pay Codes in either People Management, WFM or Payroll that will trigger a potential Social Welfare payment.

For further details on how to record Social Welfare see the below articles:

- [Record Social Welfare in People Management.](#)
- [Record Social Welfare in Payroll.](#)
- [Record Social Welfare in the WFM Admin Dashboard.](#)

Once a sickness absence is recorded using Social Welfare Pay Codes Social Welfare will be calculated when the Payroll Validation task is run as part of the Payroll Process.

4.2. Check the Calculated Output in Payroll

Payroll will automatically calculate the amount of the Social Welfare Deduction when the Payroll Validation is run.

The calculated amount(s) can be seen under the View Timesheets screen or the View Gross to Net Screen under the appropriate pay codes i.e. Taxable or Non-Taxable system pay codes.

4.3. Log Files

Each time the Payroll Validation is run it produces a log file for the Social Welfare calculation called:

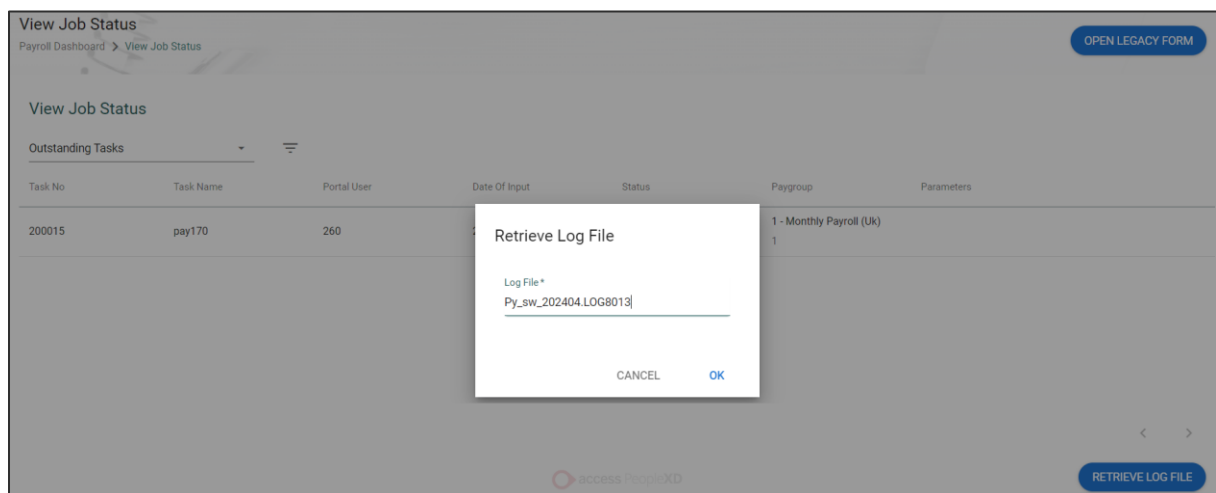

- Py_sw_YYYYMM.LOG'Pay Group.

The naming convention varies according to the pay period number (YYYYMM) and the pay group code. For example, if running for Pay Group Code 10 in period 202404 then the log file name would be as follows:

- Py_sw_202404.LOG0010

To View the log file:

1. Go to the **Payroll Dashboard**.
2. Go to **Settings**.
3. Click the **View Job Status** tile.
4. Click **Retrieve Log File**.
5. Enter the name of the Log file.
6. Click **OK**.

5. Menu Options Required

The following Menu Options are required to access the Social Welfare screens:

Menu Option	System
CorePersonnel – Social Welfare Status	CorePortal
Settings – Social Welfare Rates	CorePortal Pay
System Legislative Rates – Social Welfare	CorePortal Pay
