2.2. RTI Exception Report	4
2.3. RTI Transfer	5
2.4. EPS (Employer Payment Summary) Changes	5

1. Overview

The purpose of the document is to highlight the changes made to Real Time Information (RTI).

Note:

There is no new configuration required for these RTI Stability enhancements

2. Changes to RTI

The following are the updates to RTI for V26.

Information on these are also available in the UK Payroll Year End 2018/19 course.

[UK Payroll Year End 2018/19](#)

2.1. Excel Report Generated from RTI Screen

The excel file generated from the RTI Screen for file type FPS has been amended. This now also outputs the values for 'RTI EMPNO' and 'NINO' as well.

AK	AL	AM	AN	AO	AP	AQ	AR	AS	AT	AU	AV	AW	AX	AY
Non Taxat	BIK Car M	BIK Car A	BIK Car H	BIK Car R	BIK Car E	BIK Car A	BIK Car C	BIK Car C	BIK Car C	BIK Car C	BIK Car C	BIK Car C	RTI Work Number	NINO
0														
750000													100359-CORE-RTI-20	AC139919C
458750														
0														
1009250														
1009250														

2.2. RTI Exception Report

The RTI exception report has been amended to now also flag the following exceptions which result in an RTI File Transfer Failure:

- If the employee has no date of birth
- If invalid characters exist in the employees' 'initial' field
- If any address line 1 to 5 > 35 characters.

Pay3600E	CorePay v26_BETA gain	User : COREHR	Page : 1 Of 1
Version : v26_BETA.03	RTI Exception Report	Date : 23-JAN-2018 16:21:16	
Employee Reference	Error Text		Error Code
100397	The Initials field contains non alpha character.		
100397	Date of Birth cannot be null		6789
100397	4 Address line(s) contain more than 35 characters. HMRC only accept 35 characters per address line.		7824
----- End of Report -----			

Where these exception messages occur, users are required to fix the flagged employees and regenerate the FPS file before transferring.

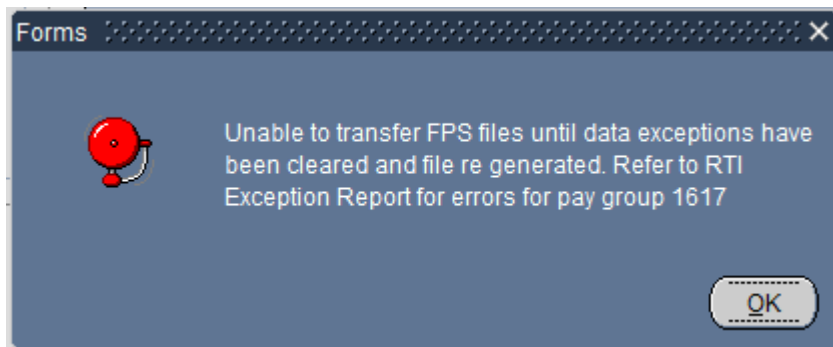

Users will be required in this case to go back to the RTI FPS, review the exception report generated from that and take correction action on the issues highlighted.

After this has been they can regenerate the RTI FPS File and only then will they be able to successfully transfer the RTI FPS File to HMRC.

2.3. RTI Transfer

The RTI Transfer option will now prevent users from attempting to transfer an FPS file where the FPS exception report had identified critical errors that would have caused the file to reject.

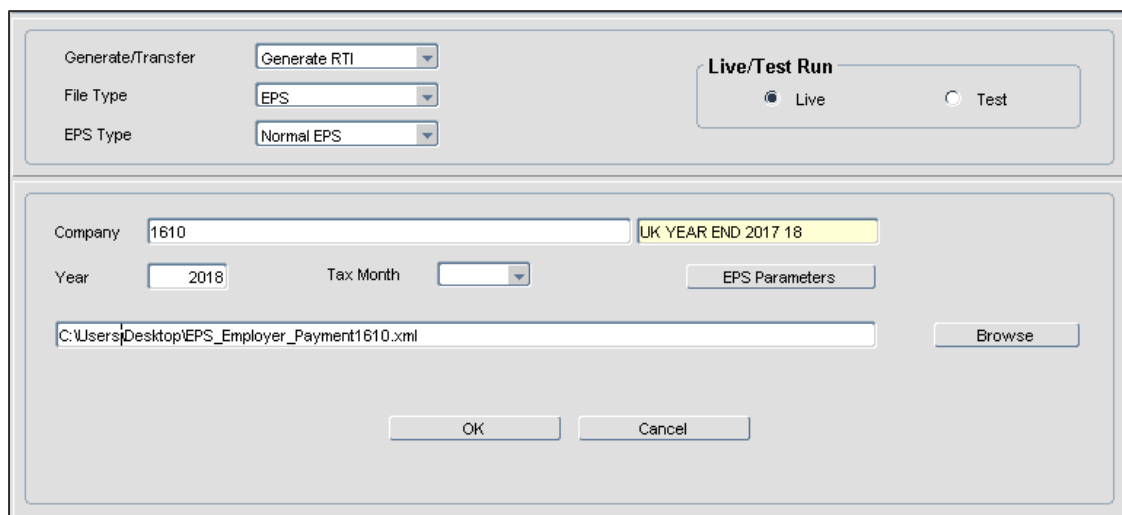

Instead, users will be given a warning message for the pay group which contained issues, for example for pay group 1617:

In addition, the RTI Validation indicator is now set on after every complete update. This is done to ensure that users do not complete an additional payroll run without first returning the required RTI return.

2.4. EPS (Employer Payment Summary) Changes

A change was made so that users now have the ability to generate an EPS file for a prior tax year.

Note:

An EPS file for the prior tax year is always a Tax Month 12 return. i.e. the full position at the end of the tax year is returned. This is the HMRC requirement.
