1.0	30 th Nov 2019	Brian O'Keeffe	Published to Access LMS.
1.1	15 th April 2021	Brian O'Keeffe	Update to section 2.5.1. Processing a Supplementary Run regarding the Detailed Observation Report.
1.2	4 th April 2022	Isabelle Grey	Update to section 1.3. Important Considerations regarding Net to Gross Pay Codes not being supported.
1.3	22 nd Nov 2023	Isabelle Grey	Update to section 2.5.4. PAYE Modernisation (Ireland Only) . Update to guidance on employees not shown in the selection list.

1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to use the supplementary payroll functionality in Payroll.

Items covered include:

- Enabling supplementary payroll mode.
- Processing payroll for pay groups in supplementary payroll mode.
- Updating any settings/parameters required to support the processing of these payrolls.

1.2. What is a Supplementary Payroll?

Supplementary Payroll allows you to process an additional payroll run after the payroll for the current pay period has completed. This can be used for the following scenarios:

Scenario	Description
Late Starters / Late Rejoiners	Where new starters / re-joiners were added into People Management too late or after the payroll has been completed for the current period.
Late Leavers	Where leavers are processed too late or after the payroll run for the current period has been completed.  Note: The pay leaver configuration option will need to be enabled on the pay group to be able to claw back the money from leavers.
Paid Incorrectly	Where an employee is paid incorrectly in the closed payroll but requires a correction payment.
Bonus and Long-Term	Where bonuses are paid as a separate run at different points throughout the tax year. This can occur for several reasons:

Scenario	Description
Incentive Payments (LTIP) Runs	- Where a delay in calculation causes it to miss the payroll for the current period. - Where the bonus must be paid on a set date due to global policy. - Where there is a requirement to show the bonus separate for Tax / NI reasons. - Where high earning individuals wish to sacrifice all / part of their bonus to their pension fund as an AVC.
Share Dividends / Restricted Share Unit (RSU) exercises	These payments can be made at any point in the tax year which can be outside payroll periods. However, these payments require immediate processing due to set exercise dates for tax purposes. This may be applicable where there is a requirement to re-join an employee, who left earlier in the year to process share entitlements.
Compromise Agreements	Where a Negotiated Settlement Agreement i.e. termination or redundancy payment is required to be processed in a timeframe outside of the normal payroll period.

1.3. Important Considerations

The following is a list of key assumptions when configuring and using Supplementary Payroll.

#	Comment
1	The Supplementary Payroll solution will work with PeopleXD standard software and may not be compatible with any custom client software (e.g. custom payroll routines, custom payslips, custom general ledger extracts, etc.).
2	Any payments in a supplementary payroll run are treated as additional payments for the supplementary period and are subject to tax and social insurance (PRSI or NI) calculations, which are affected by what has already been processed in the main payroll run.
3	No extra NI/PRSI weeks are allocated if the employee is being paid again in the period.
4	Auto Enrolment will not be assessed for late starters / re-joiners in a supplementary run.

#	Comment
5	Where an employee is paid in full in a normal payroll run and then in a supplementary run, and they are made a leaver in the same period, there will be no amendments to NI/PRSI weeks. The person will have gotten their full NI/PRSI entitlement from the main payroll run. • This is currently the case if they were processed as a leaver in the following period with a leave date in the past. • Depending on pay group configuration for allow negative, for the late leaving scenario, all pay may not be clawed back if the scenario would result in negative nett pay.
6	Supplementary payroll runs are only available in the latest closed period only that is within the same tax year. This means that a supplementary payroll run after the year end clear-down (i.e. December for Ireland, March for the UK) will not be possible until after the first payroll period of the new tax year has been processed.
7	A separate RTI/PMOD return will be made for main and supplementary payroll runs. All FPS/PMOD submissions for previous month main run and any supplementary payroll runs will need to be accepted before the next main or supplementary payroll can be run.
8	The following need to be completed for the main payroll run, before a supplementary payroll run can be undertaken: • Print Payslips • Bank File • RTI/PMOD
9	Except for the late starters, voluntary deductions are not taken again during a supplementary run because they are assumed to have already been taken in the initial main run. Deductions will only process for: • Statutory, e.g., Tax, NI, Student Loans, Apprentice Levy (UK Payrolls), Tax, PRSI/USC (Irish Payrolls).

#	Comment
	Pensions (percentage-based schemes only).  Note: Student Loans, Tax and Social insurance need to calculate based on what has been paid already in the main pay period.
10	The only methods for uploading timesheets for a supplementary payroll run is using external timesheet take on (which will add an employee automatically to the run) or via the <i>Maintain Timesheets</i> screen (where the employee has been added to the supplementary run already). - Any other methods will result in the timesheet loading for processing in the next main pay period. - The only exception to this is late leavers/starters marked as to be processed in the supplementary run.
11	Any backdated, current month, rate effective salary or allowances changes are not processed by the supplementary run. These changes will be processed in the next main pay run. The Grossing up functionality (Net to gross) will not calculate as part of a supplementary run.

1.4. Access to Supplementary Payroll

There is no additional user access required to run Supplementary Payroll. This is by default available to all users who have access to the following menu options:

Menu Option	System
MAIN_MENU.RUNPAYROLL	CorePortal Pay
SETTINGS_MENU.PAYGROUPS	CorePortal Pay

Supplementary Mode is enabled at pay group level and is covered in more detail in [section 2.2 Enable Supplementary Mode](#).

2. Run Supplementary Payroll

2.1. Supplementary Payroll Process Overview

The process for running a supplementary payroll is as follows:

1. Put the pay group into 'Supplementary Payroll Mode'.
2. Input timesheets.
3. Run payroll (both 5 and 3 step payroll processes support supplementary payroll runs).
4. Review 'Gross to Nett' and 'Reports' (return to step 3 if any amendments required).
5. Run the 'Complete Update' – note this step sets the pay group back to normal mode.
6. Print the payslips.
7. Process the bank file.
8. Generate and transfer RTI or PMOD return.
9. Generate the general ledger.
10. Repeat the process if a subsequent run is required.

2.2. Enable Supplementary Mode

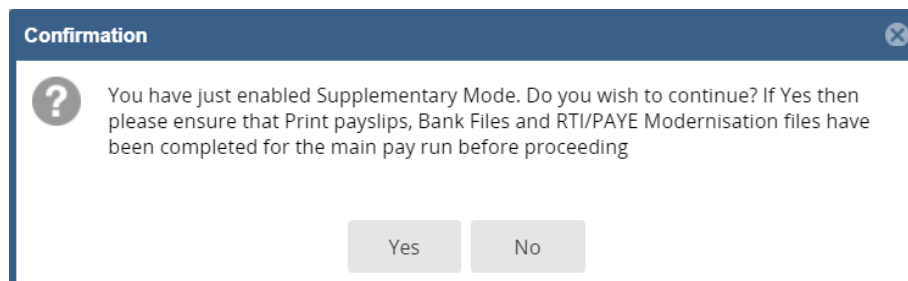

Follow the steps to put a pay group into Supplementary Mode:

1. On the **Payroll Dashboard** click the **Settings** tab.
2. Click **Pay Groups**.
3. Enter a **Pay Group Code** or select one from the drop-down list.
4. Enable the **Supplementary Mode** toggle.

The screenshot shows the 'Pay Groups - Supplementary Period' settings page. The page has a breadcrumb trail: 'Payroll Dashboard > Pay Groups - Supplementary Period'. The main form contains several input fields and toggles. The 'Supplementary Mode' toggle is highlighted with a red box and is currently turned on (green). Other visible fields include 'Wages/Salary Indicator' (S), 'Wages Salary Desc' (SALARY), 'Start Period' (201701), 'Input Period' (201743), 'Completed Input' (201739), 'Completed Update' (201739), 'Payroll Period' (201743), 'Maximum Hours' (9999), 'Maximum Gross' (999999.00), 'Maximum Nett' (999999.00), 'Run No' (1), 'Annual Allowance Ind.' (off), 'Validation Bypass' (off), 'Pay on Timesheet only' (off), 'Pay Leavers' (off), and 'Allow Negative' (off). There is an 'Add Employees' button.

5. A confirmation message displays – You have just enabled Supplementary Mode. Do you wish to continue? If Yes then please ensure that Print payslips, Bank Files and RTI/PAYE Modernisation files have been completed for the main pay run before proceeding.

- a. Click **Yes**.

6. Click **Save**.

The pay group is then returned to the previous payroll period and on the Manage Payroll screen an orange Supplementary indicator displays in the Mode column. This shows that the pay group is in supplementary mode.

Manage Payroll									
Pay Groups	Current P...	Key Obse...	Stage	Payroll Completion	Joiners	Leavers	Rejoin...	Mode	Cutoff Da...
2021 - Irish YE Wee... 21	202107 202107	0	Ready to run Salarie...		0	0	0	Supplementary #1	PROCE...
30 - Monthly Payroll... 30	Jul-2022 202217	1	Ready to run Salarie...		0	0	0	Supplementary #1	31-Dec-... PROCE...

2.2.1. Validation

The following validation checks are made when the *Supplementary Mode* indicator is **turned on**. If any of the following messages are displayed, supplementary payroll is not available.

Note: For all these scenarios, supplementary payroll is not an option. The change must be made in the next payroll period.

Validation Scenario	Message Displayed
If the start period year of that pay group is not equal to the completed updated year.	Pay group not available for supplementary mode as you are in the first period of a new Tax Year.
If there are no payment rows for the completed update period.	Pay group not available for supplementary mode.
If the completed input period is not equal to the completed update period.	You cannot turn on supplementary mode without reversing timesheets first.

The following validation checks are made when the *Supplementary Mode* indicator is **turned off**. If any of the following messages are displayed, supplementary payroll is not available.

 **Note:** For all these scenarios, a supplementary payroll run is in progress but has not been completed. Any runs in progress must be completed before running a new one.

Validation Scenario	Message Displayed
If payroll has already run for the current supplementary run.	You have commenced a supplementary run and must complete it.
If there are timesheets entered for a supplementary run that has not yet been processed.	Taking pay group out of supplementary mode will result in all timesheets entered for this supplementary period being removed. Do you want to proceed?

2.3. Add Employees to be Included in Supplementary Run

Once supplementary mode is turned on, the *Add Employees* button will display on the pay group settings screen. This allows you to add the employees you wish to include in the supplementary run, e.g. if you want any late leavers since the main payroll run was completed to be processed in the supplementary payroll run.

- **Late Starter** - any employee with a start in (or before) the current pay period that was added to the system since the current payroll period completed.

PeopleXD Payroll: Supplementary Payroll

- **Late Leaver** - any employee with an active leave date on or before the period, and that leave date has not been stored on the employee's payment history.

To add employees to a supplementary payroll run:

1. On the **Payroll Dashboard** click the **Settings** tab.
2. Click **Pay Groups**.
3. Enter a **Pay Group Code** or select one from the drop-down list.
4. Click **Add Employees**.

000088	Alan	Saunders

Search

Employee No	Forename	Surname
No data to display		

Page 1 of 1 Display Total Supplementary 0

- All employees from the selected pay group appear in the list on the left including any new or late additions to the pay group unless:
 - The rejoiner effective period is after the supplementary period.
 - The employee was a leaver in the main run. This is because they can't be rejoined in the same period as leaving.
- 5. Search for and select an employee.
- 6. Click the **arrow icon** to add the selected employee to the list on the right.
 - The *Total Supplementary Employees* field displays a count of employees added.
- 7. Use the arrow icons to add or remove the relevant employees.
- 8. Click **Save**.

**Note:**

You can also upload a timesheet for the selected employees using the External Timesheet Take-on file. This is an alternative way of adding the employees and will automatically add them as part for supplementary run.

2.4. Record Payments for a Supplementary Run

Payments can be made during a supplementary payroll run by using either of the following:

- Timesheets Current Period
- External Timesheet Take-on

2.4.1. Timesheets Current Period Screen

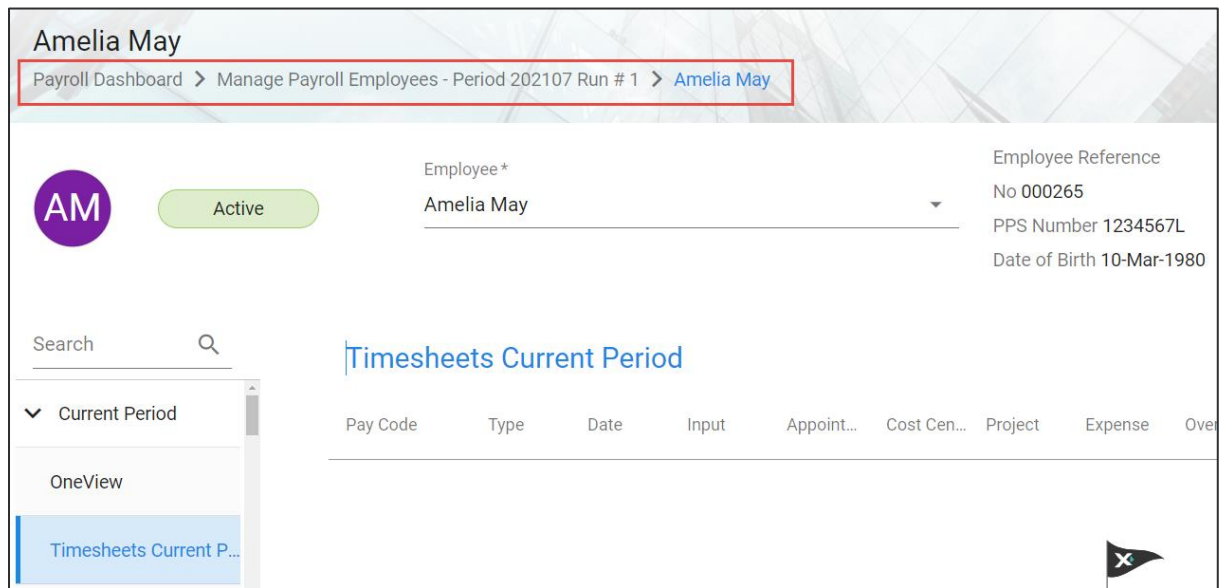

This can be used when the payment to be made to the employee is for example:

- A correction to a previous payment.
- An additional payment for that period.
- A share payment.

To do this:

1. On the **Payroll Dashboard** click the **Employee** tab.
2. Search for the employee and click **View**.
3. Click the **Timesheets Current Period** tab.

The breadcrumb trail will display the *Run No* for the period to show it is in supplementary mode.

4. Click **Add**.
5. Enter the timesheet details and click **OK**.
6. Click **Save**.
7. Process payroll through to completion.

Note 1:

Timesheets can only be entered after the pay group has been put in Supplementary Payroll mode.

Note 2:

You can only add a timesheet on this screen if the employee has been included in the Supplementary Run. If not, then a message displays – 'This Employee has not been selected for inclusion in the Supplementary run'.

Note 3:

The Holiday period field is hidden on the maintain timesheet screen while in supplementary mode. This is disabled as you should not be able to process a holiday period whilst in supplementary mode.

2.4.2. External Timesheet Takeon Screen

This can be used when the payment to be made to the employee is for example:

- A correction to a previous payment.
- An additional payment for that period.
- A share payment.

To do this:

1. On the **Payroll Dashboard** click the **Uploads** tab.
2. In the *Employee Uploads* section click **External Timesheet Takeon**.
3. Upload the relevant timesheet for the supplementary run. See the [External Timesheet Take-on user guide](#) for more detailed guidance.

The screenshot shows the 'External Timesheet Takeon' interface. At the top, it says 'External Timesheet Takeon' with a breadcrumb 'Payroll Dashboard > External Timesheet Takeon'. Below this is a message box: 'This module loads Timesheet entries from external sources and produces an error report on rejected transactions. All rejected timesheets must be manually input.' Underneath, there is a 'File Format' dropdown menu set to 'Comma Separated File Format (CSV)' and a 'Data File Columns' button. Below that is a section titled 'Please Select Timesheet File to be loaded' with a file selection bar and a 'Browse' button. At the bottom, there are 'OK' and 'Cancel' buttons. The 'corehr' logo is visible at the bottom center.

4. Click **OK**.
5. Process payroll through to completion.

Note 1: Timesheets load into the timesheet table, using the additional run period and current run no. for the Pay Group.

Note 2: The External Timesheet Take-on process automatically adds the employee to the supplementary run even if you have not done this at pay group level.

Validation:

If the External Timesheet File contains employees in multiple pay groups, where one pay group is in Supplementary Mode, and the other pay group is not, the load will fail. The following error will display:

- Timesheets in this file relating to Pay Group X need to be loaded stand-alone as the Pay group is in supplementary run mode

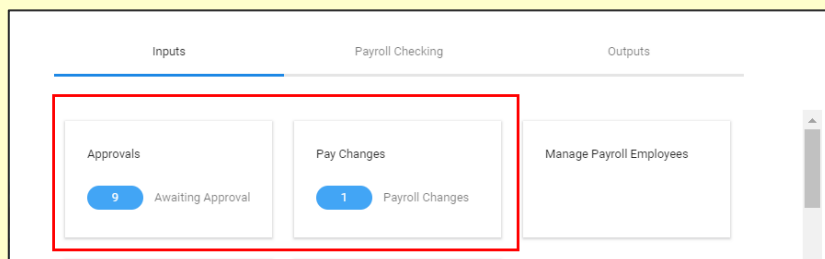

2.5. Process a Supplementary Run

The process for running payroll for a supplementary run remains the same. Only the labelling of the screens has been changed to reflect the payroll being in Supplementary Mode.

2.5.1. Processing a Supplementary Run

Note:

Any Approvals and Pay Changes in the Inputs tab will be for the current pay period. These will not be updated to reflect the supplementary run, which moves the pay period back.

To process the supplementary run:

1. Click **Process Payroll**. The process payrolls screen is now relabelled to reflect the pay group is set to Supplementary Mode.

Process Payroll for 30 - Monthly Payroll... for pay period Jul-2022 Supplementary Payroll Mode Run # 1				
Payroll Dashboard > Process Payroll for 30 - Monthly Payroll... for pay p...				
1 Salaries & Allowances				
Run successfully	Last Run 15/09/23 13:24	Run by Payroll Admin	Complete	RERUN
2 Payroll Validation				
Ready for first run	Last Run 10/02/23 13:58	Run by Payroll Admin	Ready to Run	RUN
3 Confirm Timesheets				
Ready for first run	Last Run 06/12/22 11:12	Run by Payroll Admin	Pending	RUN
4 Payroll Update				
	Last Run 06/12/22 11:12	Run by Payroll Admin	Pending	RUN
5 Complete Update				
Confirm Timesheets and Payroll Update before running payroll	Last Run 06/12/22 11:12	Run by Payroll Admin	Pending	RUN

2. Complete each payroll step. The table below outlines what happens during each step:

Step	Description
Generate Salaries & Allowances	- Processes New Employees/Rejoiners added since the main payroll run. - Start (or rejoin) date in or before the current period with an input date after the complete payroll date. - Generate full salaries and allowances.
Payroll Validation	Process new employees added / left since the main payroll run. - Partially processes existing employees (i.e. pay timesheets only). - Pay any timesheets entered. - Process Tax, Social Insurance (UK Apprentice Levy and Student Loans and standard % pension schemes only (no other pension scheme supported). - Voluntary deductions are taken for new employees only. Note: Auto Enrolment does not run for a new starter in a supplementary run.
GTN	- Displays in the title that the pay group is in Supplementary Payroll Mode. - Payroll periods display the Supplementary Payroll Period. - Data displayed in GTN is for the Supplementary Payroll run only. - This applies to top level and employee drill down level GTN.

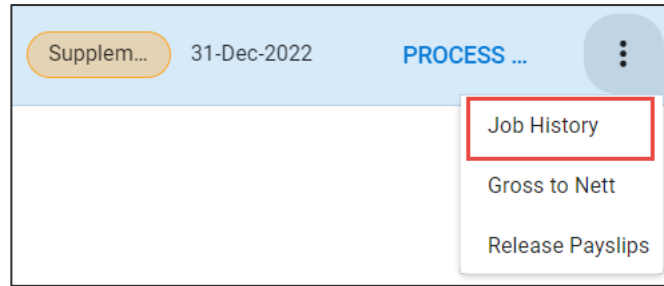

Step	Description
Reverse Timesheets	If <i>Reverse Timesheets</i> is used, this reopens the supplementary payroll period to allow further input.
Payroll Update	Update's payroll history and prepares information for final processing.  Note: When the Payroll Update task is complete, an overnight task generates the history values for the Detailed Observation Report. Therefore, this report includes the Supplementary Run's history values if a Payroll Update task is run, but the Supplementary Run is not completed that same day. Complete the Supplementary Run on the same day you run a Payroll Update task if you want this report to be accurate.
Complete Update	• Updates the employee Cumulatives and the Cumulative History writes out Print Payslip data for the Supplementary Payroll run. • Updates secondary status of New Joiners/Late Leavers processed. • Switches off Supplementary Payroll Mode. Note: The next main payroll run will reset the Supplementary Payroll run no. variable in the background.

After the payroll has completed, the pay group will automatically revert to the standard mode for the current period.

2.5.2. View Job History

A full payroll job history is available and will display the history of all jobs in the supplementary payroll run. To do this:

1. Go to the **Manage Payroll** tab.
2. Select a **Pay Group** and expand its **3-dot menu**.
3. Click **Job History**.

A job run will be displayed here. This will include jobs run for a supplementary run which will be labelled to reflect this, e.g. "Salaries & Allowances" will display as "Supplementary Salaries & Allowances" etc.

Run History					
Payroll Dashboard > Run History					
Jul-2022					
Task Number	Task Details	Submitted By	Date Started	Status	Parameters

2.5.3. Payroll Outputs for Supplementary Run

The following outputs are available after a supplementary run:

Final Control Reports:

The *Final Control Report* for a supplementary run is identified by the addition of the *Run No* on the cover page. This report outputs the relevant data from the supplementary run only.

Final Control Report	
Submitted By	MPRACHETT
Date	11-FEB-2019 14:21:31
Report ID	PAY355CT
Report Name	Final Control Report
Pay Group	Monthly Payroll 1
Pay Period	Feb-2018
Run No	1

Nett Pay and Deduction Orders:

The *Payment Listings* report includes payments for the supplementary run only.

Bank File:

Employees paid in the supplementary run are included on the bank file. To accommodate this, the *Run No* field is displayed on the bank file. This allows you to view which payroll run this payment is for.

Pay Group	Run No	Employees	Attachments
Monthly Payroll 1	1	3	0
Monthly Payroll 2	0	1	0

The *Run No* is also displayed on the:

- *Reset Paypath* screen.
- *Bank File* report.

2.5.4. RTI (UK)

To accommodate the real-time return of the supplementary run, the *Run No* field is displayed on the following screens:

- Generate RTI - FPS.

File Type	File Type	File Type	File Type	File Type	File Type	File Type	File Type
FPS	Live	Test	FPS File Type	Pay Group*	Pay Period*	Late Reason Code	Run No
				Monthly Payroll 1	201808		1

- Generate/Transfer Files.

The screenshot shows the 'PAYE Modernisation' dashboard. On the left, there's a sidebar with 'PAYE Modernisation Files Process' selected. The main area is titled 'PAYE Modernisation' and has a 'Select PAYE action*' dropdown set to 'Transfer submission files'. Below this, there's a 'Transfer submission details' section with a 'Company*' dropdown set to '2114 IRISH YEAR END' and a 'Search pay group' field. A table lists submission details with columns: Pay group, Submission..., Period / Mo..., Run Number, Submission ID, Tra..., Status, and Co... The 'Run Number' column for the first row (2021 - Iris..., Normal Su..., 202105) is highlighted with a red box. The value '1' is in the 'Run Number' cell. At the bottom right, there's a green 'TRANSFER' button.

2021 - Iris...	Normal Su...	202105	1	2021_202122_62_...		RUN C...	

2.5.6. Print Payslips

Package payslips for the employees paid in the supplementary run only can be generated.

2.5.7. General Ledger

You can choose to run a standalone GL for each supplementary payroll or to have supplementary payments picked up in the GL for the next payroll period. A parameter is available to manage this.

To configure the parameter:

1. On the **Payroll Dashboard** click the **Settings** tab.
2. In the *General Ledger Costings* section click **General Rules & Settings**.
3. Select **Parameter Settings** from the *Select Detail* drop-down menu.

Maintain Parameters

2.8. Cancel Payments

The Run No is available on the *Cancel Payment* screen. This allows the you to cancel a supplementary run if required. To do this:

1. On the **Payroll Dashboard** click the **Manage Payroll** tab.
2. Select a **Pay Group** then click the **Inputs** tab.
3. Click **General**.
4. Click **Cancel Payment**.
5. If the cancel payment is for a supplementary run, select a **Run No** from the drop-down list.

Cancel Payment

Payroll Dashboard > General > Cancel Payment

Cancel Payment

Employee Reference
000088

Name
Alan Saunders

Address
233A
Cavendish Road

Payroll Period
201805

Issue Date

Pay Group
1001

Cheque No

Net Pay

Run No
1

Note: If the Run No field is left blank on the cancel payment screen, then the main payroll period will be cancelled.

6. Click **OK**.

2.8.1. Cancel Payment Report

The cancel payment report shows only cancelled run data.
