1. Overview

1.1. Purpose of this Guide

The purpose of this document is to provide information on using the Teachers Pension Scheme (TPS) for the Monthly Collection Return (MCR) solution.

In this guide the following features are covered:

- Prerequisites to MCR
- Key Changes
- Configuration
- Generation of TPS MCR

1.2. Definitions

The acronyms which are used throughout this document are detailed in the table below.

	Description
TPS	Teachers' Pension Scheme
MCR	Monthly Collection Return (MCR)
MDC	Monthly Data Collection (MDC)

2. Prerequisites to MCR

There are several prerequisites to Market Collection Return (MCR) detailed in the following sections.

2.1. Check Data

Employer contact details and data centre access should be checked to see if they are correct.

To do so, complete the following:

1. Log in to the Employer Portal (<https://www.teacherspensions.co.uk/employers/employer-login.aspx>).
2. Check and update, if necessary, the details we currently hold for those administering MCR.

2.2. Onboarding

As part of onboarding, you should ensure that the data cleanse exercises outlined in the Onboarding Guide are completed.

1. Prior to onboarding – tidy up new starters / leavers on TPS employment listing. This is essential in helping TPS amend any variances in member information between them and your payroll system.
2. If there is no opt out form returned, a follow up is required (or a contractual enrolment needs to be made and contributions backdated so it is important to ensure records are in alignment to start off with).
3. In advance of your on-boarding date, you need to download your membership listings report from your Employer Portal.
4. Log into your Employer Portal and select **Reports** to download this. It is up to you as employer to decide if someone is eligible to join the Scheme based on the role in which they are employed.
5. Employers need to agree to an onboarding date with the vendor and submit the MCR onboarding form to TPS to commit.

[Click here](#) to download the onboarding form.

**Note:**

A pre-requisite to onboarding to MCR is the review of Employer listening by Employer to ensure current opt ins and opt out are correct – (see TPS on boarding guide & check list) For Example, if there is no opt out form, there needs to be a follow up. If there is no opt out, you will need to do contractual enrolment & back date contributions. These should be checked and corrected in advance.

2.3. TPS Documentation

TPS provides several documents in relation to onboarding to MCR which users should familiarise themselves with in advance of the MCR project.

- **TPS Checklist:** This document outlines various items TPS recommend you complete to prepare for MCR.
 - <https://www.teacherspensions.co.uk/-/media/documents/employer/guides/monthly-contributions-reconciliation/mcr-checklist.ashx>
- **TPS On Boarding Guide:** This document outlines the onboarding process in the move to MCR.
 - <https://www.teacherspensions.co.uk/-/media/documents/employer/guides/monthly-contributions-reconciliation/mcr-on-boarding-guide.ashx>
- **Employer Responsibilities Guide:** This document outlines Employer responsibilities under MCR.
 - https://www.teacherspensions.co.uk/-/media/documents/employer/documents/employer-responsibilities/tp1703_your-responsibilities_v4.ashx
- **TPS User guide:** This document outlines the TPS requirements for MCR.
 - <https://www.teacherspensions.co.uk/employers/managing-members/mcr/forms-and-guides.aspx>

3. Assumptions and Constraints

The Generate MCR screen is available on Portal only.

Note:

System users do not need to be on pay portal to use the TPS MCR solution. If users are still on back-office, they remain so for the day-to-day payroll tasks but the generate MCR step is on Portal. Further information on how to set up the required profile access for TPS MCR on portal is covered in later sections.

To use the system the following points are important:

- Users must be on version 28.
- TPS sites must be pension by appointment.
 - This is required because of the reporting requirements for each job.

4. Configuration

The following configuration steps need to be completed on the payroll system to generate the Return in Payroll.

Note:

It is critical that these configuration steps are set up on the system in the month **of** onboarding to TPS MCR. For example, if onboarding commences in August 2021, the first TPS MCR return will be August 2021 returned after the August payroll has been closed. Therefore, the configuration steps outlined here must be configured for all payrolls processed in August 2021.

4.1. Configuration Checklist

The following is a checklist of the key configuration steps to be completed:

Area	Task
Menu Profile	(a) Assign TPS MCR Menu Profile
TPS Parameters	(a) Enable Company Level Parameter
	(b) Review Pension Scheme Set Up
Absence Types	(a) Update absence Types
Contact Types	(a) Add TPS NI Contact Type
MCR Parameters	(a) School vs Establishment
	(b) Parameters
	(c) TPS Inclusion & Part Time Rules
	(d) Employee Exclusion
	(e) Pay Code Identification
	(f) Overtime

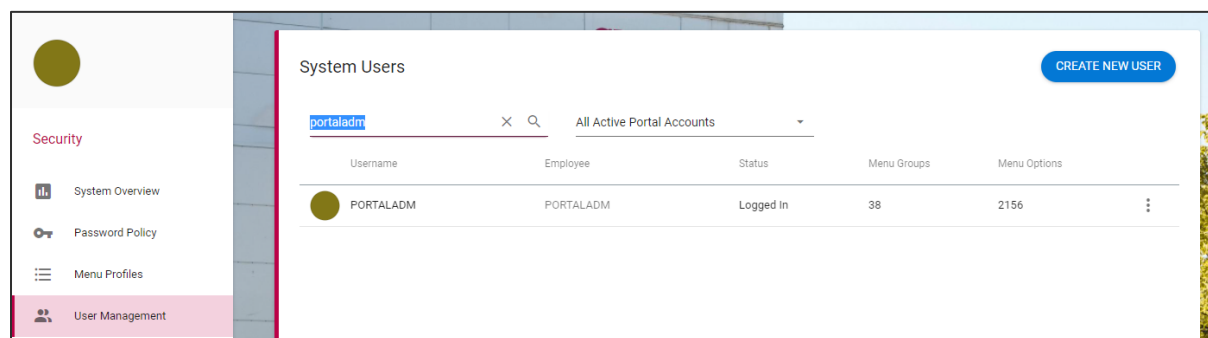

4.2. Menu Profile Required

A menu profile with all the contained TPS menu options has been set up. This must be assigned to users who require access to the TPS MCR option on Portal.

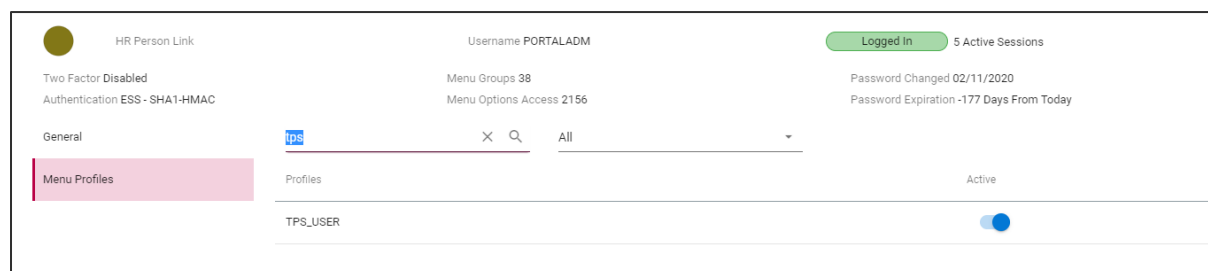

Menu Profile	System
TPS_USER	Web Services, CorePortal Pay

To allocate a user the menu profile:

1. Navigate to *Security*.
2. Click the **User Management** tab.
3. Using the System Users widget search for the user.

4. Expand the 3-dot menu and click Manage Account.
5. Click the **Menu Profiles** tab.
6. Search for the TPS menu profile and enable the Active toggle.

Once this menu option is assigned to a user's profile you can find the *Generate TPS MCR screen* by navigating to the following menu path on Portal:

- *Payroll Dashboard > Teachers Pension Scheme*

4.3. TPS Parameters

4.3.1. Enable Company Level Parameter

For TPS MCR calculations to apply in the payroll run:

- You must set new indicator on pension schemes to be treated as TPS (This is covered in the pension scheme set up so for further information on this, see [Pension Scheme Setup](#)).
- You must set a new company level indicator to know to break down when earned vs when paid.

To do this:

1. Navigate to *Payroll Dashboard > Settings > General Settings*.
2. Select a Company from the *Company Code* list.
3. Click **Next Page**.
4. Enable the TPS MCR calculations indicator.

The screenshot shows the 'Maintain Payroll Parameters' form. The 'TPS MCR Calculations' toggle is highlighted with a yellow box. The form contains various input fields and toggle switches for payroll parameters.

Parameter	Value
Academic Start Year	199301
Academic End Year	199352
Validate Cost Centre	Y
PAYE Standard Rate	20.00
Withhold Tax Percent	
PAYE Higher Rate	40.00

5. Click **Save**.

4.4. TPS Pension Scheme Setup

4.4.1. Review set up for Main Tiered TPS Scheme

- Back Office: *Reference > Pension Scheme > Page 2*
- Portal: *Settings > Pension Scheme > Page 2*

The screenshot shows the 'Maintain Pension Schemes' configuration page. It contains several input fields and controls:

- Retirement Age (Male)**: Text input field.
- Retirement Age (Female)**: Text input field.
- Social Welfare Multiplier**: Text input field with value '1.00'.
- Age at Joining**: Text input field.
- LEL/UEL**: Blue button.
- Full Time Equivalent Hours**: Text input field.
- Pension Scheme Priority**: Text input field.
- Compound Interest %**: Text input field.
- Contribution Rate**: Dropdown menu with 'Actual' selected.
- Pay Code Exclusions**: Toggle switch (ON) and a blue 'List' button.
- Pay Code Inclusions**: Toggle switch (ON) and a blue 'List' button.
- Banded Scheme Type**: Dropdown menu with 'TPS Tiered' selected and a blue 'Rates' button.
- FTE Threshold**: Toggle switch (OFF).
- Tiered Date Effective**: Toggle switch (ON).
- Exclude from Band Assessment**: Toggle switch (ON) and a blue 'List' button.
- Pension Pro Rata Calc**: Toggle switch (OFF).
- Er Cost(Payslip Related)**: Toggle switch (OFF).
- Cost Centre ER Percent**: Toggle switch (OFF).
- SCON**: Text input field.
- ER Top Up Required**: Toggle switch (OFF).
- Pre Niable Scheme**: Dropdown menu with 'Choose' selected.

The main TPS scheme must be configured as follows.

- a) Banded Scheme Type:
 - i. The banded scheme type option should be configured as TPS Tiered#
 - ii. Select the rates button to key the required rates and contribution values
- b) Contribution Rate
 - i. This should be set to base contribution assessment off Actual Pay
- c) Band Assessment Exclusion Pay Codes
 - i. Select pay codes which should be excluded from band assessment. If any pay elements are to be made exempt from the band assessment (e.g., pensionable overtime pay, Occupational & Offset Pay Codes) they need to be flagged here.

**Note:**

TPS have clarified that arrears of salary/basic pay due to a pay award should be excluded from band assessment however arrears of salary/basic pay for any other reason should remain included in band assessment. For this reason, the salary and basic pay codes must **NOT** be added under the "exclude from band assessment" option. The system has been designed to automatically exclude arrears from the system salary or basic pay for the TPS MCR scheme where the arrears occurs due to a back dated pay award.

a) Pay Code Inclusions or exclusions

- i. Select pay codes which are non-pensionable but are to be included for pensionable within this scheme.
- ii. Mark if inclusion is for EE and ER
- iii. Record Date effective where inclusion should only apply from a date going forward (e.g. 01-Apr-2014 for Overtime). Leave this field NULL by default.
- iv. Pay code inclusions/exclusions on pension scheme to be used where applicable e.g. overtime will be non-pensionable pay code but inclusion as pensionable for TPS scheme.
- v. Ensure the **Tiered Date Effective Option** is checked.

4.4.2. Set up for Other TPS Pension Schemes

Other required pension schemes for reporting under TPS MCR are:

- Additional Pension Contribution Amount
- Faster Accrual Contribution Amount
- AAB Buy Out Contribution Amount
- Additional Contribution Amount (Family Benefits, Pay, Higher Salaries)
- Preston Contributions Amount.

Note:

- If using the % override on a TPS pension scheme only the first % override field can be used (this is the same as worked under MDC previously).
- For any of these schemes required to work on both a *when earned* & *when paid* basis the scheme must be marked as a TPS pension scheme on pension scheme page 2. Otherwise, the scheme will be treated on a when paid basis.
- If new pension schemes will need to be set up; users should review existing employee/pension scheme set ups (in case current employee records currently on the system need to be updated) & also review auto enrolment default pension schemes.

4.5. Set up Absence Types

You need to set up on portal the absence types e.g., maternity, sick, family etc.

To do this navigate to:

- *Core Portal > Payroll Dashboard > Settings > Absence Pay Parameters > Absence Types*

Here the you are required to populate the statutory type. This is to allow the system to identify which absence types are applicable for sick or family leave and allow the system to apply the appropriate rules.

Absence Pay Parameters

4.6. Set up Contact Types

As part of the process for capturing employee information, the following contact types are used for TPS.

- New:
 - **NI Number:** This is recorded as contact type **TPSNI**. It is used when there is no NI number on the employee record and when TPS issues a temp number.
- Existing
 - **Email Address:** This should be recorded as a contact type *EMAIL*
 - **Teacher Number:** This should be recorded as a contact type *DCSF*

To add TPSNI as a contact type navigate to:

Portal:

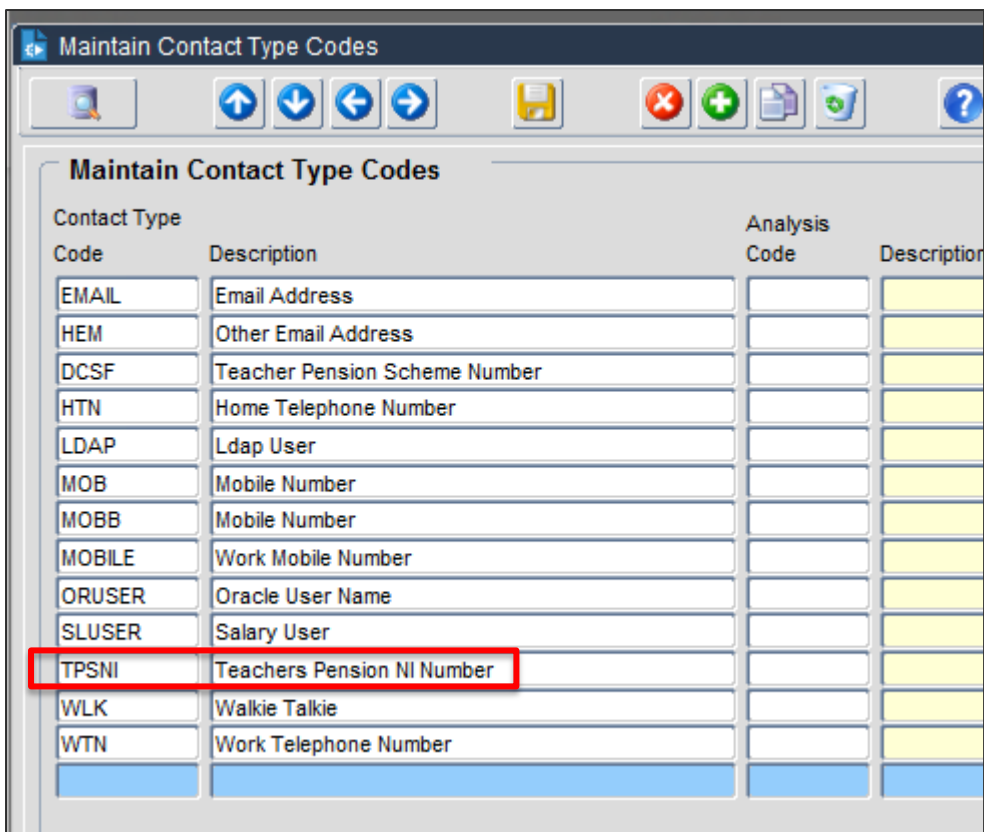

- *People Management > Data Centre > Reference Data > Contact Type*

Contact Type Code	Description	Analysis Code	Description	ESS Display	ESS Update	
DCSF	Teachers' Pension Reference Number			☒	☒	...
EMAIL	Email Address			☒	☒	...
HEM	Other Email Address			☒	☒	...
HTN	Home Telephone Number			☒	☒	...

WLK	Walkie Talkie			☒	☒	...
WTN	Work Telephone Number			☒	☒	...

Cancel Add Save

Back Office:

- *Core Personnel > Reference A – C > Contact Types*

Contact Type Code	Description
EMAIL	Email Address
HEM	Other Email Address
DCSF	Teacher Pension Scheme Number
HTN	Home Telephone Number
LDAP	Ldap User
MOB	Mobile Number
MOBB	Mobile Number
MOBILE	Work Mobile Number
ORUSER	Oracle User Name
SLUSER	Salary User
TPSNI	Teachers Pension NI Number
WLK	Walkie Talkie
WTN	Work Telephone Number

4.7. TPS Rules Set Up

The setup of the TPS rules differs slightly and may depend on whether a user has configured the system to be a return per payroll company or by establishment.

4.7.1. Return Per Payroll Company vs Return per Establishment

The default is Return by Payroll Company. No action is required if a user wishes to keep this set up and users can skip to the next step.

Where a site wishes to make the TPS MCR return by establishment instead however the following parameter change will be required.

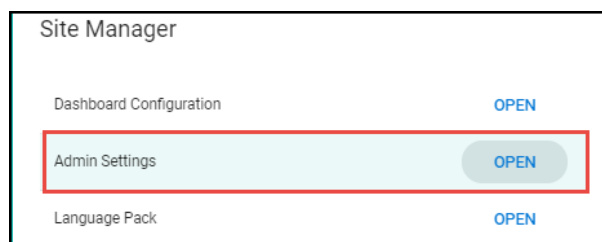

Note:

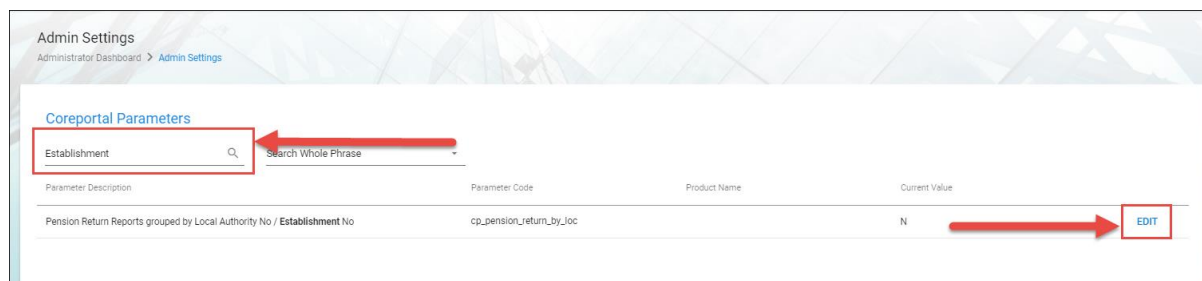

The following **cp_pension_return_by_loc** parameter will only need to be enabled by multi establishment sites.

Teachers' Pension Scheme - User Guide

1. Navigate to the Administrator Dashboard.
2. Using the *Site Manager* widget open *Admin Settings*.

3. Search for parameter **cp_pension_return_by_loc**.
4. Click **Edit**.

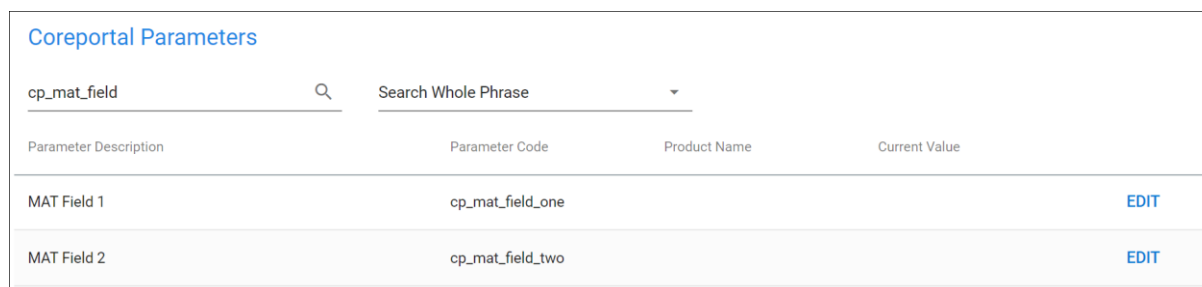

5. Update the *Value*.
6. Click **OK**. A message displays "*Parameter has been successfully updated*".
7. If intending on generating one combined MCR file users also need to set the Multiple Academy Trust number.

Note:

A Multi Academy Trust (MAT) number is a two part number typically in the format (751/XXXX). On the system we hold this as two fields: *MAT Field 1* and *MAT Field 2*.

- a. Search for the MAT field in *Coreportal Parameters*.

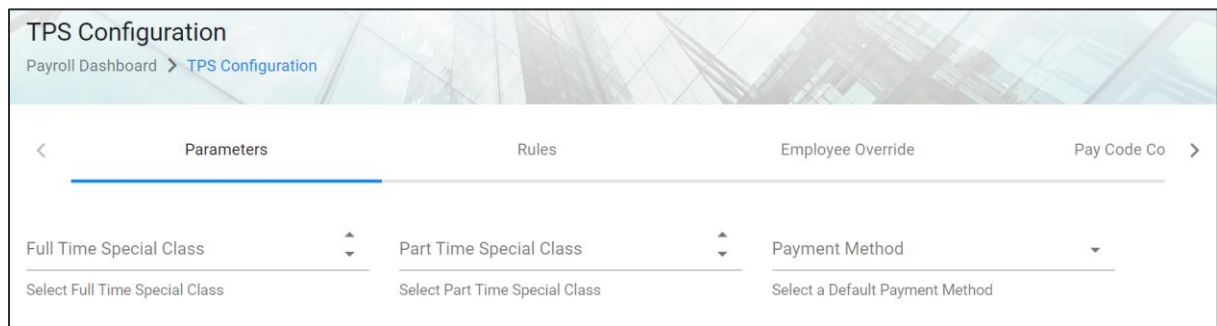

- b. Edit the *MAT Field 1* value e.g. to 751
- c. Edit the *Mat Field 2* value e.g. to 1234

Once the parameters are set you can then go in to the TPS MCR screen and set the inclusion and Part Time Rules.

4.7.2. Parameters

To update the parameters:

1. Go to *Payroll Dashboard > Teachers Pension Scheme*.
2. Click **Configure**.
3. Click the **Parameters** tab.

The screenshot shows the 'TPS Configuration' screen with the 'Parameters' tab selected. The breadcrumb trail is 'Payroll Dashboard > TPS Configuration'. The 'Parameters' tab is highlighted with a blue underline. Below the tab bar, there are three sections: 'Full Time Special Class' with a dropdown arrow and the text 'Select Full Time Special Class'; 'Part Time Special Class' with a dropdown arrow and the text 'Select Part Time Special Class'; and 'Payment Method' with a dropdown arrow and the text 'Select a Default Payment Method'.

Here for each payroll company record the:

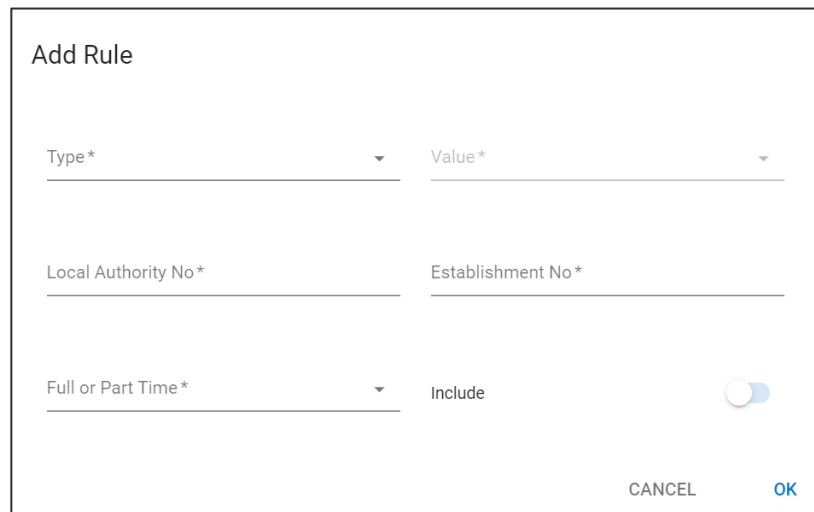

- Local Authority Number
- Establishment number
- Full Time Special Class
- Part Time Special Class
- Payment Method:
 - Employer must set a payment method before generating the TPS output - this is how the employer will be sending payment to TPS.

4.7.3. TPS Inclusion & Part Time Rules

To update the Rules:

1. Go to *Payroll Dashboard > Teachers Pension Scheme*.
2. Click **Configure**.
3. Click the **Rules** tab.

4. Click **Add**.

The 'Add Rule' dialog box contains the following fields and controls:

- Type***: A dropdown menu.
- Value***: A dropdown menu.
- Local Authority No***: A text input field.
- Establishment No***: A text input field.
- Full or Part Time***: A dropdown menu.
- Include**: A toggle switch, currently turned on.
- CANCEL** and **OK**: Buttons at the bottom right.

Here for each payroll company:

- The “Include” indicator should be enabled with the appropriate required rule to ensure that all employees who satisfy these rules are included in the Return.
- The Part Time indicator should be ticked if the Employee is to be returned as Part Time.

Note:

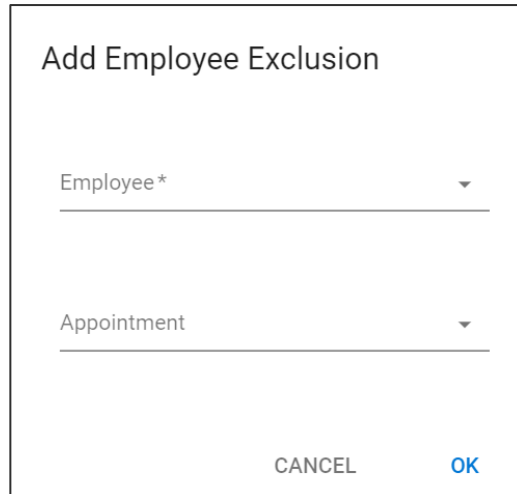

The reference item *Company* can be used for the part-time option. It is not catered for within the *Include* option, so you are recommended to use pay group.

4.7.4. Employee Exclusion

To cater for exemptions, the Employee Override tab can be used to bypass the configured rules and exclude an employee from the Return.

To update the employee exclusions:

1. Go to *Payroll Dashboard > Teachers Pension Scheme*.
2. Click **Configure**.
3. Click the **Employee Override** tab.
4. Click **Add**.

A dialog box titled "Add Employee Exclusion". It contains two dropdown menus. The first is labeled "Employee*" and the second is labeled "Appointment". At the bottom right, there are two buttons: "CANCEL" and "OK".

Add Employee Exclusion

Employee* ▼

Appointment ▼

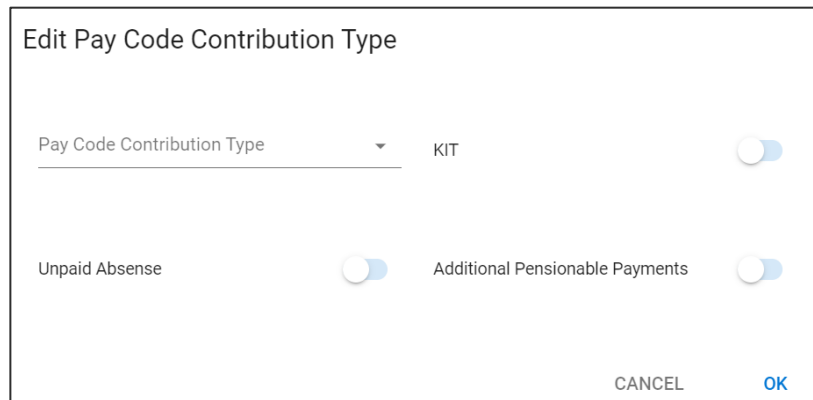

CANCEL OK

5. Select and **Employee** and **Appointment**.
6. Click **OK**.

4.7.5. Pay Code Identification

Users are required to identify what pay codes are used for various pay elements. To do this:

1. Go to *Payroll Dashboard > Teachers Pension Scheme*.
2. Click **Configure**.
3. Click the **Pay Code Configuration** tab.
4. Expand the relevant 3-dot menu and click **Edit**.

A dialog box titled "Edit Pay Code Contribution Type". It has a dropdown menu labeled "Pay Code Contribution Type" with "KIT" selected. To the right of the dropdown is a toggle switch that is currently turned on. Below this, there are two more toggle switches. The first is labeled "Unpaid Absence" and is turned on. The second is labeled "Additional Pensionable Payments" and is turned off. At the bottom right, there are two buttons: "CANCEL" and "OK".

Edit Pay Code Contribution Type

Pay Code Contribution Type ▼ KIT ☒

Unpaid Absence ☒ Additional Pensionable Payments ☐

CANCEL OK

5. Enable the relevant toggles for pay codes used for KIT and Unpaid Absences and Additional Pensionable Payments.
6. Select a *Pay Code Contribution Type* you can choose from:
 - AAB Buyout Contribution Amount
 - Additional Pension Contribution Amount
 - Employer Contribution Amount
 - Family Benefits, PAY, Higher Salaries

- Faster Accrual Contribution Amount
- Member Contribution Amount
- Preston Contribution Amount

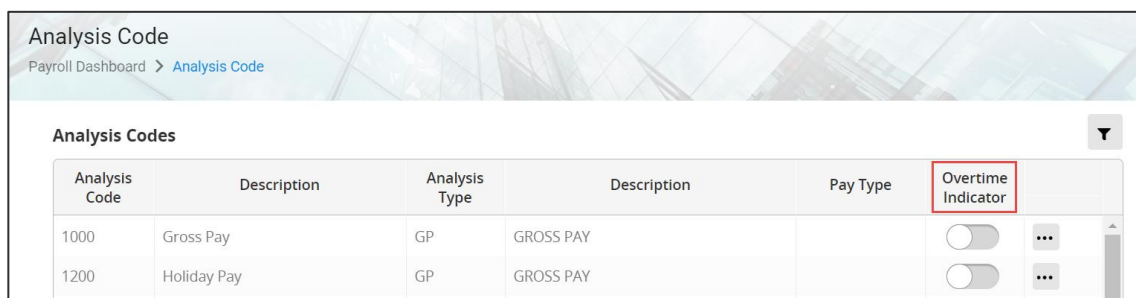

7. Click **OK**

4.8. Overtime

For Overtime you need to identify the analysis code. This requires you to complete configuration to identify the analysis codes which relate to overtime.

Portal:

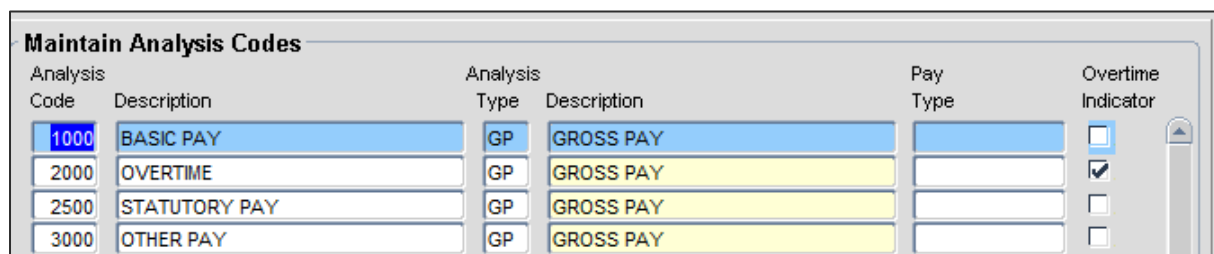

1. Got to *Payroll Dashboard > Settings > Analysis Codes*.
2. Enable the **Overtime Indicator** for the relevant analysis codes.
3. Click **Save**.

Analysis Code	Description	Analysis Type	Description	Pay Type	Overtime Indicator
1000	Gross Pay	GP	GROSS PAY		☐
1200	Holiday Pay	GP	GROSS PAY		☐

Back Office:

1. Go to *Reference > Analysis codes*
2. Tick the relevant Overtime Indicator.
3. Click **Save**.

Analysis Code	Description	Analysis Type	Description	Pay Type	Overtime Indicator
1000	BASIC PAY	GP	GROSS PAY		☐
2000	OVERTIME	GP	GROSS PAY		☒
2500	STATUTORY PAY	GP	GROSS PAY		☐
3000	OTHER PAY	GP	GROSS PAY		☐

As some overtime payments may be pensionable for the TPSMCR pension scheme (but not for other pension schemes) users are also required to add pensionable overtime pay codes to the inclusion list on the new pension scheme. This inclusion option ensures that over time payments are included in the pension calculations.

Portal:

1. Got to *Payroll Dashboard > Settings > Pension Scheme*.
2. Select a Pension Scheme from the *Pension Code* list.
3. Click **Next Page**.

The screenshot shows the 'Maintain Pension Schemes' interface. At the top, there are 'Previous Page' and 'Next Page' buttons. Below them is a search bar with fields for 'Pension Code' (containing '1418'), 'Description *' (containing 'TPS (RICHIE)'), and 'Company *' (containing '1418'). Below the search bar are 'Previous', '1 of 1', and 'Next' buttons, along with 'Add', 'Query', 'Delete', and 'Duplicate' buttons. The main section is titled 'Maintain Pension Schemes' and contains several input fields: 'Retirement Age (Male)', 'Retirement Age (Female)', 'Social Welfare Multiplier' (set to '1.00'), 'Age at Joining', 'Full Time Equivalent Hours', 'Pension Scheme Priority', 'Compound Interest %', and 'Contribution Rate' (set to 'Actual'). There are also two toggle switches for 'Pay Code Exclusions' and 'Pay Code Inclusions', both currently turned on. Below these are 'List' buttons for each. At the bottom, there is a 'Banded Scheme Type' dropdown set to 'TPS Tiered' and a 'Rates' button.

4. Add the overtime pay code to the Pay Code Inclusions list if required.
5. Click **Save**.

Back Office:

- (a) *Back Office: Reference > pension scheme > page 2*

The screenshot shows a button labeled 'Pay Code Inclusions' with a small square icon to its right.

5. Key Changes

The following are some of the key changes as part of the TPS MCR.

5.1. New Reporting Values

TPS have changed the reporting requirements for several fields as part of the move to MCR.

- TPS Action type – has been updated to “A” - add, “U”- update & “D” - delete
- The reported Gender Field Values are now reported as M – Male and F – Female instead of 1 – Male and 2- Female.
- Contribution fields (e.g. Member and Employer Contributions) are now reported to two decimal places.
- The Full Time / Part Time reported values have changed from:
 - Part Time = 7
 - Part Time Irregular = 8
 - Full Time = 0
- To
 - Part Time Regular = PTIC
 - Part Time Irregular Contract = PTIC
 - Full Time = FT
- Service Lines for Sick, KIT & Family leave days will now split where certain rules are relevant criteria is met.
- In addition, TPS have introduced several brand-new data items. The new fields introduced are covered in more detail as part of the file explanation section of the user guide.

5.2. When Earned vs When paid?

The reporting requirements for TPS MCR require that certain contributions are deducted and reported on a when earned basis and others on a when paid basis.

The *When Earned* method must be used once you move to MCR for the following types of calculations:

- First Time Payment (e.g. Late notification of joiner)

- Refund of contribution due to overpaid salary or a retrospective opt out.
- When making a payment to a member in the pay month after the one in which the member left employment

For Correction of payment (e.g. refund, underpayment of salary due to employer error). There is an employer choice - TPS prefer when earned is used but allow when paid provided consistency in assessment

Backdated pay awards must be treated on a when paid basis. Note: a negative pay award would result in a refund and therefore be treated on a when earned basis. A backdated pay award is when the members full time equivalent changes but there are no changes to the members circumstances, i.e. added responsibility, promotion change in hours etc

Timesheets claimed late e.g. Associate Lecturers submitting claims this month for the last 3 months – are required to be processed on a when paid basis. This guidance is covered in provision 193 in the legislation and if you read from there to provision 196 [The Teachers' Pension Scheme Regulations 2014 \(legislation.gov.uk\)](#)

From a People XD perspective this translates to:

- Generate Salaries & Allowances: Pay290
 - All Pay290 retro timesheets are on a When Earned basis apart from a Retro Position Rate increase which is When Paid.
 - Retrospective starters / Appointments are when earned.
 - All current period timesheets are on a When Paid basis.
- Manual Timesheets
 - Default to a when paid basis
 - Users have the option record on a when earned basis
- Run Validation: Pay300
 - Payments after leaving and refunds of contributions are on a when earned basis
 - All Pay290 payments & Manual Timesheet are per status.
 - All other payments when paid

5.3. Role Identifier

Role Identifier is introduced under TPS MCR to uniquely identify an employment and role within an employment.

The role identifier is automatically system generated for:

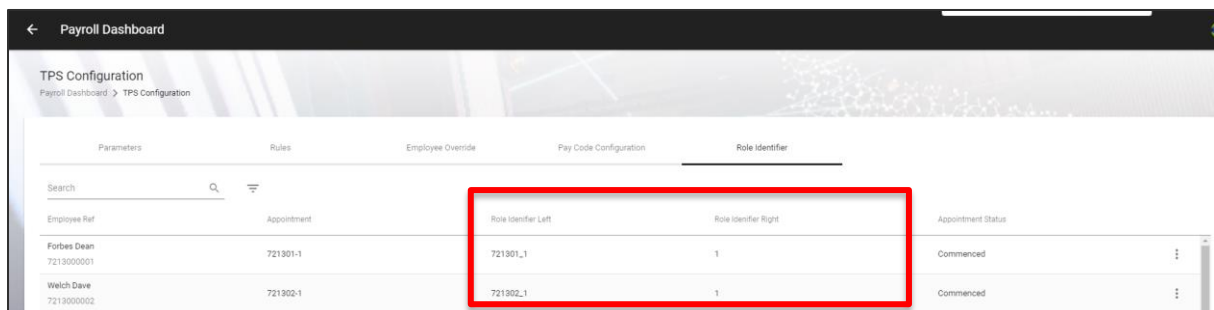

- Current appointments:
 - As part of the TPS MCR software release the system automatically generates a unique role identifier for each appointment.
- New appointments:
 - The Role Identifier is automatically generated whenever a new appointment is created.
 - The exception to this is where an org restructure occurs – in that case the role identifier remains the same as the new appointment is not a new appointment for TPS reporting purposes.

The role identifier is a value of up to 15 length on the left with a '/' and a value of up to 20 length on the right. The system generated role identifier value is made up on the left hand side of the appointment ID with invalid characters e.g. "-" replaced with an underscore and the value on the right is always 1.

The role identifier for an employee can be viewed by going to:

Payroll Dashboard > Teachers Pension Scheme > Configure > Role Identifier

Here a user can search for an employee and their role identifier.

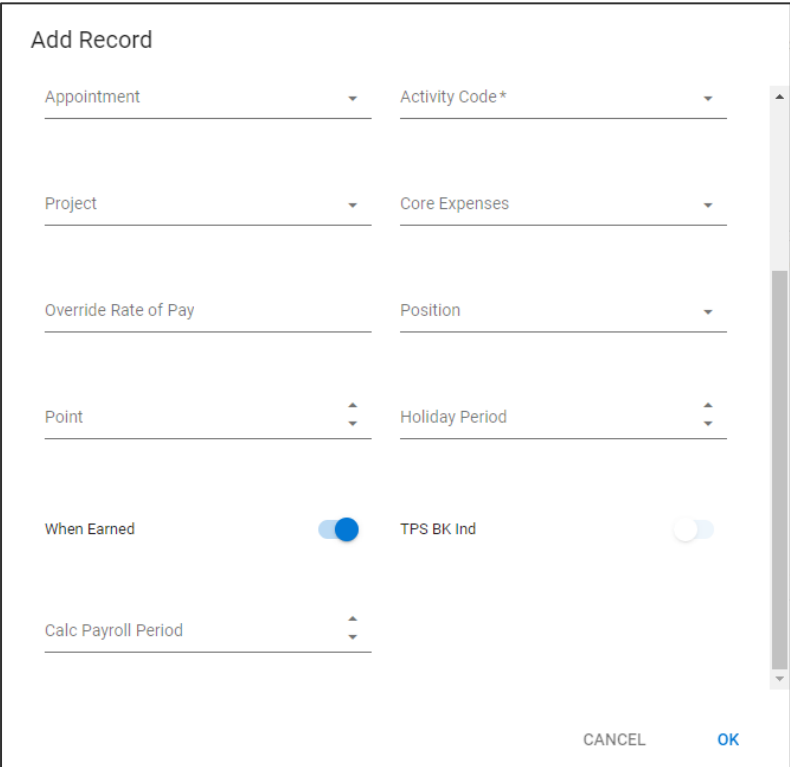

TPS Configuration				
Payroll Dashboard > TPS Configuration				
Parameters	Rules	Employee Override	Pay Code Configuration	Role Identifier
Search				
Employee Ref	Appointment	Role Identifier Left	Role Identifier Right	Appointment Status

5.4. Process Changes

In this section we see some of the changes in the process.

5.4.1. When Earned – Manual Timesheets

Users now have the ability when adding or editing a timesheet in payroll to determine if the transaction should calculate on a when earned or when paid basis. These fields are only visible where TPS is enabled at the company level.

The screenshot shows a 'Add Record' form with the following fields and controls:

- Appointment**: A dropdown menu.
- Activity Code ***: A dropdown menu.
- Project**: A dropdown menu.
- Core Expenses**: A dropdown menu.
- Override Rate of Pay**: A text input field.
- Position**: A dropdown menu.
- Point**: A spinner control (up/down arrows).
- Holiday Period**: A spinner control (up/down arrows).
- When Earned**: A toggle switch, currently turned on (blue).
- TPS BK Ind**: A toggle switch, currently turned off (grey).
- Calc Payroll Period**: A spinner control (up/down arrows), which is only visible when 'When Earned' is enabled.
- CANCEL** and **OK** buttons at the bottom right.

The fields available are:

- **When Earned**: The default for user timesheets is when paid. If updated to enable “when earned” then the field calc payroll period becomes visible on screen.
- **Calc Payroll Period**: Only available for a when earned timesheet. This determines the period that the “when earned” calculation will balance against.
- **TPS BK Ind**: This is to allow the user to confirm if the manual timesheet they are recording is for backed dated pay award. TPS have specific reporting requirements around back dated pay awards and hence the need to identify if the user is recording a timesheet for a back dated pay award.

5.4.2. External Timesheet Take-on

The same three fields have also been added to the file format of the external timesheet take-on. These are optional and off by default. This is to ensure that the existing file formats used in sites will continue to load. Users have the ability to enable the new fields though using the "Data File optional items" which would allow them load the instructions in bulk in to the system.

Column	Include On File
EXPENSE	☒
SUB CATEGORY	☒
POST ID	☒
RATE OF PAY	☐
WHEN EARNED OR WHEN PAID	☐
CALCULATION PERIOD	☐
BACKDATED PAY AWARD	☐

5.4.3. TPS Opt-Out

For an employee who wishes to opt out of the TPS scheme there are 3 available options.

Option	Description
TPS Opt Out – Incorrect Scheme Assigned	This occurs when a LGPS member is set up on TPS incorrectly and we now need to revert out.
TPS Opt Out - Refund Contributions	This occurs when a TPS member leaves scheme and gets a refund of contributions paid to date.
TPS Opt Out – No Refund	This for example where TPS member leaves scheme but no refund is due.

To record a TPS opt out:

5.4.3.1. Back Office

- *Employee > Employee Pension Details > Employee Pension Details*

Going forward users now need to ensure that if a member is leaving the TPS scheme that the relevant TPS opt out option is selected.

The screenshot shows the 'Maintain Employee Pension Details' window. The 'Employee Details' section at the top contains fields for 'Employee Reference' (000935), 'Name' (tps two), and 'Address'. Below this, the 'Pension Details' and 'Auto Enrolment' tabs are visible. The 'Auto Enrolment' tab is active, displaying a grid of fields for pension details. The 'TPS Opt Out' dropdown menu is highlighted with a red box, indicating the selection of the 'TPS Opt Out' option. Other fields include 'Appointment ID' (721213-90088), 'Scheme Code' (2), 'Deduction Percent (EE) 1' through '3', 'Employer Contribution Multiplier', 'Deduction Percent (ER)', 'Deduction Value (EE)', 'Deduction Value (ER)', 'Date of Joining' (01-MAY-2021), 'Date Joined Dependents', 'Arrears Capital Sum', 'Arrears Balance', 'Deduction Adjustment (EE)', 'No. of Adjustments (EE)', 'Deduction Adjustment (ER)', 'No. of Adjustments (ER)', 'New Entrant (Y/N)', 'Exempt from Calculation', 'Exempt from Banded Pension Deduction', 'Pension Fund Refund', 'Payroll End Date', 'Original Date Joined W&O Scheme', 'Original Date Joined S&C Scheme', 'USS Reason Code', 'Override Ded % (EE) 1' through '3', 'Override Ded % (ER)', 'Override Deduction Value (EE)', 'Original Date of Joining', 'Pension End Date', 'Dependents Scheme Type', 'AVC Value', 'AVC Percent', 'AVC Adjustment', 'AVC Start Period', 'AVC End Period', 'Date of First Deduction', 'Deduct On Full Salary', 'Opt Out', 'Generate Refund', 'Auto Enrolment Opt in Event', 'EE Pensionable Pay', 'ER Normal Pen Pay', and 'ER Assumed Pen Pay'.

5.4.3.2. Portal

- *Payroll Dashboard > Employee > Pension*

Going forward users now need to ensure that if a member is leaving the TPS scheme that the relevant TPS opt out option is selected.

The screenshot shows the 'Edit Pension' form for Tom Jones. The form is divided into several sections:

- Pensionable pay overwrites:** Includes fields for EE Pensionable Pay, EE Normal Pen Pay, and LGPS Assumed Pen Pay.
- Pension Scheme Details:** Includes fields for Scheme (Teachers Pension Scheme (TPS)), Life Assurance Value, Retirement Value, Previous Employment Refund, Previous Employment Total, Current Employment Refund, Renewal Period, Corporate Business Reference, and Policy Number.
- Periodic Pension Renewal:** Includes fields for Pension Hours and Pension Hours Override.
- TPS Opt Out:** A red box highlights this section, which contains a dropdown menu labeled 'Select Opt Out Type'.
- Employee Memo:** A section at the bottom for additional notes.

5.4.4. Contact Types

As part of the process for capturing employee information a contact type of “TPSNI” is introduced for TPS NI Number. This was set up in the configuration section.

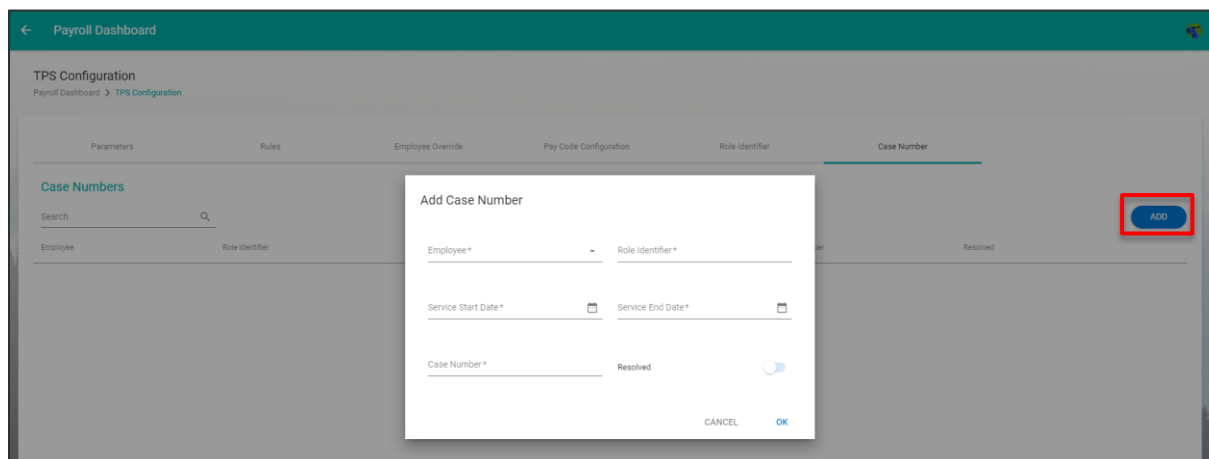

This new contact type can now be captured on an employee’s record when required. This is only required to be populated where the employee has no NINO and TPS provide a temporary number to be used for MCR returns.

5.4.5. Case Numbers

After uploading the file to TPS if error responses are received with case numbers the following process must be followed to link the case numbers to the submission records.

Payroll Dashboard > Teachers Pension Scheme > Configure > Case Number

Here, click on the add button to add a new case number record.

When adding a new “case number” record users are asked to provide

- Employee – This is the employee that the case number refers to.
- Role Identifier – This is the role identifier that the case number refers to.
- Service Start Date – This is the start date of the service line that the case number refers to.
- Service End Date – This is the end date of the service line that case number refers to.
- Resolved – users will leave this field null on initial set up. once a case has been resolved though, to stop reporting the case number in TPS submissions going forward, it can be marked as resolved.

5.5. Sick, Family Leave

5.5.1. Sites using system Sick & Family Leave Calculations

If the system sick & absence functionality is being used, the system automatically splits the service lines returned, based on the sick or family leave rules.

This is required to happen in the case where Sick < 50% or family leave <50% and no statutory pay.

Note:

While the service lines automatically split the system is unable to automatically apportion the period for non-service as non-pensionable, so user intervention is required.

Teachers' Pension Scheme - User Guide

To aid this, Users are alerted via the gross to nett exception messages that manual intervention is required on the payroll contribution values in a period where an employee has Sick < 50% or family leave <50% and no statutory pay.

 Gross Pay Statement Print Payslips

The TPS guidance on these scenarios is as follows:

#	Type of Scenario	Scenario Description	When earned/paid	Additional Comment
13	Absences entered in core pay (sick, maternity, SPBP, SHPP, KIT Days Etc..)	Absences generated via Core Pay Timesheets against specific pay codes	When paid	During a period of family leave where a member is in receipt of statutory pay or at least half of their normal monthly salary, you don't need to record any KIT or SPLIT days separately on the MCR submission. During a period of family leave where a member is receiving less than half their normal monthly pay

#	Type of Scenario	Scenario Description	When earned/paid	Additional Comment
				and <i>is not</i> receiving any statutory pay, any KIT or SPLIT days worked, when paid at the member's normal salary rate, would need to be recorded separately on the MCR submission.
14	Absences entered in core time (sick, maternity, SPBP, SHPP Etc..)	Absences generated via Core Time Input	When paid	During a period of family leave where a member is in receipt of statutory pay or at least half of their normal monthly salary, you don't need to record any KIT or SPLIT days separately on the MCR submission. During a period of family leave where a member is receiving less than half their normal monthly pay and IS NOT receiving any statutory pay, any KIT or SPLIT days worked, when paid at the member's normal salary rate, would need to be recorded separately on the MCR submission

5.5.2. Sites not using system Sick & Family Leave Calculations

Sites not using the system sick & family leave calculations will need to manually intervene. It is recommended in those cases that the implementation of the system module is considered to allow for further automation.

5.5.3. KIT Days

The system automatically splits the service return where KIT / or Shared Parental KIT days are recorded.

5.6. Other Improvements

Based on feedback on the MDC solution the following improvements have also been incorporated.

- Band Assessment now works off pay history (not appointment history)
 - The reason for this change is to correct an issue whereby the incorrect band threshold was being used for joiners/leavers in the period.
- TPS Address Field Length
 - An issue has been fixed whereby the TPS MCR output will now output the full length of address as held against the employee's record.
- Employee with Multi Appointments split between LGPS & TPS
 - An issue has been addressed whereby an employee with appointments split across two schemas (LGPS & TPS) was resulting in an error in the TPS or LGPS output.
- LA & Establishment Number – Zero Padding
 - LA & Establishment number can now hold a zero-lead value if required.

6. Generation TPS MCR

Once the configuration steps outlined have been completed, you can now generate the Teachers Return in Portal.

6.1. Generation TPS MCR Data by Payroll Company

To generate the return:

1. Go to *Payroll Dashboard > Teachers Pension Scheme*.
2. Click the **Generate Data** tab.
3. Enter the relevant **Company**:
 - Enter From Period – Enter the MCR start date in date format, e.g. 01-APR-2021
 - Enter To Period – Enter the MCR end date in date format, e.g. 30-APR-2021
4. Enter **Employee number** to run TPS record for an individual employee. Leave null to run for all.
5. When these are populated, click on **Generate Data** to populate the underlying data for the Return.

The screenshot displays the 'Teachers Pension Scheme (TPS) MCR' interface. At the top right is a 'CONFIGURE' button. Below the title bar, there are two tabs: 'Generate Data' (active) and 'Generate Report'. The 'Generate Data' tab contains several input fields and controls: a 'Payroll Company' dropdown menu with the placeholder 'Select a Payroll Company'; an 'Employee' field with the placeholder 'Select a Employee'; a toggle switch for 'All Companies' currently in the 'off' position; a 'Preview Mode' toggle switch currently in the 'on' position; a 'From Date' field with a calendar icon and placeholder 'Select a Period Start Date'; and a 'To Date' field with a calendar icon and placeholder 'Select a Period End Date'. A red rectangular box highlights the 'GENERATE DATA' button in the bottom right corner of the form.

6. You will be notified the job has been submitted and when the data has been generated and job completed.

6.2. Preview Mode

You can also generate the TPS file in preview mode before the complete update step of the payroll is run. This means you can generate the file and review/validate it before you have closed the current payroll period.

To do this:

1. Complete the Run Payroll Update step of the payroll run.
2. [Generate the TPS MCR Data](#) with the **Preview Mode** toggle enabled.

The screenshot shows the 'Teachers Pension Scheme (TPS) MCR' interface. At the top right is a 'CONFIGURE' button. Below the title bar are two tabs: 'Generate Data' (active) and 'Generate Report'. The 'Generate Data' tab contains several fields: 'Payroll Company' (dropdown menu), 'Employee' (dropdown menu), 'All Companies' (checkbox), 'Preview Mode' (toggle switch, highlighted with a red box), 'From Date' (calendar icon), and 'To Date' (calendar icon). At the bottom right is a 'GENERATE DATA' button.

3. You can then make changes, run the Payroll Update again and recheck the file.

6.3. Generate TPS MCR Report by Payroll Company

Once the data has been populated you can generate the TPS MCR Report by Payroll Company:

1. Go to *Payroll Dashboard > Teachers Pension Scheme*.
2. Click the **Generate Report** tab.

The screenshot shows the 'Teachers Pension Scheme (TPS) MCR' interface. At the top right is a 'CONFIGURE' button. Below the title bar are two tabs: 'Generate Data' and 'Generate Report' (active). The 'Generate Report' tab contains several fields: 'Report Type' (dropdown menu), 'Company' (dropdown menu), 'Payroll Company' (dropdown menu), 'From Date' (calendar icon), and 'To Date' (calendar icon). At the bottom right is a 'GENERATE REPORT' button.

3. Enter the relevant **Company**.
4. Enter **From Period** – Enter the MCR start date in date format, e.g. 01-APR-2021
5. Enter **To Period** – Enter the MCR end date in date format, e.g. 30-APR-2021
6. Click **Generate Report** to produce the actual file TPS MCR report. A notification will confirm that the job is running.
7. The Report will be available to download in the *Report Centre*.

6.4. Validation of System File

The file produced from the system should be taken and then imported into the TPS MCR Template v8 from their website and validated: <https://www.teacherspensions.co.uk/employers/managing-members/mcr/forms-and-guides.aspx?>

This will identify errors and warnings which will need to be reviewed to validate that the file will pass TPS checks. If upon review users make updates in the system to correct the errors/warnings, then they should generate a new TPS file and revalidate it. Some scenarios (e.g. scenario 5 and 6) will require manual corrections to be made to the TPS MCR file outside of the system.

The following are some common types of errors you may see:

- Employees with Foreign Address but Country Recorded as UK
 - This causes an issue as the post code must be reported for a UK address but may be held
 - Where encountered users should update the Country to be the correct foreign country.
- Employees with no NINO
 - In this case where a genuine NINO can be provided, recorded it on the system
 - If a genuine NINO can't be provided, then a Temporary NINO for purposes of the MCR return is provided by TPS by ringing their employer helpline.
 - Once provided this should be recorded on the system as a TPS NI contact type.
- Employees with no Address
 - In this case, an employee's address should be updated to record the minimum 2 lines of address needed
- Invalid Teachers Pension Reference Number

- Held as a contact type DCSF: a valid DCSF should be recorded or if left null 0000000 will output which is also accepted by TPS.
 - If required, can exclude employees from the MCR return.
- Manual Adjustments to Contributions
 - As the MCR is a % based scheme there's an expected link between pensionable pay and contributions
 - If adjustments to pay are made this is ok and should balance between pensionable pay and contributions deducted and reported
 - However, adjustments to contributions will mean a mismatch on the MCR validation and will therefore require manual intervention
- Sick/Family Leave < 50%
 - If using the sick module, the service lines will automatically split as expected. However, the allocation of pensionable pay / contributions over the rows may need to be updated by the user.

6.5. TPS MCR File Upload

Once the MCR submission has been created and you have validated it versus the TPS excel tool, you can then upload this via the Employer Portal, using the same method as you did for MDC and Monthly Contributions Breakdown submissions.

When you upload a file through the Employer Portal, the TPS system will perform a number of validation checks on the data provided before updating their records.

6.6. Generate TPS MCR by Establishment

There is a two-step process for producing the TPS MCR file in a Multi Establishment Site.

1. Generate TPS Data. This follows the same process as the normal [Generate TPS Data](#) process outlined earlier, with an additional indicator.
 - a. When generating the TPS Data users should enable the **All Companies** toggle. This will generate the data for any company which is enabled as a TPS Company.

Teachers Pension Scheme (TPS) MCR

Generate Data

Generate Report

Payroll Company Employee

Select a Payroll Company Select a Employee

From Date To Date

All Companies ☒

GENERATE DATA

2. Generate TPS Return. This follows the same process as the normal [Generate TPS Report](#) process outlined earlier, with an additional field:

a. When generating the report select a *Report Type*:

i. Company

- This option allows users to generate a file per payroll company.

ii. MAT

- This option allows users generate one combined File under the Multiple Academy Thrust Number
- This is used where shared service or multiple academy sites wish to send back one combined file.

iii. Establishment

- This option allows users generate a file per establishment / LA number
- This is used where shared service or multiple academy sites wish to send back a file per Establishment

Generate Data

Generate Report

Report Type

Company Code C

MAT Code M

Establishment Code E

To Date

Select a Period End Date

GENERATE REPORT

Once the file has been produced from the system, in the method the required, it can be validated using the TPS MCR Excel the same as outlined earlier in section [6.4. Validation of System File](#).

7. Reporting Business Area

Two new insight views have been added. For further guidance on using Insight see the [fundamentals user guide](#) on the knowledge base,

To view or set up an insight report

1. Navigate to the Insight Dashboard.
2. The page displays to show all reports or those reports specific to you.
3. To create a report expand the Actions menu and click **Create Report**.

7.1. View of System Calculations

An insight view TPS Pension Calculations (Pay) is available containing the calculation breakdown.

- This will allow employers report on how the system calculation was applied.
- This is available for all periods processed under TPS MCR.

When creating a report the view "TPS Pension Calculations (Pay)" can be used to report on the TPS MCR Calculations.

Select a Column

Search Data Tps Pension Calculations (Pay) ▼

7.3. Update to Timesheet Listing View

In addition to the new views added, the existing timesheet listing view has been updated to allow users report on the:

- TPS Calculation Basis (WE – When Earned or WP – When Paid)
- TPS Payroll Calculation Period
- TPS Backdated Pay Award

tps timesheet

000940	WP	202117	
000940	WP	202104	BK
000940	WF	202039	

8. Other Important TPS Points

8.1. April Returns

TPS require that the April return is split from 1st - 5th April and from 6th - 30th April. From a user perspective the April return should still be run with a start date of 1st of April and a leave date of the 30th of April.

The system automatically splits the file for the two reporting periods (1st - 5th April and 6th - 30th April). If there are other service line changes within the month, these also split as separate lines.

8.2. Service Lines

The return outputs new service lines where:

- Salary is at a point in time for all eligible employees by appointment/post level.
- Any changes are made to Salary within the relevant year.
- Eligibility is determined by Category/Staff Type (Teacher, Researcher, Academic, etc).
- An employee must be returned if they fall into an eligible category for the Teachers Pension Scheme (TPS), regardless of whether they have actually contributed to the scheme.

For the purposes of the return, a *Leaver* is also defined as follows:

- Someone who either leaves the appointment/post with eligible staff type or leaves the organisation.
- The start date on the return is the start of the TAR period (e.g., 01/04/12) and the end date is the date the employee leaves the appointment or organisation. The Withdrawal indicator is also set to 'W'.
- If they re-join within the relevant TAR period, this results in a new line with the new start date.
- If an employee *opts out*, this is indicated by an additional line being added on the return.

In summary, the following *Events* should result in a new line on the report:

- any salary scale change
- any change to annual salary rate
- a change from full to part-time service (and vice versa)

- a change in a part-time contract
- the commencement or cessation of a pensionable allowance
- a break in service
- the commencement or cessation of a safeguarded salary
- a change in the teacher's pensionable employment position
- a part-time election
- an election to opt out of the TPS
- an election to re-join the TPS.

8.3. Back Dated Pay Awards

If September is returned, and an employee gets a pay award back dated to August, the return includes service lines for August and September in the September return.

8.4. Withdrawn Indicator

The withdrawn indicator W is output if

- a) An appointment is ended at the end of the month being processed and no other TPS appointment starts the 1st of the next month.
- b) An appointment is ended mid-month and no other TPS appointment starts the next day.
- c) An appointment is ended retrospectively. I.e., Appointment ended in Sep with an Aug end date.

8.5. Dates Excluded

Days excluded are output for full time employees where they have an unpaid absence. I.e. unpaid leave, unpaid maternity, strike day etc. They can be output for a part time employee if they have no pay in the period in which case the days excluded would be the number of days in the month. If there is part time pay, then days excluded must be null for part time employees.

The unpaid absence pay codes need to be identified in the pay code configuration tab of the TPS generation screen on initial setup. Keep in Touch (KIT) pay codes also have an impact on days excluded so the KIT pay codes also need to be identified on initial set up. Then if the TPS program finds any unpaid absences it will output the relevant number of days excluded for full time employees. For part time employees it will reduce the part time pay and days excluded will be 0.

Some unpaid absences are recorded in Core time and some in Core pay. Unpaid maternity and unpaid leave would generally be recorded in Core time.

For days recorded in Core time, the TPS module looks for any unpaid absence pay codes which have an absence date for the month being processed on the table weekly sick and which have a **0-pay multiplier**.

**Note:**

It is based on calendar days and not working days. Sick pay for example may be recorded as Mon-Fri but the Sat and Sun would also be counted as sick days if the following Monday was also recorded as a sick day.

Any unpaid absence days which have a payment against them are not returned as a day excluded. This means we also need to check to see if there was a statutory payment made for that day in Core pay and if there was, then that day would not be returned as excluded.

Statutory pay runs from 1-Oct-17 to 28-Dec-17 in Core pay. Occupational maternity in Core Time is recorded as unpaid from the 23-Dec-17. That means that only the days from 29-Dec-17 would be counted as excluded as there was statutory payments made from the 23rd to the 28th.

Strike days are recorded in Core pay as timesheets. If there are 5 strike days, then there needs to be 5 timesheets input with a transaction date for each day.

If a KIT pay code was entered as a timesheet, then this would reduce the number of days excluded for full time employees or increase the part time pay for part time employees.

For example:

Example:

An employee has 1 KIT Day in September and 3 days of unpaid absences. The net effect of this is 2 days returned as excluded for full time employees or the part time pay only reduced by 2 days for part time employees

8.6. What would trigger more than 1 month being returned on the file?

- Arrears of pay generated in the current month relating to a previous month.
- Timesheets input for associate lecturers (0 pay multiplier) in the current month where transaction date relates to a previous month.
- Unpaid absence pay-code input retrospectively in Core time. i.e. input a sick day in Core time in Sep where the absence date is the 10-Aug.
- Input an unpaid absence pay code as a timesheet in Sep for a transaction date of 5-Jul. i.e. Strike day
- Input an overtime pay code in the current month where the transaction date is for a previous month.
- Appointment ended retrospectively
- A retrospective change to the salary from the last time the generate salaries and allowances was run even though no arrears may have been generated for the employee as they are paid by timesheet entry i.e. position rate changed since in Sep with an effective date in Aug for an employee on a 0-pay multiplier.

8.7. Employees on Concurrent Posts

Concurrency has been removed under MCR and now all appointments show as their own lines on the return.

9. Appendix: File Explanation

9.1. Header

The header is created using the following naming protocol: "MCR" + Local Authority Number of the Local Authority/MAT/Establishment/Payroll Provider the submission relates to + Establishment Number of the Local Authority/MAT/Establishment/Payroll Provider the submission relates to + Month (as a 2-digit number) the submission relates to + Year (as a 4-digit number) the submission relates to.

For example: Submission for employer 123/0000 relating to June 2020 payroll Header must be MCR1230000062020

9.2. Record Action

No	Field	Format	Notes
2	Record Action	Character	"U" if Update, 'A' if Add or "D" if deleting a new entry. This field will be 'A' by default when the file is generated from Core. Any salary or allowance record output on the file with a start date pre the 'from date' of the MCR report will have this field set to 'U' for update. "D" will be used when removing a period of service from a member's record and refunding the contributions relating to that period of service, for example where an employee was enrolled into the incorrect scheme.

9.3. Case Number

No	Field	Format	Notes
3	Case Number	Numeric	This is a new field introduced as part of the MCR Project. Where errors are identified within the data provided to TPS, TPS will provide users with a case number for that record. Subsequent corrections to that record. Users can record this value into the system.

9.4. Teachers' Pensions Reference Number

No	Field	Format	Notes
4	Teachers' Pensions Reference Number	Numeric	This is the Teachers Reference Number and is identified in Core from the contact types where contract type = 'DCSF'. The field is right aligned and zero padded on the left to 7 digits in length. An example of a reference number is 9085466.

9.5. National Insurance Number

No	Field	Format	Notes
5	National Insurance Number	AANNNNNNA	This is the Employees NI Number or if provided with a Temp TPS NI Number it is identified in Core from the contact types where contract type = 'TPSNI'.

No.	Field	Format	Notes
6	Forename	Alpha	This is the employee's forename from their HR record.
7	Surname	Alpha	This is the employees' surname from their HR Record.
8	Gender	Alpha	M – Male; F - Female
9	Date of Birth	DOB	This is the date of birth of the teacher in format DDMMYYYY.

No.	Field	Format	Notes
10 -14	Address 1 to 5	Alpha +	This is address line 1 to 5 from the Persons Home Address.
15	Post Code	Alpha and Numeric	This is the post code suffix & prefix from the employees Home Address.
16	Email	Alpha and Numeric	This is the email from the persons contact details screen where the Contact Type = 'EMAIL'.
17	Local Authority Number	Numeric	3 digits. This is a parameter set on the generate pension return screen.
18	Establishment number	Numeric	4 digits. This is a parameter set on the generate pension return screen.
19	Role Identifier	Alpha Numeric	An employer generated reference number, following specific naming conventions, to identify each employment and the individual job roles under that employment. Automatically system generated.
20	Enrolment Type	Character	Indicator "Auto" or "Cont" to denote if the member has been Contractually Enrolled or Automatically Enrolled at the 'Start Date' (data item 21) of the row of data. Mandatory when reporting a new starter.
21	Start Date	Numeric	Must be 8 characters, to be displayed as DDMMYYYY. Normally, but not always, the start of the calendar month. The start date represents the service commencement.
22	End Date	Numeric	Must be 8 characters, to be displayed as DDMMYYYY. The end date must be greater or equal to the start date. The start and end date must not cover a period of more than one calendar month.
23	Withdrawal Confirmation	Alpha	'W' is entered if the worker is leaving the company. If leaving an appointment, the TPS checks to see if any other active TPS appointment on the next day. If yes,

No.	Field	Format	Notes															
			then it's not reported as 'W' as the employee is seen as being in continuous service on a TPS appointment.															
24	Days Excluded	Numeric	3 numeric digits with leading zeros. E.g., 008 Days excluded are populated where there are unpaid days.															
25	FT/PT indicator	Alpha	Indicator to denote the type of working hours contract a member has with an employer during the Service Period. <table><tr><th>Template Codes – Selectable from a 'Drop Down' list.</th><th>.CSV Codes</th><th>Definition</th></tr><tr><td>FT</td><td>FT</td><td>Member with a Full-time contract</td></tr><tr><td>PTR</td><td>PTR</td><td>Member with a Part-time contract that specifies a regular pattern of work</td></tr><tr><td>PTIC</td><td>PTIC</td><td>Member with a Part-time contract that is for an irregular pattern of work (Supply Teacher), where they are deemed as being in employment when they are not working</td></tr><tr><td>PTIN</td><td>PTIN</td><td>Member with a Part-time contract that is for an irregular pattern of work (Supply Teacher), where they are deemed as not being in employment when they are not working</td></tr></table>	Template Codes – Selectable from a 'Drop Down' list.	.CSV Codes	Definition	FT	FT	Member with a Full-time contract	PTR	PTR	Member with a Part-time contract that specifies a regular pattern of work	PTIC	PTIC	Member with a Part-time contract that is for an irregular pattern of work (Supply Teacher), where they are deemed as being in employment when they are not working	PTIN	PTIN	Member with a Part-time contract that is for an irregular pattern of work (Supply Teacher), where they are deemed as not being in employment when they are not working
Template Codes – Selectable from a 'Drop Down' list.	.CSV Codes	Definition																
FT	FT	Member with a Full-time contract																
PTR	PTR	Member with a Part-time contract that specifies a regular pattern of work																
PTIC	PTIC	Member with a Part-time contract that is for an irregular pattern of work (Supply Teacher), where they are deemed as being in employment when they are not working																
PTIN	PTIN	Member with a Part-time contract that is for an irregular pattern of work (Supply Teacher), where they are deemed as not being in employment when they are not working																
26	Annual Full-time salary	Numeric	Number with two decimal places. This is the FTE Salary for an employee.															
27	Part time salary paid	Numeric	For Part-time Members Only. The total amount of pensionable earnings paid to the member for the service period the row of data relates to.															
28	Overtime	Numeric	Sum up the value of pay codes from payroll history that have an analysis type of 'OT' – Overtime where the transaction date is in the current month for all TPS appointments. Requires that you check the Overtime indicator in the analysis codes screen at reference -> analysis codes. Overtime pay codes will not be permanent allowances for the employee so will not be included in the full-time salary.															

No.	Field	Format	Notes
29	Additional Pensionable Payments	Numeric	The amount of additional pensionable payment made in the pay period the service period covers.
30	Status Indicator	Character	Indicator to denote the status of a member during the period of service the row of data relates to, where this status could affect the calculation of a member's contribution tier. - "FL" – Family Leave "OS" – Occupational Sick
31	Calc Method for Cont. Tier	Character	Indicator to denote how the contribution tier and/or the contribution calculation was performed. • "WE" – When Earned • "WP" = When paid
32	Contribution Calculation Date	Date	Only to be used when the Calculation Method for Contribution Tier (data item 31) is 'WE' The date that would be used for the calculation of a member's and employer's contribution, when this is different to the service period the row of data relates to.
33	Actual Pensionable Pay in the Pay Period	Numeric	The amount of pensionable pay (excluding overtime) paid to the member for the period of service the row of data relates. This would include the actual gross pensionable salary paid in the pay period AND any additional pensionable payments made in the pay period.
34	Pensionable Overtime in the Pay Period	Numeric	The amount of pensionable overtime paid to the member for the period of service the row of data relates.
35	Notional Pensionable Pay in the Pay Period	Numeric	Only to be used if the 'Status Indicator' (data item 30) equals 'FL' or 'OS' The amount of pensionable pay the member would have received for the period of service

No.	Field	Format	Notes
			the row of data relates to if they were not on reduced pay
36	Employer Contributions	Numeric	The total amount of ER contributions paid that month by the employer.
37	Employee (Member) Contributions	Numeric	The EE contribution paid that month by the employee. Pension contributions are reported when paid and not the period they may relate to.
38	Employee (Member) Contributions Tier	Numeric	The Member Contributions Tier (as a percentage rate), relating to the member's contract of employment.
39	Additional Pension Contribution Amount	Numeric	The amount of Additional Pension contributions, relating to the member's contract of employment.
40	Faster Accrual Contribution Amount	Numeric	The amount of Faster Accrual contributions, relating to the member's contract of employment.
41	AAB Buy Out Contribution Amount	Numeric	The amount of AAB Buy Out contributions, relating to the member's contract of employment.
42	Additional Contributions Amount (Family Benefits, PAY, Higher Salaries)	Numeric	The amount of Additional Contributions Amount (Family Benefits, PAY, Higher Salaries) contributions, relating to the member's contract of employment.
43	Preston Contributions Amount	Numeric	The amount of Preston Contributions Amount relating to the member's contract of employment.

No.	Field	Format	Notes
44	Employer Contributions – Previously Paid	Numeric	Only to be used when the calculation method for contribution tier (data item 31) is 'WE'. The amounts of contributions that have already been deducted relating to the member's contract of employment.
45	Employee (Member) Contributions – Previously Paid	Numeric	Only to be used when the calculation method for contribution tier (data item 31) is 'WE'. The amounts of contributions that have already been deducted relating to the member's contract of employment.
46	Additional Pension Contribution Amount – Previously Paid	Numeric	Only to be used when the calculation method for contribution tier (data item 31) is 'WE'. The amounts of contributions that have already been deducted relating to the member's contract of employment
47	Faster Accrual Contribution Amount – Previously Paid	Numeric	Only to be used when the calculation method for contribution tier (data item 31) is 'WE'. The amounts of contributions that have already been deducted relating to the member's contract of employment
48	AAB Buy Out Contribution Amount – Previously Paid	Numeric	Only to be used when the calculation method for contribution tier (data item 31) is 'WE'. The amounts of contributions that have already been deducted relating to the member's contract of employment
49	Additional Contributions Amount (Family Benefits, PAY, Higher Salaries) –	Numeric	Only to be used when the calculation method for contribution tier (data item 31) is 'WE'. The amounts of contributions that have already been deducted relating to the member's contract of employment

No.	Field	Format	Notes
	Previously Paid		
50	Employer Contributions – Adjustment	Numeric	Only to be used when the calculation method for contribution tier (data item 31) is 'WE' The value of the 'When Earned' method adjustment, relating to the members contract of employment
51	Employee (Member) Contributions – Adjustment	Numeric	Only to be used when the calculation method for contribution tier (data item 31) is 'WE' The value of the 'When Earned' method adjustment, relating to the members contract of employment
52	Additional Contributions Amount – Adjustment	Numeric	Only to be used when the calculation method for contribution tier (data item 31) is 'WE' The value of the 'When Earned' method adjustment, relating to the members contract of employment
53	Faster Accrual Contribution Amount – Adjustment	Numeric	Only to be used when the calculation method for contribution tier (data item 31) is 'WE' The value of the 'When Earned' method adjustment, relating to the members contract of employment
54	AAB Buy Out Contribution Amount – Adjustment	Numeric	Only to be used when the calculation method for contribution tier (data item 31) is 'WE' The value of the 'When Earned' method adjustment, relating to the members contract of employment
55	Additional Contributions Amount (Family Benefits, PAY, Higher Salaries) – Adjustment	Numeric	Only to be used when the calculation method for contribution tier (data item 31) is 'WE' The value of the 'When Earned' method adjustment, relating to the members contract of employment

No.	Field	Format	Notes
56	Total Contribution Payment	Numeric	The total contribution payment due to Teachers' Pensions in the pay period the MCR file relates to.
57	Payment Method	Character	The payment method used to pay the contribution amount due to us in the pay period the MCR file relates to. This is one of the TPS parameters.

9.6. Contribution Summary

The TPS MCR file produced also contains a contribution summary at the end as well. This contribution summary section outlines the totals for each of the relevant fields.

Section B - Contribution Summary

- 56. Total Contribution Payment
- 57. Payment Method
- 58-65. Contributable Salary - Tier 1 to Tier 6, Unassignable Tier and Total
- 66-73. Employer Contributions - Tier 1 to Tier 6, Unassignable Tier and Total
- 74-81. Member Contributions - Tier 1 to Tier 6, Unassignable Tier and Total
- 82. Additional Pension Contributions
- 83. Faster Accrual Contributions
- 84. AAB Buy Out Contributions
- 85. Additional Contributions (Family Benefits, PAY, Higher Salaries)
- 86. Preston Contributions
- 87. Total Extra Contributions
- 88-89. Employer Contributions Adjustments - Current Scheme Year and Prior Scheme Years
- 90-91. Member Contributions Adjustments - Current Scheme Year and Prior Scheme Years
- 92-93. Total Adjustments - Current Scheme Year and Prior Scheme Years
- 94-95. Additional Pension Adjustments - Current Scheme Year and Prior Scheme Years
- 96-97. Faster Accrual Adjustments - Current Scheme Year and Prior Scheme Years
- 98-99. AAB Buy Out Adjustments - Current Scheme Year and Prior Scheme Years
- 100-101. Additional Contribution Adjustments - Current Scheme Year and Prior Scheme Years
- 102-103. Total Extra Contribution Adjustments - Current Scheme Year and Prior Scheme Years
