1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on Third Party EFT functionality in Payroll.

Items covered Include:

- Pay code configuration.
- Extracting Third Party EFT data.
- Maintaining Third Party deductions
- Generating Third Party EFT files.

1.2. What is Third Party EFT

Third Party EFT is functionality within Payroll to facilitate the transfer of funds between accounts and firms electronically. Third Party EFT can be found on the manage payroll tab:

1. On the **Manage Payroll** tab select a pay group.
2. Click the **Outputs** tab.
3. Click **Third Party EFT**.

The screenshot shows the 'Third Party EFT' interface within the 'Payroll Dashboard'. The breadcrumb trail is 'Payroll Dashboard > Third Party EFT'. There is a blue button labeled 'OPEN LEGACY FORM' in the top right corner. Below the breadcrumb, there are four tabs: 'Extract' (which is active and underlined), 'Maintain', 'Generate/Reset', and 'Pay Code Configuration'. The 'Extract' tab contains several form fields: a 'Paygroup' dropdown menu with 'All Paygroups' selected, a toggle switch for 'Inland Revenue' which is turned on, a 'Pay Code' dropdown menu with 'Select a pay code' as the placeholder, a 'Pay Code Type' dropdown menu with 'Select a pay code type' as the placeholder, 'From Period*' and 'To Period*' dropdown menus, and a 'Paypath Date*' field with the date '03-May-2024' and a calendar icon. At the bottom center, there is a logo for 'access PeopleXD' and a blue button labeled 'EXTRACT DATA' in the bottom right corner.

2. How to Use Third Party EFT

2.1. Extract Third Party EFT Data

To Extract Third Party EFT Data:

1. Navigate to the **Third Party EFT** screen.
2. Click the **Extract** tab.

The screenshot shows the 'Third Party EFT' screen within the 'Payroll Dashboard'. The 'Extract' tab is active. The form contains the following elements:

- Paygroup:** A dropdown menu set to 'All Paygroups' with the text 'Select a pay group' below it.
- Pay Code:** A dropdown menu with the text 'Select a pay code' below it.
- Pay Code Type:** A dropdown menu with the text 'Select a pay code type' below it.
- From Period*:** A dropdown menu.
- To Period*:** A dropdown menu.
- Paypath Date*:** A date field showing '03-May-2024' with a calendar icon.
- Toggles:** Two toggle switches, one for 'All Paygroups' (which is turned on) and one for 'Inland Revenue' (which is turned off).
- Buttons:** An 'OPEN LEGACY FORM' button in the top right and an 'EXTRACT DATA' button in the bottom right.
- Footer:** The 'access PeopleXD' logo is at the bottom center.

3. Select a Pay group option:
 - a. Select a **Pay Group** from the drop-down list.
 - b. Enable the **All Paygroups** toggle.
 - c. Enable the **Inland Revenue** toggle.
 - i. If this toggle is enabled then the Pay Code Drop down menu will only display Pay Codes configured as 'Inland Revenue Paypath', for further details see section [4.1. Inland Revenue Paypath Indicator](#).
 - ii. Otherwise, it should not be toggled on if generating say a deduction file to a healthcare provider or other.
4. Select a Pay Code option:
 - a. Select a **Pay Code** from the drop-down list
 - b. It is optional to select a **Pay Code Type**.
5. Select a **From Period** and **To Period**.
6. Select a **Paypath Date**.
7. Click **Extract Data**.

Note:

You may extract the Third party details more than once. When this is done all previously extracted data will be deleted and overwritten.

2.2. Maintain Third Party Deductions

The information for the Third Party Data extract can be viewed in Maintain Third Party Deductions. You cannot add or remove records from this screen, but it will allow you to amend an employee's total value if necessary.

To view and edit Third Party Deductions:

1. Navigate to the **Third Party EFT** screen.
2. Click the **Maintain** tab.

- 6. Click **Reset**.

3. Third Party EFT Configuration

3.1. Pay Code Configuration

Each pay code to be included in the EFT procedure needs to have the correct configuration to ensure funds are transferred to the correct account. Each pay code will need:

- To be a deduction pay code.
- A linked Bank Account and Sort Code or BIC IBAN.
- The Third Party Returns Rule enabled.

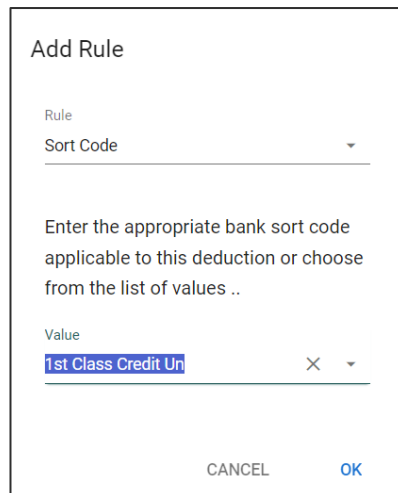

To do this:

1. Navigate to the **Payroll Dashboard**.
2. Go to the **Settings** Tab.
3. Click **Pay Codes**.
4. Search for the relevant deduction pay code and expand its **3-Dot Menu**.
5. Click **Edit**.
6. Click **Next** to go to the Rules step.
7. Click **Add**.
8. Select **Account Number** from the list and fill in the **Value**.

The screenshot shows the 'Pay Code Wizard' interface, specifically the 'Rules' step. A modal titled 'Add Rule' is open in the center, prompting the user to enter a bank account number. The modal contains a dropdown menu for 'Rule' (currently set to 'Account Number'), a text input field for 'Value *' containing '12345678', and 'CANCEL' and 'OK' buttons. In the background, the 'Rules' table is visible with columns for 'Rule', 'Description', and 'Value'. The table lists various rules such as 'Taxable', 'Nliable', 'Pensionable for Employee', etc. The left sidebar shows the progression from 'Pay Code Formula' to 'Rules' (current) to 'General Ledger'. Navigation buttons 'PREVIOUS' and 'NEXT' are at the bottom right.

Rule	Description	Value
Taxable	Enter Taxable, Non-Taxable	Non-Taxable
Nliable	Enter Nliable, Non-Nliable	Non-Nliable
Pensionable for Employee	Select if this Pay Code is Pensionable for Employee	Non-Pensionable EE
Pensionable for Employer	Select if this Pay Code is Pensionable for Employer	Non-Pensionable ER
Max Value Warning	Enter the Maximum Value	999999.99
Min Value Warning	Enter the Minimum Value	-999999.99
Enable/Disable for Allowances...	Select if this Pay Code is to be Enabled or Disabled for Allowances	Disable for Allowances/Deductible
Enable/Disable for Timesheets	Select if the Pay Code is to be Disabled or Enabled for Timesheets	Disable for Timesheets
Calculation Priority	Enter the calculation Priority in order of importance e.g. 1,2,3 for each allowance	1

9. Click **OK**.
10. Select **Sort Code** from the list, fill in the **Value** and click **OK**.

SAVE

The table below outlines the settings available on this screen:

Field	Description
Pay Code	Enter the required Pay Code or select the Pay Code from the drop-down menu. Once selected the Sort Code, Account Number, BIC and IBAN will be populated.
Third Party Discount	Enter a discount Percentage, this should not be a monetary value. Each Employee's deduction will be reduced by this percentage on the EFT file. The option is available to allocate different percentages of the payment to more than one bank account by clicking Add. The total must add up to 100% but may be divided as needed.
Sort Code	Enter the required sort code to which the percentage of Third Party payment is to be.

Field	Description
Account No.	Enter the required bank account number to which the percentage of Third Party payment is to be.
Percentage	Enter the percentage of payment to be allocated to the chosen bank account.

**Note:**

Once all the Pay Code allocations have been entered, it is recommended to Save the changes before proceeding with the next Pay Code configuration.

4. HMRC Payments (UK Only)

4.1. Inland Revenue Paypath Indicator

Statutory payments to HMRC (PAYE, NI) can also be made to HMRC through the Third Party EFT module. The first step is to indicate what pay codes are to be included in this transfer. You do this by selecting the pay code(s) you wish to include.

The Inland Revenue Paypath indicator should be enabled if the Allowance (SAP, SPP, SMP) or Deduction (PAYE, NI, etc) is to be included on the PAYE BACS File.

To enable the Inland Revenue Paypath Indicator on a Pay Code:

1. Click the **Settings** tab then click **Pay Codes**.
2. Edit the relevant Pay Code and click **Step 2 Rules**.
3. Select the **Inland Revenue Path Ind** from the list.
4. Enable the Toggle and click **OK**.

The screenshot shows the 'Pay Code Wizard' interface with the 'Rules' tab selected. A modal window titled 'Add Rule' is open, showing a dropdown menu with 'Inland Revenue Path Ind' selected. The modal also contains the text 'Select if included on the ALBACS revenue file' and 'OK' and 'CANCEL' buttons. The background table lists various rules with their descriptions and values.

Rule	Description	Value
Taxable	Enter Taxable, Non-Taxable	Non-Taxable
Ni-able	Enter Ni-able, Non-Ni-able	Non-Ni-able
Pensionable for Employee	Select if this Pay Code is Pensionable for Employee	Non-Pensionable EE
Pensionable for Employer	Select if this Pay Code is Pensionable for Employer	Non-Pensionable ER
Max Value Warning	Enter the Maximum Value	999999.99
Min Value Warning	Enter the Minimum Value	-999999.99
Enable/Disable for Allowances...	Select if this Pay Code is to be Enabled or Disabled for Allowances	Disable for Allowances/Deduct...
Enable/Disable for Timesheets	Select if the Pay Code is to be Disabled or Enabled for Timesheets	Disable for Timesheets
Calculation Priority	Enter the calculation Priority in order of importance e.g. 1,2,3 for each allowance	1

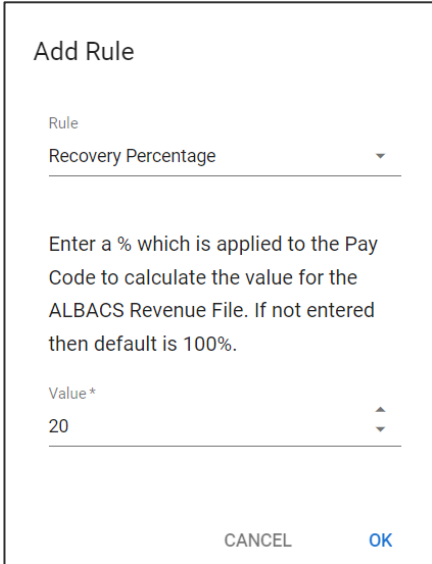

5. Click **Next** then click **Save**.

4.2. Recovery Percentage

Recovery Percentage for the Statutory Payments a percentage should be added. The value of any payments (Pay codes) will be calculated based on the 'Recovery Percentage. The default will be 100% however if any other Percentage is used then the total value on History, for that Payment, will be multiplied by the Percentage and will be posted to the BACS file accordingly. This is to cater for the fact that for some statutory payments i.e. SAP, SMP, SPP have a 92% recovery value.

To enable the Inland Revenue Paypath Indicator on a Pay Code.

1. Click the **Settings** tab then click **Pay Codes**.
2. Edit the relevant Pay Code and click **Step 2 Rules**.
3. Select **Recovery Percentage** from the list.
4. Enter a **Value** and click **OK**.

Add Rule

Rule
Recovery Percentage ▼

Enter a % which is applied to the Pay Code to calculate the value for the ALBACS Revenue File. If not entered then default is 100%.

Value *
20 ▲▼

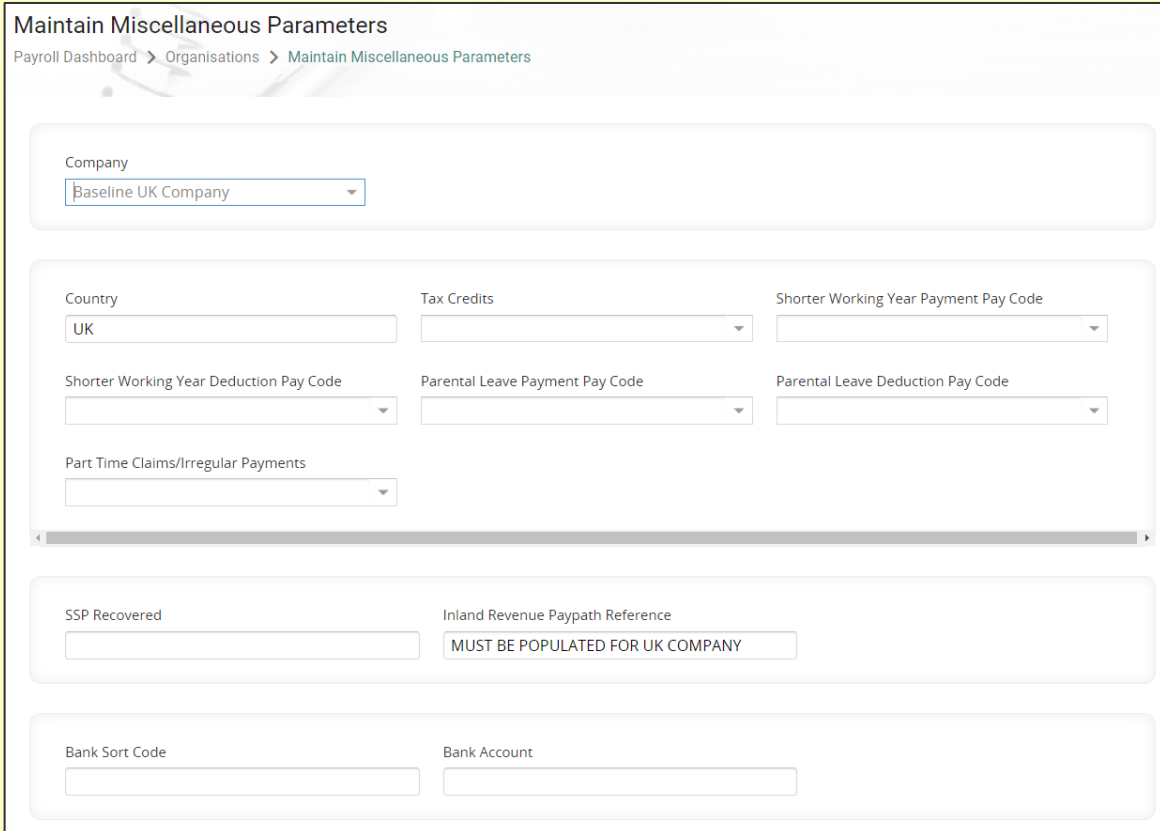

CANCEL OK

5. Click **Next** then click **Save**.

Note:

The bank details should NOT be populated for items to be returned to HMRC. i.e. leave NULL.

This is because the bank account details and the Inland Revenue accounts office reference are held on the miscellaneous parameters screen. When the EFT file is produced for the statutory payments it will reference these details.

The screenshot shows the 'Maintain Miscellaneous Parameters' form. At the top, there is a breadcrumb trail: 'Payroll Dashboard > Organisations > Maintain Miscellaneous Parameters'. The form is divided into several sections. The first section contains a 'Company' dropdown menu with 'Baseline UK Company' selected. The second section contains several dropdown menus: 'Country' (set to 'UK'), 'Tax Credits', 'Shorter Working Year Payment Pay Code', 'Shorter Working Year Deduction Pay Code', 'Parental Leave Payment Pay Code', 'Parental Leave Deduction Pay Code', and 'Part Time Claims/Irregular Payments'. The third section contains two text input fields: 'SSP Recovered' and 'Inland Revenue Paypath Reference', which has a placeholder text 'MUST BE POPULATED FOR UK COMPANY'. The fourth section contains two text input fields: 'Bank Sort Code' and 'Bank Account'.

The file will be extracted in the same way as the normal Third Party EFT extract, the only difference being that the **Inland Revenue toggle is enabled** on the Extract tab of the Third Party Payment screen.

Note:

When the Inland Revenue Toggle is enabled, the Pay Code Type will be cleared. Extracting Inland Revenue Data does not require a Pay Code Type.

The Value is to be made up to the following elements:

- Tax deducted in the period (PAYE Pay code as held on Payroll Parameters (PAY005) and outputted to pay history for the period).
- Student loans deducted in the period (Student Loan Pay code as held on the Miscellaneous Parameters (PAY005B) screen).
- Employees and Employers National Insurance deducted in the period (EE NI and ER NI Pay_code as held on Payroll Parameters (PAY005) and outputted to pay history for the period).
- LESS 92% (or the equivalent percent) of any SMP, SAP or SPP payments made in the period (made up of Pay codes configured on the Maintain SSP/SMP Parameters (PAY3400) screen).

5. Third Party EFT with SFTP Integration

5.1. Overview

Third Party EFT data can be generated through a Secure File Transfer Protocol integration. For further details on configuring an SFTP integration please see the [Bank File Naming & Secure Distribution Settings User Guide](#).

Note:

The Third Party EFT files will go to the same place as the bank files directory; there is no separate directory for third-party files.

5.2. Configuring a Third Party EFT Bank File

Third Party EFT Bank Files can be created in the Payroll Dashboard:

1. Go to **Settings**.
2. Under General click the **Bank File Settings** Tile.
3. Click **Add**.

The screenshot shows the 'Add Bank File' form in the Payroll Dashboard. The breadcrumb trail is 'Payroll Dashboard > Bank File Settings > Add Bank File'. The form is divided into three main sections: 'Output File Details', 'File Name Format', and 'File Attributes'. In 'Output File Details', there are three dropdown menus: 'Company*', 'Bank File Type*' (with 'Bank File' selected), and 'File Type*'. The 'File Name Format' section contains five dropdown menus labeled 'Field 1*', 'Field 2', 'Field 3', 'Field 4', and 'Field 5', followed by an 'Extension*' dropdown. The 'File Attributes' section has a 'Location Type*' dropdown. At the bottom right, there is a green 'SAVE' button and a small 'access PeopleXD' logo.

4. Select **Third Party Bank File** from the **Bank File Type** drop-down menu.

Note:

When choosing to create a Third-Party Bank File, the Company is not mandatory as it allows you to create a multi-company third-party file.

5. Select the **Third Party File Type** from the drop-down menu.
6. Select the **File format Fields** as required.
7. Enter the **File Format Extension**.
8. Select **Server Location** from the **Location Type drop -down menu**.

Note:

IP address must be configured in order to use Server Location. Please contact your Account Manager to consult on this feature.

9. Click **Save**.

Third Party files for the configured file type will now generate in the interface directory location.

6. Grant Access to the Screens

6.1. Menu Profile Access

The below Menu Profile enables all available menu options by default.
