1. Introduction

The purpose of this guide is to provide instruction on how to change or amend an end date that has been applied to an employee's contract.

The examples provided in this document will specifically review how to change an end date that was applied when a person was made a leaver on CoreHR. However, the steps to amend/remove the date are the same to remove an end date applied to a contract via any other standard CoreHR process.

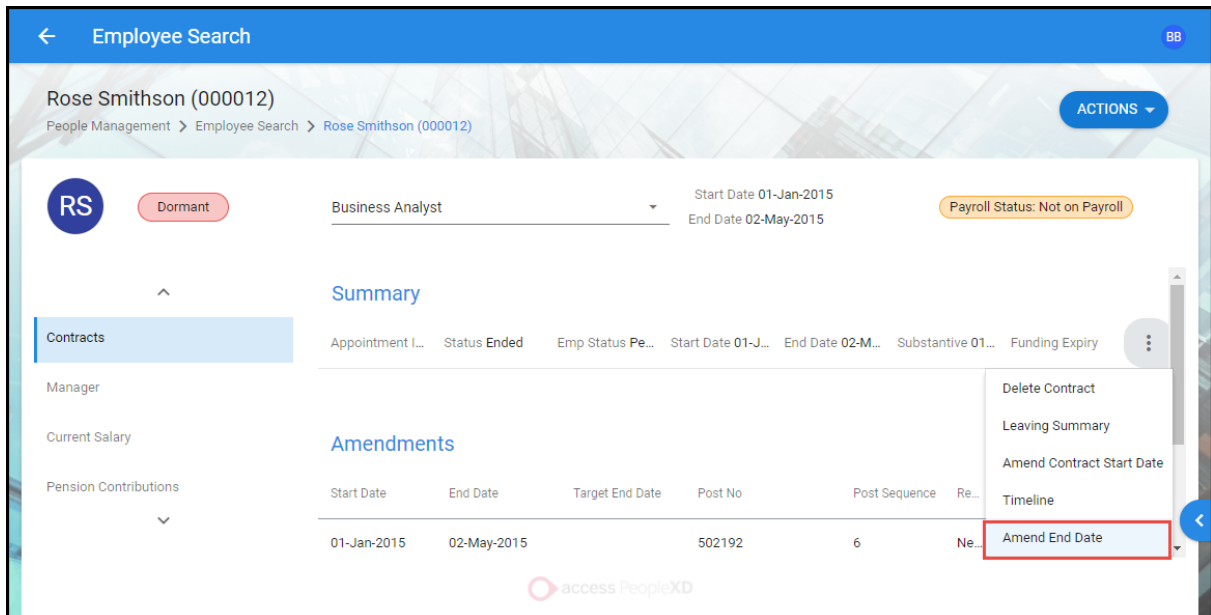

2. Changing / Amending End Dates

2.1. Change End Date for a Leaver

It is possible to amend the end date provided for a leaver in People Management. This is done by amending the end date for the employees last contract. This will amend their overall *End Date*.

To change an end date:

1. Search for the employee in the *Command Centre > Employee* screen.
2. Click the **View** button for the required employee.
3. On the Contracts tab, click on the  button in the Summary section and select *Amend End Date*.

The screenshot shows the 'Employee Search' interface for Rose Smithson (000012). The employee's status is 'Dormant' and their role is 'Business Analyst'. The 'Contracts' tab is selected, and the 'Summary' section is visible. A dropdown menu is open, showing options like 'Delete Contract', 'Leaving Summary', 'Amend Contract Start Date', 'Timeline', and 'Amend End Date'. The 'Amend End Date' option is highlighted with a red box.

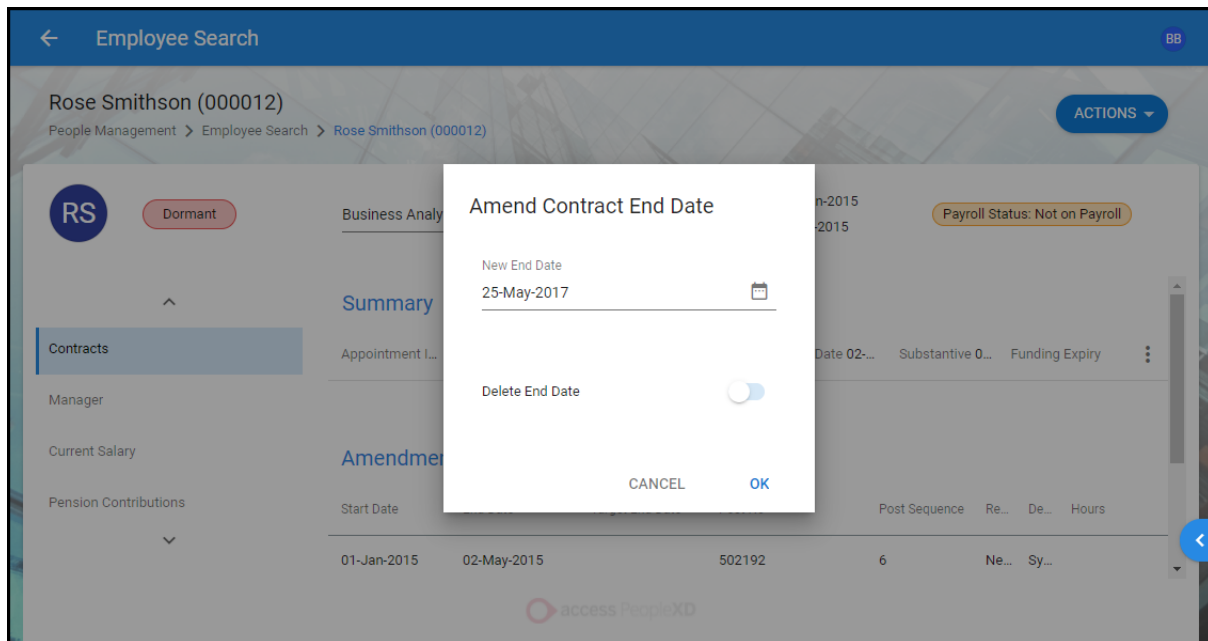

Start Date	End Date	Target End Date	Post No	Post Sequence	Re...
01-Jan-2015	02-May-2015		502192	6	Ne...

4. If the employee has multiple contracts or has had multiple contract amendments, ensure that the correct contract sequence is identified:
 - Appointment Status is *Dormant*
 - End Date is populated.

5. Select the option **Amend End Date**.

The *Amend Contract End Date* screen opens.

6. Enter the new date in the format DD-Mon-YYYY.

7. Click **OK** to save.

When a leaving date has been updated, the *Amend Contract End Date* overview screen appears. It includes more information and statuses to ensure the user is aware of what impact changing the leaving date has across various items and attributes on their environment.

Status	Colour	Description
To be reviewed		This status requires the item or the data to be reviewed or manually updated by the user.
No change required		This status does not require a manual change as the item or data is automatically updated

The screenshot shows a mobile application interface for 'Amend Contract End Date'. At the top, a blue header bar contains a back arrow, the text 'Rose Smithson (000012)', and a 'BB' icon. Below the header, the title 'Amend Contract End Date' is displayed, followed by a breadcrumb trail: 'People Management > Employee Search > Rose Smithson (000012) > Amend Contract End Date'. The main content area has a light blue background with a grid pattern. It features a 'New End Date' section with the date '25-May-2017' and a calendar icon. A message states: 'Changing the appointment End Date to 25-May-2017 will update the following items marked below'. Below this, the 'Salary' section is shown with a green dot icon and the text 'Existing Salary 01-JAN-15: No update required to this salary record'. A blue 'REVIEW' button is positioned to the right of the salary section. At the bottom, there is a green 'SAVE' button and a 'access PeopleXD' logo. A blue arrow icon is visible on the right edge of the screen.

2.1.1. Team Areas

- If a leave date is removed from an appointment, the system now automatically also removes the end date against person's last team area record, provided the current end date on the team area matches the person's current leave date.
- If a leave date is amended on an appointment, the system now automatically updates the team area's current end date to the new date, provided the current end date matches the person's current leave date and the new end date is greater than the team area's current start date.
- The corrections screen should be updated to include a team area section if the person has one.
- Where there is a mismatch of leaving dates and end dates of team areas, these are not automatically updated and are flagged for user to review.

2.1.2. JML (User Access)

User Access end date is also included in the global checks when a contract end date is updated.

Amend Future Leave Date

- The effective date of the items that are updated for the new end date and the expiry time. Access is not removed until the new leave date.

Remove Future Leave Date

- Do not remove any access.

Amend / Remove Historical Leave Date

- Access has already been removed from the employee's record.

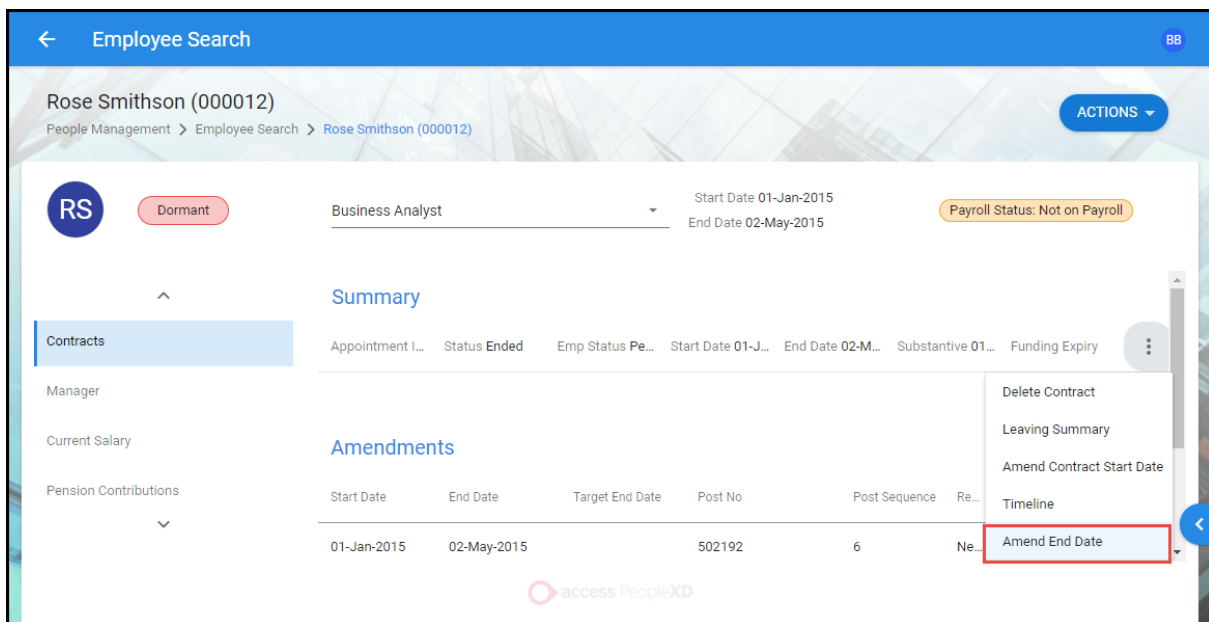

2.2. Remove End Date for a Leaver

It is possible to remove the end date for a leaver in People Management. This is done by amending the end date for the employee's last contract. This removes their overall *End Date* and returns that employee's record to 'Active' on CoreHR.

Note This is typically used to correct an employee's record that has been ended in error i.e. an *End Date* should never have been applied to the contract. This process should not be followed to rehire an employee.

To remove an end date:

1. Search for the employee in the *Command Centre > Employee* screen.
2. Click the **View** button for the required employee.
3. On the Contracts tab, click on the  button in the Summary section and select *Amend End Date*.

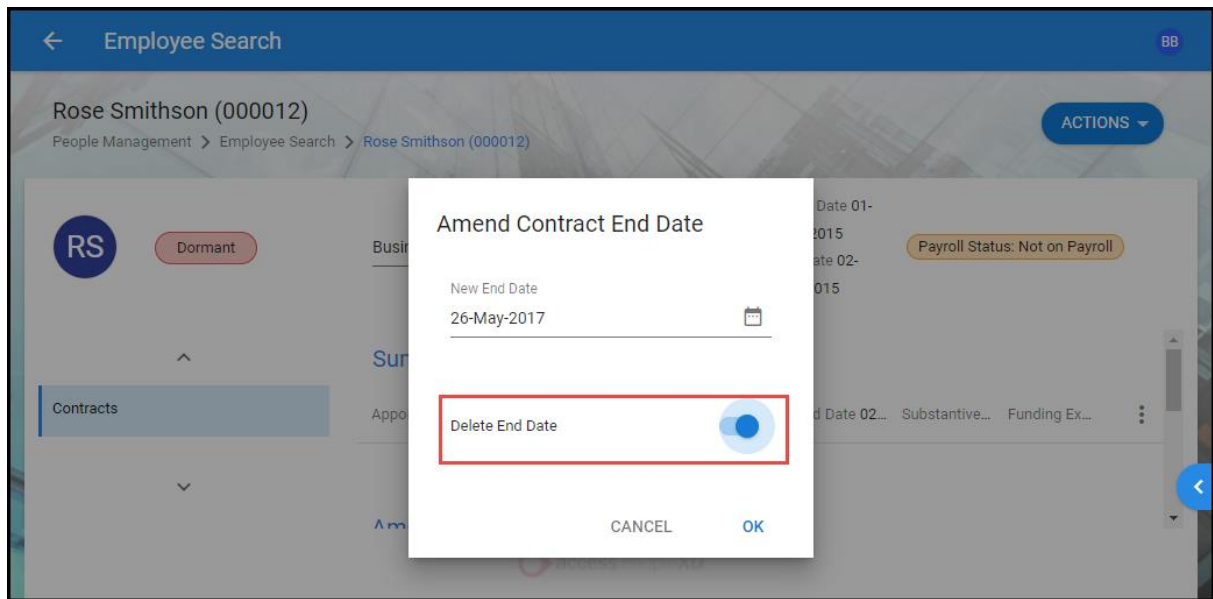

The screenshot shows the 'Employee Search' interface for Rose Smithson (000012). The employee's status is 'Dormant' and their current contract is 'Business Analyst'. The 'Contracts' tab is selected, and the 'Amend End Date' option is highlighted in the dropdown menu. The 'Amendments' table shows the current contract details: Start Date 01-Jan-2015, End Date 02-May-2015, Target End Date, Post No 502192, Post Sequence 6, and Re...

Start Date	End Date	Target End Date	Post No	Post Sequence	Re...
01-Jan-2015	02-May-2015		502192	6	Ne...

4. If the employee has multiple contracts or has had multiple contract amendments, ensure that the correct contract sequence is identified:
 - Appointment Status is *Dormant*
 - End Date is populated.

5. Select the option **Delete End Date**.

6. Click **OK** to save.
7. The end date is removed, and the employee's contract is no longer *Ended*.
 - The employee will no longer be processed as a leaver. Both their employee record and contract records are active again on People Management.

Note: This is only possible if the employee has not been processed as a leaver by Payroll.
