1. Overview

Managers can be provided with access to People Management functions via the *Manager Dashboard* on People XD. This is an optional feature on the *Manager Dashboard* – it is not enabled by default and should be custom configured per implementation, based on your organisation's requirements.

Some organisations may decide to devolve certain HR functions to their managers to complete e.g.

- Onboarding of new starters
- New contracts
- Contract amendments
- Leavers
- Employee record updates
- Etc.

The features will all be made available to the manager via the *Manager Dashboard*, on the 'My Team' widget. A manager will not require access to the People Management dashboard to complete these activities.

Note:

- A manager can only complete these activities for employees that are in their team.
- A full suite of People Management features may be shared with the manager. These are shared with managers on their user security profile and it is therefore a requirement for an organisation to decide how many, if any of these features should be rolled out to managers.

The purpose of this guide is to provide guidance on:

- Where managers can access each available People Management feature.
- The full list of actions they may be given access to.
- The system and user security configuration required to control access for managers.

 Note:

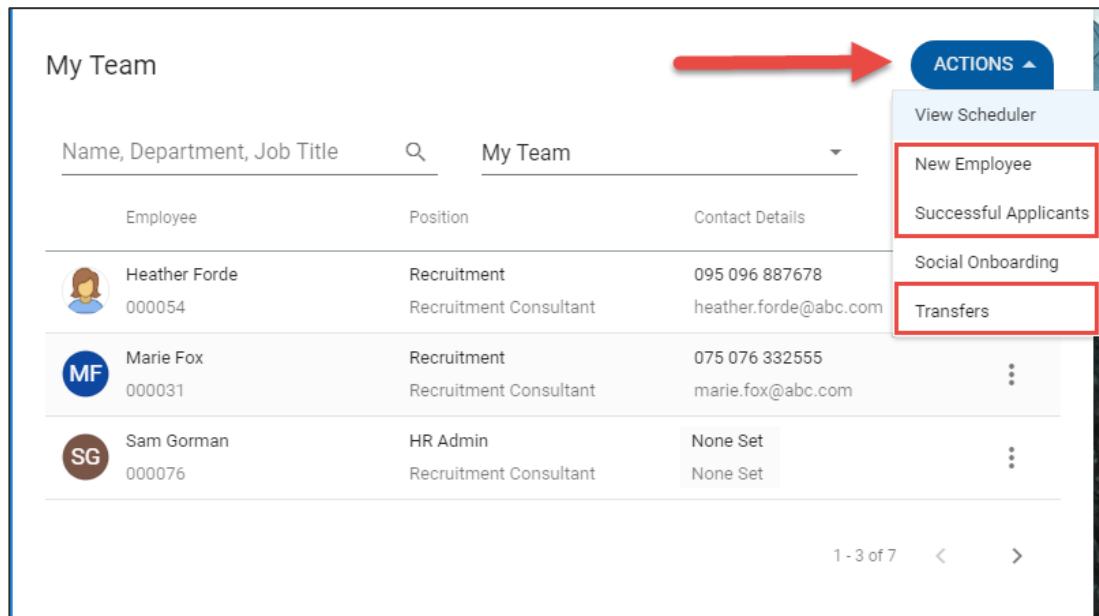

This guide is intended to make clear the People Management features that are available to a manager. This guide will not provide detailed training on how to fully complete the standard HR tasks, as these will be mostly completed as normal i.e. in the same way that a hr administrator would when accessing the same features via People Management dashboard. However, in some instances, the completion of some processes by managers may differ slightly to the standard. In those instances, this guide will provide detailed guidance on how to complete an action.

2. How to Use

2.1. How to Access 'People Management' Functions as a Manager

Access to People Management functions may be shared with a manager via the *My Team* widget on the Manager Dashboard. The options are available in 2 places on the *My Team* widget:

Actions button:

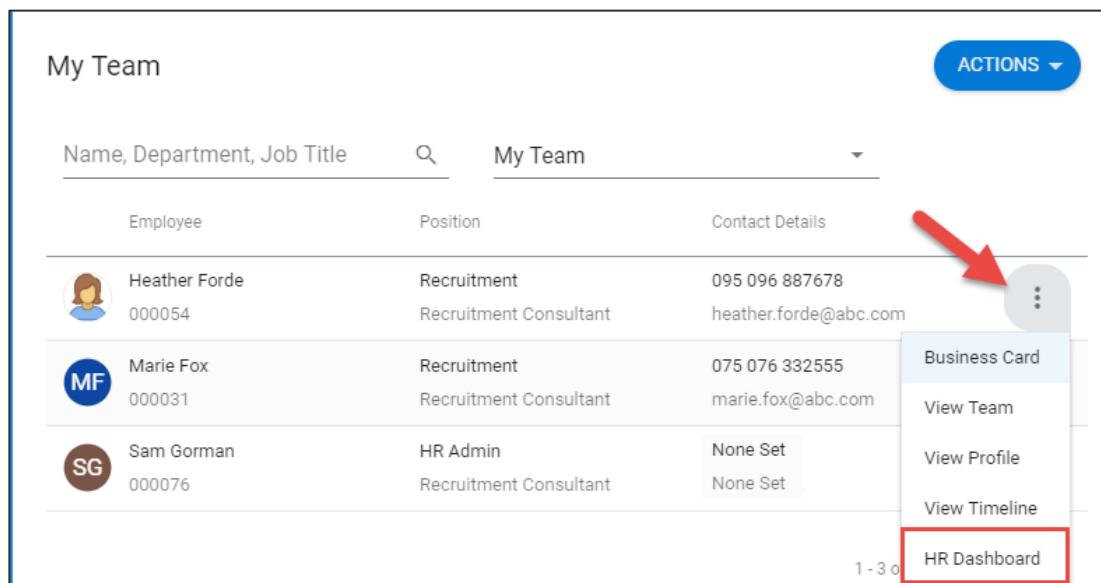

The screenshot shows the 'My Team' widget interface. A red arrow points to the 'ACTIONS' button in the top right corner. The dropdown menu is open, showing several options: 'View Scheduler', 'New Employee', 'Successful Applicants', 'Social Onboarding', and 'Transfers'. The last three options are highlighted with red boxes.

Employee	Position	Contact Details
Heather Forde 000054	Recruitment Recruitment Consultant	095 096 887678 heather.forde@abc.com
Marie Fox 000031	Recruitment Recruitment Consultant	075 076 332555 marie.fox@abc.com
Sam Gorman 000076	HR Admin Recruitment Consultant	None Set None Set

1 - 3 of 7

Employee  button:

The screenshot shows the 'My Team' widget interface. A red arrow points to the 'Employee' button (three vertical dots) next to the first employee row. The dropdown menu is open, showing several options: 'Business Card', 'View Team', 'View Profile', 'View Timeline', and 'HR Dashboard'. The last option, 'HR Dashboard', is highlighted with a red box.

Employee	Position	Contact Details
Heather Forde 000054	Recruitment Recruitment Consultant	095 096 887678 heather.forde@abc.com
Marie Fox 000031	Recruitment Recruitment Consultant	075 076 332555 marie.fox@abc.com
Sam Gorman 000076	HR Admin Recruitment Consultant	None Set None Set

1 - 3 of 7

Note: The manager will not need access to the People Management dashboard to access this functionality.

2.2. People Management Dashboard Functions Available to Managers

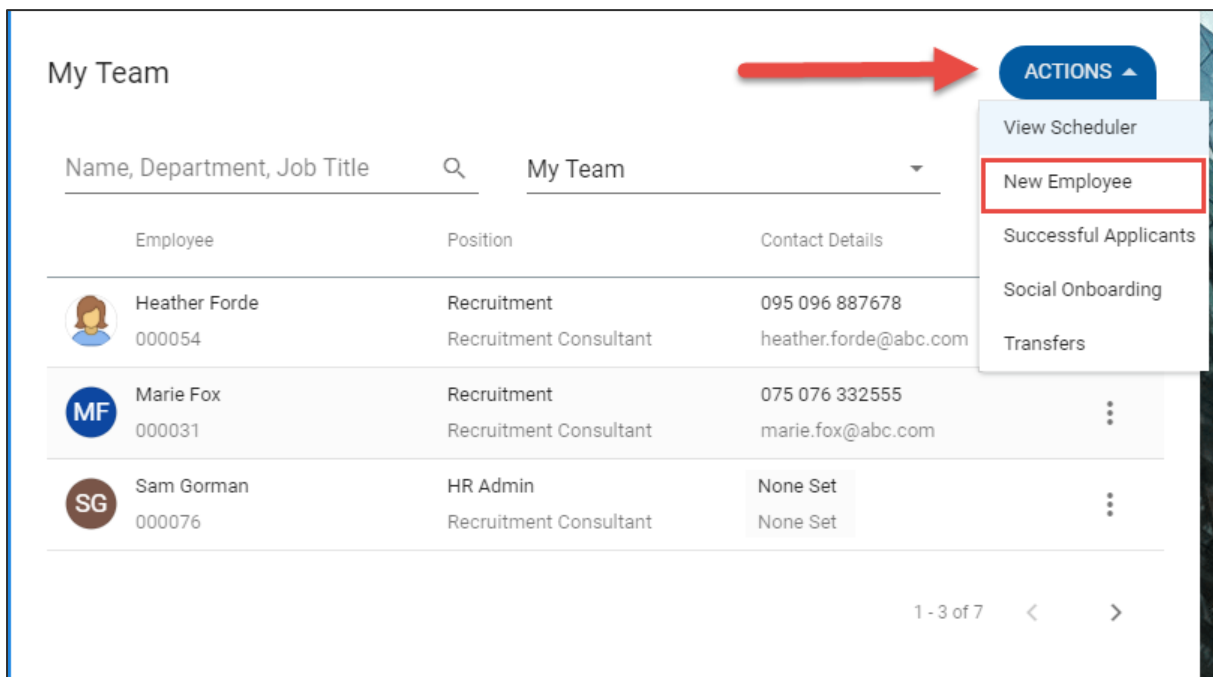

2.2.1. Add New Employee / Successful Applicants

This option provides the manager with the ability to set up a new starter on the system. The new starter may be set up on the system from scratch or as a successful applicant (if using Recruitment).

To create a new starter:

1. On the *My Team* widget click the **Actions** button at the top right of the widget.
2. Select the **New Employee** option.

This will allow the manager to set up a new employee from scratch on the system using the standard *Create New Employee* wizard.

The screenshot shows the 'My Team' widget interface. At the top right, there is a blue 'ACTIONS' button with a dropdown arrow. A red arrow points to this button. The dropdown menu is open, showing options: 'View Scheduler', 'New Employee' (highlighted with a red box), 'Successful Applicants', 'Social Onboarding', and 'Transfers'. Below the menu is a table with columns: 'Name, Department, Job Title', 'Position', and 'Contact Details'. The table lists three team members: Heather Forde, Marie Fox, and Sam Gorman. At the bottom right of the table, it says '1 - 3 of 7' with navigation arrows.

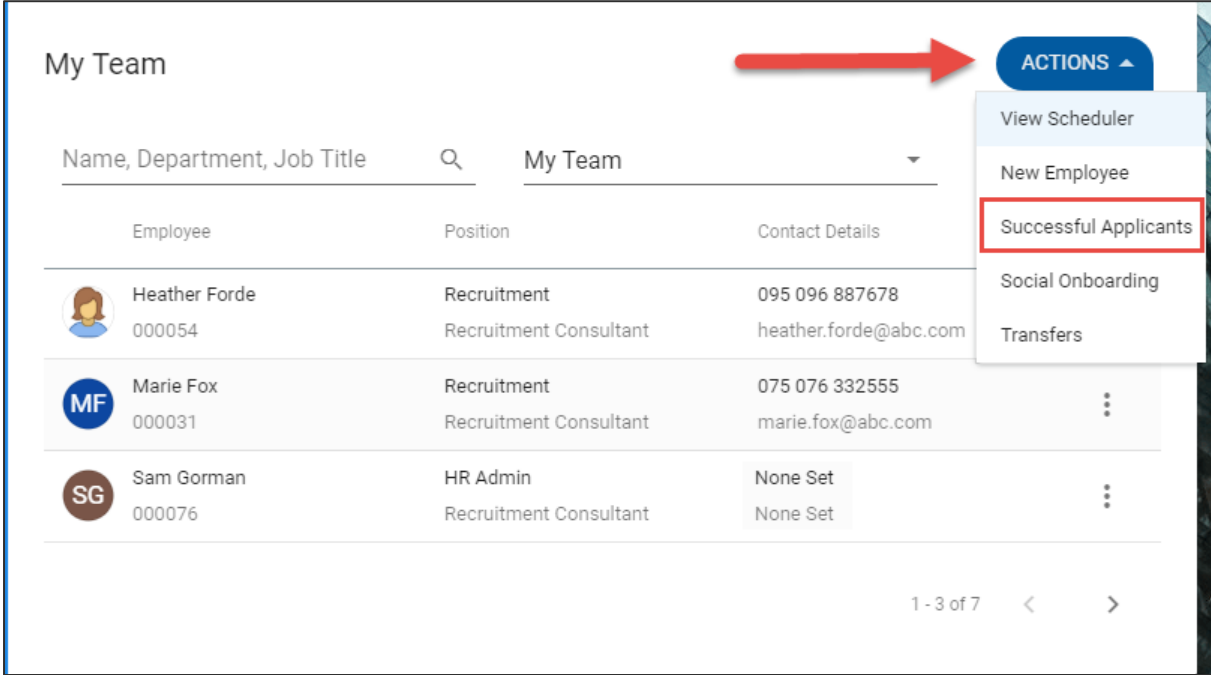

Name, Department, Job Title	Position	Contact Details
Employee		
 Heather Forde 000054	Recruitment Recruitment Consultant	095 096 887678 heather.forde@abc.com
 Marie Fox 000031	Recruitment Recruitment Consultant	075 076 332555 marie.fox@abc.com
 Sam Gorman 000076	HR Admin Recruitment Consultant	None Set None Set

3. Select a Post on the *Search for a Post* screen.
Search for and select a post to complete the new starter setup, following the standard process as used in People Management.

Note: Please see section [3.2 Post Access for Managers](#) for details on how posts will be made available to the manager to view.

To create a new starter as a successful applicant from Recruitment:

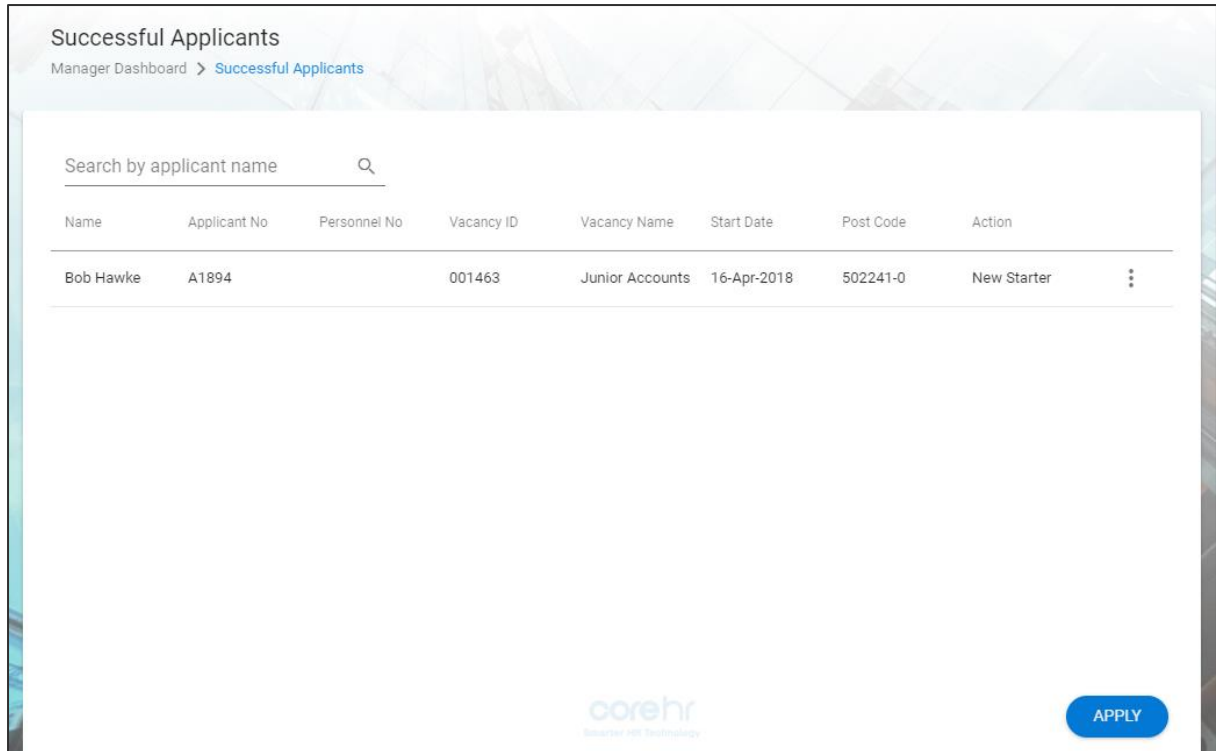

1. On the *My Team* widget click the **Actions** button at the top right of the widget.
2. Select the **Successful Applicants** option.

The screenshot shows the 'My Team' widget interface. At the top right, there is a blue 'ACTIONS' button with a red arrow pointing to it. A dropdown menu is open from this button, showing several options: 'View Scheduler', 'New Employee', 'Successful Applicants' (which is highlighted with a red box), 'Social Onboarding', and 'Transfers'. Below the menu, a table lists team members. The table has columns for 'Employee', 'Position', and 'Contact Details'. The first three rows are visible, showing details for Heather Forde, Marie Fox, and Sam Gorman. The bottom of the table shows pagination: '1 - 3 of 7' with navigation arrows.

Employee	Position	Contact Details
 Heather Forde 000054	Recruitment Recruitment Consultant	095 096 887678 heather.forde@abc.com
 Marie Fox 000031	Recruitment Recruitment Consultant	075 076 332555 marie.fox@abc.com
 Sam Gorman 000076	HR Admin Recruitment Consultant	None Set None Set

This will allow a manager to see all applicants that have been successful in a recruitment campaign on People XD and have accepted a job offer for a position in the manager's team (based on the standard 'Reports To' configuration).

The *Successful Applicants* screen shows the applicant's details. Only applicants that have accepted an offer for a contract that will report into the manager, will display on this screen.

The manager will see successful applicants who are new starters to their team including new employees, existing employees or rehires.

3. Select the applicant's record and click **Apply** to complete the new starter setup, following the standard process as used in People Management.

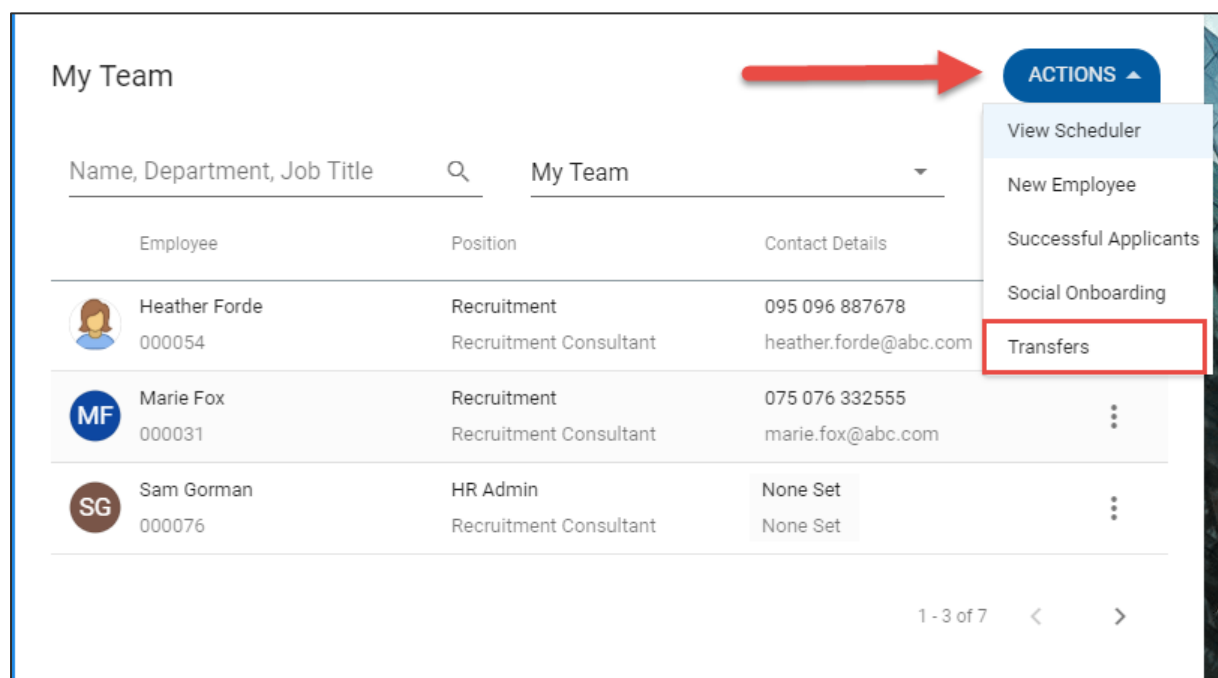

Note: Refer to the *New Hire Contracts* and *Successful Applicants* user guides for full guidance on how to complete these processes.

2.2.2. Transfers

This option allows the manager to manage employee transfer requests in and out of their team. A manager has the ability to search for other employees in the organisation and request for them to join their team, linking them to a post that reports directly to them.

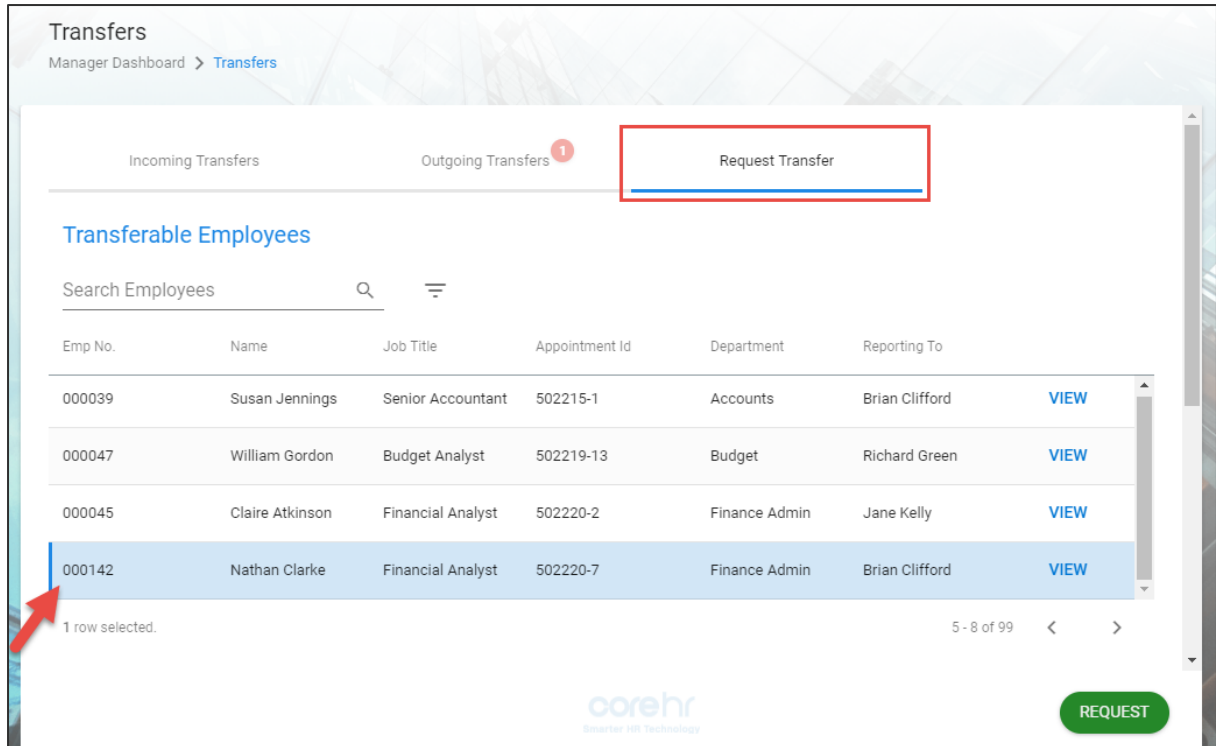

To request the transfer of an employee to the manager's team:

1. On the *My Team* widget click the **Actions** button at the top right of the widget.
2. Select the **Transfers** option.

The '*Transfers*' screen opens.

3. Select the **Request Transfer** option.
4. On the *Transferable Employees* list, search for an employee.
 - All employees that do not currently report to the manager display here.
 - Employees that currently report to the manager do not display here.
5. Search for and select the employee to transfer.

6. Scroll down the screen to the *Appointments* list and select the post that the employee will be transferred into.
 - This section displays posts to the manager based on how their post access has been defined.
 - Please see section [3.2 Post Access for Managers](#) for details on how this may be configured.
7. Select a post.

Request for transfer to recruitment c...

CANCEL OK

The request will now be available to view under the **Incoming Transfers** screen.

The screenshot shows the 'Transfers' section of the Manager Dashboard. The 'Incoming Transfers' tab is selected and highlighted with a red box. Below the tabs is a search bar and a table. The table has columns: Emp No., Name, Start Date, Status, and Requested By. One entry is visible: Emp No. 000142, Name Nathan Clarke, Start Date 01-Apr-2019, Status Requested, Requested By Thomas Cole. To the right of the table, a red arrow points down to a dropdown menu that is open, showing four options: 'View Current Contract', 'View Proposed Contract', 'View Transfer History', and 'Cancel Request'. The dropdown menu is also highlighted with a red box.

Once the transfer request has been approved, by HR or by the requested employee's current manager, the *Transfer Status* will update to "Ready to Complete".

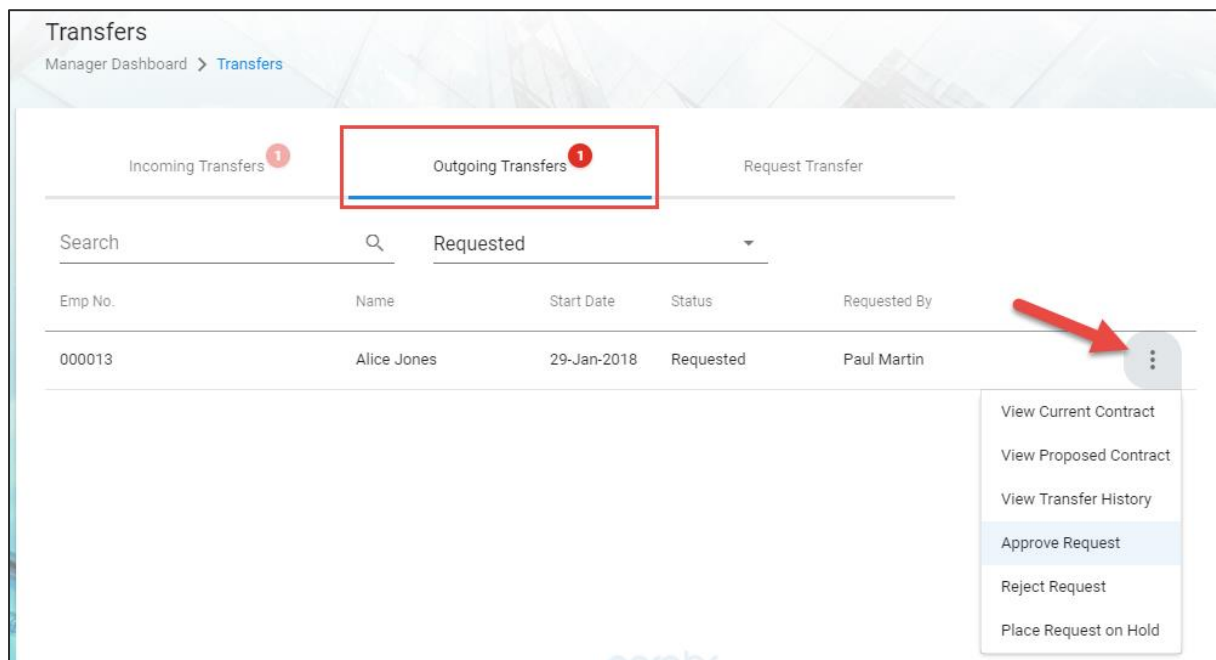

9. Select the  button and select **Complete Request**, to complete the transfer and award the employee with a new contract.

This screenshot shows the same 'Transfers' page, but the status for Nathan Clarke has updated to 'Ready to Complete', which is highlighted with a red box. The 'Incoming Transfers' tab still has a red notification badge. A red arrow points to the dropdown menu for this entry, which is now open and shows five options: 'View Current Contract', 'View Proposed Contract', 'View Transfer History', 'Cancel Request', and 'Complete Request'. The 'Complete Request' option is highlighted with a red box.

A manager may also be requested to approve / reject transfers for employees out of their team.
To approve / reject a request:

1. Select **Outgoing Transfers**.

2. Search for request.
3. Click on the  button and take action as required:
 - Approve Request
 - Reject Request
 - Place Request on Hold

A manager may also cancel requests that they have made, before these have been approved / rejected / placed on hold.

1. Select **Incoming Transfers**.
2. Search for request.
3. Click on the  button.
4. Select option **Cancel Request**, provide comments and save cancellation.

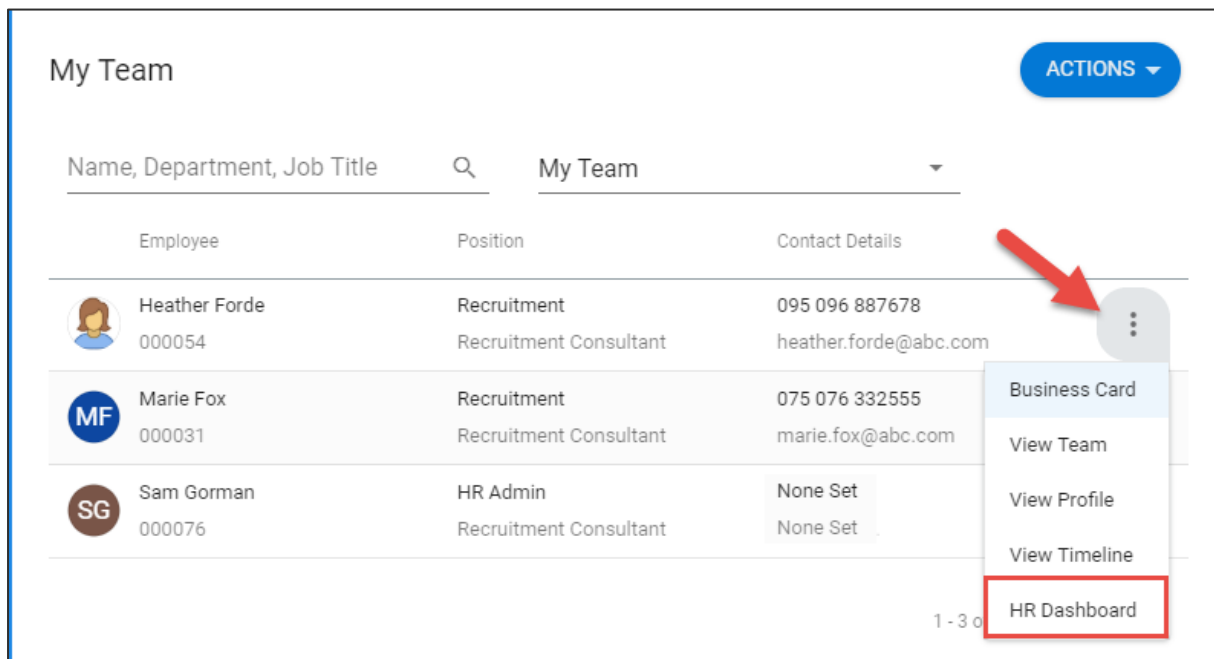

2.2.3. HR Dashboard

The *HR Dashboard* provides access to a full suite of HR features that are typically used by hr administrators to manage employee records.

- All of the options that are available on the existing People Management view of the employee record can be shared with the manager.
- The manager will only be able to access the *HR Dashboard* screen for an employee that reports directly to them i.e. is available to them in the *My Team* widget.

To access the hr employee record as a manger:

1. On the *My Team* widget select the  button for the required employee.
2. Select the **HR Dashboard** option.

The full range of HR administration options that are available for the People Management dashboard version of this screen may be made available to the manager.

- Each of these items are controlled via Menu Options.
- It is recommended that the Menu Profile that is used to grant access to managers (e.g. COREPORTAL_MANAGER), should be updated to grant access to only the options that it is desired to make available to managers.
- All menu options are disabled for the standard COREPORTAL_MANAGER Menu Profile by default and should be reviewed often.

Please see below a list of the features on the *HR Dashboard* / employee record that the manager may be granted access to:

- **Contract List**
 - Only contracts that report into the manager will appear in this drop-down list.
 - This is available as standard on screen i.e. it is not menu option controlled.

Option	Description
Process As Leaver	Manager can make the employee a leaver.
Leaver Summary	Manager can view leaver details while the employee's status is "Leaving".
Personnel Profile	View and update some of the employee's personal details, including: <i>Next of Kin; Contacts; Dependants; Diversity Details; Payroll Legislative Options; Time Management Details; Qualifications; CPD; Professional Body Membership; Languages; Training History; Teaching Qualifications.</i> See the Personnel Profile Overview user guide for full details on the functionality available.
Add Additional Contract	Manager can award an additional contract to an employee. They will only be able to assign contracts that are in Posts that they have been granted access to see (see 3.2 Post Access for Managers for further details).
Grant Portal Access	Manager can kick off the portal account set up for the employee. Only applicable for Self-Registration account management.
Change Pay Group	Manager can change the Pay Group the employee has been assigned to. This task is only possible to complete here if the employee hasn't been taken on to CorePay.
Generate Email & Generate Document	- Managers can generate emails and documents for employees and their contracts. - This is available as per standard Document and Email Generation functionality i.e. all document / email templates linked to the <i>Employee Dashboard</i> will be available for selection here. - These options are menu option controlled.

Other employee record items that are available as standard on the HR Dashboard are listed below. Access to these should be controlled via menu options on the managers' menu profile.

Note: The menu options that control these items are the exact same options that are used to grant access to these features when accessed via People Management. Please refer to existing People Management configuration guides for reference as to the applicable menu options.

Item	Description
Key Information	View and update some further employee personal details, including: <i>Name; Retirement Date; PPS / NI / Social Security Number; Continuous Service; Work Permit Details; Assembly Point; Internal Extension Number.</i> See the Key Information user guide for full details on the functionality available.
Contracts	• Access to view and manage the employee's contract(s), including: <i>Commence; Update; Amend Contract Start Date; End Contract; Amend / Remove End Date.</i> • Access to view historical contract records & length of service data for the employee. • Only contracts that report into the manager are available to view.
Manager	This option displays the employee's reports to manager for the selected contract. Clicking on this option will display the manager and the manager +1. Depending on the reports to configuration for the organisation, it may be possible to update the line manager on this screen. Please refer to the Configuring the Reports to Manager user guide for further details.
Current Salary	• Access to view current salary and allowances for the selected Contract • Access to view <i>Increment History</i> and <i>Salary Timeline</i> • Access to create a Salary Amendment • Access to add / edit / delete an Allowance Please refer to the Managing Salaries user guide for full guidance on this feature

Item	Description
Pension Contributions	- Access to view / edit Pension Scheme assignments for an employee, for the selected contract - Access to add new Pension Scheme assignments
Deductions	Access to view current deductions. Deductions can only be added / updated in Payroll.
Cost Allocations	- Access to view / edit Cost Allocations assignments for an employee, for the selected contract - Access to add new Cost Allocations assignments
User Defined Data	This option provides access to manage the UDFs that are assigned to the employee and their contract records (for contracts that the manager has access to). Please refer to the User Defined Data user guides for full guidance on this feature.
Files	This option provides access to view, manage and upload documents for the employee and their contracts, including documents that have been: - Generated by the 'Document and Email Generation' functionality - Uploaded by employees - Uploaded by managers Please refer to the Employee Files user guide for full guidance on this feature.
Probation Details	This option provides access to manage the probation expiry details, for the contract selected. Please refer to the Probation Dates user guide for full guidance on this feature.
Balances	This option provides access to view & update the employee's balance assignments and make a balance adjustment. Please refer to the Leave Request and Absences user guide under Workforce Management for further guidance.
Work Schedule	This option provides access to view or update the employee's shift type assignments, for Workforce Management purposes.

Item	Description
Talent Pool	This option provides access to view, add or delete employee Talent Pool details. Please refer to the Talent Pool user guide for full guidance on this feature.
Application Details	This option is applicable only if the employee record was created from an applicant record in Recruitment i.e. the new hire process was completed using the <i>Successful Applicant</i> feature. If this is the case, clicking on this option will display the <i>Applicant Details</i> screen from Recruitment. Note: The manager's access to the elements on this window can be restricted using Recruitment menu options.
Demobilisation Date	This option will open the <i>Planned Demobilisation Date</i> screen. This is used to view or amend the <i>Planned Demobilisation Date</i> for an employee.
HR Task List	The <i>Task List</i> option will only display if an incomplete task list exists for the selected contract.

2.2.4. New Contract

The manager can be given the ability to give an employee a new Contract on CoreHR i.e. *Replace Contract* or *Add Additional Contract*. They can only give a new contract directly to an employee on their team.

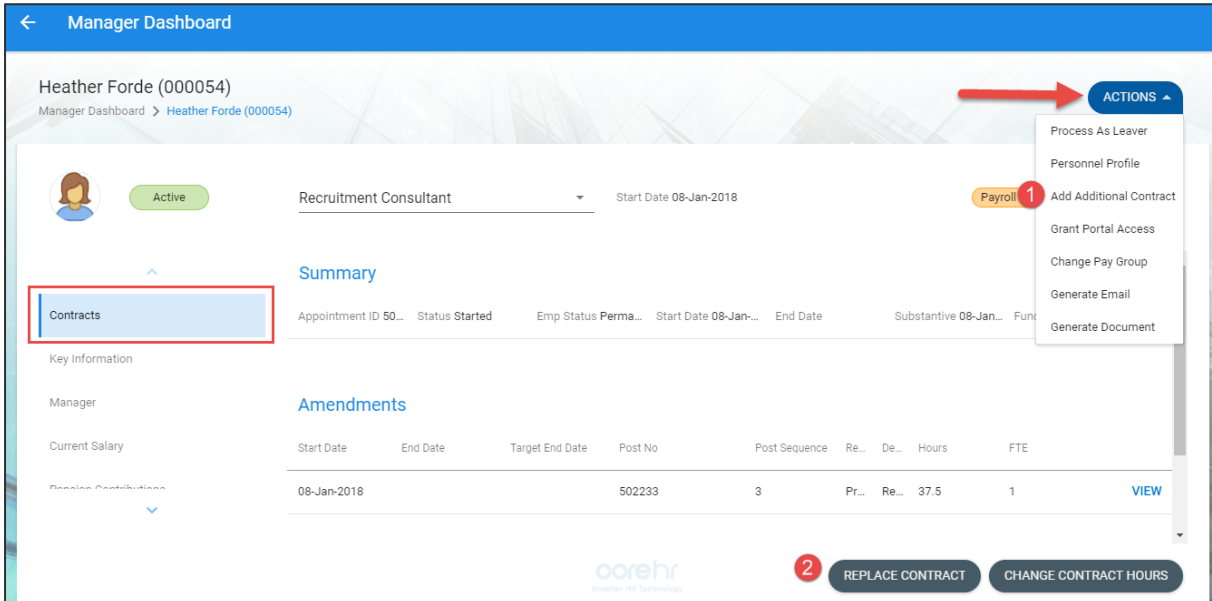

Please Note: Access to these features are Menu Option controlled.

To give an employee a new contract:

1. On the 'My Team' widget select the  button for the required employee.
2. Select the **HR Dashboard** option.
3. Select the *Contracts* option at the left pf the screen.

The 2 options are available on this screen:

- a. **Replace Contract** is at the end of the screen
- b. Click **Actions** for **Add Additional Contract**.

The screenshot shows the 'Manager Dashboard' for Heather Forde (000054). The 'Contracts' tab is selected on the left sidebar. The main content area displays a 'Summary' section with a table of appointments. The 'Amendments' section shows a table with columns for Start Date, End Date, Target End Date, Post No, Post Sequence, Re..., De..., Hours, and FTE. The 'Actions' menu is open, showing options like 'Process As Leaver', 'Personnel Profile', 'Add Additional Contract', 'Grant Portal Access', 'Change Pay Group', 'Generate Email', and 'Generate Document'. A red arrow points to the 'ACTIONS' button, and a red circle with the number '2' highlights the 'REPLACE CONTRACT' button at the bottom right.

Start Date	End Date	Target End Date	Post No	Post Sequence	Re...	De...	Hours	FTE
08-Jan-2018			502233	3	Pr...	Re...	37.5	1

Replace Contract

The standard People Management 'Replace Appointment' wizard will guide the manager through the process for replacing an existing contract with a new contract.

To replace a contract:

1. Select the contract to be replaced by clicking on and highlighting the record. Only contracts that report into the manager will appear on this screen.

Choose Contract

Manager Dashboard > Heather Forde (000054) > Choose Contract

REPLACE CONTRACT **CHANGE CONTRACT HOURS**

This option allows the manager to create a contract amendment with only the option to update the following contract elements, which relate to an employee's contract hours:

- Effective Date
- Target End Date
- Employee Status
- Employee Sub Status
- Contracted Hours
- Standard Hours
- Contracted Weeks (if configured)
- Standard Weeks (if configured)
- FTE
- Reason

The **Change Contract Hours** option will only display on the HR Dashboard if a "Started" contract has been selected.

To change an employee's contract hours:

1. On the HR Dashboard, select *Contracts* and click **Change Contract Hours**
2. The *Change Working Hours* screen opens.
3. Update all fields as required
 - Mandatory fields are flagged with a *.
 - Non-mandatory fields are also available but may be switched off to the user via [HR Admin Field Options](#).

The screenshot shows the 'Change Working Hours' form within the XD People Management system. The breadcrumb trail at the top reads: 'Manager Dashboard > Heather Forde (000054) > Change Working Hours'. The form contains several input fields and dropdown menus:

- Effective Date***: A date picker icon.
- Contracted Hours***: A numeric input field with a value of 37.5 and a small up/down arrow.
- FTE***: A numeric input field with a value of 1.
- Target End Date**: A date picker icon.
- Standard Hours**: A dropdown menu showing '37.50 Hours'.
- Reason***: A dropdown menu.
- Employee Status***: A dropdown menu showing 'P - Permanent'.
- Sub Status**: A dropdown menu.

At the bottom right of the form is a green 'SAVE' button. The 'corehr' logo is visible at the bottom center.

4. Click **Save** to create the contract amendment.
5. If a salary affecting *Reason Code* has been used, the manager will be prompted to record the corresponding salary amendment
The new salary details on the right-hand side of the screen will be pre-populated with the new Effective Date and Multiplier.
6. Click **Apply Changes** to save the salary amendment & approval.
7. The amendment will now be available to the manager to review in the **Contracts** screen.

[REPLACE CONTRACT](#)

[CHANGE CONTRACT HOURS](#)

This feature simplifies the common HR process for changing an employee's contracted hours. It is also a particularly useful way to share this ability with a line manager rather than giving them the full amendment screen, through which they could make other additional changes. In that scenario, it may be decided that managers should not be given access to 'Amend Contract' option.

2.3. 'New Starters' on My Team Widget

The *New Starters* option on the *My Team* widget displays any new employees that will be joining the manager's team i.e. a new starter, a rehire or an existing employee with a new contract in the manager's team.

Employees that appear here will be team members that:

- Have not yet started in the team i.e. their contract start date is greater than today
- The contract is "Pending" or "Confirmed Future".

The purpose of this option is to give the manager visibility of new team members so that they can perform any required hr actions.

2.4. Team and Approval Rollup to Manager +1

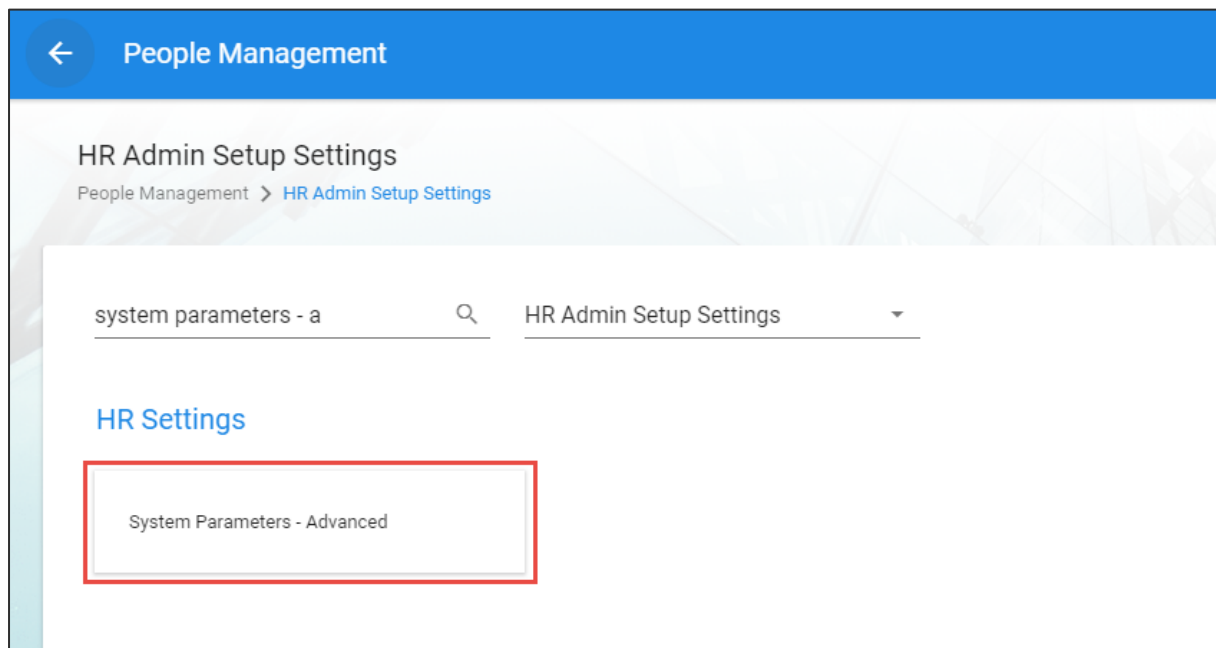

The **Team and Approval Rollup to Manager +1** feature is a separate configuration option (covered in a separate user guide), which allows for specific org roles to be rolled up to a manager +1. The rollup may result in the manager's HR access being awarded to the manager +1, provided it is the same org role as defined as the reporting to org role within personnel system parameters and the ["Create Post Access for Line Manager using MSS"](#) has also been enabled.

3. How to Configure

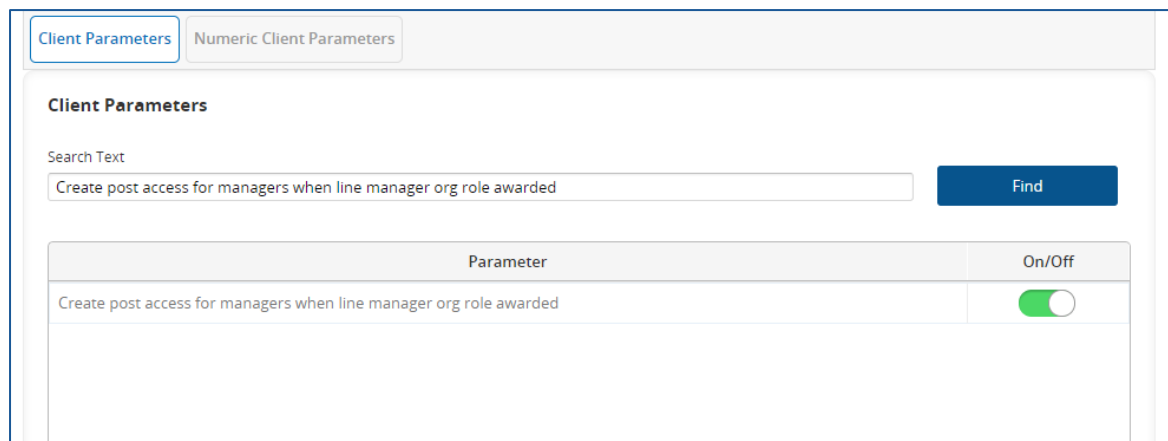

3.1. Manager Access to HR Employee Dashboard & Contracts

For a manager to access the *HR Dashboard* and the employee's contracts, the following parameter must be enabled.

- Go to *Data Centre > HR Admin Setup Settings*.
- Search for "System Parameters - Advanced" and select the corresponding option on screen:

- Click the **Client Parameters** button in the middle of the page.
- Search for the following parameter:
"Create post access for managers when line manager org role awarded"
- Ensure that this parameter is enabled.

The screenshot shows a web interface for configuring client parameters. At the top, there are two tabs: 'Client Parameters' (selected) and 'Numeric Client Parameters'. Below the tabs, the title 'Client Parameters' is displayed. A search bar labeled 'Search Text' contains the text 'Create post access for managers when line manager org role awarded'. To the right of the search bar is a blue 'Find' button. Below the search bar is a table with two columns: 'Parameter' and 'On/Off'. The table contains one row with the parameter 'Create post access for managers when line manager org role awarded' and a green toggle switch in the 'On/Off' column.

Parameter	On/Off
Create post access for managers when line manager org role awarded	☒

- Click the **Save** button to save changes.

3.2. Post Access for Managers

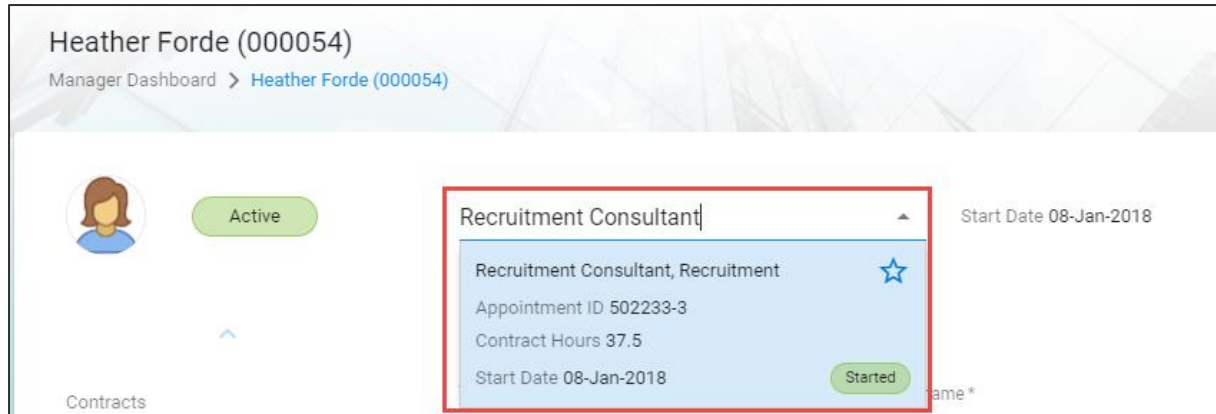

As illustrated earlier in this guide, the manager can be given access to the following People Management features, each of which requires the creation of a contract through selection of a post:

- New Starter
- Replace Contract
- Additional Contract
- Transfer Requests

Within standard People Management, post access is dictated by standard HR System Users i.e. a hr administrator is granted access to employees within a specified organisational unit e.g. entire company, specific division etc.

When these functions are accessed via the *Manager Dashboard > My Team* widget, post access is not the same as People Management access i.e. the HR hierarchy access is not referenced. By default, only posts that report to the manager will be available to the manager to select.

Further to this, the post access is also required for the manager to see the employee's contracts on the *HR Dashboard* screen i.e.

Depending on how CoreHR is implemented and the kind of posts that are currently in use, the default access for a manager to posts may not be suitable.

Accordingly, there are 2 options available to configure access to posts for a manager.

1. Default Manager Post Access
2. Override Manager Post Access

3.2.1. Default Manager Post Access

This is the default access for managers. This is derived by the existing HR reporting to role/level parameters defined within People Management system parameters.

Example A

- Reporting to Org Role: Line Manager
- Reporting to Org Level: Workgroup
- John has the Org Role of 'Line Manager' for Workgroup "ABC"
- On the *My Team* widget on *Manager Dashboard*, John will see employees who have active contracts in Workgroup "ABC"
- When using People Management features on *Manager Dashboard*, if John searches for a post he will only be able to choose from:
 - a. 'Auto' Posts that have workgroup "ABC" specified against them
 - b. Planned positions that have workgroup "ABC" set against them

 **Note:** The above example is for illustrative purposes. The default manager access is derived based on whatever Reporting To Org Role & Reporting To Org Level is configured already on CoreHR for manager access.

Once the parameter referred to in [3.1 Manager Access to Employee Dashboard & Contracts](#) has been enabled, this access is available as standard. No further configuration is required to provide a manager with access to posts i.e. an employee is given the Reporting To Org Role and Org Unit, they will be automatically granted access to Posts using the prescribed access.

3.2.2. Override Manager Post Access

Depending on how People XD is implemented, it can be quite common for posts to be defined at a higher level than the team attribute i.e. these may be defined at Company or Division level, rather than down to the individual Work Group.

As a result, if that team attribute is not defined on the post, then the manager would not by default be able to search for the post i.e. in Example A above, the line manager had

access to Workgroup “ABC”. However, if there are no posts defined with a Workgroup of “ABC”, then the manager would not be able to see any posts when creating a new starter, transfer request, new contract or a replacement contract.

As such, an override setting has been provided. A manager can be aligned to another Org Role e.g. “Manager Post Access”. That role can be aligned to any organisational level as required for access e.g. this could be Company, Department etc. Now when a manager views posts via People Management features on Manager Dashboard, they will see all of the available posts in that organisational unit e.g. all post in the Company, Department etc.

Example B

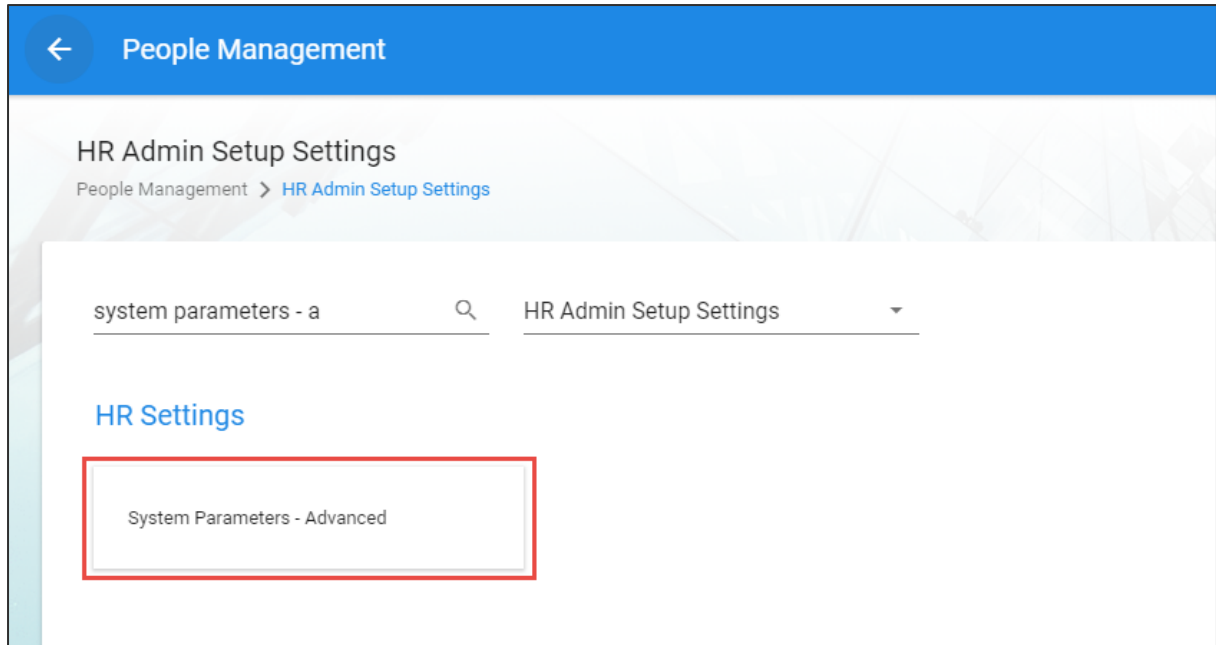

- *Reporting to Org Role:* Line Manager.
- *Reporting to Org Level:* Workgroup.
- John is a Line Manager for Workgroup “ABC”. John will see employees in the *My Team* widget that have active contracts in that Workgroup ABC.
- John is *also* given access to another Org Role e.g. “Manager Post Access” for Org Level Department = “IT”.
- Now when John searches for a post, he will only be able to choose from:
 - c. ‘Auto’ Posts that have the Department “IT” specified against them.
 - d. Planned positions that have the Department “IT” set against them.

So, two different org roles may be used to manage access to (1) employees on *My Team* and (2) posts.

To configure this type of access for managers:

Step 1

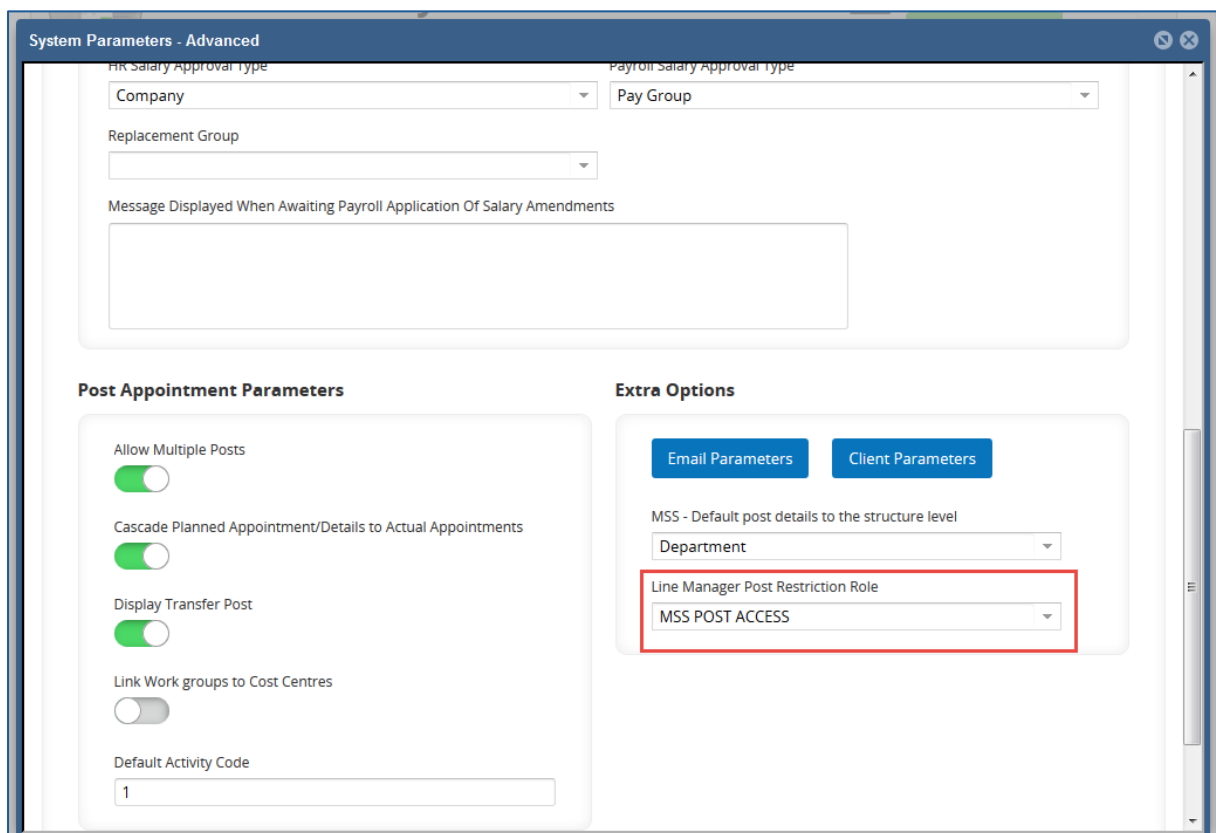

1. On the *People Management* go to *Data Centre > HR Admin Setup Settings*.
2. Search for “System Parameters - Advanced” and select the corresponding option on screen:

3. Scroll down the page to the parameter **Line Manager Post Restriction Role:**

a. Select an Org Role from the drop-down list

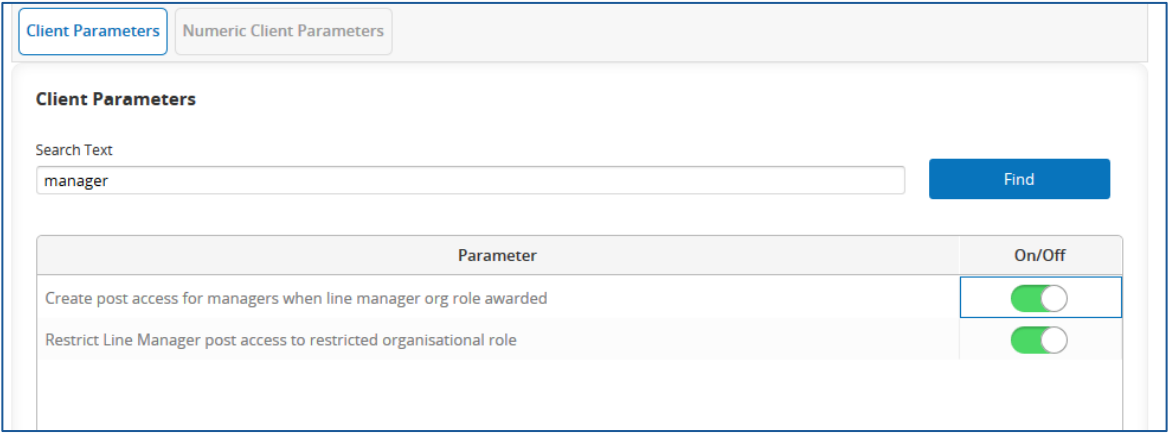

It is recommended to create a new role for this purpose e.g. "MSS Post Access"

- b. Click the **Save** button to save this setting.
- c. Ensure that all managers who require access are assigned to this new Org Role, for the appropriate Org Unit.
 - Managers may be given access to multiple Org Units e.g. the Org Role may be assigned for Department A, Department B and Department C
 - It is possible for different managers to be assigned access to different Org Units e.g. Manager A may have access to all posts in Company; Manager B has access only to posts in Department A.

Step 2

1. On the 'Advanced System Parameters' screen, select the **Client Parameters** button
2. Ensure **both** of the following parameters are enabled:
 - *"Restrict Line Manager post access to restricted organisational role"*
 - *"Create post access for managers when line manager org role awarded"*

Parameter	On/Off
Create post access for managers when line manager org role awarded	☒
Restrict Line Manager post access to restricted organisational role	☒

3. Click the save button to save changes.

3.3. 'Default Post Details' Parameter

3.3.1. How is this Parameter Used?

When a new contract is to be assigned to an employee, it is possible to automatically populate the levels in the 'Org Structure' definition down to a specified level, by copying the manager's current Org Structure definition.

This is parameter driven. If enabled, when a manager is:

- **Appointing** an employee to a new contract (i.e. new hire, rehire, replacement, additional contract, transfer) the org structure on the new contract will be copied from the user's own org structure (for their substantive contract).
- **Amending** an existing contract for an employee, the Org Structure levels will be locked down and restricted from update.

This is particularly useful for organisations that have posts defined at a higher level in the Org Structure e.g. to the first 2 levels and is aimed at addressing some of the problems faced in devolving out tasks to managers including:

- Setting up employees in their team i.e. having to select multiple structure levels when it is already known what team/area they are joining.
- No restriction on line managers being able to amend their team members' appointment structures.

Considerations:

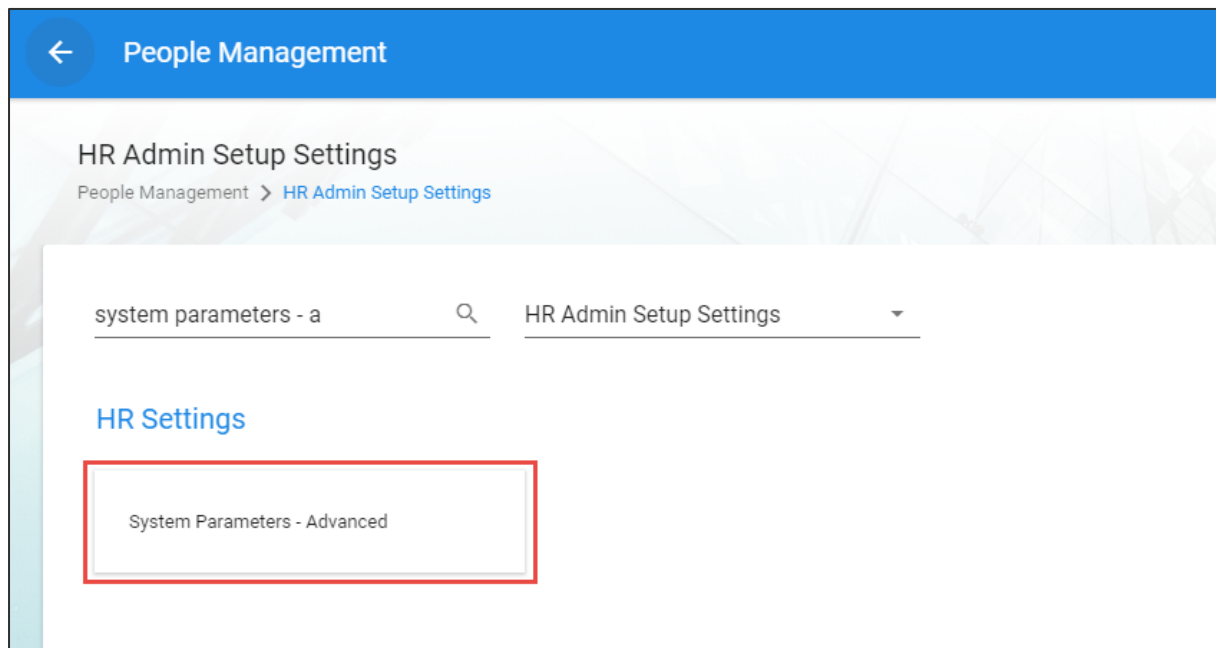

- This restriction is only applied if the following conditions are met:
 1. The new contract is set up by a manager using the hr functions invoked from the *Manager Dashboard > My Team* widget.
 2. The *employee* is in the same org structure as the manager.
 3. The *post* selected is in the same org structure as the manager.
- The structure will be copied regardless of whether the new post selected an auto-authorized, auto-commenced or planned post, where the org structure detail is already specified on it.
- The levels copied are dependent on the how the levels defined in the Org Structure and how they have been ordered.

- Setting the parameter will also restrict the user amending the employee contract organisational structure above this level regardless of post hierarchy setup.

3.3.2. Update the Parameter

To update this parameter:

1. On the *People Management* go to *Data Centre > HR Admin Setup Settings*.
2. Search for "System Parameters - Advanced" and select the corresponding option on screen:

3. Scroll to the middle of the page and locate the following parameter:

"MSS - Default post details to the structure level"

4. Select the required level from the drop-down list.
5. Click the **Save** button to save changes.

For example, if "Department" is selected, all levels down to and including Department will be copied from the user's own Org Structure.

Note: Set this to blank if the parameter should not be used.

3.3.3. Example: New Starter using 'Department'

Parameter is set to 'Department'.

The manager's 'Org Structure' for their current substantive contract is highlighted below i.e.

Organisation Structure Level	Reference Item
Company	ABC Solution
Division	Shared Services
Management Unit	IT
Department	IT2 - Networks

3.5. Configuration Considerations

Neither the default nor the override post access options are enabled by default. Each option should be configured per client per their requirements. If the client is not devolving HR to managers, these options should not be configured.

Security Type of "OPERS" will not display on the System Users screen for the manager.

Once a manager has access to view the employee HR Admin details, they do not need additional Payroll System Users access to see Salary / Allowance / Deduction. This is also available by default once they can see the employee via Manager Dashboard > HR Admin.

There is an optional script that can be run that will create the "OPERS" post access security rows on PERS_USER for active line managers, as defined by the personnel reporting to role/level parameters.

Before running this consideration needs to be given to

- whether clients *want* post selection (direct new starters, replacement, transfers) rolled out to line manager.

- what the current post management setup is i.e. if 'light post management', do they use auto(bucket) posts and/or whether they would want to use the override parameter instead.
- If the client has managers raising staff requests and are using the staff request creator role, then this may also dictate whether they will use the override org role parameter also.

Please be aware that if a user has been granted an org role that is also referenced in the Menu Profile Matrix, then they will be awarded menu profiles as part of that.

This should be taken into consideration when adding the HR Admin menu options to new or existing Menu Profiles.
