1. Overview

1.1. Purpose of the Guide

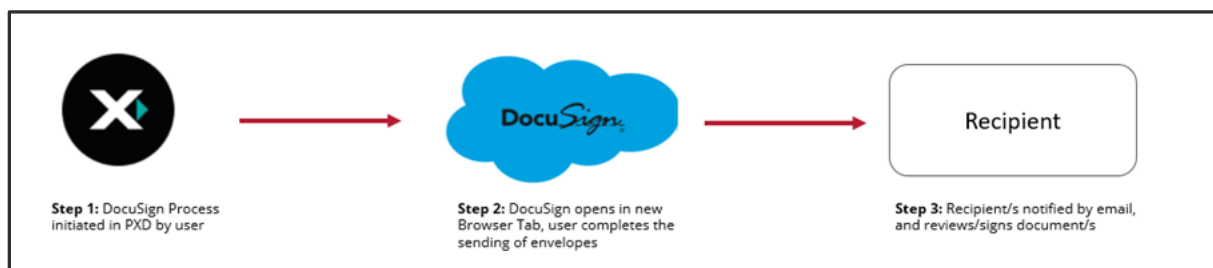

This guide gives an overview of the integration between PeopleXD People Management & DocuSign eSignatures.

The integration allows a HR user within PeopleXD People Management to send a document to an employee that they can review and sign via DocuSign e.g. Contract of Employment.

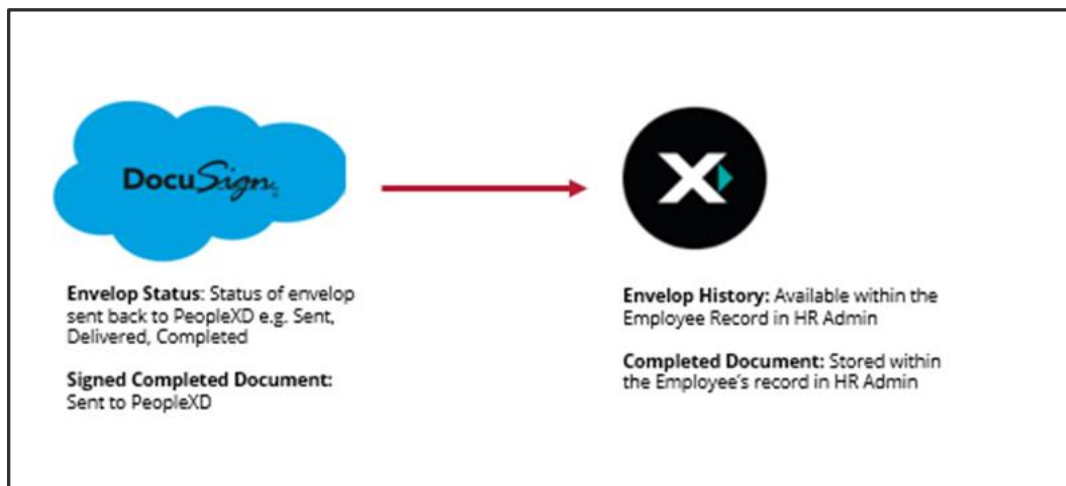

1.2. Integration Process Flow

1.2.1. Sending a Document

The user initiating the process in PeopleXD does not need to have their own unique account in DocuSign. However, all DocuSign envelopes initiated within PeopleXD will be sent from the one customer account within DocuSign e.g. hr@acme.com, johndoe@acme.com. Users initiating the process from PeopleXD will be logged into this DocuSign account in a restricted preview and send mode.

1.2.2. Signing a Document

Once the employee has received the email for them to sign, they will then be able to complete the signing process within DocuSign. The status of the DocuSign envelope will be viewable within PeopleXD, e.g. sent, completed. The completed document will then be saved in PeopleXD against the employee in question.

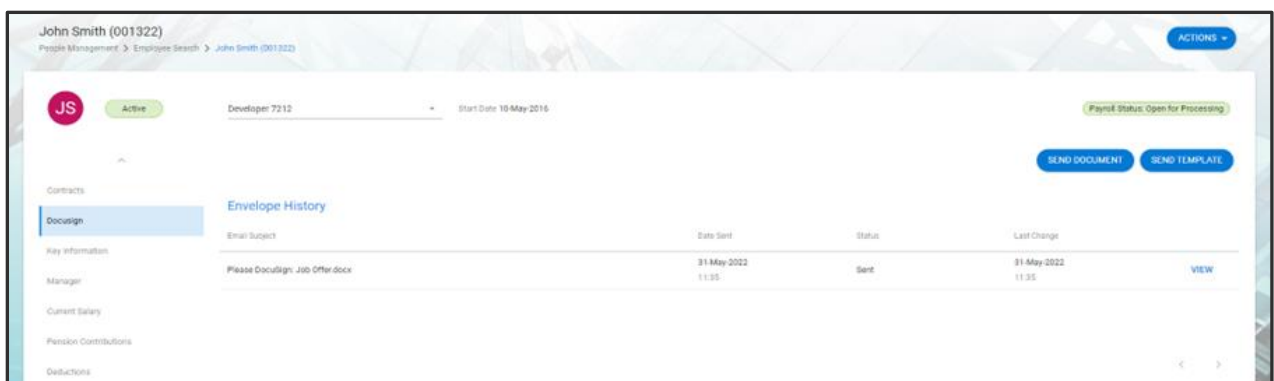

2. How to Send a Document

2.1. HR Admin Employee Record

A user will need access to menu options for the DocuSign process to be visible to them within PeopleXD HR Admin. Please see [the menu options access section](#) for further details. The user can then initiate the process within the employee's record in HR Admin.

Once a user has been given the relevant access, they will see the DocuSign option within the left-hand navigation and the buttons:

- Send Document
- Send Template

2.2. Sending a Document & Sending a Template

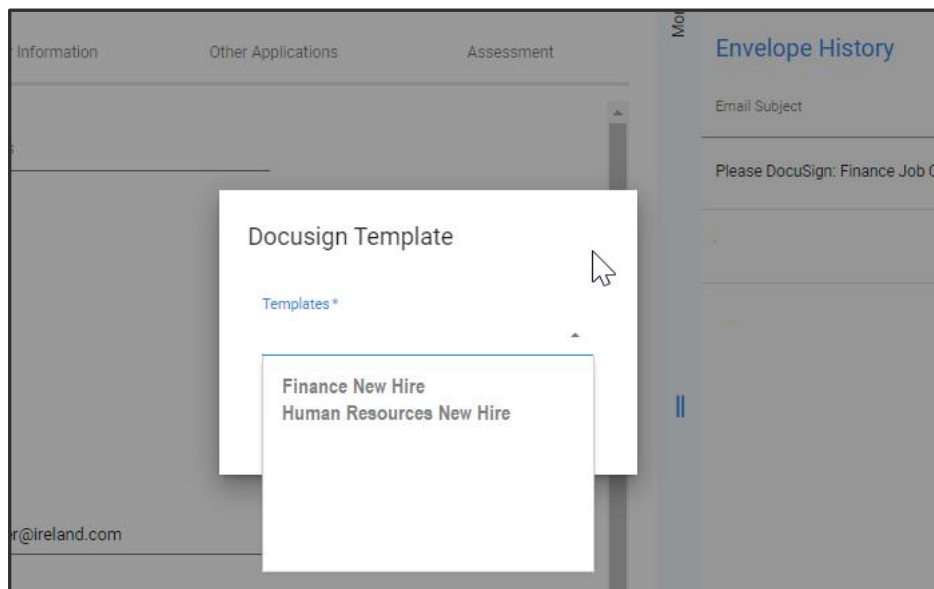

There are 2 ways to send a document to an employee.

2.2.1. Sending a Document

- This allows a user to send an already completed document located on their local/network drive etc to an employee.
- When the user invokes this process, DocuSign will open, and the user can add the Signature Required field to the Document, before sending it to the employee.
- The employee's email address as stored in their PeopleXD employee record (Contact Type EMAIL) will be passed to DocuSign as part of this process which will then be used to send the document to.

2.2.2. Sending a Template

- Pre-defined Templates can be created in DocuSign which contain most of the text/information e.g. Contract of Employment for Job Role A, Contract of Employment for Job Role B.
- PeopleXD fields can be added to these templates in DocuSign meaning that when the process is initiated in PeopleXD the employee's information is merged into the Document in DocuSign automatically e.g. Name, Job Role, Salary, Hours.
- When the user invokes this process, DocuSign will open, and the user can review this Document before they send it to the employee.
- The employee's email address as stored in their PeopleXD employee record will be passed to DocuSign as part of this process which will then be used to send the document to.

3. How to Configure

Note: To learn how best to set up Templates within DocuSign, please refer to the [Resources section](#).

3.1. Template Configuration

There are three steps that will need to be configured for each Template for them to be used within PeopleXD and in order for PeopleXD data to be passed into Template custom fields.

When a Template has been created ensure that:

1. The Role field is completed as **XD Recipient**.
2. The **Needs to Sign** action has been specified.
3. The **Sync Templates** process has been completed within the DocuSign Admin Area in PeopleXD. This makes the template visible in PeopleXD.

The screenshot displays the DocuSign 'Template Configuration' page. At the top, under 'Template Name and Description', there is a text field containing 'Finance Contract' and a larger text area for 'Template Description (optional)'. Below this is the 'Add Documents' section, which shows a preview of a document titled 'Finance Job Offer.docx' (1 page) and an 'UPLOAD' button with a 'GET FROM CLOUD' dropdown. The 'Add Recipients' section follows, with a note: 'As the sender, you automatically receive a copy of the completed envelope.' and a checkbox for 'Set signing order'. A recipient card is shown with the role 'XD Recipient', and buttons for 'NEEDS TO SIGN', 'CUSTOMIZE', and a trash icon. Fields for 'Name' and 'Email' are present. At the bottom, there are buttons for 'ADD RECIPIENT' and 'ADD DELAY'.

3.2. PeopleXD Fields available in DocuSign

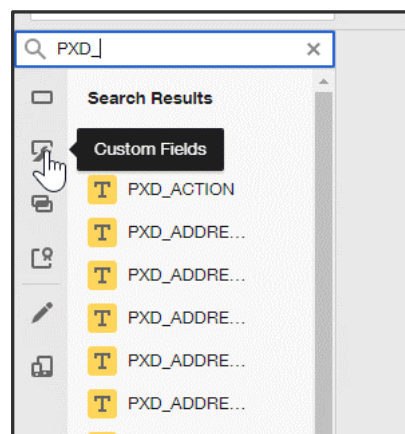

The following PeopleXD Employee/Appointment/Salary fields can be added to your templates in DocuSign. These fields must first be setup in your DocuSign account, and in order to do this complete the following steps:

1. Logon to DocuSign Account.
2. Navigate to the Settings Tab.
3. Select **Document Custom Fields** from the left navigation panel.
4. Click **Add Document**.
5. Add the custom field from the Dictionary provided below.

Once these fields have been added, these will be available under the Custom Fields option as below when creating or editing a template, and when the template is generated, these fields will be auto filled with the applicable PXD data.

When the user has generated a template and they are viewing it before they send, it's not possible to pull in PXD data at that point by dragging into these fields into the template preview.

Periodically new PXD custom field dictionary will be updated with new fields, you will however need to complete steps 1-5 above once these new fields have been released and communicated.

PXD Field		
PXD_PERSONNEL_NO	PXD_INCREMENT_DUE_DATE	PXD_RATE_TYPE
PXD_APPOINTMENT_ID	PXD_INITIALS	PXD_REPORTING_TO
PXD_ADDRESS_COUNTRY	PXD_JOB_CATEGORY	PXD_START_DATE
PXD_ADDRESS_COUNTY	PXD_JOB_TITLE	PXD_SUB_CATEGORY
PXD_ADDRESS_LINE_1	PXD_KNOWN_AS	PXD_SUB_STATUS
PXD_ADDRESS_LINE_2	PXD_LOCATION	PXD_SURNAME
PXD_ADDRESS_LINE_3	PXD_MANAGEMENT_UNIT	PXD_TARGET_END_DATE
PXD_ADDRESS_LINE_4	PXD_MIDDLE_NAME	PXD_TITLE
PXD_ADDRESS_LINE_5	PXD_MOBILE_NUMBER	PXD_USER_CODE_1
PXD_CATEGORY	PXD_ORG_UNIT_LOCATION	PXD_USER_CODE_2
PXD_COMPANY	PXD_PAYSCALE	PXD_USER_CODE_3
PXD_COST_CENTRE	PXD_PAYSCALE_POINT	PXD_USER_CODE_4
PXD_DEPARTMENT	PXD_PHONE_NUMBER	PXD_USER_CODE_5
PXD_DIVISION	PXD_POSITION_TYPE	PXD_WEEKS
PXD_EMAIL_ADDRESS	PXD_POST_CODE	PXD_WORKGROUP
PXD_EMPLOYEE_STATUS	PXD_POST_NUMBER	PXD_ACTION
PXD_FORENAME	PXD_POST_TITLE	PXD_END_DATE
PXD_FTE	PXD_POST_TYPE	PXD_PLANNED_END_DATE
PXD_FTE_HOURS	PXD_PPS/NI_NUMBER	
PXD_FTE_WEEKS	PXD_PROJECT	
PXD_HOURS	PXD_RATE_OF_PAY	

3.3. Menu Access

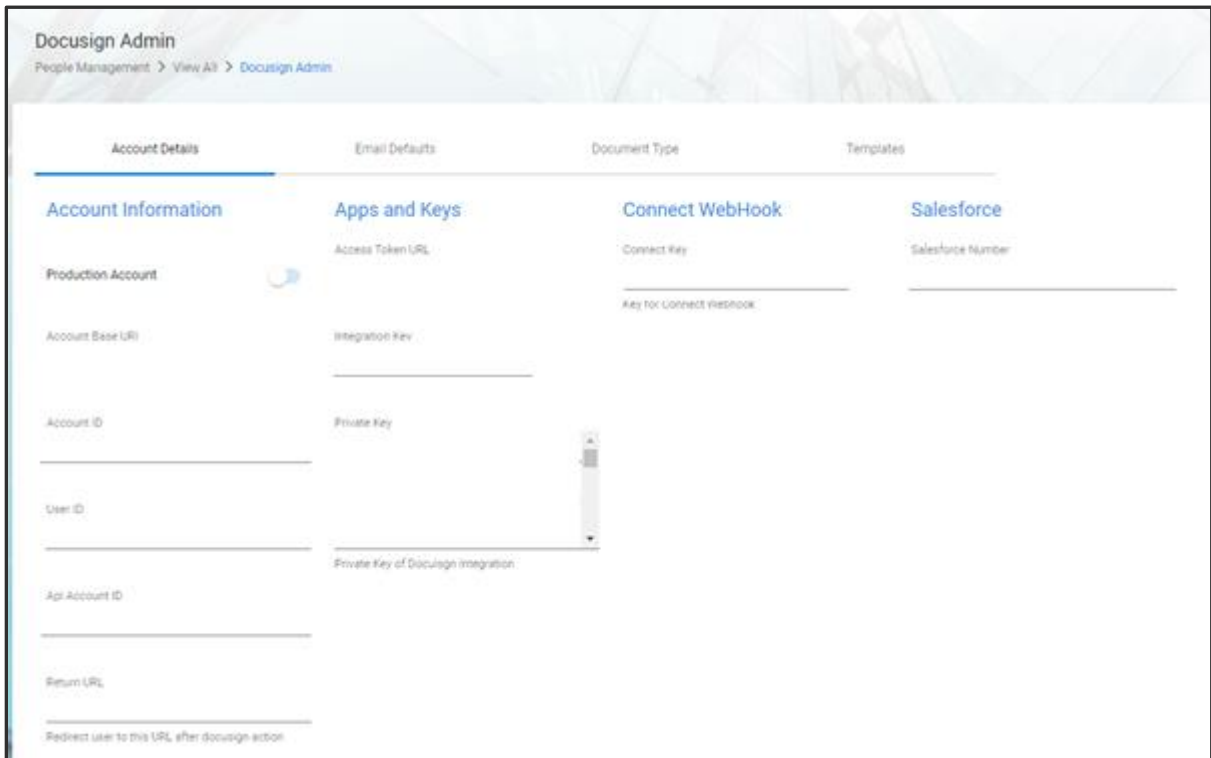

All of the below menu options are located under the Web Services system in XD Security.

System	Menu Option	Description
Web Services	People Management > HR Admin > Employee Dashboard > DocuSign View	Gives the user visibility of the DocuSign option within the employee record
	People > Create docusign senderview	All users initiating the DocuSign process in PXD need this menu option
	People > Create docusign localdoc	Allows a user upload a document and send it via DocuSign to the employee
	People > Get docusign envelopestatus	Required to see the Envelop History within HR Admin employee record
	People > Get docusign template	Required to allow PXD users to select and send a Document Template
	Update docusign adminsettings	Allows a user to update information within the PXD DocuSign Admin screen
	Get docusign adminsettings	Grants a PXD user access to the PXD DocuSign Admin screen

3.4. PeopleXD Admin Screen

A admin screen is available within the Data centre widget in People Management that allows an admin to configure integration as required.

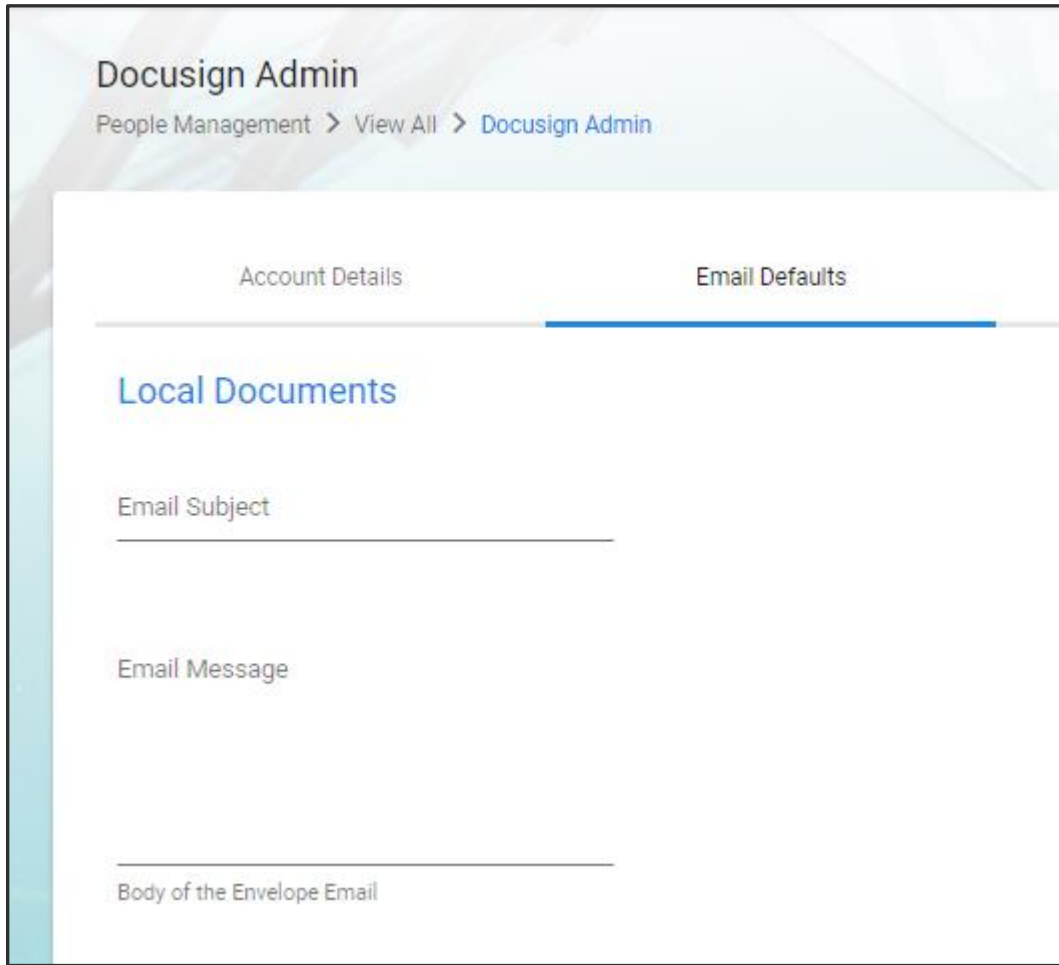

3.4.1. Account Details

The screenshot displays the 'DocuSign Admin' interface. At the top, a breadcrumb trail shows 'People Management > View All > DocuSign Admin'. Below this, four tabs are visible: 'Account Details' (selected), 'Email Defaults', 'Document Type', and 'Templates'. The 'Account Details' tab is divided into four sections: 'Account Information', 'Apps and Keys', 'Connect WebHook', and 'Salesforce'. The 'Account Information' section includes fields for 'Production Account' (with a toggle switch), 'Account Base URL', 'Account ID', 'User ID', 'App Account ID', 'Return URL', and a note 'Redirect user to this URL after docuSign action'. The 'Apps and Keys' section contains 'Access Token URL', 'Integration Key', 'Private Key', and 'Private Key of DocuSign Integration'. The 'Connect WebHook' section has 'Connect Key' and 'Key for Connect Webhook'. The 'Salesforce' section has a 'Salesforce Number' field.

- The account details page will allow an admin user or consultant to configure the integration link with DocuSign.
- Certain Information on this screen relates to the designated DocuSign user account used by the integration and from which DocuSign envelopes will be sent from. Therefore, once the integration has been activated, this information should only be updated where this designated user account needs to change.

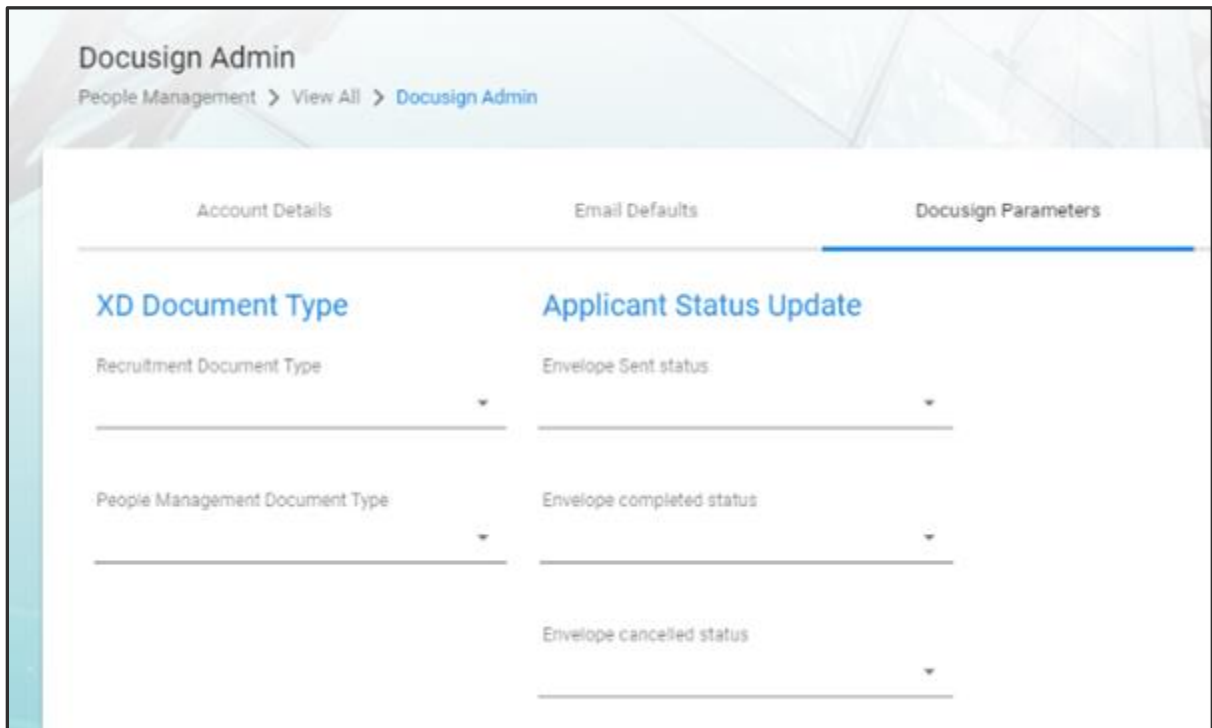

3.4.2. Email Defaults

The screenshot shows the 'DocuSign Admin' interface. At the top, there is a breadcrumb trail: 'People Management > View All > DocuSign Admin'. Below this, there are two tabs: 'Account Details' and 'Email Defaults'. The 'Email Defaults' tab is selected and highlighted with a blue underline. Under the 'Email Defaults' tab, there is a section titled 'Local Documents'. Below this title, there are three input fields: 'Email Subject', 'Email Message', and 'Body of the Envelope Email'. Each field has a horizontal line indicating where to enter text.

- The email defaults tab will allow a user to configure the default email subject and message when sending a non-templated document to an employee. If not set/or set, a user can overwrite this when DocuSign opens after the user initiates the process from PXD.
- DocuSign template email subject & messages are configured within DocuSign.

3.4.3. Document Parameters

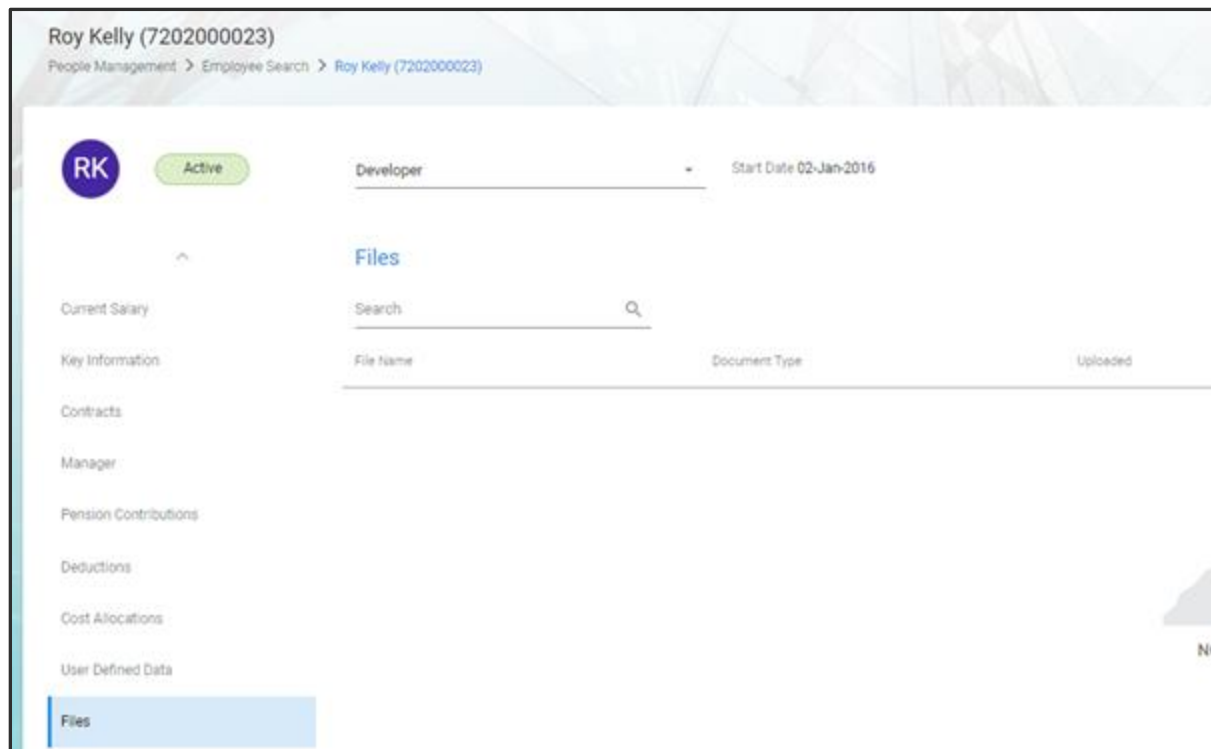

The screenshot displays the 'DocuSign Admin' interface. At the top, there is a breadcrumb trail: 'People Management > View All > DocuSign Admin'. Below this, there are three tabs: 'Account Details', 'Email Defaults', and 'DocuSign Parameters', with the latter being the active tab. The main content area is divided into two columns. The left column is titled 'XD Document Type' and contains two dropdown menus: 'Recruitment Document Type' and 'People Management Document Type'. The right column is titled 'Applicant Status Update' and contains three dropdown menus: 'Envelope Sent status', 'Envelope completed status', and 'Envelope cancelled status'.

There are several parameters within this section that allow you to automate specific things within PeopleXD.

People Management Document Type

- When set this allows a completed DocuSign document to be saved against the employee in question.
- The completed document will be saved against this document type in PeopleXD and will be available within the documents area within the employee record in HR Admin.

Recruitment Document Type

- Not applicable when DocuSign is initiated from XD People Management

Applicant Status Update

Envelope Status Update

- Not applicable when DocuSign is initiated from XD People Management

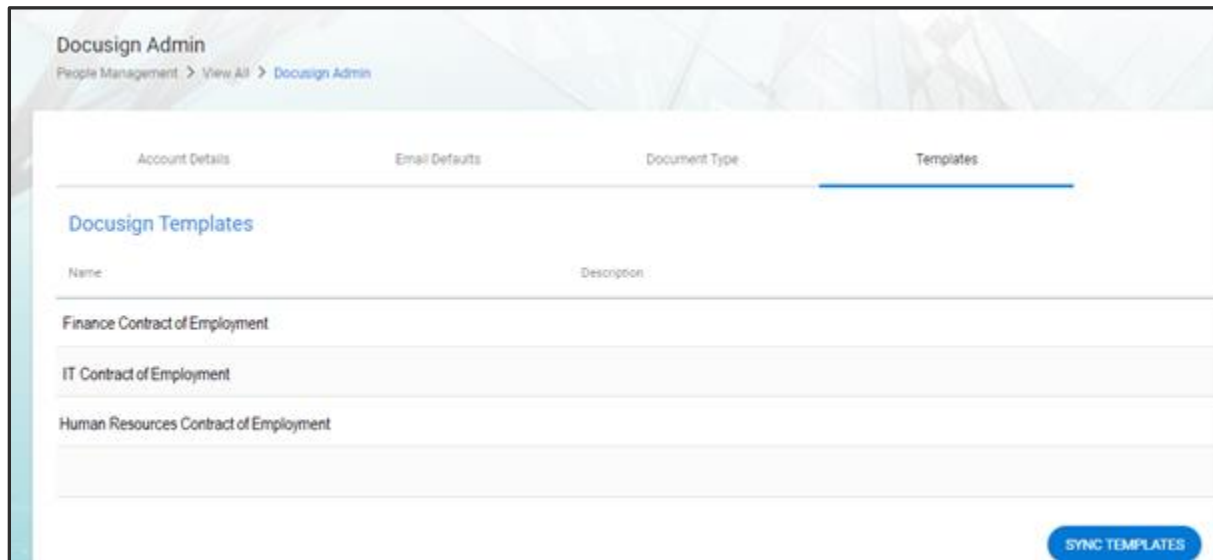

Envelope Completed Status

- Not applicable when DocuSign is initiated from XD People Management

Envelope Declined Status

- Not applicable when DocuSign is initiated from XD People Management

3.4.4. Templates

- Once a DocuSign template has been created it needs to be synced back to PeopleXD.
- Within the Templates tab, a user will be able to see what DocuSign templates have been synced back to PeopleXD, which will then be available to users initiating the DocuSign process after selecting the "Send Template" button.
- To Sync templates, the user can select the Sync Templates button.

3.5. DocuSign Setup Process

3.5.1. Updating the Designated User Account

Once the integration has been activated and there is a need to change the designated DocuSign user account by the integration e.g.

- The integration is currently linked to the DocuSign user account joebloggs@abc.com
- The integration now needs to use the DocuSign user account hr@abc.com

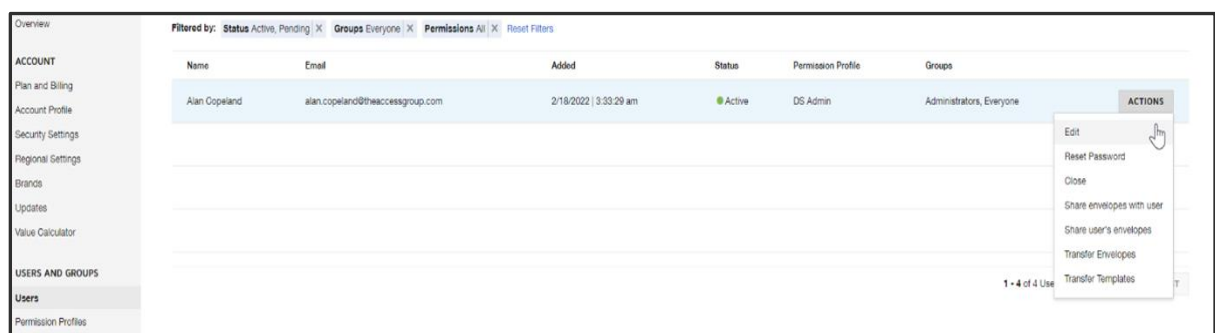

The following steps need to be performed:

Step 1

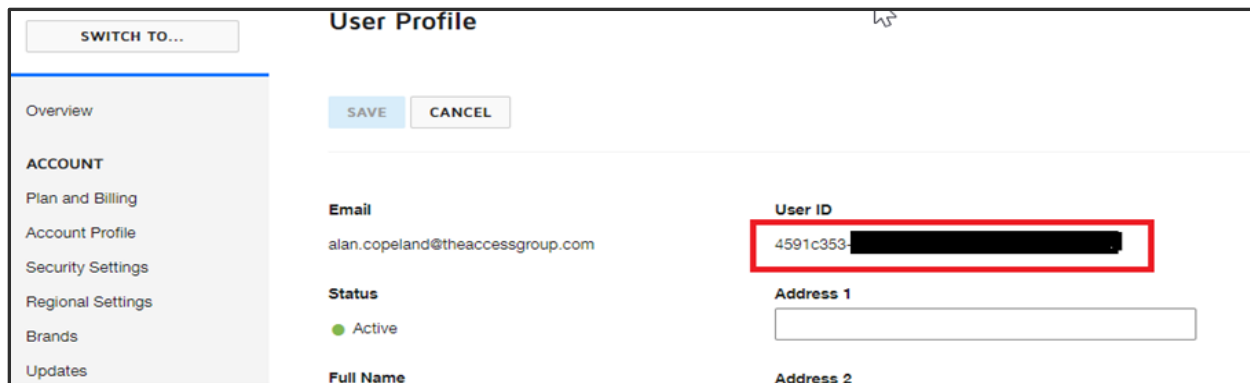

- Ensure the new user account is a valid email, has been added as an Admin user on your DocuSign Account, and the user account has been activated (activation is completed once the user has verified their account in an email DocuSign sends once their account has been added). If the account already exists and is active, there is no need to re-activate.

Step 2

- Navigate to the Users area which is located within the settings of your DocuSign Account, and select Edit against the user account that you wish to switch the integration over to e.g. hr@abc.com.

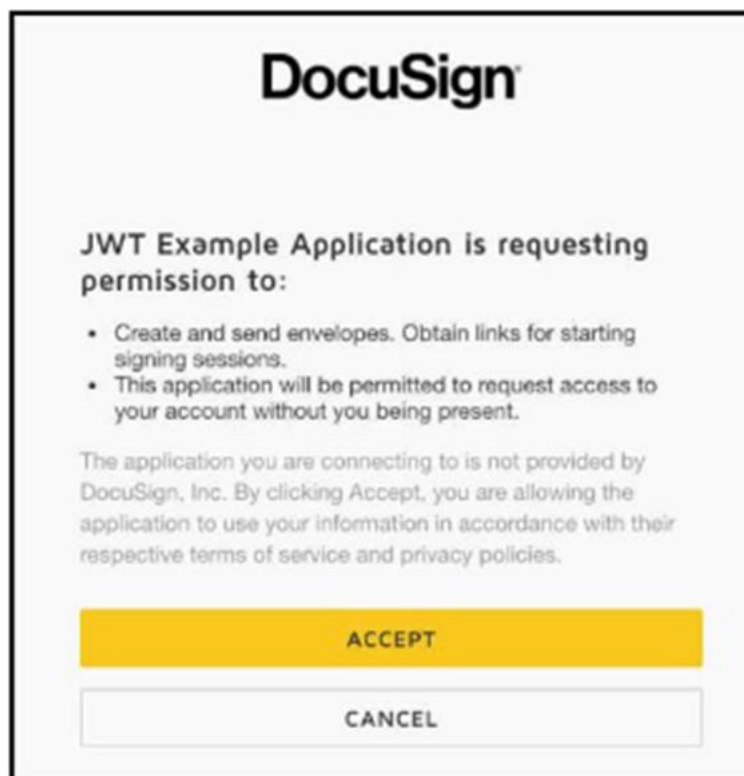

- Copy the User ID Value, highlighted below.

Step 3

- Navigate to the DocuSign Admin screen in PeopleXD and select the Account Details tab.
- Enter the User ID value copied from step 2.
- Click Save & Activate.
- After you click Activate, DocuSign will ask you to grant the necessary integration permissions to this user which you can Accept to complete the integration link.

After the above steps have been completed, DocuSign documents sent to employees will come from this user account.

4. Insight Reporting

It is possible to report on the DocuSign envelopes that have been generated and sent via PeopleXD.

The following columns are available in the Peoplemgt DocuSign (Personnel) view in Insight:

Columns	Description
Envelope Status	Status of the envelope e.g. created, completed, sent, delivered.
Created From Template	Was the DocuSign document generated from a template, will return a Y or N.
Appointment Id	The appointment ID associated with the person for whom this document was generated for.
Personnel No.	Personnel Number associated with the person for whom this document was generated for.
Email Address	Email Address associated with the person for whom this document was generated for.
Envelope Sender	Personnel No. of the user who sent this document.
Date Updated	The date that the envelope was last updated.
Date Sent	The date that the envelope was sent.
Email Subject	Subject of the envelope email.
Date Created	The date that the envelope was created.

5. DocuSign Resources

Below is a sample of recommended DocuSign resources with much more available. All admin users setup on your DocuSign Account will be able to access DocuSign support and DocuSign University.

Once your DocuSign account has been provisioned and you are able to log into it, you can add more users for the purpose of maintaining your account, templates etc.
