1.0	29 th Jan 2025	Isabelle Grey	Published to Customer Success Portal.
1.1	11 th Feb 2025	Isabelle Grey	Section 3.4. Requests – Admin View added.
1.2	13 th June 2025	Isabelle Grey	Help Text and Declarative Statement settings added to section 2.2.2. Purpose message parameters removed.
1.3	11 th Sept 2025	Isabelle Grey	Amendment in section 2.2.1.

1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to use & configure Employee and Manager Requests. This includes how to:

- Setup employee and manager request forms.
- Control access to request forms.
- Configure the approvals process per Request type.
- Submit a request as an employee or manager.
- Action a request approval.
- View the status of a request.
- View request notifications.
- Grant user access to the Request functionality.

1.2. What are Requests?

1.2.1. Employee Requests

This allows employees to submit a request form within PeopleXD that can be routed to its intended recipient via workflow process. For example, you can set up requests for a cycle to work scheme, child care voucher or equipment.

1.2.2. Manager Requests?

This allows managers to submit a request form on behalf of an employee that can be routed to its intended recipient via a workflow process. For example you can set up requests for a contract change, notification of leaver, or change of access.

2. Configure Employee and Manager Requests

2.1. The Employee and Manager Requests Screen

You can create and manage your requests using the employee and manager requests screen. To access this:

1. On the **People Management Dashboard** click the **Data Centre** tab.
2. Open the **HR Admin Setup Settings** option.
3. Search for and click the **Employee and Manager Requests** tile.

Code	Name
ABS_01	Adoption - Record Leave/Sap
CB	Career Break
CLIN	Clinical Registration
CC	Contract Change

2.2. Create a Request Form

1. Go to the **Employee and Manager Requests** screen
2. Click the **Employee Requests** or **Manager Requests** tab.
3. Click **Add**.

The screenshot shows the 'Employee and Manager Requests' page with a modal titled 'Add New Request Form'. The modal contains the following fields:

- Manager Request (text input)
- Code* (text input)
- Description* (text input)

At the bottom of the modal are 'CANCEL' and 'OK' buttons. The background interface shows a table with columns 'Code' and 'Description', and a search bar. The table contains rows for 'ABS_01', 'CB', 'CLIN', 'CC', and 'HC'.

4. Fill in the **Code** and **Description**.
 - **Code:** Unique code with a max of 6 alphanumeric characters
 - **Description:** Max of 40 alphanumeric characters
5. Click **OK**.

Note: All forms require a section field as the first field on the form, this generates automatically.

2.2.1. Add Fields to a Form

You can add up to 40 fields to a request form. To do this:

1. Click **Add** and fill in the details:

The screenshot shows the 'Edit Request Form' page with a modal titled 'Add New Item'. The modal contains the following fields:

- Item* (dropdown menu, currently showing 'Item 4')
- Form Label* (text input)
- Field Type* (dropdown menu)
- Reference Type (dropdown menu)
- Description Mode (dropdown menu)
- Format Mask (text input)
- Mandatory (toggle switch, currently off)
- Active (toggle switch, currently on)

At the bottom of the modal are 'CANCEL' and 'OK' buttons. The background interface shows a table with columns 'Item No' and 'Form Label', and a search bar. The table contains rows for '1 Request Details', '2 Reason', and '3 Old ID Number'.

Field	Description
Item	Read only.
Form Label	Fill in the label that will appear to the user. Max 50 alphanumeric characters.
Field Type	Select the field type: • Text: User input will be alphanumeric only. • Numeric: User input will be numeric only i.e. no characters. • Date: User input will be in date format only i.e. DD-MON-YYYY • List: User can select from a predefined list of items. • Text Area: User can input up to 4000 alphanumeric characters. • Reference: User can select from a list of reference items. This type can only be used on manager request forms. • Section: Add a section to the form and customise the layout.
Reference Type	Only applicable if the field type is <i>Reference</i>. Select a reference data item from the Reference Type drop-down list. For example, If the user should select from a list of Departments held in PeopleXD, then select <i>Departments</i> as the Reference Type.
Description Mode	Only applicable if the field type is <i>Reference</i>. Select the format that the reference type selected should be displayed to the user from the Description Mode drop-down list. • Description e.g. Sales • Code – Description e.g. D1 – Sales
Format Mask	Only applicable if the field type is <i>Numeric</i>. Specify the format of the number e.g. "99.99".
Section Type	Only applicable if the field type is <i>Section</i>. Select the section type from the drop-down list: • Grid: Default format where fields display from left to right and are the default width.

Field	Description
	Top Down: Fields display from top to bottom and have the default width. Full-Width: Fields display from top to bottom and span the width of the screen.
Mandatory	Turn off the toggle to make the field optional.
Active	Enable the toggle to display the field within the form.

- Click **OK**.
- If you have used a List Item field click **List Items** to define the list of options.
 - Click **Add**.
 - Enter the **List Item Description**.
 - Click **OK**.
 - Repeat for each item then use the breadcrumb trail to return to the previous screen.
- Once finished click **Save**.

Example Form:

Item No	Form Label	Field Type	Reference Type	Description Mode	Mandatory	Active	Format Mask
1	Request Details	Section - Grid			☐	☒	LIST ITEMS
2	Reason	Text Area			☒	☒	LIST ITEMS
3	Location	List Item			☒	☒	LIST ITEMS
4	Old ID Card Number	Numeric			☐	☒	LIST ITEMS

2.2.2. Amend Form Settings

You can amend the settings of each form to display differently. This includes:

- Hiding or showing certain fields.
- Adding a purpose message and link that displays at the top of every form and can be used to give the user further guidance.

- Adding a customised declarative statement to a Form that a user has to read. And confirm they agree using a checkbox before they can Submit the form.

To amend the settings of a request form:

1. Expand the **Actions** menu and click **Settings**.

Field	Form Type	Description
Hide Additional Information	Manager	Manager Turn on the toggle to hide the Additional Information Box on the form.
Hide Document Option	Manager	Enable the toggle to hide the Document Upload button on the form.
Appointment Specific	Employee	Enable the toggle to link the form to a contract. The employee can then select the appointment the form relates to.

Field	Form Type	Description
Hide from and to Dates	Employee	Enable the toggle to hide the from and to dates on the form.
Hide Document Option	Employee	Enable the toggle to hide the Document Upload button on the form.
Help Text	Both	Fill in the Help Text that displays at the top of the form. Or leave blank.
Declarative Statement	Both	- Fill in a Declarative Statement that displays at the bottom of the form. This adds a checkbox to the form that users need to select before submitting the form. Note: You can update the checkbox text using the Language Pack. - Leave blank if users do not need to confirm before submitting.

- Review and update the toggles as needed. The options available will depend on the request form type.
- Fill in the Help Text and use the format options to customise the text, add a link and preview.

 **Note:** Any existing purpose text and links added using the Admin Settings parameters are migrated into the Help Text field of your existing forms. These can be amended or removed as needed.

- Fill in the Declarative Statement and use the format options to customise the text, add a link and preview.
- Click **Save**.

2.2.3. Preview Form

You can easily preview new and existing forms to view the layout and fields. To do this:

- Open the form you want to preview.
- Click **Preview**.

2.3. Manage Request Forms

2.3.1. Edit a Form

If a form has not be used you can freely edit the form. However, once used some features will be read only.

The fields you can able to edit on a used form are:

- Description.
- Status e.g. to make the form inactive.
- Add new fields.
- Edit existing fields:
 - Amend the mandatory toggle.
 - Status e.g. make a field inactive.

 **Note:** Once a form has been used the existing fields within it cannot be deleted. To remove a field from a form you will need to make it inactive.

- Section field types. E.g. to amend the layout of the form.
- Update the items in a List field type.

 **Note:** If you update a list item that has been used in a form, you will get a warning message alerting you that updating the item will also cascade and update any historical/existing request forms that reference the old description.

To edit a form:

1. Go to the **Employee and Manager Requests** screen.
2. Search for the form and expand its **3-dot menu**.
3. Click **Edit**.
4. Make your changes.

2.3.2. Clone a Form

You can quickly create a new form by cloning an existing on. To do this:

1. Go to the **Employee and Manager Requests** screen.
2. Search for the form and expand its **3-dot menu**.
3. Click **Clone**.

4. Update the **Code** and **Description**.
5. Click **OK**. You can then edit the form to make any changes.

2.3.3. Delete a Form

 **Note:** Once a form has been used it cannot be deleted. To remove a form you will need to make it inactive.

1. Go to the **Employee and Manager Requests** screen.
2. Search for the form and expand its **3-dot menu**.
3. Click **Delete**.

2.4. Restrict Access to Request Forms

2.4.1. Assign Criteria Groups

Employee and manager requests can be further configured to ensure that only particular groups of employees/managers see specific request types e.g. you may want to restrict access to certain forms to permanent staff only.

This is optional and if no criteria group is set for a request, then all employees/managers will have access to that request.

To create/manage these criteria groups:

1. On the **People Management Dashboard** click the **Data Centre** tab.
2. Open the **HR Admin Setup Settings** option.
3. The screen used will depend on the request type:
 - a) Employee Requests: Search for and click the **Employee Request Process Assignment** tile.

Employee Request Process Assignment		
People Management > HR Admin Setup Settings > Employee Request Process Assignment		
UDF Code	User Defined Field	Restricted
X1	Employee Request	Unrestricted ASSIGN
X2	New ID Card	Unrestricted ASSIGN

- b) Manager Requests: Search for and click the **UDF Assignment** tile. Manager Request forms will have the UDF type 'Manager'.

UDF Assignment		
People Management > HR Admin Setup Settings > UDF Assignment		
User Defined Field	UDF Type	Status
Adoption - Record Leave/Sap	Manager	Unrestricted ASSIGN
Career Break	Manager	Unrestricted ASSIGN
Certificate Of Sponsorship	Employees	Unrestricted ASSIGN

- Click **Assign** next to the relevant request.
- Click **Assign Criteria Groups**.

Criteria Group	
People Management > HR Admin Setup Settings > Employee Request Process Assignment > Employee Request > Criteria Group	
Select a group to assign	
Enter search text... 	ADD GROUP
Description	Activate
Permanent Employees	☒ 
SAVE	

- To assign an existing criteria group enable the relevant **Activate** toggle.
- To create a new group, click **Add Group**.
 - Enter a name and click **Ok**.

The screenshot displays a configuration interface for criteria groups. It features two main sections: 'Available' on the left and 'Assigned' on the right. Each section includes a search bar and a list of criteria. An arrow icon is positioned between the two sections, indicating the ability to move items from 'Available' to 'Assigned'. At the bottom of each section, it states '0 rows selected. Select All'.

- b) Select the element that will be used to identify the employees from the **Criteria Category** drop-down list e.g. Employment Status.
- c) Select the required values from the *Available* list and click the **Arrow Icon** to move the item to the *Assigned* list.
- d) Click **Save**.
- e) The new criteria will be listed on the *Group Creator* screen.
- f) Click **Add** to add additional criteria if necessary.
- g) Click **Save**.
- h) On the *Criteria Group* screen enable the new groups **Activate** toggle.

13. Click **Save**.

The *Employee Request Process Assignment* or *UDF Assignment* screen will display all of the employees that meet the criteria set for the groups.

- This is the list of employees that will be able to select this Employee Request type.
- If an employee is not listed here, they will not be able to submit an employee request of this type.

2.5. Workflow Process & EMS Trigger

The Employee and Manager requests approval & notification is highly configurable through use of the Workflow functionality. This ensures that for every request type, it is possible to configure separate workflows so that notifications and approvals are routed to the required people and can include as many tasks/steps as necessary e.g. one approval process could be set up to route requests to the employee's manager, another could be routed to HR etc.

Important Considerations:

- The *Event Type* of “Submitted” ensures that the event is triggered when the request is submitted by the employee.
- EMS alerts will need to be created to trigger the workflow processes i.e. using a Notification Type of “Process”.
- The *Conditions* tab on the EMS can be used to further define which process is triggered e.g. if REQUEST_TYPE is *Cycle to Work Scheme* then trigger the workflow for that request type.
- It is likely that multiple processes and corresponding EMS triggers will need to be created in order to ensure that separate approval processes are available for each request type.

2.5.1. Employee Requests

All employee requests require the following elements to be configured:

1. Workflow Process

Process Category: Employee Requests

One or many workflow processes should be configured, to support the routing of requests to the required recipients/approvers.

Search

3. Manage Requests

3.1. Create a Request

3.1.1. Employee Request

To create an employee request:

1. On the **Employee Requests** widget click **Create Request**.

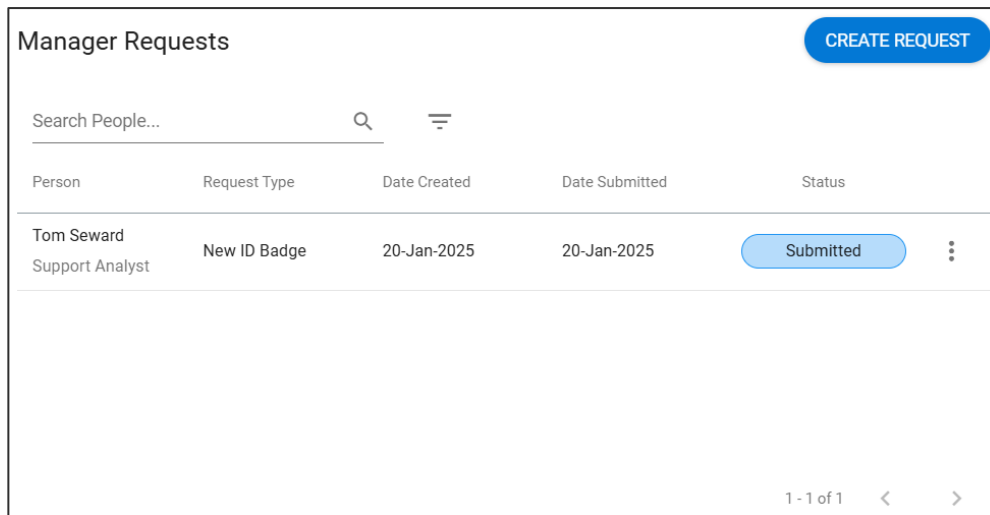

The screenshot shows the 'Employee Requests' widget. At the top right is a blue button labeled 'CREATE REQUEST'. Below it is a search bar with the placeholder text 'Search requests' and a magnifying glass icon. To the right of the search bar is a filter icon. Below the search bar is a table with the following columns: 'Request Type', 'Date Created', 'Last Updated', and 'Status'. The table contains one row with the following data: 'New ID Card', '20-Jan-2025', and 'Submitted' (which is highlighted in an orange pill shape). To the right of the 'Submitted' status is a vertical ellipsis menu icon. At the bottom right of the table, there is a pagination indicator '1 - 1 of 1' and navigation arrows.

2. Select the **Request Type** from the drop-down list.
3. If the chosen request is contract specific, select the required contract from the **Appointment** drop-down list.
4. Fill in the available fields.
5. If relevant click **Attach Documents** to upload files.
6. Click **Save** or **Submit**.
 - Saving a request allows the user to return to the form later. This will need to be edited and submitted to complete the request.

3.1.2. Manager Request

To create a manager request:

1. On the **Manager Requests** widget click **Create Request**.

The screenshot shows the 'Manager Requests' interface. At the top right is a blue button labeled 'CREATE REQUEST'. Below it is a search bar labeled 'Search People...' with a magnifying glass icon and a filter icon. The main area contains a table with the following columns: 'Person', 'Request Type', 'Date Created', 'Date Submitted', and 'Status'. The table has one row with the following data: 'Tom Seward Support Analyst', 'New ID Badge', '20-Jan-2025', '20-Jan-2025', and a blue 'Submitted' badge. At the bottom right of the table, it says '1 - 1 of 1' with left and right arrow icons.

2. Select the **Request Type** from the drop-down list.
3. If the chosen request is contract specific, select the required contract from the **Appointment** drop-down list.
4. Fill in the available fields.
5. If relevant click **Attach Documents** to upload files.
6. Click **Save** or **Submit**.
 - Saving a request allows the user to return to the form later. This will need to be edited and submitted to complete the request.

3.1.3. Request Status

The status of the request is displayed using a coloured badge:

Status	Description
Saved	The request has been created but not yet submitted for approval.
Submitted	The request has been submitted for approval but the approval process has not yet been complete.
Approved	The request has been fully approved.
Rejected	The request has been rejected.
Complete	The request has been fully completed but for this type of request the outcome is a status that is neither approved nor rejected.

3.2. Action a Request

3.2.1. Notification Centre Alerts

When a request has been submitted, an application will generate in the Notification Centre. A notification will also be sent to the creator of the request once it has been approved.

3.2.2. Action a Request Approval

Approvers can action a request in various areas of XD.

- **Employee Request Approvals widget.**

Employee Request Approvals

	Laura Barton	Staff Request	14:00	VIEW	

3.2.3. HR Process Administration

As an administrator you may have access to view and action all employee and manager requests.

To do this:

1. On the **People Management Dashboard** click the **Data Centre** tab.
2. Open the **HR Admin Setup Settings** option.
3. Search for and click the **HR Process Administration** tile.
4. Select **Administrator** from the *Query Type* drop-down list.
5. Select **Staff Requests** or **Manager Request Events** from the *Process Category* drop-down list.

Note: You will only have these options if you have been granted [the relevant HR user access](#).

6. Fill in any additional filters and click **OK**.

The screenshot shows the 'HR Process Administration' page. At the top, there's a breadcrumb trail: 'People Management > HR Admin Setup Settings > Hr Process Administration > HR Process Administration'. Below this, the 'Administrator' section is active. There are five filter buttons: 'On Schedule' (grey), 'Due in next 5 days' (green), '3 Days Overdue' (blue), '7 Days Overdue' (yellow), and '14 Days Overdue' (red). A table displays the following data:

%	Subject ID	Subject Name	Process	Process Date	Due Date	Complete Date	NT Due Date	O/D Tasks
0	000020	Peggy Carter	Standard M...	20-Jan-2025	25-Jan-2025		23-Jan-2025	0
0	000035	Jane Green	Standard M...	20-Jan-2025	25-Jan-2025		23-Jan-2025	0

At the bottom, there's a summary bar with the following values: Total: 2, Complete: 0, Overdue: 0, Pending: 2. The 'access PeopleXD' logo is visible at the bottom center.

7. To action a request expand its **3-dot menu** and click **Edit**.
8. Select the **Task** from the *Task Details* section.

Task Details

Sequence	Description	Status	Start Date	Complete Date	Due Date
1	Manager request submitted to first approver	Initial	20-Jan-2025		23-Jan-2025
2	Request Submitted to HR for processing				

Task Status Details

Status	Status Start Date	Status Complete Date	Notification Type	Description	
Initial	20-Jan-2025		Organisation Role	Hr Salary Approver - Company	...

- Expand the **3-dot menu** next to the *Task Status* you are changing and click **Edit**.
- Select the required status from the **Set Status To** drop-down list.

- Click **Save**.

3.3. View Request History

Employees and managers can review the status of their request by viewing the history. To do this:

- On the Employee or Manager Requests widget expand the requests **3-dot menu**.
- Click **View**.
- Review the *Request History* section.

Submitted	Laura Barton	20-Jan-2025	
Pending	Company: Hr Salary Approver		

3.4. Requests - Admin View

Admins can view requests raised by an employee or their manager within the employee's record. This ensures you can track request form progress, view active and historical requests and, view information and attached documents.

To do this:

1. Go to the **Command Centre** widget on the **People Management Dashboard**.
2. View the Employees option.
3. Search for the employee and click **View**.
4. Click the relevant tab:
 - a. **Employee Requests** – to view requests submitted by the employee.

- b. **Manager Requests** – to view requests submitted by their manager.

4. Additional Configuration

4.1. Manager Employee Access

To populate the Employee drop-down list in the Managers Request widget, additional configuration is required. This should match the Reports to Manager configuration role/organisation group to ensure that the manager sees the same list of employees on the Manager Request list as they do on the My Team Widget.

To configure manager employee access:

1. Go to the **Administrator Dashboard**.
2. On the *Site Manager* widget open the **Admin Settings** option.
3. Search for the parameter you want to amend.

Parameter Code	Parameter Description	Example
cp_mgr_req_org_group	The Organisational Group Item used in Org Roles when building the Manager Request employee list. Defaults to DEPT for Department Level.	WRKGRP
cp_mgr_req_org_role	The Organisational Role used in Org Roles when building the Manager Request employee list. Defaults to 001 for Reports To.	MGRESS

Note Ensure the configuration matches the org group and role used in your reports to manager configuration.

4. Click **Edit**.
5. Update the text and click **OK**.

4.2. Insight View

The data submitted within an Employee or Manager Request is available to report on via Insight.
