1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide an overview of the employee record on the *People Management* dashboard.

This screen is used by HR administrators to access and amend the employees' contracts and other details. This screen (in full or restricted view) may also be made available to an employee's line manager, so that they can view and amend the HR record.

Note: This guide only covers a HR Administrator's use of the screen. Please refer to the [Devolved People Management](#) user guide for details on the manager's use of this screen.

1.2. Accessing the Employee Record Screen

To access the employee record screen:

1. Navigate to the *People Management Dashboard* and select **Command Centre**.
2. Click **View** on *Employees*.
3. Search for the employee and click **View**.

 **Note:** The screenshots used in this guide include all the options that may be made available on the employee's record. These options are highly configurable per organisation and per user. Therefore, these may include items that are not relevant to your organisation. For further guidance see the [Employee Record Configuration](#) guide.

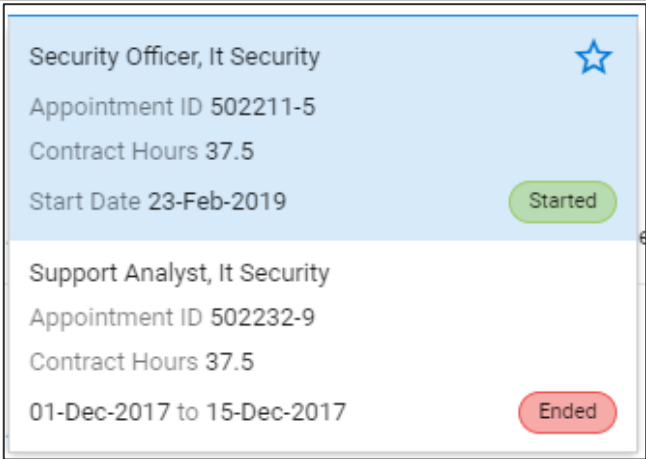

2. The Employee Record Screen

Once opened the employee record displays:

The **Employee Record** screen contains the following fields:

Option	Details
Name	The employee's current forename and surname e.g., Alice Jones
Employee Number	The employee's personnel number e.g., (000013)
Picture/Initials	- If a profile image has been uploaded for the employee, this will be displayed. - If no image has been uploaded, then the employee's initials will display.
Employee Status	This is the current status for the employee. There are four possible options: Active The person has a start date of today or earlier. Leaving The person has a leave date of today or greater. Dormant The person has a leave date of less than today. For this status, a rehired person may continue

Option	Details
	to appear as “Dormant” for certain rehire scenarios e.g. the employee has been rehired in a future payroll period. Future The person has a start date greater than today.
Contract List	The contract drop-down list includes all contracts that are linked to the employee on PeopleXD. Users only have access to the contracts that they have been granted access to see on HR i.e. based on their <i>HR Data Access</i>. Contracts are flagged with one of the following statuses: • Pending – The employee has been appointed to the contract but not commenced. This corresponds to the appointment status of <i>Appointed</i>. • Started – The contract has been commenced and is currently active i.e. the start date is today or earlier. This corresponds to the appointment status of <i>Commenced</i>. • Future – The contract has been commenced on a date in the future i.e. the start date is greater than today. This corresponds to the appointment status of <i>Confirmed Future</i>. • Ending – The contract has been ended on a date in the future i.e. the end date is today or greater. • Ended – The contract has been ended and is no longer active i.e. the end date is less than today. A star displays for the contract that is <i>currently substantive</i>. This is particularly relevant if the employee has multiple active contracts. The following data is displayed per contract:

Option	Details
	 • Current Job Title, Current Department • Contract ID • Current Contracted Hours (only displayed if recorded against contract) • Contract Start Date & Contract End Date (only displayed if contract is ended) • Current Contract Status • Star displays on the contract that is currently substantive.
Contract Start Date	This is the start date for the contract selected from the <i>Contract List</i> .
Payroll Status	This reflects the current payroll status for the employee's pay group. Possible statuses are: Payroll Status: Open for Processing Payroll Status: Closed for Processing Certain tasks may not be possible to complete if the employee's pay group is in progress e.g. rehire, change contract start date. These are covered in the relevant user guides.

Expand the **Actions** menu to access additional tasks, these options are covered in detail in the relevant user guides:

- [Process as a Leaver](#)
- [Personnel Profile](#)
- [Add Additional Contract](#)

- [Grant Portal Access](#)
- Change Pay Group
- [Generate Email](#)
- [Generate Document](#)
- [Assign Access](#)
- New Starter Copy
- Delete Person
- Update Photo

3. Employee Record Tabs

This section provides a high-level overview of each tab on the employee record. Detailed user guides are available per section, where applicable.

3.1. Key Information

The *Key Information* tab is used to manage employee details. For further guidance refer to the [Key Information user guide](#).

The **General** section contains the following fields:

Option	Details
Title	Select the employee's title from a predefined list. This can be prepopulated if captured on the New Hire/Rehire wizard.
Forename	The employee's forename (max 40 alphanumeric characters). This is prepopulated as captured on the New Hire/ Rehire wizard.
Surname	The employee's surname (max 40 alphanumeric characters). This is prepopulated as captured on the New Hire/ Rehire wizard.
Middle Name	The employee's middle name (max 40 alphanumeric characters). This is prepopulated as captured on the New Hire/ Rehire wizard.

Option	Details
Known As	The employee's known as name e.g., Forename, Edward but prefers to be known as, Ted (max 40 alphanumeric characters). This can be prepopulated if captured on the New Hire / Rehire wizard.
Initials	The employee's initials (max 4 alphanumeric characters). This is prepopulated as captured on the New Hire/ Rehire wizard.
PPS / NI / Social Security Number	Value input will be dependent on the social security settings on People Management e.g. will differ for PPS Number, NI Number or other. This can be prepopulated if captured on the New Hire / Rehire wizard.
Date of Birth	The employee's DOB. Select from the calendar, date format DD/MMM/YYYY. May be prepopulated if captured on the New Hire / Rehire wizard.
Age	Prepopulated using the employee's DOB.
Retirement Date	The employee's retirement date. Select from the calendar, date format DD/MMM/YYYY. May be prepopulated if captured on the New Hire / Rehire wizard.
Civil Status	Select the civil status from the predefined list.

The *Service Details* section is used to display details of the employee's service with the company to date. This may also be used to override the system calculated continuous service dates and duration for the employee, if required.

The **Service Details** section contains the following fields:

Option	Details
Recent Start Date	The latest date that the employee started with the organisation. This cannot be updated and is available for display purposes only. If the employee has left and re-joined the company (one or many times) this will display the latest date that they were rehired i.e. their current / most recent period of service.

Option	Details
	If the employee has only one period of service on the system, this field will not appear.
Date First Joined	The date that the employee joined the organisation. This cannot be updated and is available for display purposes only.
TUPE Date	Can be used to capture a TUPE date for the employee and if populated, will override the system calculated <i>Continuous Start Date</i> . Select from the calendar, date format DD/MMM/YYYY.
Override Start Date	If populated, will override the system calculated <i>Continuous Start Date</i> and update the <i>Continuous Service Calculation</i> . Select from the calendar, date format DD/MMM/YYYY.
Override End Date	If populated, will override the system calculated <i>Continuous End Date</i> and update the <i>Continuous Service Calculation</i> . Select from the calendar, date format DD/MMM/YYYY.
Continuous Service Duration	The employee's continuous length of service. This is system calculated based on the service rules defined on PeopleXD and may be updated by using the override dates referred to above.
Continuous Service Started	This corresponds to the Continuous Service Duration. These are the dates that the system has identified as the employee's period of eligible continuous service. The second date will be either the end date of the continuous service OR today's date.
Total Length of Service	The employee's total length of service from their original start date (i.e. Date First Joined) and includes all periods of service if the employee has left and rejoined one or many times. This is based on actual employment dates on PeopleXD and is not reflective of the employee's continuous service.
Length of Service	The employee's length of service for their current or most recent period of service.
Job Seekers Registration	View whether the employee is on the job seekers/redeployment register.

The *Work Permit* section provides a set of standard system fields that may be used to capture details of an employee's right to work.

Note: Some organisations may use a User Defined Field to capture right to work information.

The **Work Permit** section contains the following fields:

Option	Details
Work Permit Number	The work permit number (max 20 alphanumeric characters).
Work Permit Details	The work permit details (max 30 alphanumeric characters).
Work Permit Issue Date	The work permit issue date, select from the calendar, date format DD/MMM/YYYY.
Work Permit Expiry Date	The work permit expiry date, select from the calendar, date format DD/MMM/YYYY.

The *Contract Info* section provides an additional set of options that may be updated for the employee's record. This information is specific to the contract selected at the top of the screen i.e. if that that contract is updated, different data can be viewed/entered.

The **Contract Info** section contains the following fields:

Option	Details
Assembly Point	Select the relevant emergency assembly point from the predefined list. Note: - Only Active Assembly Points will be available to assign. - Assembly Points can also be assigned via <i>WFM Admin>Person Maintenance>Emergency Details</i>.
Internal Extension Number	The internal extension number (Max 5 digits).
Exclude from Occupational Absence	Turn on to exclude the employee from occupational absence.

3.2. Contracts

People Management: Employee Record – User Guide

The *Contracts* tab allows you to view and manage the contract selected from the Contracts list. If applicable, select an alternative contract from the drop-down list to update the screen to view the associated contract information.

For further guidance refer to the user guides in the Contract Management section of the [People Management User Guide Library](#).

Start Date	End Date	Target End Date	Post No	Post Sequence	Re...	De...	Hours	FTE
31-Aug-2020			502252	1	Hire	Se...		1

REPLACE CONTRACT CHANGE CONTRACT HOURS

This **Summary** section provides high-level details for the selected contract:

Option	Details
Appointment ID	The employee's appointment ID.
Status	The <i>Appointment Status</i> i.e. Pending, Started, Future, Ending or Ended.
Emp Status	The Employee Status i.e. Permanent, Part Time, Contract etc.
Start Date	The overall start date for the contract.
End Date	The contract end date. Only populated if the contract selected is ended or ending contract.
Substantive	Only populated for substantive contracts.
Funding Expiry	Linked to the end date for any cost allocations attached to the contract.

From the summary contract **3-dot menu**, you can:

- **End Contract** – Add an end date to the contract. This is available for contracts that are Pending, Started or Future. Typically, this is only used to end a contract where an employee has multiple active contracts (as the Leave Person process ends all employee's contracts).
- **Delete Contract** – It is recommended to only delete a contract when it has been made in error or has not been used.
- **Amend Contract Start Date** – Amend contract start date.
- **Leaving Summary** – Only applicable to ended contracts. Provides a view of the ended contract details including any contract elements that were ended with the contract e.g. cost allocations, allowances etc.
- **Amend Contract End Date** – Remove or change an end date for an ended contract.
- **Timeline** - View a timeline of amendments to this contract.

The Amendments provides a list of each individual amendments for the contract. If there is only one row, this means that the contract has not changed since it was originally assigned to the employee.

The **Amendments** section contains the following fields:

Option	Details
Start Date	The start date of the contract amendment.
End Date	The end date of the contract amendment.
Target End Date	The target end date of the contract amendment, if the contract amendment is for a known period.
Post Number	The post number.
Post Sequence	The post sequence.
Reason	The reason given for the contract amendment.
Department	The department of the employee.
Hours	The contracted hours for the employee.
FTE	The FTE value for the employee.

To amend a contract:

1. Click **View**
2. The full contract displays.

3. Click **Amend**
4. Make the required amendments e.g. change their hours, location etc.
5. Click **Save**.

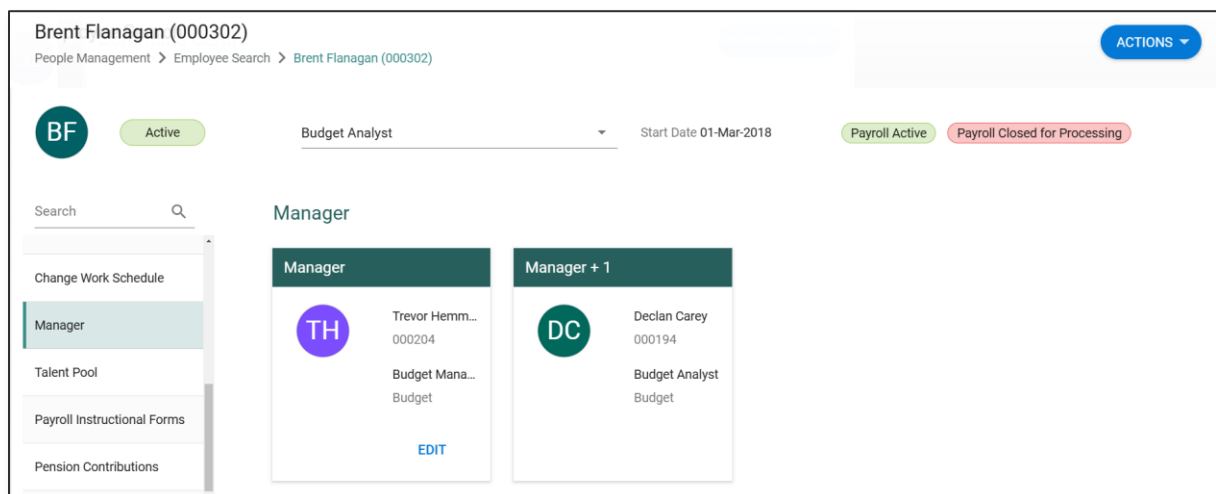

The following **Buttons** may display on the *Contracts* screen, depending on your access and the contract status:

- **Commence** – only available for **Pending** contracts. Click to commence.
- **Replace Contract** – click to replace the contract with a new one e.g. to record an employee promotion.
- **Change Contract Hours** - a quick way to amend an employee's contract specifically to update their contracted hours, weeks and FTE.

3.3. Manager

The *Manager* tab displays the employee's reports to manager for the selected contract.

For further guidance refer to the [Reports To Manager Configuration user guide](#).

This screen displays the manager and the manager +1 (i.e. their manager). Depending on the reports to configuration for the organisation, it may be possible to update the line manager on this screen.

3.4. Current Salary

People Management: Employee Record – User Guide

The *Current Salary* tab provides access to the salary details for the contract selected on the contract list.

For further guidance refer to the user guides in the Salary Management section of the [People Management User Guide Library](#).

Note: You require an additional level of Payroll security (aligned to the employee's pay group) to see this option on screen.

ADD

This screen is split into 3 sections: Current Salary, Allowances & Increment History

Each section, and many of the elements within, are controlled by menu options. This means that the screen may appear differently to the screenshots included in this guide, depending on how your organisation is using PeopleXD OR an individual user's restricted access.

3.4.1. Current Salary Tab

The **Current Salary** section contains the following fields:

Option	Details
Current Salary	The actual annualised salary that the employee is in receipt of today.
Including Allowances	The current salary (as described above) plus any allowances that are active for the employee today.
Next Increment Due	The next 'Increment Due Date' for the employee's contract, that is held on the system.
Paygroup	The employee's assigned Pay Group. The corresponding pay group status badge is displayed at the top right of the employee record.
Timeline View	Provides a timeline view of all salaries & allowances held on the system for the selected contract.

The Salary History displays the full salary history for the employee's contract including:

- All approved salaries
- All outstanding salaries (i.e. unapproved, if using Salary Approvals)
- All rejected salaries (i.e. if using Salary Approvals)

The **Salary History** section contains the following fields:

Option	Details
Include/Exclude Rate History	Use the drop-down options to show or hide salary changes that were automatically created on the system as part of an overall rate change.
Start Date	The date from which the salary is active for the employee's contract and will be paid from. An employee may only have 1 active salary per contract.
Rate Effective	The date for the Pay Scale Rate that the employee is in receipt of for this salary record.
Pay Scale/Grade	The Pay Scale/Grade that is used to derive the employee's salary. If the employee is on a Personal salary, this will display a default of <i>Personal Rate</i> .

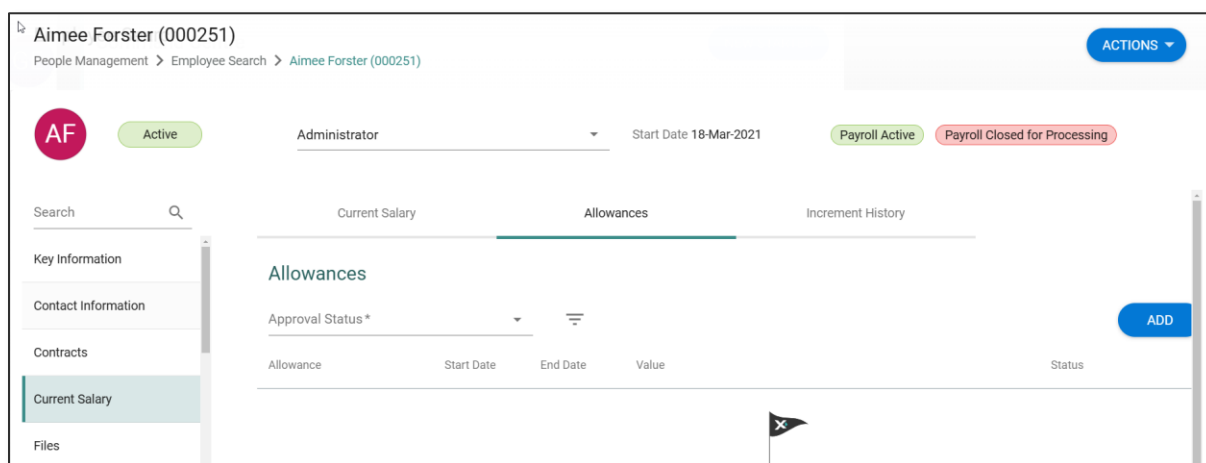

Option	Details
Point	The actual point on the Pay Scale/Grade that the employee is on for this contract. This informs the value that is displayed in the 'Rate Amount' field. If the employee is on a Personal salary, this will display 9999 by default.
Rate Type	The type of rate the employee is on.
Rate Amount	The actual value that is held on the system and active for the employee's salary, based on the salary <i>Start Date</i> i.e. if multiple rates existing on the system, this will identify the rate that is active for the start date entered.
Multiplier	The % amount of the <i>Rate Amount</i> that the employee will actually be paid. This typically corresponds to the contract FTE.
Actual Pay	The <i>Rate Amount</i> x the <i>Multiplier</i> i.e. • Multiplier = 1: the employee will receive the full amount of the salary / rate of pay • Multiplier < 1: the employee's actual salary / rate of pay will be pro-rated to ensure that they only receive the reduced amount of the salary as required. • Multiplier = 0: the actual salary / rate of pay will be 0.
Status	Approved - the salary is fully approved and available to payroll to process. Pending - only relevant if using Salary Approvals. Will display as <i>Pending</i> if approval is required but no approver has taken any action yet. In Approval - only relevant if using Salary Approvals. Will display as <i>In Approval</i> if one or more but not all salary approvers have Approved the salary. Rejected - only relevant if using Salary Approvals. Will display as <i>Rejected</i> if the salary has been rejected at any stage in the approval process.

Option	Details
	Future - fully approved but the effective date is greater than today.
Reason	Defaults to the contract <i>Reason</i> for the initial salary record that is created on contract creation i.e. the <i>Reason</i> supplied during the New Hire, New Contract, or Rehire process. For all other salary changes, the <i>Reason</i> will be directly input by the HR Administrator when creating the Salary Amendment e.g. Change of Hours, Contract Amendment etc.

3.4.2. Allowances Tab

The Allowances tab allows you to view and manage the employee's recurring allowances. Any allowances that already exists for the contract are displayed here including any active, ended, future ended or future starting allowances.

Full guidance on how to use this screen to manage allowances is covered in the **Managing Allowances** user guide.

The **Allowances** screen contains the following fields:

Option	Details
Approval Status	Use the dropdown options to filter the display by approval status. Options available:

Option	Details
	• All • Approved • Rejected
Filter	The filter option allows for the list to be updated based on: • Open Status • Start Date From/To • End Date From/To
Appointment	This is the employee's appointment.
Allowance	The actual allowance that has been selected from a preconfigured list of allowances on PeopleXD.
Start Date	The date that the allowance payments will start from. This date must be equal to or greater than the contract start date. This does not need to match or correlate with any other salary amendments made for the contract.
End Date	This is an optional field. If recorded, this is the last date that the allowance payments will be calculated to. If this is blank, the allowance will continue to be calculated for every payroll run as long as the contract is active for the employee. Ending a contract will automatically apply this End Date.
Type	The type of allowance based on the Allowance selected. Options available: • Standard • Percentage • Scale Point • Negative
Value	This is the actual value amount for the allowance, taking the <i>Multiplier</i> on the Salary into consideration i.e. • If the value recorded on allowance creation is 25 and the Pay Multiplier is 1, this will display 25.

Option	Details
	If the value recorded on allowance creation is 25 and the Pay Multiplier is 0.5, this will display 12.50.
Status	Whether the allowance is Approved, Pending, In Approval, Rejected, Future, Ended. - If Salary Approvals is not in use, all allowances are automatically created as “Approved”. - If Salary Approvals is in use, allowances will be created as “Pending” and must be either Approved or Rejected by nominated approvers.

3.4.3. Increment History Tab

The *Increment History* tab allows you to view and manage the increment process for the employee's salary.

The screenshot displays the 'Aimee Forster (000251)' employee record. The breadcrumb trail shows 'People Management > Employee Search > Aimee Forster (000251)'. The employee's profile includes a photo with initials 'AF', a status of 'Active', a role of 'Administrator', and a start date of '18-Mar-2021'. There are two payroll status indicators: 'Payroll Active' (green) and 'Payroll Closed for Processing' (red). The left sidebar contains a search bar and a list of tabs: Key Information, Contact Information, Contracts, Current Salary (selected), Files, User Defined Data, Cost Allocations, and Release. The main content area has three sub-tabs: 'Current Salary', 'Allowances', and 'Increment History' (selected). Under 'Increment History', there is a 'Next Increment' section with columns for 'Increment Due Date', 'Comments', and 'On Hold'. Below this is an 'Increment History' table with columns for 'Increment Due Date', 'Comments', 'Date / Time Created', and 'Created By'. An 'ADD' button is located at the bottom right of the table area.

3.5. Pension Contributions

The Pension Contributions tab provides access to manage the Pension Schemes assigned to the employee's contract. This is only relevant if using the *Pension by Appointment* feature on PeopleXD.

People Management: Employee Record – User Guide

For further guidance see the [Pension by Appointment user guide](#).

The screenshot shows the employee record for Alice Jones (000013). The breadcrumb trail is "People Management > Employee Search > Alice Jones (000013)". The employee's status is "Active", role is "Administrator", and start date is "31-Aug-2020". There are two payroll status indicators: "Payroll Active" (green) and "Payroll Closed for Processing" (red). On the left, a sidebar menu includes "Tax Details", "Probation Details", "Change Work Schedule", "Manager", "Talent Pool", "Payroll Instructional Forms", and "Pension Contributions" (which is highlighted). The main area is divided into "Available" and "Assigned" sections, both with search bars. The "Assigned" section has a table with columns "100 St...", "Start D...", and "End Dat...", and an "EDIT" button.

3.6. Deductions

It is not possible to add Deductions in People Management. This screen displays deductions that have been added for the employee via the Payroll Dashboard.

The screenshot shows the employee record for Peter Thompson (000139). The breadcrumb trail is "People Management > Employee Search > Peter Thompson (000139)". The employee's status is "Active", role is "Accountant", and start date is "01-Feb-2019". The payroll status is "Payroll Status: Open for Processing" (green). On the left, a sidebar menu includes "Contracts", "Key Information", "Manager", "Current Salary", "Pension Contributions", and "Deductions" (which is highlighted with a red box). The main area shows a table of deductions with the following data:

Description	Starts On	Until	Value	Paid to date	Balance
Give As You Earn	01-Feb-2019	14-Feb-2019	5	0	0
Car Park	11-Feb-2019		10	0	0

The "corehr" logo is visible at the bottom right.

3.7. Cost Allocations

The Cost Allocations tab provides access to view and manage the Cost Allocations assigned to the employee's contract.

Cost Allocations can be created for an employee's contract in one of two ways:

- Inherited directly from Post Profile Cost Allocations.
 - Only applicable for planned and authorised Post Appointments.
 - Not applicable for *Auto Authorised* or *Auto Commenced* Post Profiles.
- Created directly on the Contract/Post Appointment, independent of any Post Profile.
 - Applicable for all contracts.

For further guidance see the [Cost Allocations user guide](#).

The screenshot displays the 'Peter Thompson (000139)' employee record. The 'Accountant' dropdown menu is highlighted with a red arrow. The 'Cost Allocations' tab is selected and highlighted with a red box. The table below shows two cost allocations for the date 01-Mar-2019.

Date	Cost Centre	Project	Expense	Percentage
01-Mar-2019	Default 1	Training 2		40%
	Default 1	Project Delivery 7		60%

3.8. User Defined Data

The User Defined Data tab provides access to view and manage the UDFs that are assigned to the employee and their contract records. If any UDFs are contract specific, the ones displayed are based on the contract selected in the contract list.

User Defined Fields (UDFs) are used to hold data on PeopleXD where the system doesn't provide this as standard. These would typically be items that are specific to an individual organisation and will differ from company to company.

For further guidance see the [User Defined Field Data user guide](#).

3.9. Files

The Files tab provides access to view, manage and upload documents for the employee and their contracts, including documents that have been:

- Generated by the 'Document and Email Generation' functionality.
- Uploaded by employees.
- Uploaded by managers.

If the document has been uploaded for a specific contract, you will need to select the contract from the contract list to see this on screen.

For further guidance see the [Employee Files user guide](#).

3.10. Probation Details

The Probation Details tab provides access to view and manage the probation expiry details, for the employee contract selected. Probation dates can be captured on PeopleXD in two ways:

- Directly input on to the employee's contract.
- Automatically set using Terms and Conditions.

For further guidance see the [Probation Dates user guide](#).

access PeopleXD SAVE

The **Probation** screen contains the following fields:

Option	Details
Probation Expiry Date	The actual date that the probation is planned to expire e.g. 6 months after the contract start date. Select from the calendar or enter in format DD/MM/YYYY.
Review Date 1	Used to track the date of a probation review point. Select from the calendar or enter in format DD/MM/YYYY.
Review Date 2	Used to track the date of an additional probation review point. Select from the calendar or enter in format DD/MM/YYYY.
Probation Extension Date	Used to track the date that the probation period has been extended to. Select from the calendar or enter in format DD/MM/YYYY.
Extension Reason	Select from a predefined list of extension reasons.
Probation Completion Date	Used to track the actual probation completion date of a probation period, where this has been extended. Select from the calendar or enter in format DD/MM/YYYY.

3.11. Contact Information

The Contact Information tab provides access to view and manage contact information for the employee. This data is recorded at Person level, therefore it will remain the same if the contract is update from the dropdown list, as it is not tied to the contract.

3.12. Notice Period

Notice Periods can be configured, assigned, and maintained in several ways within PeopleXD:

- Notice Period Rules Configuration
- Terms & Conditions
- Employee Record

Within the employee record, notice periods can be entered and maintained by HR administrators, irrespective of how they have been assigned. For example, if the employee has not had any T&Cs notice periods cascaded down to them, then HR administrators can manually enter them on the employee record. Similarly, if the employee has had notice periods cascaded down to them via the T&Cs process, HR administrators can update them as required.

Note: Any updates to notice periods the employee record would not cascade up and impact the T&Cs template applied.

For further guidance see the [Notice Periods user guide](#).

The **Notice Periods** screen contains the following fields:

Field	Details
Employee Notice Period Type	Select the relevant employee notice type from the dropdown list. Options available are Days, Weeks, Months, Years or Length of Service.
Employee Notice Period	Enter the applicable notice period e.g., 2
Employer Notice Period Type	Select the relevant employer notice type from the dropdown list. Options available are Days, Weeks, Months, Years or Length of Service.
Employer Notice Period	Enter the applicable notice period e.g., 2

Note: If Length of Service is selected as the Employee/Employer Notice Period Type, no notice period is required.

3.13. Docusign

The Docusign tab allows you to send a document to an employee that they can review and sign via DocuSign e.g. Contract of Employment. The screen displays details of all documents / templates sent.

There are 2 ways to send a document to an employee:

Sending a Document

- This allows you to send an already completed document located on their local/network drive etc to an employee.
- When the user invokes this process, DocuSign will open, and the user can add the Signature Required field to the Document, before sending it to the employee.
- The employee's email address as stored in their PeopleXD employee record (Contact Type EMAIL) will be passed to DocuSign as part of this process which will then be used to send the document to.

Sending a Template

- Pre-defined Templates can be created in DocuSign which contain most of the text/information e.g. Contract of Employment for Job Role A, Contract of Employment for Job Role B.
- PeopleXD fields can be added to these templates in DocuSign meaning that when the process is initiated in PeopleXD the employee's information is merged into the Document in DocuSign automatically e.g. Name, Job Role, Salary, Hours.
- When the user invokes this process, DocuSign will open, and the user can review this Document before they send it to the employee.
- The employee's email address as stored in their PeopleXD employee record will be passed to DocuSign as part of this process which will then be used to send the document to.

For further guidance see the [DocuSign Integration user guide](#).

3.14. Payroll Instructional Forms

A Payroll Instructional Form is a method of communication that is sent to Payroll directly from HR in terms of details that are going to affect the employee's payroll record once processed.

Examples of these may include:

- Balance adjustments needed for holidays owed to an employee.
- Outstanding student loan payments.
- PAYE / Tax Code changes.
- Holiday/Average Pay calculations.
- Hours (i.e. Overtime).
- Ad hoc Payments (i.e. Bonuses & once off payments).
- Pension changes.

The Payroll Instructional Forms tab allows you to view all Payroll instructional forms and their statuses.

Contact Information

Demobilisation Date

Planned Demobilisation Date

access PeopleXD

SAVE

Note: This date is recorded for the employee at 'Person' level and not 'Contract' level i.e. if the contract is update in the dropdown list, this same date will display as it is not tied to the contract.

3.16. Application Details

The Application Details tab is applicable only if the employee record was created from an applicant record in *Recruitment* i.e. the new hire process was completed using the *Successful Applicant* feature. If this is the case, clicking on this option will display the *Applicant Details* screen from Recruitment.

Note: The HR administrator's access to the elements on this window can be restricted using Recruitment menu options.

If the employee's contract was not set up on PeopleXD as a successful applicant, clicking on this option will not open a window and the following message will display: *"The employee does not have any application details linked to their profile."*

3.17. Task List

The **Task List** tab only displays if an incomplete task list exists for the selected contract. The screen displays all tasks required, their type and status. The Task List tab will always default to the first tab in the left-hand menu, if applicable.

Task Lists are used to define a set of steps that must be completed as part of a New Starter, New Contract, Additional Contract, Rehire or Leaver process.

Once a new contract has been assigned to an employee as part of the new hire, rehire or new contract steps on People Management, the task list pops up on screen. This presents the user with a list of mandatory steps to be completed. The user can then click on a step and be redirected to the screen required to input the data e.g. if the step is 'Allowances', clicking on this opens the 'Add Allowances' screen.

Different task lists can be created for each process type.

For further guidance see the [Configuring Task Lists user guide](#).

The screenshot displays the employee record for Alice Jones (000278) in the People Management system. The breadcrumb trail is 'People Management > Employee Search > Alice Jones (000278)'. The employee's profile shows a purple circle with 'AJ', an 'Active' status, the role of 'Administrator', and a 'Start Date 15-Aug-2022'. There are also status indicators for 'Payroll Active' and 'Payroll Open for Processing'. A search bar is present. On the left, a sidebar menu includes 'Task List - Re-hire' (highlighted), 'Key Information', 'Contact Information', and 'Contracts'. The main 'Task List' section has a table with columns: Title, Nominated Task Owner, Completed By, Date Completed, and Status. One task is listed: 'Badge Details' with 'Head Of Department' as the owner and 'Company' as the completed by. The status is 'Pending' with a 'VIEW' link.

Title	Nominated Task Owner	Completed By	Date Completed	Status
Badge Details	Head Of Department	Company		Pending VIEW

3.18. Talent Pool

Talent Pools and Talent Pool Categories can be configured in Recruitment, as per an organisation's requirement to define and group a set of employee or applicants. Employees can be added to these Talent Pools in HR Admin, from a given Date Added. An employee can be a member of many Talent Pools if required.

Talent Pools are also available in Recruitment. If an employee applies for a vacancy on Recruitment, an applicant record is created for them. If that employee is a member of a Talent Pool, that will display in the relevant Talent Pool options in Recruitment for the recruitment administrators to review.

Talent Pools are managed at Person level on the system i.e. they are directly associated with an employee or applicant record and not linked to a Post Appointment/Contract.

4. Workforce Management Tabs

The following tabs in the employee record provide key Workforce Management screens to HR Administrators so key tasks can be completed for employees in a central location rather than jumping between multiple screens to maintain employee details.

See the [Person Maintenance user guide](#) for further guidance.

4.1. Balances

The *Balances* tab allows you to view the balance assigned to the employee. This displays all active balances assigned to the employee with transactions relating to the selected balance at the bottom section of the screen.

If configured, users can also view inactive balances which means a new balance can be assigned to the employee directly from this screen.

The screenshot displays the 'Balances' tab for employee Brian StJohn (7203000055). The interface includes a sidebar with navigation options: Search, Files, Onboarding, Probation Details, Balances (selected), and Change Work Schedule. The top header shows the employee's name, ID, and status (Active). The main content area features a table of balances and a section for transactions.

Balance	Entitlement Period	Type	Appoin...	Status	Allowa...	Carried...	Taken	Booked	Balanc...
Annual Leave 7203 - Carry Forward	01-Jan-2024 to 30-Dec-2024	Days			15.00	5.00	0.00	0.00	20.00

Transactions for Annual Leave 7203 - Carry Forward

Date	Description	Reserved	Floating	Accrued	Carried	Taken	Balance
------	-------------	----------	----------	---------	---------	-------	---------

The screen can be filtered using the following options:

Option	Details
Active	Filter the display by Active or Inactive balances.
This Appointment Only	Enable to display active/inactive balances for this appointment only.

The **Balances** screen contains the following fields:

Field	Details
Balance	The balance name.
Open Period	The current period.
Type	The type of balance e.g., days.
Appointment	The appointment the balance is assigned to.
Allowance	The users balance allowance for the current period.
Carried Over	The carried over balance to the current period.
Taken	The balances taken for the current period.
Balance	The total balance available for the current period.
Booked	Booked balances not yet taken.
Balance + Booked	The total remaining balance for the current period.
Delete	You can delete a balance from the 3-dot menu.

4.2. Change Work Schedule

The Change Work Schedule tab provides access to view or update the employee's shift type assignments, for Workforce Management purposes. The screen shows the shift attached to an employee in the current period, with the ability to assign the employee a new shift or to view the shifts details.

The *Change Work Schedule* screen displays the following information, for the employee, at the top of the screen:

- Employee Contract Hours
- Standard Hours
- FTE Hours

Date Effective	The date the shift is effective from.
Type	The shift type. A shift is either cycle or period based. Where it is period based, the cycle option is disabled.
Cycle Start Seq.	Select a shift row sequence from the dropdown options.

4.3. Team Area Assignment

The *Team Area Assignment* tab allows you to view and manage an employee's Team Area. Team Areas are used for Roster, it's similar to work groups, for someone to appear on Roster, you would assign them to a team area, and they would then show under that team area on Roster.

If you don't have Roster setup on your system, this won't be populated. The Team Area column is hardcoded and can't be removed.

By default the employee's current Team area will display.

The screen can be filtered using the following options:

Option	Details
Search Leave Types	Search for a specific leave type.
Filter	Refine the absences displayed by: - Pay Code - Recurrence Id

The **Absence** screen contains the following fields:

Field	Details
Pay Code	The pay code associated with the absence.
Start Date	The start date of the absence.
End Date	The end date of the absence.
Days	The length of the absence in days.
AM/PM	Displays A or P if the absence recorded has been created as a part day.
Hours	The absence taken in hours.
Weeks	The absence taken in weeks.
Num Docs	Displays if the number of supporting documents attached.
Recurring Id	This relates to Recurring Absences only. It will display a number which links all related recurring absences to the original.
Delete Absence	You can delete an absence from the 3-dot menu.

4.5. Person Settings

The Person Settings screen is broken out into five tabs: Employee Settings, Working Time Directive, Bradford Factor, Extra Hours Recoding and Bonus Override.

4.5.1. Employee Settings

The Employee Settings screen displays settings that can be configured at an employee level.

The screenshot displays the 'Employee Settings' interface for the user Brian StJohn (7203000055). At the top, there's a header with the user's name and ID, a breadcrumb trail (People Management > Employee Search > Brian StJohn (7203000055)), and an 'ACTIONS' button. Below the header, a profile card shows the user's initials 'BS', status 'Active', role 'Development Team Lead 7203', start date '02-Jan-2016', and payroll status 'Payroll Active' and 'Payroll Open for Processing'. The main content area has a tabbed interface with 'Employee Settings' selected. Under 'General Settings', there are toggle switches for 'Generate Overtime' (on), 'Maintain Clockings' (on), 'Site Status' (off), and 'Interface External Hours' (off). Under 'Advanced Settings', there are dropdown menus for 'Productivity Code', 'Overtime Paycode', and 'Basic Paycode'. A sidebar on the left contains a search bar and a list of navigation items, with 'Person Settings' highlighted at the bottom.

The **General Settings** section contains the following fields:

Field	Details
Generate Overtime	If enabled, this will allow approved overtime to be generated for the employee. If turned off, no overtime will be generated.
Maintain Clockings	If enabled, this allows the employees clockings to be maintained through Time Record and Maintain Pay Codes/Hours.
Site Status	Indicates if the employee is off or on-site.
Interface External Hours	Checks if hours are to be interfaced from an external source.

The **Advanced Settings** section contains the following fields:

Field	Details
Productivity Code	To set an employee up on Productivity Payments, a Productivity Code must be entered here.
Overtime Paycode	Overrides the default OT Pay Code on the Work Group, which is set up with Default Payroll Hours of 39.
Basic Paycode	Overrides the default basic pay code on the Work Group, which is set up with Default Payroll Hours of 39.
Balance Paycode	The pay code that will be used by the calculation program to create a balance when used with 'effect basic' absence pay codes.
Ignore Overtime Rule	Enable to specify that this employee is not to be included in the generate timesheets overtime rule.
Disallow Business Absence	Enable to specify that this employee is not allowed to use business absence.
Banked Overtime Percentage	If using Banked Overtime balance, specify a value to override the banked percentage on the shift.
Ignore View Roster	Enable to exclude this employee from the view roster option (ESS).
Generate Job Hours	Enable to generate job hours for this employee.
Ignore Hold/Arrears in RFA	Enable to not automatically generate hold and arrears periods in recoded future absence.

Field	Details
Disallow Early Out Tolerance	Enable to specify that this employee is not allowed early out graces.
Disallow Late Tolerance	Enable to specify that this employee is not allowed late graces.

The **Rostering** section contains the following fields:

Field	Details
Restrict Employee Cost	If enabled, the employee's costs are hidden.
Roster Attribute Group	Select from the dropdown list the relevant Roster Attribute Group.
Exclude this person from validation when publishing roster	If enabled, this will allow the user to exclude contract hours validation when publishing this team, based on a Team or Specific Employee.
Enable Functionality	Allows you to override the default Roster Contract Work Day at Person Level. The days can then be picked up as part of the Unrostered Bookings and override the company settings. Select from the dropdown options: • Yes – enables the functionality and allows you to select the contracted days to override. • No – disable the functionality • Default to Company – uses company as default.
Contract Hours per week	Once enabled, select the contracted days you want to override e.g., Contracted Monday, Contracted Wednesday etc.

 **Note:** The screen will only be displayed if the Unrostered Booking functionality is switched on and the Control Parameters assigned against the Company. See the parameter in the table below.

Screen	Parameter
Unrostered Booking	ct_param.allow_contracted_work_days = 'Y'

The ***Timesheet Threshold*** section contains the following fields:

Field	Details
Enable Timesheet Threshold Balance Functionality	Select Yes/ No to apply timesheet thresholds balance to this person or default to work group setting.
Employee Contract Hours for Threshold Value	Use Contract or FTE hours from post history / Person Record (if no using Threshold hours) or default to work group setting.
Threshold Hours Value	Enter a value for threshold hours (if not using employee contract hours) or leave null to default to company setting – this field isn't editable when the FTE or Contracts hours are selected for the "employee contract hours for threshold value".
Threshold Impacting Pay Code Group	Enter a pay code group to sum against threshold hours or leave null to default to company setting.
Threshold Balance Code	Enter the balance code to apply any surplus hours to or leave null to default to company settings.
Threshold Excess Payroll Contra Pay Code	Enter the pay code at which any negative adjustments are written to payroll or leave null to default to company setting.

4.5.2. Working Time Directive

The Working Time Directive (WTD) screen displays which WTD Group is attached to the employee and allows the administrator to define the type of worker and what the rule is based on.

If you switch between the average hours and pattern hours, the WTD scores recalculate. If you change the dates, the WTD recalculates based on the new period date range.

The **Working Time Directive** screen contains the following fields:

Field	Details
Working Time Group	The Working Time Group is set up within the System Params Working Time Parameters form. The employee must be attached to a group.
Worker Type	The Worker Type indicates what rules should be applied for the employee e.g. Day Worker, Night Worker, Hazardous Night Worker.
Average Hours	Enable if the working time directive is to be based on Average Hours.
Pattern Hours	Enable if the working time directive is to be based on Pattern Hours.
From/To Period	Select the From and To period the WTD is to cover.
Average Hours	If you switch between the average hours and pattern hours, the WTD scores recalculate. If you change the dates, the WTD recalculates based on the new period date range.
Hours Allowed to Work	If you switch between the average hours and pattern hours, the WTD scores recalculate. If you change the dates, the WTD recalculates based on the new period date range.

The Working Time Agreement History screen is accessed by clicking the **Agreement History** button within the WTD screen. The screen displays details of all active Agreements.

4.5.3. Bradford Factor

The Bradford factor is a tool which a manager can use to track an employee's absences. This tab shows a manager what the Bradford factor score is for an employee.

The Bradford factor is used to calculate an employee's Bradford factor score $B = S^2 \times D$ where:

- **S** = total number of spells (instances) of absence for that individual in the given period.
- **D** = total number of days the individual was absent during the given period.

Managers can specify their predefined Bradford factor rule. This will then calculate the Bradford Factor Score against an employee. Once the user calculates the score the details display on screen.

The screenshot shows the 'Bradford Factor' tab for employee Brian StJohn (7203000055). The interface includes a sidebar with navigation options like Demobilisation Date, Pay Code Access Groups, Team Area Assignments, Payroll Instructional Forms, Absences, Contact Information, and Person Settings. The main content area displays the Bradford Factor settings, including the Bradford Enquiry Rule (Bradford Factor), Current Rule Code (BF), Current Rule Name (Bradford Factor), Rolling Period (202344), Start Date (24-Oct-2022), End Date (05-Nov-2023), and Rolling Weeks. A 'CALCULATE' button is visible at the bottom right.

4.5.4. Extra Hours Recoding

The *Extra Hours Recoding* screen allows administrators to select a pay code, against the balance, to recode extra hours for an employee on their timesheet.
