1. Overview

The purpose of this user guide is to provide guidance on how to create and manage the Post Profile records on PeopleXD, that will form the basis of every Post Appointment / Contract that is created for every employee on the system.

The aim of this is to ensure that the HR administrator will have an up to date list of all of the posts that are currently available in the system on People Management, which may be selected when:

- Creating a new starter.
- Awarding a promotion or additional contract.
- Rehiring an employee.

Those contracts will be created from the Post Profile records, inheriting predefined information such as the Post Title, Department, Pay Scale etc.

Posts will also be available to managers & recruitment administrators as part of the Staff Requests and Recruitment processes. These will be associated with a vacancy and ultimately be used to create the successful applicant's Post Appointment / Contract as an employee.

2. Post Management Widget

All Post Management activities are available within and completed via the *Post Management* widget.

To access this:

1. Quick jump to the *Post Management* widget on the *People Management* dashboard.

2. The Post Management widget appears on screen. The image and table below shows the options available to use.

Item	Description
Institute Codes	Set up and manage the institute code reference data. These are used within the Professional Bodies and Qualifications screen.
Terms & Conditions Setup	Set up and manage Terms and Conditions profiles.
Post Profile Maintenance	Set up and manage Post Profile records.
View Post Appointments	View and update employee contract records.
Post Management Parameters	Advanced settings that control Post Management on PeopleXD. <i>These items are advanced system features which should not be shared with all users and should be used with caution.</i>
Structure Setup	Set up and manage organisational hierarchy

3. To continue viewing data or to configure the system further, click **Open** for each item.

3. Post Profile Maintenance

3.1. Where to Access Post Profiles

1. On the *Post Management* widget, click **Open**.
2. The Post Profile Maintenance screen opens.

3. This screen allows you to do the following:
 - a. Search for existing Post Profiles.
 - b. Update existing Post Profiles.
 - c. Add new Post Profiles.

The table below outlines the items shown on screen:

Item	Description
Search Posts	Search posts by post number or title.
Status Filter	Filter for All, Active, or Dormant posts.
Create Posts	Set up a new post profile.
Post Filter	Apply advanced filters.
Post No.	Unique identifier automatically assigned to the record on save.

Item	Description
Title	The title for the position / job.
FTE	This is the FTE value that is specified on the Post Profile record.
Active FTE	This is the total active headcount for all current active Post Appointment records for this Post Profile.
Type	Whether the post is permanent, fixed term etc.
Department	The department associated with the position.
Pay Scale	The default Pay Scale associated with the position.
Date Effective	The date from which all contracts can be created from. Post Appointment dates must be on or after this date.
Authorised Status	Whether the post is Auto-Authorised, Auto-Commenced, etc.
View	View details for the post profile.

3.2. Post Profile Filter

Filter options are available on by clicking the Post Filter button. The Post Profile Filter screen is broken into two sections:

1. Post Details: In this section, you can filter on the following items:
 - a. Post Type
 - b. Auto Commenced
 - c. Auto Authorised
 - d. Authorised
 - e. Post Category
 - f. Post Sub Category
 - g. Post Pay Scale
2. Hierarchy Details & Non-Hierarchy Details: In this section you can filter on the following items, based on your organisation's hierarchy configuration.
 - a. Structure
 - b. Company
 - c. Management Unit
 - d. Department

- e. Team
- f. Division
- g. Cost Centre
- h. Location
- i. Work Group

To complete a search on a filter, enter selection criteria e.g. Post Title, Department etc and click **Apply**.

Note: Searching without any selection criteria is not recommended if there is a very large number of Post Profile records on the system, as this can take longer to return records.

3.3. Viewing Post Profile Details

To view the details for a Post Profile, follow the below steps.

1. Click **View** on the corresponding Post No.
2. The *Edit Post* screen opens.

← Post Profile Maintenance KS

Edit Post - 730617

The following table shows the sections that the *Edit Post* screen is split into:

Section	Details
Organisational Structure	The organisational hierarchy that the post is created for. The fields available here is dependent on how the hierarchy has been defined for an organisation.
Post Details	Summary details for the post, for example, post title and effective date.
Cost Allocations	Define cost allocations at post profile level.
Pension Scheme	Link pension schemes to a post profile.  Note: This section is only applicable if the organisation is managing Pension Schemes in a 'Pension by Appointment' scenario. This is not applicable for 'Pension by Employee' scenarios, which are handled in Payroll.
FTE Maintenance	Manage the sanctioned or budgeted headcount for the post.
View Appointments	View employee contracts linked to the post.
Terms and Conditions	Select the required Terms and Conditions for the post. See <i>Terms and Conditions – User Guide</i> for more information.
User Defined Fields	Any Post Profile UDFs will appear as tabs at the end of the list. These tabs are used to configure UDFs for the post, in order to capture additional details required at a Post Profile level. See <i>User Defined Field Data – User Guide</i> for more information.

3.3.1. Organisational Structure

The fields available here and the order in which they are displayed is dependent on how the hierarchy has been defined for an organisation. i.e.

1. Structure
2. Company
3. Management Unit
4. Department
5. Team
6. Division
7. Cost Centre

- 8. Location
- 9. Work Group

3.3.2. Post Details

The table below outlines the data stored within this section:

Field	Description	Mandatory
Effective Date	The date from which all contracts can be created from. Post Appointment dates must be on or after this date.	Yes
Post Title	The title for the position / job.	Yes
Post Profile Type	Whether the post is permanent, fixed term etc	Yes
Post Number	Unique identifier automatically assigned to the record on save.	Automatically Generated
Job Description	Memo field to capture additional details re the Job Description. May be auto populated if 'Job Title Entitlement' details are captured for the chosen Post Title.	No
Auto Authorised	If the post will be <i>Auto Authorised</i> .	No
Auto Commenced	If the post will be <i>Auto Commenced</i> .	No
Pay Scale	The default Pay Scale associated with the position.	Yes
FTE	The headcount that has been budgeted for the position	Yes
Comments	Memo field to capture additional free text comments related to the Post.	No
Category	A predefined list of values that can be used to categorise the Post Profile & corresponding Post Appointment records.	No
Sub Category	A predefined list of values that can be used to further categorise the Post Profile & corresponding Post Appointment records.	No
Hours	The standard hours for contracts for this position. This is memo only and does not show on the Post Appointment.	No

Field	Description	Mandatory
Funding Expiry	The date on which funding specified for the Post will expire. This is memo only and does not show on the Post Appointment.	No
Requisition Number	This will be automatically populated with an ID if the Post was created as part of a Staff Request. Another non-PeopleXD requisition number may be input if required.	No
Estimated Annual Cost	The estimated annual cost for the Post. This is memo only and does not show on the Post Appointment.	No
Analysis Code	Analysis codes may be used to further categorise Post Profile records if required for reporting purposes.	No
Report To Post	It is possible to configure reporting a relationship between posts i.e. Post A reports to Post B. This may only be used if the Post Profile: Post Appointment relationship is 1:1. This is completely separate to the standard PeopleXD Reporting To Structure and is not linked in any way to the HR 'Reporting To' configuration, which is managed via Org Roles.	No
Substitution Post	Can be used to track a Post Profile record that is considered to be a substitution for the current Post Profile.	No

3.3.3. Cost Allocations

This allows you to create Cost Allocations linked to a Post Profile. The creation of Post Cost Allocations is covered in [Managing Post Cost Centre Allocations](#).

3.3.4. Pension Schemes

This allows you to link Pension Schemes to a Post Profile. This is covered in [Managing Post Pension Schemes](#).

3.3.5. FTE Maintenance

This allows you to manage the sanctioned or budgeted headcount for the post. This is covered in [FTE Maintenance](#).

3.3.6. View Appointments

View details for employee contracts linked to the post, i.e.

1. Post Number
2. Sequence
3. Appointment Status
4. Job Title
5. Person
6. Start Date
7. End Date
8. Reason
9. FTE

Click **View** for the relevant employee to be taken to their full employee record.

3.3.7. Terms and Conditions

To select the required Terms and Conditions for the post:

1. Search for the Terms and Conditions.
2. Click **Select** against the relevant option.
3. Click **Yes** on the confirmation pop-up.
4. Amend the details if required.
5. Click **Save**.

For more information on setting up Terms and Conditions, see *Terms and Conditions – User Guide*.

4. Add a New Post Profile

4.1. Add a New Post Profile

To create a new Post Profile:

1. Quick jump to the *Post Management* widget on the *People Management* dashboard.
2. Open *Post Profile Maintenance*.
3. Click **Create Post**.

The *Post Profile Wizard* screen opens.

4. Update the Organisational Structure by selecting the relevant option from each dropdown.
5. Click **Next**.
6. Update the Post Details:

- Effective Date*

Be aware that any contracts created for this Post Profile cannot have a start date earlier than the date set here.

- Post Title*
- Post Type*
- Job Description
- Auto Authorised/Auto Commenced

If neither option is ticked, this will be a 'non-auto' Post Profile i.e. all Post Appointments created from this will need to be Planned & Authorised. The Post itself will not appear immediately in People Management.

- Pay Scale*
- FTE*
- Comments
- Category
- Sub Category
- Standard Hours
- Additional Details

 **Note:** The fields listed are for guidance only. Mandatory fields are indicated with a *. When creating a Post Profile, additional fields may be required / considered to be mandatory depending on each organisation's requirements.

7. Click **Save** to save the new Post Profile record. The *Post Number* and *Post Status* field are automatically updated.

This Post Profile is now active on PeopleXD and may be used to generate employee contracts.

5. Edit an Existing Post Profile

5.1. How to Edit a Post Profile

To edit an existing Post Profile:

1. Quick jump to the *Post Management* widget on the *People Management* dashboard.
2. Open *Post Profile Maintenance*.
3. Use the search and filters to narrow the results for the required Post Profile e.g. Post Title, Post Number etc.
4. Click **View** on the relevant on the Post Profile row to open the *Edit Post* screen.
5. Edit any fields as required. See restrictions below.
6. Click **Save**.

5.2. Restrictions when Editing a Post Profile record

The following fields cannot be directly edited by the user on this screen:

- Post Number. This can never be amended by the user as it is a system derived unique ID for the record.
- FTE. See [4.5 Updating the Post FTE](#)

The ability to edit the Organisational Structure fields is dependent on the status of Post Appointments / Contracts created for the Post Profile. For example:

- **No Post Appointments / Contracts**
 - If there are no Post Appointments / Contracts created against this Post Profile, all fields will be editable.
- **Post Appointments / Contracts Exist**
 - If there are Post Appointments / Contracts created against this Post Profile, the 'locked hierarchy' fields will not be editable.
 - Other non-locked hierarchy fields will be editable including: Work Group; Cost Centre; Location; User Field 1 – User Field 5.

5.2.1. Impact on Existing Post Appointment / Contracts

If a Post Profile is edited, this will not have an impact on any existing active or historic Post Appointments / Contracts created from that Post Profile.

For example, if the Cost Centre was edited, this would not be updated on any existing active or historic Post Appointments / Contracts created from that Post Profile. However, any future contracts to be created from that Post Profile will now inherit the latest update for that field.

5.3. Make a Post Dormant

Making a Post Profile 'Dormant' will ensure that the Post is no longer available for selection to users on the People Management dashboard. Therefore, it will not be possible to create new Post Appointments / Contracts against this Post Profile. All historic Post Appointment records will remain unaffected by this.

Note:

The 'Active FTE' for the Post Profile must be 0. This implies that there are no open active contracts for employees against that record. If this is more than 0, it will not be possible to make the Post Profile dormant.

To make a Post Profile dormant:

1. Quick jump to the *Post Management* widget on the *People Management* dashboard.
2. Open *Post Profile Maintenance*.
3. Use the search and filters to narrow the results for the required Post Profile e.g. Post Title, Post Number etc.
4. Click **View** on the relevant on the Post Profile row to open the *Edit Post* screen.
5. Click **Actions**, then **Make Post Dormant**.
The *Make Post Dormant* pop-up opens.
6. Enter the *Effective Date* from which the Post Profile will be 'Dormant'.
7. Click **OK**.

5.4. Reactivate a Dormant Post

To reactivate a 'Dormant' Post Profile:

1. Quick jump to the *Post Management* widget on the *People Management* dashboard.
2. Open *Post Profile Maintenance*.
3. Use the search and filters to narrow the results for the required Post Profile e.g. Post Title, Post Number etc.

4. Click **View** on the relevant on the Post Profile row to open the *Edit Post* screen.
5. Click **Actions**, then **Reactivate Post**.

The *Activate Post* pop-up opens.

6. Enable the toggle.
7. Click **OK**.

The *Post Status* will immediately display as 'Active'.

 **Note:** The *Effective Date* will revert to the original *Effective Date* for the Post Profile i.e. the date that was captured prior to the post becoming dormant.

6. Managing Post Cost Centre Allocations

It is possible to define Cost Centre Allocations at Post Profile level on PeopleXD. This is not mandatory. If required, Cost Allocations may be directly entered on the specific Post Appointment / Contract. However, if the Cost Allocations are defined on the Post Profile, these will be inherited by all Post Appointments / Contracts that are created from it (subject to the specific allocation and contract dates).

6.1. Add Post Profile Cost Allocations

To add Cost Allocations to a Post Profile:

1. Open the to the *Edit Post* screen for the required Post Profile.
1. Click the **Cost Allocations** tab. This displays all existing Post Cost Allocations.
2. Click **Add**.
3. Enter the Start Date. This is mandatory, and cannot be earlier than the Post Profile Effective Date.
4. If required, Enter the End Date. This is optional and may be used to create a 'fixed term' cost allocation and will display as the *Funding Expiry Date* for an associated contract.
5. Click **Add**, and update each row per allocation. The following items can be captured per row on the allocation:
 - Cost Centre – this is mandatory for all rows
 - Project Code
 - Expense Code
 - Percentage
 - The % value for all rows entered on this screen must total 100% exactly.
 - You may have 1 row of 100% if required.
6. Click **Save**.

It is possible to add a number of Cost Allocations to a single Post Profile record. However, care needs to be taken to ensure that dates do not overlap. Please see [Cost Allocation Date Considerations](#) for further details on this.

6.2. Edit Existing Post Profile Cost Allocations

To edit an existing Post Profile Cost Allocation:

1. Open the to the *Edit Post* screen for the required Post Profile.
2. Click the **Cost Allocations** tab.
3. Click **Edit** from the three dot menu for the required Cost Allocation.
4. Edit the details of the Cost Allocation.
5. Add new allocation rows if required.
Remember the total % of all rows on the screen must equal 100% exactly.
6. Click **Save**.

Any amendments to the Cost Allocations will not impact existing Post Appointments / Contracts that have inherited the original allocation details. All future Post Appointments / Contracts for the Post Profile will now inherit the latest updates (subject to the dates chosen).

6.3. Delete Post Profile Cost Allocations

To delete a Post Profile Cost Allocation:

1. Open the to the *Edit Post* screen for the required Post Profile.
2. Click the **Cost Allocations** tab.
3. Click **Delete** from the three dot menu for the required Cost Allocation.
4. Click **Yes** on the confirmation pop-up.

Any amendments to the Cost Allocations will not impact on existing Post Appointments / Contracts that have inherited the original allocation details. All future Post Appointments / Contracts for the Post Profile will no longer inherit the Cost Allocation.

6.4. Cost Allocation Date Considerations

It is possible to have many different Cost Allocations for multiple periods, defined on the Post Profile. However, the cost allocation periods have to run chronologically and not concurrently.

Example 1:

- Cost Allocation exists with a Start Date of 1st January 2015.

- You attempt to enter a new Cost Allocation with a Start Date of 1st January 2016. This will not be permitted because an existing open-ended Cost Allocation exists.
- In order to create the new cost Allocation, the first allocation must be edited to include an End Date of 31st December 2015.

Example 2:

- Cost Allocation exists with a Start Date of 1st January 2015 and an End Date of 31st December 2015.
- You attempt to enter a new Cost Allocation with a Start Date of 1st November 2015. This will not be permitted because of the existing Cost Allocation defined for the period that includes 1st November 2015.
- To create that new allocation, you will be required to amend the end date of the existing allocation to 31st October 2015.

Example 3:

- Cost Allocation exists with a Start Date of 1st January 2015 and an End Date of 31st December 2015.
- You attempt to enter a new Cost Allocation with a Start Date of 1st April 2014 and an End Date of 31st March 2015. This will not be permitted because of the existing Cost Allocation defined for the period that includes January – March 2015.
- To create that new allocation, you will be required to amend the start date of the existing allocation to 1st April 2015.

 **Note:** The above scenarios are for illustrative purposes to highlight how the Start and End Dates of each allocation can directly impact other allocations. However, this is not an exhaustive set of examples, and users should only amend allocations based on actual business requirements and dates.

7. Managing Post Pension Schemes

Note: This section is only applicable if the organisation is managing Pension Schemes in a 'Pension by Appointment' scenario. This is not applicable for 'Pension by Employee' scenarios, which are handled in Payroll.

In order for a Pension Scheme to be linked to an employee's contract, the scheme must first be linked to the Post Profile. Only Pension Schemes that are linked to a Post Profile will be available in People Management to the user to select for the employee's Post Appointment / Contract.

7.1. Add a Post Pension Scheme

To add a Pension Scheme to a Post Profile:

1. Open the to the *Edit Post* screen for the required Post Profile.
2. Click the **Pension Schemes** tab.
3. Click **Add**.
4. Select the Pension Scheme code.
5. Enter a *Start Date* that the Pension Scheme is available from. This cannot be earlier than the Post Profile Effective Date. The start date for employee's Post Appointments / Contracts will be greater than or equal to this date.
6. Click **Save**.

7.2. End a Post Pension Scheme

To end a Pension Scheme on a Post Profile:

1. Open the to the *Edit Post* screen for the required Post Profile.
2. Click the **Pension Schemes** tab.
3. Click **Edit** for the relevant scheme and enter an *End Date*.
4. Click **Save**.

7.3. Delete a Post Pension Scheme

To delete a Pension Scheme from a Post Profile:

1. Open the to the *Edit Post* screen for the required Post Profile.
2. Click the **Pension Schemes** tab.
3. Click **Delete** on the relevant pension scheme.

8. FTE Maintenance

The Post FTE value is used to capture the sanctioned or budgeted headcount for a specific position in the organisation i.e. sign off has been provided for 2 IT Support Analysts for the IT Security department.

There are 2 options available when updating an FTE:

1. **Transfer FTE:** The FTE for the chosen Post Profile may be updated by taking from another existing Post Profile i.e. increase Post A by 1 by directly taking 1 FTE from Post B.
2. **Update FTE:** This is a straightforward addition or subtraction from the current FTE value without any further impact on another Post Profile's FTE.

8.1. Update FTE

To update the Post FTE:

1. Quick jump to the *Post Management* widget on the *People Management* dashboard.
2. Open *Post Profile Maintenance*.
3. Use the search and filters to narrow the results for the required Post Profile e.g. Post Title, Post Number etc.
4. Click **View** on the relevant on the Post Profile row to open the *Edit Post* screen.
5. Click **Actions**, then **Update FTE**.
The *Post Number* and *Current Post FTE* will auto populate with the current Post Profile details.
6. Enter an Effective Date. This is mandatory, and cannot be earlier than the Post Profile Effective Date.
7. Enter the amount that the FTE should be amended by i.e.
 - '1' (i.e. a positive value) will increase the current FTE by 1.
 - '-1' (i.e. a negative value) will decrease the current FTE by 1.
8. Enter an *Approved By* name / role. This is mandatory.
9. Enter comments. This is optional and can be used to track any other additional details for this action
10. Click **Save**.

The FTE will now reflect the changes.

8.2. Transfer FTE

Using this option implies that you will be transferring FTE headcount from the current Post Profile to another nominated Post Profile. In this instance, the current Post Profile will be decreased.

To update a Post FTE by directly giving to another Post Profile record:

1. Click **Actions**, then **Transfer FTE**.
2. Select the *Post Number* that the FTE will be given to.
3. Enter an *Effective Date*. This is mandatory, and cannot be earlier than the Post Profile Effective Date.
4. Enter the amount that the FTE should be amended by i.e.
 - '1' (i.e. a positive value) will decrease the *current* Post FTE by 1 AND this will increase the *Transfer* Post FTE by 1.
 - It is not possible to transfer a negative value i.e. value here must be >0.
5. Enter an *Approved By* name / role. This is mandatory.
6. Enter comments. This is optional and can be used to track any other additional details for this action.
7. Click **Save**.

The FTE will now reflect the changes.

9. Managing Post User Defined Fields

User Defined Fields (UDFs) can be configured for Post Profiles, in order to capture additional details required at a Post Profile level, where a suitable field does not already exist in PeopleXD. These UDFs are specific to each individual organisation. For details on how to configure the Post Profile UDFs, please see the *User Defined Field Data – User Guide*.

To access Post Profile UDFs:

1. Open the to the *Edit Post* screen for the required Post Profile.
2. Click the required UDF item from the tabs. All available UDFs will be listed after the **Terms and Conditions** tab.

9.1. Add a Post Profile UDF

To add a new Post Profile UDF:

1. Select the required UDF tab.
2. Click on **Add**.
3. Update the available fields, as required.
 - The fields displayed will be specific to the *User Defined Field* selected.
 - The fields may use a variety of input types e.g. alphanumeric, numeric, date or list, depending on how this has been configured for an implementation.
4. Click **Save**.

9.2. Edit an Existing Post Profile UDF

To edit an existing Post Profile UDF:

1. On the relevant tab, click **View/Edit** from the three dot menu on the required UDF record.
2. Edit any field on the screen as required.
3. Click **Save**.

9.3. Delete a Post Profile UDF

To delete an existing Post Profile UDF:

1. On the relevant tab, click **Delete** from the three dot menu on the required UDF record.
2. Click **Yes** on the confirmation pop-up.

10. View Post Appointments

The View Post Appointments screen allows you to view and update employee contract records.

To access this:

1. Quick jump to the *Post Management* widget on the *People Management* dashboard.
2. Click **Open** on View Post Appointments.

The table below outlines each item on screen:

Item	Description
Search Post Appointments	This allows you to search by Post Number or Job Title.
Post Filters	This allows you to search using other filters search as Appointment Status, Hierarchy Details and non-Hierarchy Details.
Post Number	This shows the post number.
Sequence	This shows the unique post sequence.
Appointment Status	This shows the appointment status of each Post Appointment.
Job Title	This show the specific Job Title of the appointment. This can differ than the Post Title.
Person	This shows the employee's name and personnel no.
Start Date	This shows the employee's start date in this post appointment.
End Date	If the appointment status is ended, this shows the employees end date of this post appointment.
Reason	This shows the reason the employee was appointment into the post appointment, or the reason it has been ended.
FTE	This shows the value of post appointment's FTE.
