## **1. Introduction**

### **1.1. Purpose of the Guide**

The purpose of this document is to provide an overview of how employee salary records are accessed and managed on People Management.

This includes:

- An overview of key concepts and terminology related to salary records.
- How salaries are created.
- Where to view salaries for the employee.
- Creating a salary amendment.

### **1.2. How are Salary Records Created?**

A salary record is created for an employee against their Contract / Post Appointment.

- Salary records are not directly associated with the employee record.
- It is not possible to create a salary for the employee on People Management, independent of their contract record.

If an employee has multiple active Contracts / Post Appointments, then they will have multiple active corresponding salary records.

Assigning a salary to a Post Appointment / Contract is a consistent activity. This implies that every time a new contract is created for an employee, the hr administrator is required to input / confirm the associated salary information i.e. for a new starter, new contract (replacement or additional) or a rehire.

- Salary type and grade will be defined on the Post Profile.
- If using 'Authorised Post Appointments', planned salary details may be captured in full including the amount and multiplier.
- Full salary details are updated / confirmed when the Post Appointment / Contract is appointed to the employee.
- The salary will only be available to view on the employee's record on People Management, when the contract has been 'Commenced' for the employee.

### 1.3. Key Elements of the Salary Record

| Element                           | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Rate Type                         | <p>The different pay structures that are supported on CoreHR.</p> <ul style="list-style-type: none"> <li>• <b>Pay Scale:</b> This is a graded scale of salaries within an organisation. A rate / set of rates is held against each level on the system. That level is then assigned to the employee.</li> <li>• <b>Personal:</b> This is a rate of pay that is specifically assigned to the employee. It is not derived based on a standard scale.</li> </ul> <p>It is possible to employ a mix of rate types for employee salary records, based on an organisation's requirements i.e. an organisation is not restricted to use either Pay Scale or Personal.</p> |
| Pay Scale / Grade / Position Code | <p>This represents the position / grade on the defined Pay Scale that the employee will be aligned to i.e. which level.</p> <p>If using a Personal Rate salary, this element must be captured on the salary record, using a default grade of 'Personal Rate'.</p>                                                                                                                                                                                                                                                                                                                                                                                                  |
| Point                             | <p>The point on the Pay Scale that will identify the actual amount or 'Rate of Pay' that will be aligned to the employee's contract.</p> <p>If using a Personal Rate salary, this will be automatically defaulted to a value of '9999'.</p>                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Amount / Rate of Pay              | <p>The actual value of the employee's salary.</p> <p>This will correspond to the 'Rate' field e.g. 40000 for 'Annual' or 12.50 for 'Hourly'.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Rate                              | <p>Whether the amount is:</p> <ul style="list-style-type: none"> <li>• Hourly</li> <li>• Daily</li> <li>• Weekly</li> <li>• Annual</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Multiplier                        | <p>The % value of the amount to be paid to the employee.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| Element | Description                                                                                                                                                                                                                                                                                                                              |
|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|         | <p>Typically, this is aligned to the employee's contract FTE e.g. if an employee's contract has an FTE of 0.5 then the Multiplier of 0.5 will ensure that only half the salary amount is paid to the pro rata.</p> <p>This is usually updated dynamically on the salary amendment screens to reflect the FTE input for the contract.</p> |

### 1.4. HR Access vs Salary Access

Salary records are treated as sensitive data on CoreHR which means that there is an additional level of data access required for a hr administrator to access salary records for an employee. This means that it is possible for a hr administrator to have access to view the employee's contracts but not have access to view the corresponding salary record.

The 'Pay Access' is defined at a Pay Group level. This means that the user account will need to be granted access to see all of the salaries for a given Pay Group

For example:

- An organisation has 2 Pay Groups – 'Monthly Payroll' and 'Weekly Payroll'.
- Granting access to the 'Monthly Payroll' Pay Group ensures that the user will see salaries for employees in that Pay Group.
- However, they will not see the salary for any employees in 'Weekly Payroll'.

Having Pay Group access has no impact on the user's ability to see employees or their contract records. This purely controls their access to the salary records for employees that they already have access to.

For Example:

If the hr administrator has Pay Access for 'Monthly Payroll' and HR Access for the 'IT Department' only, then:

- They will only be able to see the salaries for employees that are in the IT Department and are on the Monthly Payroll.

- They will not see employee / contract / salary records for other employees that are in Monthly Payroll but are not in the IT Department.

## 2. Viewing Salaries in People Management

The employee's salary in People Management is available to view against their Contract / Post Appointment record. Therefore, you will first require access to view the employee's contract, in order to access the associated salary.

A full history of all salary changes for each contract is available per Contract / Post Appointment. Therefore, if you have access to view all of an employee's contracts for all periods of employment (i.e. if they have left and been rehired), then you will have access to view all corresponding salary records for the employee.

To access the employee's salary details:

1. On the employee's record, click **Current Salary**.

2. Ensure the required Contract / Post Appointment is selected

It is possible to view the salary details for any contract that the employee has access to, for all contract statuses i.e. Pending, Started Future, Ending & Ended etc

This screen is the main area that the hr administrator will complete the salary administration activities for the employee's contract. The options available on this screen include:

- View current annualised salary.

- View current annualised salary and allowances.
- View a list of all salary amendments for the contract, including the initial salary.
- View a timeline of salary changes.
- Manage the salary increment dates.
- View and manage permanent reoccurring allowances.

### 3. 'Current Salary' Screen Explained

#### 3.1. Overview

In this section of the guide, the individual elements of the *Current Salary* screen are explained in greater detail.

The screenshot shows the 'Employee Search' page for Noel Murphy (000138). The main content area is titled 'Current Salary' and includes a 'Salary History' table. The table has columns for Start Date, Rate Effective, Pay Scale, Point, Rate Type, Rate Amount, Multiplier, Actual Pay, Status, and Reason. The first row shows a salary of £40,000.00 starting on 18-Feb-2019, with a status of 'Approved' and reason of 'Hire'.

| Start Date  | Rate Effective | Pay Scale | Point | Rate Type | Rate Amount | Multiplier | Actual Pay | Status   | Reason |
|-------------|----------------|-----------|-------|-----------|-------------|------------|------------|----------|--------|
| 18-Feb-2019 | 01-Jan-1990    | Grade 2   | 1     | Annual    | £40,000.00  | 1          | £40,000.00 | Approved | Hire   |

This screen is split into 3 main sections:

- Current Salary
- Allowances
- Increment History

Each section and many of the elements within are controlled by menu options. This means that the screen may appear differently to the screenshots included in this guide, depending on how an organisation is using CoreHR OR an individual user's restricted access.

##### 3.1.1. Contract

The salary information displayed on screen is related to the contract selected on the drop-down list at the top of the page.

If the employee has more than one contract on CoreHR, you can select the required contract from the drop-down menu directly in the *Current Salary* screen, to view the corresponding salary details.

### 3.1.2. Pay Group

Accountant Start Date 18-Feb-2019 Payroll Status: Open for Processing

Current Salary Allowances Increment History

**Current Salary**

Current Salary £40,000.00 Including Allowances £41,680.00 Next Increment Due N/A Paygroup 1005 - Focus Payroll TIMELINE VIEW

**Salary History**

Exclude Rate History

| Start Date  | Rate Effective | Pay Scal... | Point | Rate Type | Rate Amount | Multiplier | Actual Pay | Status   | Reason |
|-------------|----------------|-------------|-------|-----------|-------------|------------|------------|----------|--------|
| 18-Feb-2019 | 01-Jan-1990    | Grade 2     | 1     | Annual    | £40,000.00  | 1          | £40,000.00 | Approved | Hire   |

ADD

The employee's Pay Group is displayed.

The corresponding pay group status badge is displayed at the top right of the employee record.

Payroll Status: Open for Processing

Payroll Status: Closed for Processing

If the employee has not yet been setup on Payroll, then a **Change Pay Group** option is available by clicking the **Actions** button (pending your menu option access). Clicking on this will allow you to change the employee's Pay Group, before they are setup on Payroll. This option is not available, once Payroll take-on is complete.

ADD

#### 1. Current Salary

- This is the actual annualised salary that the employee is in receipt of today.
- If a future dated salary change is recorded on the system, this will not be taken into consideration.
- If the current salary has a multiplier <1, then the salary amount displayed will be pro-rated accordingly.
- If a new salary amendment exists on the system that should be active today but hasn't been approved, this will not be taken into account. The latest approved salary effective today will be used.

### 2. Including Allowances

- This will display the current salary (as described above) plus any allowances that are active for the employee today.
- If the employee does not have any active allowances for today's date, then this will display the same value as 'Current Salary'.
- If there are allowances with a future start date, these will not be taken into consideration.
- If there are allowances that are future ended, but active today, these will be included.
- Depending on the allowance type, this will always display the actual annualised value.
- If a new allowance has been set up on the system that should be active today but has not been approved, this will not be considered.

### 3. Next Increment Due

- This will display the next 'Increment Due Date' for the employee's contract, that is held on the system.
- The date will be today's date or greater i.e. this will not show any past dates.
- If multiple future Increment Due Dates are recorded, this will display the next date due.
- If no Increment Due Dates are recorded, the label will display "N/A".
- If the employee has historic Increment Due Dates, but no future dates, the label will not display.

### 4. List of Salaries

The grid at the lower half of the screen will display the full salary history for the employee's contract including

- All approved salaries
- All outstanding salaries (i.e. unapproved, if using 'Salary Approvals')
- All rejected salaries (i.e. if using 'Salary Approvals')

| Salary History       |                |                  |       |           |             |            |            |          |               |

| Start Date           | Rate Effective | Pay Scale / G... | Point | Rate Type | Rate Amount | Multiplier | Actual Pay | Status   | Reason        |
| 14-Jan-2019          | 14-Jan-2019    | Personal Rate    | 9999  | Annual    | £45,000.00  | .5         | £22,500.00 | Pending  | Change Of Pay |
| 01-Jan-2011          | 01-Jan-2011    | Personal Rate    | 9999  | Annual    | £32,000.00  | 1          | £32,000.00 | Approved | Correction    |
| 01-Jan-2011          | 01-Jan-2011    | Personal Rate    | 9999  | Annual    | £32,000.00  | 1          | £32,000.00 | Approved | Correction    |
| 01-Jan-2011          | 01-Jan-2011    | Personal Rate    | 9999  | Annual    | £30,000.00  | 1          | £30,000.00 | Approved | Hire          |

Salary records are displayed in chronological order based on the *Start Date*.

- The most recent start date will be first at the top of the list, including *Start Dates* that are in the future.
- If 2 salaries exist for the same *Start Date*, the salary with the latest input date/time will appear closer to the top of the list.

Only 1 salary will be active for the employee's contract at any given time.

- The salary that is currently active today will be represented via the amount displayed at the top of this screen as 'Current Salary'.
- If a salary exists for an Effective Date in the future this will be listed on screen and will only become active for the employee, once that date has elapsed.

5. There is no end date displayed for a salary.

Given that only 1 salary is active for an employee at a time, it is a given that the previous salary ends on the new 'salary start date minus 1 day' i.e. if the new salary start date is 22<sup>nd</sup> May 2018, then the end date for the previous salary will be 21<sup>st</sup> May 2018.

| Element        | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Start Date     | <p>This is the date from which the salary is active for the employee's contract and will be paid from.</p> <p>An employee may only have 1 active salary per contract.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Rate Effective | <p>When using Pay Scales on CoreHR, the rates of pay per Pay Scale &amp; Point are stored on the system for a given effective date e.g. these rates may be effective from 1<sup>st</sup> Feb 2017. It is possible to capture rate changes on the system based on a new effective date e.g. if the rates change on 1<sup>st</sup> Feb 2018 to a new value.</p> <p>This field indicates to the hr administrator the date for the Pay Scale Rate that the employee is in receipt of for this salary record.</p> <p>If the rates change during the lifetime of the employee's contract, a new salary record will reflect this rate change.</p> |
| Reason         | <p>This is defaulted to the contract <i>Reason</i> for the initial salary record that is created on contract creation i.e. the <i>Reason</i> supplied during the New Hire, New Contract, or Rehire process.</p> <p>For all other salary changes, the <i>Reason</i> will be directly input by the HR Administrator when creating the Salary Amendment e.g. Change of Hours, Contract Amendment etc.</p>                                                                                                                                                                                                                                     |

### Exclude / Include Rate History

Use this drop-down list to show / hide salary changes that were automatically created on the system as part of an overall rate change i.e. the standard rate for the employee’s Pay Scale was updated on the system on 1<sup>st</sup> Feb 2019 (i.e. new Rate Effective), then the system will automatically create a salary amendment on 1<sup>st</sup> Feb 2019 (i.e. new Date Effective).

| Salary History       |                |             |       |           |             |            |            |          |        |

TIMELINE VIEW

Salary History

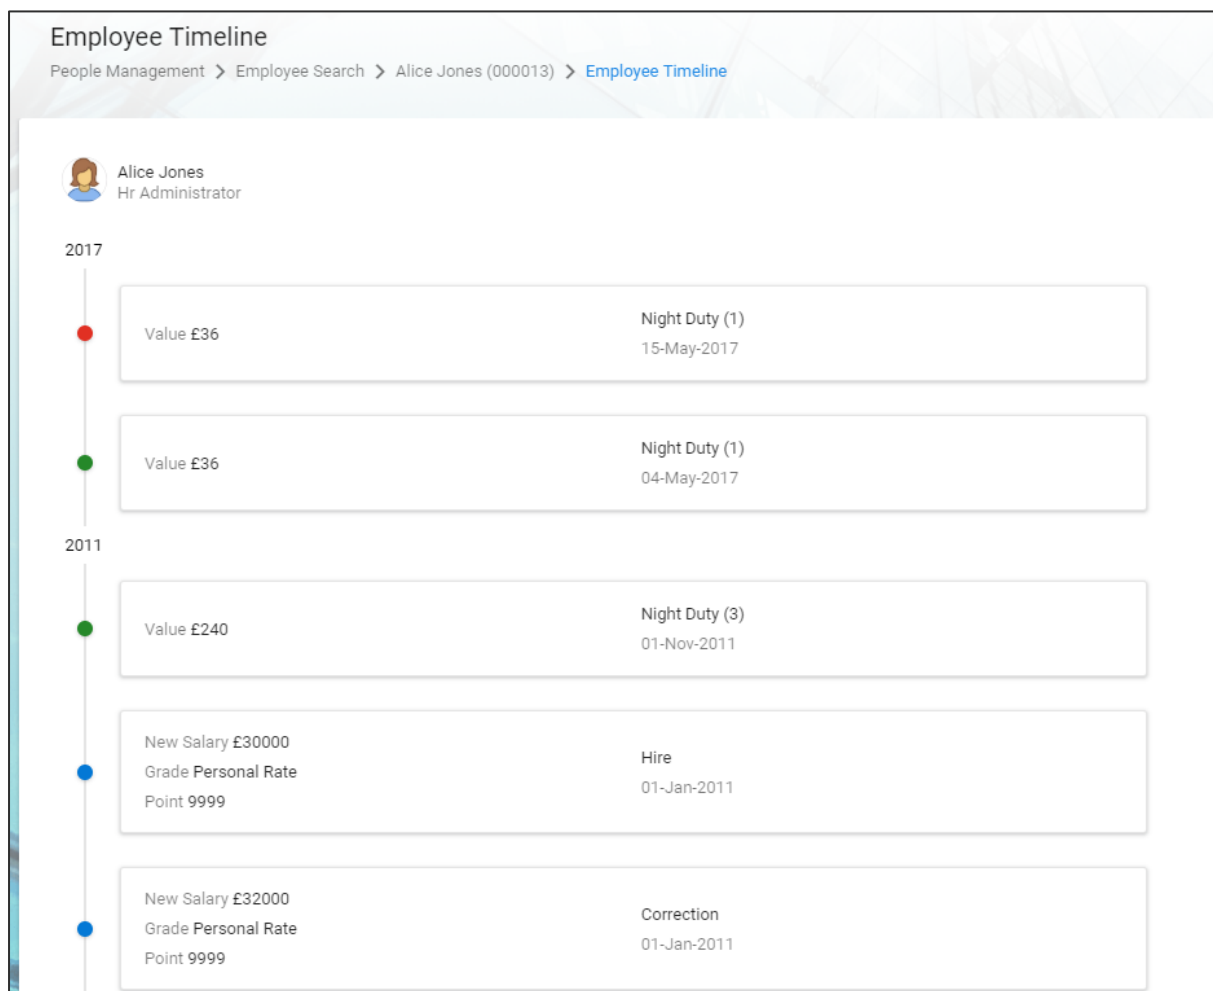

Exclude Rate History

ADD

| Start Date  | Rate Effective | Pay... | Point | Rate Type | Rate Amount | Multiplier | Actual Pay | Status   | Re... |
|-------------|----------------|--------|-------|-----------|-------------|------------|------------|----------|-------|
| 18-Feb-2019 | 01-Jan-1990    | Gr...  | 1     | Annual    | £40,000.00  | 1          | £40,000.00 | Approved | Hire  |

The following salary details will be displayed on the timeline:

- **Salaries:**
  - This will show only approved salaries. Salaries that are 'Pending', 'In Approval' or 'Rejected' will not be displayed.
  - All salary changes will appear here including new salaries, salary amendments, incremented salaries and salary rate changes.
- **Allowances**
  - This will show only approved allowances that have been setup as recurring allowances in HR. Allowances that are 'Pending', 'In Approval' or 'Rejected' will not be displayed.

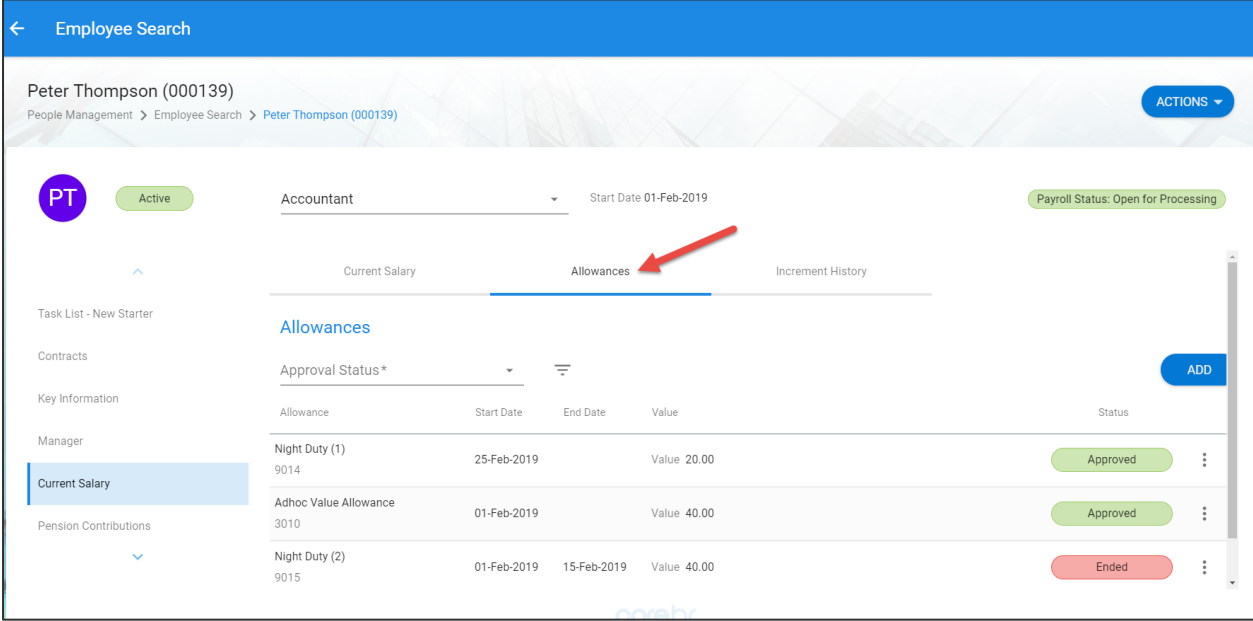

### **Salary Changes**

- All new salaries, amendments, increments and rate changes are identified by a **blue** dot.
- The following items are displayed:
  - Reason Code for the New Salary or Salary Amendment or the reason associated with the Increment or Rate change.
  - Effective Date of the salary.
  - Grade, point and value (*New Salary*).

### **Allowance Changes**

- All new allowances are identified by a **green dot**
- The following items are displayed:
  - The Allowance.
  - The Effective Date.
- When an allowance is ended, it will be identified by **Red** dot.
- The allowance detail display is dependent on the type of allowance used:
  - **Percentage** – will be the percent derived from the pay code or user specified (fixed/variable).
  - **Point** will represent allowance scaled point entered by the user.
  - **Value** will represent the allowance value (input value).

### 3.1.5. Allowances

The screenshot shows the 'Employee Search' interface for Peter Thompson (000139). The 'Allowances' tab is selected, and a red arrow points to it. The table below lists the allowances:

| Allowance                     | Start Date  | End Date    | Value       | Status   |
|-------------------------------|-------------|-------------|-------------|----------|
| Night Duty (1)<br>9014        | 25-Feb-2019 |             | Value 20.00 | Approved |
| Adhoc Value Allowance<br>3010 | 01-Feb-2019 |             | Value 40.00 | Approved |
| Night Duty (2)<br>9015        | 01-Feb-2019 | 15-Feb-2019 | Value 40.00 | Ended    |

This screen is used to manage the employees recurring allowances. This is used to:

- View existing allowances.
- Create new allowances.
- Update / delete / cancel allowances.

Access to this screen is controlled by menu options. Therefore, if your access has been restricted, the **Allowances** option may not be visible.

Full guidance on how to use this screen to manage allowances is covered in the **Managing Allowances** user guide.

### 3.1.6. Increment History

The screenshot displays the 'Employee Search' interface for Peter Thompson (000139). The 'Increment History' tab is selected, indicated by a red arrow. The 'Next Increment' section shows an increment due date of 11-Feb-2020, which is currently 'On Hold'. The 'Increment History' table shows a single record for 11-Feb-2020, created on 13-Feb-2019 by Alice Jones. The 'ADD' button is visible next to the table.

| Increment Due Date | Comments | Date / Time Created | Created By  |
|--------------------|----------|---------------------|-------------|
| 11-Feb-2020        |          | 13-Feb-2019 14:42   | Alice Jones |

This screen is used to manage the increment process for the employee's salary, for the selected contract.

On this screen, you can:

- Add an *Increment Due Date*.
- Delete an upcoming *Increment Due Date*.
- Place an upcoming increment on hold.

Access to this screen (and the actions available within) is controlled by menu options. Therefore, your access has been restricted, the **Increment History** option may not be visible.

Full guidance on how to use this screen to manage allowances is covered in the **HR Salary Increments** user guide.

### 3.2. Salary Screen for Various Contract / Salary Scenarios

#### 3.2.1. Contract is 'Appointed' but not 'Commenced'

If the contract is not yet “Commenced” it will appear as “Pending” on the employee record. If using salary approvals, it is not possible to approve a salary where the contract is not commenced.

While the contract is “Pending” the *Current Salary* screen will show no details. The salary doesn't become available until the employee's contract is commenced.

The screenshot displays the 'Current Salary' screen for Mary Peters (000141). The interface includes a sidebar with navigation options like 'Task List - New Starter', 'Contracts', 'Key Information', 'Manager', 'Current Salary' (selected), 'Pension Contributions', 'Deductions', 'Cost Allocations', and 'User Defined Data'. The main content area shows the employee's details: 'Accountant', 'Start Date 18-Feb-2019', and 'Payroll Status: Open for Processing'. A dropdown menu for 'Accountant' is open, showing 'Accountant, Accounts', 'Appointment ID 502241-1', 'Contract Hours 37.5', and 'Start Date 18-Feb-2019'. A red arrow points to the 'Pending' status. Below this, the 'Current Salary' section shows 'Awaiting Approval'. The 'Salary History' section is empty, displaying a message 'NOTHING TO SEE HERE' with a flag icon. The table headers for 'Salary History' include 'Start Date', 'Rate Effective', 'Pa...', 'Point', 'Rate Type', 'Rate Amount', 'Multiplier', 'Actual Pay', 'Status', and 'Re...'. An 'ADD' button is visible in the top right corner of the salary history section.

### 3.2.2. Contract is Ended

- The current salary screen will display the full history of salary amendments.
- *Current salary* and *Including allowances* will display the last effective amount, before the contract ended.

### 3.2.3. Contract is Future Ended

When a contract has been ended for a date in the future, the screen will continue to show the current fully approved salary effective today.

- The contract will appear as “Ending”.
- The *End Date* is populated.

#### Additional Salary Changes

If additional salary amendments have been added for the employee, the Current Salary only displays salary amendments that have been fully approved as of today.

For example, the screenshot shows a *Current Salary* value of £32,000. However, notice that an amendment exists for a later date but is in a status of “Pending”. This will only be reflected on the *Current Salary* once it has been fully approved.

### 3.2.5. Future Dated Salary Amendment

This *Current Salary* screen will always show the current approved salary effective as of today.

For example, a future dated salary amendment of £34,000 exists for this employee and is fully approved.

However, on the *Current Salary* the previous salary of £18,133.32 still displays as that is the salary that is effective today.

For example, in the screen shot above, 2 approved amendments exist for 1<sup>st</sup> Jan 2011.

The *Current Salary* field shows the salary that was input later is displayed.

## 4. Creating a Salary Amendment

### 4.1. Overview

As reviewed in [1.2 How are Salary Records Created?](#), salary records are initially created for the employee as part of the contract creation. Therefore, a salary record is automatically set up on the system for any new contract awarded to an employee as part of the following processes:

- New Hire
- Replacement Contract
- Additional Contract
- Rehire

Please refer to the relevant contract management user guides for these processes for guidance on how the salary is created during these processes.

Furthermore, depending on how CoreHR has been setup, it is possible to automatically create a salary amendment as part of a contract amendment, where that amendment should have an impact on the employee's salary e.g. a change of hours. The amendment process is automated as part of a 'pay impacting' salary amendment, through use of salary specific reason codes. Please refer to the *Contract Amendments* user guide for further guidance on this process.

The purpose of this section of the guide is to provide instruction on how to create a salary amendment, independent of the contract creation / amendment activities referred to above i.e. how a hr administrator can directly update the employee's salary without updating their contract record.

### 4.2. Ad Hoc Salary Amendment

The employee's salary in People Management is available to view and update against their Contract / Post Appointment record. Therefore, you first require access to view the employee's contract, in order to access the associated salary.

Follow these steps to amend an employee's salary:

1. Quick jump to the *Command Centre* and select *Employees*.
2. Search for the employee and click **View** to open their employee record.
3. Select **Current Salary** on the list of options on the left of the screen.
4. Ensure the correct contract is selected for the employee.
5. Click **Add**.

The screenshot displays the 'Current Salary' page for Noel Murphy (000138). The page is divided into several sections. On the left, there is a sidebar with a list of options: 'Task List - New Starter', 'Contracts', 'Key Information', 'Manager', 'Pension Contributions', 'Deductions', 'Cost Allocations', and 'User Defined Data'. The 'Current Salary' option is highlighted with a red box. The main content area shows the 'Current Salary' tab selected, with a red arrow pointing to the 'Accountant' dropdown. Below this, the 'Salary History' table is visible, showing a single entry for 18-Feb-2018 with a rate of £40,000.00. A red arrow points to the 'ADD' button in the top right corner.

| Start Date  | Rate Effective | Pay Scale ... | Point | Rate Type | Rate Amount | Multiplier | Actual Pay | Status   | Reason |
|-------------|----------------|---------------|-------|-----------|-------------|------------|------------|----------|--------|
| 18-Feb-2018 | 01-Jan-1990    | Grade 2       | 1     | Annual    | £40,000.00  | 1          | £40,000.00 | Approved | Hire   |

6. The *Amend Salary* screen opens
7. This screen is divided into 2 main sections.

SAVE

- The left-hand side of the screen displays the latest current approved salary details, including future approved salaries.
- The right-hand side of the screen is editable and is where you will record the details of the salary amendment

The following fields will be pre-populated with the current salary details i.e. the details from the right-hand side of the screen

- To be paid based on
- New Grade
- New Point
- New Rate is
- New Multiplier
- 'New Salary' & 'Actual Pay' will only be prepopulated if this is a "Personal" salary type

8. To record the salary amendment, enter an effective date for the change.
  - For a “Scale-Point” salary, once this has been entered, the “Actual Pay” field will be populated. The system identifies the correct rate that is held on the system for the effective date entered.
  - If using a “Personal” salary, the you should update the *New Salary* field with the new ‘annualised’ amount. The *Actual Pay* field will update to reflect the *New Salary* x *Multiplier*.
9. Select a reason from the *New Reason* drop down list.
10. Record additional details about the amendment in the *Comments* field (up to 100 characters).
11. Click **Save** to complete the amendment.
  - If Salary Approvals are in use, the salary will be created as “Pending” and will need to be processed as per the configured approval process.
  - If Salary Approvals are not in use, the salary will be automatically created as “Approved”.
12. All salary amendments can be reviewed on the *Current Salary* screen.
  - If Salary Approvals are in use this will be “Pending” and will need to be fully approved before the change is available to Payroll to process.
  - If Salary Approvals are not in use, this will be immediately “Approved” and available to Payroll to process.
