1. Introduction

The purpose of this guide is to provide detailed guidance on how to set up a new hire on People Management.

There are a number of ways in which a new hire can be setup on People Management, depending on the posts that an organisation will use as the foundation for the employee's contract. Therefore, this guide will provide steps on how to complete the setup for the following Post Profile / Post Appointment types:

- Auto-Authorised Post Profile
- Auto-Commenced Post Profile
- Planned & Authorised Post Appointment

Note:

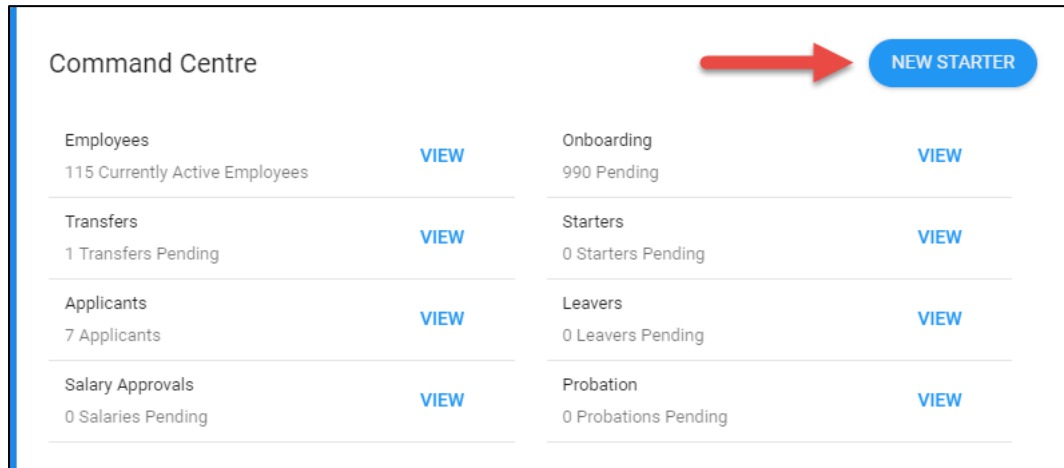

This guide will not cover the steps required to create or manage Post Profiles as part of this process. Please refer to the ***Managing Post Profiles*** user guide for this information.

2. New Hire Setup

2.1. Auto-Authorised Appointment

2.1.1. New Employee Wizard

1. On the *Command Centre* widget, click the **New Starter** button.

2. The *Search for a Post* screen opens. Use the selection criteria provided to search for the required Post Profile record.
 - The *Search Posts* function provides a quick search option using the Post Number or Post Title only.
 - The **Post Filter** button provides access to another pop-up screen with options to filter posts using the fields defined for the organisational hierarchy data.
 - If multiple structures exist, please select the required structure at the top of the page.
 - Click the **Apply** button to search.
3. Posts that meet the search criteria, will be listed on screen.
 - Only Post Profiles with an Appointment Status of *Auto Authorised* or *Auto Commenced* will appear here.
 - Post Appointments that have been *Authorised* will also display here.

Search for Post

502240-0	Support Analyst	Permanent		Auto Authorised	10

0 rows selected. 1 - 2 of 2

corehr

NEXT

4. Select the post by selecting the required row and click on the **Next** button to continue.
5. The *Duplicate Employee Check* screen opens. This is a useful step in the new hire process to prompt you to first search the system to ensure that the employee you are about to set up on the system doesn't already exist – either as an active or a dormant record. This is not mandatory and it is possible to skip by selecting the **Create New Employee** button.
 - Use the *Search Name of Social Security* box to search for an employee using the following:
 - Forename
 - Surname
 - PPS Number (Republic of Ireland)/NI Number (United Kingdom)

Note It is recommended to search based on PPS/NI Number if known as this is a true unique ID per employee and may identify scenarios where an employee exists on the system under another name e.g. an employee previously worked for the company under their maiden name and are rejoining under a married name.

- Any employees (active or dormant) that match the search criteria, will display on the screen.

Duplicate Employee Check

People Management > Search for Post > Duplicate Employee Check

Employee No.	Name	Known As	Date of Birth	Social Security No.	Gender	Department	Action
000020	Claire Jackson		15-JUN-90	*****005D	Female	Compensation & ...	New Contract
000045	Claire Atkinson	Claire	11-SEP-83	*****188D	Female	Finance Admin	New Contract
000079	Claire Burton	Claire	13-FEB-89	*****567T	Female	Technical Support	New Contract
000060	Claire Smith	Claire	05-JUL-75	*****456D	Female	Training	New Contract
000061	Claire Smith	Claire	05-JUL-75	*****456D	Female	Training	New Contract

- If a duplicate employee is identified, select the row of the relevant employee and click **Next**. This will guide the user through the *New Contract* or *Rehire* steps required to link the employee to the contract. Please refer to the relevant user guides for details on these processes.
- If a duplicate employee is not identified, click the **Create New Starter** button. This will open the 4-step *Create New Employee* wizard.

6. Complete Step 1: *Person Information*:

Person Information

2

Organizational Structure

3

Contract Information

4

Salary Information

Person Details

Personnel Number Routine
Default Manual

Personnel No.*

Title Forename* Surname*

Middle Name Known As Initials

Date Of Birth* Age Retirement Date

The Person Info step is used to capture some basic personal information for the new employee's HR record.

All mandatory fields are identified on the screen using a *-symbol.

Field	Description
Title	Select from a prescribed list of values
Forename	Free text field for up to 40 characters.
Surname	Free text field for up to 40 characters.
Middle Name	Free text field for up to 40 characters.
Known As	Free text field for up to 40 characters. Prepopulated with forename and can be overwritten
Initials	Automatically populated used Forename and Surname.
Gender	Select from a prescribed list of values.
Date of Birth	Select from a calendar or type in format dd/mm/yyyy
Age	Automatically calculated using the Date of Birth.
Retirement Date	Can be automatically populated based on a system defined retirement age OR can be manually entered in format dd/mm/yyyy
Nationality	Select from a prescribed list of values.
Email Address	Record the company email address for the employee. Validation will be performed to ensure that a valid email address is supplied.
Phone	Free text field for up to 32 characters.
Mobile	Free text field for up to 32 characters.

- To add the employee's address information, select a Country from the drop-down list and the screen will update to display an address layout that has been configured on CoreHR for that country.
- All mandatory fields are identified on the screen using a *-symbol.

Note The address is mandatory and must be entered for all employees as part of the new starter setup. When adding / editing employee addresses, a lookup is now available. This is integrated with Google Map technology. For example, it is possible to enter an employee's post code, select an address match and autofill the address record on screen. This is an optional feature - users can continue to enter any address data and do not have to select an option from the autofill list.

- Click the **Next** button to proceed to step 2.
- Complete Step 2: *Organizational Structure*:

The screenshot displays the 'New Starter' form interface. At the top, a breadcrumb trail reads: 'People Management > Search for Post > Duplicate Employee Check > New Starter'. A 'POST SEARCH' button is located in the top right corner. On the left side, a vertical navigation menu shows four steps: 1. Person Information, 2. Organizational Structure (highlighted with a blue circle), 3. Contract Information, and 4. Salary Information. The main form area contains several fields with dropdown menus, all pre-filled with data: 'Company *' (Abc Solutions), 'Division *' (Shared Services), 'Management Unit *' (Finance), 'Department *' (FIN1 - Accounts), 'Cost Centre' (Cost Centre*), 'Location*' (Location*), and 'Work Group*' (Work Group*). Each field has a small downward arrow indicating it is a dropdown. At the bottom of the form, there is a 'corehr' logo and two buttons: 'PREVIOUS' and 'NEXT'.

The *Organizational Structure* step prompts the user to record the details of where in the organisation the employee's new post will be based.

Details on this screen will be automatically populated based on the post selected at the start of this process. The Post will display in the drop-down list at the top of the screen.

Note It is possible to edit the post selected at this stage if required. The *Post* list will display all *Posts* (auto-authorised/auto-commenced/authorised *Post Appointments*) that the user has been granted access to see (based on their HR Access). The **Post Search** button will open the *Search for a Post* screen used earlier in the process.

- Only fields that have been predefined on the post will be displayed here i.e. in the above screenshot the Company, Division, Management Unit and Department are populated; the Cost Centre, Location and Work Group are not.
- All fields in the linked hierarchy are mandatory and must be populated.
- All other mandatory fields are identified on the screen using a *.

9. Click the **Next** button to proceed to step 3.

10. Complete Step 3: *Contract Information*:

The screenshot shows the 'New Starter' form in the People Management system. The breadcrumb trail at the top reads: 'People Management > Search for Post > Duplicate Employee Check > New Starter'. On the left, a vertical navigation bar shows four steps: 1. Person Information, 2. Organizational Structure, 3. Contract Information (highlighted with a blue circle), and 4. Salary Information. The main form area is titled 'Contract Information' and contains several fields:

- Dates**
 - Effective Date*: 03-Mar-2019
 - Target End Date
 - Planned End Date
- Job Details**
 - Job Title*: ACCT - Accountant
 - Job Category
 - Post Type*: P - Permanent
- Additional Information**
 - Project
 - Comments
 - Job Description
- Description**
 - Employee Status*: P - Permanent
 - Sub Status
 - Category

At the bottom right, there are two buttons: 'PREVIOUS' and 'NEXT'. The 'corehr' logo is visible at the bottom center.

The *Contract* step will require the hr administrator to input further particulars for the employee's contract.

- Some of these fields will be automatically populated based on Post selected e.g. *Job Title*, *Post Type*, *Category*, *Sub Category*. This is dependent on whether those fields have been populated on the Post.

- All other fields should be completed by the hr administrator as required. All mandatory fields are identified on the screen using a *.

Field	Description	Mandatory
Effective Date	• This the start date for the contract. For a new employee this will be their start date in the organisation and ultimately the first date from which they will be paid for this position. • Select date from a calendar or enter in format dd/mm/yyyy.	Yes
Target End Date	Select date from a calendar or enter in format dd/mm/yyyy.	No
Planned End Date	Select date from a calendar or enter in format dd/mm/yyyy.	No
Job Title	• This will be pre-populated with the Post Title, for the chosen Post. This may be updated to another Job Title if required. Updating the Job Title on the Contract will not update the overall Post Title. • Select from a predefined list of values.	Yes
Job Category	Select from a predefined list of values.	No
Post Type	• This will be pre-populated with the Post Type, for the chosen Post. This may be updated to another Post Type if required. Updating the Post Type on the Contract will not update the overall Post Title. • Select from a predefined list of values.	Yes
Project	Select from a predefined list of values.	No
Job Description	• Use the Add Job Description button to record a more contract specific description of the role. This may be used in scenarios where the <i>Post/Job Title</i> is too generic for the employee's contract. • Up to 500 alphanumeric characters are available.	No
Comments	• Use the Add Comments button to record additional comments for the contract.	No

Field	Description	Mandatory
	Up to 2000 alphanumeric characters are available.	
Employee Status	Select from a predefined list of values.	Yes
Sub Status	Select from a predefined list of values.	No
Category	- May be prepopulated from the Post Profile, if this has been defined. - Select from a predefined list of values.	No
Sub Category	- May be prepopulated from the Post Profile, if this has been defined. - Select from a predefined list of values.	No
Contracted Hours	- Used to record the standard working hours per week for the contract. If entered, this will be used with the Standard Hours, to calculate the contract FTE value. - Enter in format 00.00	No
Contracted Weeks	- Used to record the contracted working weeks year for the contract. If entered, this will be used with the Standard Weeks, to calculate the contract FTE value. - Enter in format 00.00	No
FTE	- This may be automatically calculated based on the Contracted Hours, Contracted Weeks, Standard Hours & Standard Weeks. - This may also be directly input / overwritten for the contract. - Enter in format 0.000000	Yes
Standard Hours	- This is a selection of the standard weekly working hours operated in the organisation e.g. 37.5 hours, 40 hours etc. - Select from a predefined list of values.	No
Standard Weeks	This is automatically populated based on a system configured standard weeks per year.	No

Field	Description	Mandatory
	This may also be directly input / overwritten for the contract.	
Absence FTE	- This FTE may be used for WFM purposes. Please refer to WFM training for further details if required. - Enter in format 00.00	No
Action	Select from a predefined list of values.	No
Reason	- This is the reason for the contract creation / amendment e.g. 'Hire'. - Select from a predefined list of values.	Yes
Replacing	- This list will be populated with the names of other employees that previously worked in OR are currently working in contracts created for this Post. This may be used to capture the relationship of contracts / employees where a new contract is created specifically to replace an existing one e.g. the contract was created because another employee left that post or was promoted. - If this is a new Post, no names will be available. - Select from a predefined list of values.	No
Pensionable	- This is an indicator to reflect if the employment on this contract is pensionable and should impact on the employee's pensionable service calculations. - This is only relevant if using the 'Pension by Appointment' solution.	No
Acting Up	This is an indicator used to reflect if the employee is 'acting up' into this contract.	No
Secondment	This is an indicator used to reflect if the employee is on secondment into this contract.	No

Note The table above indicates the fields that are mandatory on the CoreHR system to proceed with the contract creation.

11. Click the **Next** button to proceed to step 4.

12. Complete Step 4: *Salary Information*:

New Starter
People Management > Search for Post > Duplicate Employee Check > New Starter

1 Person Information
2 Organizational Structure
3 Contract Information
4 Salary Information

Starter Declaration * NI Number Paygroup employee will be paid in *
1 - Monthly Payroll (UK)

Employee to be paid based on * Scale * Point on Scale
Personal Grade 5 9999

Multiplier *

This to be paid * Amount to be paid
Annual 50000 Apply next increment on

corehr
People Management Technology

PREVIOUS SAVE

The *Salary* step will prompt the user to provide all the details relevant to the employee's regular salary arrangements, specific to this contract.

All mandatory fields are identified on the screen using a *.

Field	Description	Mandatory
Starter Declaration	Select from a predefined list. Applicable to UK based employees for RTI purposes.	No
PPS/NI/Social Security Number	Enter the employee's PPS Number / NI / Social Security Number. There is validation on this field to ensure that the PPS Number / NI Number entered is a valid number and in the correct format for the jurisdiction.	No

Field	Description	Mandatory
	There is an advanced feature that may be enabled to allow for this field to capture other social security type numbers. Please refer to the corresponding configuration guide for further details.	
Paygroup employee will be paid in	Select from predefined list of values	Yes
Employee to be paid based on	- Select from a predefined list of values. Scale Point: If the salary is set using a standard Scale & Point. Personal: If the salary is directly set on the contract i.e. is not driven from standard company pay scales.	Yes
Scale	- This will be pre-populated with the Pay Scale that has been defined on the Post Profile. - This may be updated if required to a different scale. - Select from a predefined list of values.	Yes
Point on Scale	- This list will be populated based on the selection made for <i>Scale</i> i.e. if <i>Grade 1</i> is selected for Scale, then only the points that have been configured for Grade 1 will be available. - If a <i>Person</i> rate of pay was selected, this will default to 9999.	Yes
Multiplier	- This will be populated with the value set for FTE on the <i>Contract</i> step i.e. if FTE is 0.5, Multiplier will be set to 0.5 to ensure the employee's salary is pro-rated based on their working hours. - This may be overwritten to differ from the FTE if required. - Enter in format 0.000000	Yes

Field	Description	Mandatory
This to be paid	This is the rate at which the value in the <i>Amount</i> field will be paid. This is defaulted to <i>Annual</i> but may be updated to <i>Hourly</i> , <i>Daily</i> or <i>Weekly</i> if required.	Yes
Apply next increment on	- This is the date that the employee will be due to automatically increment to the next point on the Pay Scale, if relevant (subject to the increment rules configured on CoreHR). - Select date from a calendar or enter in format dd/mm/yyyy.	No
Amount	This is the amount that the employee will be paid, relative to the <i>rate of pay</i> selected i.e. their annual salary, their hourly rate of pay etc.	Yes

- Once all of the mandatory salary details have been recorded, click on the **Save** button to complete the wizard.

At this stage, the employee is now linked to the new contract. The next step will be:

- HR Task List may appear if configured.

OR

- The employee record will appear.

2.1.2. Commence Appointment

When using an *Auto Authorised* Post Profile to create the contract, the contract will initially be created in an *appointed* status. This means that:

- the employee exists on the system and will return as *active* if using the employee search on the People Management dashboard.
- the contract exists for the employee and is available to view on their employee record with a status of *Pending*.

COMMENCE REPLACE CONTRACT CHANGE CONTRACT HOURS

However, until the contract is commenced for the employee, the employee and their contract will not be available to the payroll team to process. The act of *commencing* the appointed contract on a specified *Commenced Date* will confirm that the employee has started in organisation and should be paid the contracted salary amount from that date.

Follow these steps to commence the contract:

1. Go to the *Contracts* screen on the employee record.
2. For a new hire, the employee record should default to display the only contract for the employee. However, if in doubt, select the drop-down option to confirm that the correct contract has been selected. The contract will be flagged as *Pending*.
3. Click the **Commence** option.

The screenshot shows the 'Commence Contract' dialog box overlaid on the 'Ann Grant (000063)' employee profile page. The dialog box has a title bar 'Commence Contract' and a text input field labeled 'Commencement Date*' with a calendar icon. Below the input field are 'CANCEL' and 'OK' buttons. The background page shows the employee's profile with a 'Summary' tab selected. The 'Summary' tab displays the 'Appointment ID' as '502200' and the 'Start Date' as '25-Feb-2019'. The 'Amendments' tab is also visible, showing a table with columns: Start Date, End Date, Target End Date, Post No, Post Sequence, Re..., De..., Hours, and FTE. The table has one row with values: 25-Feb-2019, (blank), 502200, 6, Pr..., Se..., 1. The 'Actions' menu in the top right corner includes 'COMMENCE', 'REPLACE CONTRACT', and 'CHANGE CONTRACT HOURS'.

4. Enter the *Date Commenced*.

This must be greater than or equal to the effective date provided in the *Create New Employee* wizard.

5. Click **Save**.

Note:

The *Date Commenced* cannot be earlier than *Effective Date* that was entered when creating the contract. This must be either equal to or later than that date. This date will be the date that the employee will be paid from for this contract.

2.2. Auto-Commenced Appointment

To create a new employee from an Auto-Commenced Post Profile, please follow the guidance provided in [2.1 Auto Authorised Appointment](#). The process will be almost identical. The key difference here is that, on completion of the 4-step *Create New Employee* wizard, the contract will be created in a *Commenced* status i.e. there is no further requirement to *Commence the Appointment*.

This means:

- The employee exists on the system and will return as *active* if using the employee search on the People Management Dashboard.
- The contract exists for the employee and is available to view their HR *Employee Dashboard/Contract Timeline* with a status of *Commenced*.
- The *Effective Date* recorded on step 2 of the *Create New Employee* wizard will be their *Date Commenced*.
- The employee and the contract will be immediately available to payroll administration to complete onboarding.

2.3. Non-Auto Post Profiles

Creating a new starter using a *non-auto* Post Profile means that the employee's *Contract/Post Appointment* will be created from a standard Post Profile that has not been flagged for *Auto-Authorisation* or *Auto-Commencement*. When using these Post Profiles, the Post will not be automatically available to the hr administrator to select via the *People Management* dashboard > *Add Person* option.

Firstly, the HR administrator needs to go the *People Management* tab to complete the following two steps:

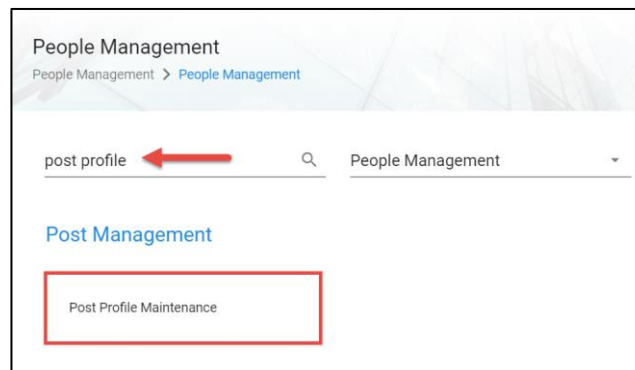

- Plan Appointment
- Authorise Appointment

The output of this activity will be a *planned & authorised* contract record with its' own unique *Contract ID/Appointment ID*. That record will then be available to the hr administrator to select via the *Add Person* option.

2.3.1. Plan Appointment

To plan a new Post Appointment/Contract

1. Go to the *Data Centre > People Management* tab.
2. Search for “Post Profile Maintenance” and select the corresponding option.

3. Search for the *Post Profile* that the *Post Appointment/Contract* will be planned against.

3. The *Post Appointment Maintenance* screen will appear.

Update the *Post Appointment/Contract* fields as required

Field	Description	Mandatory
Post Number/Seq.	Post Number is prepopulated from the Post Profile. The Sequence value will be automatically calculated for this new record on save.	Yes
Post Profile Type	This is automatically populated from the Post Profile	Yes
Status	This is automatically populated based on the status of the Post Appointment creation. This will display as <i>Planned</i> at this stage.	Yes
Date	This date will be automatically populated on save with the value provided for <i>Planned Start Date</i> .	Yes
Pension %	This is a memo only field.	No
FTE	This will default to 1. This may be overwritten if required. Enter in format 0.000000	Yes
FTE %	This is read only and will display the FTE value in % format.	No
Project	Select from a predefined list of values.	No

Field	Description	Mandatory
Job Text	May be used to record a more contract specific description of the role. This may be used in scenarios where the <i>Post/Job Title</i> is too generic for the employee's contract. Up to 500 alphanumeric characters are available	No
Hierarchy Fields	The display of the Org Structure/Hierarchy fields on this screen is dependent on the configuration per organisation.	Yes
Planned Start Date	This is the date that the contract is planned to be started from. This may ultimately become the contract start date. Enter in format DD/MM/YYYY or select from calendar.	Yes
Planned End Date	Enter in format DD/MM/YYYY or select from calendar.	No
Planned Post Type	This is automatically populated with the Post Profile Type but may be overwritten if required. Select from a predefined list of values.	Yes
Planned Pay Details Not Required	This indicator may be used to reflect a contract that will have no salary details associated with it. If enabled, the pay details on screen will be greyed out.	No
Planned Pers Rate Type	This will default to <i>Scale Point</i> but may be updated to <i>Personal</i> if required.	Yes
Planned Pay Scale	This will default to the Pay Scale provided on the Post Profile but may be changed if required. Select from a predefined list of values.	Yes
Planned Point	If <i>Scale Point</i> , select from a list of the <i>points</i> for the chosen Pay Scale. If <i>Personal</i> , this will be defaulted to '9999'.	Yes
Planned Salary	If <i>Pay Scale</i> , this will be automatically populated with the amount for the selected <i>Pay Scale Point</i> . If <i>Personal</i> , enter the amount to be paid. This should correspond to the rate type chosen i.e. if <i>Annual</i> enter the annual salary.	Yes

Field	Description	Mandatory
Rate	This rate associated with the to the employee e.g. Annual, Weekly, Monthly or Hourly. Select from a predefined list of values.	Yes
Planned Multiplier	This is used to indicate if the employee will receive a pro-rated salary and is typically linked to the contract FTE e.g. if they will be working 0.5 FTE then they should receive 0.5 of the salary amount.	Yes
Planned Replaces Employee	- This list will be populated with the names of other employees that previously worked in OR are currently working in contracts created for this Post. This may be used to capture the relationship of contracts / employees where a new contract is created specifically to replace an existing one e.g. the contract was created because another employee left that post or was promoted. - If this is a new Post, no names will be available. - Select from a predefined list of values.	No
Reason for Planning Post	This is a free text field that may be used to capture additional comments re the new position.	No

13. Once all details have been provided, click on the **Save** button at the top of the page to save the new Post Appointment / Contract.

Once saved, the following changes will appear on screen:

- A new *Sequence* will be generated for the Post Appointment. This together with the Post Number will be used to generate the *Appointment ID* for this new record.
- The *Selection* list of items will expand to include a number of new options for the Post Appointment.

The screenshot shows the 'Post Appointment' form. The 'Post Number' is 502209 and 'Seq' is 8. The 'Post Title' is 'REC' and 'RECRUITMENT CONS' is selected. The 'Post Profile Type' is 'P' and 'PERMANENT'. The 'Status' is 'PLANNED'. The 'Date' is '07-Jan-2018', 'Pension %' is empty, 'FTE' is '1.00', and 'FTE%' is '100'. A red arrow points to the 'PLANNED' status. On the right, the 'Selection' list is open, showing options 1 through 8. Option 3, 'Authorise Appointment', is highlighted with a red box.

The Post Appointment now exists on CoreHR in a *Planned* status. At this stage, the Post Appointment will not be available to the hr administrator in CorePortal. This record must first be *authorised* in order to become available on CorePortal.

2.3.2. Authorise Appointment

The Post Appointment may be *Authorised* immediately once planned. However, it is also possible to authorise at a later stage if required. The steps required to complete this both immediately OR later are detailed below.

Option 1: Authorise Immediately Once Planned

1. On the *Post Appointment Maintenance* screen, select the option **3 - Authorise Appointment** from the *Selection* list.

The screenshot shows the 'Post Appointment' form. The 'Post Number' is 502209 and 'Seq' is 8. The 'Post Title' is 'REC' and 'RECRUITMENT CONS' is selected. The 'Post Profile Type' is empty. The 'Status' is 'AUTHORISED'. The 'Date' is empty, 'Pension %' is empty, 'FTE' is '1.00', and 'FTE%' is '100'. On the right, the 'Selection' list is open, showing options 1 through 8. Option 3, 'Authorise Appointment', is highlighted with a red box.

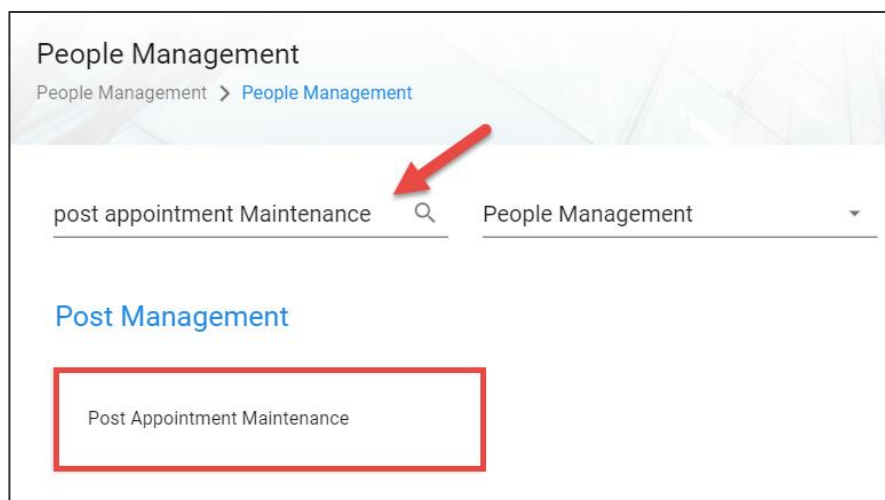

2. On the *Authorise Appointment* screen, enter the date from which the appointment will be authorised. This date cannot be earlier than the Planned Start Date.
3. Click **OK**.

4. Click on the **Save** button at the end of the screen to save the update.
5. The *Status* field should now show a value of “Authorised”.

Option 2: Authorising at a Later Stage

This option may be required if the user has exited the *Post Appointment Maintenance* screen without first authorising the record. It is not possible to jump back into that screen from the Post Profile Maintenance screen. Instead, follow the steps outlined below:

1. Go to *Data Centre > People Management*.
2. Search for “Post Appointment Maintenance” and click on the corresponding option.

The *Post Appointment Maintenance* screen opens.

3. Use the selection criteria provided to search for the planned Post Appointment.
To improve the search process, ensure that *Appointment Status* is “Planned”.

4. Double click on the Post Appointment record to access the Post Appointment.
5. From here, complete all of the steps outlined in *Option 1: Authorise Immediately Once Planned*.

Once the Post Appointment has been planned *and* authorised, it will be available on CorePortal People Management dashboard, to select via the *Create New Employee* wizard.

2.3.3. New Employee Wizard

To add a new employee to the planned & authorised Post Appointment/Contract:

1. Quick jump to the *Command Centre* in *People Management*.
2. Click the **Add Person** button.
3. The *Search for a Post* screen will appear. Use the selection criteria provided to search for the required Post Appointment record.
 - The *Search Posts* search box provides a quick search option using the Post Number or Post Title only.
 - The **Post Filter** button provides access to another pop-up screen with options to filter posts using the fields defined for the organisational hierarchy data.
 - If multiple structures exist, please select the required structure at the top of the page
 - Click the **Apply** button to search

- The Post Appointment will return on screen. In order to ensure that the correct Post Appointment is selected, take note of the following elements:
 - Appointment Status will be “Authorised” (not *Auto Authorised*)
 - *Post No/Sequence* will reflect the *Post Number/Seq* that was visible on the back office [Post Appointment Maintenance](#) screen

Search for Post
People Management > Search for Post

502209

Post	Post Title	Post Type	Department	Status	Post FTE
502209-9	Recruitment Consultant	Permanent	Recruitment	Authorised	1

1 row selected. 1 - 1 of 1

4. Select the post by clicking in the relevant row and click on the **Next** button to continue.
The *Duplicate Employee Check* screen opens. This is a useful step in the new hire process to prompt the user to first search the system to ensure that the employee they are about to set up on the system doesn't already exist – either as an active or a dormant record. This is not mandatory and it is possible to skip by selecting the **Create New Employee** button.
5. Use the *Search Employee* box to search for an employee using Forename, Surname, PPS Number (Republic of Ireland), NI Number (United Kingdom).

Note It is recommended to search based on PPS/NI Number if known as this is a true unique ID per employee and may identify scenarios where an employee exists on the system under another name e.g. an employee previously worked for the company under their maiden name and are rejoining under a married name.

Any employees (active or dormant) that match the search criteria, will display on the screen.

NEXT

The Person Info step is used to capture some basic personal information for the new employee's HR record. All mandatory fields are identified on the screen using a *-symbol.

Please see [Step 1: Person Info](#) for a full description of all available fields on this screen.

Click the **Next** button to proceed to step 2.

7. Complete Step 2: Organizational Structure

The *Organizational Structure* step prompts the user to record the details of where in the organisation the employee's new post will be based.

All available fields on this screen will be automatically populated based on the details provided when planning the Post Appointment, at the start of this process. The Post Number & Sequence will display at the top of the screen.

 **Note** It is possible to edit the post selected at this stage if required. The *Post* list will display all Posts (auto-authorised/auto-commenced/authorised Post Appointments) that the user has been granted access to see (based on their HR Access). The **Post Search** button will open the *Search for a Post* screen used earlier in the process.

- It is possible to update the following fields for the Post Appointment/Contract:
 - Cost Centre
 - Location
 - Workgroup
- Other Org Structure fields may not be changed.

8. Click the **Next** button to proceed to step 3.

9. Complete Step 3: *Contract Information*

The *Contract* step will require the hr administrator to input further particulars for the employee's contract.

- Many of these fields will be automatically populated based on the details provided for the planned Post Appointment selected e.g.
 - Effective Date (i.e. Planned Start Date), Planned End Date, Job Title, Post Type, Category, Sub Category.
- All other fields should be completed by the hr administrator as required. All mandatory fields are identified on the screen using a *-symbol.
- Please see [Step 3: Contract](#) for a full description of all available fields on this screen.

10. Click the **Next** button to proceed to step 4.

11. Complete Step 4: *Salary Information*

The *Salary* step will prompt the user to provide all the details relevant to the employee's regular salary arrangements, specific to this contract.

- Many of these fields will be automatically populated based on the planned pay details provided for the planned Post Appointment e.g.
 - Employee to be paid based on

- Scale
 - Point
 - Amount
- Please see [Step 4: Salary](#) for a full description of all available fields on this screen.
- All mandatory fields are identified on the screen using a *-symbol.

12. Once all of the mandatory salary details have been recorded, click on the **Save** button to complete the wizard.

At this stage, the employee is now linked to the new contract. The next step will be:

- HR Task List may appear if configured.

OR

- The employee will appear.

2.3.4. Commence Appointment

When using an *Authorised Post Appointment* to create the contract, the contract will initially be created in an *appointed* status. This means that:

- the employee exists on the system and will return as *active* if using the employee search on the People Management dashboard
- the contract exists for the employee and is available to view on their Employee Dashboard with a status of *Appointed*.

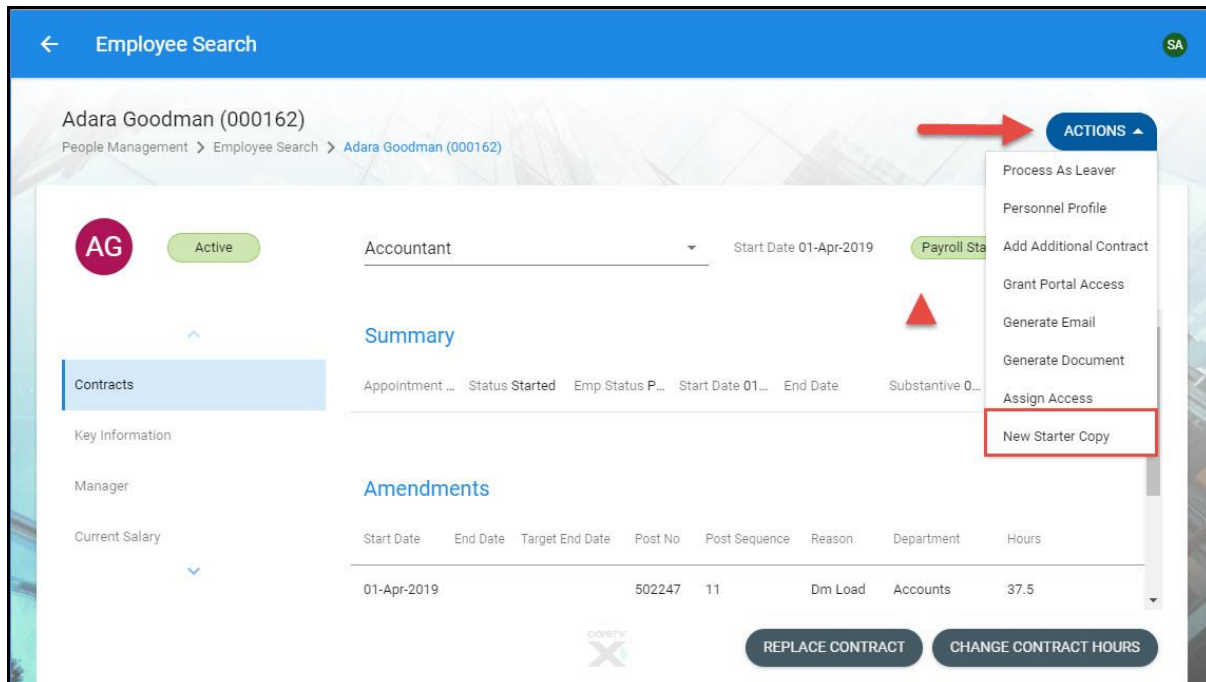

However, until the contract is commenced for the employee, the employee and their contract will not be available to the payroll team to process. The act of *commencing* the appointed for a specified *Commenced Date* will confirm that the employee has started in organisation and should be paid the contracted salary amount from that date.

Please refer to [2.1.2 Commence Appointment](#) for full details on the options available to commence the employee's Post Appointment/Contract.

3. Copying a New Starter

3.1. Copying a New Starter

Within an Employee Record, an option is available within the **Actions** button called *New Starter Copy*. Using this feature loads the standard new starter wizard which requires you to complete as per [2.1.1 New Employee Wizard](#).

The following table outlines the items that are copied over and the ones that are not.

Item	Copied	Description
Personal Information	No	Must be entered in from scratch for the new starter.
Organisational Structure	Yes	Can be updated to reflect employees correct information before contract is commenced.
Contract Details	Yes	- Defaults in the details from the Post Profile (as per existing new starter process) - The contract details are not copied, and the user must complete the remaining fields.

Item	Copied	Description
Roster Team Area	Yes	The person's team area is copied based on the contract start date entered and does not assign future team area assignments.

Note: The Copy New Starter feature is available on both the People Management Dashboard and also within the Devolved HR options on the My Team widget on the Manager Dashboard.

3.2. Non-Auto Post Restriction

If the current employee is within a non-auto authorised or auto commenced post, a new sequence of the post profile needs to be authorised prior to the copy process being carried out. A message is displayed when trying to copy a new starter from employee who has a planned post with no available sequences.
