1. Overview

1.1. Purpose of the Guide

This document provides guidance on how to configure *Employee Onboarding* on PeopleXD Portal.

This includes:

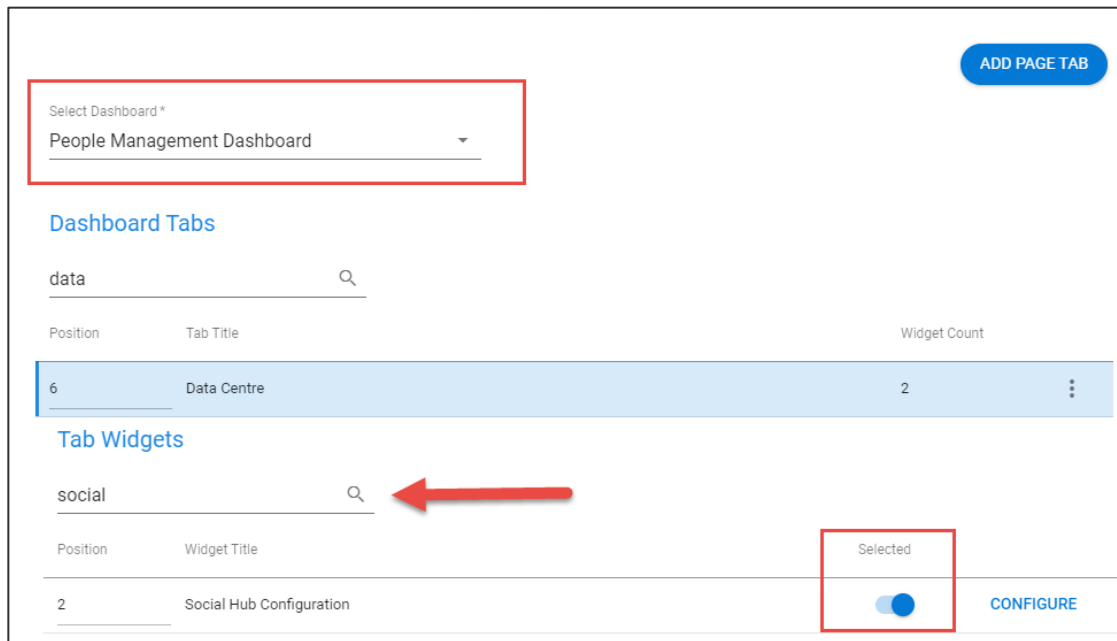

- The *Social Hub Configuration* widget.
- How to configure each element of the *Social Hub* including Checklists, Pages etc.
- Configuring the *Social Hub* dashboard / landing page.
- My Team configuration.
- Setting up Notifications.
- Setting up Events.
- Reporting on *Employee onboarding* via Insight.
- User Access to *Employee onboarding* for employees, managers and administrators.

The corresponding document *Employee Onboarding v28: How to Use - User Guide* provides end user training for how to use *Employee onboarding* via the *Social Hub* dashboard.

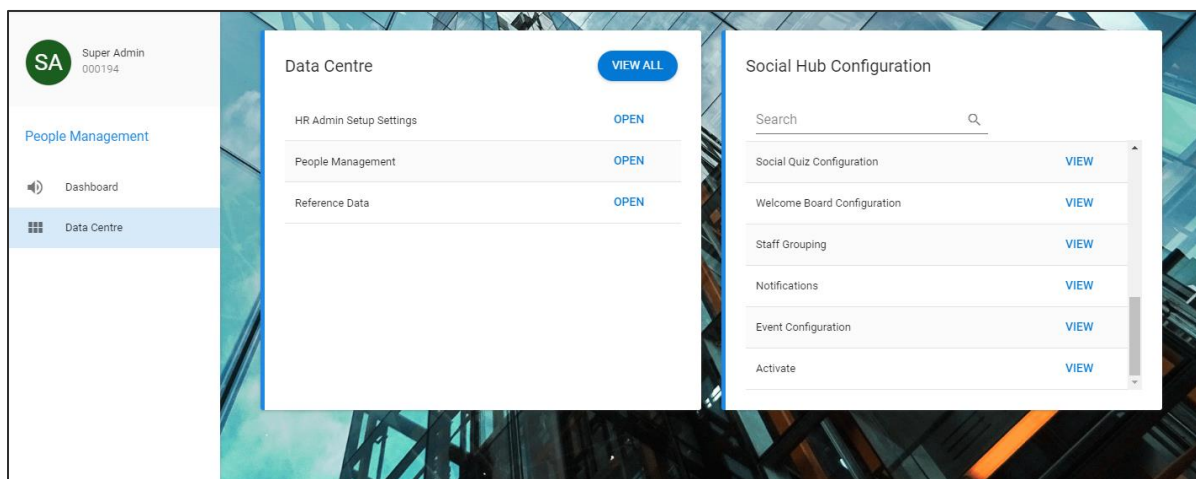

2. Employee Onboarding Configuration Widget

To enable to *Employee Onboarding Configuration* widget:

1. Navigate to the Dashboard Configuration screen.
2. Select **People Management Dashboard** from the Select Dashboard drop-down list.
3. Select the applicable tab you require the widget to appear on.
4. Search for and enable the Selected toggle for the Social Hub Configuration widget.

The Social Hub Configuration widget now displays on your applicable dashboard.

3. Switch On Employee Onboarding

There are two options available when enabling *Employee Onboarding*:

- **Enable** - Suitable if you are setting up onboarding for the first time on PeopleXD OR you do not intend to import checklists created for pre-v27 *Onboarding Checklists* on PeopleXD.
- **Import Before Enabling** - Suitable if you are already using an earlier version (pre-v27) of *Onboarding Checklists* in PeopleXD. Jump straight to [3.2 Import Before Enabling](#) if you wish to use this option, as it must be completed before *Employee Onboarding* is enabled.

Note:

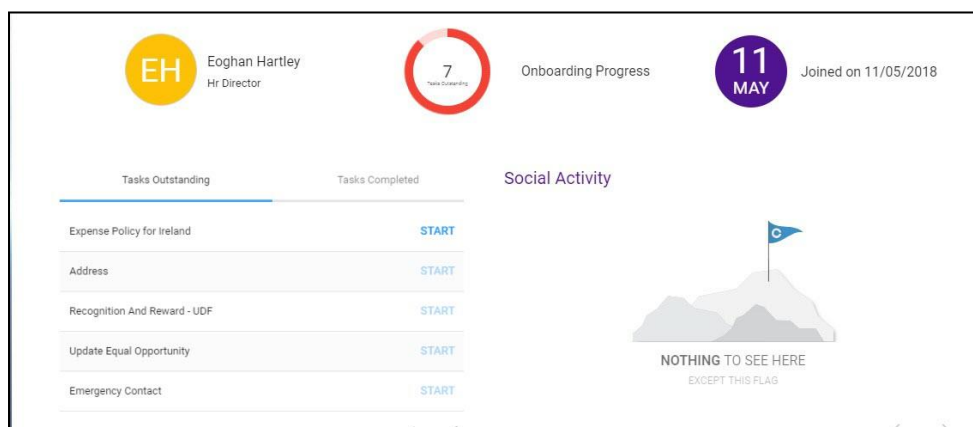

- If *Employee Onboarding* is not enabled, then the existing *Onboarding Checklists* module (pre-v27) will be available to users within the Classic UI.
- If *Employee Onboarding* is enabled, then this means the pre-v27 onboarding dashboard available to new starters will not be there anymore and instead *Employee Onboarding* will be made available for employees to complete their tasks i.e. the *Social Hub*.
- *Employee Onboarding* is not available in the Classic UI.

3.1. Enable

To enable *Employee Onboarding*:

1. Navigate to the **Social Hub Configuration** widget.
2. Click **View** on the Activate option.
3. Click the **Enable** tile under the Onboarding section.
4. Enter the Start Date.
5. Click **Enable**.

On completion, employee onboarding is now enabled for users.

Note: Start Date

As part of the *Employee Onboarding* activation, it is mandatory to provide a *Start Date*.

- Employees who joined before this date will be marked as having completed onboarding irrespective of whether they still have uncompleted items on the old onboarding solution.
 - It is possible to utilise an Insight report, or the *Onboarding Progress* screen to determine a date, if employees are required to complete tasks via *Social Onboarding*. This is applicable to upgrades only, and organisations using the *Social Onboarding* feature.
- Employees who have a join date after this date will be assigned active checklist items, if applicable. These items may be global or match their restriction criteria.
- Exceptions to the above:
 - In the scenario where an organisation has upgraded from the old onboarding solution to *Social Onboarding*, and who have imported their checklist, employees in the process of onboarding will see the same tasks they have outstanding & completed as they did in old onboarding (see [3.2 Import Before Enabling](#)).
 - It is important to note that if an organisation has multiple checklist profiles in the old onboarding solution, then default checklist items will be created as global items. If these items are left as 'global', the items display for all employees even though they may have completed onboarding already, via another non-default checklist profile, or as part of their own profile.

3.2. Import Before Enabling

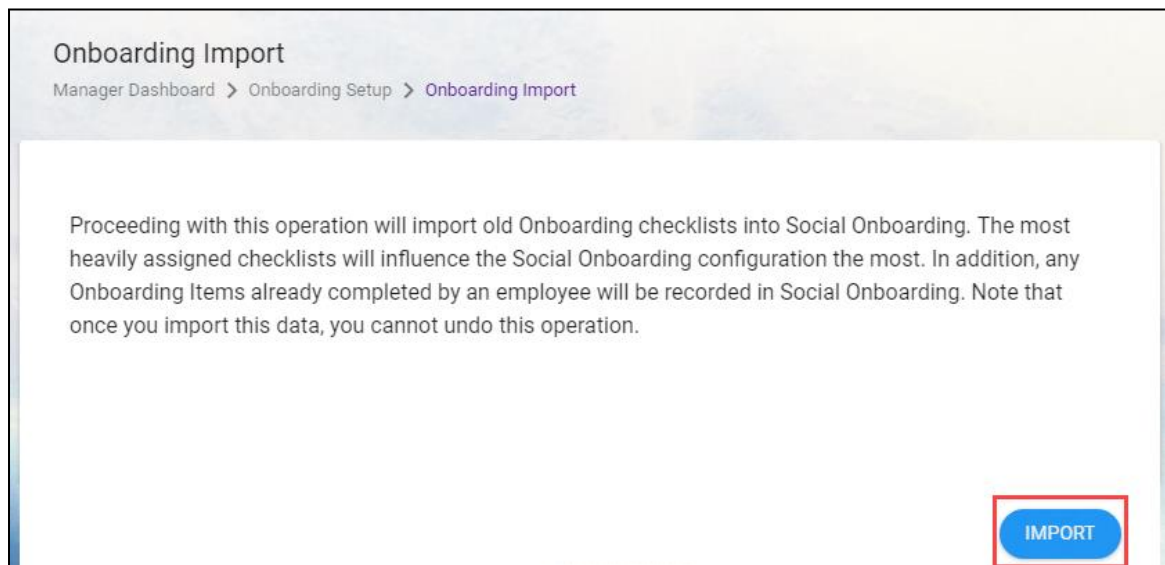

This allows you to import existing onboarding checklist items from the old pre-v27 onboarding feature. It is recommended that if an organisation wishes to use this function (which is optional) then this should be done before enabling *Employee onboarding*.

Note: It is recommended that new checklists are created from scratch for *Employee Onboarding* rather than importing old checklists.

To import existing onboarding checklists:

1. Navigate to the *Social Hub Configuration* widget.
2. Click **View** on the Activate option.
3. Click the **Import** tile within the Onboarding section.

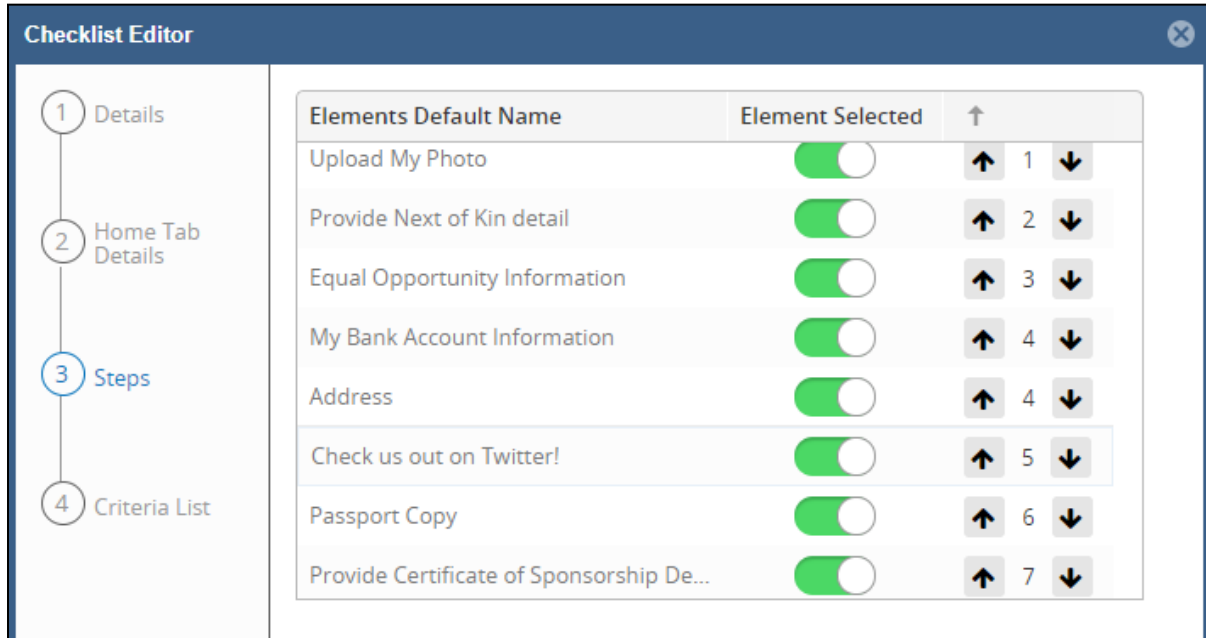

An on-screen message displays that outlines considerations if proceeding with the import.

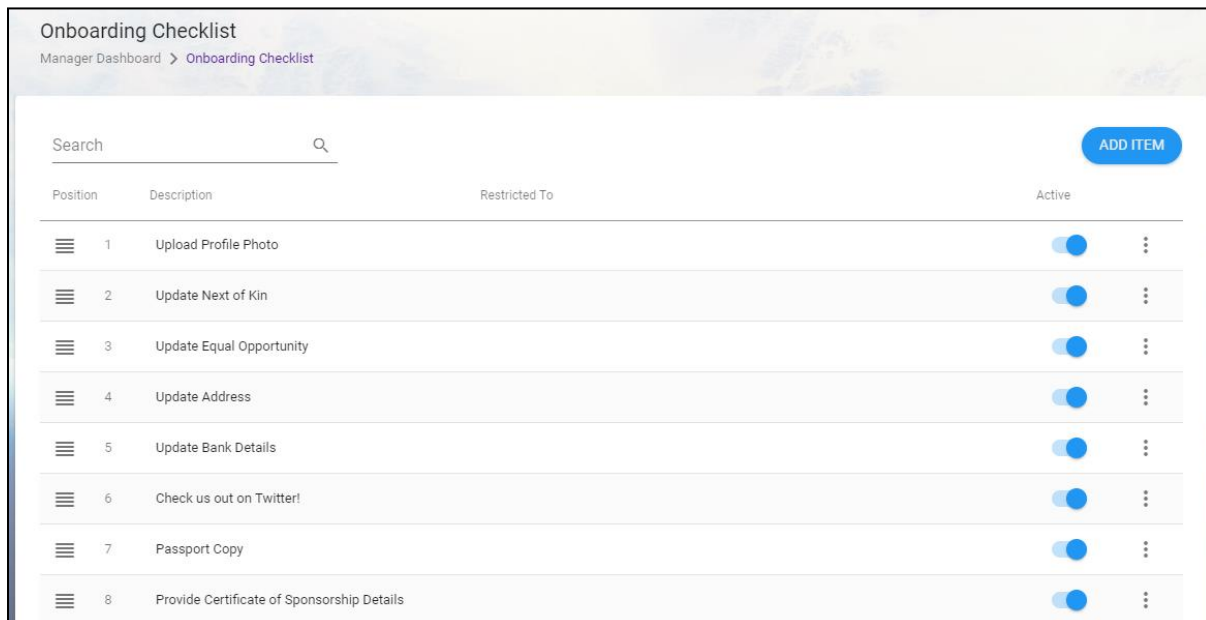

4. Click **Import**.
The import process begins. A notification will appear via the notifications centre as soon as the import is complete.
5. Once the import has completed, follow the steps outlined in [3.1 Enable](#) to enable Employee onboarding.

3.2.1. Import example:

In this example, the below screenshot shows the onboarding checklist that was configured in the pre-v27 onboarding checklist (Classic UI).

By completing the onboarding import, this checklist is now displayed on employee onboarding *Onboarding Checklist*.

4. Onboarding Checklists

4.1. Add Onboarding Item - Screen Overview

The table below provides an overview of the *Add Onboarding Item* screen.

Screen Field	Overview
Item Type	When creating a new checklist item, you must select the <i>Item Type</i>. The list below outlines the item types available to choose from: • Input items • Custom pages • User defined items • Policies • Documents requested • Employee Documents • Surveys See section 4.1.1 Item Types for further detail on each option.
Onboarding Item	Items available in the Onboarding Item drop-down list are dependent on the item that has been selected in the Item Type drop-down list. See section 4.1.1 Item Types for further detail.

Screen Field	Overview
Title	You must give each checklist item a specific title. This title appears for the employee when they view the item in their Tasks Outstanding list on the <i>Social Hub</i> .
Available on Day	You can indicate whether each checklist item should be made available at a specific time after the employee's start date. For example, confidential information that should not be made available to a new employee before their join date. • By default, this is set to '0'. This means there is no rule in place, and the checklist item can be made accessible before the employee join date. • If you set this to '1', the checklist item is accessible to the employee on day one of employment. This is their join date within the organisation. • The purpose of this feature is to make confidential information only accessible after the employee's join date, but also to provide a more tailored onboarding experience where certain checks can be made available in week 1, week 2, etc.  Note: If a start date restriction is in place, then the checklist item will be available for the user to see, but it's not accessible: • You can enter any number up to 999. • It is important to consider when using this feature that checklist items should be ordered correctly and must be placed before any checklist items that do not have this restriction. • This feature is only applicable for to new hires and re-joiners. Therefore, the join or re-join date, and not for employees completing cross boarding tasks.
Optional Information	This field allows you to add more detail to explain the nature of the task to the employee. This can aid completion or inform the employee why certain information is being requested.

4.1.1. Item Types

The below provides an overview of items types on the *Add Onboarding Item* screen.

Item Type	Overview
Input Items	If the <i>Item Type</i> is <i>Input Items</i>, then the below options are available from the Onboarding Item drop-down list. • Upload profile photo • Update next of kin • Update address • Update equal opportunity • Update bank details • Update bio  Note: If data already exists that has been populated by an employee previously, in the scenario of a re-joining employee or if already populated by HR, the employee can review and update this information accordingly.
Custom Pages	If the <i>Item Type</i> is Custom Pages, any custom pages created are available for the user to select to be part of the checklist.
User Defined Forms	If the <i>Item Type</i> is (UDF) User Defined Items, the employee can complete the form to add a new UDF against their HR record. If this UDF type already exists against the employee record, the last created UDF record of this type is loaded. This information is displayed to the employee to update. This uses 'employee' type UDFs only.
Policies	If the <i>Item Type</i> is Policies, any policy documents or employee handbooks that have been uploaded into the system are available to add to the checklist. For further information, see section 4.2.4 Policies Item.
Documents Requested	If the <i>Item Type</i> is Documents Requested, employees can upload relevant documents to add to their employee record. If a document already existed in their employee file, it will display to the employee, to select from. If required employees can upload a newer version of the document requested, or if the existing document is up to

Item Type	Overview
	date, then they can simply mark the task as complete. This process does not create a new user defined form record. For further information, see section 4.2.5 Documents Requested Item .
Employee Documents	Documents that are attached to the employee's HR record can be shared For further information, see section 4.2.6 Employee Documents .
Surveys	Bespoke surveys can be created to be added as a checklist item for Onboarding and Offboarding, allowing you to gain greater insight to your staff and help drive internal change. Customised surveys can be created for different employee groups, business lines, leavers etc through use of the checklist criteria group assignment. For further information, see section 4.2.7 Surveys

 Note:

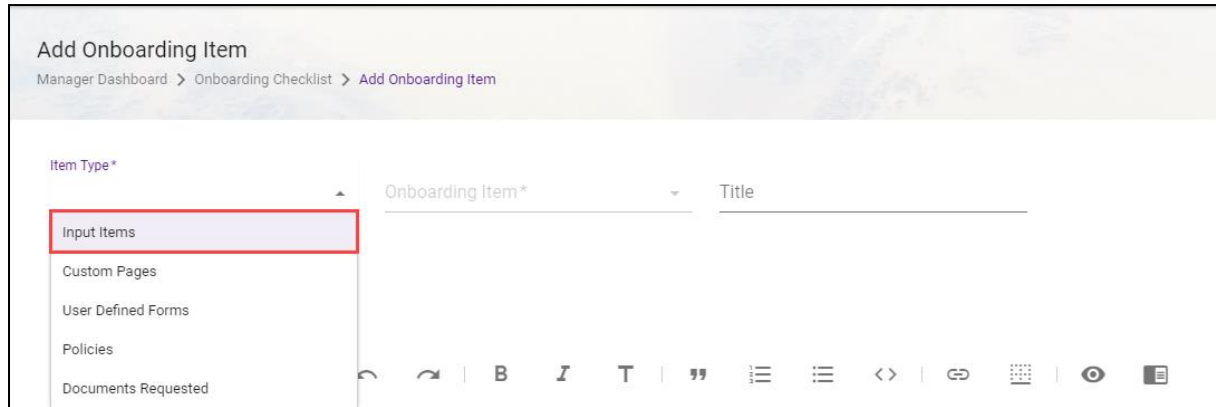

Checklists should be configured with global items present first, which every employee completes. This minimises the creation of duplicate checklist items assigned to diverse groups.

4.2. Create a Checklist Item

4.2.1. Input Item

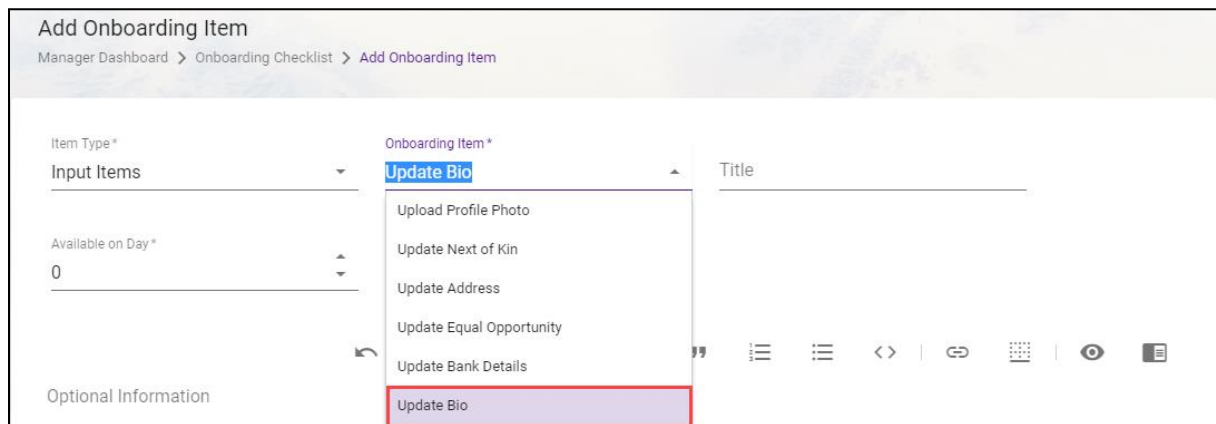

To create an input checklist item:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Onboarding Checklist.
3. Click **Add Item**.
4. Select **Input Items** from the Item Type drop-down list.

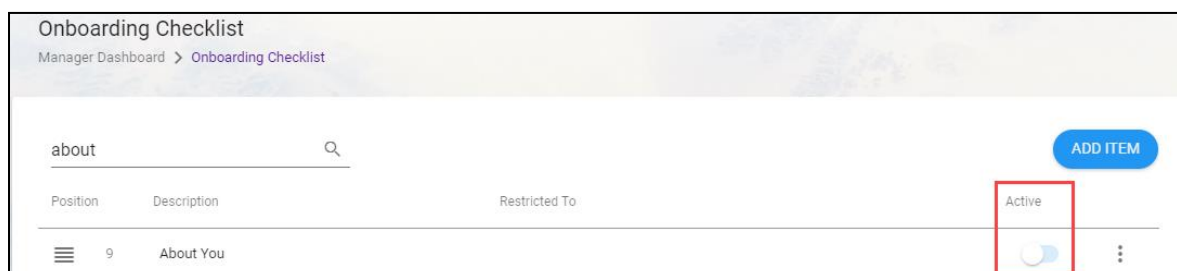

5. Select the applicable Onboarding Item from the drop-down list.

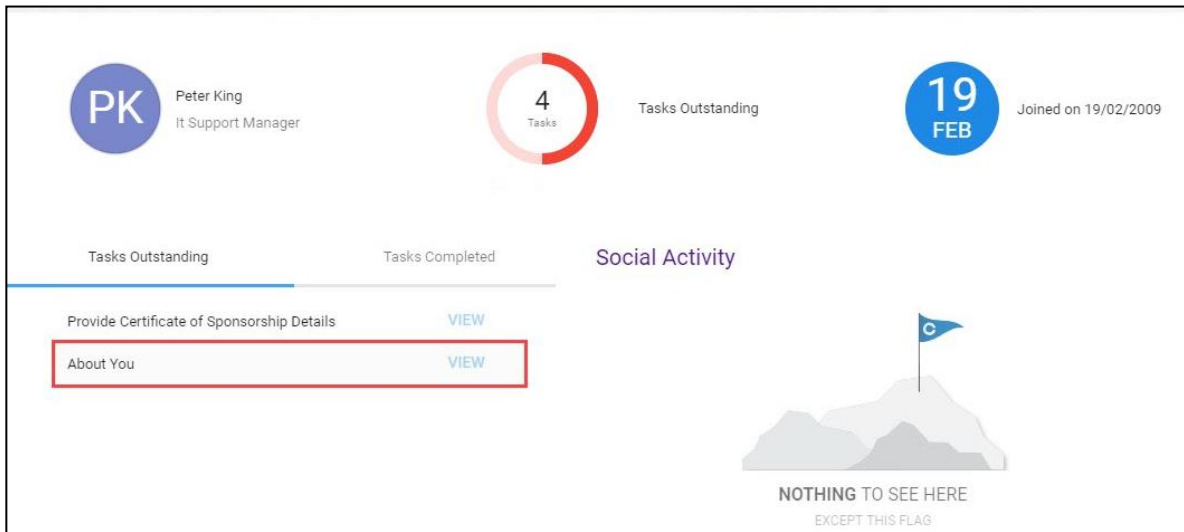

In this example the checklist item requests the employee to complete their bio information. Therefore, the **Update Bio** Onboarding Item is selected.

6. Enter a Title for the Onboarding Item.
7. If applicable, set the Available on Day field.
8. If applicable, enter guidance or more information in the Optional Information field.
9. Click **Save**.
10. New onboarding items default as inactive. Enable the **Active** toggle on the Onboarding Checklist screen.

Once activated, the onboarding item appears on the *Social Hub - Tasks Outstanding* list.

4.2.2. Custom Page Item

Note:

See [5. Custom Pages](#) for guidance on how to create a custom page. You must first configure a custom page in order to be able to add one as a checklist item here.

To create a custom page checklist item:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Onboarding Checklist.
3. Click **Add Item**.
4. Select **Custom Page** from the drop-down list.
5. Select the applicable Custom Page from the drop-down list.

The screenshot shows the 'Add Onboarding Item' form. The 'Item Type*' dropdown is set to 'Custom Pages'. The 'Onboarding Item*' dropdown is open, showing three options: 'Check us out on Twitter!', 'Check us out on LinkedIn' (highlighted with a red border), and 'This is an example Text page'. The 'Available on Day*' field is set to 0. The 'Title' field is empty.

6. Enter a Title for the onboarding item.
7. If applicable, set the Available on Day field.

8. If applicable, enter guidance or more information in the Optional Information field.
9. Click **Save**.
10. New onboarding items default as inactive. Enable the **Active** toggle on the Onboarding Checklist screen.

4.2.3. UDF Item

To create a UDF checklist item:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Onboarding Checklist.
3. Click **Add Item**.
4. Select **User Defined Forms** from the drop-down list
5. Select the relevant UDF. This only displays employee type UDFs only.
6. Enter a Title for the onboarding item.
7. If applicable, set the Available on Day field
8. If applicable, enter guidance or more information in the Optional Information field.
9. Click **Save**.
10. New onboarding items default as inactive. Enable the **Active** toggle on the Onboarding Checklist screen.

4.2.4. Policies Item

To create a policies checklist item:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Onboarding Checklist.
3. Click **Add Item**
4. Select **Policies** from the Item Type drop-down list
5. Select the applicable policy from the drop-down list.
6. Enter a Title for the Onboarding Item.
7. If applicable, set the Available on Day field.
8. If applicable, enter guidance or more information in the Optional Information field.
9. Click **Save**.
10. New onboarding items default as inactive. Enable the **Active** toggle on the Onboarding Checklist screen.

4.2.5. Documents Requested Item

To create a document requested checklist item:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Onboarding Checklist.
3. Click **Add Item**
4. Select **Document Requested** from the Item Type drop-down list
5. Select the applicable document from the drop-down list.
6. Enter a Title for the Onboarding Item.
7. If applicable, set the Available on Day field.
8. If applicable, enter guidance or more information in the Optional Information field.
9. Click **Save**.
10. New onboarding items default as inactive. Enable the **Active** toggle on the Onboarding Checklist screen.

4.2.6. Employee Documents

Creating Document Types for Selection

Any documents that already exist on the Employee record can be shared here, if created prior to the Onboarding process by HR. For example, an employee's contract.

To add a Document Type to be featured follow the below steps:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Employee Documents.
3. Click **Add**.
4. Enter in the document type to be included along with it's name.

4.2.7. Surveys

Creating a Survey

Bespoke surveys can be created to be added as a checklist item for Onboarding and Offboarding, allowing you to gain greater insight to your staff and help drive internal change.

Customised surveys can be created for different employee groups, business lines, leavers etc through use of the checklist criteria group assignment.

Before adding a survey to a checklist, you must first create it and its contents. To do this:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Surveys.
3. Click **Add**.
4. Enter a description, a type, and an optional header image.

Creating a Survey Section

After creating a survey, you will be automatically prompted to add a new section to the survey. This is a mandatory step, otherwise the survey will not be populated with any data.

Add the section name and choose a layout from the following:

- Row
- Column
- Column (Full Screen)

Creating a Section Field

To add questions or items to the survey, follow the below steps:

1. Click **Add Field** on the *Configure Survey Fields* screen, once a section has been added.

Configure Survey Fields

People Management > Surveys > Edit Survey > Configure Survey Fields

ADD SECTION ACTIONS

Feedback (Likert Model)

Section Details

Section Name* Feedback (Likert Model)

Layout* Row

Fields

ADD FIELD REMOVE FIELD SAVE

2. Configure the following items:

Item	Explanation / Options
Name of Field	This is the name of the question / statement to be used. Maximum 500 alphanumeric characters.
Required Field	This option specifies if the item is mandatory or not.
Type of Field	Text Field
	Text Area
	Date Field
	Number Field
	Checkbox Field
	Combo Field
	Combo Field (Reference Data)
	Radio Group
Values/ Maximum Value / Reference Data	Slider Field
	This option will only show if any of the below types are selected:
	- Combo Field
	- Radio Group
	- Slider Field (Maximum Value)
	- Combo Field (Reference Data)

3. Click **Save**.

4.3. Maintain Checklist items

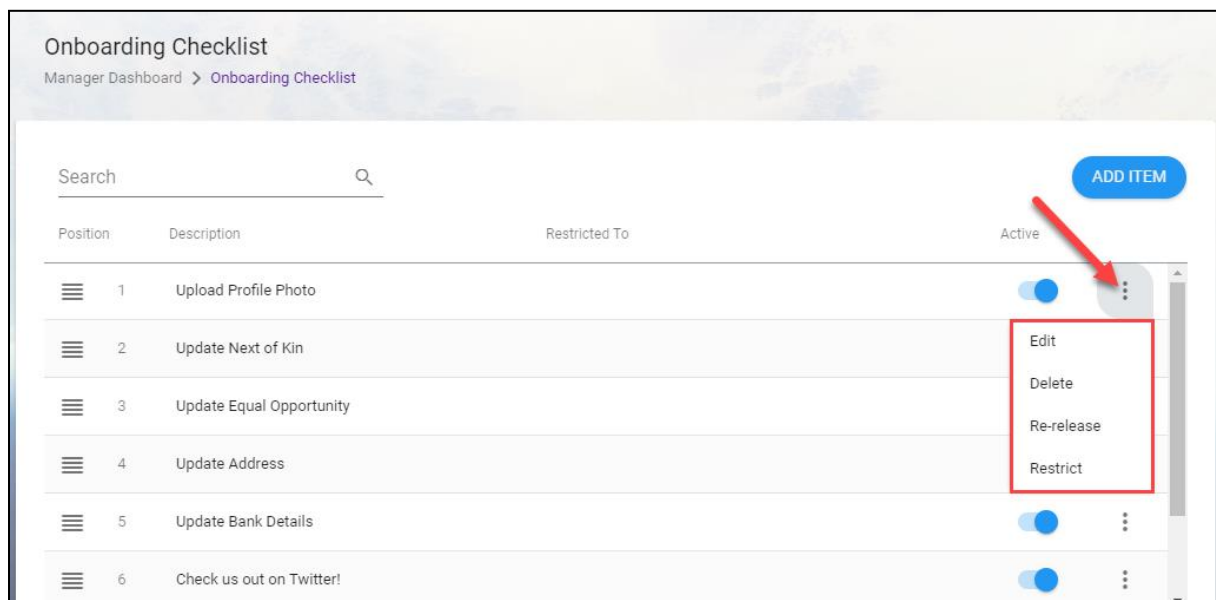

To maintain a checklist item:

1. Navigate to *the* Social Hub Configuration widget.
2. Click **View** on Onboarding Checklist.

The *Onboarding Checklist* screen displays. This screen lists all checklist items on the system.

From here, you can action the following tasks for existing checklist items:

- Edit
- Delete
- Re-release
- Restrict

Note: Any changes made will affect existing tasks being completed by employees, or past completed items. For example, if you delete a checklist item that otherwise was completed or is being completed by staff it will be removed from their *Tasks Outstanding* list.

4.3.1. Edit Checklist Items

To edit a checklist item:

1. Expand the three dot menu on the applicable onboarding item.
2. Select **Edit**.
3. Edit the Title, Available on Day, and Optional Information, as applicable.
4. Click **Save**.

4.3.2. Delete Checklist Items

To delete a checklist item:

1. Expand the three dot menu on the applicable onboarding item.
2. Select **Delete**.
3. Click **Yes** to confirm that the checklist item will be permanently deleted. This cannot be undone.

4.3.3. Re-release Checklist Items

You can re-release existing checklist items that need to be completed by employees again. The checklist item is re-released to employees who have already completed the task previously. It is not re-released to staff who still have the checklist item as an outstanding item in their *Tasks Outstanding* list.

If a checklist item is one of the types listed below, it requires the user to review their existing information/documentation and update as necessary.

- Input items
- User defined fields
- Documents requested

If a checklist item is one of the types listed below, it requires the user to review the information contained within the task and mark the task as complete.

- Custom pages
- Policies

To re-release a checklist item:

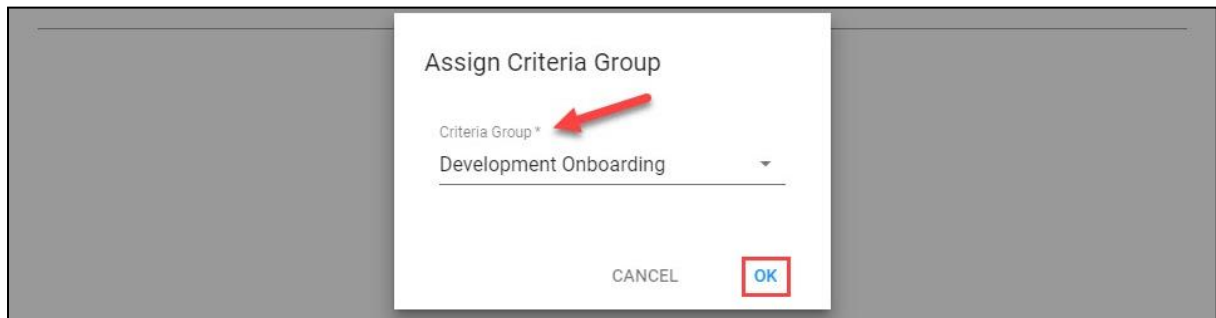

1. Expand the three dot menu on the applicable onboarding item.
2. Select **Re-release**.

This checklist item now appears on the employee's *Tasks Outstanding* list.

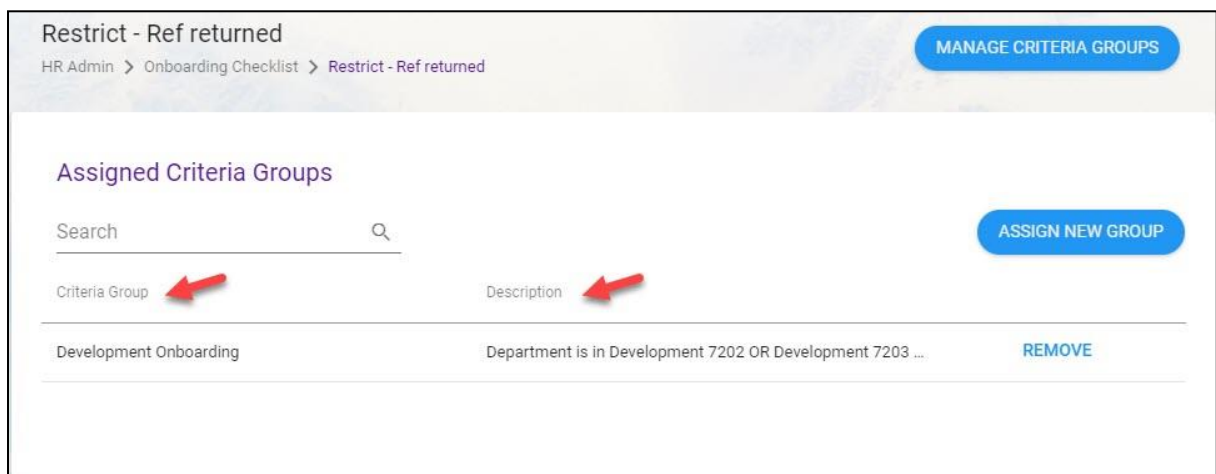

4.3.4. Restrict Checklist Items

To restrict a checklist item:

1. Expand the three dot menu on the applicable onboarding item.
2. Select **Restrict**.
3. Select **Assign New Group**.
4. Select the applicable *Criteria Group* from the drop-down list.
5. Click **OK**.

The *Checklist Item* is now restricted to only be available to employees within the applicable *Criteria Group*. This process can be repeated to add multiple *Criteria Groups*.

See [13. Staff Grouping](#) for guidance on how to create criteria groups.

5. Custom Pages

5.1. Add Custom Page - Screen Overview

Employee Onboarding provides the ability to create custom content pages which can then be added to the main *Social Hub* dashboard or can be added as a checklist item for an employee to review and complete. The below table provides an overview of the *Add Custom Page* screen. These are mandatory fields.

Screen Field	Explanation
Description	You must enter a description for the page. This description is visible on the employee <i>Tasks Outstanding</i> list, and the <i>Social Hub</i> dashboard, if applicable.
Type	You must select a page type. See the 5.1.1 Custom Page Types table for further information on the types of custom pages that can be added.
Upload cover image	You must upload a cover image for the page. This cover image displays on the <i>Social Hub</i> landing page, if applicable.

5.1.1. Custom Page Types

Page Type	Explanation
Text	General text can be added to this page.
Video	Embedded video links can be displayed on this page, along with general text.  Note: You must specify the specific embedded link, for example: Incorrect Link: 'https://www.youtube.com/watch?v=ABC' Correct Link: 'https://www.youtube.com/embed/ABC' The link will differ depending on where the content is being referenced from. It's recommended to consult with your organisation's own Security/IT team before configuring. For example, ensure sites do not violate internal policies. A link may navigate to a whitelisted site, however, the site itself may have security restrictions blocking content from being displayed in other applications. PeopleXD does not have control over this. The <i>Content Security Policy</i> widget is available in Security.

Page Type	Explanation
Map	This provides a Google Maps address lookup, to display on an embedded map page. Drop pins can be added to the map, along with general text on the page.
Link	This provides external links on a page. The employee can navigate to external resources. General text can be added to this page.
Image	Multiple images can be added to this page, along with general text. Employees can view these images upon selection. A title must be added to each image.

5.2. Create a Custom Page

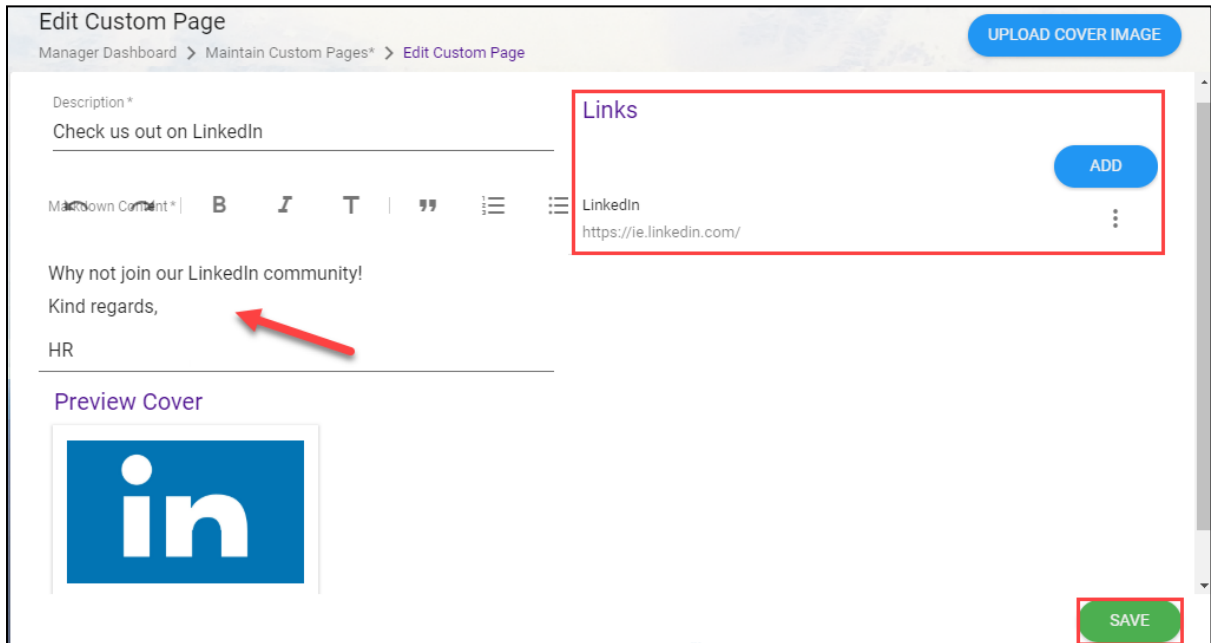

5.2.1. Link Page

To create a link custom page:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Maintain Custom Pages.
3. Click **Add**.
4. Enter a Description.
5. Select **Link** from the Type from the drop-down list.
6. Click  to upload a cover image.
7. Click **OK**.

The *Edit Custom Page* screen displays.

8. Click **Add**, to add a link.
9. Enter a Title and URL.
10. Click **OK**.
11. Enter any general text required and use the markdown editor to apply simple formatting.
12. Click **Save**.

5.2.2. Text Page

To create a text custom page:

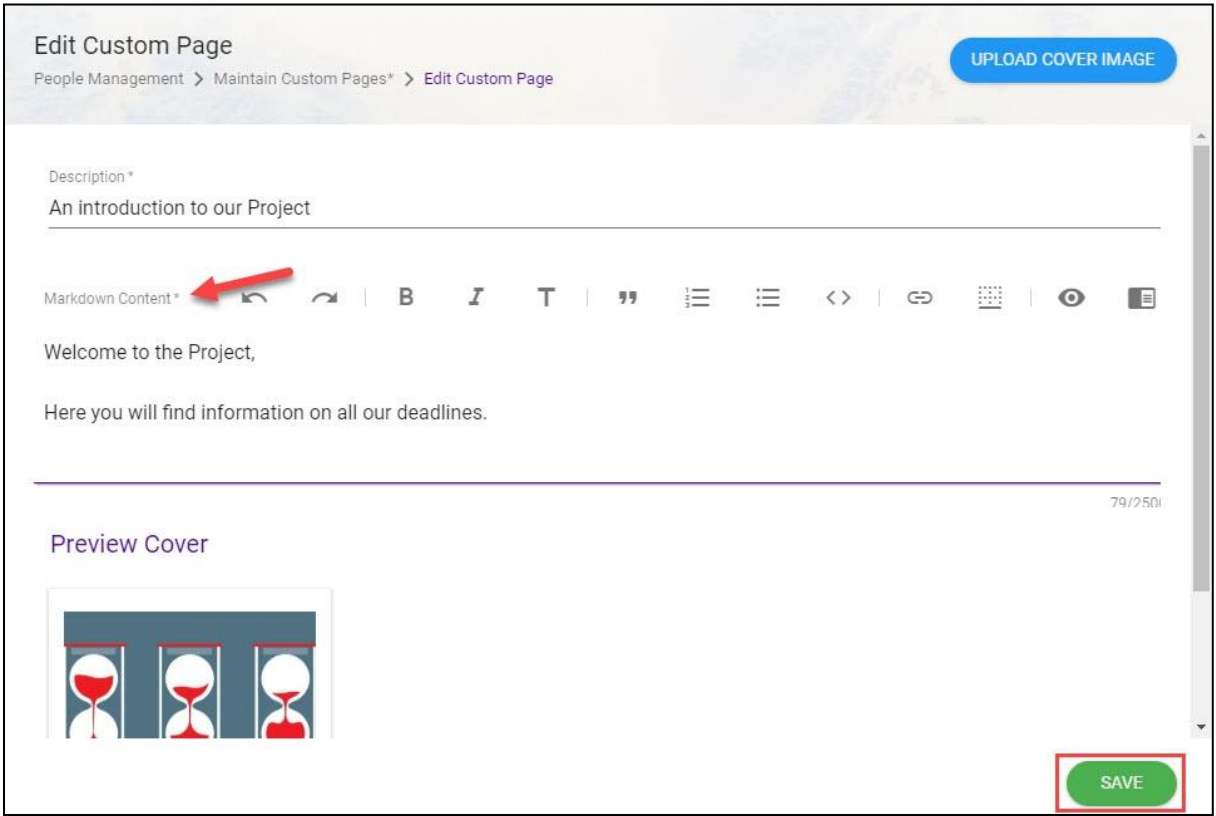

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Maintain Custom Pages.
3. Click **Add**.
4. Enter a Description.
5. Select **Text** from the Type from the drop-down list.

6. Click  to upload a cover image.

7. Click **OK**.

The *Edit Custom Page* screen displays.

7. Enter the text. Use the markdown editor to apply simple formatting.
8. Click **Save**.

Edit Custom Page

People Management > Maintain Custom Pages* > Edit Custom Page

UPLOAD COVER IMAGE

SAVE

5.2.3. Video Page

1. To Navigate to the Social Hub Configuration widget.
2. Click **View** on Maintain Custom Pages.
3. Click **Add**.
4. Enter a Description.
5. Select **Video** from the Type from the drop-down list.
6. Click  to upload a cover image.
7. Click **OK**.

The *Edit Custom Page* screen displays.

8. Enter the text. Use the markdown editor to apply simple formatting.
9. Click **Add**.
10. Enter the video Title and embedded video *URL*.
11. Click **OK**.
12. Click **Save**.

The screenshot shows the 'Edit Custom Page' interface. On the left, the 'Description' section includes a text input with 'Our Awards Ceremony' and a markdown editor with the text 'If you didn't get to attend this years award ceremony check out all the best moments on this video from from the night!'. On the right, the 'Videos' section features a table with one entry: 'Awards Ceremony' with the URL 'https://www.youtube.com/embed/ABC'. A red box highlights this video entry. At the bottom right, a green 'SAVE' button is indicated by a red arrow.

Note:

It is possible to create and configure a Video Page, however, by default, videos hosted outside of PeopleXD cannot be viewed/embedded, this includes custom video pages created through Social Onboarding. This provides a level of control, protection, and security.

If your organisation wishes to include embedded Video Pages on the main onboarding dashboard, or within the Team Pages, these sources must be added to the 'frame-src' on the Content Security Policy widget in Security. If an external Custom Video Page is added but does not have an entry on the [Content Security Policy](#) widget, the video will be blocked, and users will not be able to view it.

This must conform to the standard syntax for Content Security Policy and you should consult with your Security/Technical team to include these.

Content Security Policy Widget

To add a source to the Content Security Policy widget:

1. Navigate to the Content Security Policy widget on the Security Dashboard.
2. Click **Edit**.
3. Add the source to the 'frame-src' field.
4. Click **Save**.

Edit Content Security Policy
Security > [Edit Content Security Policy](#)

You should only change these settings if you are aware of the impact. Making amendments here will have an impact on your entire instance of your CorePortal application, therefore changes should only be made with the appropriate level of due diligence and not be made lightly. We do recommend you make these changes in conjunction with your Security colleagues / advisers. Content Security Policy provides a facility to define the content that is allowed into and out of your CoreHR Application. For example, by default CoreHR allows only content content from external sources, and, by default, these external sources will be blocked because of the CSP. To allow and facilitate this content into your CoreHR Application, you will be required to amend the Content Security Policy.

Key	Value

SAVE

5.2.4. Map Page

To create a map custom page:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Maintain Custom Pages.
3. Click **Add**.
4. Enter a Description.
5. Select **Map** from the Type from the drop-down list.

6. Click  to upload a cover image.

7. Click **OK**.

You are returned to the *Edit Custom Pages* screen.

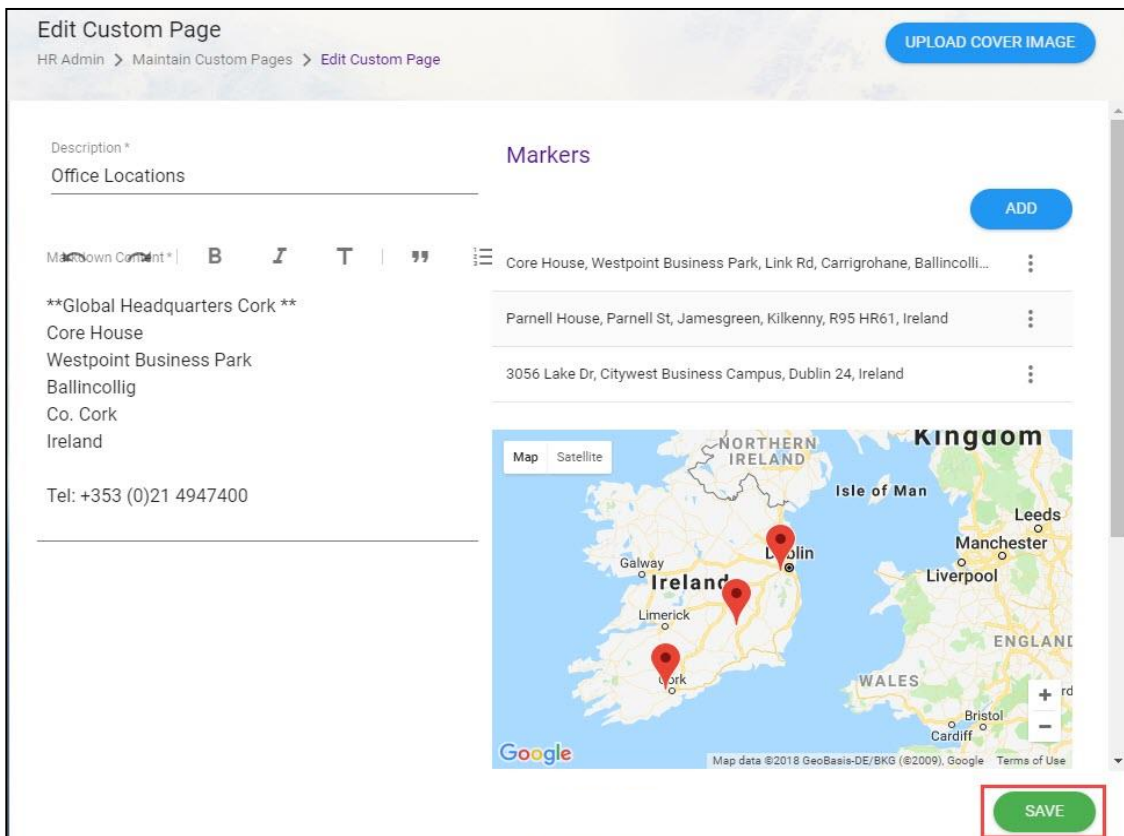

8. Enter the general text in the *Markdown Content* section.
9. Click **Add**.

The *Add Marker* pop-up displays.

10. Enter the *Marker Location*. This is the full address of the location.
11. Click **OK**.

You are returned to the *Edit Custom Page* screen.

12. Click **Save**.

5.2.5. Image Page

To create an image custom page:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Maintain Custom Pages.
3. Click **Add**.
4. Enter a Description.
5. Select **Image** from the Type from the drop-down list.

6. Click  to upload a cover image.

7. Click **OK**.

You are returned to the *Edit Custom Page* screen.

8. Enter the text. Use the markdown editor to apply simple formatting.

9. Click **Add**.

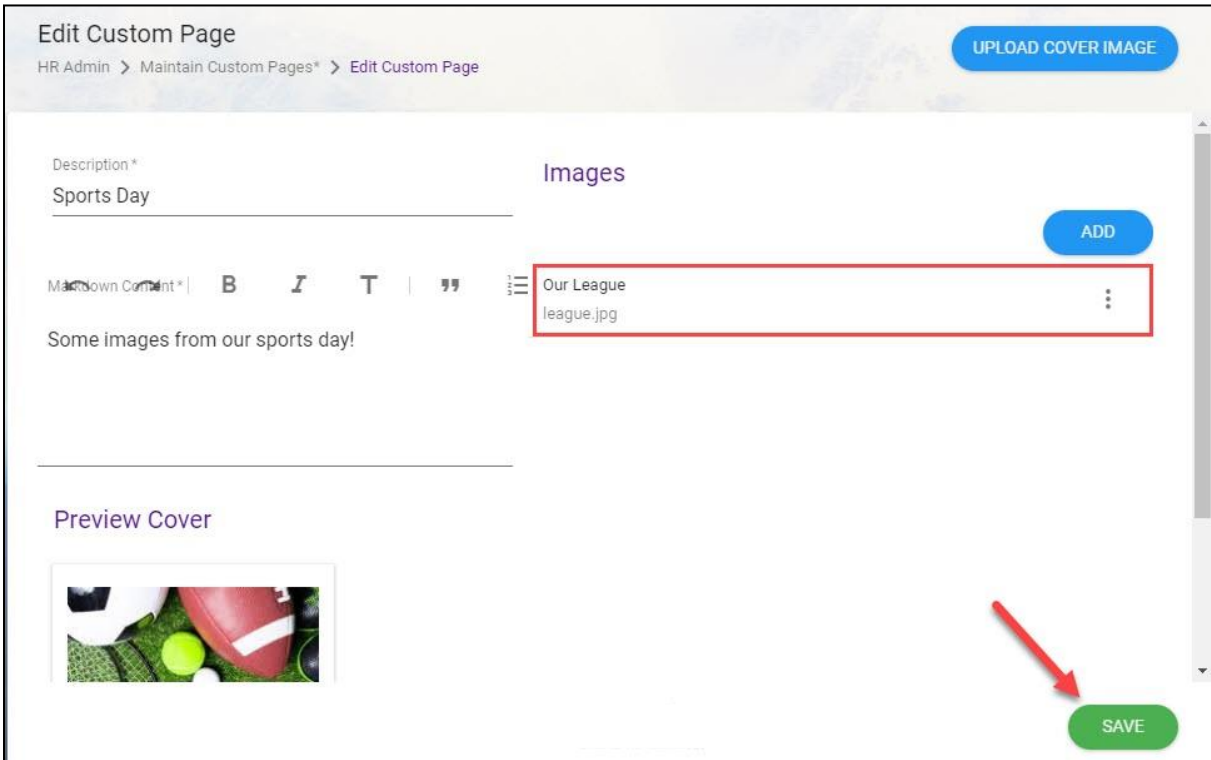

10. Enter a Title.

11. Click  to upload the image.

12. Click **OK**.

Repeat steps 9-12 for each image on this screen.

13. Once complete, click **Save**.

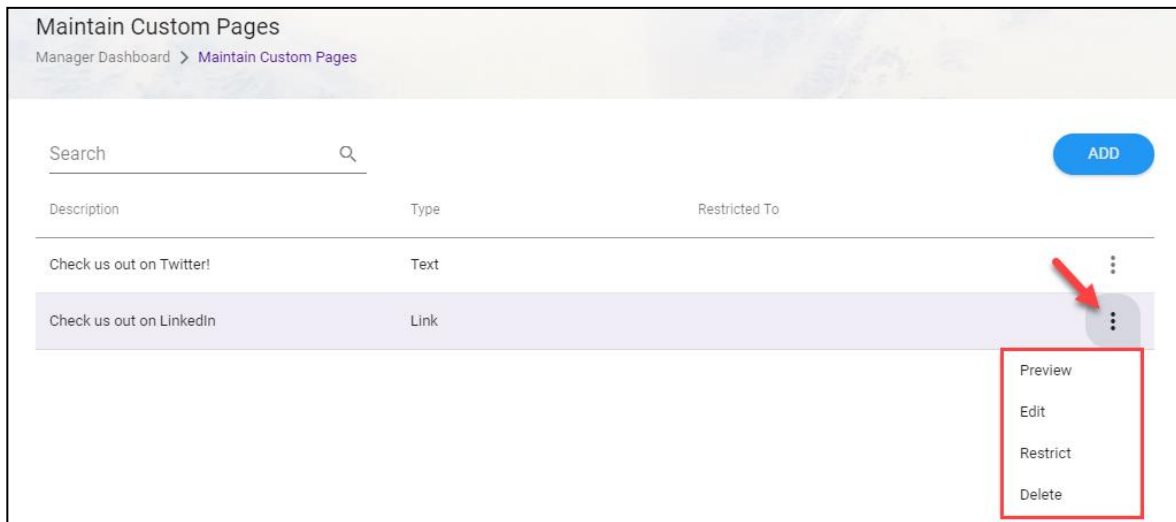

5.3. Maintain Custom Page

To maintain a custom page:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Maintain Custom Pages.

This screen lists all custom pages on the system. From here, you can action the following tasks for existing custom pages:

- Preview
- Edit
- Restrict
- Delete

5.3.1. Preview Custom Pages

To preview a custom page:

1. Expand the three dot menu on the applicable page.
2. Select **Preview**.

5.3.2. Edit Custom Pages

To edit a custom page:

1. Expand the three dot menu on the applicable page.
2. Select **Edit**.
3. Edit the *Description*, *Links*, *Markdown Content*, and upload a new cover image, if applicable.
4. Click **Save**, once complete.

5.3.3. Delete Custom Pages

To delete a custom page:

1. Expand the three dot menu on the applicable page.
2. Select **Delete**.
3. Click **Yes** to confirm that the page is permanently deleted. This cannot be undone.

5.3.4. Restrict Custom Pages

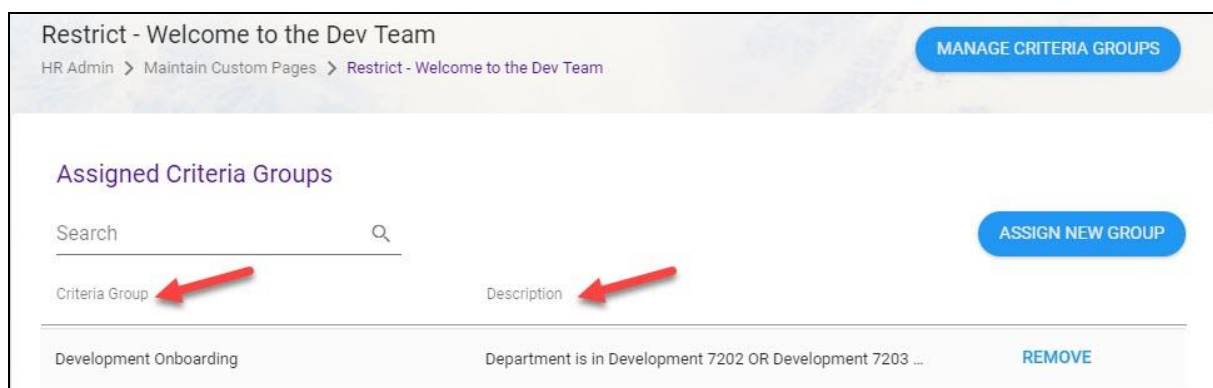

It is possible to define restriction rules to add to Custom Pages.

- If added to the Social Hub dashboard, the Custom Page only displays to users who reside within the Criteria Groups it is restricted to.
- If the Custom Page does not have restriction rules applied, then it is available to all employees to view, provided it is added to the Social Hub dashboard.
- If added as part of a checklist item, then the restriction applied here automatically applies to the checklist.

To restrict a custom page:

1. Expand the three dot menu on the applicable page.
2. Select **Restrict**.
3. Click **Assign New Group**.
4. Select the applicable *Criteria Group* from the drop-down list.
5. Click **OK**.

The *Custom Page* is now restricted to only be available to employees within the applicable *Criteria Group*. This process can be repeated to add multiple *Criteria Groups*.

See [13. Staff Grouping](#) for guidance on how to create criteria groups.

6. System Pages

6.1. System Pages Overview

The table below outlines each of the system pages:

System Page	Explanation
New Starters	The New Starters page displays all active employees who reside within same employee directory definition as the user. There are two tabs present on the screen: <i>Recently Joined</i> tab: Displays employees who joined in the last 30 days. <i>Coming Soon</i> tab: Display employees who will join in the next 30 days.  Note: The New Starters page displays new starters and re-joiners, and does not redisplay existing staff who may be moving through different employee directory definitions. The New Starters page does not require configuration. Employee directory definition is configured in section 6.2 Employee Directory Configuration.
Team Page	The Team Page displays an employee's team. The employee can: - View members of their team. - View the team overview. - View team specific content. For further information, view section 7. My Team Configuration.
Employee Directory	The Employee Directory page displays all other employees within the directory definition that are visible to the employee. Visibility is based on configuration, for more information, view section 6.2 Employee Directory Configuration.
Quiz	The Social Quiz page displays other employees to the employee, based on the Social Team configuration. This page randomly selects several other employees from the employee's team, one of which is the correct employee for the question being asked. Questions are configured via Social Quiz Configuration. For more information, view section 6.3 Quiz Configuration.

System Page	Explanation
Events	The Events page displays all events that are created and broadcast to all employees within the organisation. Events cannot be restricted to specific staff groupings. For further information, view section 6.4 Event Configuration .
FAQ	The FAQ page displays a searchable list of frequently asked questions. Administrators can create questions with corresponding answers. Keyword Tags can be added the question, enabling the employee to search for specific topic. For further information, view section 6.5 FAQ Configuration .

6.2. Employee Directory Configuration

The Employee Directory Configuration screen defines how an organisation controls the listings of other employees visible to an employee when viewing their pages listed below:

- Employee Directory page
- New Starters page

When employees view these screens, other employees visible to them are based on the Directory Level configuration. For example, if set to:

- **Global:** Employees displayed to the end user are every active employee on the system.
- **Company:** Employees displayed to the end user are employees that reside in their same company only.
- **Division:** Employees displayed to the end user are employees that reside in their same Division only.
- **Contract Attributes:** Employees displayed to the end user are employees with the same contract attribute only.

To configure the Employee Directory:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Employee Directory Configuration.
3. Select the applicable level from the Directory Level, drop-down list.

In this example, the 'Organisation' level is selected from the Directory Level drop-down list; therefore, the Employee Directory and New Starters screens now only display employees from within the 'Organisation' directory definition.

The screenshot shows the 'Employee Directory Configuration' interface. At the top, it says 'Employee Directory Configuration' and 'HR Admin > Employee Directory Configuration'. Below this is a list of options for the 'Directory Level': 'Cost Centre', 'Department', 'Division', 'Employment Status', 'Grade', 'Job Category', 'Location', 'Management Unit', and 'Organisation'. The 'Organisation' option is selected and highlighted in blue. A red box is drawn around the entire list of options. At the bottom right of the screen, there is a green 'SAVE' button, and a red arrow points to it.

4. Click **Save**.

6.3. Social Quiz Configuration

There are two areas within the Social Quiz Configuration screen to be configured.

- Quiz Questions

- Quiz Summary Options

Note: The list of employees from which the Social Quiz is based, requires Functional Team Areas to be setup via the My Team Configuration. For more information, view section [7. My Team Configuration](#).

6.3.1. Quiz Questions

The number of questions created in this area determines the number of questions the employee is asked while taking part in the Social Quiz.

There are four question types, these are detailed in the below table:

Question Type	Explanation
Person Name	Picks a random employee image from the person's team. For example, the question may ask: • Who is James Smith?
Start Date	Picks a random employee from the person's team. For example, the question may ask: • Who joined on 21/10/18?
Interests	Picks a random interest from a person within the user's team. For example, the question may ask: • Who likes Football?
Department	Picks a random employee from the person's team. For example, the question may ask: • Who works in Finance?

6.3.2. Quiz Summary Options

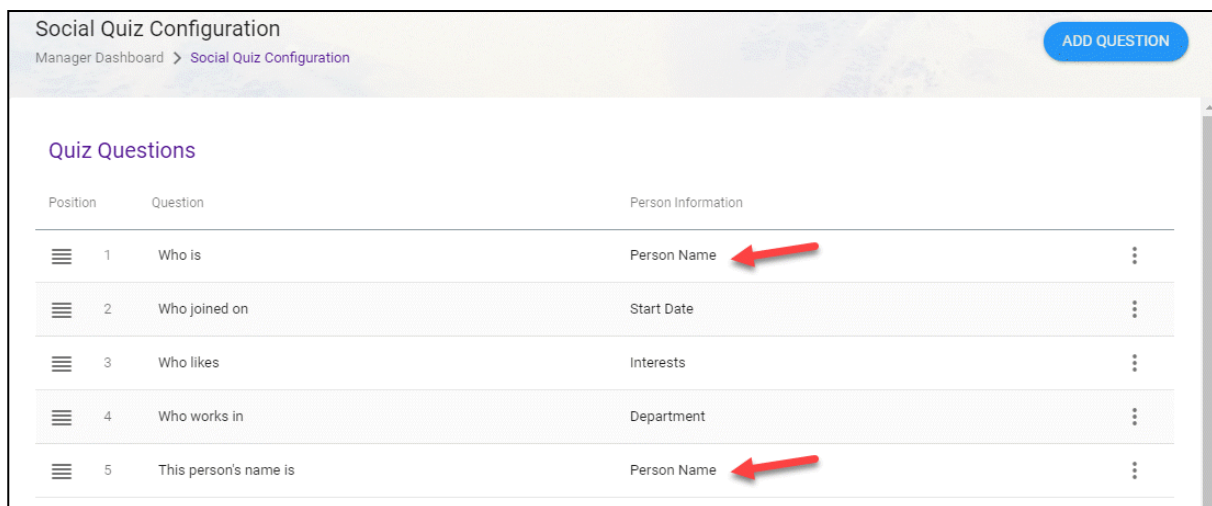

The Quiz Summary Options area allows you to specify the message that an employee sees along with their score summary, upon completion of the quiz.

6.3.3. Configure the Quiz

To configure the Employee Directory:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Social Quiz Configuration.
3. Click **Add Question**.
4. Enter the question text.
5. Select the applicable question type from the *Person Information* drop-down list.
6. Click **OK**.

Repeat this process until the desired number of questions are created. The below screenshot details five questions that have been added to the quiz page. It is possible to add multiple questions of the same type. For example, there are 2 **Person Name** question types listed below in the quiz.

7. Scroll down to view the Quiz Summary Options area.
8. Enter the score summary message for each score.
9. Click **Save Summary**.

6.4. Event Configuration

It is possible to create events within Employee Onboarding. Events created here are global events that are visible to everyone, therefore, are not restricted to specific companies or staff groupings.

Note: This feature is also available within People Management. Once created, the events display on the Events Page within Social Onboarding as well as on the Native App.

To create an event:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Event Configuration.

3. Click **Add Event**.
4. Enter the following details:
 - a. a Title.
 - b. an Event Description
 - c. a Start Date and End Date.
5. Switch on the All Day Event toggle, or enter a Start Time and End Time.

Add Event

Manager Dashboard > Event Configuration > Add Event

6.5. FAQ Configuration

It is possible to configure a global FAQ Page. This can then be added to the Social Hub dashboard.

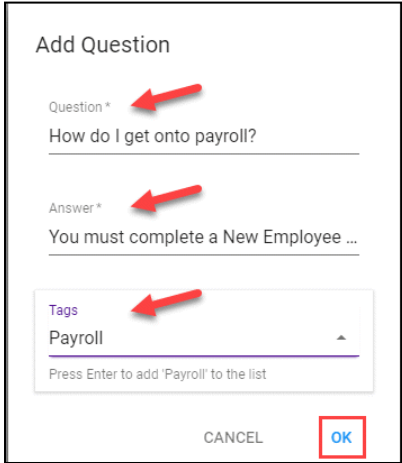

The following actions can be taken from the FAQ Configuration screen:

- Configure the HR Email address.
- Add questions.
- Add answers.
- Add Tags to questions, enabling employees to search specific topics, to return associated questions and answers.

Note: Only one FAQ page can be created and added to the Social Hub dashboard.

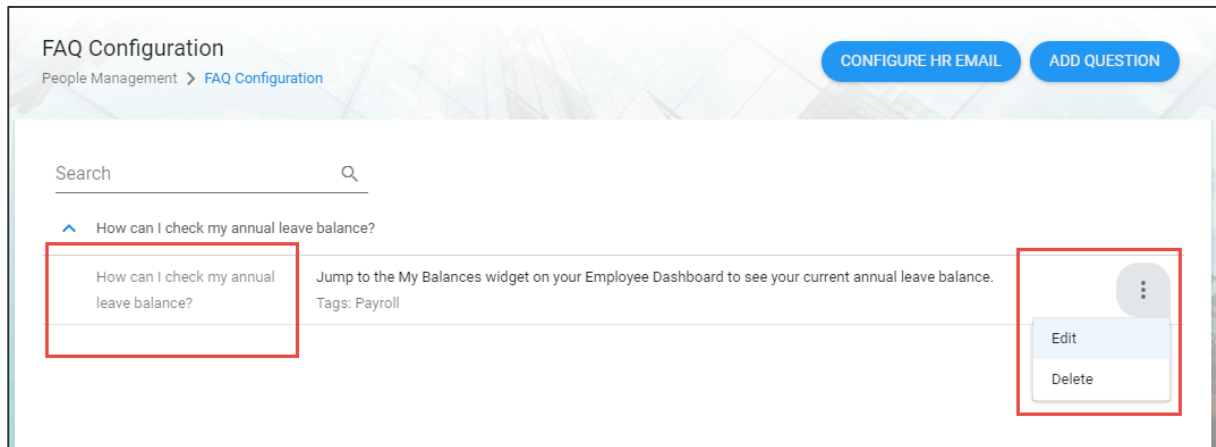

To configure the FAQ page:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on FAQ Configuration.
3. Click **Configure HR Email**.
4. Enter the HR Email Address. This may be an email address created by an organisation to specifically monitor employee queries that are submitted.
5. Click **OK**.
6. Next, click **Add Question**.
7. Enter the relevant Question and Answer.
8. Click in the Tags field and input a tag, then press the Enter key to add the tag. Once a tag is entered, it is saved in a tags list. Therefore, when creating future questions, it will be available to select from the *Tags* drop-down list. You can add multiple tags to a question.
9. Click **OK**.

The screenshot shows a modal window titled "Add Question". It contains three input fields, each with a red arrow pointing to it: "Question *" with the text "How do I get onto payroll?", "Answer *" with the text "You must complete a New Employee ...", and "Tags" with a dropdown menu showing "Payroll". Below the tags field is a small text prompt: "Press Enter to add 'Payroll' to the list". At the bottom of the modal are two buttons: "CANCEL" and "OK", with the "OK" button highlighted by a red rectangular box.

The question is now added to the *FAQ Page*. From here, it is also possible to *Edit* or *Delete* questions by expanding the three dot menu.

Repeat this process as required to add further content to the FAQ Page.

6.6. Restrict System Pages

If a system page has been added to the Social Hub dashboard/landing page, or has been added as either a Checklist item, then it can be restricted to only be available to specified Criteria Groups.

- For checklist item restrictions, view section [4.4 Restrict Checklist Items](#).
- For Landing Page content restrictions, view section [11.4 Restrict Pages – from Landing Page](#).

7. My Team Configuration

For the Team Page to appear for an employee:

- The team must be created first, with restriction rules applied to identify its members.
- The Team Page must also be added to the Landing Page i.e. Social Hub dashboard.

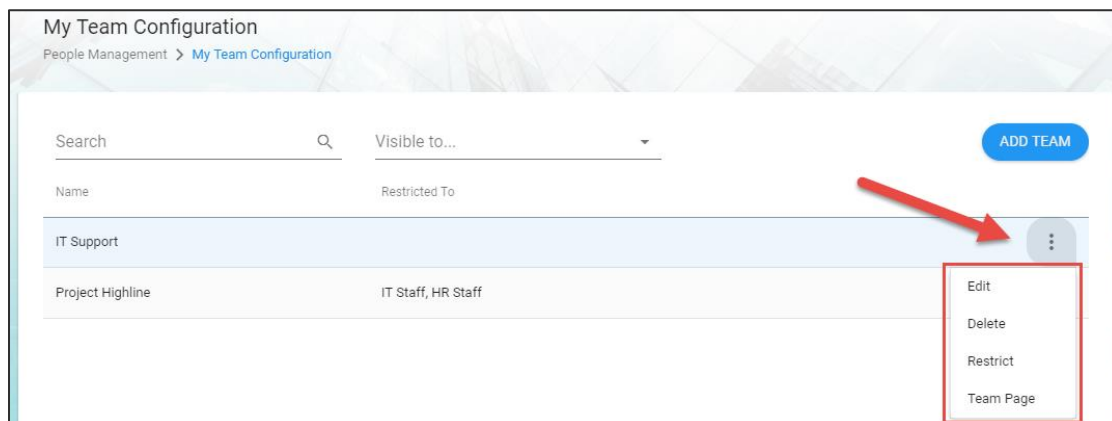

Note:

- Functional team areas are not pre-configured based on existing team setup within the system. Teams must be defined within the Team Area Configuration screen.
- If an employee has two contracts / appointments that belong to two different teams, then both Team Pages appear on their Social Hub dashboard.
- If an employee is moving appointments (contract replacements) and their future appointment belongs to a new team, then their current Team Page and their future Team Page appear on the Landing Page.
- If an employee has their appointment updated and the new sequence matches a new team, the future team does not appear on their Social Hub dashboard until that date, their current Team Page remains visible until that date.

The My Team Configuration screen lists teams that have been added to the system. From this screen it is possible to:

- Add a team.
- Edit and delete existing teams.
- Add a restriction to a team.
- View the Team Page.
- Add, view, edit, and delete Team Page Content.

The below screenshot details the *My Team Configuration* screen:

7.1. Add a Team

To create a new team:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on My Team Configuration.
3. Click **Add Team**.
4. Enter a *Team Name*.
5. Enter *Welcome Text*.
6. Click **Save**.

Add Team

HR Admin > My Team Configuration > Add Team

Project Highline

Note: There are currently no restrictions on the team. Once the team is created, it must be restricted (see section [7.2 Restrict Team Page](#)). If the team is not restricted, employees will not see their team, even if it is added to the Social Hub dashboard.

7.2. Restrict Team Page

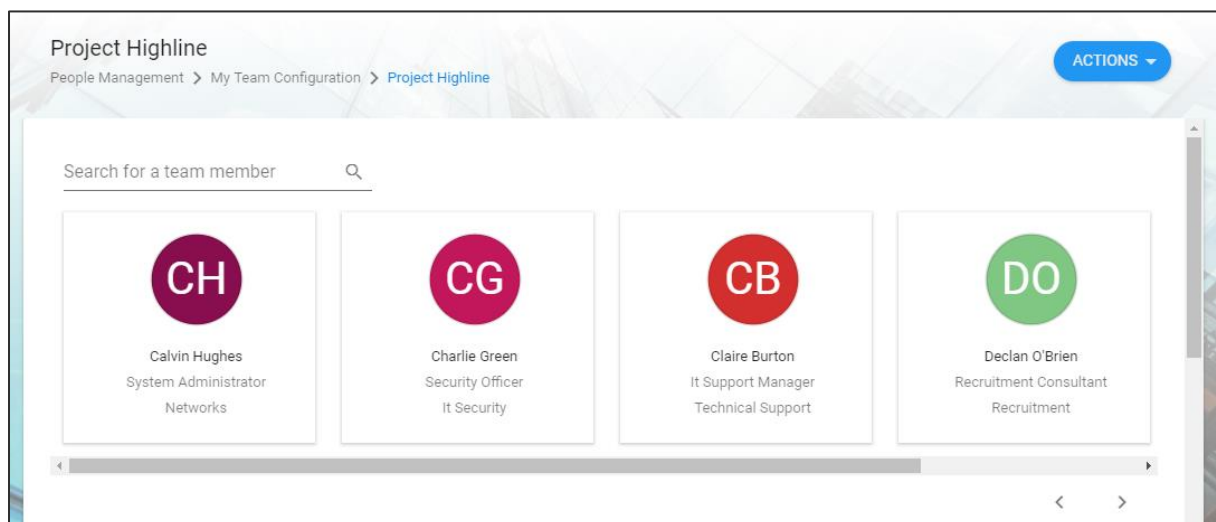

To add a restriction to the team page:

1. Expand the three dot menu on the applicable team.
2. Select **Restrict**.
3. Select **Assign New Group**
4. Select the applicable group e.g. "IT Staff" from the Criteria Group drop-down list.
5. Click **OK**.

Repeat steps 3-5 for all relevant criteria groups.

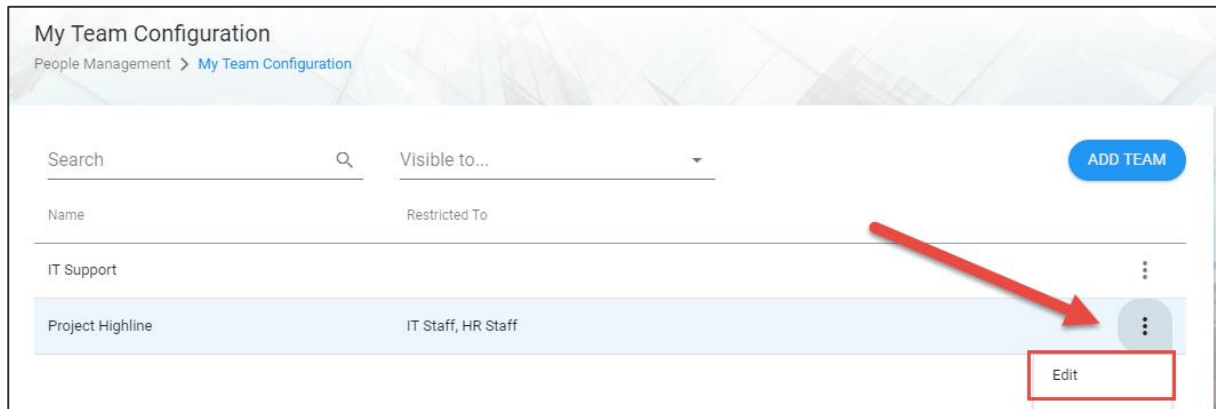

The Team Page is now visible to employees within the team. Employees can now view the screen below:

7.3. Edit Team Page

Administrators can edit the team overview details. To edit a team overview:

1. Expand the three dot menu on the applicable team name.
2. Select **Edit**.

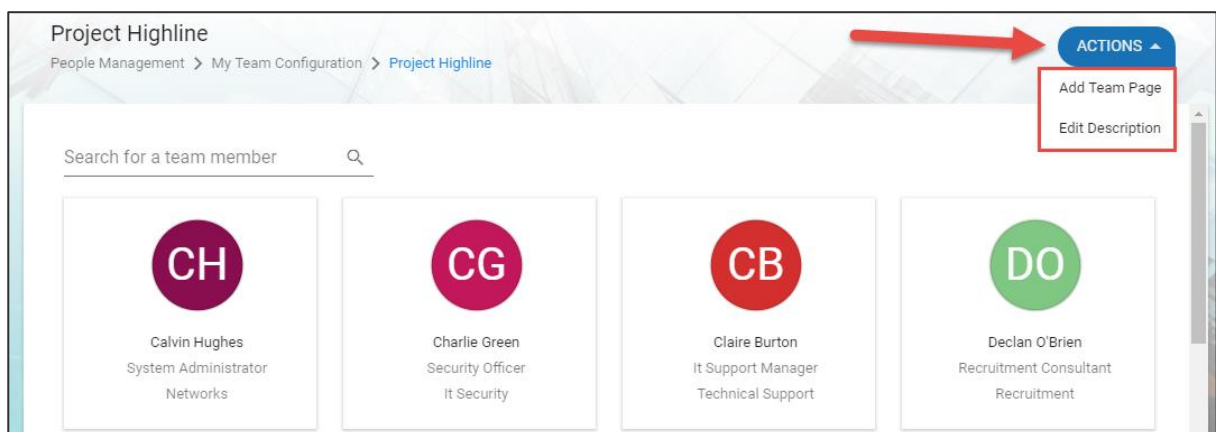

3. Edit the Team Name or Welcome text as required.
4. Once editing is complete, click **Save**.

7.4. Team Page - Content

Administrators can view the Team Page as it is displayed to the team members. The following actions can also be completed:

- Edit the description / welcome text.
- View content.
- Add content.
- Edit and delete content.

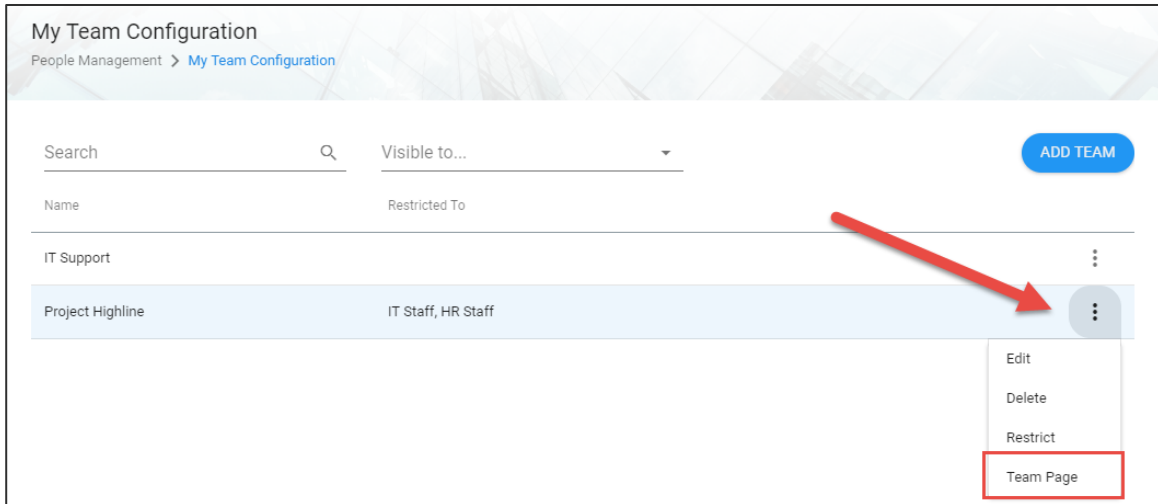

Team members can also maintain the Team Page by adding content that is shared with other team members only.

7.4.1. Edit Team Page Description

To edit the team page description:

1. Expand the three dot menu on the applicable team name.
2. Select **Team Page**.

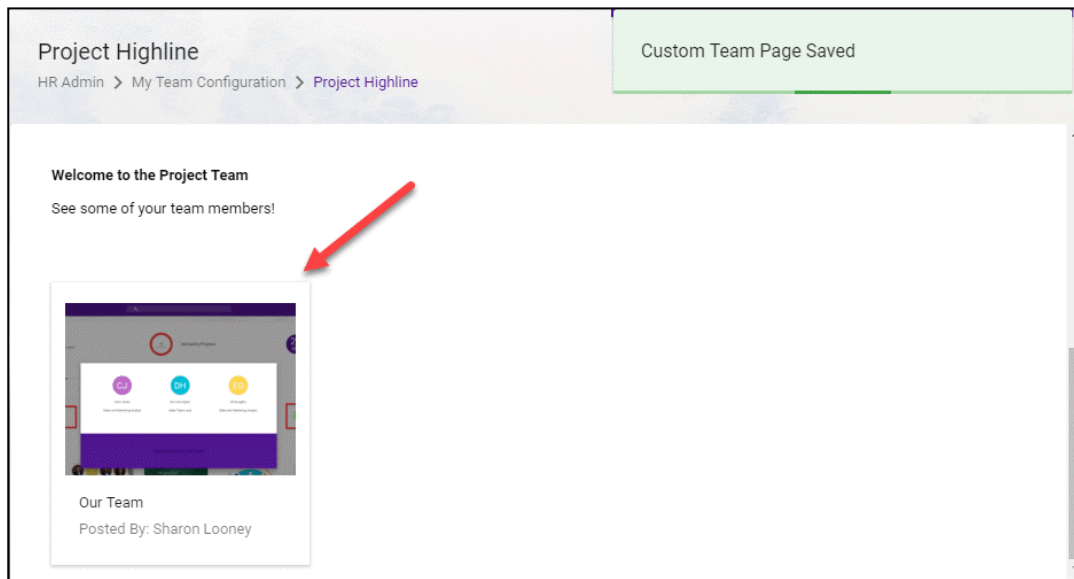

3. Expand the **Actions** menu.
4. Select **Edit Description**.
5. Enter the applicable text.
6. Click **Save**.

7.4.2. Add Team Page Content

To add a sub team page:

1. Expand the three dot menu on the applicable team name.
2. Select **Team Page**.
3. Expand the **Actions** menu
4. Select **Add Team Page**.
5. Enter the page Description.
6. Select the page Type.
7. Click  to upload a cover image.
8. Click **OK**.
9. Enter the required text. Use the markdown editor to apply simple formatting.
10. Click **Save**.

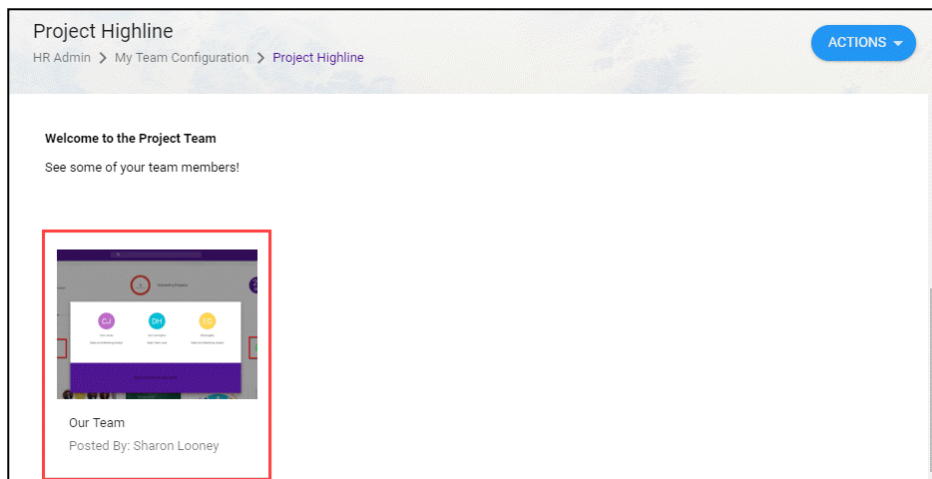

The Our Team – Sub Team Page is added and is visible for team members to view.

7.4.3. View Sub Team Page Content

To view team page content:

1. While on the Team Page, click on the **Team Page Content**. In this example, the applicable content is Our Team.

7.4.4. Edit Content

To **Edit** team page content:

1. While on the Team Page, click on the **Team Page Content**.
2. Expand the **Actions** menu.
3. Select **Edit**.

4. Edit the cover image by selecting **Upload Cover Image**, if applicable.
5. Edit the Description and Markdown Content, if applicable.
6. Click **Save**.

7.4.5. Delete Content

To delete team page content:

1. While on the Team Page, click on the **Team Page Content**
2. Expand the **Actions** menu.
3. Select **Delete**.
4. Select **Yes** to confirm. This cannot be undone.

8. Employee Bio

8.1. Employee Bio Configuration – Screen Overview

The below screenshot and table provide an overview of the Employee Bio Configuration screen:

Screen Section	Explanation
Social Networks	The option for employees to add social network links within their employee bio is configured here. The name of the network is added on this screen. The employee can then add a link to their network profile. If no social networks are added here, the option is not available to the employee.
Interest Questions	Interest questions can be rephrased to reflect specific interests, these phrases are then displayed on the employee bio for the user to then answer.
Contact Types	The contact types are configured in this section, these then display on the employee bio for the user to complete. Options available from the Contact Type drop-down lists are drawn from the standard contact type reference data.

Screen Section	Explanation
Organisation Level Displayed	In this screen section, you decide what level should be displayed on key screens within the Employee onboarding pages. The level specified determines who users will see on the below pages: - Employee Directory - Team Area - New Starters Options available from the Organisation Level drop-down lists are drawn from the standard organisation level reference data.

8.2. Configure Employee Bio

To configure the Employee Bio:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Employee Bio Configuration.
3. Click **Add** to add a social network link option, if applicable.

Employee Bio Configuration
Manager Dashboard > Employee Bio Configuration

Contact Types

First Contact

Second Contact

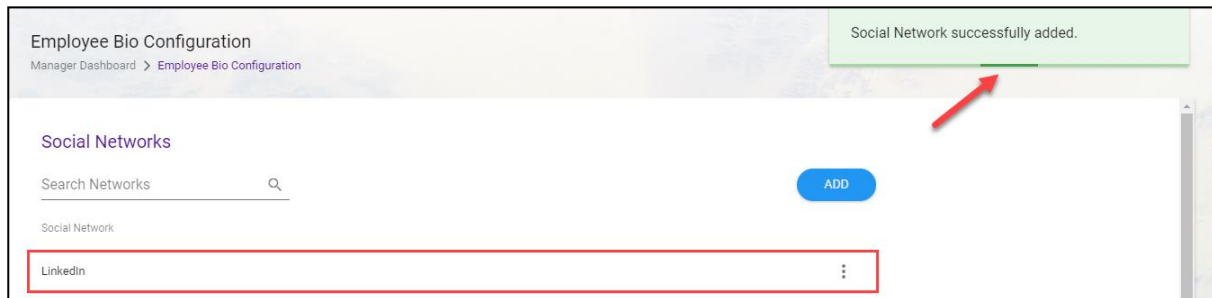

Third Contact

Organisation Level Displayed

4. Enter the applicable *Network* name.

5. Select **OK**. Repeat this process for each social network required.

The social network is now visible on screen.

6. Next, enter your applicable Interest Questions.

All four questions are mandatory. These questions appear on the employee bio for the user to answer.

7. Select the applicable contact methods from the Contact Types drop-down lists.
8. Select the applicable organisation level to display on pages available to the employee, from the Organisation Level drop-down list.

In this example, Department is selected from the Organisation Level drop-down list, therefore, the employees using Employee Onboarding will only see other employees within their department on the following pages:

- Employee Directory
- Team Area
- New Starters

9. Click **Save**.

9. Policy Documents and Handbooks

The Policy Documents and Handbooks area allows you to maintain the various documents that should be reviewed by the employee as part of a checklist item. For example:

- Policies
- Employee Handbooks

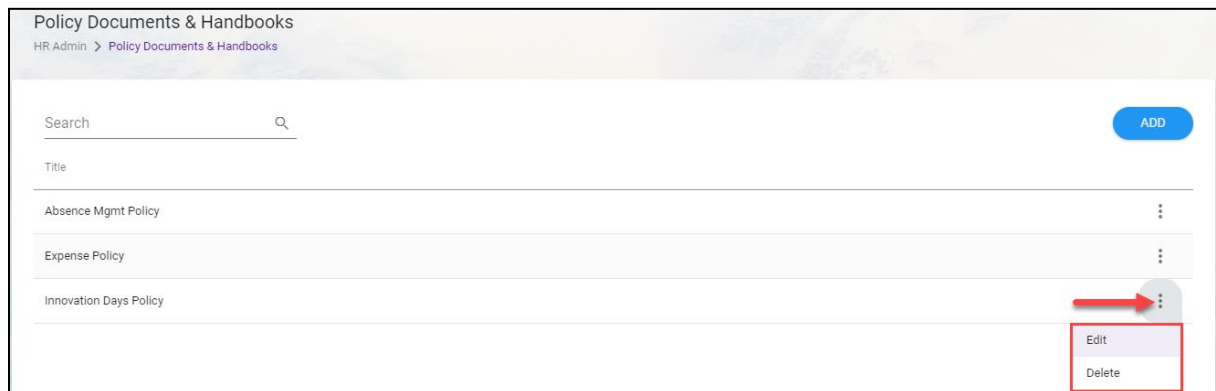

Note: If a checklist item has been released with documents, and has been completed by employees, attaching another document to the item within the *Add Policy* area will not re-release the checklist item for review.

Example scenarios:

- If employees reviewed the checklist item in their *Completed* list, the updated document displays.
- If employees are still to complete the checklist item in their *Tasks Outstanding* list, the updated document displays.

Therefore, the correct process to follow, to ensure that all employees will review the updated documents, is to create a new checklist item.

The Policy Documents & Handbooks screen lists all documents that have been uploaded to the system.

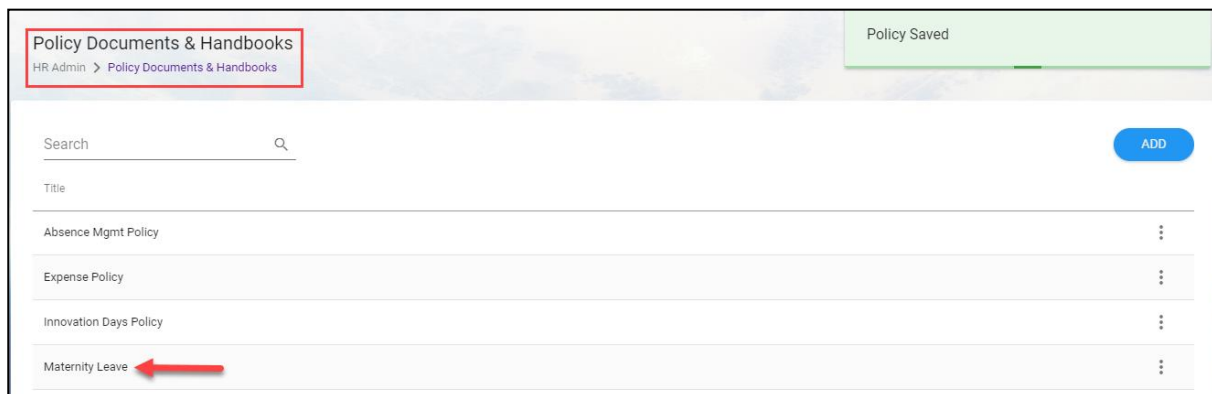

9.1. Add Policy Documents and Handbooks

To add a new policy document or handbook:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Policy Documents & Handbooks.
3. Click **Add**.
4. Enter a Title.
5. Click **OK**.
6. Click **Upload**.
7. Upload the applicable file.
8. Click **OK**.

The uploaded document has been saved successfully.

Note: If your organisation uses PeopleXD Evo, documents uploaded here will be available for employees to query through the Copilot Documents Skill. See the PeopleXD Evo – User Guide for further details.

10. Documents Requested

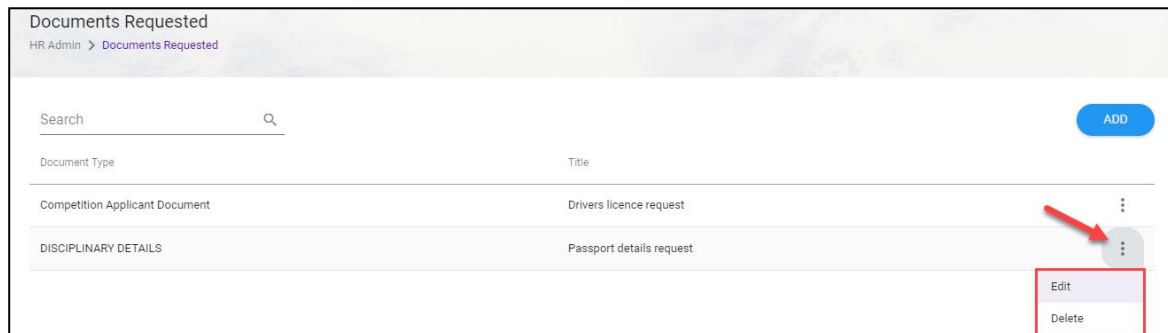

The documents requested area allows you to maintain the various documents that are requested from employees as part of checklist items. Document types are added by selecting a document from the standard list of document types reference data.

Note:

- If a document requested is deleted from the Documents Requested screen, it will affect the employee's ability to complete their remaining checklist items that contain this document.
- When the employee is completing a checklist item that is linked to one of these documents, the system displays any existing documents of this same type, that are already loaded against the employee record.

The *Documents Requested* screen lists all document types that have been set up on the system.

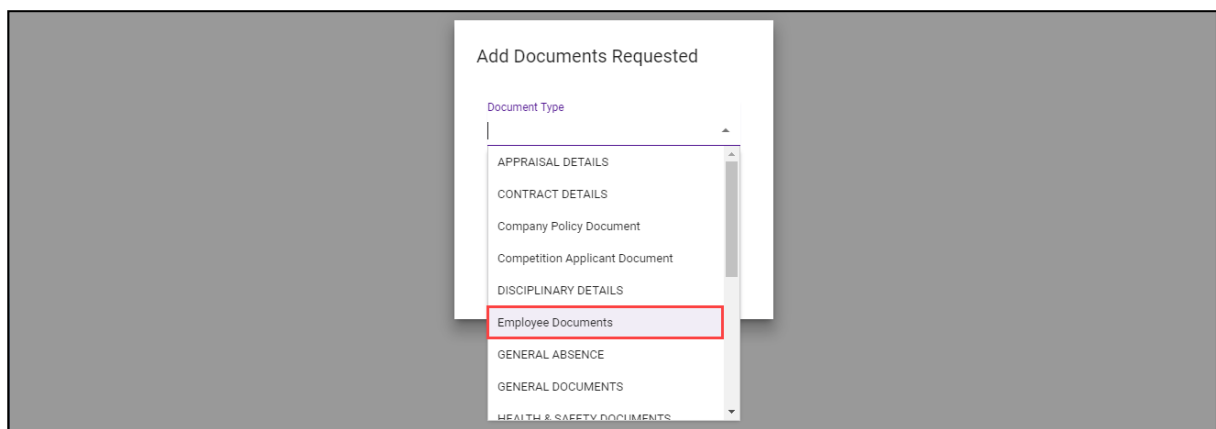

10.1. Add Documents Requested

To add a new policy document or handbook:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Policy Documents & Handbooks.
3. Click **Add**.
4. Select the type of document you are requesting from the *Document Type* drop-down list.

In this example, we are requesting the employee to submit a copy of their passport, therefore the document type selected from the standard list of document types reference data is 'Employee Documents'.

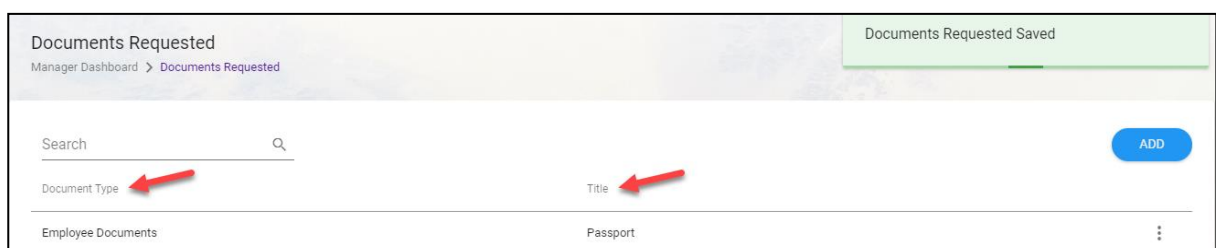

5. Enter a *Title* for the document.

This is the name of the document requested that is displayed to the employee, on their checklist item.

6. Click **OK**.

In this example, we can now see the *Document Type* and *Title* has been added to the list.

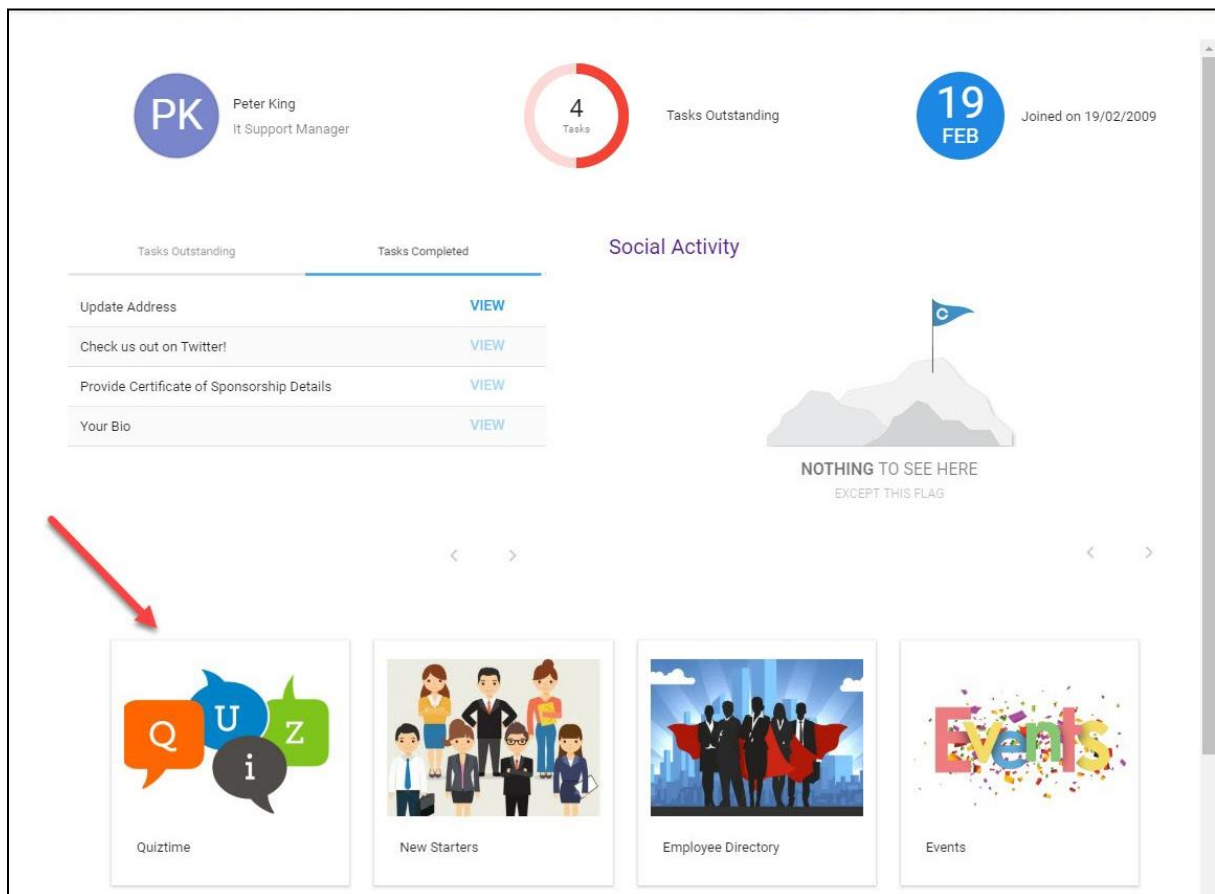

11. Social Hub Dashboard (Landing Page)

Content pages, and their position, that display on the Social Hub dashboard landing page are added within the Landing Page Configuration screen. The below types of pages can be added to the Landing Page:

- Custom pages
- System pages

An example of the Landing Page, with added System Pages is shown in the below screenshot.

Actions that can be completed on this screen include:

- Previewing the landing page layout, by clicking the **Preview Layout** button.
- Re-ordering the position of the pages by clicking and dragging the  on the applicable page.

Quiztime, New Starters, Employee Directory, Events, FAQ

11.1. Adding Custom Pages

It is possible to select any custom page that has been created on the system. If the custom page has been restricted when it was created, then the restriction will also be displayed on this screen, if not it will be global and available for all employees to view.

To add a custom page:

1. Navigate to the Social Hub Configuration widget
2. Click **View** on Landing Page Configuration
3. Click **Add Page**.
4. Select **Custom Pages** from the *Page Type* drop-down list.
5. Select the applicable page from the *Select Page* drop-down list.
6. Click **OK**.

11.2. Adding System Pages

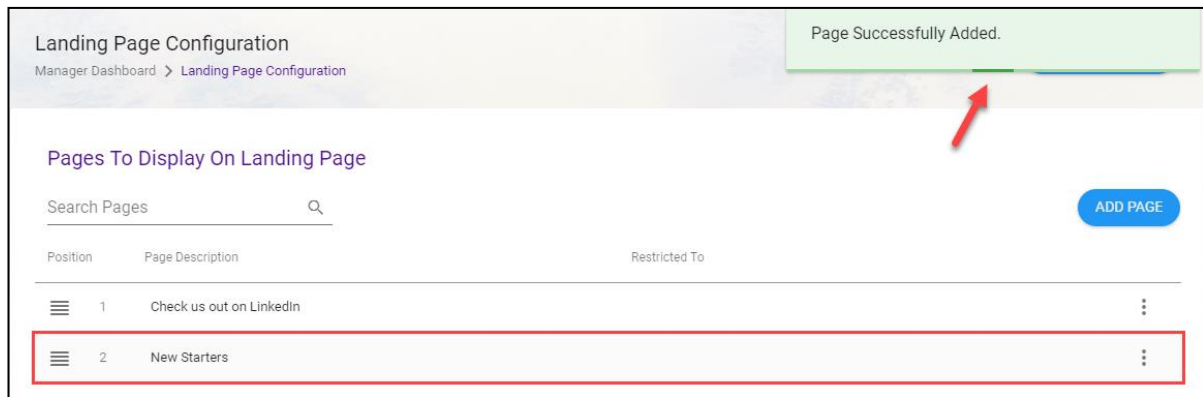

It is possible to select any System Pages to add to the Landing Page. System Pages are pre-configured pages that include:

- New Starters
- My Team Area
- Employee Directory
- Quiztime
- Events
- FAQ

Once added, all of these will be displayed by default to all employees on their Social Hub dashboard landing page, until they are explicitly restricted. See section [6.6 Restrict](#) for further information.

To add a system page:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Landing Page Configuration.
3. Click **Add Page**.
4. Select **System Pages** from the *Page Type* drop-down list.
5. Select the applicable page from the *Select Page* drop-down list.
6. Select  on the *Upload cover image* field to upload a cover image.
7. Click **OK**.

11.3. Upload a Cover Photo

Note: By choosing the **Upload a cover image** option, this will override the image uploaded during the creation of the Custom Page.

System Pages have no cover image by default, a cover image must be uploaded when adding a System Page to the Landing Page.

To upload a new cover image for a custom or system page:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Landing Page Configuration.
3. Expand the three dot menu on the applicable page.
4. Select **Upload a cover image**.
5. Select  on the *Select a file* field, to upload a cover image.
6. Click **OK**.

11.4. Restrict Pages – from Landing Page Configuration

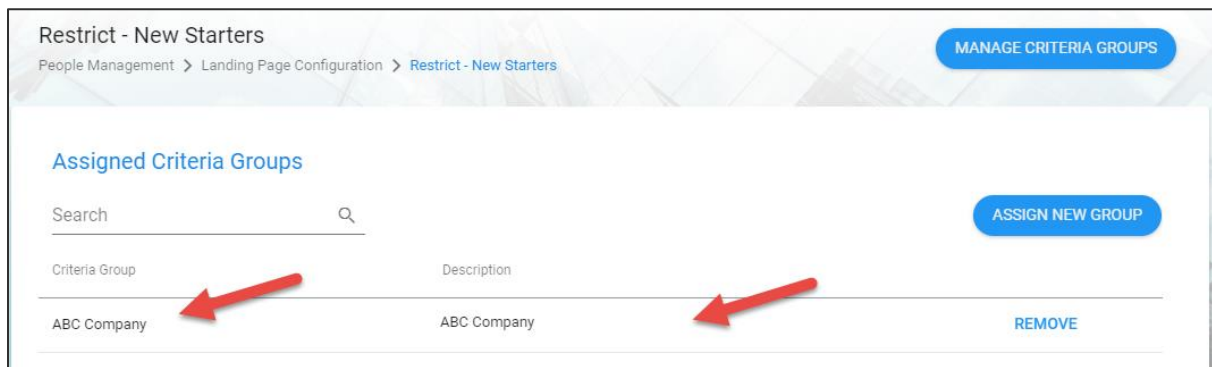

It is possible to restrict both Custom Pages and System Pages from the Landing Page Configuration, so they are only visible to specific groups of employees.

Note: The Team Area – System Page is the only exception to adding restrictions on the Landing Page Configuration screen. This is because the restriction is already configured during the Team Area page creation.

To add a restriction to a custom or system page:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Landing Page Configuration.
3. Expand the three dot menu on the applicable page.
4. Select **Restrict**.
5. Click **Assign New Group**.
6. Select the applicable group from the *Criteria Group* drop-down list.
7. Click **OK**.

The criteria group has now been added to the page. This process can be repeated multiple times, to add multiple criteria groups.

11.4.1. The 'Visible To' Filter

It is also possible to filter the landing page content, and preview what is visible for specific groups of users.

To see who a page is visible to:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Landing Page Configuration.
3. Select the applicable group from the *Visible to* drop-down list.

The below screenshots details that page 2 is restricted to be viewed by "ABC Company" employees only. Note that the other pages listed on this screen are also visible to "ABC Company" employees, as they are not restricted to other criteria groups.

12. Welcome Board

When employees enter Employee onboarding, a welcome board can be presented. Employees can then navigate through a sequence of steps before accessing the main content within the Social Hub. The table below outlines the three card types that can be added to the welcome board:

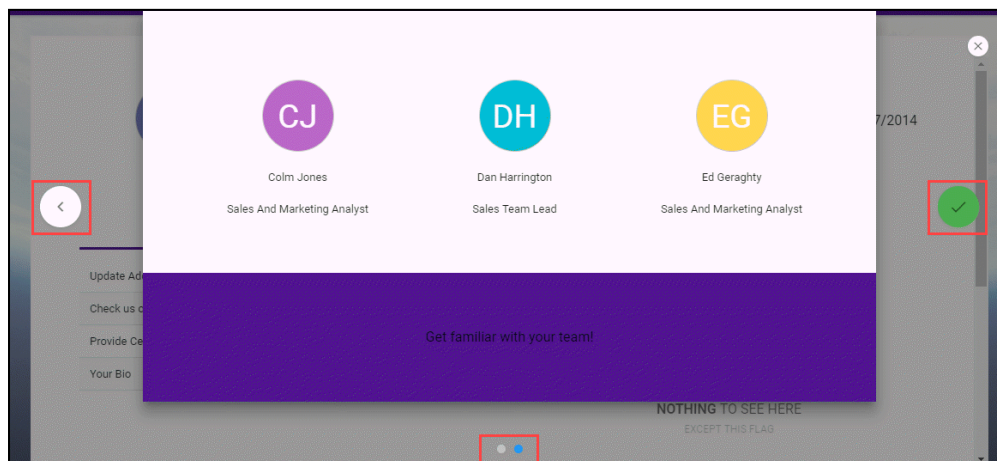

Card Type	Explanation
Message Card	Displays a greeting message, from a specified person within the organisation.
Logo Card	Displays an image, and a greeting message.
Team Card	Displays a view of employee's team members, as dictated by the My Team Configuration setup, along with a greeting message.

The below screenshots detail an example employee view of the Welcome Board. The employee can navigate through a sequence of welcoming cards, then mark the activity as complete.

Logo Card

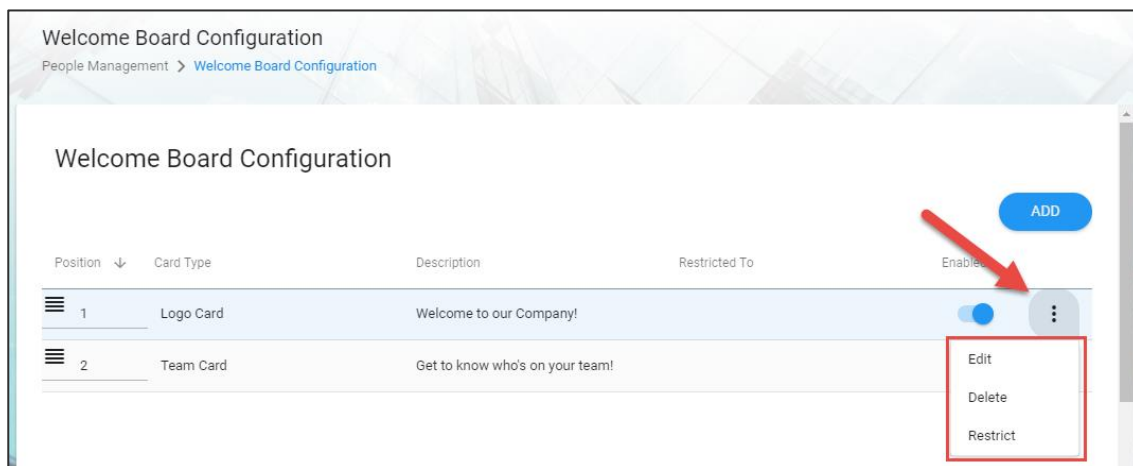

Team Card

Once the Welcome Cards have been added to the Welcome Board Configuration screen, the following actions can be applied:

Action	Explanation
Made Active	Cards must be Enabled for them to be displayed on the Welcome Board.
Restricted	If restricted and active, cards only display for employees who match the restriction grouping.
Ordered	Cards can be re-ordered to appear on the Welcome Board as required.

The Welcome Board steps that are presented to the employee are configured within the Welcome Board Configuration area. This screen lists all cards that have been set up on the system.

12.1. Add Welcome Board Cards

12.1.1. Add a Logo Card

To add a logo card:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Welcome Board Configuration.
3. Click **Add**.
4. Select **Logo Card** from the Card Type drop-down list.
5. Enter the card Description.
6. Click  to upload the applicable Logo.
7. Click **OK**.
8. Switch on the Enabled indicator to ensure the Logo Card is visible on the employee Welcome Board.

12.1.2. Add a Team Card

To add a team card:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Welcome Board Configuration.
3. Click **Add**.
4. Select **Team Card** from the Card Type drop-down list.
5. Enter the card Description
6. Select the applicable team from the Team drop-drop down list. Available teams in the drop-down list are taken from the My Team Configuration.
7. Click **OK**.
8. Switch on the Enabled indicator to ensure the Logo Card is visible on the employee Welcome Board.

12.1.3. Add a Message Card

To add a team card:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Welcome Board Configuration.
3. Click **Add**.
4. Select **Message Card** from the Card Type drop-down list.
5. Enter the card Description.
6. Select a person from the Welcome Message From drop-down list.
7. Enter the Greeting and Welcome Message text.
8. Click **OK**.
9. Switch on the Enabled indicator to ensure the Logo Card is visible on the employee Welcome Board.

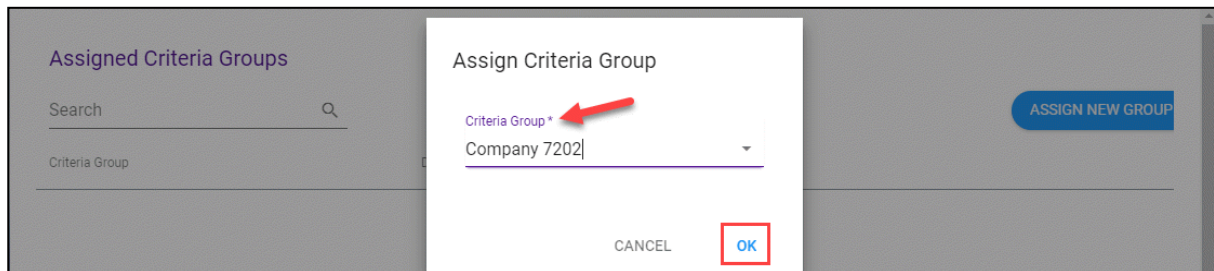

12.2. Restrict Cards

It is possible to restrict cards, so that they are only visible to specific groups of employees (criteria groups) on the Welcome Board.

For example, an organisation with two companies can add two Logo Cards which are restricted to be viewed by employees within their own company only.

To add a restriction to a card:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Welcome Board Configuration.
3. Expand the three dot menu on the applicable card.
4. Select **Restrict**.
5. Click **Assign New Group**
6. Select the applicable group from the Criteria Group drop-down list.
7. Click **OK**.

Only employees in this criteria group can now view this card. This process can be repeated multiple times, to add multiple criteria groups.

13. Staff Grouping

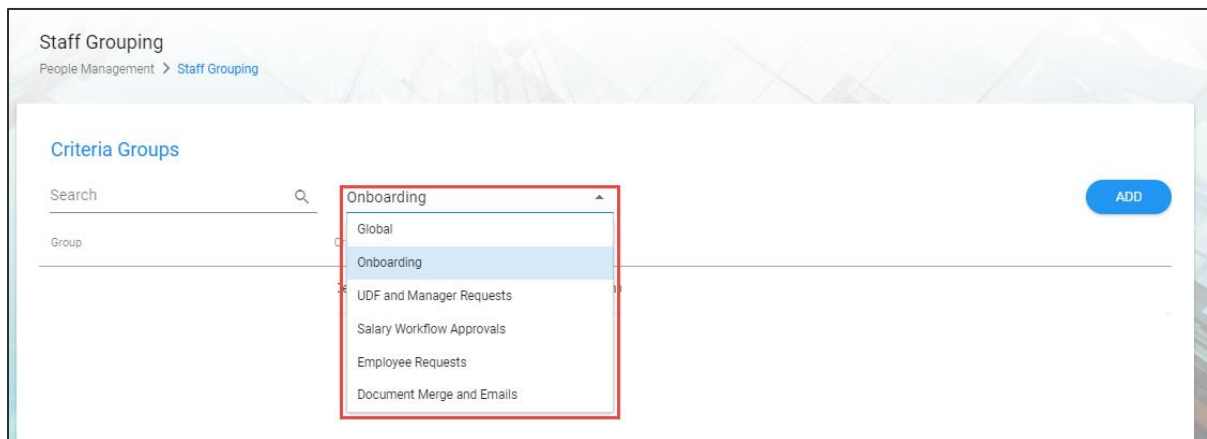

The Staff Grouping screen allows you to create and manage all Criteria Groups used within the People Management product. These area groups are listed below:

- Onboarding
- UDFs
- Salary Workflow Approvals
- Employee Requests
- Letters
- Global

It is possible to create Global Criteria Groups, that can be used across all the areas listed above, therefore, creating separate groups for each area is not needed.

Note: Any Criteria Groups that have been created within the previous onboarding module (pre-v27) will exist within the Social Onboarding options.

The below screenshot shows the Staff Grouping screen and grouping areas available:

By creating Criteria Groups within Employee Onboarding, this then allows you to restrict any applicable items to only be visible to specified Criteria Groups. Items that can be restricted are:

- Checklist items
- Custom pages
- System pages
- Welcome board cards

Note: When restricting Social Onboarding content such as checklist items, pages, and welcome board cards to certain groups of employees, the Criteria Groups available to choose from in the drop-down lists are drawn from a combined list of the following group areas:

- Onboarding
- Global

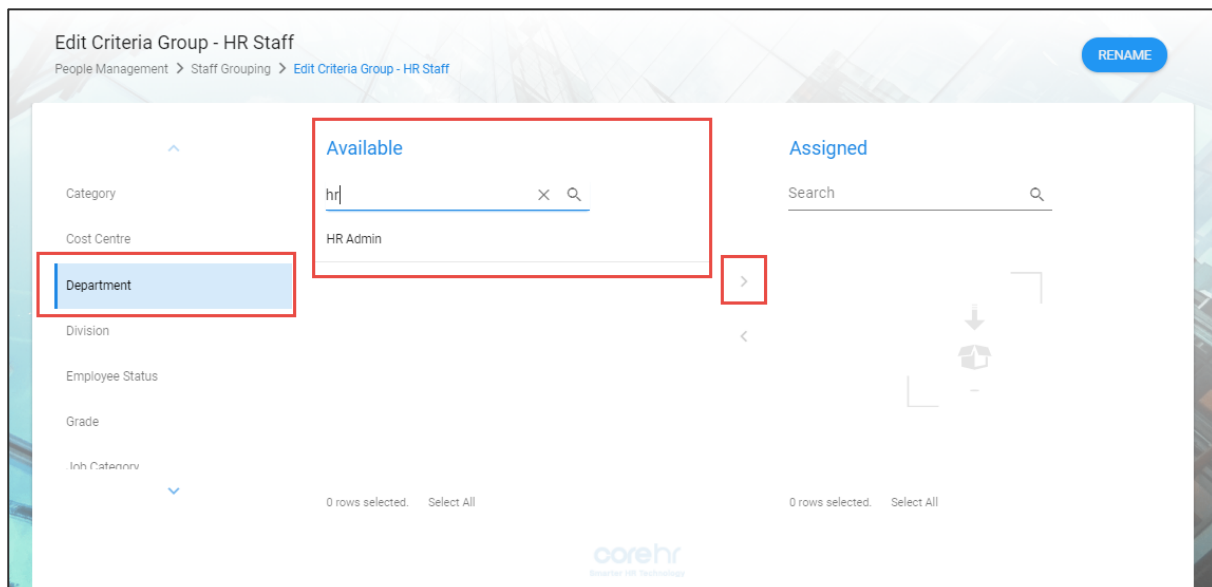

The Staff Grouping screen lists all Criteria Groups that have been set up on the system.

13.1. Creating Criteria Groups

Criteria Groups are made up of employees who hold the same specified attributes on their contracts.

To create a criteria group:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Staff Grouping.
3. Click **Add**.
4. Select the applicable **contract attribute** from the list. For example 'Department'.
5. Click to highlight the applicable items within the Available list.
6. Click  to move the items into the Assigned list.

The required departments are now assigned to the Criteria Group. The 'Department' attribute now has number indicating how many departments have been assigned to the Criteria Group.

Edit Criteria Group - HR Staff

People Management > Staff Grouping > Edit Criteria Group - HR Staff

7. Repeat steps 4-6 for any additional attributes.

This screen saves automatically.

By returning to the Staff Grouping screen, the Criteria Group is added to the system. This screen details a Criteria Summary of the group for quick reference.

This Criteria Group can now be used for:

- Restrictions on onboarding content.
- The My Team Configuration screen.

Group	Criteria Summary
IT Staff	Department is in IT Security OR Networks OR Technical Support
HR Staff	Employee Status is in Permanent AND Department is in HR Admin

14. Email Notifications

Email notifications can be sent to the email address held on the employee's record. These notifications are not shared on the Notification Centre.

14.1. Configure Summary Tab (Weekly Emails)

Weekly Summary emails are sent to employees on Saturday night, if:

- An employee has uncompleted items in their checklist.
- An employee is starting with the company and joining their social team in the next 14 days.

Requires	Detail
Scheduled Job	ONBOARDING_WEEKLY_EMAIL

To configure the weekly summary emails:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Notifications.
3. Select the **Summary** tab.
4. Enter the Greeting text.
5. Switch on the toggle to add any incomplete employee onboarding items to the weekly summary email, if applicable.
6. Enter the Body text.

7. Switch on the toggle to add any new starters coming in the next 2 weeks, to the weekly summary email, if applicable.
8. Enter the *Body* text.
9. Enter the *Sign Off* text.

7. Click **Save**.

Notifications

HR Admin > Notifications

This will add any new starters, coming in the next 2 weeks, to the weekly summary

Body

The following people will be starting in your department in the next two weeks

Sign-off

Kind Regards. HR Team.

SAVE

14.2. Configure To Do Tab (Daily Emails)

Daily emails are sent to employees who have been assigned a new *Checklist Item* to complete.

Requires	Detail
Scheduled Job	ONBOARDING_DAILY_EMAIL

To configure the daily summary emails:

1. Navigate to the Social Hub Configuration widget.
2. Click **View** on Notifications.
3. Select the **To Do** tab.
4. Switch on the toggle to send notifications, if any new onboarding to do items become available, if applicable
5. Enter the Greeting text.

Notifications

HR Admin > Notifications

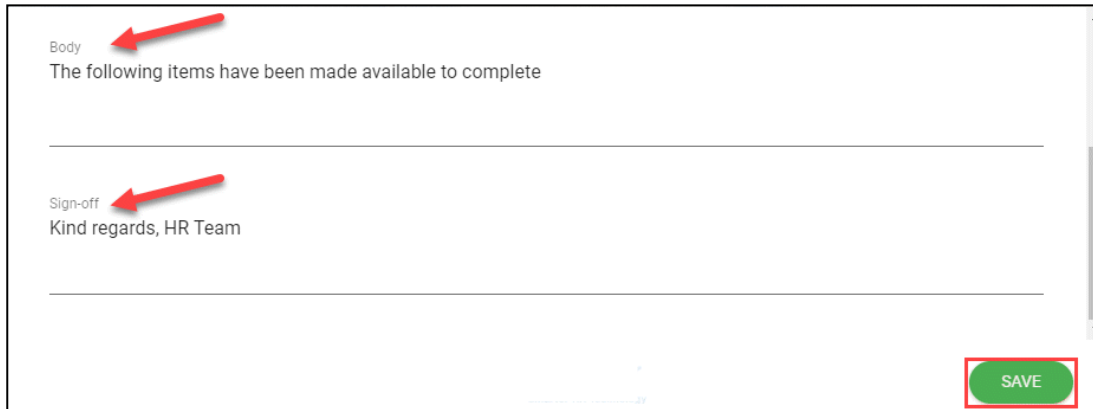

Summary To Do

This will send notifications, if any new onboarding to do items become available

Greeting

New Checklist Items are now available to complete

6. Enter the Body text.
7. Enter the Sign Off text.
8. Click **Save**

The screenshot displays a configuration form for onboarding. It features two main text input areas. The first area is labeled 'Body' and contains the text 'The following items have been made available to complete'. The second area is labeled 'Sign-off' and contains the text 'Kind regards, HR Team'. Red arrows point to the input fields for both sections. A green 'SAVE' button is located in the bottom right corner, highlighted with a red rectangular box.

15. Reporting in Insight

It is possible to create reports via Insight for Employee Onboarding. The following Employee onboarding views listed are located within the Personnel business area.

Note: These views do not replace existing historical onboarding views, which can still be used.

View Name	Available Fields
Social Activity	• Message • Message Date • Person Reference • Person Reference Name • Person Reference Receiver • Person Reference Receiver Name

Social Person Contacts	• Contact Text • Contact Type • Person Reference

View Name	Available Fields
Social Person Interests	• Interest • Interest Description • Person Reference
Social Person Networks	• Network Name • Network URL • Person Reference
Social Team Page	• Created By Forename • Created By Reference • Created By Surname • Date Created • Page Description • Page Type • Team Name

16. User Access to Employee Onboarding

16.1. Default Security Menu Profiles

Access to Employee onboarding is controlled by Security Menu Profiles.

PeopleXD provide three default pre-configured Menu Profiles that are applicable to the three general user types for Employee Onboarding.

We recommend that you use these default menu profiles to manage user access to Employee Onboarding:

User Type	Menu Profile	Description
Administrator	SOCIAL_ONBOARD_ADMIN	Has access to onboarding progress menu options for the Command Centre > Onboarding Progress screen
		Has access to all configuration screens i.e. Employee onboarding Configuration widget and Content Security Policy screen.
Manager	SOCIAL_ONBOARD_MGR	Has access to onboarding progress menu options for the My Team > Employee onboarding screen
		No access to configuration.
Employee	SOCIAL_ONBOARD_EMP	Access to the Social Hub dashboard only.
		No access to configuration or progress screens.
