1.1	13 th Feb 2023	Kat Murie	Updated section 1.3 with new guide name.

1. Overview

1.1. Purpose of the Guide

This document provides guidance on how the *Delegation* widget on the *Manager Dashboard* can be used by managers to automatically reassign some of their org roles to colleagues. This includes:

- What is organisational role (org role) delegation?
- Who can delegate org roles?
- What roles can be delegated.
- How to delegate org roles.
- How to configure PeopleXD to support org role delegation.

Note: The following delegation items are not covered in this document:

- Team Area (for roster)
- Hourly Timesheet (payroll)
- Expense

1.2. What is Org Role Delegation?

Org role delegation is available to managers, to allow them to delegate their org role responsibilities to another manager, to cover periods where they are unavailable e.g. during leave. This allows the manager to redirect approval items to their colleagues, without the need for HR to intervene. The manager can control:

- Which of their org roles will be delegated.
- Who they will be delegated to.
- How long they will be delegated for.
- Why they are to be delegated.

HR can control what org roles can be delegated e.g. it may be suitable to delegate annual leave approvals but not salary approvals.

Note: Delegation is not a suitable solution where the manager is leaving their role e.g.

- They are moving role within the company and will no longer be responsible for these approvals.
- They are leaving the company.

In these cases, the org role will need to be reassigned to another employee manually by HR or via Manager Rollup.

1.3. Who Can Delegate Org Roles?

This functionality is available to managers via the *Manager Dashboard*. It is intended to allow the manager to reassign their approval items to other managers.

This is not shared with all employees. Therefore, if an employee is responsible for approval items but is not a manager, they will not be able to use this feature. In this case, HR will need to support this request, by manually updating user org role assignments. See the **Organisational Roles Configuration** user guide for further information on how to manually assign roles to an employee.

1.4. Who Can Org Roles be Delegated to?

Org roles can be delegated to other managers. This is because:

- Users must have the same defined org role as the current manager, in order to appear on the *Delegate To* list. This is typically set to the reports to manager role (see [3.2 Setting the Org Role Delegation Parameters](#) for further details).
- The *Delegation* widget is shared on the *Manager Dashboard*.

1.5. Can all Org Roles be Delegated?

HR can control what org roles a manager can choose to delegate. This ensures that the manager can only delegate suitable tasks e.g. approving annual leave but not salary approvals.

See [3.1 How to Flag an Org Role for Delegation](#) for guidance on how to flag an org role as suitable for delegation. If an org role isn't available to the manager to delegate, they will need to work with HR to ensure that the org role is manually assigned to another employee when cover is required.

1.6. What can the Delegated Manager See?

When an org role is delegated to another user, they will effectively take on the responsibilities associated with that role for the defined delegation period.

- All approval items will be routed to them during this time.
- Any system elements that control access using that org role assignment will now apply to the user.

For example:

- Leave request approvals.
- EMS alerts may be triggered.
- Notification centre approval items.
- *Manager Dashboard > My Team* employees will include the 'delegated' employees.

Note: The above list provides some examples of how the delegation may impact the delegated user. This is not exhaustive, as this will depend on how each organisation uses their org roles.

1.7. Important Considerations

Depending on how org roles are configured on PeopleXD per organisation, please consider the impact that delegating roles may have, if using the following PeopleXD functionality.

Devolved HR Admin

A manager may see employees that have been delegated to them in the *My Team* widget e.g. if they have been delegated the "Reports to Manager" role for a colleague's team. However, the required post access will not be created for the delegated manager. This means that they will not see the full hr administration functionality on the employee record for delegated employees.

Manager Roll Up + 1

This functionality ensures that if an employee leaving will result in an orphaned org role (i.e. no one will be assigned to that role), then the role is automatically assigned to their line manager. However, if another employee is already assigned to an org role, on the leave date, then no rollover will occur.

In the case of delegation, if the leaver has delegated their org role to another employee, and that org role assignment is active when they leave, no rollup will occur.

Menu Profile Matrix

If the *Menu Profile Matrix* is used to automatically assign security Menu Profiles to users on org role assignment, this may occur during delegation.

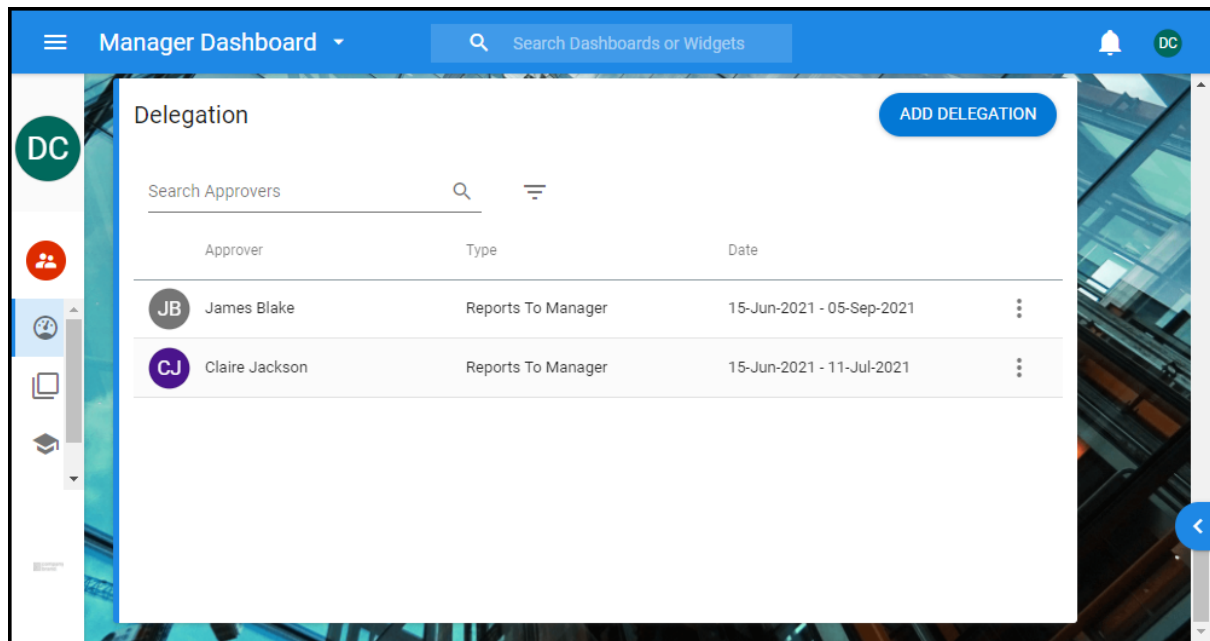

For example, if an org role is included in the Menu Profile matrix and the user is delegated that role, then the required Menu Profile will be automatically assigned to their account. This will not be unassigned once the delegation is ended.

2. How to Delegate Org Roles

2.1. Where is the Delegation Widget?

The *Delegation* widget can be configured to appear on the *Manager Dashboard*.

See screenshot below of the widget.

2.2. How to Delegate an Organisational Role

Follow the steps outlined below to delegate an org role:

1. On the *Delegation* widget, click the **Add Delegation** button. The *Add Approver Delegation* screen opens.
2. Select *Type* = "Org Role".

Note: Other options on this list are not relevant for org role delegation. These are used for other specific delegation scenarios and are covered in separate user guides.

3. Select the colleague that the org role will be delegated to on the *Delegate To* drop-down list. This list will display all employees that have the organisational role that is flagged as the 'Delegate To' org role. See [3.2 Setting the Org Role Delegation Parameters](#).
4. Enter the date that the delegation will start from in *From Date*. This must be today or greater.

5. Enter the date that the delegation will end on in *To Date*. The date provided must be today or greater.

 **Note:** This is an optional step. An open-ended delegation can be created if the end date is unknown. This can be end-dated at a later stage by updating the delegation record (see [2.4 Update an Existing Delegation](#)).

6. Review employees. This is an optional step.

Once you have provided the Type, From Date and Delegate To, the lower section of the screen updates to list all of the org roles that you have that can be delegated. If a role does not appear here, this is because:

- You do not have that role. **OR**
- The org role has not been flagged as suitable for delegation by HR (see [3.1 Flag an Org Role for Delegation](#)).

To assign a role:

- a. Select the role(s) to be delegated. This becomes highlighted in blue.
- b. Click **Show Employees** to confirm the list of employees that will be impacted i.e. these employee approval items will be redirected to the delegated colleague.

 **Note:** If the manager has the same org role for multiple org groups, the role will be listed here only once.

For example, if the manager has 3 instances of the 'HR Salary Approver' role for 3 pay groups, the role will be listed on screen once. However, the number of employees will reflect the total employees for all 3 groups. If delegated, 3 organisational role assignments would be created for the delegated to employee. It is not possible to select for a single org group.

7. Enter details about why the role will be delegated in the *Reason* field (max 500 characters).

Add Approver Delegation

Manager Dashboard > [Add Approver Delegation](#)

Type*

Reports To Manager	9	SHOW EMPLOYEES

[SAVE](#)

8. Click **Save**.

9. Select **OK** on the confirmation prompt.

This will now be listed on the *Delegation* widget, including: the dates, the delegated role(s) and the reason.

Delegation

[ADD DELEGATION](#)

Search Approvers

Approver	Type	Date	
 Jason Smith 000014	Reports To Manager	11-Mar-2019 - 15-Mar-2019	⋮

That employee will now receive the manager's approval items for the selected org role and confirmed group of employees.

2.3. What Happens to the Delegated Manager?

Once an org role is delegated, the nominated employee will receive all approval items associated with the org role. Depending on how approvals have been configured, the same org role might be used for a number of responsibilities e.g. "Reports to Manager" may control both leave requests and *My Team* widget list of employees.

The nominated employee will now have the same responsibilities and visibility as the manger, for the delegation period.

2.3.1. Org Role is Assigned in People Management

When a role has been delegated to an employee, an org role assignment is automatically created for them. To view this org role assignment:

1. Go to *Data Centre > People Management > Organisational Role Maintenance by Person*.
2. Search for the employee in the *Personnel No* drop-down list.
3. Click **Find**.
4. The employee's org roles will be listed on screen. An assignment will be there for the delegated org role.

up	11-Mar-2019	15-Mar-2019	HR1	Recruitment	☐	☒	...

Cancel **Add** **Save**

During the *Date From* and *Date To* timeframe, that employee will now have all responsibilities on PeopleXD associated with the org role e.g. receive alerts, approve requests etc.

Note: If the delegation is **edited** or **deleted** via the *Delegation* widget, this org role assignment will be updated accordingly. However, if the delegate indicator is switched off and on again, the edit / delete delegation via the *Delegation* widget will no longer update here.

2.3.2. Outstanding Approvals in the Notification Centre

The delegated user will also see any outstanding approval items in the *Notification Centre* that were triggered before they were delegated the role. This is because the Notification Centre will display approval items to the user based on their org role and group assignment - if the user has the required org role / org group, they will see any corresponding approval items.

Note: This is only for approval items based on org role / org group settings. This is not applicable to other approval items, e.g. Expense Approvals, Training Approvals.

2.4. Update an Existing Delegation

The *Delegation* widget provides the manager with a view of all delegations that they have created - historical, current and future. Only current and future delegations can be edited.

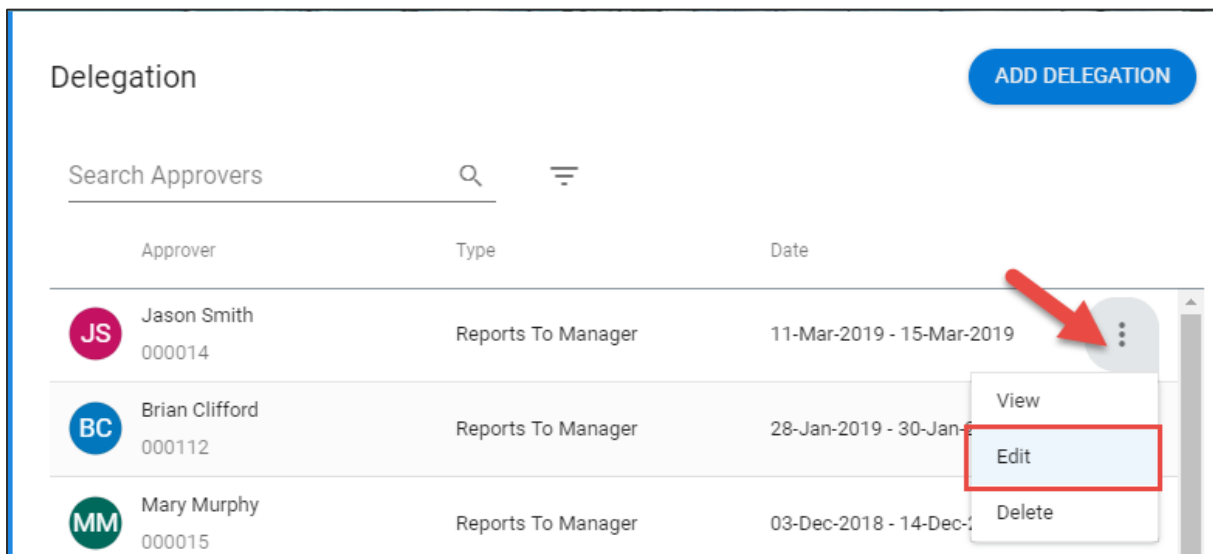

Note: The **Edit** option is suitable for amending the timeframe and reason for a delegation.

It is not possible to complete the following actions by editing an existing delegation record:

- Change *Type*
- Change *Delegate To*
- Add / remove *Roles*

To edit a delegation record:

1. Click the  button and select **Edit**.

The screenshot shows the 'Delegation' widget interface. At the top right is a blue button labeled 'ADD DELEGATION'. Below it is a search bar labeled 'Search Approvers' with a magnifying glass icon. The main area contains a table with three columns: 'Approver', 'Type', and 'Date'. There are three rows of delegation records. A red arrow points to the 'More options' button (three dots) at the end of the first row. A context menu is open, showing 'View', 'Edit', and 'Delete' options. The 'Edit' option is highlighted with a red box.

Approver	Type	Date
 Jason Smith 000014	Reports To Manager	11-Mar-2019 - 15-Mar-2019
 Brian Clifford 000112	Reports To Manager	28-Jan-2019 - 30-Jan-2019
 Mary Murphy 000015	Reports To Manager	03-Dec-2018 - 14-Dec-2018

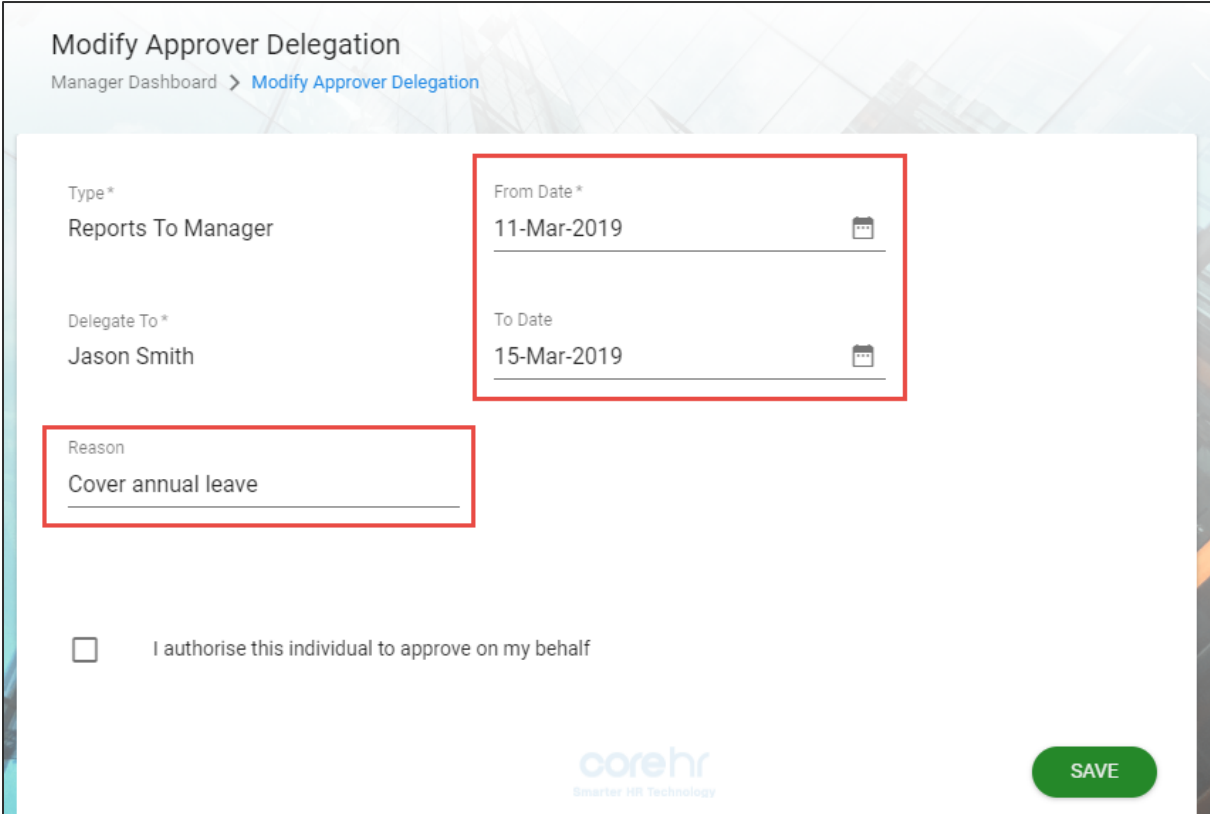

The *Modify Approver Delegation* screen opens.

2. Update the delegation record as required.

Only the following can be updated:

- From Date (today or greater)
- To Date (today to greater)
- Reason

Type and *Delegate To* are disabled on the screen to prevent updates. The **Show Roles** button is not available.

Modify Approver Delegation

SAVE

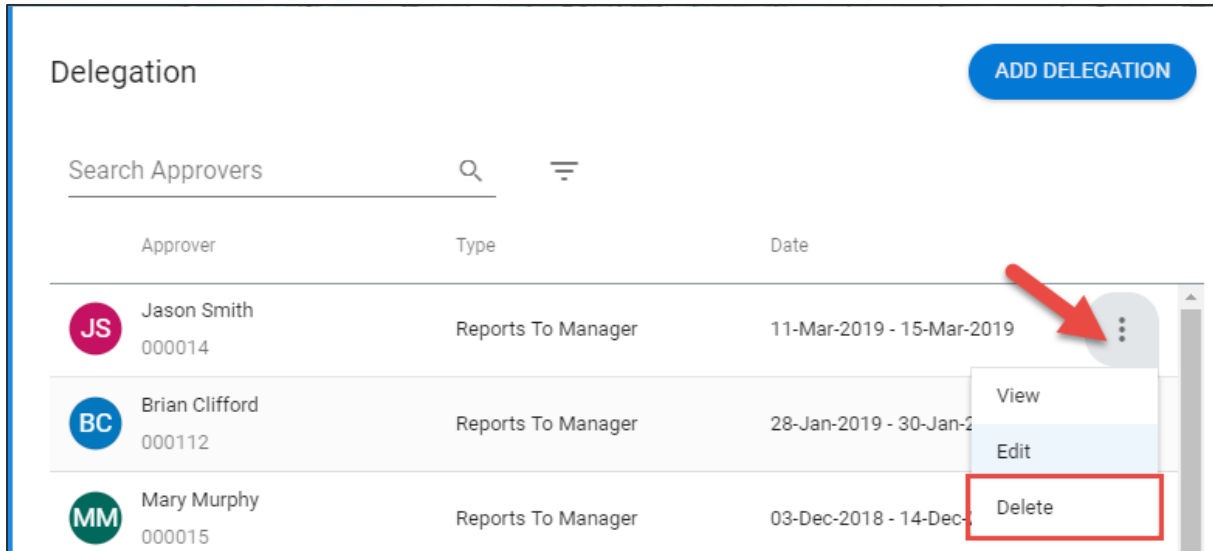

3. Click **Save**.

Any changes made here will be automatically updated on the Org Role record for the employee in **Data Centre > People Management > Maintain Organisational Roles by Person**.

2.5. Delete an Existing Delegation

Follow these steps to delete an existing delegation:

1. Click the  button and select **Delete**.

Delegation ADD DELEGATION

Search Approvers  

Approver	Type	Date
 Jason Smith 000014	Reports To Manager	11-Mar-2019 - 15-Mar-2019
 Brian Clifford 000112	Reports To Manager	28-Jan-2019 - 30-Jan-2019
 Mary Murphy 000015	Reports To Manager	03-Dec-2018 - 14-Dec-2018

Dropdown menu options: View, Edit, Delete

2. Click **Yes** on the confirmation prompt. The delegation record is deleted.

 **Note:** Historical delegation records cannot be deleted.

Any changes made here will be automatically updated on the Org Role record for the employee in **Data Centre > People Management > Maintain Organisational Roles by Person**.

 **Note:** This action deletes the org role assignment for the employee. It does not delete any approval items generated while that user was assigned the role. Those outstanding approval items will be available to the manager / another delegated employee in the *Notification Centre* based on their org role / org group assignment.

2.6. Searching for Existing Delegations

The *Delegation* widget displays a full list of all delegations that the manager has created, including historical, current, and future. Where there are a lot of records available to the manager, the  button can be used to narrow the results.

Follow the steps below to filter the *Delegation* widget:

1. Click the  button to open the *Filter* screen.

Approver	Type	Date
 Jason Smith 000014	Reports To Manager	11-Mar-2019 - 15-Mar-2019
 Brian Clifford 000112	Reports To Manager	28-Jan-2019 - 30-Jan-2019
 Mary Murphy 000015	Reports To Manager	03-Dec-2018 - 14-Dec-2018
 Claire Jackson 000020	Reports To Manager	12-Sep-2018 - 21-Sep-2018

2. Select the required option to filter on and click **Apply**.

2.7. Reporting on Delegated Roles

It is possible to report on org role assignments that have been delegated.

This is available in *Insight* using the following:

Area = Core Personnel

View Name = Organisational Roles

Report Wizard
Coreinsight > Report Wizard

1 Report Type
2 Report Area
3 Report Columns

PREVIOUS NEXT

This view displays the same details that are available on the **Data Centre > People Management > Maintain Organisational Role by Person** screen.

The *Delegation* field displays "No" or "Yes", to identify if the role is delegated or not. This *Delegation* field will have been updated by either:

- The delegation process covered in this document
- The HR administrator manually switching on that indicator for a role, independent of the *Delegation* widget.

3. How to Configure

3.1. How to Flag an Org Role for Delegation

It is possible to define which organisational roles should be available to managers to delegate. This allows HR to control which roles are suitable for managers to delegate, and which should not be shared.

Follow the steps below to flag a role as suitable for delegation:

1. Go to **Data Centre > Reference > Organisational Role Types** to open the *Organisational Role Types* screen.
2. Select the **Delegate** indicator for roles that should be available for delegation.
3. Click **Save**.

Maintain Organisational Role Types

Role Type	Description	Salary Approval Process	Approval Group	Approval Sequence	Active	ESS Approver	Questionnaire Access	Delegate	Manager Rollup
HR	HR Salary Approver	☒	HR	3	☒	☒	None	☒	☐

DEP	Head of Department	☐	HR		☒	☐	None	☒	☒

Cancel

AddSave

Follow the steps below to identify roles that already have the **Delegate** indicator enabled.

1. Click the  button on the *Organisational Role Types* screen.
2. Select the **Delegate** indicator.
3. Click **Filter**.

The list of org roles is filtered on the *Organisational Role Types* screen.

3.2. Setting the Org Role Delegation Parameters

The list of employees that appear on the *Delegate To* list is controlled by portal parameters:

The group of employees is identified using org roles and groups e.g. everyone who has the “Reports to Manager” role.

There are 2 parameters, listed in the table below. Both of these must be updated:

Parameter Code	Description
cp_app_del_org_role	Org Role used for determining employees included for selecting an approver to delegate to. Example Value: “MGRESS”
cp_app_del_org_group	Org Group used for determining employees included for selecting an approver to delegate to. Example Value: “WRKGRP”

To update these parameters:

1. Quick jump to *Site Manager* and open *Admin Settings*.
2. Search for each parameter code.
3. Update the value for each as required. Codes are required here e.g. “MGRESS”, not “Reports to Manager”.
4. Click **OK**.

All employees that have that org role, for *any* of the specified org groups, will appear on the *Delegate To* list i.e. all “Reports to Managers” for any work group.

3.3. Widget & Dashboard Configuration

The *Delegation* widget should be added to the Manager Dashboard. To do this:

1. Quick jump to *Dashboard Configuration*.
2. Select **Manager Dashboard**.
3. Select the required tab.
4. Search for and select the **Delegation** widget.
5. Changes are saved automatically on selection.

The screenshot displays the 'Dashboard Configuration' interface. At the top right is a blue button labeled 'ADD PAGE TAB'. Below it, a dropdown menu 'Select Dashboard *' is set to 'Manager Dashboard'. The main area is divided into two sections: 'Dashboard Tabs' and 'Tab Widgets'.

Dashboard Tabs

Position	Tab Title	Widget Count	
1	Dashboard	9	⋮
2	Manager Req.	1	⋮
3	Additional Options	1	⋮
4	My Recruit	2	⋮
5	Timesheets	2	⋮

Tab Widgets

Position	Widget Title	Selected	
1	My Team	☒	CONFIGURE
2	Delegation	☒	CONFIGURE
3	Trigger Point Notifications	☒	CONFIGURE

The 'Delegation' widget in the second position of the 'Tab Widgets' list is highlighted with a red rectangle.

3.4. User Access

3.4.1. Manager Access to the Delegation Widget

The following menu option is required, in order for the *Delegation* widget to appear to the user.

System	CorePortal
Menu Option	Coreportal - Access Delegation By Org Role (Employee)

This should be added to the required menu profile e.g. COREPORTAL_MANAGER.

 **Note:** Searching for a menu option that contains “delegation” will return a list of other menu options. These are not covered in this document, as they are not required to configure regular Org Role delegation. These are covered in other delegation user guides, where relevant.

3.4.2. Delegated User's Access

This feature is intended to allow a manager to delegate their approvals to another manager. As such, the assumption is that the other manager will already have the same access to the required PeopleXD elements to complete approvals via the standard manager menu profile. There should not be a requirement for HR to intervene and assign a new menu profile, to support access to processes that have been delegated to the manager.
