Other Qualification Sources

If using Recruitment, it is possible that a *Qualifications* section may form part of an application form and therefore records may be updated initially by the applicant as part of that process.

If using Training, it is possible that on completion of a scheduled training course, an employee may receive a qualification which is automatically reflected on this screen.

Records that appear here but are sourced from Recruitment or Training can be viewed, amended or deleted, as per the standard qualification records that may have been directly input on this screen.

This section provides you with the ability to record the details of an employee's proficiency in other languages.
