Document Control

Version	Date	Author	Details
1.0	22 nd Oct 2015	Kevin Scully	V19 document created
1.1	1 st Feb 2024	Kat Murie	Reformatted and updated the screens that have moved to Portal.

1. Overview

The purpose of this document is to explain how users can use the Post Restructuring functionality to change the organisation structure of the company. This might be to regroup existing business into fewer units, or for the creation of additional business units.

Note: Post Restructuring will:

- update the employees existing Appointment, replacing their current post hierarchy (Department, Section etc.) with the new post hierarchy specified.
- End the current sequence of that Appointment only and creates a new sequence. So it will not create a new appointment_id.
- **not** affect the employee's existing Salary or Allowances. These will carry on as normal.

1.1. What is a Restructuring Profile

This contains the details for the move, including the old and new Post structure, the effective date, the employees that will be affected etc. You can have as many restructuring Profiles as you like, and a profile can be edited and saved until is used. It will be locked down once processed.

A new profile is required for every unique movement taking place, for example:

- If everyone in a Section is moving to a new Section, then one profile will be required.
- If half are moving to a new department, and the other half to another department, then two profiles will be required.

Note:

- Post Restructuring must be carried out on UAT and signed off prior to running on Live
- Post Restructuring will only process the latest Commenced appointment. Before restructuring, you must extract any Confirmed Future appointments and Delete them from the system. These can be recreated if required once the restructure is complete.
- If an employee has an outstanding Salary Approval, this must be deleted and recreated via a Salary Amendment if required.
- All New Reference data must be added on first. All Linking in the Hierarchy Tree must be done prior to Running.

1.2. Quick Guide

The list below provides a high level overview of the Post Restructuring process:

1. Remove Confirmed Future appointments and outstanding Salary Approvals.
2. Add any new Hierarchy Reference data, e.g. Departments
3. Link new reference data items to the Hierarchy Tree - e.g. any new Departments, Directorates, Sections, etc. All Hierarchy Linking must be completed prior to restructuring or else errors will occur.
4. Ensure Back Office users have access to New hierarchy Items in System Users.
5. Create the required Restructure Profile(s) and save. These dictate the rules and requirements for the restructure and allow you to validate each employee's movement prior to running.
6. Run the Validation on the employees highlighted to check for errors.
7. Fix any errors. If any errors occur (employees highlighted Red) it will be because their new Post hierarchy does not exist and will need to be linked as in step 2.
8. Click **Report** once all employees are green. Save this report of current employee's posts for your own records.
9. Click **Process Transfer**.
10. Contact PeopleXD to synchronise tables. This completes the restructure process.
11. Run the report again and save locally. This contains the employee's old and new details.
12. Perform spot checks on processed employees. There should be no change to rate of pay, and no change to any allowances.

1.3. Access to Restructuring

Access to the Post Restructuring is controlled by the following menu option:

Menu Option	System
POST MANAGEMENT MENU-POST RESTRUCTURING	CorePersonnel

2. Post Restructuring Procedure

The following sections will provide detail on each of the steps in the Post Restructuring process.

2.1. Remove Confirmed Future appointments and outstanding Salary Approvals.

2.1.1. Confirmed Future Appointments

Post Restructuring will only process the latest Commenced appointment. Before restructuring, you must extract any Confirmed Future appointments and Delete them from the system. These can be recreated if required once the restructure is complete.

2.1.2. Salary Approvals

If an employee has an outstanding Salary Approval, this must be deleted and recreated via a Salary Amendment if required.

2.2. Add new Reference Data

Add the new hierarchy to the relevant reference screen. To do this, follow the below steps:

1. Navigate to the People Management Dashboard
2. Click the Data Centre widget and open the Reference Data option
3. Search for the relevant reference data, i.e. Departments, Management units, Cost Centres, Locations or Areas, and click on the tile
4. Click **Add**
5. Input a Code and Description
6. Click **Save**
7. Ensure the **Active** toggle is enabled

You should also ensure that *Restructure* is added to the Reason Codes reference data. This will be used when performing the Restructure and for reporting for all new posts created by the process.

2.3. Link new reference data items to the Hierarchy Tree

The new reference data items can now be linked to the hierarchy. To do this:

1. Navigate to the People Management Dashboard
2. Click the Data Centre widget and open the People Management option
3. Click the **Structure Setup** tile

4. Click **Hierarchy** on the relevant structure
5. Expand the three dot menu on the hierarchy you would like to add the new item to
6. Click **Add**
7. Search for the new reference data item you have created
8. Enable the **Add to Hierarchy** toggle
9. Click **Save**

Make sure to link all subsequent lower hierarchy items required to this new business unit – e.g. Section, Subsection, Cost Centre.

2.4. Give access to any new Departments in System Users

This is required so that users have personnel access to employees in the new hierarchy.

- If access is assigned at Company Level for a user, the user will inherit access to any new hierarchy items.
- If access is defined at a lower level for the user, you will need to grant access for that employee.

To manage personnel access, follow the below steps:

1. Navigate to the People Management dashboard.
2. From the Data Centre widget, click **View All**.
3. Click the **HR User Access** tile.
4. Search for the relevant user, then under Security Type, select Personnel Access.
5. Select a structure code and an access level.
6. Enable the required access with the **Access Granted** toggle.

2.5. Create the required Restructure Profile(s)

This can only be performed in Back Office. To create a restructure profile, follow the below steps:

1. Navigate to *Personnel → Maintenance → Post Management → Post Restructuring*
2. On the Restructuring Profile screen, click **New Profile**

3. Enter the profile details. The table and screenshot below provide guidance:

Field	Explanation
Profile Name	This is the name used for the restructuring profile. It will be referenced against the new post created, so it's important to use an intuitive naming convention, for example "Name of level being restructured"- "Date stamp"- "User initials".
Effective Date	Always choose an effective date in the past or 'today's' date. The restructured appointment change will be effective from this date. The old sequence will end the day previous to this date.
Transfer From/To	This should always be From Org Structure To Org Structure.
Restructuring Type	It is recommended to select 'Update Existing Contract'. This will update the existing appointment by creating a new sequence, and ending the old sequence. The appointment itself is not ended (it is similar to Amending an appointment). In contrast, the 'Create New Contract' option will create a new Appointment ID with the New Structure Specified.
Structure Details	Select the level for which the restructure will take place. - The Left should contain the source level from which employees are transferring. - The right section should specify the new destination for all employees in the level selected on the left. Selecting 'Use employee value' means the employee will retain their existing Sub Section, Cost Centre, etc. in the new updated appointment.

Field	Explanation
Old Post Profile Options	It is recommended to tick on both these indicators
New Post Profile options	• Hierarchy Levels – This specifies how many levels of the Post profile will be tied down. Typically this is the first 3 Levels - Company, Directorate, and Department. • Auto-Authorised /Auto Commenced – It is recommended not to tick these on. • The remaining fields will assign the selected value to all Post profiles created by the Restructure. Typically, we would not populate these.

The screenshot displays the 'Organisational Restructuring' application window. The main form is titled 'Restructuring Profile' and is divided into several sections:

- Profile Name:** Section Environment to Environmental Protection 20151022 KS
- Effective Date:** 01-OCT-2015
- Date Applied:** (empty field)
- Transfer From:**
 - ☐ Personnel Number
 - ☐ Post Number
 - ☒ Organisational Structure
- Transfer To:**
 - ☐ Post Number
 - ☒ Organisational Structure
- From Structure Details:**
 - Structure: lgcsb
 - Company *: WICKLOW COUNTY COUNCIL
 - Directorate *: WATER & ENVIRONMENTAL SERVICES
 - Department *: WATER & ENVIRONMENTAL SERVICES
 - Section *: ENVIRONMENT
 - Sub Section *: All
 - Cost Centre *: All
 - Location: All
 - Work Group: All
 - Grade: All
 - DR Returns: All
 - Officer status: All
- To Structure Details:**
 - Structure: lgcsb
 - Company *: WICKLOW COUNTY COUNCIL
 - Directorate *: WATER & ENVIRONMENTAL SERVICES
 - Department *: WATER & ENVIRONMENTAL SERVICES
 - Section *: ENVIRONMENTAL PROTECTION
 - Sub Section *: Use Employee Value
 - Cost Centre *: Use Employee Value
 - Location: Use Employee Value
 - Work Group: Use Employee Value
 - Grade: Use Employee Value
 - DR Returns: Use Employee Value
 - Officer status: Use Employee Value
- Restructuring Type:** Update Existing Contract
- Old Post Profile Options:**
 - Set old post as dormant where all appointments are ended: ☒
 - Transfer employee FTE to new post profile: ☒
- New Post Profile Options:**
 - No. of hierarchy levels to be populated: 3 Levels
 - Set as auto-authorisation: ☐
 - Set as auto-commencement: ☐
 - Report To Post Number: (empty field)
 - Category: (empty field)
 - Sub Category: (empty field)
 - Pay Scale: (empty field)

4. Once finished, click **Save Profile**

Note: Once saved, you can still edit the profile further if required.

2.6. View Employees & Run the Validation

This step allows you to allow you to validate each employee's movement prior to running. This can only be completed in Back Office. To do this, follow the below steps:

1. On the relevant restructuring profile, click **View Employees** to view the list of Employees to be processed
2. Select the Restructure reason code (this will have been set up in step [2.2 Add new Reference Data](#))
3. Select all employees to be validated by ticking the check box for each employee
4. Click **Save**
5. Click **Validate Records**

Save Validate Records Report Process Transfer Cancel

2.7. Fix any errors

If any errors occur, the employees will be highlighted in red. This will be because their new Post hierarchy does not exist, and will need to be linked. For example:

The screenshot shows the 'Restructuring Profile' window. The 'View Employees' tab is active, displaying a table of employee details. The table has columns for Personnel No, Personnel Name, Existing Post, New Post, and Date Processed. The 'Existing Post' column shows various roles like 'LIFEGUARD', 'EXECUTIVE TECHNICIAN', 'CLERICAL OFFICER', etc. The 'New Post' column is empty. The 'Date Processed' column has checkboxes. The 'Transfer Reason' is set to 'RESTRU'. The 'Employees Selected' count is 28, and 'Employees Processed' is 0. The 'Validate Records' button is highlighted with a red arrow.

Personnel No	Personnel Name	Existing Post	New Post	Date Processed
1194092		000886-7 - LIFEGUARD		
1216531		001125-17 - EXECUTIVE TECHNICIAN		
1296104		001187-1 - CLERICAL OFFICER		
1276360		001129-9 - ADMINISTRATIVE OFFICER		
1169289		001029-1 - SCHOOL WARDEN		
4222433		001466-2 - SENIOR EXECUTIVE OFFICER		
1186352		001145-2 - LIFEGUARD		
1182916		001099-4 - CRAFTWORKER		
1189564		001003-1 - SUBSTITUTE SCHOOL WARDEN		
1297994		001548-1 - ENVIRONMENTAL TECHNICIAN		
1186620		001024-1 - SCHOOL WARDEN		
1177336		001100-2 - GENERAL OPERATIVE		
1187887		000883-1 - LIFEGUARD		
1187911		000345-4 - LITTER WARDEN		
1285401		001174-10 - EXECUTIVE SCIENTIST		
1189397		001002-2 - SUBSTITUTE SCHOOL WARDEN		
1173936		000350-3 - GENERAL OPERATIVE		
1278612		001122-4 - ASSISTANT STAFF OFFICER		

To view the error, double click on an employee.

The screenshot shows an 'Error Message' dialog box. It contains the following text:

Company: WICKLOW COUNTY COUNCIL
 Directorate: WATER & ENVIRONMENTAL SERVICES
 Department: WATER & ENVIRONMENTAL SERVICES
 Section: ENVIRONMENTAL PROTECTION
 Sub Section: LIFEGUARDS
 Cost Centre: COREPAY DEFAULT

There is an 'OK' button at the bottom.

Return to step [2.3 Link new reference data items to the Hierarchy Tree](#) and link any flagged items. Once all flagged items are linked in the hierarchy, return to restructure profile and click **Validate Records** again. All corrected records will switch to green.

2.8. Generate the report

Once all employee errors have been fixed, click **Report**. This will generate a report of current employee's posts. Make sure to save this.

2.9. Process Transfer

Once happy with the validation, click **Process Transfer** to perform the Restructure. A message will appear to confirm Restructure is complete.

The screenshot displays the 'Organisational Restructuring' application window. The 'Restructuring Profile' section at the top includes fields for 'Profile Name' (Section Environment to Environmental Protection 20151022 KS), 'Effective Date' (01-OCT-2015), 'Date Applied', 'Transfer From', 'Transfer To', and 'Transfer Person'. Below this, the 'New Employees' section shows 'Employee Details' with a table of personnel. The 'Transfer Reason' is set to 'RESTRU'. The table lists personnel with their IDs, names, existing posts, new posts, and dates processed. The 'Process Transfer' button at the bottom is highlighted with a red rectangle. A small dialog box in the bottom right corner reads 'Restructuring Complete.' with an 'OK' button.

Personnel No	Personnel Name	Existing Post	New Post	Date Processed
1194092		000886-7 - LIFEGUARD		
1216531		001125-17 - EXECUTIVE TECHNICIAN		
1296104		001187-1 - CLERICAL OFFICER		
1276360		001129-9 - ADMINISTRATIVE OFFICER		
1169289		001029-1 - SCHOOL WARDEN		
4222433		001466-2 - SENIOR EXECUTIVE OFFICER		
1186352		001145-2 - LIFEGUARD		
1182916		001099-4 - CRAFTWORKER		
1189564		001003-1 - SUBSTITUTE SCHOOL WARDEN

1285401		001174-10 - EXECUTIVE SCIENTIST		
1189397		001002-2 - SUBSTITUTE SCHOOL WARDEN		
1173936		000350-3 - GENERAL OPERATIVE		
1278612		001122-4 - ASSISTANT STAFF OFFICER		

2.10. Contact PeopleXD to synchronise tables

At this point, it's required to run a script to sync the new data across all tables. Contact PeopleXD to perform this for you.

2.11. Run the report again and save locally

Once PeopleXD confirm that the tables have been successfully synchronised, click **Report** to run the report again, and save it locally for records. This contains the employee's old and new details.

2.12. Perform spot checks on processed employees

To check that the post restructure has been successful, manually check a few employee records. There should be no change to rate of pay, and no change to any allowances.

2.12.1. Suggested Checks

It is recommended to check the following details:

- View Employee History
 - Check appointment start and end dates match Restructure effective date
 - Reason Code Restructure is assigned to the employees latest appointment
 - A brand new post number is created
- Post Administration
 - The new Post number is recorded against the same Appointment ID as the previous post.
 - Dates can also be verified here
- Salary Administration – Confirm there is no change to rate of Pay and allowances continue as normal
- Run an Insight report to perform a head count by Department, Section etc.
