1. Overview

1.1. Purpose of the Guide

The purpose of this guide is to provide detailed guidance on how to manage the Reference Data on PeopleXD that is used specifically to support People Management.

This includes:

- An overview of what reference data is.
- How to access reference data screens.
- How to manage reference data
- Available reference data

1.2. What is Reference Data

Reference Data refers to the data that is available to select by end users of the system on the various pick lists / drop-down lists throughout PeopleXD. This includes the following reference data categories:

- Organisational Structure e.g. Company and Department
- Contract e.g. Employee status and reason code.
- Employee / Person e.g. Title and qualifications

PeopleXD provides a set of pre-configured Reference Data lists. These are reviewed and updated during an implementation to ensure that the data is aligned to an organisation's specific requirements, for record and reporting purposes.

Reference Data may also be updated on the system during the live running to support changing business needs e.g. add a new Job Title or Reason Code.

1.3. Access Reference Data Screens

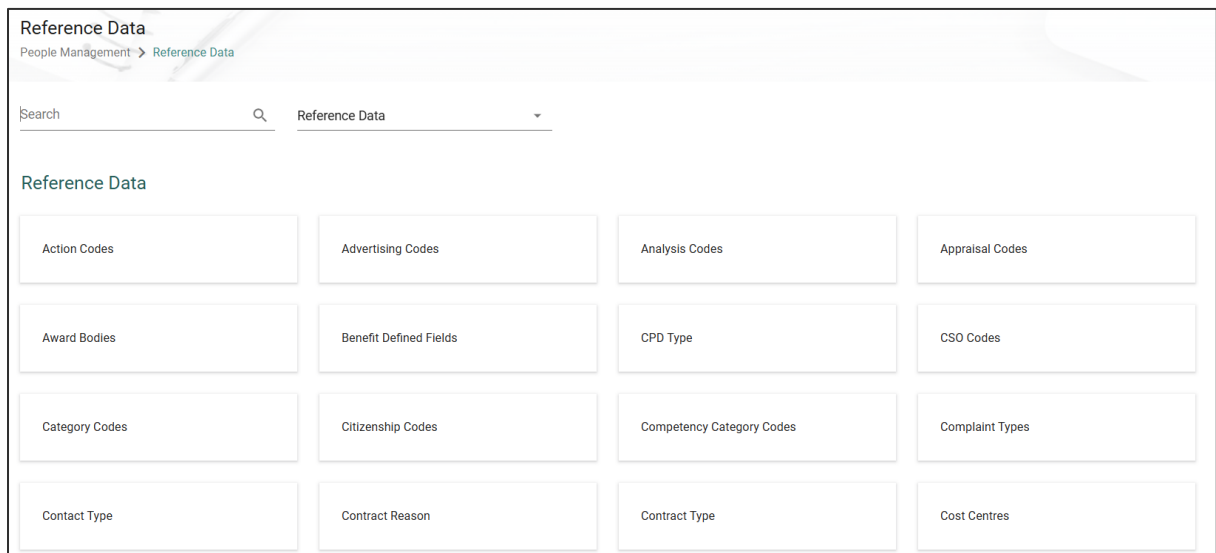

All reference data screens can be accessed from the data centre widget, with some accessed from the Reference Data screen and others from the Other References screen.

Note: These screens includes reference data items that are used across other PeopleXD products / features, and it is not restricted to only People Management.

1.3.1. Reference Data Screen

To access reference data screens from the data centre widget:

1. On the **People Management Dashboard** click the **Data Centre** tab.
2. On the Data Centre widget open the Reference Data option.

3. Search for and click the relevant tile.

1.3.2. Other Reference Data

To access other reference data:

1. Go to the **Data Centre** widget and open **Reference Data**.
2. Click **Other References**.
3. Select a **Reference Type** from the drop down list.

Other References

People Management > Reference Data > Other References

Reference Type

Reference Type

APPTYP

Description

Approval Type

Reference Codes

Code	Description	
A	Agency	...
E	External	...
I	Internal	...

1.3.3. Additional Areas

You can also access reference data screens across PeopleXD this may be to configure reference data for products other than People Management. Any changes made on one reference data screen will update all screens of the same type.

1.3.3.1. WFM

To manage WFM reference data:

1. Go to the **WFM Admin Dashboard** and click **WFM Configuration** tab.
2. Expand the filter and select **Reference Data**.

WFM Configuration

Search

View All

Reference Data

Assembly Points

Departments

Group Non Payroll Codes

Jobs

Pattern Codes

Pay Codes

Reason Code and Groups

Rounding Codes

1.3.3.2. Talent

To manage Talent reference data:

1. Go to the **Talent Dashboard** and click the **Talent Setup** tab.

2. On the **Talent Setup** widget open the Reference Data option.

The screenshot shows the 'Reference Data' configuration interface. On the left is a sidebar with a list of categories: 'Career - Willing To Relocate' (highlighted), 'Career - Willing To Travel', 'Career Preference', 'Objectives Priority Scale', 'Recognition Awards', 'Recognition Level Threshold', 'Skills', 'Talent Pool', and 'Talent Pool Category'. The main area is titled 'Career - Willing to Relocate' and contains a search bar, an 'ADD' button, and a table with columns 'Code', 'Description', and 'Active'. The table has two rows: one with Code '1', Description 'Yes', and an active toggle; another with Code '2', Description 'No', and an active toggle. A 'SAVE' button is at the bottom right.

Code	Description	Active
1	Yes	☒
2	No	☒

1.3.3.3. Recruitment

To manage Recruitment reference data:

1. Go to the **Recruitment Dashboard** and click the **Toolbox** tab.
2. On the **My Recruit Toolbox** widget open the relevant option. For example, Applicant Status.

The screenshot shows the 'My Recruit Toolbox' widget. It contains a list of options, each with an 'OPEN' button to its right. The options are: 'Anonymisation', 'Applicant Cleardown', 'Applicant Retrigger', 'Applicant Status', 'Applicant Talent Pool', 'Candidate SMS', and 'Job Advert Field Configuration'. A vertical scrollbar is on the right side of the list.

Anonymisation	OPEN
Applicant Cleardown	OPEN
Applicant Retrigger	OPEN
Applicant Status	OPEN
Applicant Talent Pool	OPEN
Candidate SMS	OPEN
Job Advert Field Configuration	OPEN

1.4. Reference Data Screens

Reference data screens are split into two types, this refers to whether the screens contain additional configuration options, such as unique fields and toggles.

1.4.1. Standard Reference Data

Standard reference data refers to reference data screens that only have the following mandatory fields:

- Reference Code
- Reference Description
- Active Toggle

For example the Management Units reference data screen is standard.

Maintain Management Units

Management Unit Code	Description	Analysis Code	Description	Active	
D1	Payroll			☒	...
D2	HR			☒	...
D3	Contracts			☒	...
D4	Recruitment			☒	...
D5	Finance			☒	...

Cancel

AddSave

1.4.2. Non-Standard Reference Data

Non-Standard Reference Data refers to reference data screens that have additional configuration options, such as additional fields and toggles.

For example the Employee Status reference data screen is non standard as it includes toggles such as HR FTE and Active on Staff Request.

Maintain Employee Status Codes

Empl Status	Description	Ana... Code	Description	Hourly Holiday Entitlement	Active	HR FTE Ind	Payroll FTE Ind	Active on Staff Req.	
A	Apprentice/Trainee			☒	☒	☒	☒	☐	...
CS	Casual / Zero Hours			☐	☒	☐	☐	☒	...

PE	Pensioner			☐	☒	☐	☐	☒	...

Cancel

Add

Save

2. Manage Reference Data

The majority of reference data items are created, updated, or deleted using the same steps.

2.1. Add Reference Data

To add reference data:

1. Go to the relevant reference data screen.
2. You can choose from two methods:
 - a. To create a new line click **Add**.
 - b. To copy an existing code expand its **3-dot menu** and click **Duplicate**.
3. Fill in the **Code**
4. Fill in the **Description** (Max 40 alphanumeric characters)
5. Amend any non standard fields and toggles.
6. Enable the **Active** toggle where applicable.
7. Click **Save**.

2.2. Edit Reference Data

To edit reference data:

1. Go to the relevant reference data screen.
2. Update/overwrite the relevant fields.

 **Note:** The Code cannot be amended, even if it hasn't been linked to an existing record.

3. Turn on/off the relevant toggles.
4. Click **Save**.

2.3. Delete Reference Data

1. Go to the relevant reference data screen.
2. Expand the reference data items 3-dot menu.
3. Click **Delete**.
4. Click **Save**.

Note: It is only possible to delete a reference data item that is not linked to any record on PeopleXD. If you try to delete an item in use and a warning advises where in PeopleXD the code is in use.

3. Reference Data List

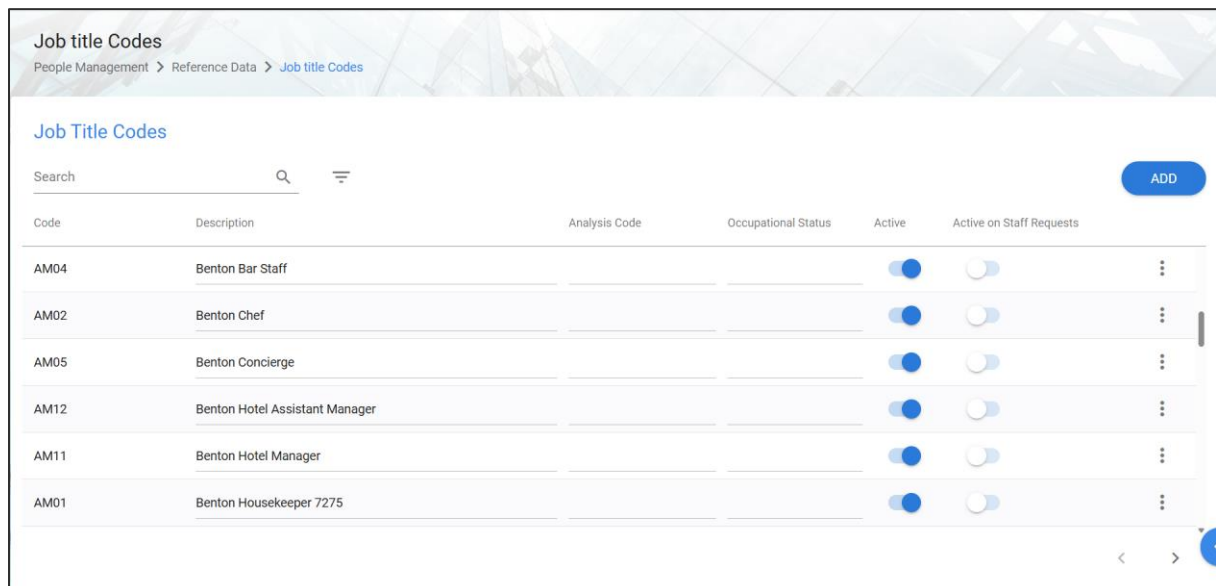

3.1. Contract Reference Data

Contract reference data includes items that support post profile and contract records on People Management.

3.1.1. Job Title Codes

The job titles codes screen is accessed from the reference data screen, it is non standard. It can also be accessed in WFM. The reference type code is:

- Post Title - POSTTL

Code	Description	Analysis Code	Occupational Status	Active	Active on Staff Requests
AM04	Benton Bar Staff			☒	☐
AM02	Benton Chef			☒	☐
AM05	Benton Concierge			☒	☐
AM12	Benton Hotel Assistant Manager			☒	☐
AM11	Benton Hotel Manager			☒	☐
AM01	Benton Housekeeper 7275			☒	☐

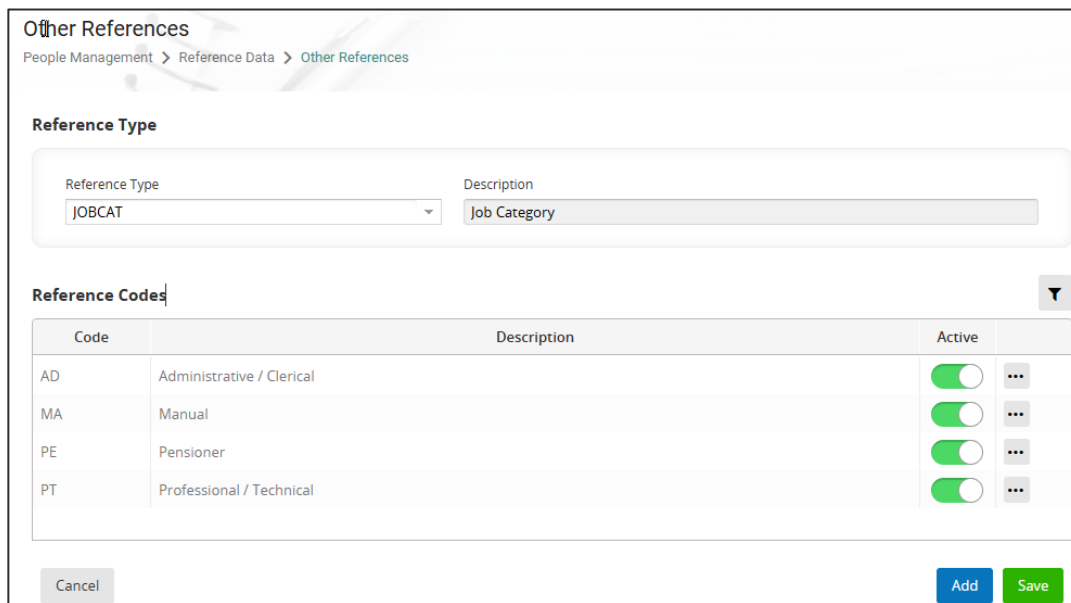

Fields include:

Field	Description
Job Title Code	Max 6 alphanumeric characters.
Occupation Status	Used to support CSO Reporting and is linked to a Payroll
Description	Occupational Status reference data list.
Active on Staff Requests	Turn on to include in the Job Title / Post Title drop-down lists on Staff Requests within Recruitment.

3.1.2. Job Category

The Job Category screen is accessed from other references, it is standard. The reference type code is:

- Job Category - JOBCAT

Other References
People Management > Reference Data > Other References

Save

Fields include the below and see further sections for additional details:

Field	Description
Code	Max 6 alphanumeric characters.
Questionnaire Profile	Turn on to add a questionnaire profile to a reason code.
Appointment	Turn on to add to the reason code list when creating a new contract for an employee. This includes new hire, additional contract, replace contract, rehire.
Contract	Turn on to add to the reason code list when amending an employee's existing contract. This includes, amend contract, update contract, change hours.
Salary	Turn on to add to the reason code list when amending an employee's salary or allowance. This includes, amend contract, update contract, change hours.

3.2.1. Restrict a List

If the Appointment/Contract/Salary toggle is turned off for all active reason code, the lists displayed contain all active reason codes. Once an toggle is turned on lists are restricted to only display reason codes with the toggle turned on.

3.2.2. Contract and Salary Toggle

When both the Contract and Salary toggles are turned on the Amend Salary screen is added to the amend contract wizard as the final step after the contract is saved.

This is useful configuration for contract amendment scenarios that have a corresponding impact on the employee's payroll e.g. change in hours.

Amend Salary
People Management > Employee Search > Brian Clifford (000112) > Amend Salary

Field	Description
Code	Max 6 alphanumeric characters.

3.4. Employee Reference Data

Employee reference data includes items that support employee records on People Management.

3.4.1. Title Setup

The Title Setup screen is accessed from the reference data screen, it is non standard.

Title Setup

People Management > Reference Data > Title Setup

MAPPING

Title Setup

Search Title Setup

ADD

Title	Active	
Brother	☐	DELETE
Captain	☐	DELETE
Dr	☒	DELETE
Emeritus Prof	☐	DELETE
Eur Ina	☐	DELETE

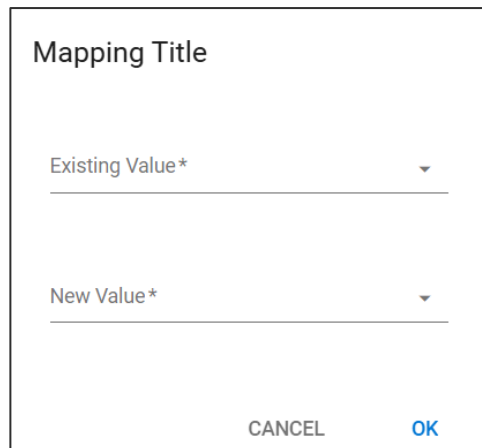

1 - 20 of 31 < >

Fields include:

Field	Description
Title	Max 16 alphanumeric characters.
Mapping	Use to change an existing title to a new/existing Title. This updates all associated records on PeopleXD to use the new Title and deletes the old title. For example, select the value 'Mister' and map it to the title Mr. This updates all records to display Mr.

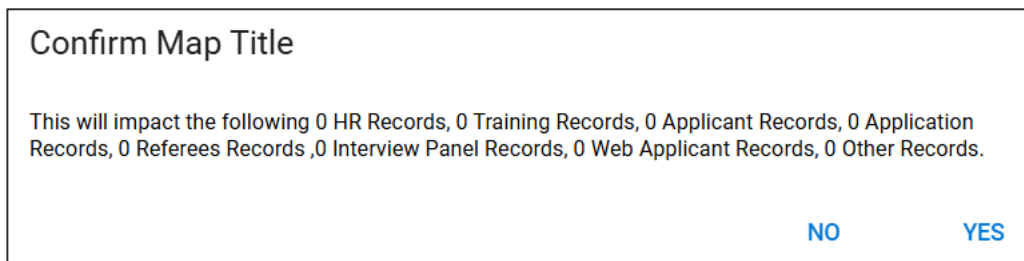

To map a title to a new/existing title:

1. Go to the **Title Setup** screen.
2. Click **Mapping**.
3. Select an **Existing Value** and a **New Value**.

A dialog box titled "Mapping Title". It contains two dropdown menus. The first is labeled "Existing Value*" and the second is labeled "New Value*". At the bottom right, there are two buttons: "CANCEL" and "OK".

4. Click **OK**.
5. Review the impacted records.

A dialog box titled "Confirm Map Title". It contains a text message: "This will impact the following 0 HR Records, 0 Training Records, 0 Applicant Records, 0 Application Records, 0 Referees Records ,0 Interview Panel Records, 0 Web Applicant Records, 0 Other Records." At the bottom right, there are two buttons: "NO" and "YES".

6. Click **Yes**. This updates the records and deletes the original title so it's no longer available to select.

3.4.2. Nationality

The Nationality screen is accessed from other references, it is standard. The reference type code is:

- Nationality Codes - NATI

Other References

People Management > Reference Data > Other References

3.7. Salary Reference Data

Many of the reference data items used to create the employee's salary records on People Management are Payroll fields. The following reference data items are only managed in Payroll:

- Pay Groups
- Allowance Pay Codes
- Allowance Scales and Rates

The following reference data items can be managed in both People Management and Payroll depending on your organisations process:

- Pay Code
- Pay Scale Point
- Pay Scale Rate

Note: There are many additional configuration settings that can be applied to salary reference data items. An overview of these additional indicators is provided in this document however, the Code and Description for each item is usually all that is configured by the HR administration team.

It is recommended to refer to full guidance on how additional features may be used and review additional complexities with the Payroll team.

3.7.1. Pay Scales

The Pay Scales screen is accessed from the reference data screen, it is non standard.

- It cannot be accessed from other references.
- You can also view and manage pay scales on the Payroll Dashboard using the Settings tab.

Pay Scales

People Management > Reference Data > Pay Scales

Position Reference

Position Code	Description	Nett Pay		Currency	Posn. Group	Allw. Code	Annual Lev 1	Ann Lev

2	Graduate Pay Scale	0.00	0.00				0.00	

Cancel
Add
Save

Fields include:

Field	Description
Code	Max 6 alphanumeric characters.
Nett Pay (Minimum)	Fill in the minimum Nett Pay. This flags employees on this position who fall below this minimum nett pay on the gross to nett exception messages.
Nett Pay (Maximum)	Fill in the maximum Nett Pay. This flags employees on this position who go above this maximum nett pay on the gross to nett exception messages.
Currency	Select the currency code.
Posn Group	Group positions under the same position group code.
Allow Cod	Select an allowance code to be used for that position.
Annual Lev 1	Fill in the annual leave entitlement level 1.
Annual Lev 2	Fill in the annual leave entitlement level 2.
PHI Rate	Bespoke field.
Pos Type	Select a position type.
Rn Dn	Bespoke field.
APTH Code	Government sector related
Part Time	Identify the position as a part time position.
Min Rate Exclude	Select to exclude from the minimum rate check.
Occupation Status Code	Used in Conjunction with the CSO Module. This is a code used for mapping the position to one of the CSO categories.

Field	Description
CSO Contracted Hours	Used in Conjunction with the CSO Module. Records the default position hours which the CSO Module will use, if parameter selected, for the hours worked in the CSO return.
ESS Timesheet	Select to make available when recording ESS Timesheets in portal.
ESS Quantity	Select if quantities are required when recording ESS Timesheets in portal.
ESS Fixed Quantity	Select if fixed quantities are required when recording ESS Timesheets in portal.
Active on Staff Req	Turn on to include in the Pay Scale drop-down lists on Staff Requests within Recruitment.
S&S Alleviation	Bespoke field.
Roll up Multiplier	Fill in the roll up multiplier.
Overtime Hours	Fill in overtime hours.

3.7.2. Pay Scale Point

The Pay Scale Points screen is accessed from the reference data screen, it is non standard.

- It cannot be accessed from other references.
- You can also view and manage pay scale points on the Payroll Dashboard using the Settings tab.

Pay Scale Point

Fields include:

Field	Description
Position Code	Select the Position Code/Pay Scale you want to add scale points to.
Code	Max 4 numeric characters.
Scale Narrative	Fill in the narrative this is displayed in reference data lists.
Scale Desc	Max 5 alphanumeric characters.
Bar Point	Select if this is a barrier point. This means the person doesn't increment beyond this point automatically and requires user instruction to say employee should be incremented beyond this.
Age	If using age-based increments fill in the age the increment is given.
Ind	Enter Y to use age-based increment.
Progression Scale	If using increments/progression select a scale. This can be the same scale as the previous progression or a different scale.
Progression Point	If using increments/progression select a point. This is the point the employee will move to on the selected scale.
Years on Point	If using length of service increments fill in the number of years an employee must be on this scale point before the increment is given.
L.S.I. Ind	Enter Y to use years on point based increment.
APTH Start Pt	Government Department Specific

3.7.3. Pay Rates

The Pay Rates screen is accessed from the reference data screen, it is non standard.

- It cannot be accessed from other references.
- You can view existing rates of pay by entering the effective date and reference used.
- You can also view and manage pay rates on the Payroll Dashboard in the Settings tab.

These screens have been updated and offer additional functionality as they are typically used by payroll administrators. See the Maintain Pay Rates User Guide for further details.

Pay Scale Rates

People Management > Reference Data > Pay Scale Rates

Add Position Rates

Fields include:

Field	Description
Position Code	Select the Position Code/Pay Scale you want to add rates to.
Rate Seq	Always populated with a value of 1.
Effective Date	Fill in the date you want to rates will be effective from.
Reference	Fill in a unique reference.
Scale Point	Fill in a valid scale point code.
Hourly Rate	Fill in the rate. It is only possible to record 1 rate per point e.g. Hourly OR Daily OR Annual OR Weekly OR Unit
Daily Rate	
Annual Salary	
Weekly Rate	
Unit Rate	

Note: Pay rates cannot be edited or deleted once saved.

3.8. Organisation Structure Reference Data

You may need to update your organisation structure to reflect changes in your company for example, where you create a new department or open a new location. This is done by creating the relevant reference data then updating your structure setup.

Note: To learn how to update your structure setup [read the knowledge article](#).

3.8.1. Company and Cost Centre

Note: Company and cost centre reference data is typically managed as part of Payroll configuration. It is recommended to refer to the [Payroll user guides](#) for further guidance.

3.8.2. Division

The Division screen is accessed from the reference data screen, it is non standard. The reference type code is:

- Division - DIV

Divisions

People Management > Reference Data > Divisions

Maintain Divisions
