1. Introduction

1.1. Purpose of the Document

The purpose of this guide is to provide instructions on how to rehire a dormant member of staff on People Management.

In order to be able to rehire an employee on CoreHR. The employee must exist on CoreHR and must be 'dormant'.

It will not be possible to use this process to set up rehires on CoreHR, if that employee's previous period of employment was not captured on CoreHR.

When an employee is rehired on to the system:

- Their existing hr record is reactivated.
- Their rehire date / recent start date will be updated on CoreHR.
- The hr administrator will have the ability to update their personal information to reflect any changes for the employee since their last period of employment.
- They will be available to the payroll as a rehire with a new salary, once their contract has been commenced.

2. Rehires

2.1. Rehire Person Wizard

1. On the Employee Search widget, select the dropdown option next to the *Search Name or Personnel No.* and ensure that either *Dormant* or *Dormant and Active* is selected.

Search Name or Personnel No. 

Dormant and Active

Name	Personnel No	Job Title	Department	Date Started	Reports To	
 Alan Saunders	000088	Support Analyst	It Security	01-Feb-2016	Ann Long	VIEW
 Alice Jones	000013	Hr Administrator	HR Admin	01-Jan-2011	Thomas Cole	VIEW
 Amy Carr	000043	Budget Analyst	Budget	01-May-2014	Alan Saunders	VIEW

2. Search for the employee to be rehired.

It is recommended to search based on the employee's Social Security Number (PPS or NI Number) as this is a true unique identifier for the employee and is unlikely to have changed since their last period of employment. Other elements such as the employee's name could have changed in the interim period.

3. Click the **View** button to open the employee's record.
4. Click the **Actions** button and select **Rehire**.

FIN1 - Accounts

Select the **Post** that will be used to create the new contract.

The drop-down list will display all of the posts that the hr administrator has access to (based on their HR access).

- All *Auto Authorised & Auto Commenced* posts will be listed here. If one of these is selected, the Sequence drop down menu will disappear.
- If using an *Authorised Post Appointment*, select the Post and then select the required Sequence number from the corresponding drop-down list.
- The **Post Search** button may be used to pre-filter the Post drop down list.

Once a *Post/Post & Sequence* has been selected, the screen updates to display the Org Structure

- Some fields may be pre-populated based on the Post selection
- Update all other fields as required. Mandatory fields are flagged with a * symbol.

Click the **Next** button to proceed to step 3.

7. Step 3: Contract Information

PREVIOUS NEXT

The *Effective Date* provided cannot be earlier than the employee's Leave Date for their previous period of employment i.e.

if the employee has a Leave Date of 1st Jan 2010, the effective date of the additional contract must be on or after that date

Update all fields as required for the employee's contract.

- Some of these fields will be automatically populated based on the Post selected e.g. *Job Title, Post Type, Category, Sub Category*. This is dependent on whether those fields have been populated on the Post.
- All other fields should be completed by the hr administrator as required. All mandatory fields are identified on the screen using a *-symbol.

Click the **Next** button to proceed to step 4.

8. **Step 4: Salary Information**

The following details will be pre-populated based on the Salary details in the *Post/Post Appointment*:

- Scale
- Point on Scale (pre-populated only if using *Authorised Post Appointment*)
- Multiplier
- This to be paid
- Amount to be paid

The employee's pay group will be the same as the pay group that they were in previously. If this needs to be changed, this will need to be updated in Payroll (if the employee is on Payroll).

Update all fields as required. All mandatory fields are identified on the screen using a * symbol.

PREVIOUS SAVE

Click on the **Save** button to complete the wizard.

9. If an *Auto Authorised Post* or an *Authorised Post Appointment* has been used, the appointment must be commenced.

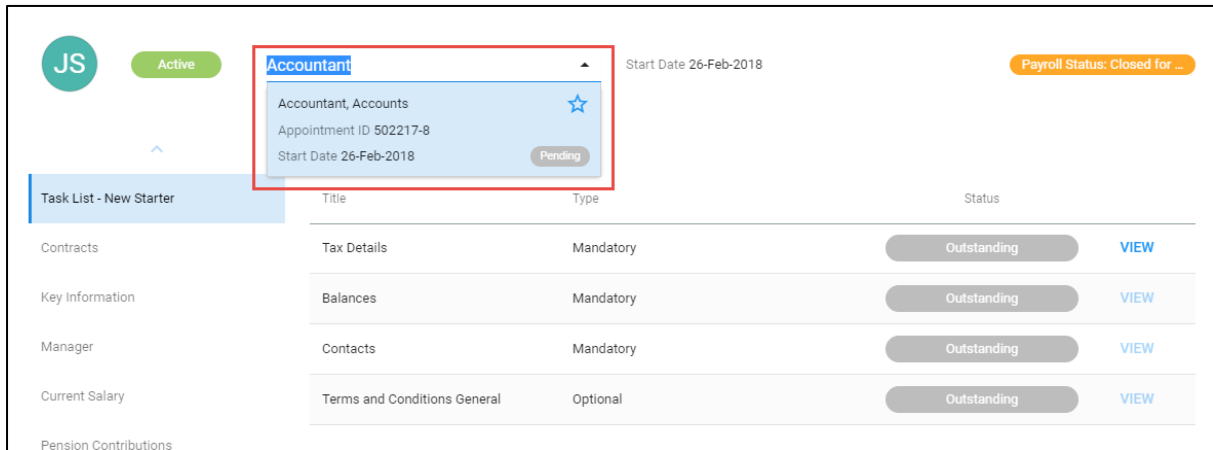

OR

10. If an *Auto Commenced Post* was used the Post Appointment/Contract will be *Commenced* on completion of the wizard.

2.2. Commence the Appointment

When using an *Auto Authorised Post* or *Authorised Post Appointment* to create the contract, the contract will initially be created in an *appointed* status. This means that:

- the employee exists on the system and should return as *active* if using the employee search on the People Management dashboard.
- the contract exists for the employee and is available to view on their employee record with a status of *Pending*.

The screenshot displays the People Management dashboard for an employee named 'Accountant'. The employee's status is 'Active', and their appointment ID is 502217-8, with a start date of 26-Feb-2018. The contract status is 'Pending'. The dashboard includes a sidebar with 'Task List - New Starter' and a main table with columns 'Title', 'Type', and 'Status'.

	Title	Type	Status
Contracts	Tax Details	Mandatory	Outstanding VIEW
Key Information	Balances	Mandatory	Outstanding VIEW
Manager	Contacts	Mandatory	Outstanding VIEW
Current Salary	Terms and Conditions General	Optional	Outstanding VIEW
Pension Contributions			

However, until the contract is commenced for the employee, the employee and their contract will not be available to the payroll team to process. The act of *commencing* the appointment for a specified *Commenced Date* will confirm that the employee has started in organisation and should be paid the contracted salary amount from that date.

2.3. Key Information

When an employee has been rehired, their HR record will reflect all periods of employment with the organisation – both past and present.

1. On the Employee Search screen, select the option **Key Information** for the employee.

Charles Green (000103)
People Management > Employee Search > Charles Green (000103)

2. Take note of the key dates of employment:

- **Date First Joined:** This is the very first date that the employee joined the organisation i.e. the start date of their very first contract.
- **Recent Start Date:** This is the latest start date for the employee i.e. the start date of the contract that they were rehired into. If the employee has left and been rehired a number of times, this field will always display the most recent rehire date.
- **Date Left:** This will only be populated if reviewing the screen for a dormant employee.

3. Rehire via Duplicate Employee Check

As part of the new hire process, the user is required to complete a *duplicate employee check*.

This prompts the user to first search the system to ensure that the employee they are about to set up on the system doesn't already exist – either as an active or a dormant record. This is not mandatory and it is possible to skip by selecting the **Create New Starter** button.

To complete a check:

1. Use the box to search for an employee using the following:
 - Forename
 - Surname
 - PPS Number / NI Number / Other Social Security No.

Note It is recommended to search based on PPS/NI Number if known as this is a true unique ID per employee and may identify scenarios where an employee exists on the system under another name e.g. an employee previously worked for the company under their maiden name and are rejoining under a married name.

2. Any employees (active or dormant) that match the search criteria, will display on the screen.

If an employee already exists on the system as dormant, they will appear on the screen with an action of *Rehire*.

Rehire the employee directly from here by selecting the employee record and then clicking **Next**.
