1. Introduction

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to configure the Salary Approval process in CoreHR.

This document covers use of Salary Approvals in CorePortal only. This does not cover Salary Approvals in CoreHR back office.

There are 2 types of Salary Approvals that can be configured on CorePortal:

- Standard Salary Approvals
- Workflow Based Salary Approvals

This guide provides instruction on how to view and manage the configuration of both salary approval types. However, please be aware that it is only possible to use one option on CoreHR i.e. it is not possible to use both options at the same time.

2. Standard Salary Approvals

2.1. Parameters

To access the salary approval parameters:

1. Quick jump to the *Data Centre* widget and **Open** *HR Admin Setup Settings*.
2. Search for *System Parameters - Advanced* and click on the corresponding option to open the screen.

The following parameters must be enabled for Standard Salary Approvals.

Advanced System Parameters

Salary/Increment Parameters

- Use HR Salary Approval Process: ☒
- Use HR Controlled Increment Process: ☒
- Allow Overseas Salaries: ☐
- Override Pay Group Auto Increment: ☒
- Amendment Reason Required: ☒
- Calculate Pay Multiplier: ☐
- Synchronisation of Joiner and Rejoiner Process: ☒
- Use Increment Workflow Approval Process: ☐
- Increment Days: 1
- HR Salary Approval Type: Company
- Replacement Group:
- Use Workflow for the Salary Approval Process: ☐
- Default Pay Scale: Personal Rate
- Default Rounding Code: Round Up To Nearest 25 Pence
- Record Additional Hourly Rate: ☐
- Amendment Comments Required: ☒
- Use HR Salary Amendment On Employee Set-Up: ☐
- Bypass Salary Increment Approvals: ☒
- HR Increment Approval Questionnaire:
- Default Currency Code:
- Payroll Salary Approval Type: Pay Group

Parameter	Description
Use HR Salary Approval Process	<i>Enabled:</i> Salary approvals are activated on CoreHR. All salary records will be created as <i>Pending</i> and will need to be set to <i>Approved</i> for these to appear to Payroll.

Parameter	Description
	<i>Not Enabled:</i> Salary approvals are disabled on the system. All salary records will be created as <i>Approved</i> and will be automatically available to Payroll.
HR Salary Approval Type	This is the organisational level that the HR Salary Approval will be assigned to. e.g. if this is set to Department, then a HR Salary Approver must be identified for each department setup on CoreHR. All salaries created for an employee in that Department will be routed to that Salary Approver.
Payroll Salary Approval Type	This is the organisational level that the Payroll Salary Approval will be assigned to. e.g. if this is set to Pay Group, then a Payroll Salary Approver must be identified for each <i>Pay Group</i> . All salaries created for an employee in that Department will be routed to that Salary Approver.

2.2. Organisational Roles Types

For an employee to be identified as a HR or Payroll Salary Approver, the corresponding Organisational Roles must exist on CoreHR.

To manage the Organisational Role Types:

1. Quick jump to the *Data Centre* widget and **Open** Reference Data.
2. Search for *Organisational Role Types* and click on the corresponding option.

Maintain Organisational Role Types									
Role Type	Description	Salary Approval Process	Approval Group	Approval Sequence	Active	ESS Approver	Questionnaire Access	Delegate	Manager Rollup
HR	Hr Salary Approver	☒	HR	1	☒	☒	None	☒	☐
PAYR...	Payroll Salary Approver	☒	PAYROLL	2	☒	☒	None	☒	☐

2.2.1. Role Name

There are default roles available on CoreHR for this:

Role Type	Description
HR	HR Salary Approver
Payroll	Payroll Salary Approver

It is recommended to use the default roles provided for this process.

However, it is possible to define new roles if required and it is also possible to have more than 2 roles as part of this process e.g.

1. HR Approver 1
2. HR Approver 2
3. Payroll Approver

If new or additional roles are created, it is required to set the additional indicators for *Salary Approval Process*, *Approval Group* and *Approval Sequence* for these.

2.2.2. Salary Approval Process

To indicate that a role will be used in the Salary Approval process, the *Salary Approval Process* indicator must be enabled.

This indicator should not be enabled for any other org roles that are not to be used in the Salary Approval Process.

If this is not enabled, then the system will not recognise that role as part of the salary approval process.

2.2.3. Approval Group

The approval group indicates whether this role will be the HR or the Payroll approver i.e.

- *HR*: Select this if the role is for a HR Salary Approver.
- *Payroll*: Select this if the role is for a Payroll Salary Approver.

If there are more than 2 salary approval levels to be set, please ensure that all roles have either the **HR** or **Payroll Approval Group** enabled.

2.2.4. Approval Sequence

This is the order in which the salary will be processed by the approvers i.e.

- The initial salary approver e.g. HR Salary Approver should have an *Approval Sequence* = 1
- The next salary approver e.g. Payroll Salary Approver should have an *Approval Sequence* = 2

If there are more than 2 roles configured for this process, then the approval sequence should reflect the order in which the salary will be approved.

Role	Approval Sequence
HR Approver 1	1
HR Approver 2	2
Payroll Approver	3

2.2.5. Active

The *Active* indicator must be enabled for all roles to be used in the Salary Approval process.

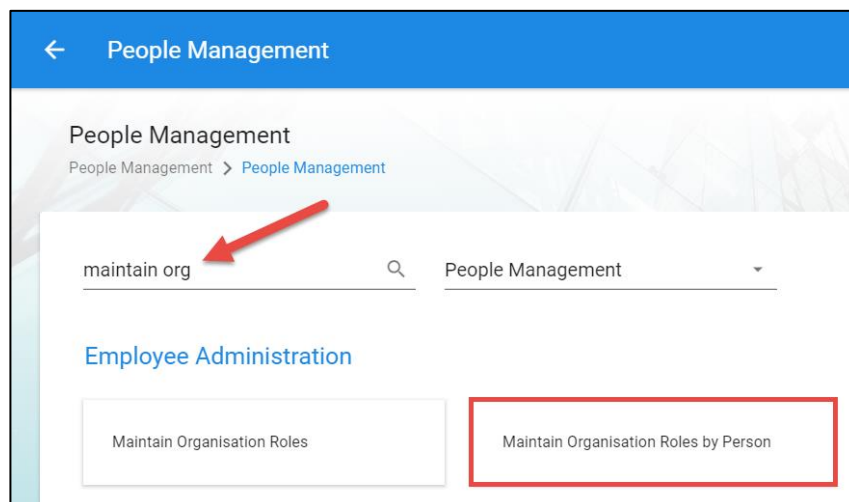

2.3. Organisational Role Assignments

Organisational roles must be assigned to the employee that will act as either a HR or Payroll Salary Approver i.e. this is where you identify the person that will be responsible for approving the salaries for employees in a particular Department or Pay Group (or other organisational unit, depending on the [Parameters](#)).

Note: Full guidance on how to manage employee Org Role assignments is available in the *Configuring Organisational Roles* user guide. This section provides a quick summary of one way to assign an employee to a salary approval role.

To assign a role to an employee:

1. Quick jump to the *Data Centre* widget and **Open** People Management.
2. Search for *Maintain Organisation Roles by Person* and click on the corresponding option under *Employee Administration*.

3. Use the search option at the top of the screen to do a keyword search on employee name:
 - Enter the employee name and click **Find**.
 - The active employees matching the search criteria entered will display on the *Personnel No* list at the left of the screen.

4. Click on the employee that the Org Roles should be assigned to.

Organisational Roles By Person Maintenance

Personnel No.

Search

Find

Personnel No.	Name
000017	Paul Martin

Structure
ABC Solutions

Role	Org Group	Date From	Date To	Org Group Item Code	Org Group Item Description
Head Of Department	Department	12-Dec-2017		HR5	Hr Admin
Level 2 Approver	Department	21-Mar-2016		HR2	Compensation & Benefits
Level 2 Approver	Department	21-Mar-2016		HR3	Training
Level 2 Approver	Department	21-Mar-2016		HR4	Payroll

Add
Save

5. Any org roles already assigned to the selected employee will be listed in the lower half of the screen.
6. To assign an org role to the selected employee:
 - a. Select the required Org Structure from the *Structure* drop down list.
This will be defaulted if there is only 1 structure set up on CoreHR.
 - b. Click the **Add** button to create a new row.
 - c. Select the org role from the *Role* drop down list.
 - d. Select the *Org Group* that the role will be defined against.
e.g. *Company* for HR Salary Approver or *Pay Group* for Payroll Salary Approver
This is based on the org units selected in the **HR Salary Approval Type and Payroll Salary Approval Type** parameters (see [2.1 Parameters](#))
 - e. Enter a *Date From*.
Format DD-MON-YYYY.
This is the date the employee will be recognised on CoreHR as having that role.

f. Enter a *Date To*.

- Format DD-MON-YYYY.
- This is optional.
- Identifies the date that the employee ceased in that role.

g. Select the *Org Group Item*.

This list is directly related to the *Org Group* already selected e.g. a list of departments if the *Org Group* is set to *Department*.

i. Directly input the reference data code for the group item if known.

1. **OR**

ii. Select from the drop-down list.

7. Click the **Save** button to save the new record.

2.4. User Access

2.4.1. Salary Approver Menu Access

The following menu options are required for a *salary approver* to access the *Salary Approvals* functionality on CorePortal.

System	Menu Option	Description
People Management	Salary Approval	This makes the <i>Salary Approvals</i> button available to the user on the <i>Command Centre</i> widget, so that they may access Salary Approvals.

2.4.2. Administrator Configuration Menu Options

The following menu options are required for a system administrator to access the screens required to support the configuration of *Salary Approvals* functionality on CorePortal.

System = *People Management*

Menu Option	Description
System Parameters Advanced	Access to the <i>Advanced System Parameters</i> screen with access to view and edit settings
Maintain Organisational Roles	Access to the <i>Maintain Organisational Roles</i> screen with access to view, edit, add and delete records
Maintain Organisational Roles	Access to the <i>Maintain Organisational Roles by Person</i> screen with access to view, edit, add and delete records
Reference Data Menu - HR Reference Data	Access to the <i>Organisational Role Types</i> screen with access to view, edit, add and delete records

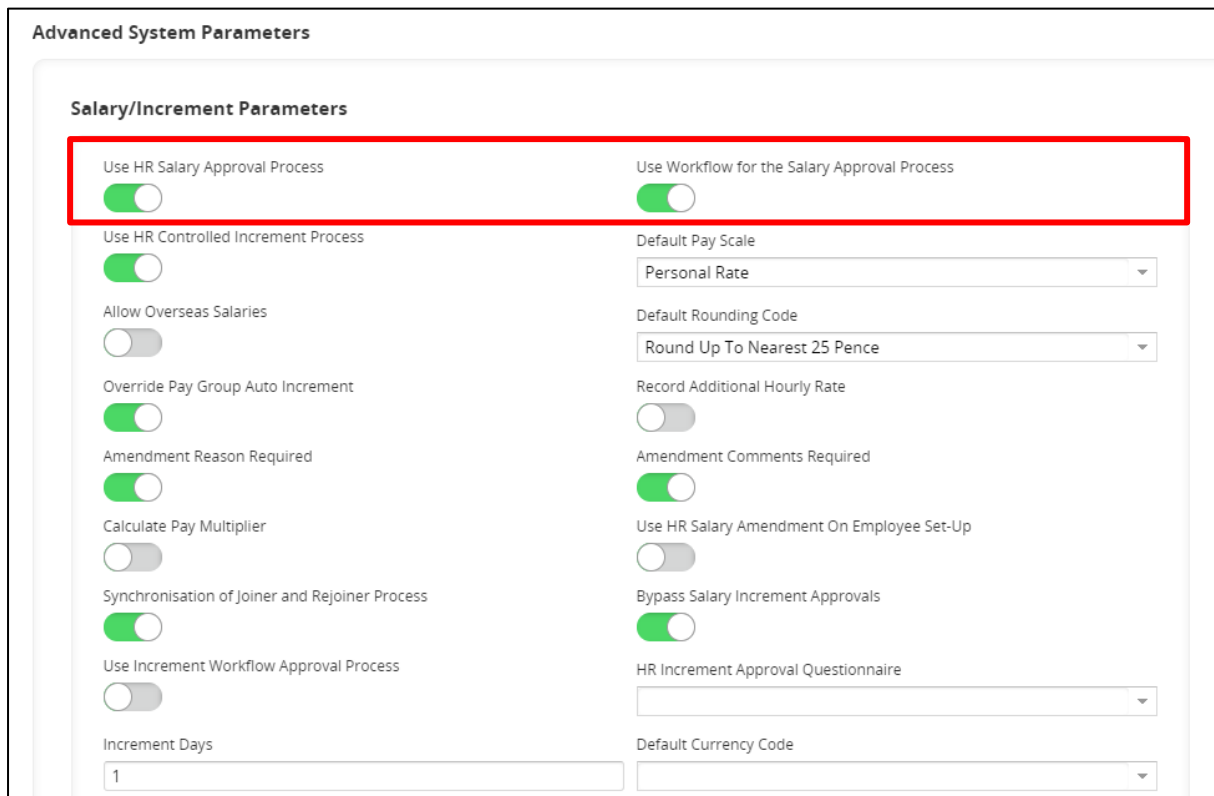

3. Workflow-Based Salary Approvals

3.1. Parameters

To access the salary approval parameters:

1. Quick jump to the *Data Centre* widget and **Open** *HR Admin Setup Settings*.
2. Search for *System Parameters - Advanced* and click on the corresponding option to open the screen.

The following parameters must be enabled for Workflow-Based Salary Approvals.

Advanced System Parameters

Parameter	Description
Use HR Salary Approval Process	Enabled: Salary approvals are activated on CoreHR. All salary records will be created as <i>Pending</i> and will need to be set to <i>Approved</i> for these to appear to Payroll. Not Enabled: Salary approvals are disabled on the system. All salary records will be created as <i>Approved</i> and will be automatically available to Payroll.
Use Workflow for the Salary Approval Process	Indicates that Salary approvals will flow through a custom workflow process, to be configured per organisation (see 3.2 Workflow Process).

3.2. Workflow Process

3.2.1. Why is a Workflow Process Needed?

The Workflow Process is used to define the actual approval tasks, the order of the tasks and the required approver(s), for the salary approval process.

When using *Workflow-Based Salary Approvals* these processes must be defined from scratch on CoreHR per organisation, depending on their specific process requirements.

It is possible to configure different workflow processes on CoreHR, to cater for different groups of employees e.g.

- A process for senior managers
- A process for permanent staff etc

Each individual process will need to be configured on CoreHR and the '[Salary Approval Process Assignment](#)' feature will be used to associate the workflow with the required employee group.

3.2.2. Configuring a Workflow Process (Example Only)

Workflow processes are configured via the People Management dashboard.

To configure a process for salary approvals:

1. Quick Jump to People Management > Data Centre
2. Go to HR Setup and Settings and search for "HR Process Configuration".
3. Click on the corresponding result and the HR Process Configuration screen will open.

HR Admin Setup Settings

Hr Process Configuration

People Management > HR Admin Setup Settings > Hr Process Configuration

Search

Process Description:

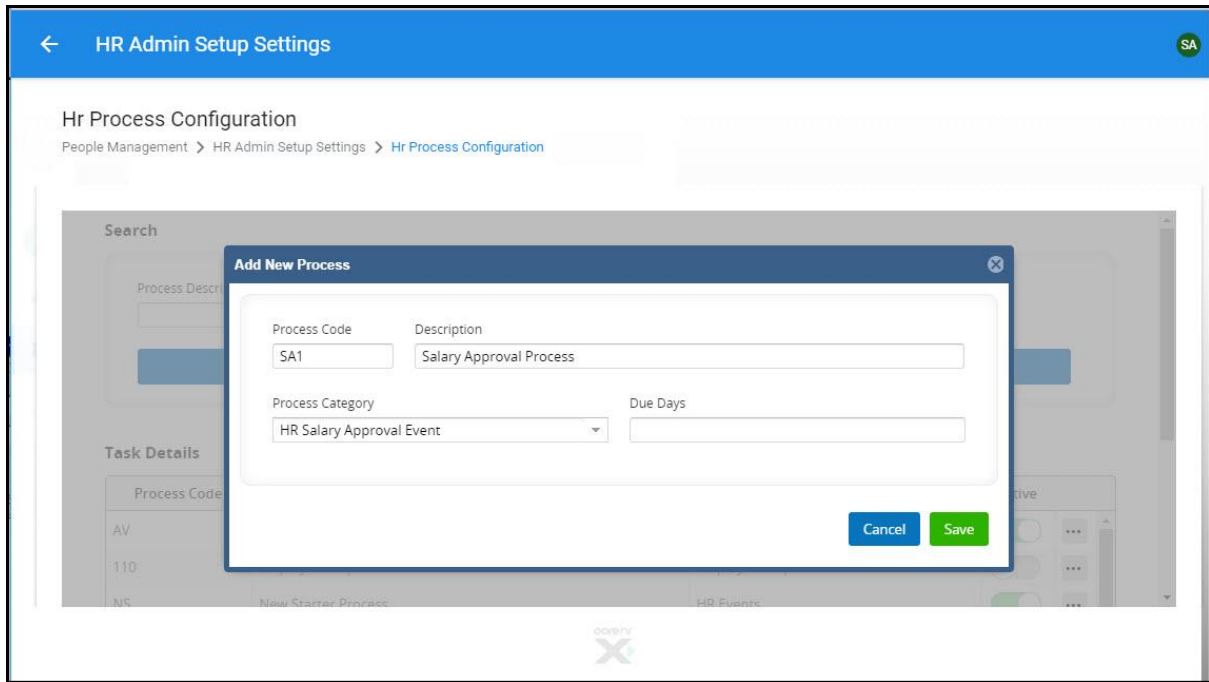

Process Category:

Search **Clear** **New Process**

Task Details

Process Code	Description	Process Category	Active	
AV	Availability	Employee Availability Processes	☒	...
110	Employee Request Test	Employee Requests	☐	...
NS	New Starter Process	HR Events	☒	...

4. Click the **New Process** button to open the *Notification Details* screen.
5. Update the initial process details:
 - *Code*: Max 6 alphanumeric characters
 - *Description*: 200 alphanumeric characters
 - *Process Category* = HRSV (HR Salary Approval Event)
 - *Due Days*

The screenshot shows the 'HR Admin Setup Settings' page with a modal window titled 'Add New Process'. The modal contains the following fields:

- Process Code: SA1
- Description: Salary Approval Process
- Process Category: HR Salary Approval Event (dropdown menu)
- Due Days: (empty text field)

At the bottom right of the modal are two buttons: 'Cancel' (blue) and 'Save' (green). The background shows a list of processes with columns for Process Code, Process Description, and Task Details.

6. Click **Save** to create the process.
The *HR Process Configuration Screen* will open.
7. Configure the tasks.
8. Once configured, select the **Active** indicator
9. Click **Save**.
10. The process is now available to assign on the '[Salary Approval Process Assignment](#)' screen in CorePortal.

Note: This guide is not intended to provide full training on how to configure a workflow process on CoreHR. However, screenshots are provided below of the overall workflow and each task.

3.2.3. Org Role Types & Assigning Org Roles

Org roles will be used in the 'Initial' notification for the task. Ensure that the required roles are configured on CoreHR for the process and assigned to an employee, for the Organisational Group defined on the notification.

 **Note:** None of the *Salary approval* indicators covered in [2.2 Organisational Roles Types](#) are required for this (i.e. Salary Approval Process, Approval Group and Approval Sequence indicators are relevant only if using standard salary approvals).

Guidance is available in the ***Configuring Organisational Roles*** user guide on how to add new Org Roles to the system.

3.3. Salary Approval Process Assignment

The *Salary Approval Process Assignment* screen provides the ability to:

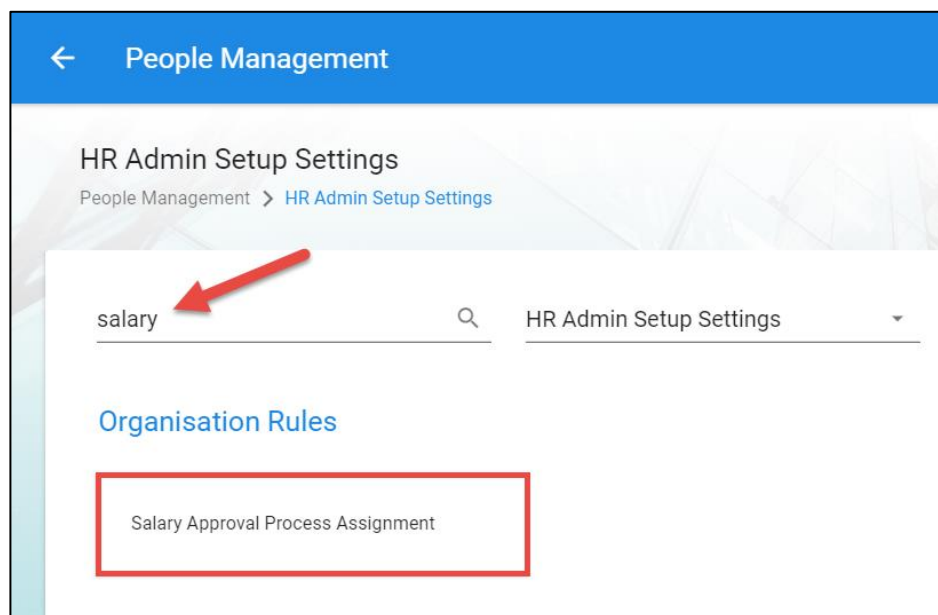

- assign individual workflow processes to groups of employees.
- specifically exclude groups of employees from the Salary Approval Process.

Note: If using *Workflow Based Salary Approvals* it is mandatory to define the employees that will be included / excluded per defined workflow process. If these are not defined here, then salary amendments will not flow through a Salary Approval process and these will be automatically *Approved* and available to Payroll to process.

3.3.1. Assign Employee Groups to Salary Approval Workflow

To access the salary approval parameters:

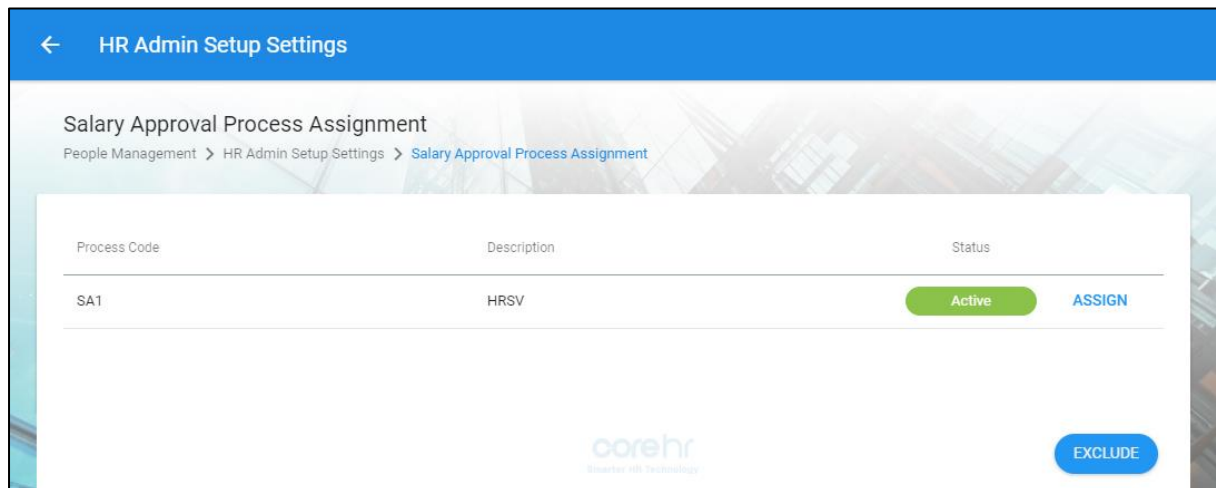

1. Quick jump to the *Data Centre* widget and **Open** at *HR Admin Setup Settings*.
2. Search for *Salary Approval Process Assignment* and click on the corresponding option to open the screen.

The *Salary Approval Process Assignment* screen opens.

3. This screen defaults to show all the CoreWorkflow processes where the *Process Category* = *HR Salary Approval Event*.

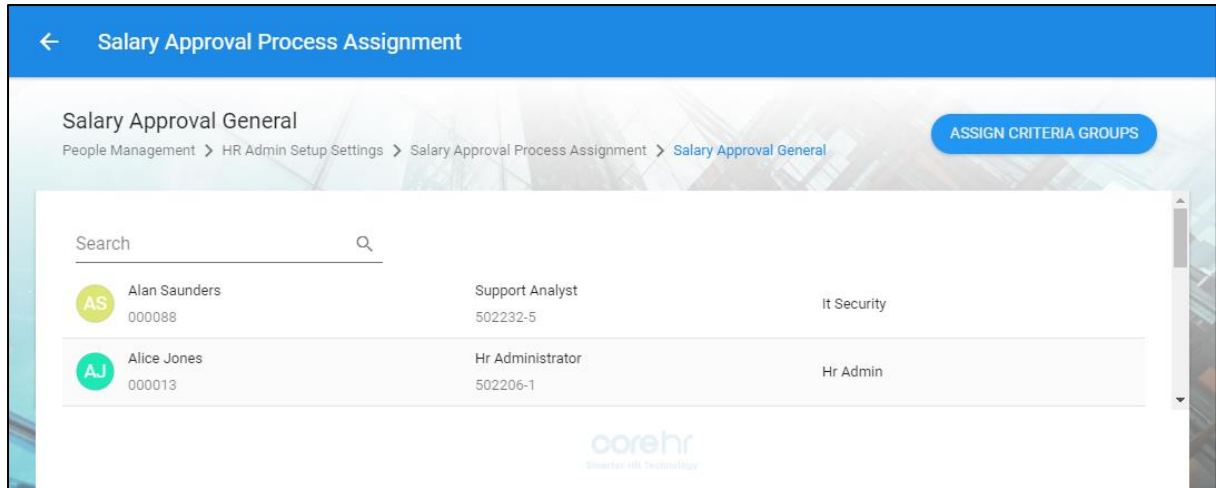

- It is not possible to add/edit the processes directly on this screen. This will display existing configuration only.
- To update existing processes (e.g. make active/inactive etc) or add new processes, please note that this is only available via the CoreHR Back Office application. See [3.2 Workflow Process](#) for further details.

3. To assign a workflow process to a group of employees, click on the **Assign** button for the required process.

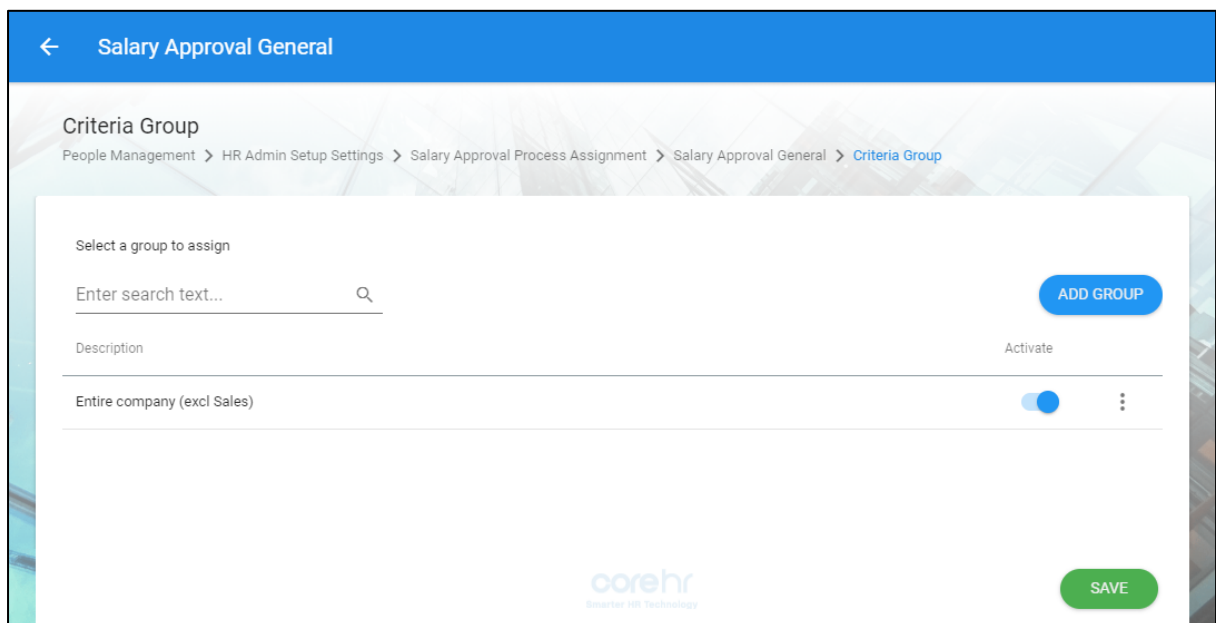

The *Salary Approval General* screen will appear.

- If existing assignments have been made, this screen will display the corresponding list of employees.
 - If no assignments have been made, this screen will show *No data to display*.
4. Click on the **Assign Criteria Group** button.

5. The *Criteria Group* screen opens. This screen:

- Displays all existing criteria group for this process, if these have been already defined.
- Provides the option to define new criteria groups.

6. Click on the **Add Group** button. The *Group Creator* screen will appear. This screen:

- Displays all existing groups, if these have been already defined.
- Provides the option to define new criteria groups.

Once selected, the *Available* list will be updated to include the system data associated with that option e.g. if *Department* is selected, the panel will display a list of all *Departments* on the system.

8. Use the search box if required to search the desired item e.g. *Recruitment*.
9. Click on the item to highlight it and drag & drop this to the *Assigned* list.
10. Add as many items from the *Available* list as required.
11. Click on the **Save** button to create the group. The group will now appear in summary on the *Group Creator* screen.
 - It is possible to add further sets of users to the same group by selecting the **Add** button and repeating the steps outline above.
 - The  button provides the ability to edit the group criteria (returning to the *Group Creator* screen) or delete the group criteria.

12. Click on the **Save** button to complete the creation of that group and return to the *Criteria Group* screen.
13. On the *Criteria Group* screen, ensure the **Activate** indicator is enabled for each group as required.
 - The  button provides the ability to edit the group (returning to the Group Creator screen), delete the group or copy the group (i.e. so that this can be quickly created and edited as a means of creating a similar grouping).

Criteria Group

People Management > HR Admin Setup Settings > Salary Approval Process Assignment > Salary Approval General > Criteria Group

Select a group to assign

Enter search text...

3.3.2. Exclude Employee Groups to Salary Approval Workflow

It is possible to define a group of employees to be excluded from the Salary Approval process. If exclusions are defined, any salary records created for those employees will be automatically set to *Approved* and will be available to Payroll to process. To define Salary Approval exclusions:

Click the Exclude button.

The Exclude screen opens:

This screen will default to show a list of all employees that are currently excluded from the Salary Approvals process.

The search option at the top of the screen provides the ability to perform a keyword search for existing exclusions based on the employee's forename and/or surname only.

The screenshot shows the 'Salary Approval Process Assignment' interface. At the top, there is a blue header with a back arrow and the title 'Salary Approval Process Assignment'. Below the header, the page is titled 'Exclude'. A breadcrumb trail reads: 'People Management > HR Admin Setup Settings > Salary Approval Process Assignment > Exclude'. A blue button labeled 'ASSIGN CRITERIA GROUPS' is in the top right corner. Below the breadcrumb, there is a search bar with the placeholder text 'Search' and a magnifying glass icon. A table lists eight employees with their details. At the bottom right of the table, it says '1 - 8 of 9' with left and right arrow icons. The 'oorehr' logo is at the bottom center.

Employee ID	Employee Name	Job Title	Group
000055	Calvin Hughes	Chief Technology Officer	Senior Management
000072	Ella Smith	Ceo	Ceo
000073	Ella Smith	Ceo	Ceo
000128	Eoghan Hartley	Hr Director	Senior Management
000016	Jane Kelly	Chief Financial Officer	Senior Management
000014	Jason Smith	Ceo	Ceo
000050	Lorna Harrington	Chief Financial Officer	Senior Management
000015	Mary Murphy	Chief Technology Officer	Senior Management

Click on the Assign button and select Criteria Group.

Note: Groups are assigned to the exclusions using the exact same steps covered for the creation of groups to be assigned to a process [3.3.1 Assign Employee Groups to Salary Approval Workflow](#). Please refer to that section for detailed guidance on creating groups.

3.4. User Access

3.4.1. Salary Approver Menu Access

The following menu options are required for a *salary approver* to access the 'Salary Approvals' functionality on CorePortal.

System	Menu Option	Description
People Management	Salary Approval	This makes the <i>Salary Approvals</i> option available to the user on the <i>Command Centre</i> widget, so that they may access Salary Approvals.

3.4.2. Administrator Configuration Menu Options

The following menu options are required for a system administrator to access the screens required to support the configuration of Salary Approvals' functionality on CorePortal.

System	Menu Option	Description
People Management	Salary Approval Process Assignment	This makes the <i>Salary Approval Process Assignment</i> option available to the user on the <i>Settings</i> widget. Once the user has access to see that option, they have full access to all functionality available on the corresponding screen.
People Management	Access to the <i>Advanced System Parameters</i> screen with access to view and edit settings	Access to the <i>Advanced System Parameters</i> screen with access to view and edit settings
People Management	Access to the <i>Maintain Organisational Roles</i> screen with access to view, edit, add and delete records	Access to the <i>Maintain Organisational Roles</i> screen with access to view, edit, add and delete records

System	Menu Option	Description
People Management	Access to the <i>Maintain Organisational Roles by Person</i> screen with access to view, edit, add and delete records	Access to the <i>Maintain Organisational Roles by Person</i> screen with access to view, edit, add and delete records

The following menu options are required for an *administrator* to access **back-office screens** required to configure the salary approvals workflow.

Installed System = "CoreHR"

Menu Option	Description
Event Management Menu - Hr Process Configuration	Access to the <i>HR Process Configuration</i> screen with full access to all functionality available within.

4. Upgrade Considerations

4.1. Standard Salary Approvals

4.1.1. Existing Configuration

The CorePortal based Salary Approval process is an extension of the existing salary approval functionality on the back-office application.

Therefore, the configuration that an organisation may already have in place will still be valid including:

- [Parameters](#)
- [Organisational Roles Types](#)
- [Organisational Role Assignments](#)

The user will need to be granted access to the required menu options to view the **Salary Approvals** button at the *Command Centre* widget (see [2.4.1 Salary Approver Menu Access](#)).

The screenshot displays the 'People Management' interface. On the left is a sidebar with a user profile for 'Bart Ooms' and a menu including 'Dashboard', 'Employees', 'Settings', and 'Data Centre'. The main area features a 'Command Centre' widget with a 'NEW STARTER' button. This widget contains two columns of data:

Category	Count	Action
Employees	113 Currently Active Employees	VIEW
Transfers	1 Transfers Pending	VIEW
Applicants	7 Applicants	VIEW
Salary Approvals	0 Salaries Pending	VIEW
Onboarding	113 Pending	VIEW
Starters	0 Starters Pending	VIEW
Leavers	0 Leavers Pending	VIEW
Probation	0 Probations Pending	VIEW

The 'Salary Approvals' row is highlighted with a red rectangle. Below the Command Centre is an 'Onboarding Admin Widget' with an 'ACTIONS' button. It contains a table of checklists:

Checklist Name	Created By	Created Date	Assigned
Default Checklist		over 1 year ago	120 Employees
IT Staff Checklist	Alice Jones	06-Sep-2017	0 Employees

4.1.2. 'SLUSER' Contact Type

A user cannot be both a back office AND portal salary approver.

An employee's record should not be configured to approve salaries in both CorePortal and the back office, as this is not supported on CorePortal.

An organisation must decide if the employee will approve salaries in either the back office OR CorePortal. The employee's record may then be configured accordingly to use the required option.

Note: If a CorePortal user's account has the contact type of SLUSER specified within their employee record then they will not see approvals in People Management.

To summarise:

- If approving salaries via CorePortal, the user does not require the 'SLUSER' contact type.
- If approving salaries via CorePersonnel back office application, the user will require the *SLUSER* contact type.
