1. Overview

The purpose of this document is to provide guidance on how to configure CoreHR to support the salary increment process.

Please refer to the ***Salary Increments User Guide*** for full details on how this feature is used on CoreHR.

2. How to Configure

2.1. System Parameters

To access the increment parameters:

1. Quick jump to the *Data Centre* tab and **Open** *HR Admin Setup Settings*.
2. Search for *System Parameters - Advanced* and click on the corresponding option to open the screen.

The key parameters are highlighted in the screenshot below:

Advanced System Parameters

Salary/Increment Parameters

Use HR Salary Approval Process ☒	Use Workflow for the Salary Approval Process ☐
Use HR Controlled Increment Process ☒	Default Pay Scale Personal Rate
Allow Overseas Salaries ☐	Default Rounding Code Round Up To Nearest 25 Pence
Override Pay Group Auto Increment ☒	Record Additional Hourly Rate ☐
Amendment Reason Required ☒	Amendment Comments Required ☒
Calculate Pay Multiplier ☐	Use HR Salary Amendment On Employee Set-Up ☐
Synchronisation of Joiner and Rejoiner Process ☒	Bypass Salary Increment Approvals ☒
Use Increment Workflow Approval Process ☐	HR Increment Approval Questionnaire [Dropdown]
Increment Days 1	Default Currency Code [Dropdown]
HR Salary Approval Type Company	Payroll Salary Approval Type Pay Group
Replacement Group [Dropdown]	

2.1.1. Use HR Controlled Increment Process

This parameter must be enabled to ensure that the increment process is active on CoreHR.

- If enabled, the daily increment process will run.
- If disabled, the daily increment process will not run.

2.1.2. Increment Days

This is used to define the number of days forward that the daily increment process will look for *Increment Due Dates* on salary records. i.e. if this is set to 30 days, the system will look for any *Increment Due Dates* that fall in the next 30 days and process the required salary amendment.

2.1.3. Bypass Salary Increment Approvals

This option controls whether salary amendments that are created by the increment process are required to be approved by the defined *Salary Approval* process.

- If enabled, all salary amendments that are created via the increment process will be automatically *Approved*. They will not require any *Salary Approval* on CoreHR and will be immediately available to Payroll to process.
- If disabled, salary amendments that are created via the increment process will subject to the standard *Salary Approval* process that is configured on CoreHR i.e.
 - If **Use HR Salary Approval** is enabled (standard Salary Approvals option).
 - If **Use Workflow for the Salary Approval** process is enabled (i.e. the workflow-based Salary Approval option).

The screenshot displays the 'Advanced System Parameters' configuration interface. Within this interface, the 'Salary/Increment Parameters' section is highlighted. It contains four configuration items:

- Use HR Salary Approval Process:** A toggle switch that is currently turned on (green).
- Use Workflow for the Salary Approval Process:** A toggle switch that is currently turned off (grey).
- Use HR Controlled Increment Process:** A toggle switch that is currently turned on (green).
- Default Pay Scale:** A dropdown menu currently showing 'Personal Rate'.

Please refer to the **Salary Approvals** user guide for further details on how this feature is used on CoreHR.

2.1.4. Not Applicable

The following increment related parameters on this screen are not recommended to be enabled and do not support the standard increment process as covered in the CoreHR user guides.

- Use Increment Workflow Approval Process
- HR Increment Approval Questionnaire

Advanced System Parameters

Salary/Increment Parameters

Use HR Salary Approval Process ☒	Use Workflow for the Salary Approval Process ☐
Use HR Controlled Increment Process ☒	Default Pay Scale Personal Rate
Allow Overseas Salaries ☐	Default Rounding Code Round Up To Nearest 25 Pence
Override Pay Group Auto Increment ☒	Record Additional Hourly Rate ☐
Amendment Reason Required ☒	Amendment Comments Required ☒
Calculate Pay Multiplier ☐	Use HR Salary Amendment On Employee Set-Up ☐
Synchronisation of Joiner and Rejoiner Process ☒	Bypass Salary Increment Approvals ☒
Use Increment Workflow Approval Process ☐	HR Increment Approval Questionnaire [Dropdown Menu]
Increment Days 1	Default Currency Code [Dropdown Menu]
HR Salary Approval Type [Dropdown Menu]	Payroll Salary Approval Type [Dropdown Menu]

2.2. User Access

2.2.1. View Increment History

The following Menu Option is required to access the *Increment History* tab on the *Current Salary* screen:

System	Menu Option
People Management	Increment History View

The screenshot displays the 'Current Salary' screen for a user named 'Shop Assistant'. The user's status is 'Active' and their start date is '17-Jul-2016'. The 'Payroll Status' is 'Closed for Processing'. The 'Increment History' tab is highlighted with a red box. The 'Next Increment' section shows an 'Increment Due Date' of '01-Jul-2019' and an 'On Hold' toggle switch. The 'Increment History' section is visible below. A blue 'ADD' button is at the bottom right.

2.2.2. Amend Increment Details

The following Menu Option is required to update increment details on the **Increment History** tab on the *Current Salary* screen:

System	Menu Option
People Management	Increment History Edit

This option controls the following elements on the screen:

- **Place Increment On Hold** indicator will be editable.
- *Increment Due Date* will be editable.
- *Comments* will be editable.
- **Save Changes** button will be visible.
- **Delete** button for future Increment Due Date records.

The screenshot shows the 'Salary Increment Configuration' page for a 'Shop Assistant'. The interface includes a sidebar with navigation options: Manager, Current Salary (selected), Pension Contributions, Deductions, Cost Allocations, User Defined Data, and Files. The main content area has three tabs: Current Salary, Allowances, and Increment History. The 'Increment History' tab is active, showing a 'Next Increment' section with a table for 'Increment Due Date' and 'Comments'. Below this is an 'Increment History' table with columns for 'Increment Due Date', 'Comments', 'Date / Time Created', and 'Created By'. A red box highlights the 'Next Increment' section, and a red arrow points to the 'DELETE' button for the entry dated 01-Jul-2018.

Increment Due Date	Comments	Date / Time Created	Created By
01-Jul-2019			
01-Jul-2018		30-Jun-2018 03:00	COREHR
01-Jul-2018		06-Jan-2018 02:00	COREHR

2.3. Increment Process Job

The name of the daily database job that processes the increments is **"RUN_HR_RUN_INCREMENTS"**.

- This is available by default in CoreHR and is set to run every day at 3am.
- This will only run once a day.
