1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide detailed guidance on how to use the User Defined Data functionality on CoreHR.

Guidance is provided on:

- How to add a UDF to an employee record.
- The difference between person and contract UDFs on the employee's record.
- Updating a UDF.
- Deleting a UDF.

Please refer to the **Configuring UDFs** user guide for detailed guidance on how the UDF Types are configured on PeopleXD.

1.2. What is User Defined Data?

User Defined Fields (UDFs) are used to hold data on PeopleXD where the system doesn't provide this as standard. These would typically be items that are specific to an individual organisation and will differ from company to company.

For example, a company may wish to store a record of standard company equipment that has been given to an employee. This can be captured in a UDF that is configured to display the exact equipment list specific to that company.

From the hr administrator's, employee's and manager's perspective, adding this data to the employee's record is a relatively straightforward task i.e. they will select from a list of UDF Types (i.e. the screens that have been configured for this organisation), update the data and save.

To access the *User Defined Data* screen:

- Any UDFs currently recorded for the employee are displayed on screen.

If no UDF records have been created for the employee / the selected contract or you don't have access to UDFs that have been created, the screen will appear as below:

NOTHING TO SEE HERE
EXCEPT THIS FLAG

Note:

- It is possible that additional configuration has been applied to UDFs to control access via UDF Assignment Groups. If so, you must be in the required group to see / add specific UDF Types here.
- If the UDF Type has been flagged as *Security Required*, you will need to be granted access to it.

2.2. Searching for UDFs

To search for a UDF:

1. Use the search box to complete a keyword search based on the UDF name.
2. Select another contract from the drop-down list at the top of the screen, to view UDFs related to another contract.

ADD

2.3. Add a User Defined Object

2.3.1. Create a New UDF for an Employee

To add a new UDF to an employee's record:

1. On the *User Defined Data* screen, click **Add**.

The screenshot shows the employee record for Charles Green (000103). The 'User Defined Data' section is highlighted in the left sidebar. In the main content area, there is a search bar for 'Search UDFs' and a table with columns: Name, Appointment, From Date, and To Date. The table is currently empty, displaying 'NOTHING TO SEE HERE'. A red arrow points to a blue 'ADD' button located to the right of the search bar.

The *Add UDF* screen opens.

2. Select a *UDF Type* from the drop-down list.

The screenshot shows the 'Add UDF' screen. The breadcrumb trail is 'People Management > Employee Search > Charles Green (000103) > Add UDF'. A dropdown menu for 'UDF Type *' is open, showing a list of options: Certificate Of Sponsorship Person, Company Equipment Person, DBS Checks Contract, Mandatory Checks Contract, and Maternity And Paternity Form (Smp, Os... Person). The dropdown is highlighted with a red rectangle.

The list of UDF Types includes:

- All 'employee' and 'contract' level UDFs that have been configured on CoreHR.
- If a UDF type has the *Security Required* indicator enabled, the UDF will only appear here if you have been granted access to it. If assignment groups are applied, you will need to be in the required group.

Once a *UDF Type* is selected, the screen updates to display all of the fields that have been defined for it:

- The input type of the fields will depend on the configuration for the UDF Type.
- Certain fields may be mandatory, if that has been configured for the UDF Type.

Add UDF

People Management > Employee Search > Charles Green (000103) > Add UDF

UDF Type*
Company Equipment

This UDF is not related to any specific appointment.

2.3.2. Person UDFs

UDFs that are created at 'person' level will be labelled as such when selecting the UDF Type i.e.

The screenshot shows the 'Add UDF' form in the system. The breadcrumb trail is 'People Management > Employee Search > Charles Green (000103) > Add UDF'. The 'UDF Type *' dropdown menu is open, displaying a list of options: 'Certificate Of Sponsorship', 'Person', 'Company Equipment', 'Person', 'DBS Checks', and 'Contract'. A red arrow points to the 'Person' option listed under 'Company Equipment'.

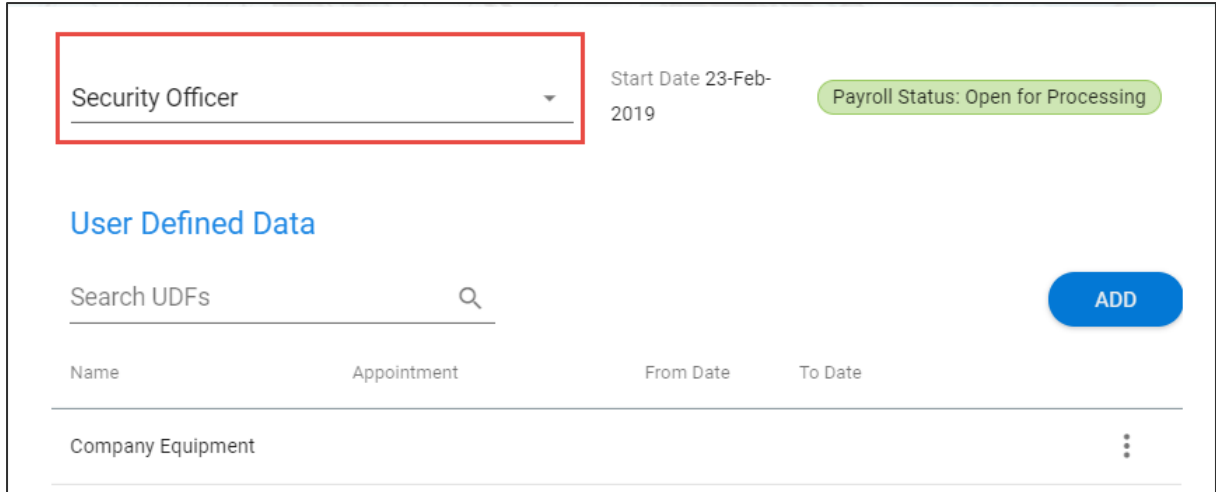

This information is not linked to any contract record for the employee. It is associated directly with their employee record. That will also be made clear, once the UDF Type has been selected:

The screenshot shows the 'Add UDF' form with 'Company Equipment' selected in the 'UDF Type *' dropdown. A red box highlights the message: 'This UDF is not related to any specific appointment.' Below the dropdown, there are input fields for 'Company Laptop', 'Company Phone', and 'Comments'.

2.3.3. Contract UDFs

When adding a 'contract' UDF, the first step is to ensure that the required contract is selected on the employee record, before adding the UDF i.e.:

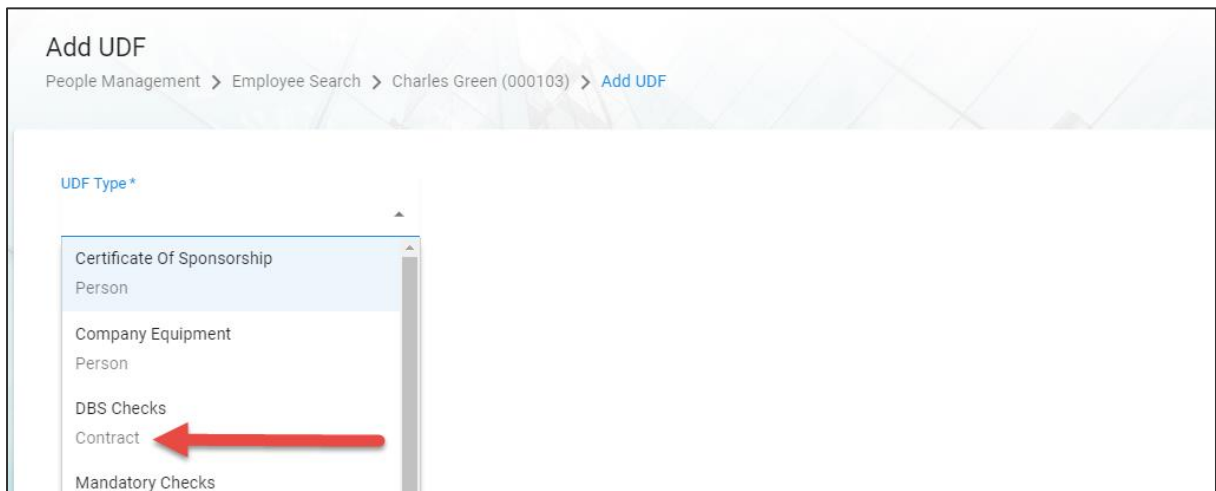

Security Officer ▼ Start Date 23-Feb-2019 Payroll Status: Open for Processing

User Defined Data

Search UDFs 🔍 [ADD](#)

Name	Appointment	From Date	To Date
Company Equipment			

UDFs that are created at 'Contract' level will be labelled as such when selecting the UDF Type i.e.

Add UDF

People Management > Employee Search > Charles Green (000103) > [Add UDF](#)

UDF Type *

- Certificate Of Sponsorship
- Company Equipment
- DBS Checks
- Contract
- Mandatory Checks

Once selected, the contract and contract status will appear on screen, beneath the UDF Type:

User Defined Data

Search UDFs

ADD

Name	Appointment	From Date	To Date
Company Equipment			
Dbs Checks	Security Officer		

If a different contract is selected at the top of the screen, the UDF will not display as it is not associated with that contract:

The screenshot shows the 'User Defined Data' interface for a 'Support Analyst'. At the top, there is a dropdown menu for the user name, 'Support Analyst', which is highlighted with a red box. To the right of the dropdown, the 'Start Date' is '01-Dec-2017' and the 'End Date' is '15-Dec-2017'. Further right, a green pill-shaped button indicates the 'Payroll Status: Open for Processing'. Below this, the title 'User Defined Data' is displayed. A search bar labeled 'Search UDFs' with a magnifying glass icon is present, followed by a blue 'ADD' button. A table with columns 'Name', 'Appointment', 'From Date', and 'To Date' is shown. The first row contains 'Company Equipment' and a vertical ellipsis menu icon.

2.4. Edit an Existing User Defined Object

To edit / update an existing User Defined Object:

1. On the *User Defined Data* screen, search for the required record.
2. Click on the  button and select **View / Edit** to view all the details recorded:

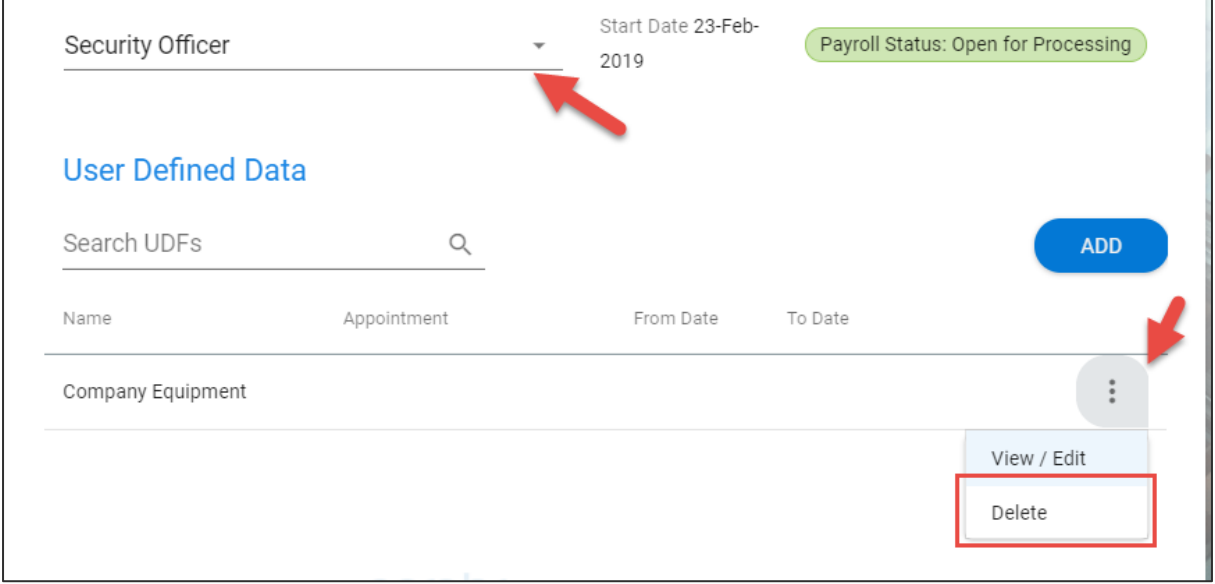

The screenshot shows the 'Company Equipment' edit screen. The breadcrumb trail at the top reads: 'People Management > Employee Search > Charles Green (000103) > Company Equipment'. The form contains several fields: 'Appointment' with a value of 'Security Officer' and a green 'Started' button; 'Company Laptop' with a dropdown menu set to 'Yes'; 'Company Phone' with a dropdown menu set to 'No'; and 'Comments' with the text 'Employee phone not required as he is...'. There is also a 'Return Date' field with a calendar icon. At the bottom right, there is a green 'SAVE' button. The 'corehr' logo is visible at the bottom center.

3. Update the data as required.
4. Click **Save** to save the changes.

2.5. Delete a User Defined Object

To delete an existing User Defined Object:

1. On the *User Defined Data* screen, search for the required record.
2. Click on the  button and select **Delete**.

The screenshot shows the 'User Defined Data' interface. At the top, there's a header with 'Security Officer' and a dropdown arrow, 'Start Date 23-Feb-2019', and a green status badge 'Payroll Status: Open for Processing'. Below this is a search bar labeled 'Search UDFs' with a magnifying glass icon and a blue 'ADD' button. A table with columns 'Name', 'Appointment', 'From Date', and 'To Date' contains one row: 'Company Equipment'. To the right of this row is a grey circular menu icon with three dots. A red arrow points to this icon, and another red arrow points to the 'Delete' button in the dropdown menu that appears. The 'Delete' button is highlighted with a red rectangular box.

3. Click **Delete** to delete the record.
4. Click **Yes** on the confirmation message. The record is deleted.
