1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide detailed guidance on the 'Wage Warnings' feature on PeopleXD, including:

- Where the wage warning validation is applied.
- How the warning validation is calculated.
- How to configure 'Minimum Wage', 'Living Wage' & 'Apprentice Wage' rates on PeopleXD (pertax year).
- Additional configuration required to enable the validation for 'Minimum Wage' / 'Living Wage' / 'Apprentice Wage' rates on PeopleXD.

1.2. How do the Wage Warnings Work?

1.2.1. What are Wage Warnings?

PeopleXD provides an option to validate the rate entered for an employee's salary, against minimum, living and / or apprentice wage rates. This is to inform the user if the salary they are providing for the *employee's contract* is too low.

Rates for minimum wage, living wages and apprentice wages can be setup on PeopleXD (see [2. Configuring the Rates](#)). These can be added to on an annual basis, as new rates are released for each new tax year.

PeopleXD will calculate if the salary supplied for an employee's contract meets the minimum / living / apprentice wage rates based on:

- The rates defined on PeopleXD and their effective date.
- The employee's date of birth.
- Contracted hours and weeks (or FTE Weeks per Year).

- For apprentice rates, validation is applied to confirm that the employee / contract is apprentice.
- Where multiple countries are setup, the appropriate rates for the employee's Pay Group/country.

Minimum wage & apprentice rates are not mutually exclusive. The system will first check to see if the employee's contract is an apprentice type contract.

- **If it is** - apprentice rates are used in validation.
- **If it isn't** - minimum wage rates are used in validation

1.2.2. Where is Wage Warning Validation Available?

The wage warnings are displayed on the following screens:

- New Hire / Rehire wizard (Step 4 – Salary)

In order for the system to validate the minimum rate that the employee should be awarded for a contract, the following details must be supplied:

- Date of Birth (determines age)
- Contracted Hours / Contracted Weeks
 - Used to derive hourly rate if an annual salary provided.
 - If Contracted Weeks is blank, [FTE Weeks per Year](#) is used instead.

If wage warnings are active on PeopleXD, but any of the 3 elements above have not been supplied for the employee & contract, then the following warning messages will display:

- *"Minimum wage validation will not work without: Date of Birth, Contracted Hours"*
- *"Living wage validation will not work without: Date of Birth, Contracted Hours"*

People Management: Wage Warnings – Configuration Guide

The screenshot shows the 'New Starter' configuration form. On the left is a sidebar with four steps: 1. Person Information, 2. Organizational Structure, 3. Contract Information, and 4. Salary Information. The main area contains several fields: 'Starter Declaration' (dropdown), 'PPS Number' (text), 'Paygroup employee will be paid' (dropdown), 'Employee to be paid based on' (dropdown, set to 'Scale-Point'), 'Scale' (dropdown, set to 'Grade 3'), 'Point on Scale' (dropdown, set to 'Point 1'), and 'Multiplier' (text, set to '1'). Below these are 'This to be paid' (dropdown, set to 'Annual') and 'Amount to be paid' (text, set to '52000'). There is also a date field for 'Apply next increment on'. At the bottom, there are two orange warning banners: 'Minimum wage validation will not work without: Date of Birth, Contracted Hours. Check employees Flex Benefits also.' and 'Living wage validation will not work without: Date of Birth, Contracted Hours. Check employees Flex Benefits also.'

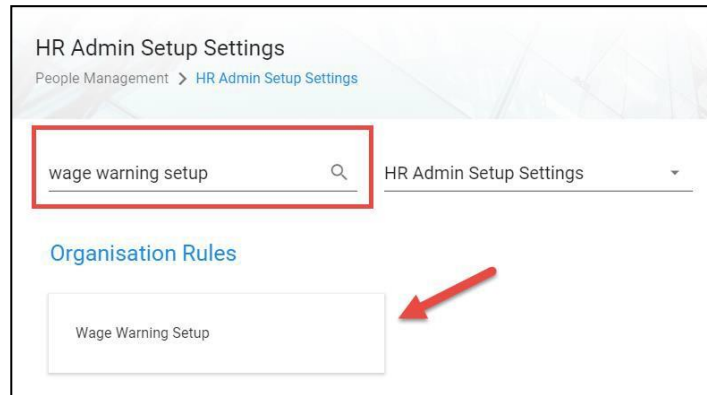

See [3. How is Validation Applied?](#) for full details on all of the variable factors that determine whether a wage warning message is supplied.

2. Configuring the Rates

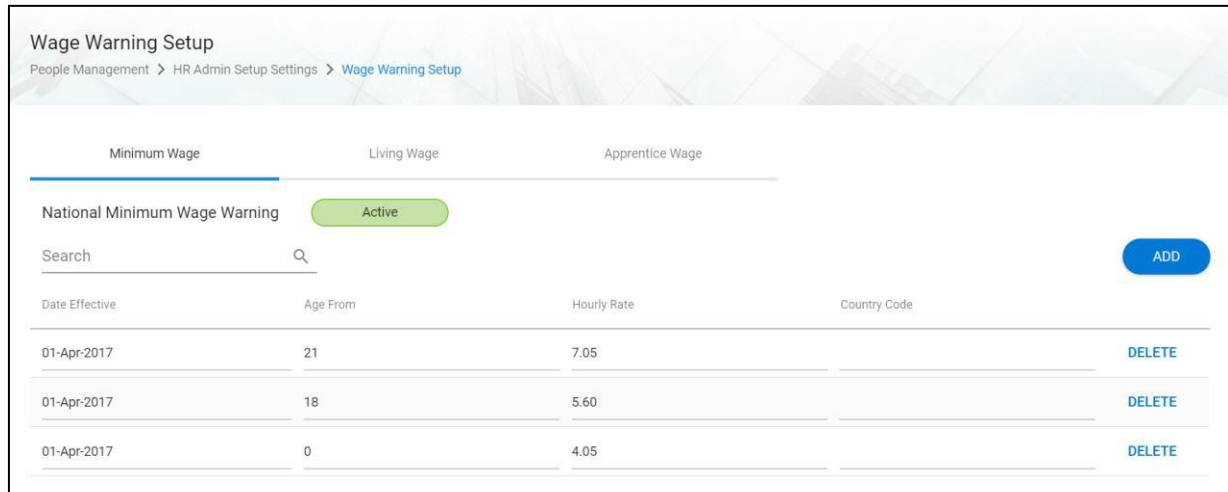

2.1. Where to Access Wage Warning Setup

To access the *Wage Warning Setup* feature:

1. Quick jump to *Data Centre* widget in *People Management*.
2. Open *HR Admin Setup Settings* and search for “Wage warning setup”.

The *Wage Warning Setup* screen opens.

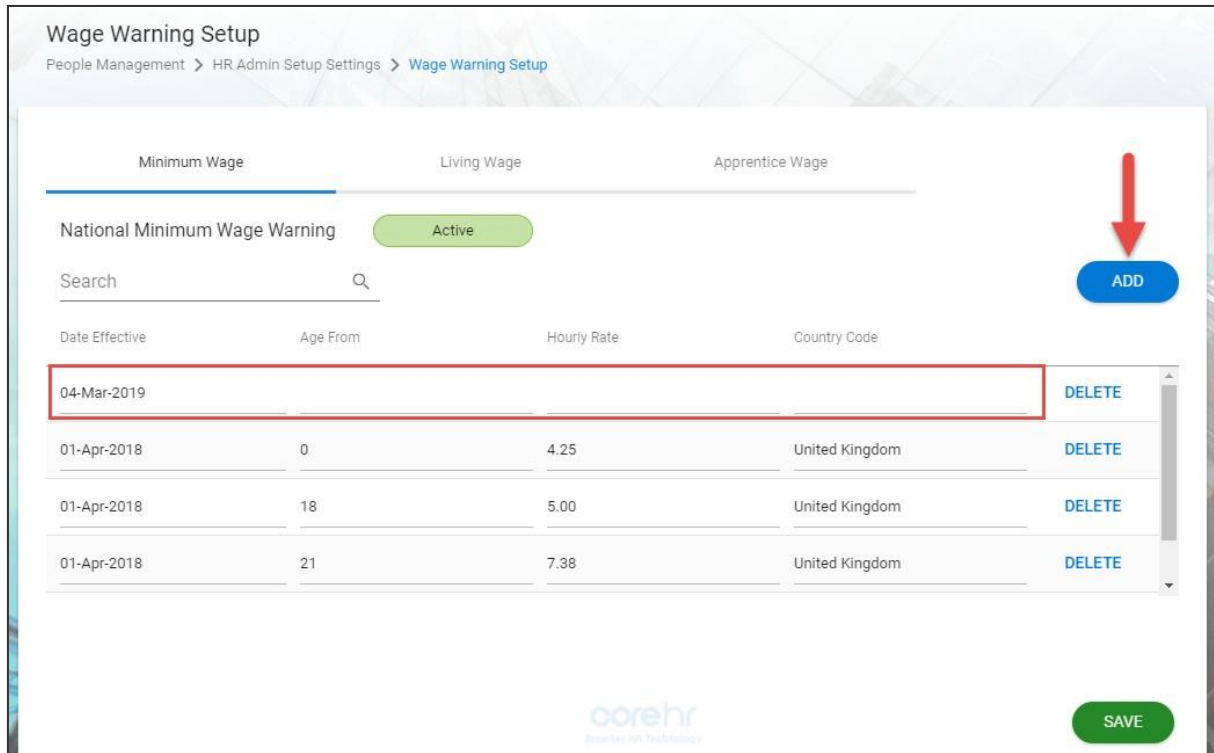

2.2. Minimum Wage

2.2.1. Add a Minimum Wage Rate

To add a new rate for Minimum Wage:

1. On the *Wage Setup* screen, ensure that the **Minimum Wage** tab is selected.
2. Click the **Add** button to add a new row to the grid below.
3. In the new row, update the following details:
 - **Date Effective:** This is the date that the rate rule will be effective from.
 - **Age From:** The age that the rate applies to.
 - **Hourly Rate:** The minimum hourly rate for that age.
 - **Country Code:** Select the country that this rate is for.

The screenshot shows the 'Wage Warning Setup' interface. At the top, there are three tabs: 'Minimum Wage', 'Living Wage', and 'Apprentice Wage'. The 'Minimum Wage' tab is selected. Below the tabs, there is a section for 'National Minimum Wage Warning' with an 'Active' status button. A search bar is present. To the right, there is a blue 'ADD' button with a red arrow pointing to it. Below this is a table with columns: 'Date Effective', 'Age From', 'Hourly Rate', 'Country Code', and a 'DELETE' button for each row. The first row in the table is highlighted with a red border and contains the date '04-Mar-2019'. The other rows show dates from April 2018, ages 0, 18, and 21, and a rate of 4.25, 5.00, and 7.38 respectively, all for the 'United Kingdom'.

Date Effective	Age From	Hourly Rate	Country Code	DELETE
04-Mar-2019				DELETE
01-Apr-2018	0	4.25	United Kingdom	DELETE
01-Apr-2018	18	5.00	United Kingdom	DELETE
01-Apr-2018	21	7.38	United Kingdom	DELETE

At the bottom right, there is a green 'SAVE' button.

4. The **Save** button will appear once the first row is entered.

5. Continue to add all rates as required, by clicking the **Add** button to add new rows.
6. Click the **Save** button to save the rates.

The screen only requires an *Age From* to be input for the chosen rate, rather than an age range band. Where these rates may be published for an age range, please see an example on the next page of how these would be configured on this screen on PeopleXD.

2.2.2. Sample Rates:

Date Effective	Age	Rate
1 st April 2018	25 & over	£7.83
1 st April 2018	21 to 24	£7.38
1 st April 2018	18 to 20	£5.90
1 st April 2018	Under 18	£4.20

2.2.3. Activate the Minimum Wage Warning

The **Inactive** status will appear on screen if the Minimum Wage Warning parameter hasn't been enabled. The status must be **Active** in order for the system to apply the wage warning.

See [3.1 Parameter to Switch On Wage Warning](#) for the parameter details.

The screenshot shows the 'Wage Warning Setup' page. At the top, there's a breadcrumb trail: 'People Management > HR Admin Setup Settings > Wage Warning Setup'. Below this, there are three tabs: 'Minimum Wage', 'Living Wage', and 'Apprentice Wage'. The 'Minimum Wage' tab is selected. Under this tab, there's a section for 'National Minimum Wage Warning' with a green 'Active' button highlighted by a red rectangle. Below this is a search bar with a magnifying glass icon. At the bottom, there are three columns: 'Date Effective', 'Age From', and 'Hourly Rate'.

2.2.4. Edit a Minimum Wage Rate

To edit an existing rate rule:

1. Click into any row and update the data as required.

Wage Warning Setup
People Management > HR Admin Setup Settings > Wage Warning Setup

Minimum Wage | Living Wage | Apprentice Wage

National Minimum Wage Warning: **Active**

Search

Date Effective	Age From	Hourly Rate	Country Code	
01-Apr-2018	0	4.20	United Kingdom	DELETE
01-Apr-2018	18	5.00	United Kingdom	DELETE
01-Apr-2018	21	7.38	United Kingdom	DELETE
01-Apr-2018	25	7.83	United Kingdom	DELETE

The row will be automatically updated.

2. Click the **Save** button to save changes.

Note: Changes to the rates here will not have an impact on existing employee records. This will only ensure that the wage warning message appears as per the updated data for new salary records / salary amendments.

2.2.5. Delete a Minimum Wage Rate

To delete an existing rate rule:

1. Click the **Delete** button at the relevant row of rates.
2. A confirmation prompt will pop-up. Click **Yes**.

2.3.3. Activate the Living Wage Warning

The **Inactive** status will appear on screen if the Living Wage Warning parameter hasn't been enabled. The status must be **Active** in order for the system to apply the wage warning.

See [3.1 Parameter to Switch On Wage Warning](#) for the parameter details.

The screenshot shows the 'Wage Warning Setup' interface. At the top, there are three tabs: 'Minimum Wage', 'Living Wage' (which is selected and highlighted with a blue bar), and 'Apprentice Wage'. Below the tabs, there is a section for 'National Living Wage Warning' with a green 'Active' button highlighted by a red rectangle. Below this is a search bar with a magnifying glass icon. At the bottom, there is a table with three columns: 'Date Effective', 'Age From', and 'Hourly Rate'. The table contains one row with the values '01-Apr-2017', '25', and '7.50'.

Date Effective	Age From	Hourly Rate
01-Apr-2017	25	7.50

2.3.4. Edit a Living Wage Rate

To edit an existing rate rule:

1. On the *Wage Warning Setup* screen, ensure that the **Living Wage** tab is selected.
2. Click into any row and update the data as required.
3. The row will be automatically updated.

The screenshot shows the 'Wage Warning Setup' page with the 'Living Wage' tab selected. A table lists wage rates for the United Kingdom, with the first row's 'Hourly Rate' (7.83) highlighted by a red box. A red arrow points to the 'SAVE' button at the bottom right.

Date Effective	Age From	Hourly Rate	Country Code	
01-Apr-2018	25	7.83	United Kingdom	DELETE
01-Apr-2018	21	7.38	United Kingdom	DELETE
01-Apr-2018	18	5.90	United Kingdom	DELETE
01-Apr-2018	0	4.20	United Kingdom	DELETE

- 4 Click the **Save** button to save changes.

Note: Changes to the rates here will not have an impact on existing employee records. This will only ensure that the wage warning message appears as per the updated data for new salary records

2.3.5. Delete a Living Wage Rate

To delete an existing rate rule:

1. On the *Wage Warning Setup* screen, ensure that the **Living Wage** tab is selected.
2. Click the **Delete** button at the relevant row of rates.

3. A confirmation screen will pop-up, click **Yes**.

4. Click the **Save** button to save changes.

2.4. Apprentice Wage

2.4.1. How to Identify 'Apprentice' Contracts

The *Apprentice Wage* screen includes two drop-down lists that are used to create a rule to identify if an employee is set up as an apprentice on PeopleXD.

1. The **Reference Type** list includes the following contract elements that may be used to indicate if an employee is an apprentice:
 - a. Job Title
 - b. Job Category
 - c. Employment Status
 - d. Employee Sub Status
 - e. Category

- f. Sub Category
 - g. Position i.e. (Pay Scale)
2. The **Reference** list will dynamically update to provide a list of the items for the selected reference type e.g. if Employment Status is selected, this will include a list of Employment Status values.

Wage Warning Setup

People Management > HR Admin Setup Settings > Wage Warning Setup

Search

Date Effective Age From Hourly Rate Country Code

ADD

3. Select the required Reference Item. Changes will be saved immediately.

Note:

Payroll does not use this reference setting to identify Apprentices for their payroll validation reports. This is only used for HR validation on the contract.

2.4.2. Add an Apprentice Rate

To add a new rate for an Apprentice Wage:

1. On the *Wage Setup* screen, ensure that the **Apprentice Wage** button is selected.
2. Click the **Add** button to add a new row to the grid. In the new row, update the following details:
 - **Date Effective:** This is the date that the rate rule will be effective from.
 - **Age From:** The age that the rate applies to.
 - **Hourly Rate:** The minimum hourly rate for that age.
 - **Country Code:** Select the country that this rate is for.

The screenshot shows the 'Wage Warning Setup' interface. At the top, there are three tabs: 'Minimum Wage', 'Living Wage', and 'Apprentice Wage'. The 'Apprentice Wage' tab is selected and highlighted with a blue line. Below the tabs, there is a section for 'National Apprentice Wage Warning' with a red 'Inactive' button. Underneath, there are two dropdown menus: 'Reference Type' and 'Employment Status', both set to 'Apprentice/Trainee'. A search bar is located below these dropdowns. On the right side, there is a blue 'ADD' button. At the bottom, there is a table with four columns: 'Date Effective', 'Age From', 'Hourly Rate', and 'Country Code'. The table is currently empty, and a small blue flag icon is visible at the bottom center of the table area.

3. The **Save** button will appear once the first row is entered.
4. Continue to add all rates as required, by clicking the Add button to add new rows.
5. Click the **Save** button to save the rates.

The screen only requires an *Age From* to be input for the chosen rate, rather than an age range band. Where these rates may be published for an age range, please see an example on the next page of how these would be configured on this screen on PeopleXD.

2.4.3. Sample Rates:

Date Effective	Age	Rate

3. How is Validation Applied?

3.1. Validation Steps

The same validation checks are made when a salary is awarded on any of [these screens](#):

- New hire / rehire wizards
- New Contract / Replace Contract wizards
- Salary Amendment screens
- Salary approval screen.

The system will first check if the following details have been supplied for the contract:

1. *Date of Birth* (Required to determine employee's age)
2. *Contracted Hours*
3. *Contracted Weeks*

If blank, the system will default to use the value in the FTE Weeks per Year parameter

If any of the above are not present on the contract, the following validation messages are triggered:

- *"Minimum wage validation will not work without: Date of Birth, Contracted Hours"*
- *"Living wage validation will not work without: Date of Birth, Contracted Hours"*

Note: These warning messages will only trigger if the corresponding Minimum / Living /Apprentice Wage Warnings have been flagged as active.

Salary details need to be input:

- **Pay Group** is required (to ensure that validation is made against the rates defined for that country)
- **Amount to be paid** is required

The system will check if this is an apprentice contract:

- If the employee's contract is a match for the [Reference Type configured](#) for Apprentice Rate, then the validation will use these rates.
- If the employee's contract is not a match for the Reference Type configured for Apprentice Rate, then the validation will use the Minimum Wage rates.

The system will then determine if the amount provided for the contract is valid.

- If an hourly rate has been provided, this is a straightforward check against the system rates.
- If a non-hourly rate has been provided, the system will use the contracted hours and contracted weeks / FTE weeks per year, to determine the hourly rate.

Using the hourly rate, the validation will compare this to the rates stored for Apprentice / Minimum Wage and Living Wage

- If the rate is too low, a warning message will appear

- If the rate is $\geq$ the min rates, no further message will appear.

The screenshot shows the 'Salary Information' step of the configuration process. A yellow warning banner states 'New Salary below living wage!' with a red arrow pointing to it. The form includes fields for 'Starter Declaration', 'NI Number', 'Paygroup employee will be paid based on', 'Employee to be paid based on' (Scale-Point), 'Scale' (Grade 5), 'Point on Scale' (Point 1), 'Multiplier' (1), 'This to be paid' (Annual), 'Amount to be paid' (0), and 'Apply next increment on'. A 'PREVIOUS' button and a 'SAVE' button are at the bottom right.

3.2. Point to Note

- Even if a warning message is displayed to let the user know the rate is too low, they can still proceed to save the salary. This is a warning message only.
- If different rates are held for each tax year, the validation will compare the salary using the rate that is active on the salary effective date.
- If no rates exist, no validation is applied
- If effective date for rates $>$ that salary effective date, no validation is applied
- If no Country is specified for the rates:
 - If rates are only required for one country, this is not an issue.

If rates are held for multiple countries, the Country must be specified so that the system will pick the correct rate held for that country.

4. Additional Configuration Required

4.1. Parameter to Switch On Wage Warnings

4.1.1. Living Wage Warning

The *Living Wage* rates entered will be inactive until the required parameter is enabled.

To enable living wage validation:

1. Quick jump to *Site Manager* widget in the *Administrator Dashboard*.
2. Open *Admin Settings* and search for the keyword = “**fb_living_wage_warn**”
3. Update the parameter:
 - **Y** = Living wage validation is enabled
 - **N** = Living wage validation is not enabled
4. Click **Ok** to save changes.

4.1.2. Minimum Wage Warning

The *Minimum Wage* rates entered will be inactive until the required parameter is enabled.

To enable minimum wage validation:

1. Quick jump to *Site Manager* widget in the *Administrator Dashboard*.
2. Open *Admin Settings* and search for the keyword = “**fb_min_wage_warn**”
3. Update the parameter:
 - **Y** = Min wage validation is enabled
 - **N** = Min wage validation is not enabled
4. Click **Save** to save changes.

4.1.3. Apprentice Wage Warning

The *Apprentice Wage* rates entered will be inactive until the required parameter is enabled.

To enable apprentice wage validation:

1. Quick jump to *Site Manager* widget in the *Administrator Dashboard*.
2. Open *Admin Settings* and search for the keyword = “**fb_apprentice_wage_warn**”
3. Update the parameter:
 - **Y** = Apprentice wage validation is enabled
 - **N** = Apprentice wage validation is not enabled
4. Click **Save** to save changes.

4.2. Menu Option

The following menu option is required to see the *Wage Warning Setup* option on the *Data Centre* > *HRAdmin Setup Settings* screen.

Once that option is enabled for a user’s Menu Profile, they will have access to all of the functionality available on the screen.

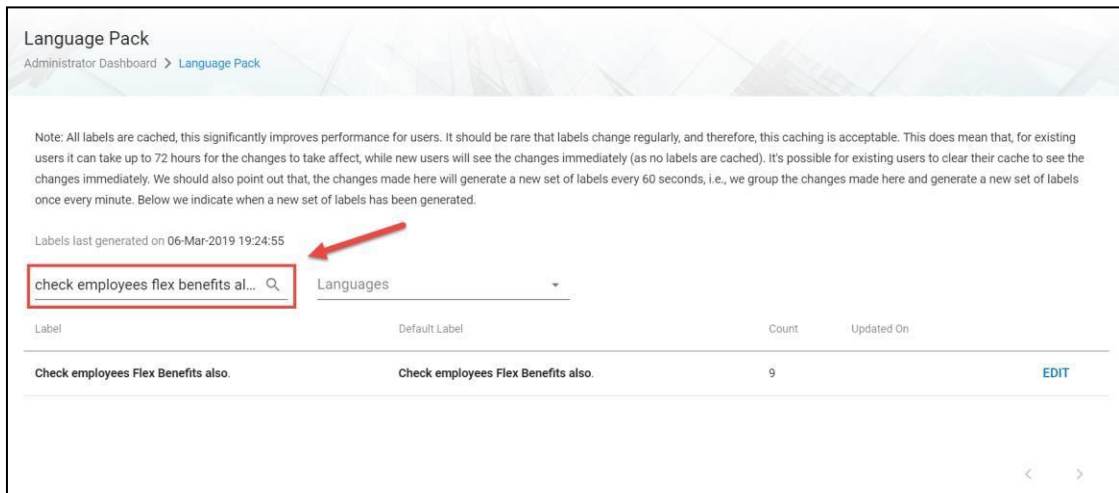

System	Menu Option
People Management	Wage Warning Setup

4.3. Warning Message Text

The text of the validation and warning message is language packed.

To update the text for these messages:

1. Quick jump to *Site Manager* widget in the *Administrator Dashboard*.
2. Open *Language Pack*.
3. Search for the error message listed below and update.
4. Changes will save immediately on existing the *Phrase Text* field.

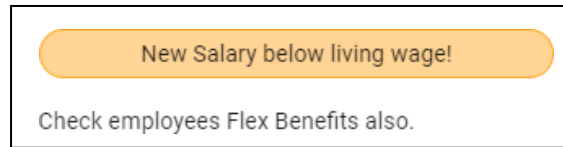

4.3.1. Wage Warning

Label:

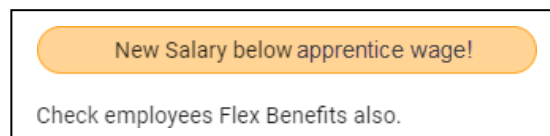

- New Salary below minimum wage
- Check employees Flex Benefits also.

- New Salary below living wage
- Check employees Flex Benefits also.

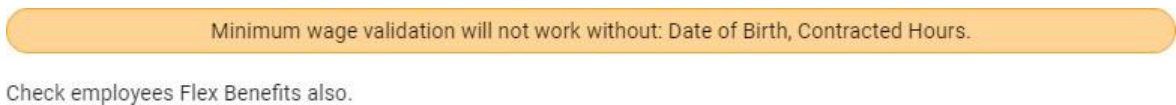

- New Salary below apprentice wage!
- Check employees Flex Benefits also.

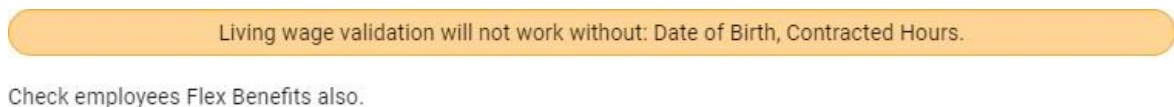

4.3.2. **Validation Warning**

Label:

- Minimum wage validation will not work without:
- Date of Birth, Contracted Hours, Contracted Weeks.

- Living wage validation will not work without:
- Date of Birth, Contracted Hours, Contracted Weeks

4.4. FTE Weeks per Year

If the *Contracted Weeks* have not been supplied on the employee's contract, the system will use the *FTE Weeks per Year* parameter in the calculation.

To view / update this parameter:

1. Quick Jump to Data Centre in People Management and click **Open** at HR Admin Setup Settings.
2. Search for "System Parameters" and select the corresponding option.
3. Update **FTE Weeks per Year**, if required.

The screenshot shows the 'System Parameters' configuration page. Under the 'Personnel' section, various settings are displayed in a grid. The 'FTE Weeks per Year' field is highlighted with a red rectangular box. The value '52.1400' is entered in this field. Other visible fields include 'Default Generate Personnel No Routine' (set to 'Default Manual'), 'Service Break Days' (10), 'Service Days' (5), 'Highest Personnel No Prefix' (empty), 'Default Gender' (Choose), 'Document Drive' (empty), 'Default Retirement Age' (65), 'Default System Start Date' (empty), 'Enable Post Hierarchy' (checked), 'Default Pay Method' (Bacs), 'Modification Reason Required' (checked), 'Activate HR Project Code' (checked), 'Action Required' (unchecked), and 'Activate Absence Mgt FTE' (unchecked). A 'Document Directory' label is at the bottom left.

4. Click **Save**
