1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on the candidate anonymisation and CV parsing functionality in PeopleXD Recruitment. This includes:

- How to configure this functionality
- What data can be anonymised
- Where data is anonymised
- Viewing parsed CVs

1.2. What is Candidate Anonymisation?

Candidate anonymisation allows you to hide personal information about a candidate for specific stages of the recruitment process. For example, the candidate's name, address information, and contact details can be hidden.

1.3. What is CV Parsing?

When enabled, CVs are parsed when they are submitted by a candidate, or when a user manually adds a CV to an existing candidate record.

The following information is then available in PeopleXD:

- Candidate Summary (Supplied by the candidate on their CV or derived by the Parsing process)
- Employment History
- Education History
- Skills

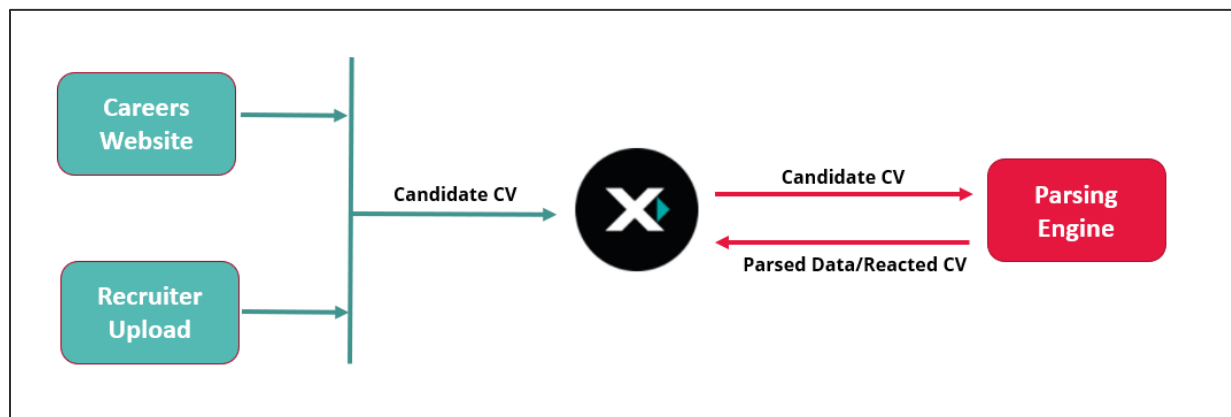

Note: CV Parsing is only available to customers who have the following:

- XD Recruitment Premium
- The new careers website (powered by Access's Volcanic product)

If you do not have either of the above, please contact your account manager.

The diagram below displays the workflow for CV parsing in PeopleXD:

2. Configuration

2.1. Configuring Candidate Anonymisation

Candidate anonymisation can be enabled for a specific applicant status. To configure this, follow the below steps:

1. Navigate to the Recruitment Dashboard.
2. Click the **Toolbox** tab.
3. From the My Recruit Toolbox widget, click **Open** on Applicant Status.
4. Click the three dot menu on the relevant status, then click **Status Details**.
5. Enable or disable the Anonymise Candidate Data toggle as required.
6. Click **OK**.
7. Repeat steps 4-6 for each status, then click **Save**.

2.2. Configuring CV Parsing

To configure CV parsing, follow the below steps:

1. Navigate to the Administrator Dashboard.
2. On the Site Manager Widget, click **Open** on Admin Settings.
3. Search for the parameter *enable_cv_parsing*.
4. Click **Edit**.
5. Update to Y or N, as required.
6. Click **OK**.

 **Note:** The parsing process is point in time. Once enabled, CVs added to candidate records or via the application process will be parsed. Cover letters are not parsed.

2.2.1. CV Profile Tab Configuration

Administrators can configure what information is redacted on the CV Profile tab. To do this, follow the below steps:

1. Navigate to the Administrator Dashboard.
2. On the Site Manager Widget, click **Open** on Admin Settings.
3. Click **Edit** on the relevant parameter.
4. Set to Y or N as required.
5. Click **OK**.

The table below outlines the parameters available:

Parameter Code	Description
cv_hide_uni_name	If set to Y, University and School names are hidden
cv_hide_org_name	If set to Y, Organisation names are hidden
cv_hide_emp_dates	If set to Y, employment history dates are hidden
cv_hide_educ_dates	If set to Y, education history dates are hidden

2.2.2. Generated CV Configuration

If the candidate has not supplied a profile, or the parsing process has not been able to attain one, then an automated summary can be output instead. This is called a *Generated Summary*. To output the generated summary in the scenario above, a parameter must first be enabled. To do this, follow the below steps:

1. Navigate to the Administrator Dashboard.
2. On the Site Manager Widget, click **Open** on Admin Settings.
3. Click **Edit** on the *cv_display_brief* parameter.
4. Set to Y.
5. Click **OK**.

2.3. **Admin Anonymisation Override**

It is possible to allow specific users to see anonymised data and documents, regardless of the candidate being at the anonymised status. For a user to view anonymised data, the following menu option must be enabled:

System	Menu Option
CorePortal	CorePortal – Recruitment – View Anonymised Data

3. Where is anonymisation applied?

The following sections outline which screens in PeopleXD will display anonymised data.

3.1. Applicant List

The Applicant list screen can be accessed from:

- the Vacancies widget on the Recruitment dashboard
- the Interviews widget on the Employee/Manager dashboard

The following data is redacted:

- Photo
- Name

Applicant	Application Date	Source	Type	Comments	Assessment Score	Status
***** (A6343)	11-Apr-2023	Careers Website	External	1	0%	Applicant Shortlisted

3.1.1. Bulk Status Update

The Bulk Status Update screen can be accessed from the Actions menu on the Applicant List screen (see section 3.1 for further detail).

The following data is redacted:

- Name

Name	Applicant Number	Status
*****	A6343	Applicant Shortlisted

3.2. Applicant One View

Applicant One View can be accessed from from the Actions menu on the Applicant List screen (see section 3.1 for further detail). Sections 3.2.1-3.2.2 outline the data redacted in each tab.

3.2.1. General Tab

The following data is redacted:

- Title
- Forename & Last Name
- Known As
- Phone Number, Mobile Number, Email Address
- Address Information

3.2.2. CV Profile Tab

The following data is redacted:

- Employment History Organisations *
- Employment History Dates *
- Education Bodies e.g. Universities, Institutes *
- Education Dates *

*Subject to additional configuration. See section 2.3 for more detail.

3.2.3. Documents Tab

The following data is redacted:

- An anonymised CV will be displayed when a candidate is at an anonymised status

3.3. What is not anonymised?

The following data is not anonymised:

1. Cover letters, or any other documents attached to a candidate record other than a CV.
2. Answers supplied by the candidates to questions they have completed in the application process.
3. The Candidate Summary or Generated Summary output by the parsing process.

4. Data is not anonymised in the Applicant Details and Application Details screens:

Search Applicants						
Applicant	Application Date	Source	Type	Comments	Assessment Score	Status
***** (A3613)		Careers Website	External	0	0%	Applicant Applied
John Snow (A6523)		Careers Website	External	0	0%	Appointment Accepted
***** (A5723)	29-May-2023	Careers Website	External	0	0%	Applicant Applied
James Jones (A0583)	18-May-2023	Careers Website	External	0	0%	Invited To Interview
Jacob Jones (A6563)	18-May-2023	Careers Website	External	0	0%	Successful At Interview

[Applicant One View](#)
[Edit Status](#)
[Comments](#)
[Schedule Video Interview](#)
[Applicant Details](#)
[Status History](#)

5. If an email is generated for an anonymised candidate, the email preview will display personal information e.g. forename.

4. Viewing Parsed CVs

Parsed CV are available within the CV Profile tab in Applicant One View. To view parsed CVs, the following menu option is required:

System	Menu Option
Web Services	Get cvparsing

4.1. What CV data is displayed?

The following information is available once a CV has been parsed:

- Candidate Summary or Automated Summary
- Employment History
- Education History
- Skills

Sections 4.1.1- 4.1.5 give further details on the information available.

 **Note:** The accuracy of the CV parsing functionality is continually improving, but please be aware that you may occasionally notice discrepancies.

4.1.1. Candidate Summary

By default, the summary section will output the candidate's own supplied profile, if the parsing process is able to attain it. This will be called *Candidate Summary*, and can be changed within the language pack if necessary. See *PeopleXD Portal: Language Pack - User Guide* for further details.

Candidate Summary

Due to graduate in 2021, I have acquired technical knowledge and skills from my course as well as practical and business skills from my industrial year in a software company in Germany. I have used a range of languages, operating systems and development tools as well as experiencing the system development life cycle. Specialising in mobile technology, I am keen to develop as a graduate trainee in software development.

4.1.2. Automated Summary

If the candidate has not supplied a profile, or the parsing process cannot attain one, an automated summary can be output instead. This is called *Generated Summary*, and can be changed within the language pack if necessary. See *PeopleXD Portal: Language Pack - User Guide* for further details.

Generated Summary

James Jones is a resident of Essen, DE. He has been working in the IT occupational sector for more than 7 years. Currently he is employed as a Junior Software Developer at Mehrmann Technologies. James has extensive knowledge of Systems Analysis, Software Development. So far James has not gained any managerial experience.

To output the generated summary in the scenario above, a parameter must first be enabled. See section 2.2.2 for further details.

4.1.3. Employment History

Data output relating to the candidate's employment history will cover:

- Their job title
- The organisation they worked for
- The dates they started and finished at that organisation
- Information the candidate has listed about that role involved

Employment History
Junior software developer , Mehrmann Technologies Jan-2020 - Present
Mehrmann Technologies, -----
* Systems analysis with clients to determine requirements - talking to managers and staff and observing work practices throughout the supply chain
* Analysis of data including modelling
* Part of a software development team creating a stock control system linking mobile devices to warehouse systems
* Demonstrating prototypes to staff
* Field testing, implementation and evaluation
* Participating in final project reporting
* Contributing to English language documentation and training
Bar assistant , Ship and Crown Jan-2018 - Jan-2019
* Serving customers

4.1.4. Education History

Data output relating to the candidate's education history will cover:

- Qualification attained e.g. Degree, GCSE
- Where they attained that qualification
- Start & End Dates

Education
BTEC Level 3 , ICT Highbridge College Jan-2015 - Jan-2017
GCSE , English language, maths, science, German, IT, PE, history Highbridge School Jan-2010 - Jan-2015
Bachelor of Science , Computer Science, Software Engineering

4.1.5. Skills

The Skills section displays a list of skills the candidate has supplied on their CV, or has been inferred by the Parsing process.

**Note:**

- The names of these skills may not match the specific skill a candidate has written on their CV. This is because of the skills taxonomy; certain skills may be written slightly different by candidates, so they are 'normalised' into consistent skills names in the taxonomy.
- Currently, it is not possible to search and filter skills.

Skills

Supply Chain

Field testing

Systems Analysis

Software Development

5. Important Considerations

The anonymisation functionality covered in this document has been designed to mitigate against unconscious bias as much as possible. However, there are certain limitations as to what can be anonymised and where. It is recommended to rollout the Applicant One View screen to users where possible, and disable access to other screens that may show non-anonymised data.

5.1. Candidate Status Changes

Every status change against a candidate is recorded. The *Applicant Status History* view in XD Insight reports can be used to highlight potential issues regarding shortlisting bias at key stages of your recruitment process.

5.1.1. Interview Panel Widget

If users are shortlisting via the Interview Panel widget, it is possible to limit the statuses they can change a candidate to. This reduces the risk of them inadvertently changing the candidate to an incorrect status and viewing personal information. To configure this, follow the steps below:

1. Navigate to the Recruitment Dashboard.
2. Click the **Toolbox** tab.
3. From the My Recruit Toolbox widget, click **Open** on Applicant Status.
4. Click the three dot menu on the relevant status, then click **Status Details**.
5. Enable or disable the Available for Interview Panel Update toggle as required.
6. Click **OK**.
7. Repeat steps 4-6 for each status, then click **Save**.

5.2. Supported CV file types

The supported file types for uploading CVs are outlined in the table below:

File type	Extension
Microsoft Word	<i>doc, docx</i>
Microsoft Excel	<i>xls,xlsx</i>
Microsoft PowerPoint	<i>ppt</i>
Text File	<i>txt</i>

Mac Pages	<i>pages</i>
PDF including graphical document	<i>pdf</i>
HTML	<i>htm, html</i>
Rich Text	<i>rtf</i>
Open Office 2. +	<i>odt, ods</i>
Microsoft Office HTML	<i>htm, html</i>
HTML Archives	<i>mht, mhtml</i>
Email	<i>eml, msg, tnef</i>
XML Paper Specification	<i>xps</i>
Outlook vcard	<i>vcf</i>
Image files	<i>jpg, jpeg, png</i>
Word XML Markup Language	<i>wml</i>
Compressed files	<i>zip, rar, gzip, tar</i>
Microsoft Works	<i>wps</i>
Word Perfect	<i>wpd</i>
