1.2	2rd October 2024	Kat Murie	Added section 4 and updated formatting.

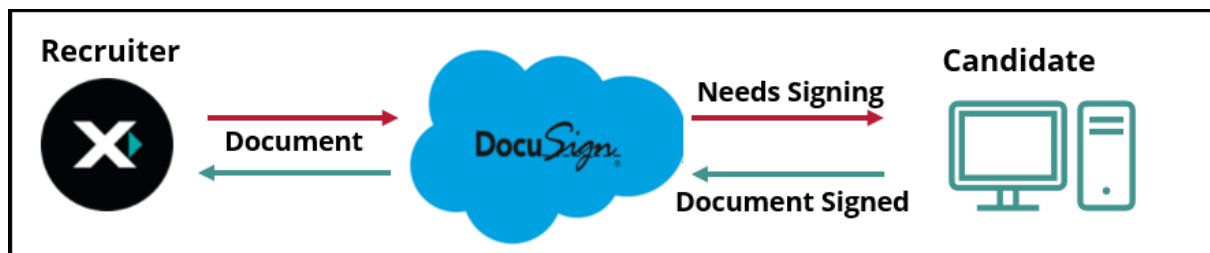

1. Overview

1.1. Purpose of the Guide

This guide gives an overview of the integration between PeopleXD Recruitment & DocuSign eSignatures. This integration:

- Allows an organisation to create pre-defined envelopes that can contain several different documents that a user can select from PeopleXD without the need start a document from scratch or store documents locally or on shared drives.
- Allows PeopleXD data to be passed up in the form of merged fields which populates the document template with key information relating to the candidate. Name, start date, salary, job title
- Allows as many templates to be created in DocuSign as required.

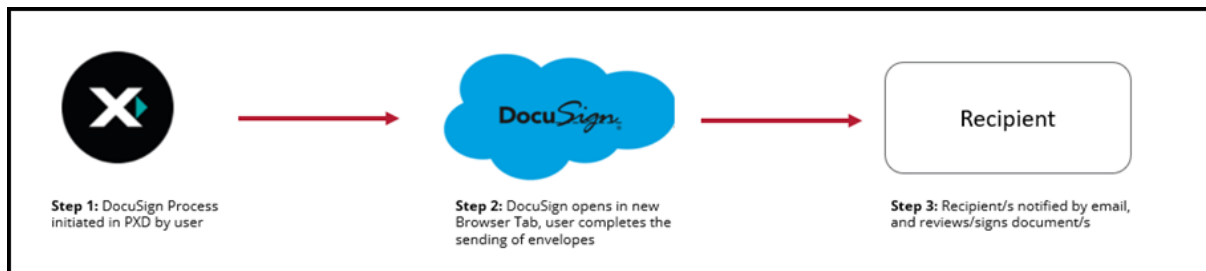

1.2. DocuSign Integration Overview

The integration allows a user within PeopleXD Recruitment to send a Document to a candidate that they can review and sign via DocuSign e.g. an NDA or a Contract of Employment to a successful applicant.

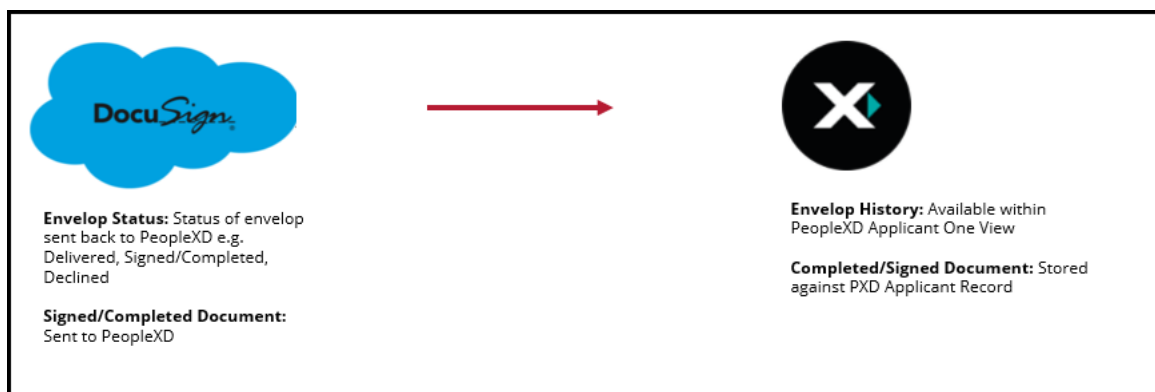

1.3. DocuSign Integration Process

1.3.1. Sending a Document

The user initiating the process in PeopleXD does not require to have their own unique account in DocuSign. However all DocuSign envelopes initiated within PeopleXD are sent from the one customer defined account within DocuSign e.g. hr@abcsolutions.com or johndoe@abcsolutions.com. Users initiating the process from PeopleXD are logged into this DocuSign account in a restricted preview and send mode.

1.3.2. Signing a Document

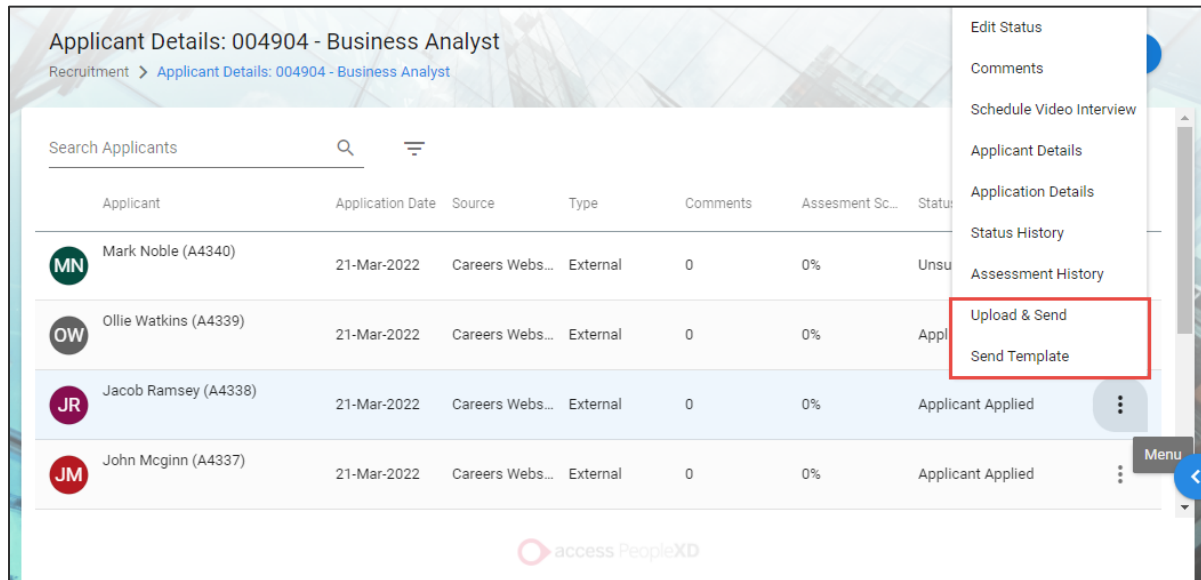

Once the candidate has received the email for them to sign, they can complete the signing process within DocuSign. The status of the DocuSign envelope e.g. sent, completed can be seen within PeopleXD. The completed document is then saved in PeopleXD against the candidate in question.

2. How to Use

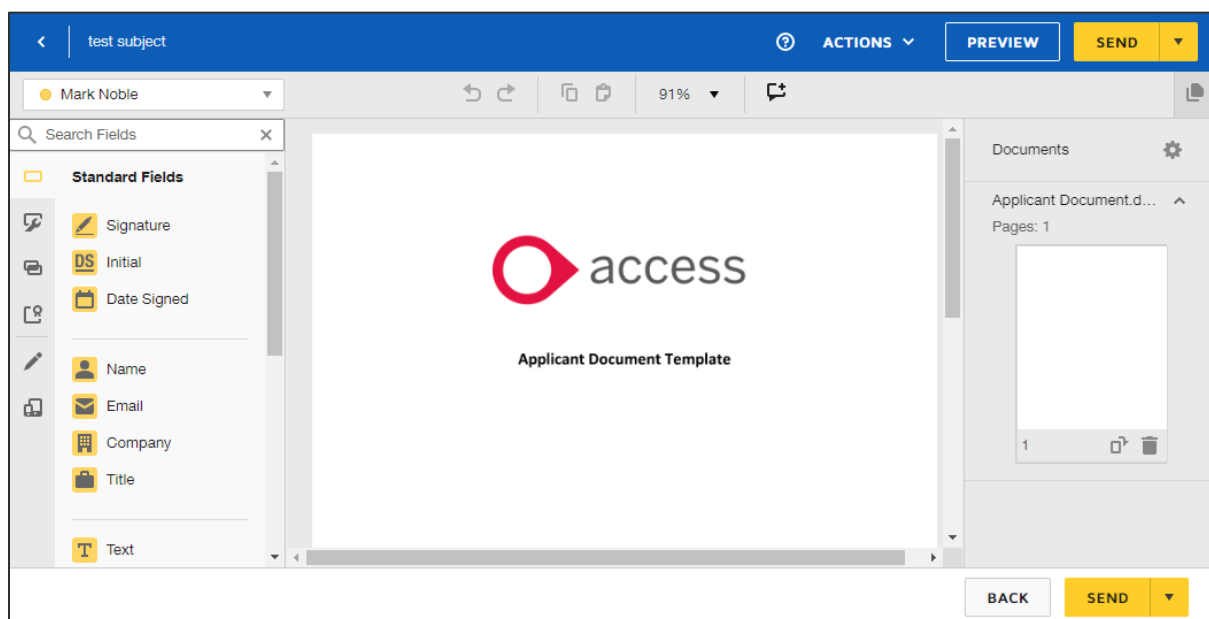

2.1. View Applicant

Within the Applicant Details screen for a Vacancy, the DocuSign functionality appears by clicking the  button and viewing the options on screen.

2.1.1. Upload & Send

1. To send a document to DocuSign, click **Upload & Send**. This allows a user to send an already completed document located on their local/network drive etc to a candidate.
2. This opens the *Document Upload* window for you to select and upload to DocuSign.
3. DocuSign opens in a new tab with the Document available to be edited within DocuSign.

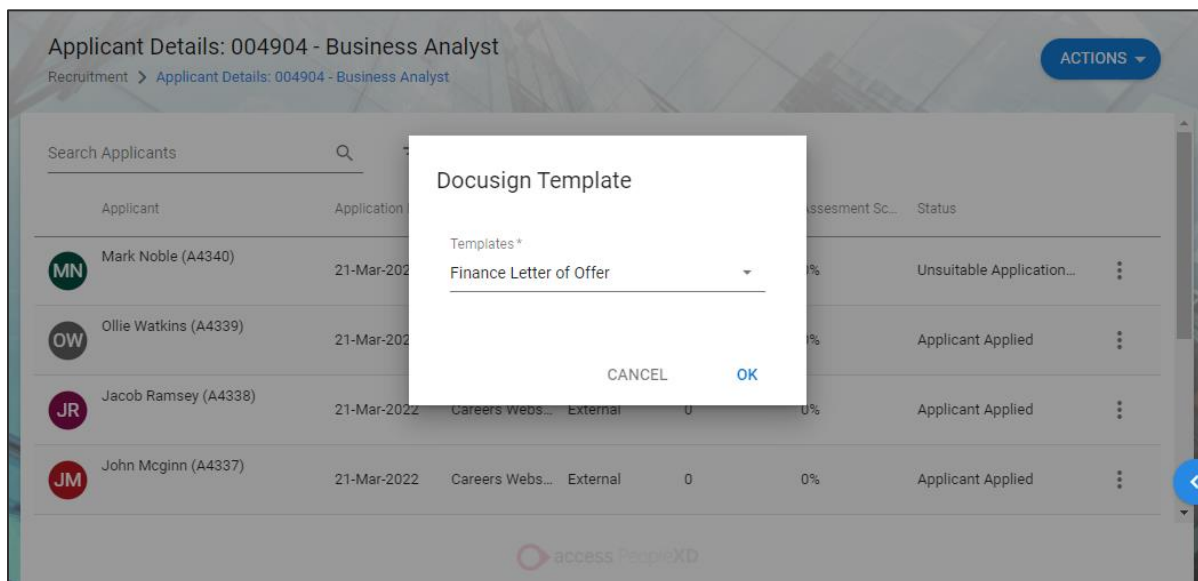

4. This allows you to edit and make changes to the Applicant Document template within DocuSign. The document is set to preview and send mode.
5. A user can add in custom fields to this template document from PeopleXD via DocuSign.
6. A user can also add the *Signature Required* field to the Document, before sending it to the candidate.
7. The candidate's email address as stored in their PeopleXD Applicant record is passed to DocuSign as part of this process which is then used to send the document to.

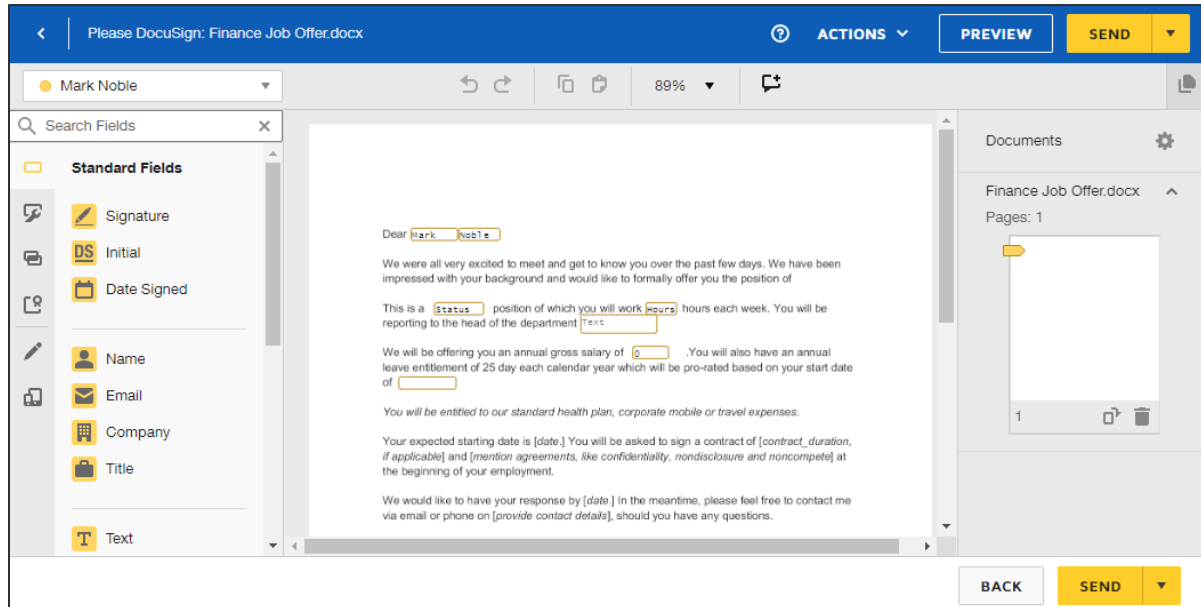

2.1.2. Send Template

Pre-defined templates can be created in DocuSign which contain most of the text/information e.g. Contract of Employment for Job Role A or Contract of Employment for Job Role B.

1. To send a template that has been configured within DocuSign, click **Send Template** for the selected applicant within the Applicant Details screen in PeopleXD.
2. Select the DocuSign template to use for this applicant.

3. This opens DocuSign and populates the Applicant's information into the DocuSign template chosen.

4. Opens DocuSign with the default template document that has been previously uploaded to DocuSign.
5. PeopleXD fields can be added to these templates in DocuSign meaning that when the process is initiated in PeopleXD the candidate information is merged into the Document in DocuSign automatically e.g. Name, Job Role, Salary, Hours.
6. The candidates email address as stored in their PeopleXD Applicant record is passed to DocuSign as part of this process which is used to send the document to.

2.2. Applicant OneView

The following sections outline the DocuSign functionality available in Applicant One View.

2.2.1. Send Document

This is the same functionality as the Upload & Send button outlined in the [Upload & Send section](#).

2.2.2. Send Template

This is the same functionality as the Send Template button outlined in the [Send Template section](#).

2.2.3. Envelope History

The Applicant One View also has Envelope History section that tracks the status changes of the envelope.

3. How to Configure

3.1. Web Services

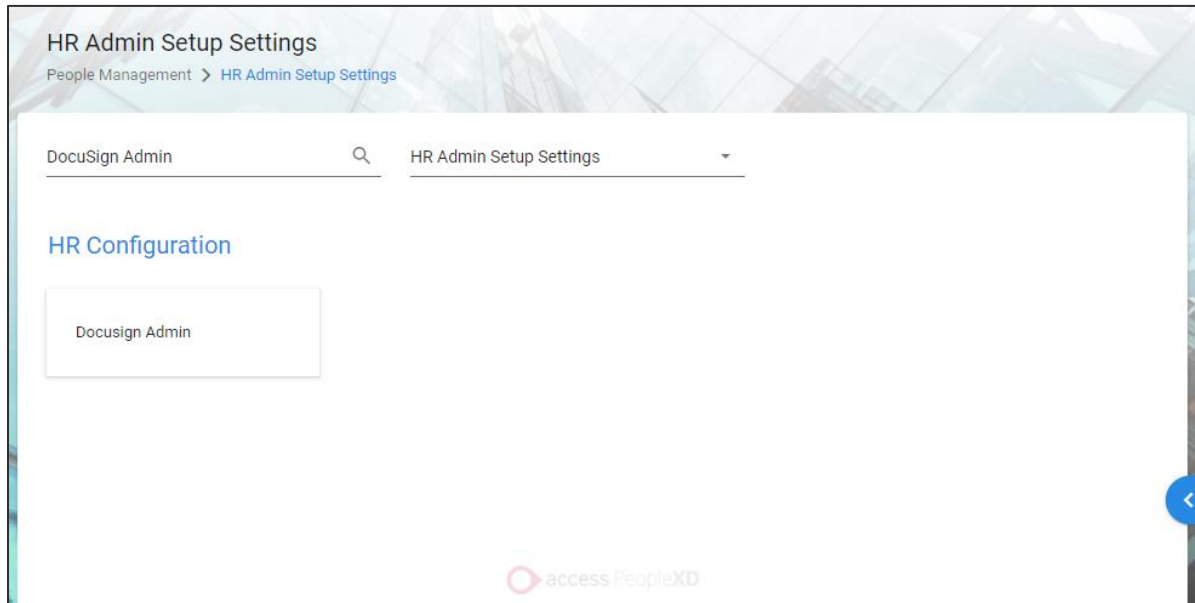

The following Web Services are required to be enabled to access the DocuSign functionality on PeopleXD.

System	Menu Option	Description
Web Services	Create docusign localdoc	Access to the Send Document/Upload & Send Option
	Create docusign senderview	All users initiating the DocuSign process in PeopleXD need this menu option
	Create docusign viewenvelope	Control access to the View button per envelope displayed within the Envelop History grid in the Applicant One View
	Get docusign adminsettings	Allows a user to update information within the PeopleXD DocuSign Admin screen
	Get docusign envelopestatus	Required to see the Envelop History within the Applicant One View
	Get docusign template	Required to allow PeopleXD users to select and send a Document Template
	Update docusign adminsettings	Grants a PeopleXD user access to the PeopleXD DocuSign Admin screen

3.2. DocuSign Admin Settings

DocuSign Admin settings are found within the People Management Dashboard. To access these follow the below steps:

1. Go to the Data Centre tab on the People Management Dashboard
2. Select HR Admin Setup Settings and click **Open**
3. Search for DocuSign Admin and open the corresponding option.

3.2.1. Account Information

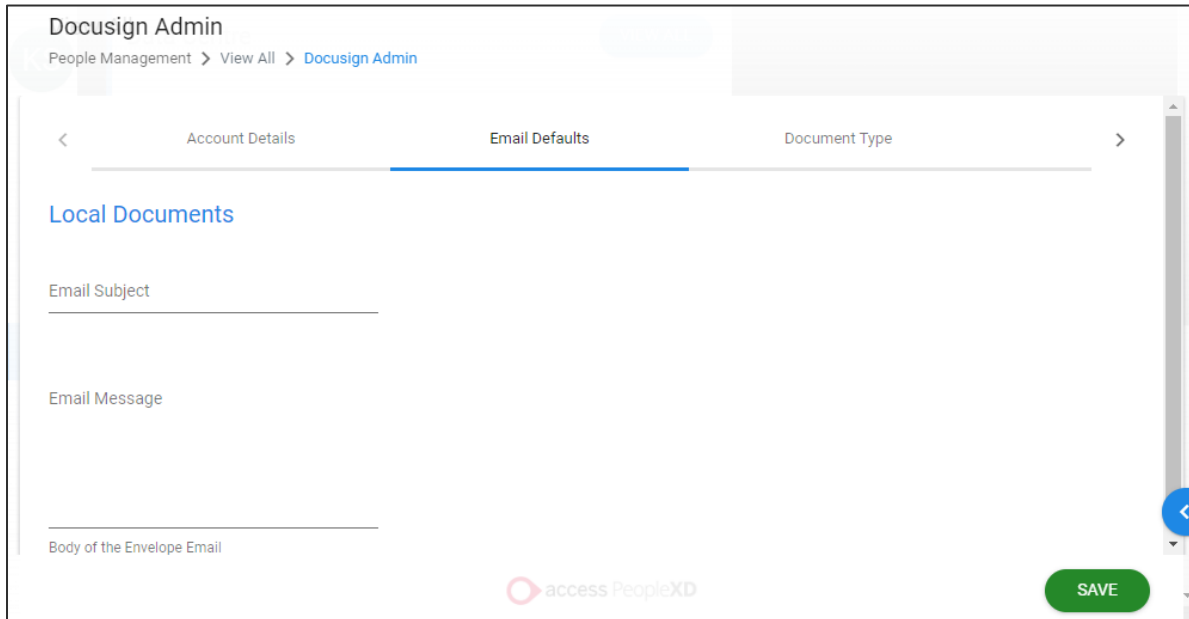

All settings here are given to the project consultant from the PeopleXD Product & Development team when setting up the client's integration with DocuSign. This allows an admin user or consultant to configure the integration link with DocuSign.

Certain Information on this screen relates to the designated DocuSign user account used by the integration and from which DocuSign envelopes is sent from. Therefore once the integration has been activated, this information only needs to be updated where this designated user account needs to change.

The screenshot displays the 'DocuSign Admin' interface. At the top, there's a breadcrumb trail: 'People Management > View All > DocuSign Admin'. Below this, a navigation bar shows three tabs: 'Account Details' (selected), 'Email Defaults', and 'Document Type'. The 'Account Details' tab is divided into three sections: 'Account Information', 'Apps and Keys', and 'Connect WebHook'. Under 'Account Information', there are three rows of settings: 'Production Account' with a toggle switch, 'Account Base URI', and 'Account ID'. Under 'Apps and Keys', there are 'Access Token URL', 'Integration Key', and 'Private Key'. Under 'Connect WebHook', there are 'Connect Key', 'Key for Connect Webhook', 'Salesforce', and 'Salesforce Number'. At the bottom right, there are two buttons: 'ACTIVATE' (blue) and 'SAVE' (green). The 'access PeopleXD' logo is visible at the bottom center.

3.2.2. Email Defaults

The email defaults tab allows a user to configure the default email subject and message when sending a non-templated document to a candidate.

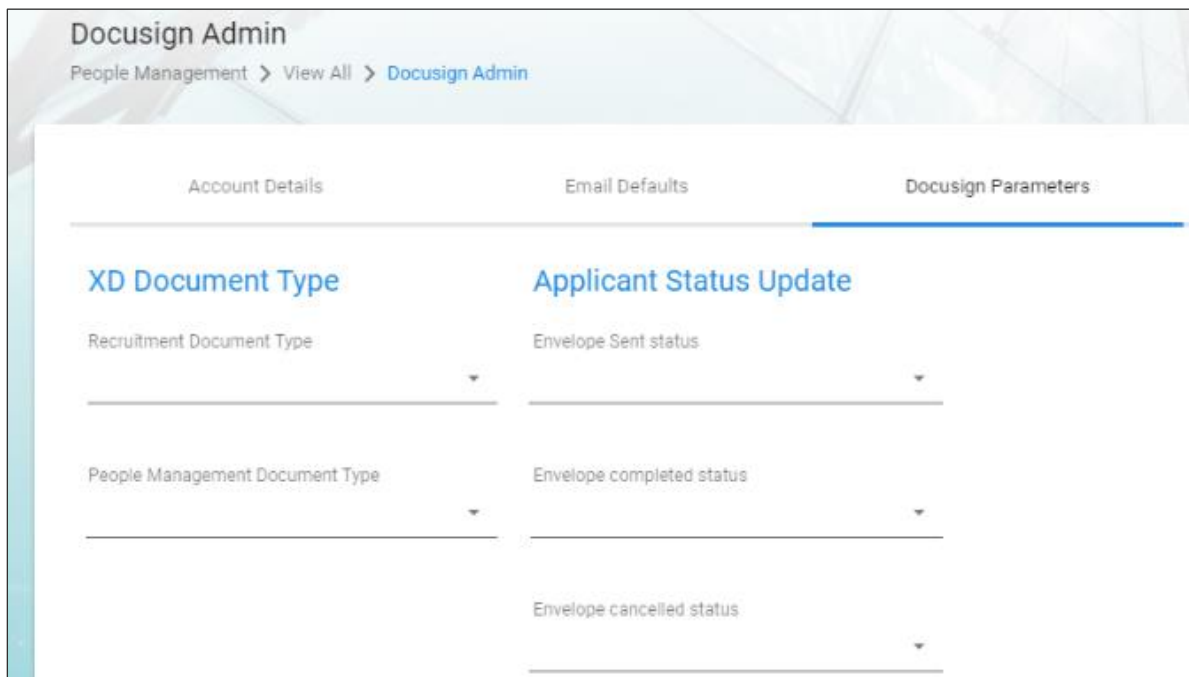

The screenshot shows the 'DocuSign Admin' interface. At the top, there's a breadcrumb trail: 'People Management > View All > DocuSign Admin'. Below this, there are three tabs: 'Account Details', 'Email Defaults' (which is selected and highlighted with a blue underline), and 'Document Type'. Under the 'Email Defaults' tab, there are two main sections: 'Local Documents' and 'Email Subject'. Below 'Email Subject' is a text input field. Below 'Email Message' is a larger text area. At the bottom left, there's a label 'Body of the Envelope Email'. At the bottom right, there's a green 'SAVE' button. A 'PeopleXD' logo is visible in the bottom right corner of the interface.

A user can overwrite this when DocuSign opens after the user initiates the process from PeopleXD. DocuSign template email subject & messages are configured within DocuSign.

3.2.3. DocuSign Parameters

There are several parameters within this section that allow you to automate specific things within PeopleXD.

The screenshot shows the 'DocuSign Admin' interface with the 'DocuSign Parameters' tab selected. The breadcrumb trail is 'People Management > View All > DocuSign Admin'. There are three tabs: 'Account Details', 'Email Defaults', and 'DocuSign Parameters' (which is selected and highlighted with a blue underline). The 'DocuSign Parameters' tab is divided into two main sections: 'XD Document Type' and 'Applicant Status Update'. Under 'XD Document Type', there are two dropdown menus: 'Recruitment Document Type' and 'People Management Document Type'. Under 'Applicant Status Update', there are three dropdown menus: 'Envelope Sent status', 'Envelope completed status', and 'Envelope cancelled status'.

DocuSign Document Type

- **Recruitment Document Type**
 - When set this allows a completed DocuSign document to be saved against the applicant in question.
 - The completed document will be saved against this document type in PeopleXD and will be available within the attachments/documents tab within the Applicant One View
- **People Management Document Type**
 - Not applicable when DocuSign is initiated from PeopleXD Recruitment.

Please note if the Document Type field is not set, the completed DocuSign envelope is not saved against the PeopleXD Applicant record.

Applicant Status Update

- **Envelope Sent Status**
 - This allows a customer to automatically update the applicant status to a pre-defined value when the DocuSign envelope has been marked as Sent.
- **Envelope Completed Status**
 - This allows a customer to automatically update the applicant status to a pre-defined value when the DocuSign envelope has been marked as Completed.
- **Envelope Declined Status**
 - This allows a customer to automatically update the applicant status to a pre-defined value when the DocuSign envelope has been marked as Declined.

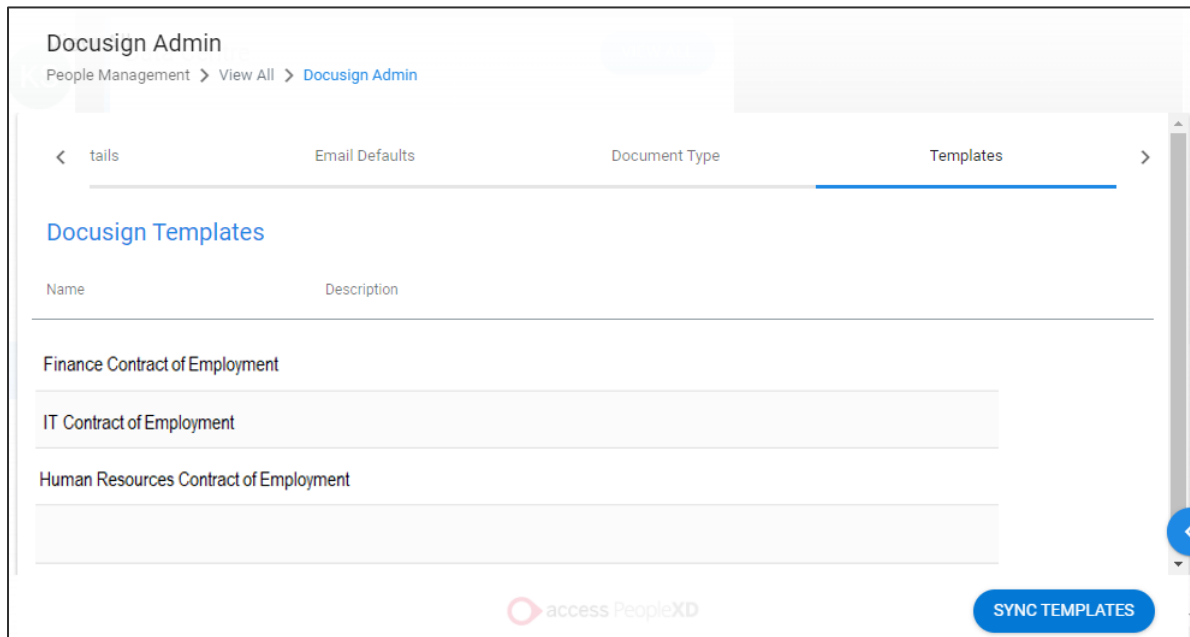

Please note if these fields are not set, the applicant status in PeopleXD would not be updated when the applicable DocuSign envelope status has updated.

3.2.4. Templates

Once a DocuSign template has been created it needs to be synced back to PeopleXD.

Within the Templates tab, a user can see what DocuSign templates have been synced back to PeopleXD, which is then available to users initiating the DocuSign process after clicking **Send Template**.

To Sync templates, click **Sync Templates**.

3.2.5. Template Creation

Note: To learn how best to setup Templates within DocuSign, please check out some of the sample knowledge in the resources section below.

There are 3 steps that need to be configured for each Template for them to be used within PeopleXD and in order for PeopleXD data to be passed into Template custom fields.

When a Template has been created ensure that

1. The Role field is completed as **XD Recipient**.
2. The **Needs to Sign** action has been specified.

- The **Sync Templates** process has been completed within the DocuSign Admin Area in PeopleXD.

Each person is assigned an integrated user to facilitate the transfer of PeopleXD data to and from DocuSign. Follow the steps below on how to create a Template Document in DocuSign.

Edit Template

PXD Vacancy / Applicant / Offer fields can be added to your templates in DocuSign. These fields must first be setup in your DocuSign account, and in order to do this complete the following steps

1. Login to DocuSign Account.
2. Navigate to the Settings Tab.
3. Select *Document Custom Fields* from the left navigation panel.
4. Click the *Add Document* button.
5. Add the custom field from the Dictionary provided below.
6. These are now available under the *Custom Fields* option as below when creating or editing a template, and when the template is generated, these fields are auto filled with the applicable PeopleXD data.

Note:

- When a user has generated a template and they are viewing it before they send, it is not possible to pull in PeopleXD data at that point by dragging into these fields into the template preview.
- Periodically new PXD custom field dictionary is updated with new fields, you need to complete steps 1-5 above once these new fields have been released and communicated.

PXD Fields

The below table shows the current list of available PXD fields within DocuSign.

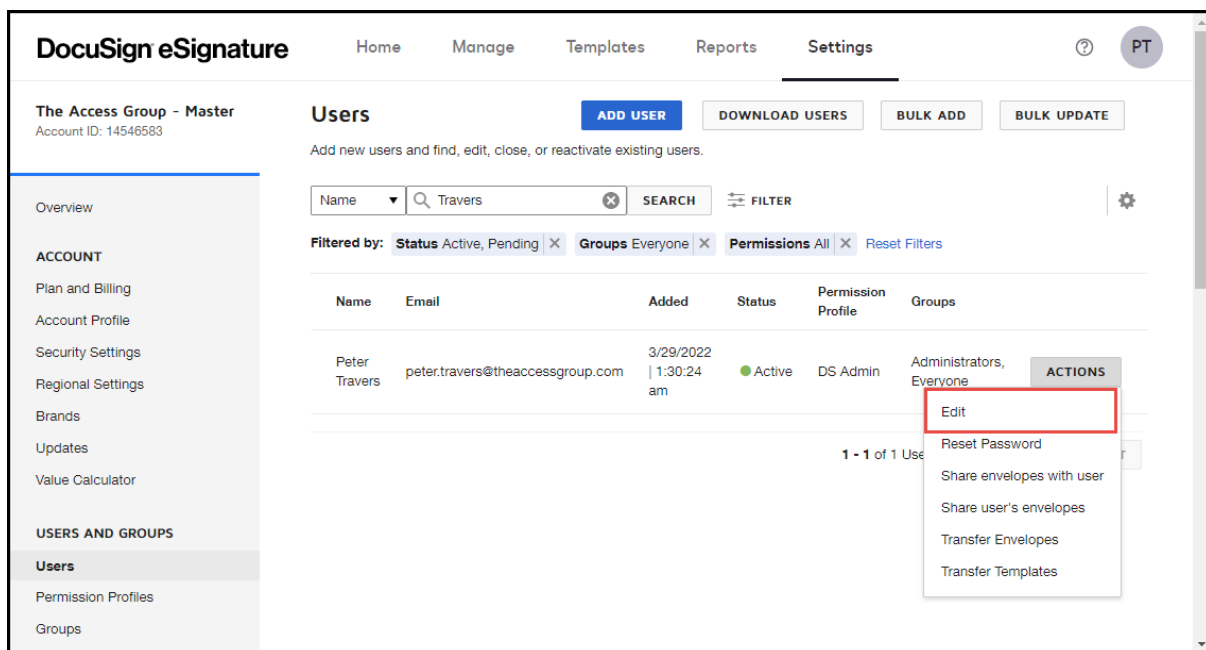

PXD Field	PXD Field	PXD Field	PXD Field
PXD_ADDRESS_COUNTRY	PXD_FORENAME	PXD_PHONE_NUMBER	PXD_USER_CODE_2
PXD_ADDRESS_COUNTY	PXD_FTE	PXD_POSITION_TYPE	PXD_USER_CODE_3
PXD_ADDRESS_LINE_1	PXD_FTE_HOURS	PXD_POST_CODE	PXD_USER_CODE_4
PXD_ADDRESS_LINE_2	PXD_FTE_WEEKS	PXD_POST_NUMBER	PXD_USER_CODE_5
PXD_ADDRESS_LINE_3	PXD_RECRUITMENT_ID	PXD_POST_TITLE	PXD_VACANCY_DISCIPLINE
PXD_ADDRESS_LINE_4	PXD_HOURS	PXD_POST_TYPE	PXD_VACANCY_JOB_DURATION
PXD_ADDRESS_LINE_5	PXD_INCREMENT_DUE_DATE	PXD_PPS/NI_NUMBER	PXD_VACANCY_JOB_START_DATE
PXD_ADVERTISED_JOB_TITLE	PXD_INITIALS	PXD_PROJECT	PXD_VACANCY_POSITION_TYPE
PXD_ADVERTISED_LOCATION	PXD_JOB_CATEGORY	PXD_RATE_OF_PAY	PXD_VACANCY_POSITION_TYPE
PXD_ADVERTISED_SALARY	PXD_JOB_TITLE	PXD_RATE_TYPE	PXD_VACANCY_POST_CODE
PXD_APPLICANT_NO	PXD_KNOWN_AS	PXD_REPORTING_TO	PXD_VACANCY_TYPE
PXD_CATEGORY	PXD_LOCATION	PXD_START_DATE	PXD_WEEKS
PXD_COMPANY	PXD_MANAGEMENT_UNIT	PXD_SUB_CATEGORY	PXD_WORKGROUP
PXD_COST_CENTRE	PXD_MIDDLE_NAME	PXD_SUB_STATUS	
PXD_DEPARTMENT	PXD_MOBILE_NUMBER	PXD_SURNAME	
PXD_DIVISION	PXD_ORG_UNIT_LOCATION	PXD_TARGET_END_DATE	
PXD_EMAIL_ADDRESS	PXD_PAYSCALE	PXD_TITLE	
PXD_EMPLOYEE_STATUS	PXD_PAYSCALE_POINT	PXD_USER_CODE_1	

3.3. DocuSign Setup Process

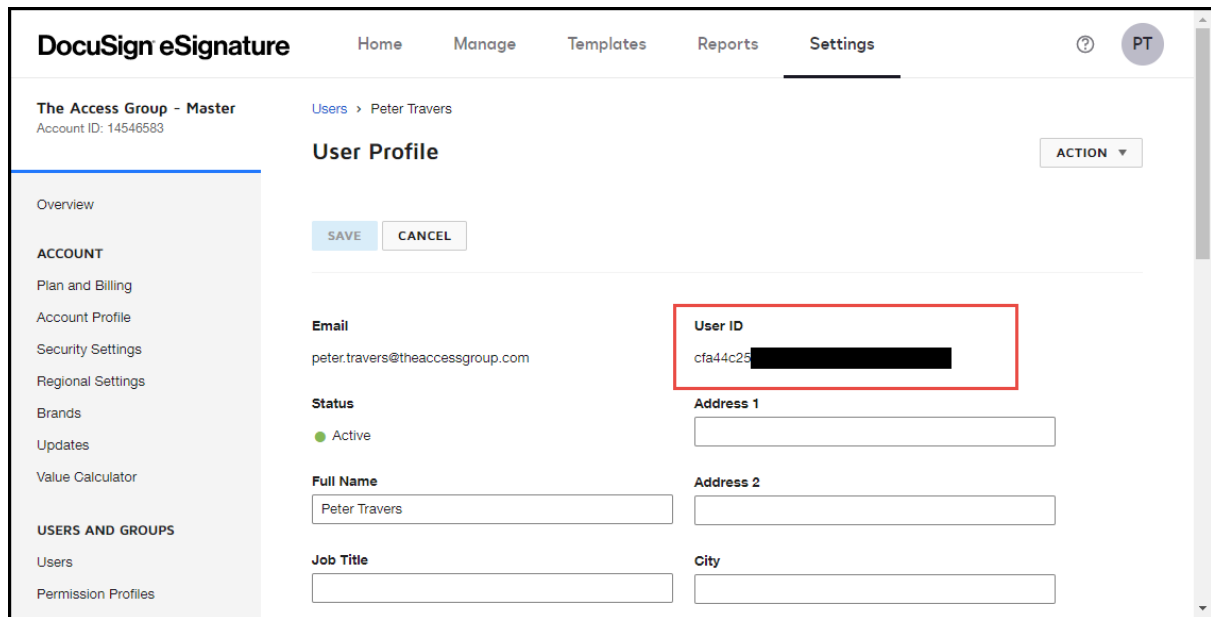

3.3.1. Updating the Designated User Account

Once the integration has been activated and there is a need to change the designated DocuSign user account used by the integration, follow the below steps. This is to be used if

- The integration is currently linked to the DocuSign user account joebloggs@abcsolutions.com
 - The integration now needs to use the DocuSign user account hr@abcsolutions.com
1. Ensure the new user account is a valid email, has been added as an Admin user on your DocuSign Account, and the user account has been activated (activation is completed once the user has verified their account in an email DocuSign sends once their account has been added). If the account already exists and active, there is no need to re-activate
 2. Navigate to the users area which is located within the settings are of your DocuSign Account,
 3. Click the **Actions** button, and then the **Edit** button against the user account that you wish to switch the integration over to e.g. hr@abcsolutions.com

4. Copy the User ID Value, highlighted below.

The screenshot shows the DocuSign eSignature interface. The top navigation bar includes Home, Manage, Templates, Reports, and Settings. The left sidebar lists various account and user management options. The main content area is titled 'User Profile' and contains a form for user details. The 'User ID' field is highlighted with a red box.

Job Title

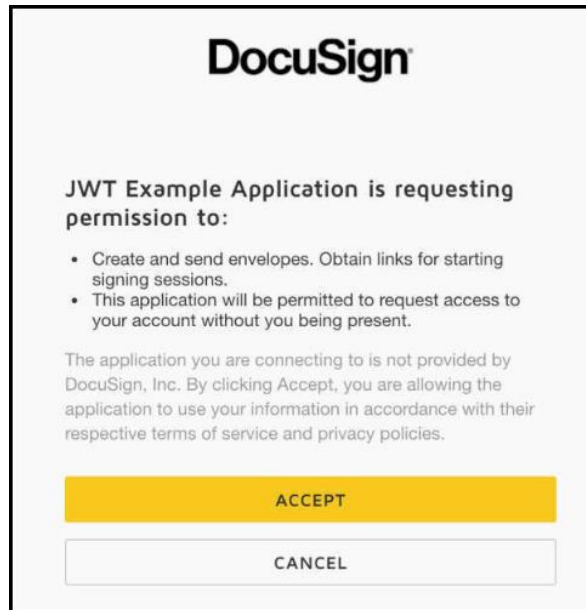

Address 1

Address 2

City

5. Navigate to the DocuSign Admin screen in People XD and select the Account Details Tab.
6. Enter in the User ID value.
7. Click Save & Activate.

8. After you click **Activate**, DocuSign asks you to grant the necessary integration permissions to this user which you can Accept to complete the integration link.
- To obtain consent, ask the users who will be impersonated by the JWT grant application to open a particular URL in their browser. You will supply them with the URL to be used during this one-time task. When the user opens the URL, they are asked to authenticate with DocuSign. After authenticating, they'll then be asked to grant consent to your application via a form.

9. After the above steps have been completed, DocuSign documents sent to candidates come from this user account.

4. Insight Reporting

It is possible to report on the DocuSign envelopes that have been generated and sent via PeopleXD. The following columns are available in the Recruitment DocuSign (Recruitment) view in Insight:

Columns	Description
Envelope Status	Status of the envelope e.g. created, completed, sent, delivered.
Created From Template	Was the DocuSign document generated from a template, will return a Y or N.
Recruitment Id	The vacancy ID associated with the candidate for whom this document was generated for.
Applicant No.	Applicant Number associated with the candidate for whom this document was generated for.
Email Address	Email Address associated with the candidate for whom this document was generated for.
Envelope Sender	Personnel No. of the user who sent this document.
Date Updated	The date that the envelope was last updated.
Date Sent	The date that the envelope was sent.
Email Subject	Subject of the envelope email.
Date Created	The date that the envelope was created.
Post Number	Post number for the vacancy the candidate has applied to.

5. DocuSign Resources

The following table outlines some supporting documentation provided by DocuSign. It shows a sample of recommended DocuSign resources with much more available. All admin users setup on your DocuSign Account can access DocuSign support and DocuSign University.

Once your DocuSign account has been provisioned and you are able to log into it, you can add more users for the purpose of maintaining your account, templates etc.
