1. Overview

1.1. Purpose of the Guide

The purpose of this guide is to outline the steps needed to configure and generate applications in bulk for applicants and vacancies within the XD Recruitment solution.

The *Generate Applications* feature is used to make applications available in an interview pack for interviewers as follows:

- For each selected application, all documents attached to the application which are not in PDF format e.g. word documents are converted into PDF format.
- The applicant's online application is then merged with all the pdf documents and the converted pdf documents.

In addition, all applicant details generated in the Generate Applications process can then be merged into one file which can then be printed out or attached to the vacancy, for interviewers as part of the interview pack.

Overview

The Generate Applications feature in recruitment is used to make applications available in an interview pack for interviewers in the following way:

- For each selected application, all documents attached to the application which are not in .pdf format are converted into .pdf format.
- The applicant's online application is then merged with all the .pdf documents and the converted .pdf documents.
- All applicant details generated can then be merged into one file (i.e. containing all applicant applications) which can then be printed out for interview panel members as part of the interview pack.

2. How to Configure

2.1. Initial Applicant Process

An applicant applies to an XD vacancy, where the following file types are allowed to be uploaded as part of the application process:

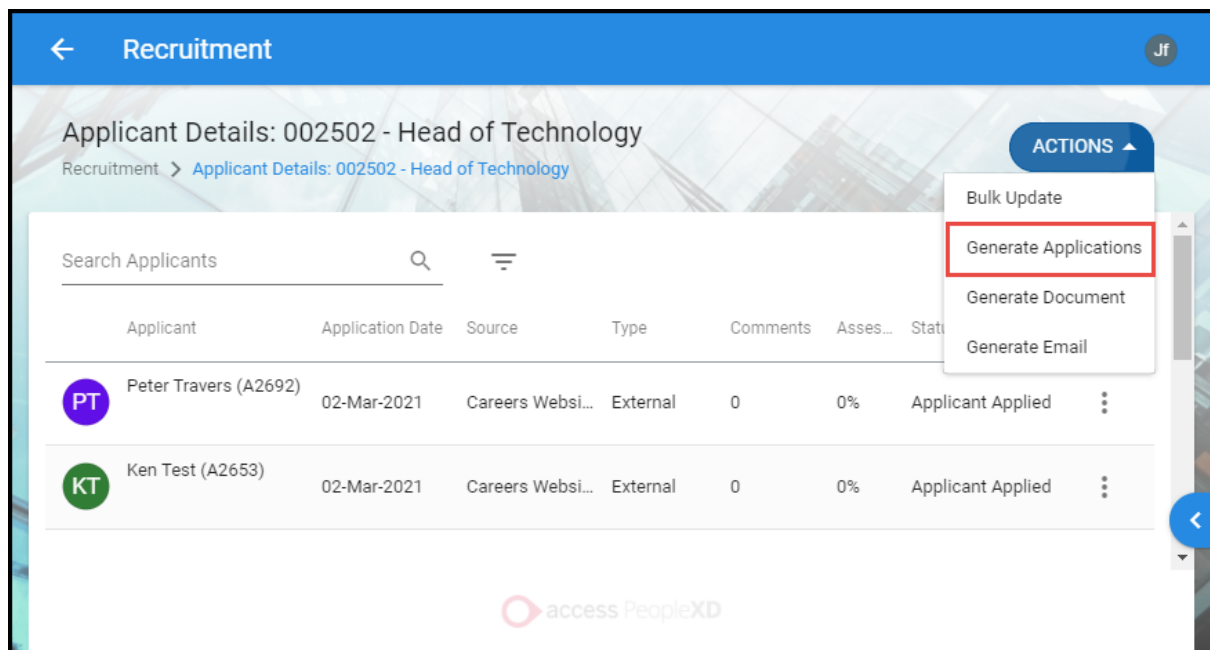

- .doc
- .docx
- .pdf
- .jpg

These file types are then sent to XD and picked up by an automated job when called upon within the XD platform via the Generate & Merge functionality.

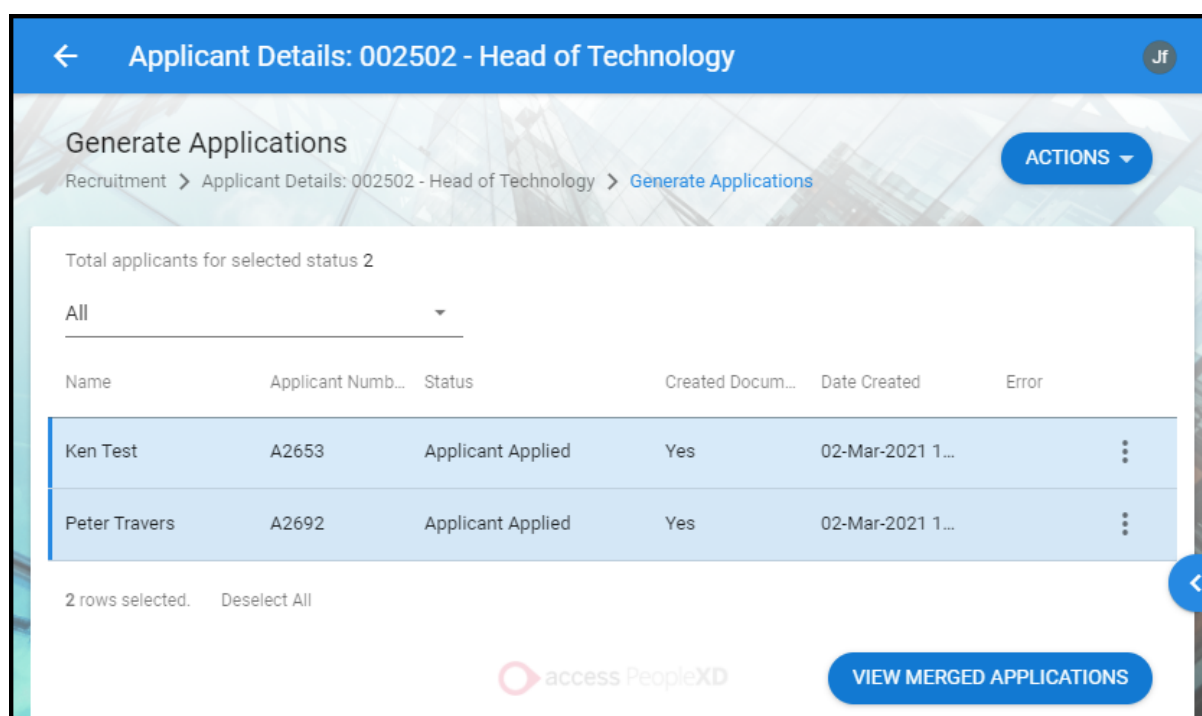

2.2. General Setup

In the first screenshot below, you can see an applicant displaying in the Applicant Details screen.

1. Click on the **Generate Applications** button.

2. The *Generate Applications* screen appears.

These menu options control the use of the **Generate Applications** and **Merge Applications** functions on the *Applicant Details* screen

System	Menu Option	Explanation
CorePortal	eRecruitment Applications - Generate	This turns on the access to generate and merge applications.
CorePortal	eRecruitment Applications View - Generate	This turns on the access to view applications that have been generated and merged.

2.3. XD Recruitment Document Tracker

Once the applications are converted into a PDF document, they can then be merged into one overall PDF document. This allows for ease of printing and distributing the applications to the interview boards.

There needs to be a header template document for the following loaded into the system before any documents can be generated and merged.

To access these parameters:

1. Go to *CoreHR back office > CorePersonnel > Recruitment > Reference > ERecruitment Document Tracker*.
2. On the *Page Header Templates* section, load the template documents.

2.3.1. Page Header Templates

These are the header documents where the merged files are created against. These include your organisation's logo, font and adhere to your organisation's style guide.

Template	Details
Individual Application Page	This is legacy functionality and is not required to be populated.
Interview Page Pack	This is an example of a template page for the page header of the combined document after the merge process has been completed.

Note:

- These documents can only contain .gif images
- The labels of the merged items can be updated; however it is not possible to add new merged items to the template.
- The other parameters on this screen are configured as part of the technical install and do not require any changes.
- The individual page header for the merge is no longer required

3. How to Use

The following steps need to be followed to ensure Application Packs are generated and merged correctly using the XD Recruitment solution.

3.1. Initial Applicant Application Creation

1. On XD Recruitment go to a Vacancy > View Applicants > Generate Applications.
2. Highlight applicants and go to Actions> Generate Applications = 'Job has been submitted'.
3. An instant database job runs.
4. Highlight applicants, click actions > merge applications.
5. An instant database job runs.

3.2. Generate Applications

To access the generate applications feature:

1. Go to CorePortal Recruitment Dashboard > Vacancies tab > Vacancies widget.
2. Search for a Vacancy.
3. Click on the **Actions** button and select **View Applicants**.
4. Highlight applicants required to generate applicants for or click on the **Select all** button on the bottom of the screen to include all applicants.
5. Within this screen, click on the **Actions** button and select **Generate Applications**.

XD Recruitment: Generating Application Packs

The screenshot shows the 'Generate Applications' page for 'Applicant Details: 002522 - Support Analyst'. The page has a blue header with a back arrow and the title. Below the header, there's a breadcrumb trail: 'Recruitment > Applicant Details: 002522 - Support Analyst > Generate Applications'. The main content area has a title 'Generate Applications' and a subtitle 'Total applicants for selected status 2'. Below this is a dropdown menu set to 'All'. A table lists two applicants: Denis Cotter (A2712, Applicant Applied) and Peter Travers (A2692, Applicant Applied). The table has columns: Name, Applicant Num..., Status, Created Docu..., Date Created, and Error. At the bottom left, a red box highlights '2 rows selected.' and 'Deselect All'. At the bottom right, a blue button 'ACTIONS' is open, showing options: 'Delete Selected', 'Generate Applications' (highlighted with a red box), and 'Merge Applications'. The 'access PeopleXD' logo is at the bottom center.

Name	Applicant Num...	Status	Created Docu...	Date Created	Error
Denis Cotter	A2712	Applicant Applied			
Peter Travers	A2692	Applicant Applied			

The screenshot shows the same 'Generate Applications' page, but with a green success message box at the top right: 'The job has been submitted. You will receive an email when complete'. The table now shows 0 rows selected, and the 'Deselect All' button is replaced by 'Select All'. The 'access PeopleXD' logo is at the bottom center.

Name	Applicant Num...	Status	Created Docu...	Date Created	Error
Denis Cotter	A2712	Applicant Applied			
Peter Travers	A2692	Applicant Applied			

You can generate applications for all employees, or you select individual employees by clicking on the checkbox on right-hand side of each applicant record.

Once the process is complete, a link appears next to each selected applicant with the date and time of creation. When this link is clicked, a document opens displaying the application form and any documents attached to the application

3.3. Merge Applications

The first page displays Applicant Details, Applicant ID, Name, Vacancy ID, and Vacancy Name. You can then merge all the individual applications and group together in one pack using the **Merge Applications** button.

1. Select the applications you want to display in the Merged File and click on the **Merge Application button**.
2. Once complete, this generates a link with date/time of creation and if you click on the link, you can view all applicant applications with their attached documents

The items on the following items appear on screen when the document has been merged successfully:

Item	Explanation
Created Document	This shows as either Yes or No. It is an indicator showing they the generation process is complete.
Error	This shows as Error if there was a problem in the generation process
View Creation Document	Click the  button and select View Creation Document , to allow you to view and download the document that has been generated for this applicant.
View Generation Errors	Click the  button and select View Generation Errors , to allow you to view any errors that may have stopped the generation process from completing.

3.3.1. Merge Applications screen

This feature allows you to generate application forms belonging to all applicants and merge them together into one document that can be easily printed and read by an interview panel member.

To carry this out:

1. Go to *CorePortal Recruitment Dashboard > Vacancies tab > Vacancies* widget.
2. Search for a vacancy.
3. Click on the **Actions** button and select **View Applicants**.
4. Within this screen, click on the **Actions** button and select **Merge Applications**.
5. Select the applicants you want to display their applications in the merged file and click on the **Merge Application** button.

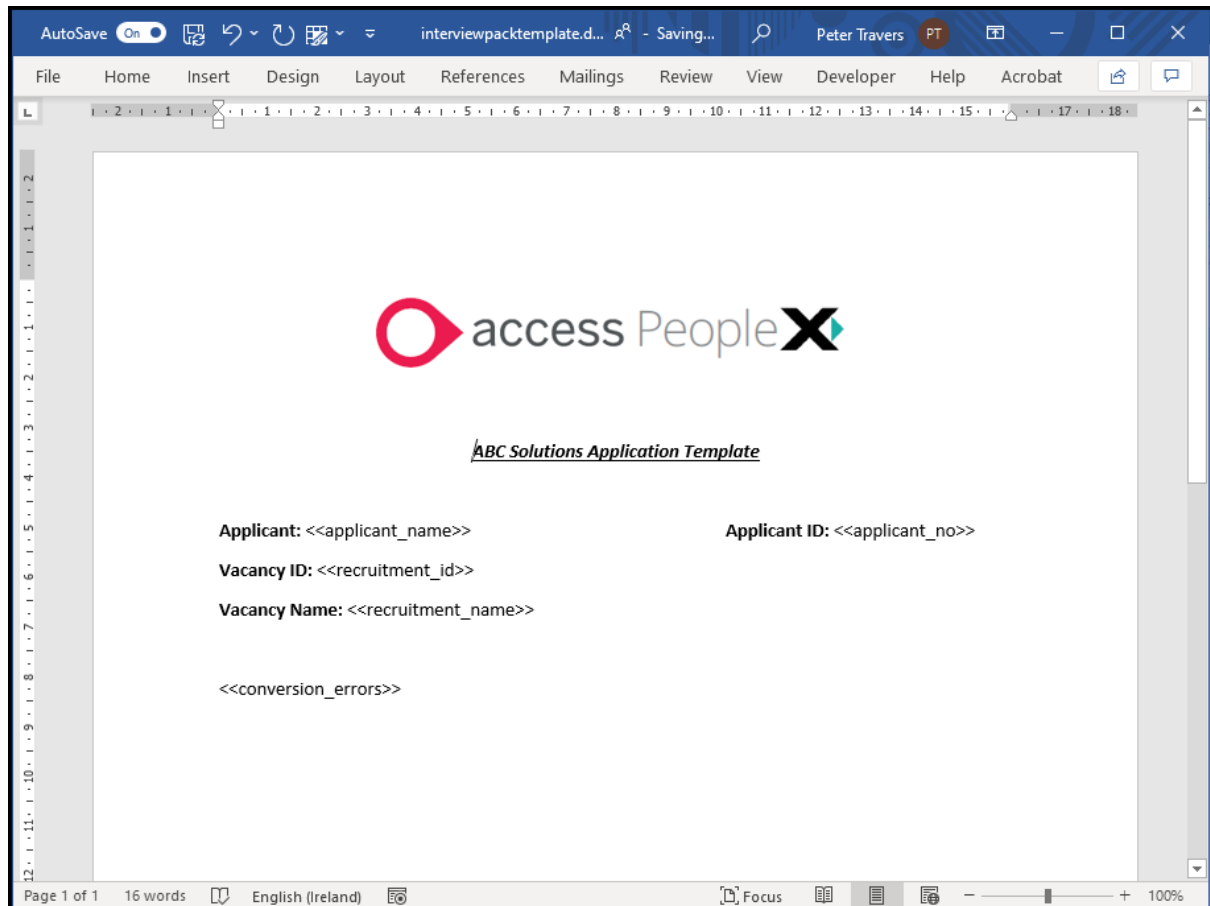

Once complete, a single PDF file is available for you to download, that includes all of the individual 'generated applications' for each applicant.

3.4. Details Not Shown on Application Pack

1. Diversity Details Question Category not outputted on the PDF.
2. Private Questions are not outputted on the PDF

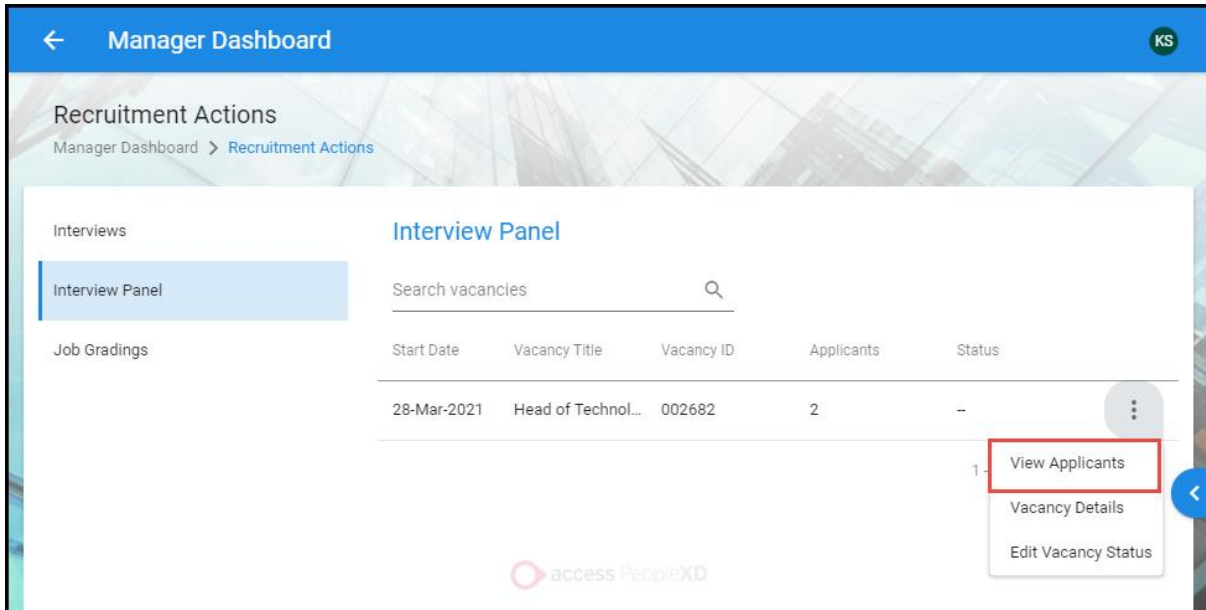

3.5. Sample Output Application Pack

The following image shows what the cover page of an application pack looks like. This can be created and configured in any style by your organisation.

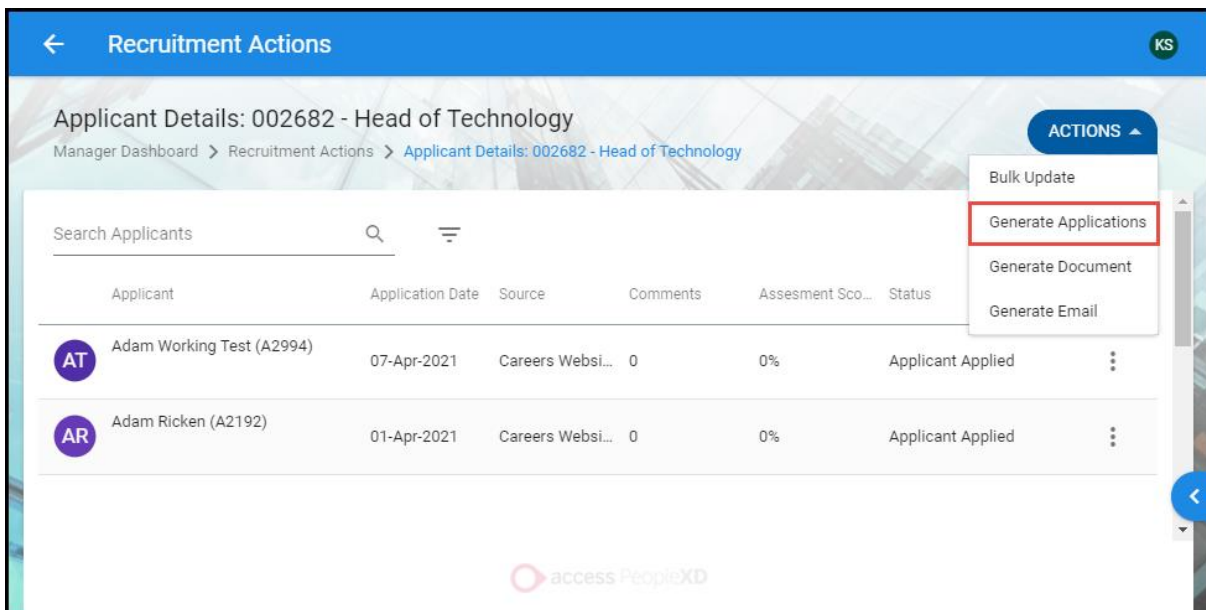

3.6. Interview Panel Access

As an interview panel member, you have access to generate the application pack based on the Vacancy and Applicants that you have access to.

The screenshot shows the 'Manager Dashboard' with a blue header. Below the header, the 'Recruitment Actions' section is active. The 'Interview Panel' tab is selected in the left sidebar. The main area displays a table of vacancies. A search bar is at the top. The table has columns for Start Date, Vacancy Title, Vacancy ID, Applicants, and Status. A row is visible for '28-Mar-2021', 'Head of Technol...', '002682', and '2' applicants. A dropdown menu is open for this row, showing options: 'View Applicants', 'Vacancy Details', and 'Edit Vacancy Status'. The 'View Applicants' option is highlighted with a red box.

Start Date	Vacancy Title	Vacancy ID	Applicants	Status
28-Mar-2021	Head of Technol...	002682	2	--

The screenshot shows the 'Recruitment Actions' section with a blue header. The 'Applicant Details: 002682 - Head of Technology' page is active. The left sidebar shows 'Applicant Details: 002682 - Head of Technology' as the selected item. The main area displays a table of applicants. A search bar is at the top. The table has columns for Applicant, Application Date, Source, Comments, Assessment Sco..., and Status. Two rows are visible: 'Adam Working Test (A2994)' and 'Adam Ricken (A2192)'. An 'ACTIONS' dropdown menu is open, showing options: 'Bulk Update', 'Generate Applications', 'Generate Document', and 'Generate Email'. The 'Generate Applications' option is highlighted with a red box.

Applicant	Application Date	Source	Comments	Assessment Sco...	Status
AT Adam Working Test (A2994)	07-Apr-2021	Careers Websi...	0	0%	Applicant Applied
AR Adam Ricken (A2192)	01-Apr-2021	Careers Websi...	0	0%	Applicant Applied
