

XD Recruitment

Key Concepts

Objectives

The objective of this session is to step through the key concepts of an organisation's recruitment cycle while understanding the XD Recruitment product.

What is Recruitment?

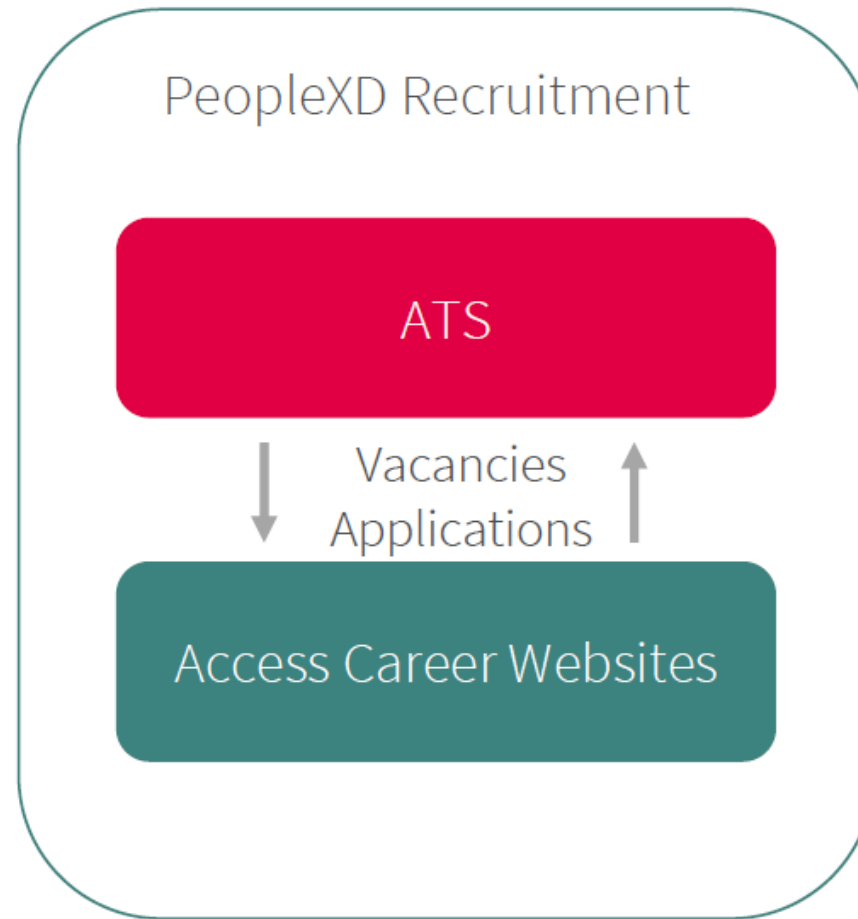

- Recruitment and resourcing involve attracting and selecting individuals into a job role.
- Recruiting the right individuals is crucial for organisations who need people with the right skills and capabilities to deliver their goals.

(CIPD, 2020)

What is XD Recruitment?

- Organisations require the right people, with the right skills in the right jobs at the right time. Recruitment is critical to this goal.
- To remain competitive in the area of recruitment, organisations must employ innovative recruitment approaches that match their strategic needs.
- The XD Recruitment solution adopts a three tier approach of *Attract* → *Engage* → *Hire* to enable organisations to fulfil their recruitment requirements in a timely and cost efficient manner.

XD Recruitment

What a Candidate Needs from an Organisation

Engagement

- Hiring organisation to keep in touch at every stage of hiring process.
- Build strong relationships
- Become excited about the new role

Transparency

- Understand the culture and values
- Set realistic job expectations
- Credibility & trust
- Authentic experience

Enriching Recruitment and Engagement Experience

Attract and Engage the Right talent

Transparent & Efficient Process

Welcoming Experience

What an Organisation Needs from a Recruitment Process

Employer Branding

- Authentic & positive employer brand
- Brand reputation motivates talent to apply
- Showcase values and culture

Right Hire, Right Time

- Build a robust pipeline of the right candidates
- Take control, reduce hiring spend
- Cut time to hire and increase efficiencies

Equal Opportunities

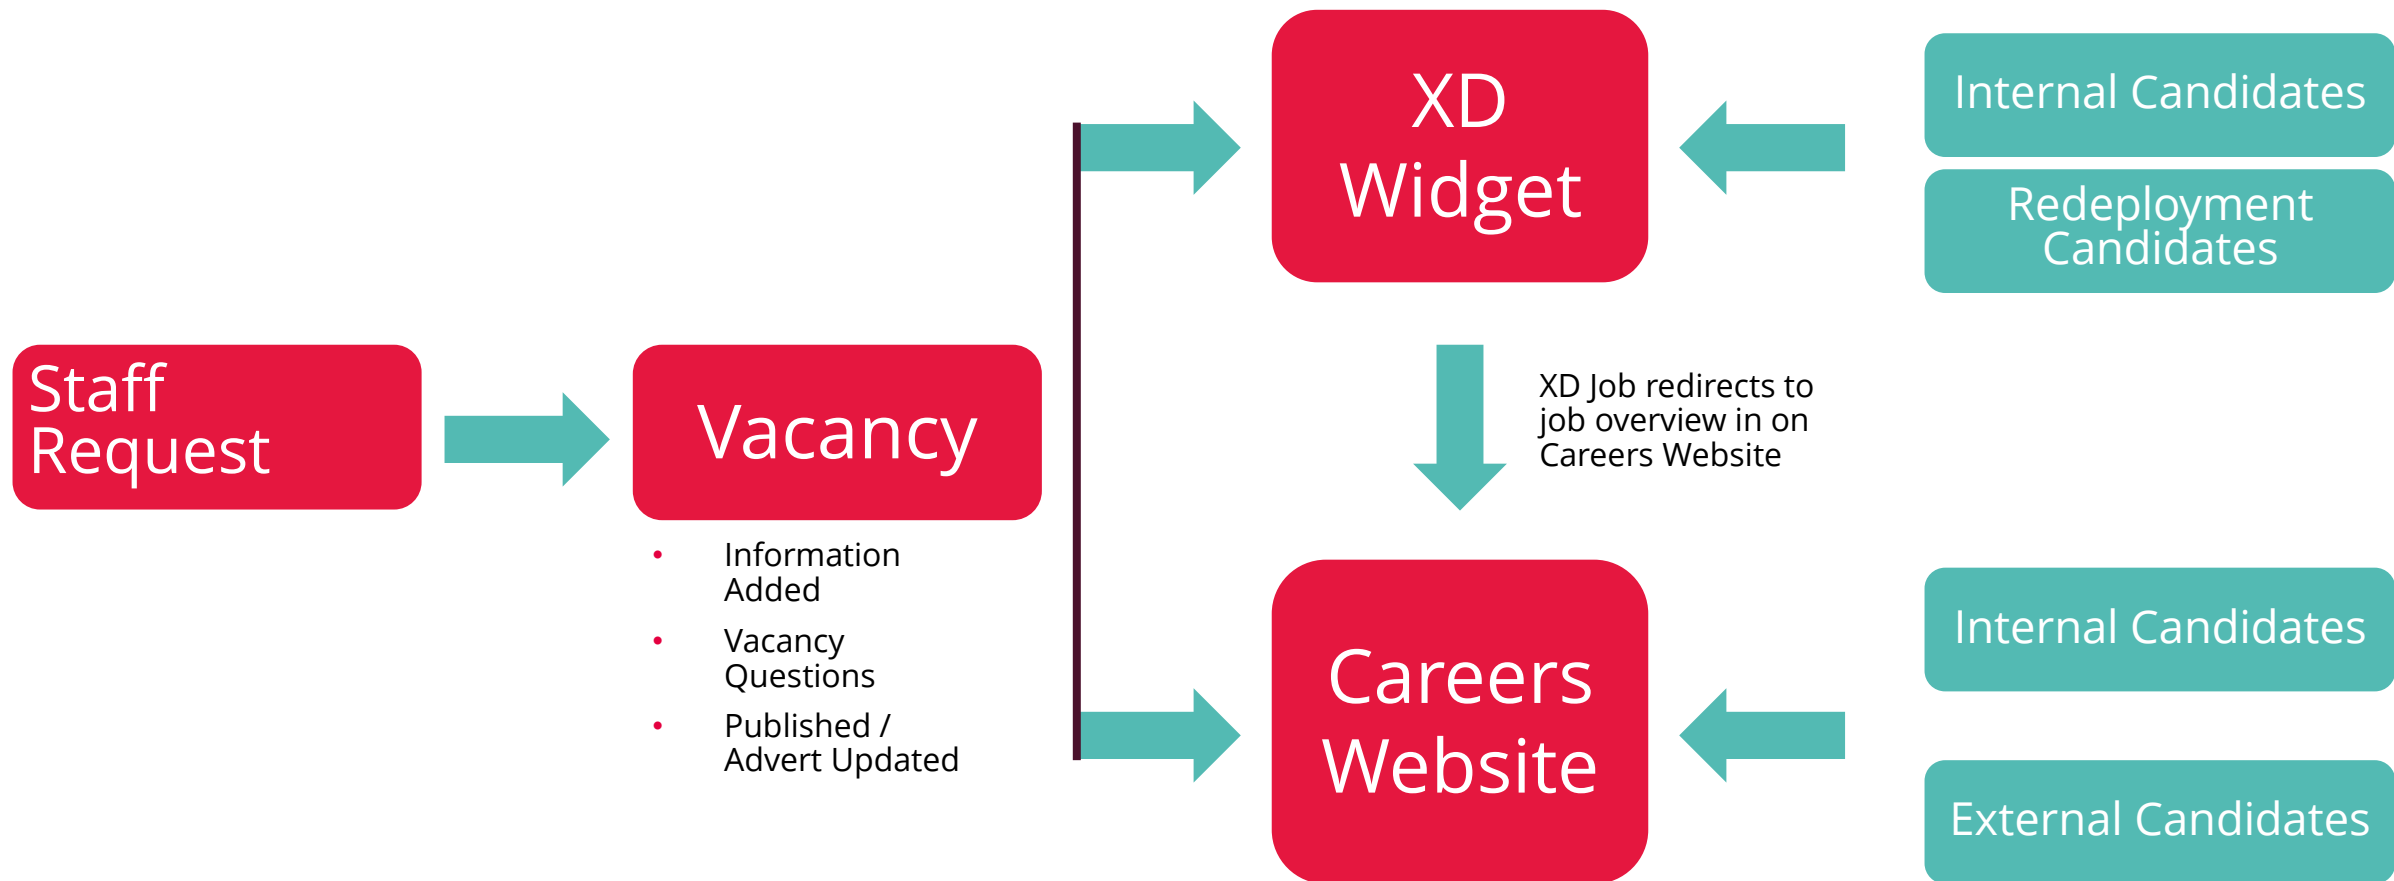

- Diverse and inclusive recruitment strategies
- Attract, engage and convert diverse talent
- Leverage technology to boost Diversity & Inclusion efforts

Recruitment vs Talent Acquisition

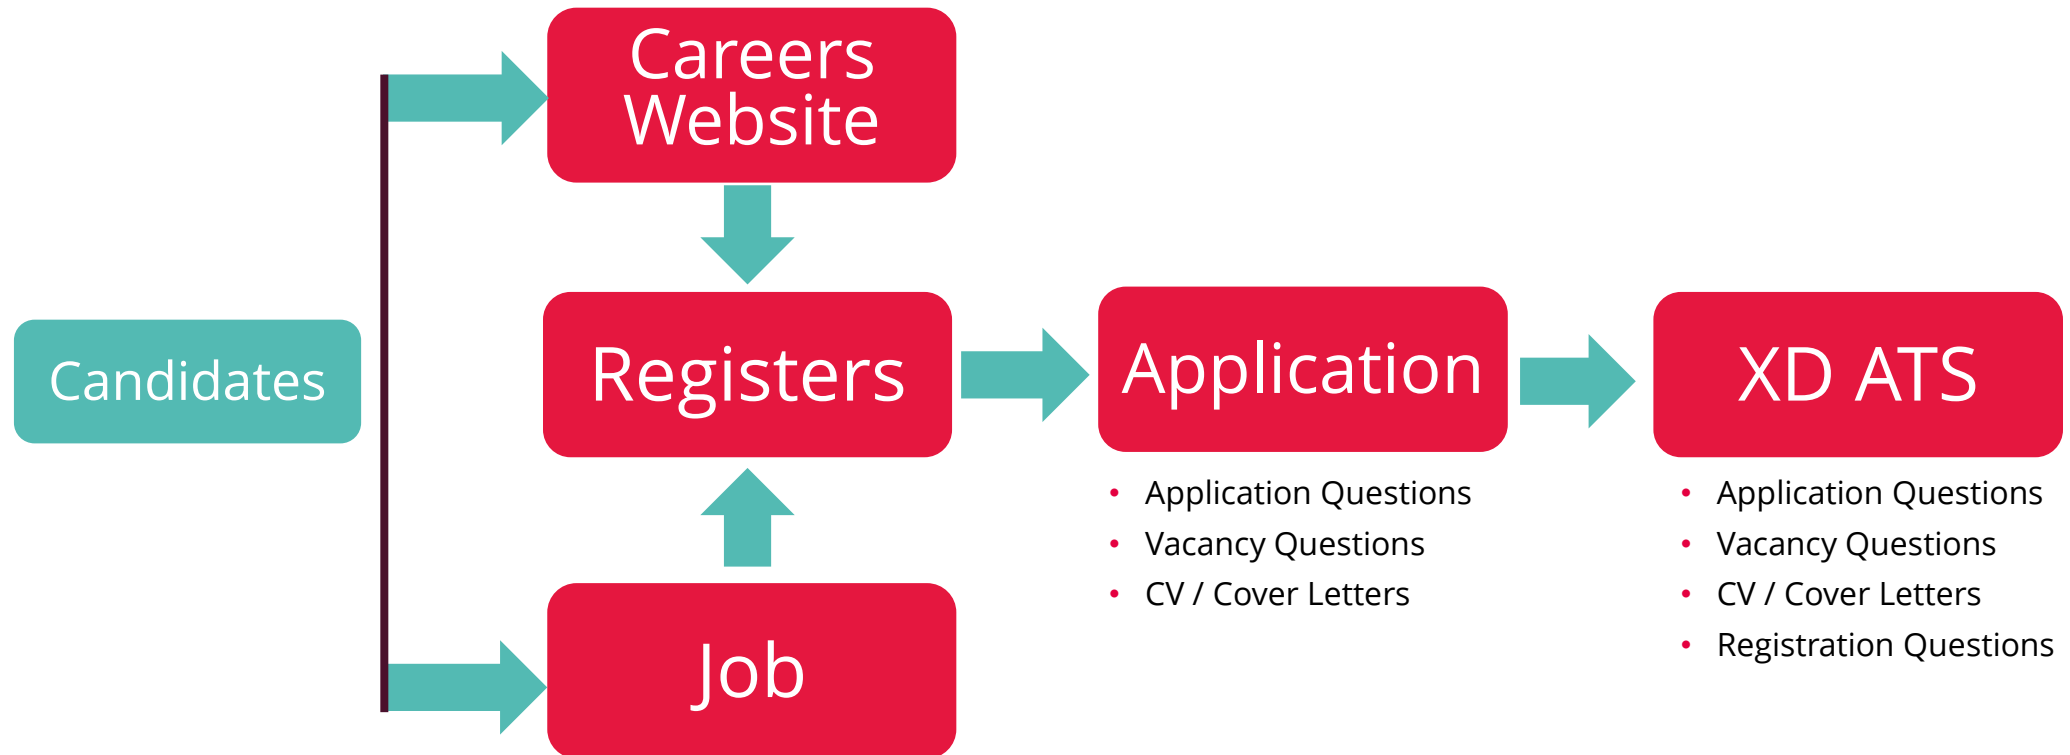

Recruitment refers to the broad action of matching candidates with employers.

Talent acquisition is meeting the company's hiring goals and the candidates career goals. They ensure both parties are satisfied with the process.

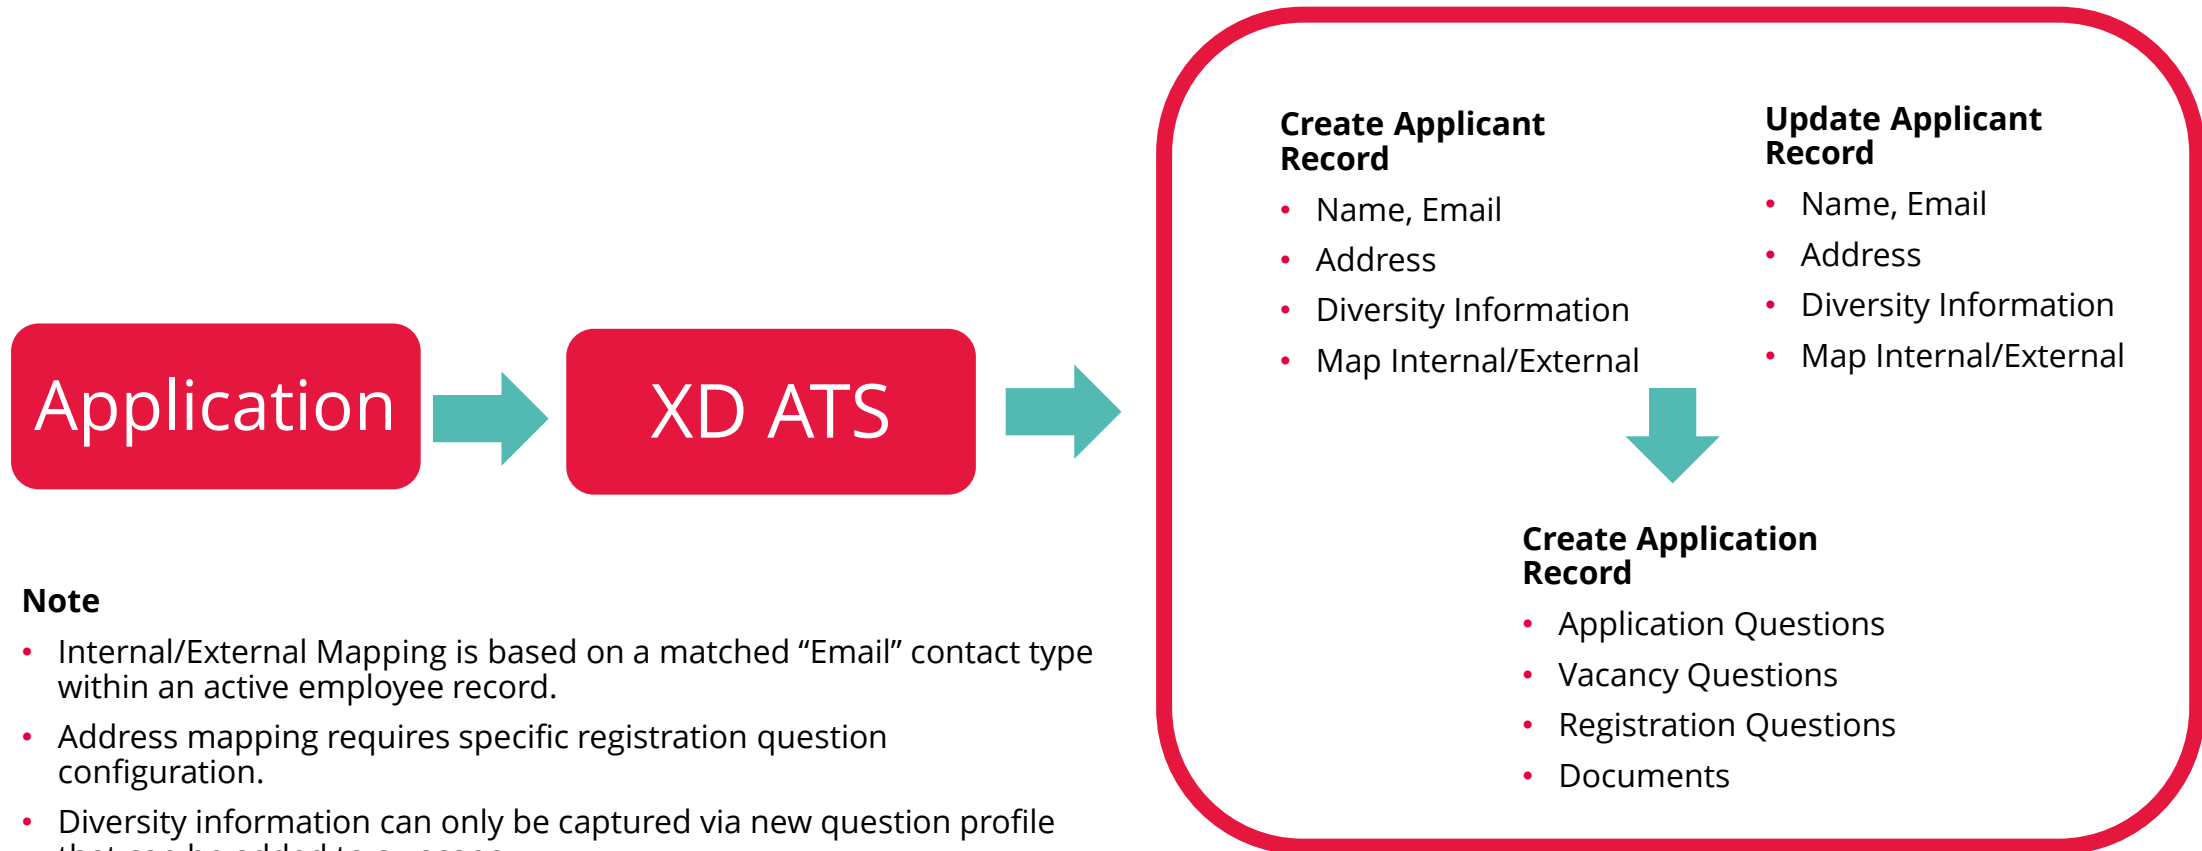

Vacancy to Job Advert

Candidate to Application

Processing of an Application

Note

- Internal/External Mapping is based on a matched "Email" contact type within an active employee record.
- Address mapping requires specific registration question configuration.
- Diversity information can only be captured via new question profile that can be added to a vacancy.

XD Recruitment Processes – Benefits of Streamlining!

- Always keeps candidate data current and accurate.
- Empowers managers to raise Staff Requests for backfill and new positions.
- All linked to XD People Management which allows a level of control in terms of what can be requested e.g. type of post, areas of the business the person can hire for, but also align to available budget/headcount
- Different Staff Request workflow approval routes which automates the creation of the vacancy, number of positions and information submitted from the form and it's ready for review and to be published

More Benefits of Streamlining your Recruitment Process

- Allows recruitment teams to manage all things that relate to the vacancy e.g. Details to advertise, publishing times, screening questions & knockout questions, application forms
- Creation and assignment of interview panels
- Creation of assessment score cards that are then completed by recruiter/panel member
- Pushing jobs to external boards via Broadbean integration
- Interview scheduling including candidate timeslot selection

Employer Brand

What is Employer Brand?

- Employer branding is a set of attributes and qualities, often intangible, that makes an organisation distinctive, promises a particular kind of employment experience, and appeals to those people who will thrive and perform best in its culture.
- Organisations can use an employer brand to help them compete effectively in the labour market and drive employee loyalty through effective recruitment, engagement and retention practices.

(CIPD, 2020)

Delivering on your Employer Brand Promise

Emotional connections drive brand loyalty.

- Beautiful and engaging career website that truly reflects your employer brand.
- Get candidates excited – showcase your company culture.
- Make candidates WANT to come and work for you.
- Gain a competitive edge in the battle for talent.

A strong employer brand attracts top talent, and nurtures them on their career path.

- A positive culture creates a positive employer brand
- A positive employer brand delivers a positive employee work experience by supporting their needs, their drivers, their requirements, and their performance.

Candidate Experience

What is the Candidate Experience

- The perception of a job seeker about an employer, based on the interaction during the complete recruitment process. This includes all points of contact during recruitment – job search, the application process, interview process and onboarding
- The successful delivery of a positive candidate experience is determined by the benefits and the limitations to success.
- The benefits include a fit-for-purpose career site, an effective employer brand and a highly targeted approach. The internal limitations that impact the effective delivery of a positive candidate experience are either operational or cultural.

(Journal of Business Strategy, 2013)

A Successful Candidate Experience is Driven by:

The People → The Employer Brand → The Job Itself → The Physical Environment → The Tech

- Providing a transparent, inclusive and authentic candidate experience.
- Delivering a frictionless experience at every stage of the candidate journey.
- Giving candidates the content that they need, so you get the talent you want.
- Delivering speed and convenience through a simple and efficient application process
- Using a modern, mobile-friendly user experience.
- Simple and easy navigation
- Job alerts to keep abreast of potential opportunities

Candidate to Employee Lifecycle Statistics

1. Up to 20% of employee turnover happens in the first 45 days (Society for HR Management, 2016).
2. c.69% of employees are more likely to stay with a company for three years if they experienced great on-boarding (Society for HR Management, 2017).
3. It typically takes eight months for a newly hired employee to reach full productivity (Harvard Business Review, 2015).
4. The organizational costs of employee turnover are estimated to range between 100% and 300% of the replaced employee's salary. (Harvard Business Review, 2015).

XD Recruitment Lifecycle

XD Recruitment Lifecycle – Part 1

- **Online Staff Requests:** The Online Staff request allows Line Managers to request an additional resource / FTE via new Vacancy.
- **Approval Process:** Once the Staff Request has been submitted it goes through a Workflow approval process.
 - This can be a single or a multi-layered approval process and can be assigned to various designated approvers.
- **Vacancy Creation:** After the Staff Request has been fully approved, a Vacancy is created.
- **Vacancy Management:** The Recruitment Administrator(s) populate any additional information to the vacancy and publishes the vacancy online.
 - Authorisation must be completed before the Vacancy can be displayed on the Careers Website.
- **Careers Website:** The Vacancy is now advertised based on the recruitment dates entered and applicants can apply for the vacancies

XD Recruitment Lifecycle – Part 2

- **Vacancy Management:** After the closing date for recruiting, the Recruitment team can be notified and the vacancy is automatically taken down from the Careers Website.
- **Applicant Management:** The Recruitment Admin team now starts shortlisting and start the interview process.
- **Successful Applicant:** At the end of the Interview process a successful applicant is selected and their Applicant Status is changed to Successful.
- **Employee Creation:** On acceptance of a Job Offer, an Applicant Status should be set to Applicant Accepted, and the employee can now be created within XD People Management, all using the same information as was used during the Application process.

XD Recruitment Process – Part 3

- The full recruitment process is tracked within XD Recruitment from applicants applying for a vacancy through to the offer and appoint stage of contract
- The successful applicant is picked up by XD People Management with all the relevant details
 - Typically the additional details to be added would be actual start date, payment details and PPS/NI number.
- Each Applicant is marked with different status' throughout the recruitment process (shortlisted, unsuccessful 1st interview, etc.) which is retained for historical purposes.
 - Notifications based on status i.e. Applicant Not Shortlisted or Applicant Invited to Interview can trigger an alert to the applicant automatically.
- The system can also generate PDF interview packs for interviewers. These are particularly useful for external interviewers that do not have XD Recruitment access

Staff Requests

What is a Staff Request

- A Staff Request is an online form that can be used to request a vacancy within an Organisation.
- Vacancies can be published to internal applicants only, external only applicants or both

Staff Request Form

An advantage of using Staff Requests is that there is a single point of data entry that flows through the entire People XD system (Staff Request can be set against existing posts in People Management, be fulfilled in Recruitment and then provide information for People Management with Successful Applicants, etc). This cuts down on iterative tasks and avoids duplication of work.

The Staff Request form is completed online through People XD. This form contains details of the request such as:

Topic	Description
Organisational Structure Attributes	Where in the Organisation is the vacancy required? For example, the vacancy could be required in the Finance Department
Financial/ Additional Attributes-	What cost centre is the vacancy-tied to? Where is it located?
Vacancy Title/ Type/ Vacancy Reason-	What is the title of the vacancy? For example, is it Permanent/ Fixed term, why is it required, etc.?
Planned Start Date & Duration of contract	When is the job planned to start?
Full Time Equivalent (FTE)	Is it a FTE of 1.0, 0.5, etc.?

Some fields can be labelled **mandatory**, more can be **hidden** (if not required), etc.

Please Note: staff requests are not a mandatory part of the Recruit XD system and do not have to be implemented.

NEXT

Staff Request Forms

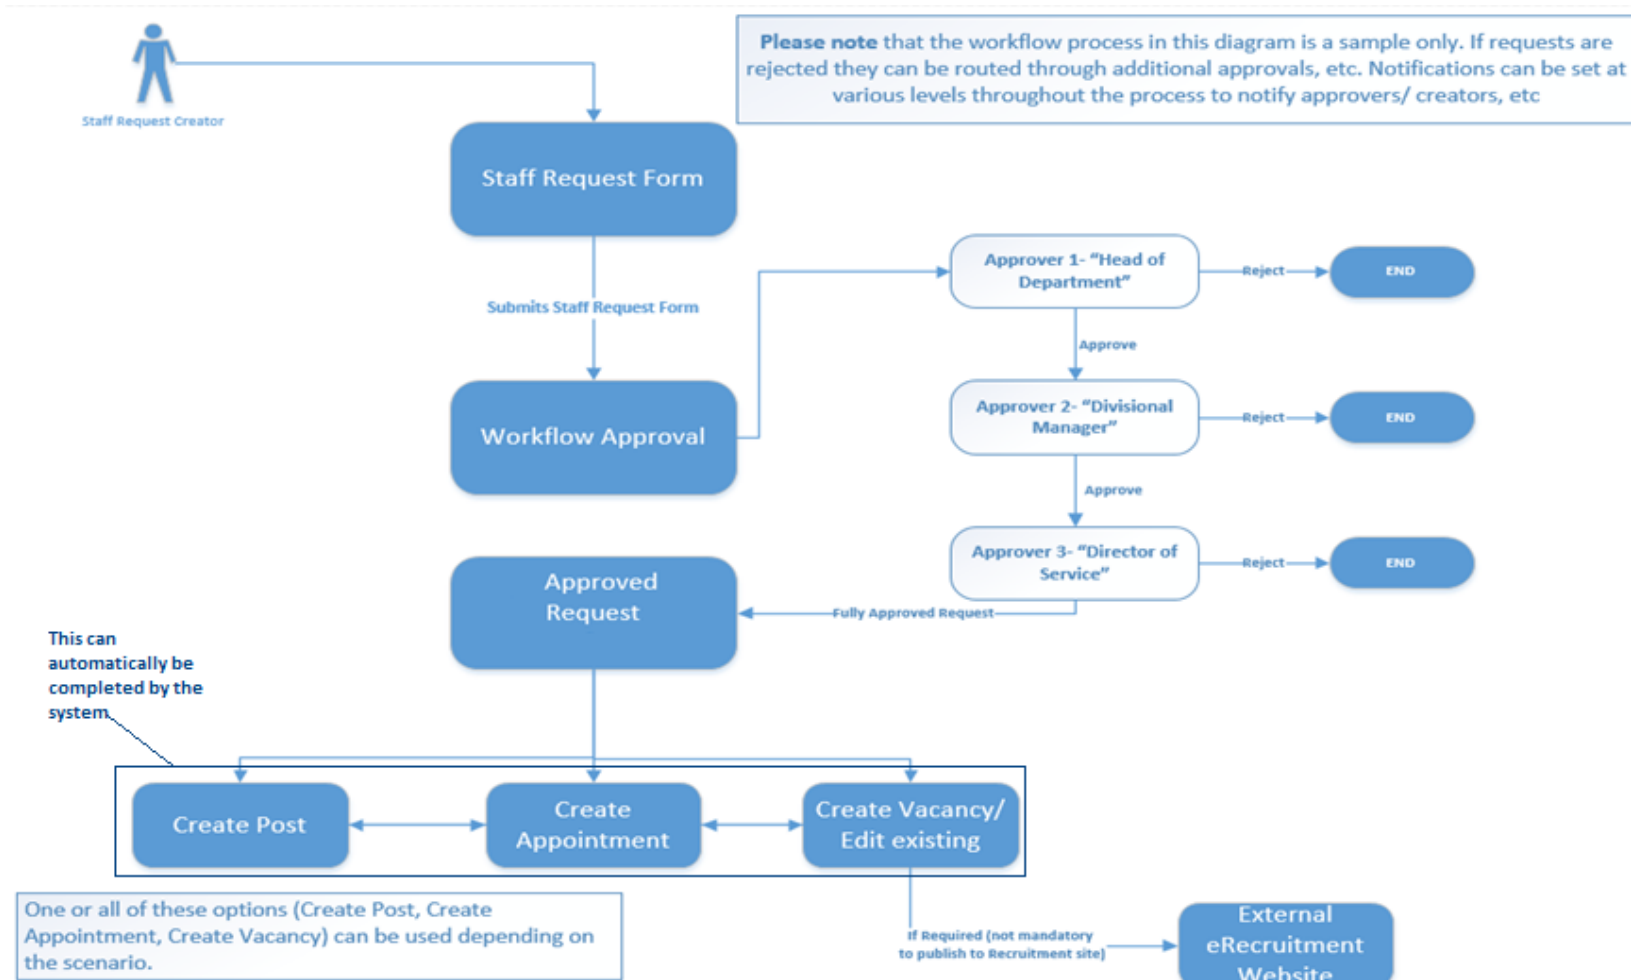

When completing the Staff Request form you can:

- Search for an existing post (Post Management sites only)- this means that you can search for a post and the post details against the Post will populate in the appropriate fields on the Staff Request form
- Create New Form from scratch- complete all mandatory fields
- Copy an existing staff request and change any details

Additional details such as Advertising details can be added to the request. Documents can also be attached.

Note that these are the planned details and can be changed later on in the process.

Staff Request Process

Staff Request Workflows

- Workflows can be configured based on the type of approvals needed for the staff request forms.
- For example, requests for casual staff may require two levels of approval due to the high volume of staff required. Staff requests for Senior Management could require 4 levels of approval.
- Multiple workflows can be configured in the system as well as multiple levels of approval per workflow. However, keep maintenance and complexity requirements in mind when configuring these.

Staff Request Approvals

- Email Notifications can be configured in the system to notify:
 - An approver if they have pending staff request(s) to approve
 - Staff Request Creators- to notify them of approvals/-rejections
- An approver will log onto People XD to approve/reject the request. Approvers may have other tasks in the system to approve such as leave requests, etc. so may be already familiar with the process.
- From past client experience, multiple email notifications can bombard a user and cause frustration- this can be switched off if required

Staff Request Approvals

If a Staff Request has been fully approved through the workflow cycle, this can then be used to:

1. Create a Post from the fully approved staff request
2. Create an Appointment from the fully approved staff request
3. Create a new vacancy or Edit an existing vacancy

Please note: one or all of these options can be completed. For example, you can create a post, plan an appointment and create a vacancy all together and carried out automatically.

Vacancy Management

Vacancy Creation

- Having created a vacancy, it can then be published to an Access Careers Website for internal candidates only or both internal and external candidates.
- It is possible to have multiple appointments/positions per vacancy, if required.
- An example of this would be for casual staff where multiple positions (Call Centre Operators) are required against one Call Centre Operator vacancy.

Vacancy Details

The Vacancy Status screen has been created to showcase when and where the Vacancy has been posted to online.

Publishing a Vacancy requires the following

- Mandatory items highlighted on the checklist
- Will only appear if the job is published on any channel
- When the Live Job is updated, all information is sent to the Careers Website again.

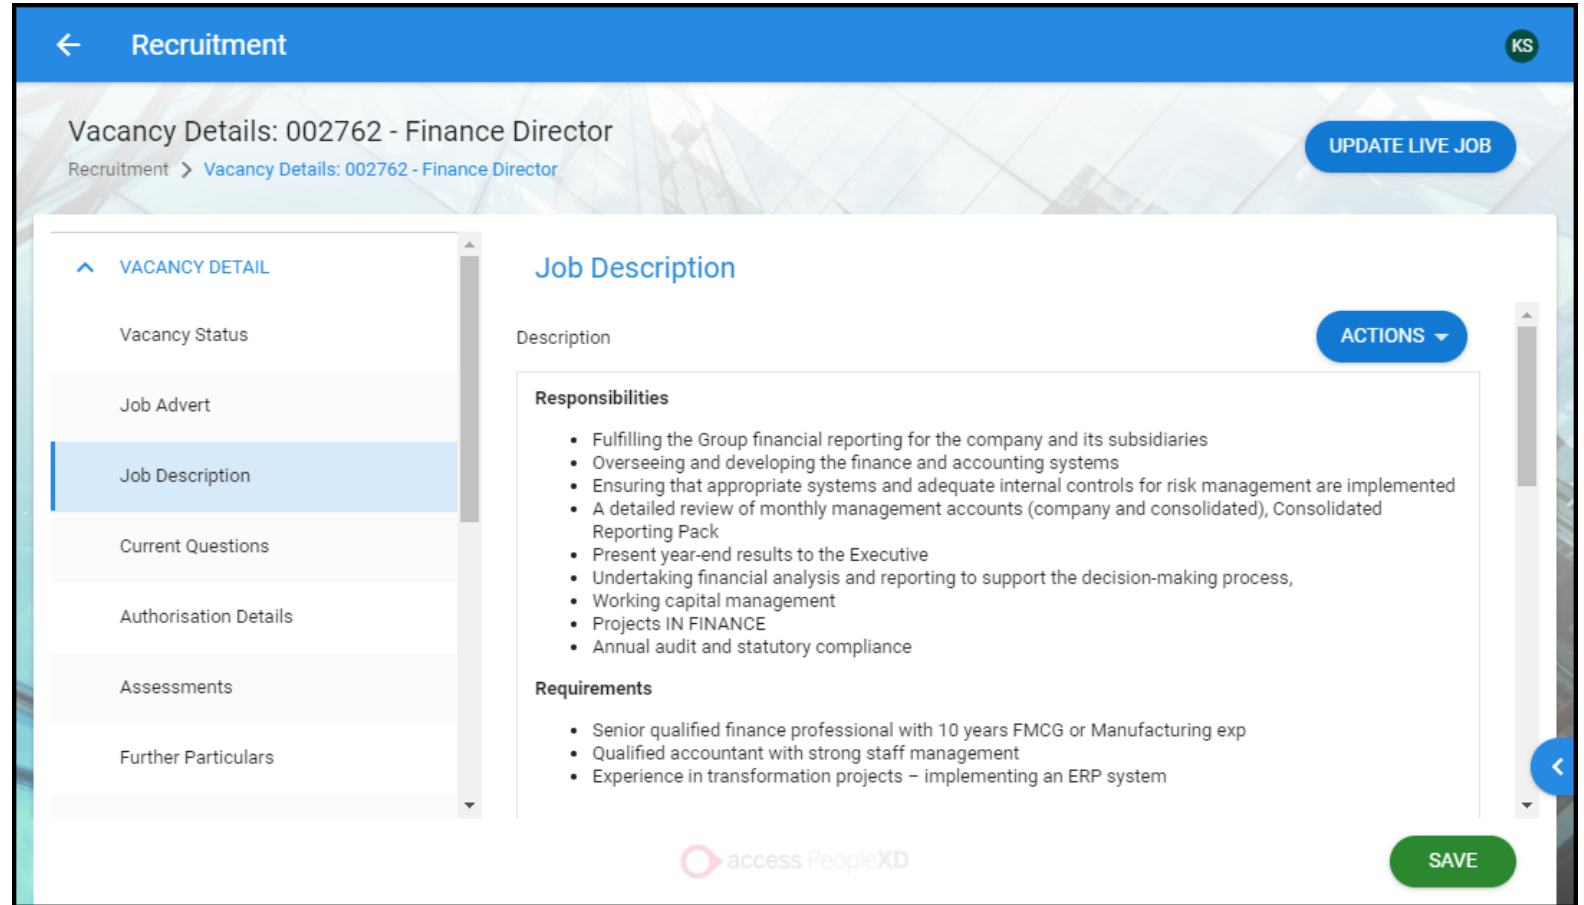

The screenshot shows the 'Recruitment' system interface. At the top, there's a blue header with a back arrow and the word 'Recruitment'. Below this, the page title is 'Vacancy Details: 002762 - Finance Director'. To the right of the title is a button labeled 'UPDATE LIVE JOB'. On the left side, there's a sidebar menu under the heading 'VACANCY DETAIL'. The menu items are: 'Vacancy Status' (which is highlighted), 'Job Advert', 'Job Description', 'Current Questions', 'Authorisation Details', 'Assessments', and 'Further Particulars'. The main content area is titled 'Vacancy Status' and contains a 'Checklist' section with three items: 'Job Advert Details', 'Job Description', and 'Vacancy Authorised', each with a green circle indicating it is complete. Below the checklist is a 'Job Posting' section. It has a table with columns: 'Advertise To', 'Open D...', and 'Clo...'. There are two rows of data. The first row is for 'Internal Candidates...' with dates '12-Apr...' and '09-...', a 'Live' status button, and links for 'PUBLI...', 'UNPU...', and 'RELIST'. The second row is for 'Internal and Extern...' with dates '01-Apr...' and '01-...', a 'Live' status button, and links for 'PUBLI...', 'UNPU...', and 'RELIST'. At the bottom right of the page is a green 'SAVE' button. The 'access PeopleXD' logo is visible at the bottom center.

Vacancy Details

The Vacancy Details holds information such as:

1. Job Advert Details
2. Job Description
3. Vacancy Authorisation

The screenshot shows the 'Recruitment' section of the 'access People' system. The main heading is 'Vacancy Details: 002762 - Finance Director'. Below this, there is a breadcrumb trail: 'Recruitment > Vacancy Details: 002762 - Finance Director'. A blue button labeled 'UPDATE LIVE JOB' is in the top right corner. On the left, a sidebar menu lists various sections: 'VACANCY DETAIL', 'Vacancy Status', 'Job Advert', 'Job Description' (which is highlighted), 'Current Questions', 'Authorisation Details', 'Assessments', and 'Further Particulars'. The main content area is titled 'Job Description' and contains a 'Description' field with an 'ACTIONS' dropdown. Below the description, there are two sections: 'Responsibilities' and 'Requirements'. The 'Responsibilities' section lists several tasks, including financial reporting, system development, risk management, and annual audit. The 'Requirements' section lists qualifications such as 10 years of experience, accounting skills, and ERP implementation experience. A green 'SAVE' button is located at the bottom right of the page.

Recruitment Disciplines

- Disciplines added to vacancies are reference data based.
- These can be maintained via People XD Data Centre.

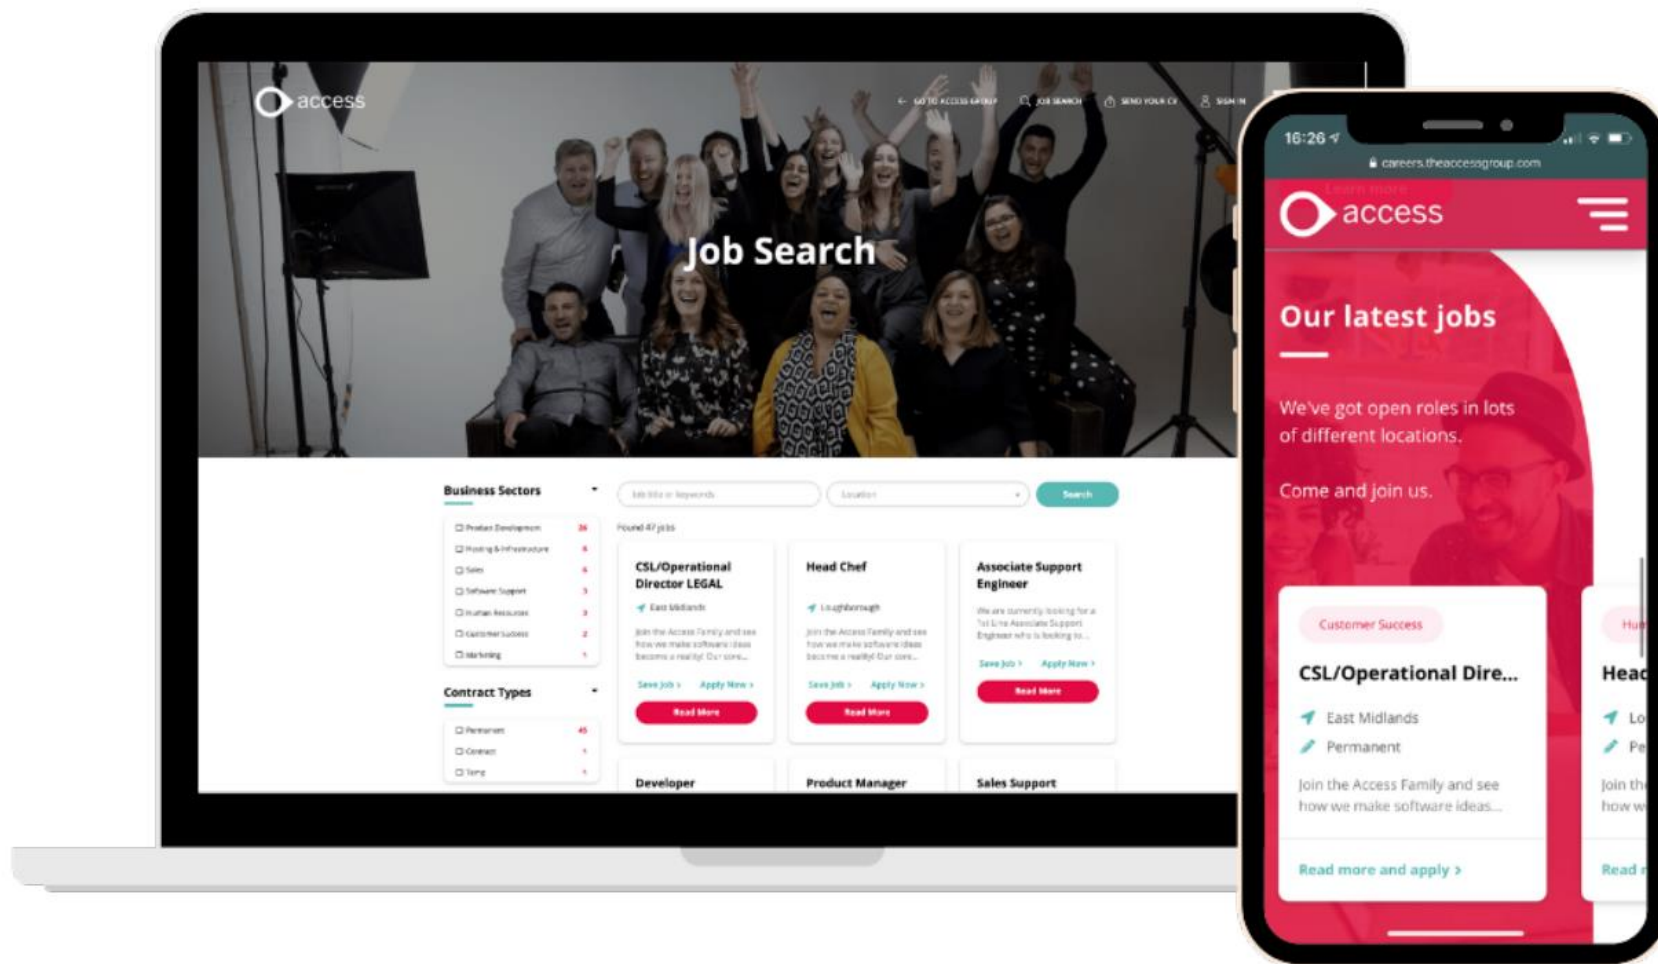

The screenshot displays the 'Recruitment' interface. At the top, a blue header bar contains a back arrow, the title 'Recruitment', and a user profile icon labeled 'KS'. Below the header, the main content area has a title 'Vacancy Details: 002502 - Head of Technology' and a breadcrumb trail 'Recruitment > Vacancy Details: 002502 - Head of Technology'. A blue button labeled 'UPDATE LIVE JOB' is positioned to the right of the title. On the left, a sidebar menu under the heading 'VACANCY DETAIL' lists five options: 'Vacancy Status', 'Job Advert' (which is highlighted with a blue bar), 'Job Description', 'Current Questions', and 'Authorisation Details'. The main content area on the right is titled 'Job Advert' and contains two form fields: 'Discipline *' with a dropdown menu showing 'Manufacturing Design and Innovation...' and 'Advertised Location' with a text input field containing 'Bandon, Cork'. At the bottom of the interface, there is a footer with the 'access PeopleXD' logo and a green 'SAVE' button.

Applicant Management

What is an Application Form

- Application forms allow for information to be presented in a consistent way. This makes it easier to collect information from job applicants systematically and objectively assess the candidate's suitability for the job.
- However, an unnecessarily long or poorly-designed application form can put candidates off applying. And it may be necessary to offer application forms in different formats to comply with discrimination law.

(CIPD, 2020)

Applicants

- Applicants can log into their own XD Portal and be flagged as internal applicant (an employee in the Organisation) and the Careers Website as an external applicant (not an employee).
- An applicant's history is kept against each vacancy they apply for.
- An applicant's registration details are stored and can be used again to apply for future vacancies.

Selection Process

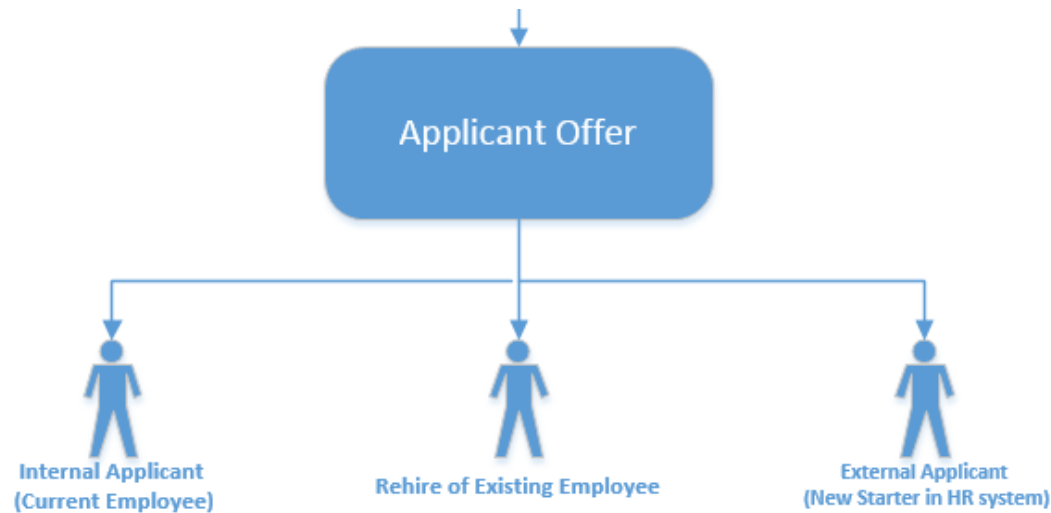

Selecting candidates involves two main processes:

- Shortlisting those who have the necessary skills to proceed to assessment stage.
- Assessing those candidates to find out who is most suitable for the role. See more on this stage in our selection methods factsheet which covers the various techniques and tools available to employers, and the importance of using valid and reliable methods.

Applicant Offers

If the staff request functionality is being used, the applicant offer details are based on the initial staff request, unless altered during the recruitment process. When an applicant has been flagged with a status of 'Applicant Offered', a vacancy administrator will be prompted to confirm/ amend the applicant offer.

When an applicant has accepted the offer the applicant is then available in XD People Management as a current employee who may have been promoted, etc., a rehire (existing employee) or a new starter.

Applicant Offers

- Offers of employment should always be made in writing. But it's important to be aware that a verbal offer of employment made in an interview is as legally binding as a letter to the candidate.
- Unsuccessful candidates should be notified promptly in writing and every effort should be made to provide feedback. If psychometric tests are used, feedback on the results, delivered by a qualified person, should also be offered.

Generating Application Packs

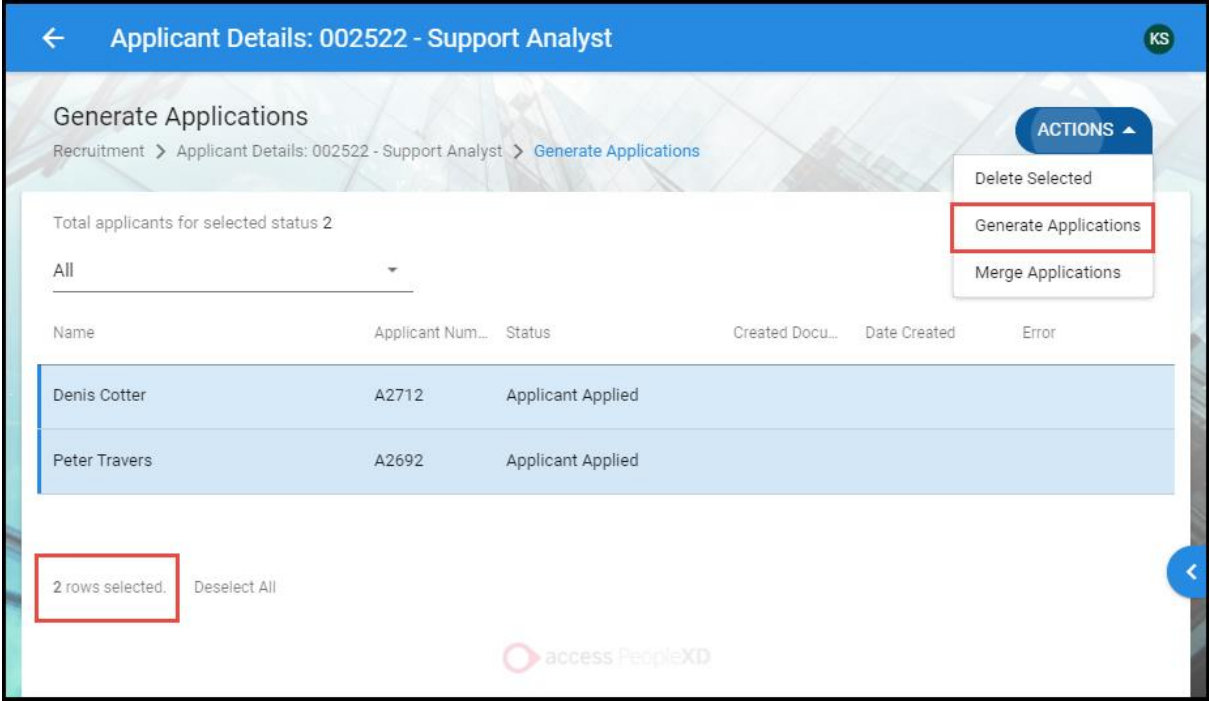

What is an Application Pack?

- For each selected application, all documents attached to the application which are not in PDF format e.g. word documents are converted into PDF format.
- An applicant's online application is then merged with all the pdf documents and the converted pdf documents.

Application Packs

The Generate Applications feature is used to make applications available in an interview pack.

All applicant details generated in the Generate Applications process can then be merged into one file which can then be printed out or attached to the vacancy, for interviewers as part of the interview pack.
