1. Overview

1.1. Purpose of this Guide

This guide explains the steps required to create a vacancy in recruitment via a staff request approval workflow.

When a vacancy is to be created on the system, the following steps need to be followed to ensure the correct validation:

- Initial configuration required.
- Setup of approval workflow and organisation roles.
- Creation of staff request record.
- How to approve and view approvals.
- How the vacancy will look once the staff request is fully approved.

1.2. What are Staff Requests?

The *Staff Request* functionality provides managers and recruitment administrators with the ability to submit online applications for additional resources to join their organisation.

When raising a staff request form, the requester must ensure that key job specific details are provided at the time of the staff request submission. These details will ultimately be used to create the advertised vacancy, and the contract(s) associated with this request.

Staff requests adhere to a work-flow process, whereby the request will be sent automatically to a series of approvers who can review the form and consequently approve or reject.

Approved requests will be used to:

- Create a vacancy in Recruitment, which will be pre-populated with the staff request details.
- Create the planned contracts that will be offered to successful applicants.

2. Staff Requests Process

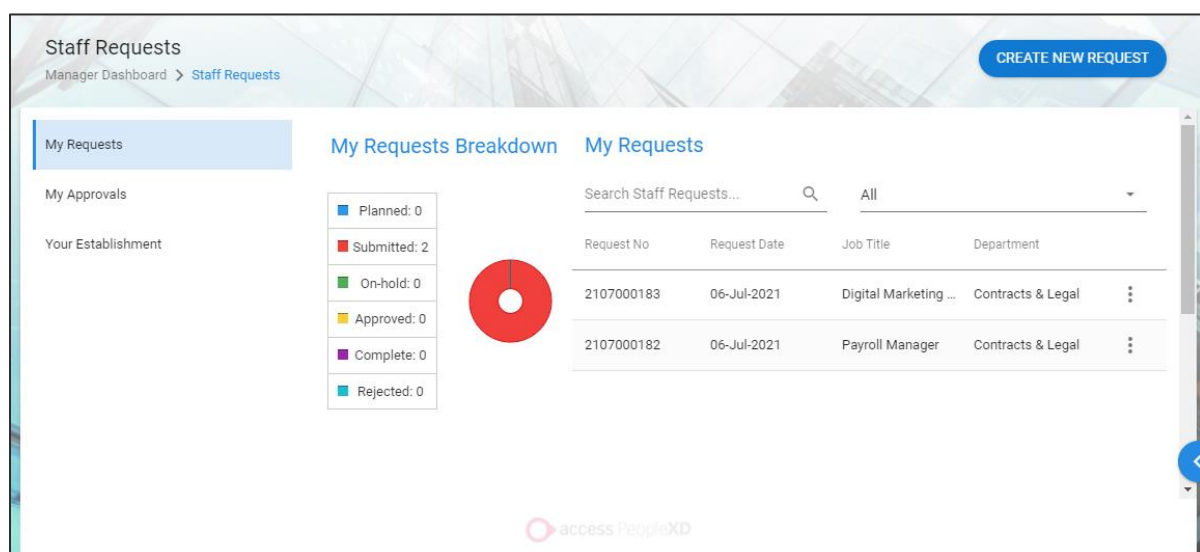

2.1. Accessing Staff Requests

The staff request feature can be added to the required dashboard e.g. Manager Dashboard, Employee Dashboard, Administrator Dashboard etc. to ensure that all required employees can raise or review staff requests at their convenience. The staff request feature is also available by default within the *Recruitment* dashboard.

2.1.1. Creating Staff Requests

To create a Staff Request, follow the below steps.

1. Navigate to *the Staff Requests* widget.
2. Click **View** on the Staff Request widget.
3. This opens the *My Requests* tab by default.

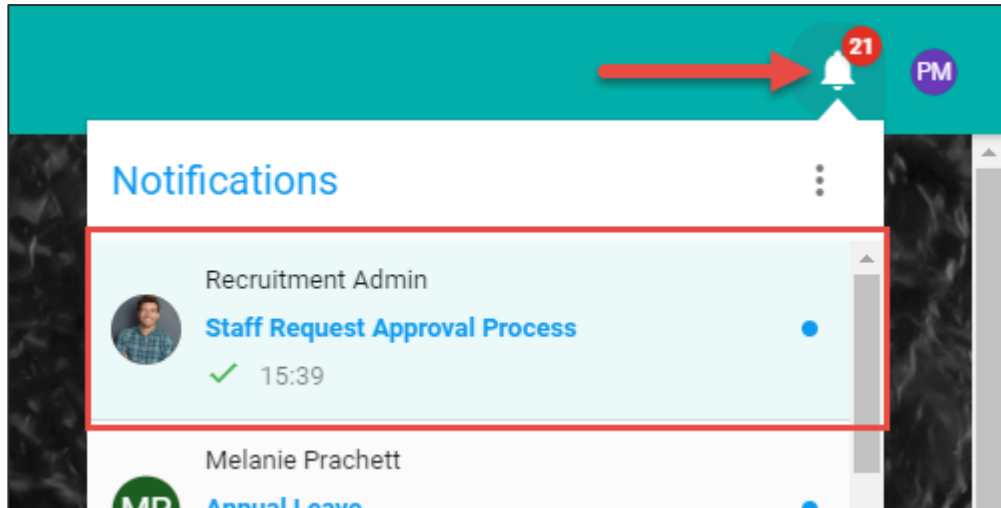

2.1.2. Approving Staff Requests

There are three ways that a manager can view outstanding staff requests awaiting their approval.

Notification Centre

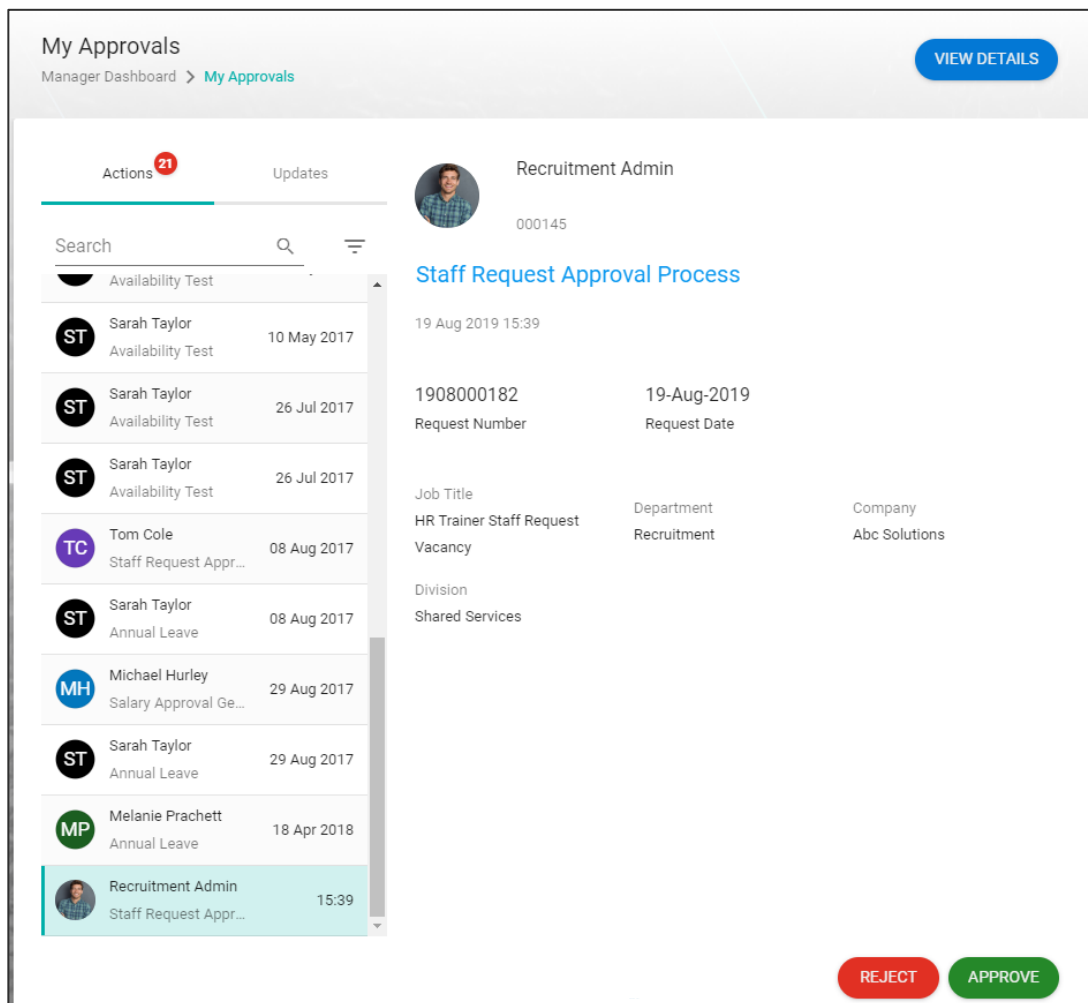

A manager will receive a notification, and this can be viewed on the notification centre.

1. Click on the Notification Centre button on the top right-hand side of the screen.

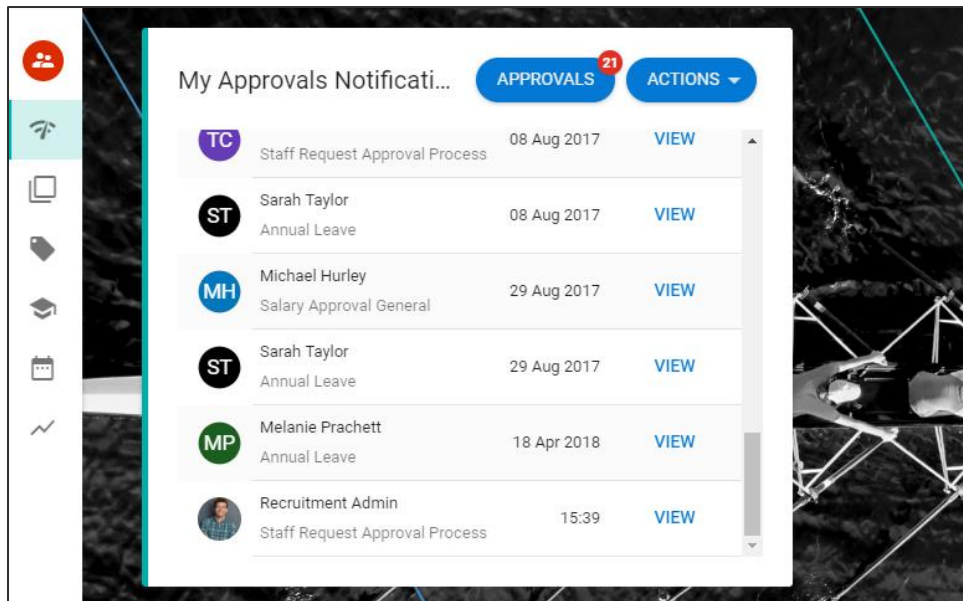

2. Click the notification

This opens up the notification centre fully, with additional details of the staff request.

My Approvals Notifications Widget

A widget can be added to the Manager Dashboard, showing the outstanding requests.

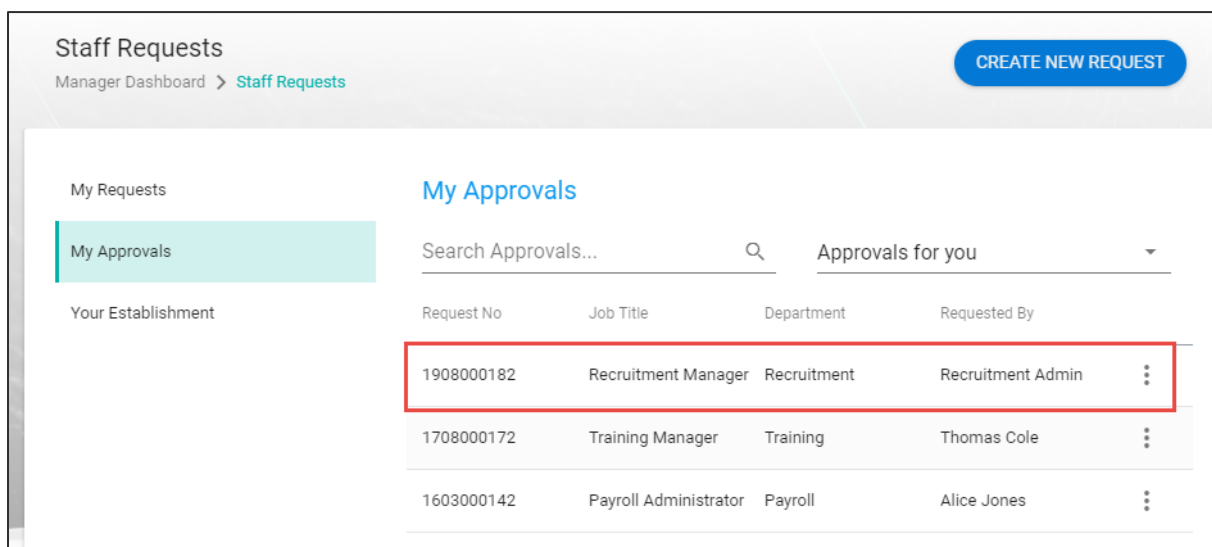

Staff Requests My Approvals Tab

A user can also view any outstanding approvals via the *My Requests* tab on the Staff Request screen.

1. Quick jump to the *Staff Requests* widget.
2. Click **View** on the Staff Request widget.

This will open the *My Requests* tab by default on the staff requests screen.

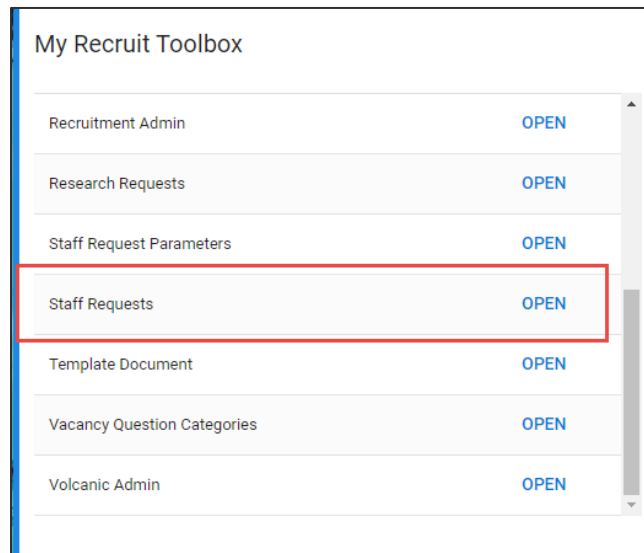

3. Click the **My Approvals** tab.

2.1.3. Recruitment Dashboard

To view Staff Requests via the Recruitment Dashboard, follow these steps:

1. Navigate to the Recruitment Toolbox.
2. Click **Open** on Staff Requests.

Note: The *Staff Request* screen that will appear for both managers and recruitment administrators will be the same. However, the functionality for each may differ depending on assigned menu profiles and organisational roles.

2.2. Using the Staff Request Screen

Within the *Staff Request* screen, managers and recruitment administrators can carry out the following key tasks relating to staff requests:

- Review your requests.
- Review approvals waiting for you.
- Review post-profiles within your establishment and create requests from these.

2.2.1. My Requests

Note: The *My Requests* section of the *Staff Requests* screen is the landing page.

This highlights all the staff requests that you have raised previously within the organisation. It also provides more in-depth details of:

- Request Number
- Request Date
- Job Title
- Department

The following table outlines the items on this screen:

Item	Explanation
Search Staff Requests	You can type key details relating to the chosen request here. For example, the department, job title, request date etc. The results returned will match the entered details.
Filter Drop-down	This gives you the option to filter staff requests based on the following statuses: • All • Planned • Submitted • On-hold • Approved • Complete • Rejected
 button	This allows you to Edit, Copy, or Delete the staff request selected. These options depend on the status of the staff request. For example, up until a staff request is submitted, you can Edit / Delete / Copy the request. Once submitted, the only options are to View / Copy .
Pie Chart	This provides a graphical representation of the status of all staff requests that you have raised.

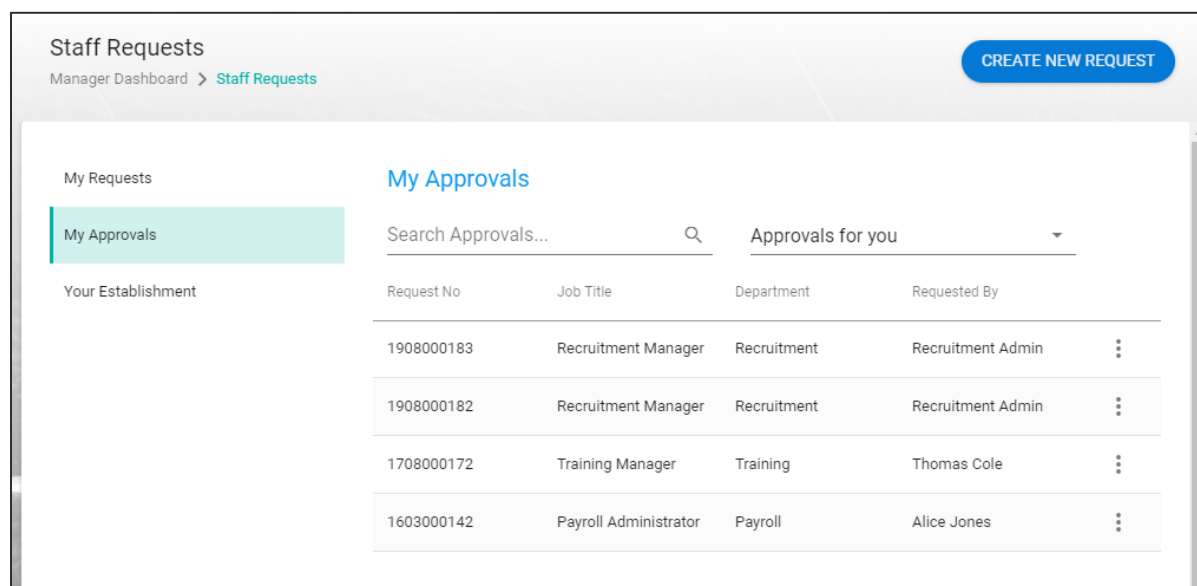

2.2.2. My Approvals

The *My Approvals* section of the *Staff Requests* screen is only applicable if you have been set up as a staff request approver. If you are not an approver, no data will display here.

For approvers, a list of outstanding staff requests will display on this screen i.e. all the staff requests that you have yet to action.

Further details of the request are also evident including:

- Request Number
- Job Title
- Department
- Requested By

It is possible to filter the staff requests within the *My Approvals* screen as per the following table:

Item	Explanation
Search Approvals	You can type key details relating to the chosen request here. For example, the department, job title, request date etc. The results returned will match the entered details
All drop-down list	This gives you the option to filter staff requests based on the following statuses: • Approvals for you • Outstanding • On-hold • Approved • Rejected
 button	This allows you to View the Approval and carry out the appropriate actions as per section 2.8 Approving Staff Requests .

2.2.3. Your Establishment

The *Your Establishment* section of the *Staff Requests* screen displays all active post profiles currently accounted for within the organisation.

Note: Please refer to section [4.3 Accessing Post Profile Data](#) on how to configure data access on this screen.

This option is crucial for the manager or the recruitment administrator to review whether there is available FTE for an existing post, to use in proposing the new staff request.

To get to this screen:

1. Navigate to the *Staff Requests* widget.
2. Click **View** on the Staff Request widget.
This will open the *My Requests* tab by default on the staff requests screen.
3. Click the **Your Establishment** tab.

Post No	Post Title	Department	Pay Scale	Cost Centre	Post FTE	Active FTE	Employee	Appointment
502194	**Do Not ...	zzDo Not ...	Personal ...	System C...	1	0		
502195	**Do Not ...	zzDo Not ...	Personal ...	System C...	3	3	Multiple ...	Multiple ...
502196	Ceo	Ceo	Personal ...		1	2	Multiple ...	Multiple ...
502197	Chief Fin...	Senior M...	Personal ...		1	2	Multiple ...	Multiple ...
502198	Chief Tec...	Senior M...	Personal ...		1	3	Multiple ...	Multiple ...
502199	Sales Ma...	Senior M...	Personal ...		1	3	Multiple ...	Multiple ...
502200	Administr...	Senior M...	Personal ...		1	8.5	Multiple ...	Multiple ...
502201	Training ...	Training	Personal ...		1	7	Multiple ...	Multiple ...
502202	System A...	Networks	Grade 3		3	7.4973	Multiple ...	Multiple ...
502203	Payroll M...	Payroll	Personal ...		1	5	Multiple ...	Multiple ...

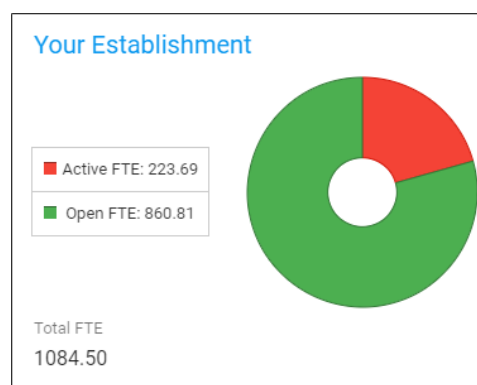

The *Your Establishment* screen contains further details on the post profile(s) such as:

Item	Explanation
Post No.	This is the distinct post number for the post profile.
Post Title	This is the name of the post profile.
Post FTE	This is the total headcount sanctioned for the post profile.
Active FTE	This is the number of employees currently working in that post.
Employee Name	This displays as 'Multiple Records' if more than one person is employed within that role.
Appointment Status	This shows whether the post is authorised, auto-commenced or auto-authorised.

By entering details on the *Advanced Filter* section and clicking **Apply**, you can filter the post profiles based on details such as:

- Company
- Division
- Management Unit
- Department
- Cost Centre
- Location
- Work Group
- Post Number
- Post Title

The *Your Establishment* screen also includes a pie-chart outlining the total amount of FTE accounted for within the organisation. This is broken down into Active FTE and Open FTE.

There are statistics outlining the retirees and contracts coming to an end within the next month:

Item	Explanation
Retirees	These are based on the retirement dates held against employee profiles.
Contract Ending	These are based on the contract end dates that exist on employee profiles.

2.3. Creating Staff Requests

2.3.1. Overview

There are three separate ways to create staff requests within a post management environment:

1. Create a **new** staff request.
2. Create a staff request using an **existing Post Profile**.
3. Create a staff request by **copying** a previous one.

When deciding which method works best for your organisation, it is important to remember the key comparisons that exist between each available option. The below table outlines these:

Method	Admin Involved	Establishment
New Staff Request	Additional admin involved as all details from the staff request form must be manually entered. Managers have the freedom to fully define contract details.	Creates new post profile in the system.
Existing Post Profile	Requests contain some pre-populated details as a time saving measure.	Creates a new contract against an already sanctioned post profile.
Copied Staff Request	Copied requests clone all information from the original request, and the user must then edit the staff request before submitting.	Creates a new post profile on the system.

Note:

- The recommended method to raise staff requests is by using existing post profiles as this method will only create contacts against already sanctioned posts. Therefore, your post profile levels are always controlled with no risk of accidental additions.
- However, the choice to use any three of the three staff request approaches is fully acceptable at all times i.e. staff requests can be created in multiple ways, dependent on your organisations own requirements.

2.3.2. Creating a New Staff Request (Manual Option)

To create a new staff request manually:

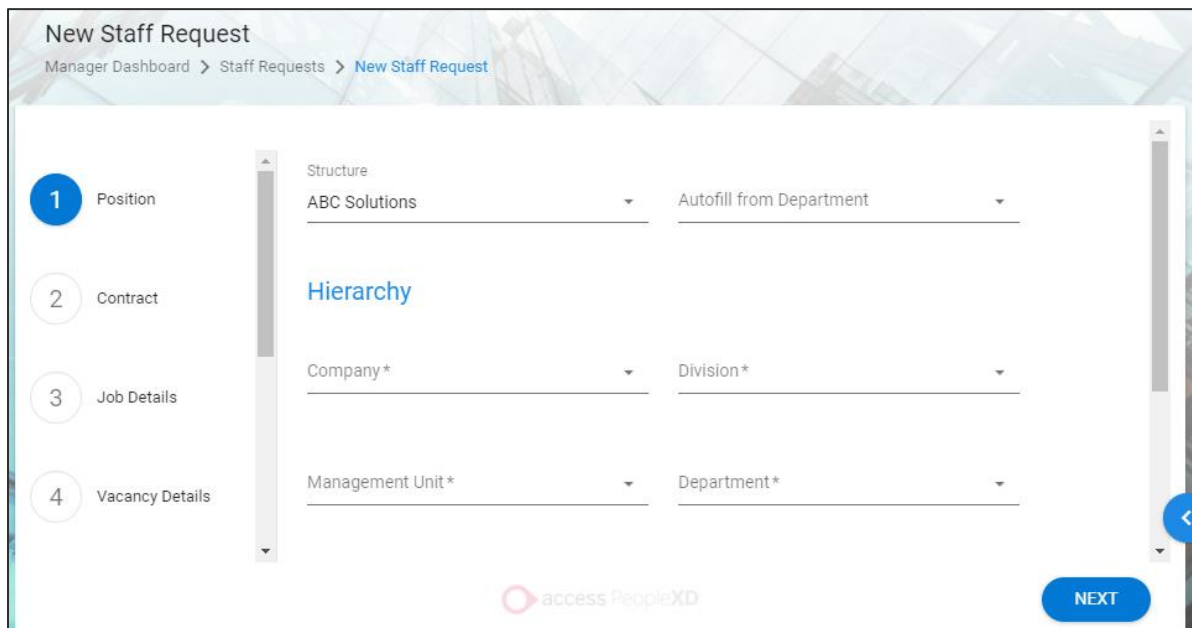

1. Navigate to the *Staff Requests widget*.
2. Click **View** on the Staff Request widget.

This will open the *My Requests* tab by default on the staff requests screen.

Note: Before raising new request, it is crucial to remember that a new request may lead to a new post profile being added to your organisational records, depending on how the setting “Automatically create post profile, post appointments and vacancy link” is configured from section [4.4.2 Updating Staff Request Parameters](#).

3. Click **Create New Request**.

The staff request wizard automatically opens.

The staff request wizard acts as the proposal form for the new hire. Here, the manager or recruitment administrator manually enters position, contract, job, vacancy, documentation, advertising, and cost details associated with the proposed position.

It is possible to tailor the fields within the staff request form in accordance to your organisational needs. See section [4.4.2 Updating Staff Request Parameters](#) to review how to update these fields.

Note: When using auto vacancy/posts upon staff request approval option, the following fields should always be set as mandatory:

- *Position:*
 - Location
 - Work Group
- *Contract Details:*
 - Employee Status
 - FTE
 - Hours
 - Pay Scale
 - Planned Start Date
 - Positions Required
- *Job Details:*
 - Job Title
- *Vacancy Details:*
 - Position Type
 - Vacancy Type

While not compulsory, time should be taken to complete as much of the staff request form as possible when creating a new request. This is for the following reasons and benefits:

Reason	Explanation
Information Purposes	The more detail that is provided at the time of the staff request, the more that the approver will understand the need or implications of the role.
Vacancy Details	Details entered within the staff request will form the base record of the vacancy which can be seen on the <i>Vacancy Detail -1</i> and the <i>Vacancy Details -2</i> screens on the vacancy.
Contract Details	Details entered within the wizard will form the basis of the successful candidate's contract, to be seen at offer stage and on the new starter wizard.

Note: If you are adhering to an automatic vacancy/post creation upon staff request approval, the mandatory fields are marked with an asterisk throughout the corresponding screens.

Step 1: Position

The Organisational Hierarchy displayed is dependent on the configuration of your organisation's structure. Any fields included in the hierarchy will also display within the *Position* screen.

The screenshot shows the 'New Staff Request' form in the 'Position' step. The breadcrumb trail is 'Manager Dashboard > Staff Requests > New Staff Request'. The sidebar on the left lists four steps: 1. Position (active), 2. Contract, 3. Job Details, and 4. Vacancy Details. The main form area contains a 'Structure' dropdown menu with 'ABC Solutions' selected, and an 'Autofill from Department' dropdown. Below these is a 'Hierarchy' section with four required dropdowns: 'Company*', 'Division*', 'Management Unit*', and 'Department*'. The 'access PeopleXD' logo is at the bottom center, and a blue 'NEXT' button is at the bottom right.

The following fields are based dependent on the company's hierarchy definition:

Field	Explanation
Structure	The legal entity that the role will be a part of.
Company	The organisation that the role will fall under.
Division	The sector of the business in which the role will operate.
Management Unit	The specific business unit or work area that the role will run in.
Department	The department that the position will be located in.
Cost Centre	The part of the organisation to which costs of this role will be charged to for accounting purposes.
Location	The physical location of the role to be filled.
Work Group	The group within the organisation who work together that this vacancy is to be a part of.

To populate the *Position* screen, follow these steps:

1. Select the *Structure* from the drop-down list.

2. Select the *Hierarchy* items. These will be linked to the Organisational Hierarchy Data Tree.
3. Select any non-hierarchy items to be added to the request from the drop-down lists.
4. Click **Next** to proceed to the *Contract* screen.

Step 2: Contract

The majority of the data asked for within the *Contract Details* screen is mandatory, if you are adhering to an automatic vacancy / post creation upon staff request approval.

New Staff Request

The table below outlines each item on screen:

Section	Item	Explanation	Mandatory
Contract Duration	Request Date	The date in which the staff request form is submitted.	Y
	Planned Start Date	The intended date in which the new hire will commence.	Y
	Planned End Date	The proposed contract end date for this hire.	N
	Contract Duration	Free-text box which allows the manager to input the number of weeks in which the contract will run. If permanent, this section can be left blank.	N
Category & Status	Employee Status	The work category that the employee will fit into whilst employed, i.e. Permanent, Fixed Term, Trainee, etc	Y
Contract Details	Hours	The hours per week that the proposed hire will be contracted to complete.	Y
	FTE	Highlights whether this role will be a full-time or part time etc.	Y
	Pay Scale	The salary grade which the proposed hire will receive.	Y
	Positions Required	Number of new hires proposed.	Y
	Budgeted	The budgeted indicator is for information purposes only - It allows the approver to learn whether the role was financially planned within the organisation	N

To populate the Contract screen, follow these steps:

1. Input all details within the *Contract Duration* section.
2. Input all details within the *Category & Status* section.
3. Input all details within the *Contract Details* section.
4. Click **Next** to proceed to the *Job Details* screen.

Note: As part of section [4.4.2 Updating Staff Request Parameters](#), there are additional field options that can be added to the Contract screen to enhance the data captured and give more visibility to the approver of the job to be advertised.

Step 3: Job Details

The *Job Details* section of the staff request wizard records the proposed job title details, and may act as the basis of the advertised vacancy on the recruitment website, should this staff request be approved.

The table below outlines each item on screen:

Item	Explanation	Mandatory
Vacancy Type	The broad work category that the role will fall into.	Y
Position Type	Reason for why the role has become a requirement, i.e. New Position.	N
Vacancy Reason	Free text field which allows the requester to populate details on why the role is needed.	N
Org Unit	The company division where this role will sit (free-text field).	N
Grade	Free text field whereby details of the salary grade/pay scale is entered. This may be pre-populated, based on the Pay Scale selected on <i>Step 2: Contract</i> , if Pay Scale Bands are in use (see Pay Scale Bands user guide).	N
Contact Person	The employee in which this role is most associated with, who will be the contact person for the advertised vacancy.	N
Email	Email address of the contact person.	N

Phone	Phone number of the contact person.	N
Further Particulars	Any further details the requester wishes to include.	N

To populate the Vacancy Details screen:

1. Input all mandatory details and additional fields to enhance the staff request.
2. Click] **Next** to proceed to the *Documents* screen.

Step 5. Documents

Within this section of the staff request wizard, you can attach any supplementary documentation that may support your case in asking for the request to be approved. For Example:

- Job Description document
- Department / Function description
- Statement of value of adding this role to the business

Within this screen, you can upload a document to the request. To carry this out:

1. Click **Upload**.
This opens the *Upload* screen, where you can either drag and drop files onto the upload area, or click to find a file from a location on your device.
2. Click **OK** once you are happy with the file that has been uploaded.
Once the file(s) have been uploaded, you have the option to either delete or download the file.
3. Click the  to **Download** a copy or to **Delete** from the request.
4. Click **Next** to proceed to the *Advertising* screen.

Step 6. Advertising

Note: The *Advertising* section of the staff request wizard is an optional feature.

If you have specific preferences on which advertising publications your organisation should use for this vacancy, you can record details within this step.

ADD

PREVIOUS NEXT

Within this section, you can add four advertisers to the staff request and monitor any costs. To do this:

1. Select an advertiser from the drop-down lists *Advertiser One - Advertiser Four*, as required.
2. Enter a *Comment*, which can be used to explain why you have selected the advertiser(s) above.
3. Click **Add** to enter in appropriate costs against any external advertiser:
 - a. Enter *Cost Centre* details from the drop-down list.
 - b. Enter *Account Code*.
 - c. Enter *Job Code* details from the drop-down list.
 - d. Enter a *Percentage* of the cost. This can be split up between a number of cost centres etc. These percentage values must add up to 100% to proceed.
4. Click **Next** to proceed to the *Cost Allocations* screen.

Step 7. Cost Allocations

The *Cost Allocations* step highlights details of where the requester intends to allocate the cost of this new hire to. This feature is mainly used to highlight the cost centres applicable, the dates in which the expense occurs, and the total percentage of cost allocated to each cost centre.

To assign a cost centre to the request:

1. Click **Add**, which opens a new editable line to enter in cost centre details.

Edit Staff Request (1908000187)
Manager Dashboard > Staff Requests > Edit Staff Request (1908000187)

Assign Cost Allocations

ADD

Cost Ce...	Project	Expense	Date From	Date To	Percenta...	
						CLEAR

PREVIOUS **NEXT**

2. Select the following items to include on the cost centre entry:
 - a. Cost Centre
 - b. Project Code
 - c. Expense Code
 - d. Date From
 - e. Date To

- f. Percentage. These percentage values must add up to 100% to proceed.
3. Click **Next** to proceed to the *Summary* screen.

Step 8. Summary

The *Summary* section is the final part of the staff request form. It displays the following key details relating to the new request:

- Job Title
- Department
- Location
- Pay Scale
- Planned Start Date
- Vacancy Type
- FTE
- Positions Required

The purpose of this screen is to review the fundamental elements that make up the staff request to ensure everything is correct before submitting. Should any details need to be changed, you can go back to the relevant sub-section to make amendments. This is done by clicking the relevant step along the left-hand side of the screen to skip back and forth between steps.

To proceed with sending the staff request:

1. Click **Save**. A confirmation message will appear on screen to confirm the request has been saved successfully.
2. A pop-up message will also appear giving you the option to submit the staff request straight away as soon as you save.
 - a. Click **Yes** to submit.
 - b. Click **No** to save and return to the request to submit at a later stage.

Note:

- Once the staff request has been submitted for approval, no changes can be made. Therefore, it is important to take care when reviewing the summary screen.
- Once the staff request has been saved, it can be submitted at any time.

2.3.3. Creating a Staff Request using an Existing Post Profile

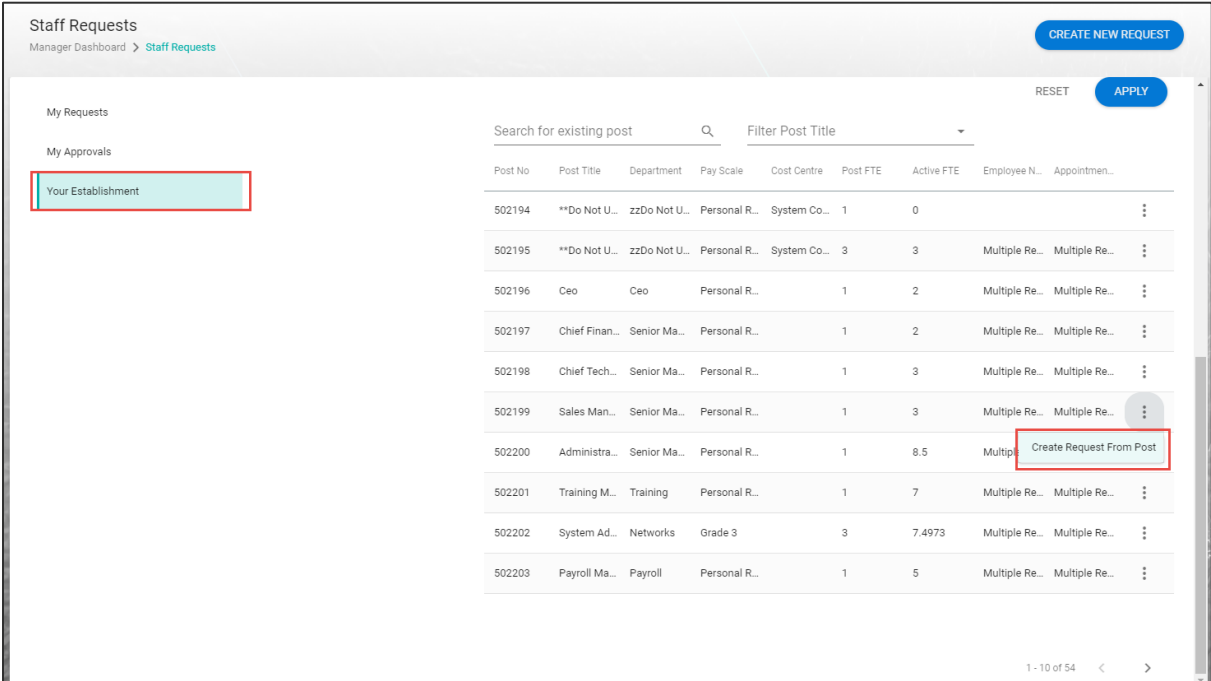

Note: If you intend to create a new post profile record, this method should not be used.

Creating a staff request from a post profile that already exists on the system means that data is pre-populated on the request from the post profile. By adhering to this process, your organisation will have full control over managing post profile records. This leaves no room for the accidental error of creating a new post profile within the organisation when raising staff requests.

Note: Please refer to section [2.2.3 Your Establishment](#) for details on how to use this screen.

To create a request using an existing post profile:

1. Navigate to the *Staff Requests* widget.
2. Click **View** on the Staff Request widget.
This opens the *My Requests* tab by default on the staff requests screen.
3. Select the **Your Establishment** tab.
4. Search for the post you require.
5. Click on the  button and select the **Create Request From Post** option.

The screenshot shows the 'Staff Requests' interface. On the left, the 'My Requests' tab is active, and the 'Your Establishment' sub-tab is selected. The main area displays a table of post profiles with columns: Post No, Post Title, Department, Pay Scale, Cost Centre, Post FTE, Active FTE, Employee N., and Appointmen... (truncated). The table lists 10 post profiles. In the actions column (indicated by three dots), the 'Create Request From Post' option is highlighted for the post with ID 502200.

There are some further mandatory details that have not been pre-populated that can be manually entered within the staff request wizard. Please refer to section [2.3.2 Creating a New Staff Request \(Manual Option\)](#) as these will be the same fields.

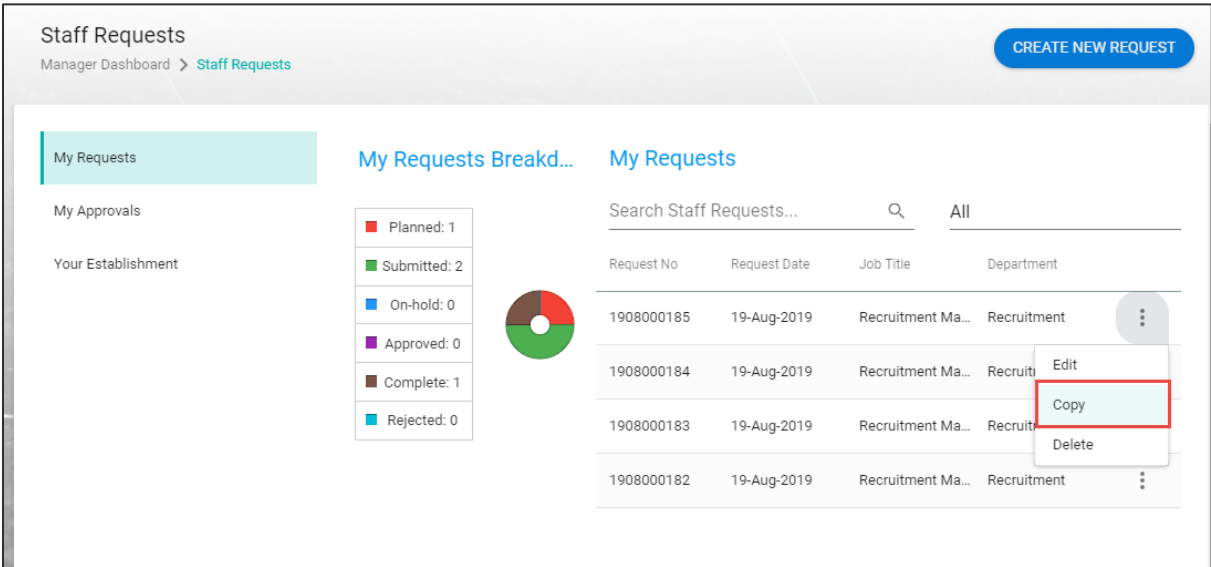

It is at your discretion whether you now want to input the further information fields within the wizard.

2.3.4. Creating a Staff Request by Copying an Existing Staff Request

As a time saving measure, previous staff requests can be copied, with the option of editing the details before submitting for approval again. This is used predominately when a staff request has been rejected and the process needs to begin again.

To copy a staff request:

1. Navigate to the *Staff Requests* widget.
2. Click **View** on the Staff Request widget.
This will open the **My Requests** tab by default on the staff requests screen.
3. Select the staff request that you want to copy.
4. Click on the  button and select **Copy**.

The screenshot displays the 'Staff Requests' dashboard. On the left, there's a sidebar with 'My Requests' selected. The main area shows a 'My Requests Breakdown' with a donut chart and a table of requests. The table has columns: Request No, Request Date, Job Title, and Department. A dropdown menu is open for the first request (1908000185), showing 'Edit', 'Copy', and 'Delete' options. The 'Copy' option is highlighted with a red box.

Request No	Request Date	Job Title	Department
1908000185	19-Aug-2019	Recruitment Ma...	Recruitment
1908000184	19-Aug-2019	Recruitment Ma...	Recruitment
1908000183	19-Aug-2019	Recruitment Ma...	Recruitment
1908000182	19-Aug-2019	Recruitment Ma...	Recruitment

A confirmation message will appear to confirm that the request was copied successfully. The copied staff request will also appear on the top of the *Your Requests* list.

- a) The copied staff request forms an exact duplicate of the original request.
- b) The *Request Date* however, will update to reflect the date in which the request was copied.

Should the staff request details for two positions be identical, the requester can move on to submitting their staff request. If changes need to be made, staff requests can also be edited.

Note:

- Copying a staff request will create a new post profile in your organisation.
- Copied staff requests can only be edited if they were not previously submitted.
- For clarification purposes, the pre-populated details provided for each section have been highlighted in the wizard. These details have been pre-populated in accordance to the configuration and the structure used the previous staff request and therefore, the pre-populated details may differ to what is shown in this guide. This is applicable for every section in the wizard.

Step 1. Position

Within the position section, the configured pre-populated mandatory & optional hierarchy information is as follows:

- Structure
- Company
- Division
- Management Unit
- Department
- Location
- Work Group
- Cost Centre

The screenshot shows the 'Edit Staff Request (1908000190)' form. The left sidebar contains a navigation menu with 7 steps: 1. Position, 2. Contract, 3. Job Details, 4. Vacancy Details, 5. Documents, 6. Advertising, and 7. Cost Allocations. The main content area is titled 'Edit Staff Request (1908000190)' and includes a breadcrumb trail: 'Manager Dashboard > Staff Requests > Edit Staff Request (1908000190)'. A red box highlights the following fields:

- Structure**: ABC Solutions
- Hierarchy**:
 - Company ***: Abc Solutions
 - Division ***: Sales & Marketing
 - Management Unit ***: Marketing
 - Department ***: M3 - Digital Marketing
- Non-hierarchy**:
 - Cost Centre**: Profit And Loss
 - Location ***: Branch Office 2
 - Work Group ***: HR2 - Compensation & Benefits

To continue the creation of the staff request:

1. Update and edit the position screen details as necessary.
2. Click **Next** to proceed to the *Job Details* screen.

Step 2. Contract

Within the *Contract Details* page, the following mandatory & optional contractual information has been pre-populated for the chosen staff request:

- Request Date
- Employee Status
- Pay Scale
- Planned Start Date
- Hours
- FTE
- Positions Required
- Contract Duration
- Planned End Date
- Budgeted indicator

4. Click **Next** to proceed to the *Job Details* screen.

Step 3. Job Details

The *Job Details* section of the staff request wizard records proposed job title details and may act as the basis of the advertised vacancy on the recruitment website, should this staff request be approved.

Within this screen, the following mandatory job-related details have been pre-populated:

- Job Title

Other optional details that have been pre-populated:

- Application Forms
- Job Category
- Job Description
- Job Title Text

Additional Info

Issues

ACTIONS

 **Note:** It is important to remember that all the highlighted mandatory / pre-populated items within the *Job Details* screen will depend on the details used on the previous staff request in question and how it has been configured.

To continue the creation of the staff request:

1. Update and edit the position screen details as necessary.
2. Click **Next** to proceed to the *Vacancy Details* screen.

Other Steps

The remaining screens of the wizard do not contain any more pre-populated details.

2.3.5. Staff Request Wizard & Existing Post Profiles

When using an existing post profile, the wizard will contain pre-populated details, relating to the post profile in question.

 **Note:** The populated or optional hierarchy items displayed will depend on the structure used within the post profile selected and how it has been configured.

In the following Post Profile, the organisational structure details have been pre-populated along with other items:

Post Profile

Post Title SD	Post Name ¹ Sales Manager	Post Number 502199	Post Status Active
Effective Date 01-Jan-1990	Post Profile Type Permanent	Managers Order	Select Option
Structure Code ² Abc Solutions	Auto Authorisation ☒	Auto Commencement ☐	

Hierarchy Definition

Company 1000	³ Abc Solutions
Division 1000	⁴ Senior Management
Management Unit SMGT	⁵ Senior Management

There are some further mandatory details that have not been pre-populated, that can be manually entered within the staff request wizard. Please refer to section [3.3.2 Staff Request Wizard & New Staff Requests](#) as these will be the same fields.

It is at your discretion whether you now want to input the further information fields within the wizard.

Repeat the process as per [3.3.2 Staff Request Wizard & New Staff Requests](#) to save and submit the staff request for approval.

2.4. Submitting Staff Requests

A staff request needs to be submitted to an approver to ensure that it gets approved and created successfully as a vacancy, that can then be published on the recruitment website.

To submit a staff request:

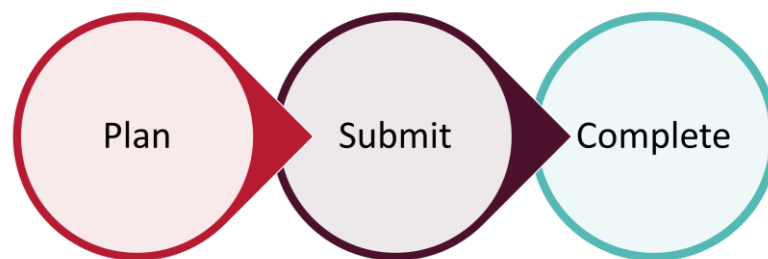

1. Navigate to *Staff Requests*.
2. Click **View** on the Staff Request widget.
This will open the *My Requests* tab by default on the staff requests screen.
3. Select a staff request that you want to submit.
4. Click on the  button and select **Edit**.
5. Select the *Summary* screen.
6. At this stage, you should review all the information provided within the *Request Summary* area to ensure that the key staff request details are correct.
You can also revise the details inputted into sections 1 - 7, should you feel it's necessary.
7. Click **Save**.
8. Click **Yes** on the confirmation popup.
9. A confirmation message will appear on screen ensuring that the request has now been sent to the relevant approvers, as per your organisations defined approval process.

2.5. Approving Staff Requests

All staff requests must have a defined approval policy in place for the workflow it has been assigned to get completed.

This approval policy is company-set and will include a series of pre-defined actions before a final decision can be made on the proposed staff request.

Note: Please refer to section [4.5 Configuring the Approval Process](#) for further detail on how to create the work flow as an administrator.

Every staff request which follows an approval process must follow the same chain of events:

1. Staff request needs to be planned by the manager.
2. Staff request needs to be submitted with full details.
3. Staff request gets completed via an approval workflow.

Every staff request must have at least one approver aligned to it. However, multiple approvers can be assigned, depending on the structure within your organisation. Approvers can be set at various levels within the organisation, for example: Head of Department, CTO, CFO, CEO etc.

2.5.1. Reviewing Staff Requests through the Notification Centre

Note: Please refer to section [3.1.1 Approving Staff Requests](#) for further detail on how to access and review items on this screen.

Within the Notification Centre, there will be an **Approve** button and a **Reject** button:

The screenshot displays the 'My Approvals' section of a user interface. At the top, there's a header with 'My Approvals' and a 'VIEW DETAILS' button. Below this, a navigation bar shows 'Actions' (with a red badge '21') and 'Updates'. The main content area is divided into two parts. On the left, a search bar is followed by a list of requests, each with a circular icon (ST, TC, MH, MP) and a date. The right part shows a detailed view of a 'Staff Request Approval Process' for 'Recruitment Admin' (ID 000145). This view includes a timestamp '19 Aug 2019 15:39', a 'Request Number' '1908000182', and a 'Request Date' '19-Aug-2019'. Below these, there are fields for 'Job Title' (HR Trainer Staff Request), 'Department' (Recruitment), 'Company' (Abc Solutions), 'Vacancy', and 'Division' (Shared Services). At the bottom right, there are two buttons: 'REJECT' (red) and 'APPROVE' (green).

To approve the request:

1. Click the **Approve** button.

A Comments box will appear for you to enter in an approval message.

This comment will be for the attention of the requester, or any further lines of approval.

2. Click **OK**

A confirmation message will appear on screen to show that the staff request has been approved.

 **Note:** If this was the final task in the approval process, the request will be fully approved and set to a status of completed. Alternatively, it may move onto the next approver / level of approval. The same steps to approve will be carried out regardless of 1 approver or multiple approvers.

2.5.2. Reviewing Staff Requests through the Staff Request Screen

To Approve or Reject the request:

1. Navigate to the *Staff Requests* widget.
2. Click **View** on the Staff Request widget.
This will open the My Requests tab by default on the staff requests screen.
3. Click the **My Approvals** tab.
4. Click the  button against the staff request due for approval.
5. Click **View Approval**.
6. Select the **Summary** section and click **Actions**.

Within this button, there are 3 options:

- Approve
- Reject
- Print Preview

To approve:

- a. Click the **Approve** option.
- b. The *Approval Details* box appears which prompts you to enter in comments to confirm this approval.
- c. Click **OK**

A confirmation message appears to show the approval has been successful.

**Note:**

- If the approval policy within your organisation only has one allocated approver, the role is now fully approved and a linked appointment in Recruitment is created.
- However, if multiple approvers are allocated to the staff request, the process moves onto the second level approver's review.

Within the *Summary* section there is also an *Approval History* table which outlines the following items:

Item	Explanation
Date	This is the date that an action was carried out i.e. Request Date, Approval Date etc.
Person	This is the user that has carried out the action i.e. Manager, Approver etc.
Action	This is the action that was carried out i.e. Submitted, Approved, Rejected etc.
Comments	These are the comments that were inputted at each stage of the workflow process

**Note:**

- Repeat this process for requests that are to be Rejected.
- Once a request has been rejected by any one approver, it will go no further in the recruitment process.
- This is regardless of how many previous approvals it may have already received.

2.6. Editing Staff Requests

If required, the requester can make edits to the staff request, providing the request is still in a status of saved/planned.

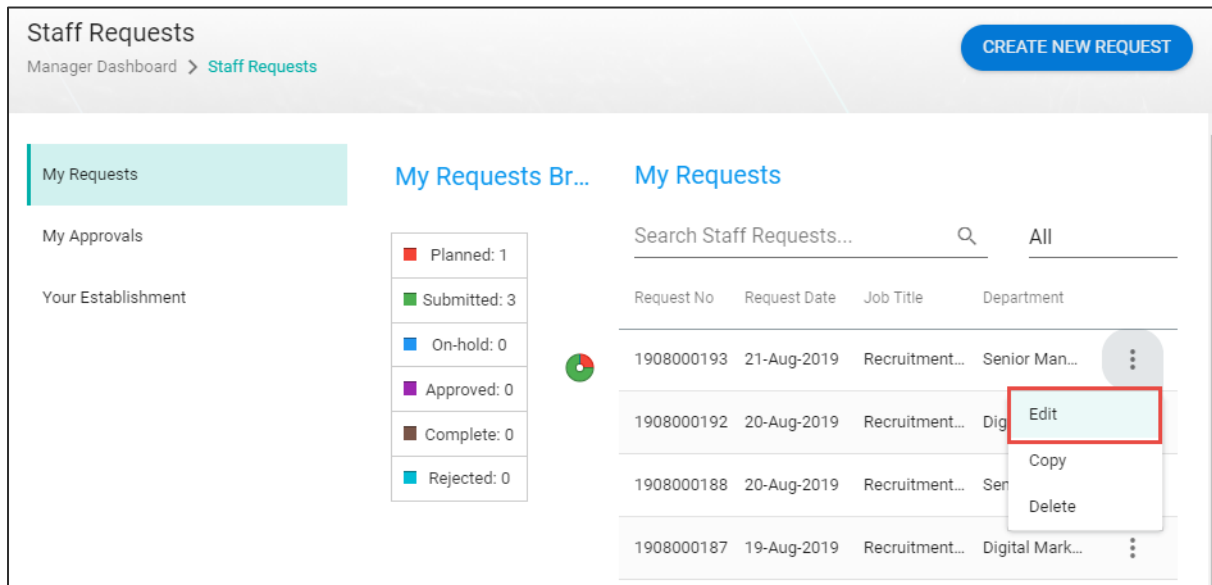

Note: Once a staff request has been submitted, no changes can be made.

To edit a staff request:

1. Navigate to the *Staff Requests* widget.
2. Click **View** on the Staff Request widget.

This will open the My Requests tab by default on the staff requests screen.

3. Click the  button against the staff request that needs to be edited
4. Select **Edit**.

- This will automatically open up the staff request wizard, which was populated by you previously. However, this time it will act as the *Edit Request* wizard, where multiple changes can be made to the original staff request.
 - Edits can be made to each step as required. All field text boxes and drop-down menus are fully accessible for the requester to make their edits
5. Click **Save** on the summary screen once happy with the new details

2.7. Deleting Staff Requests

If the staff request is no longer required within the organisation, it is possible for managers or recruitment administrators to delete the request permanently from the system.

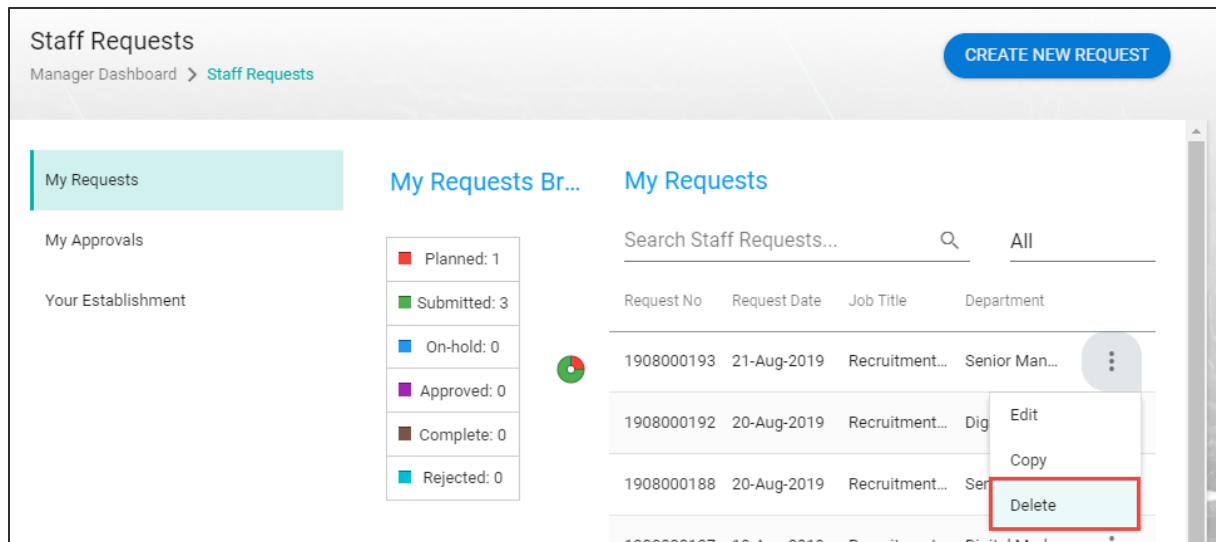

Note: Once a staff request has been submitted, it is not possible for the requester to delete it thereafter.

To delete a staff request:

1. Navigate to the *Staff Requests* widget.
2. Click **View** on the Staff Request widget.

This will open the My Requests tab by default on the staff requests screen.

3. Click the  button against the staff request that needs to be deleted.
4. Select **Delete**.

5. A confirmation box will appear asking if you are sure you want to delete. Click **Yes**.
The staff request has now been deleted from the system and is no longer available.

2.8. Vacancy Created from Approved Staff Request

2.8.1. Linked Appointment

Once a staff request is approved, a vacancy reflecting the staff request details is automatically created within Recruitment. Upon approval, a linked appointment is also created. This is the contract that will be awarded to the successful candidate.

To review the Linked Appointment / Contract:

1. Go to the *Recruitment Dashboard*.
2. Open the *Vacancies* tab.
3. Search for the newly approved vacancy.
4. Click **Actions** and select **Edit Vacancy**.
5. Go to the *Vacancy Details -1* tab.
6. Click **Actions** and select **Linked Appointments**.

You will see the linked appointment based on the post profile from the approved staff request.

Linked Appointments					
Recruitment > Vacancy Details: 001765 - IT Support Manager > Linked Appointments					
Post* ▼		Sequence* ▼		ADD	
Appointment	Description	Department	Planned Start ...	Planned End D...	
502250-1	It Support Manager	Technical Support	13-Jun-16	09-Jun-17	REMOVE

2.8.2. Vacancy Details Auto-Populated

The details that were used to populate the staff request form are carried across to the new vacancy details pages. Therefore, recruitment administrators will not have to re-enter the same details already provided in the staff request.

Details carried over to the vacancy include:

Vacancy Details-1

- Job Description
- No. Positions
- Currently Status i.e. Open, On-Hold, Closed etc.
- Recruitment Open date
- Application form details

See screenshot below which highlights these details:

3. Non-Post Management Staff Requests

For non-post management organisations, the configuring and day-to-day use of staff requests is the same as post management organisations. The only difference is the appearance of the *Your Establishment* section on the staff request screen.

Access to this section within the staff requests screen should be removed as it is not applicable for non-post management clients, and should therefore be ignored. If you have any queries on this, please contact PeopleXD.

The following menu profile controls access to this screen:

System	Menu Option	Explanation
CorePortal	Staff Requests Your Establishment Tab	This gives access to the Your Establishment tab. This lists out all the post profiles from People Management that you have access to view and create a staff request from.

4. Configuring Staff Requests

4.1. Menu Options

You can add this widget to an existing tab on a dashboard or create a new one if required.

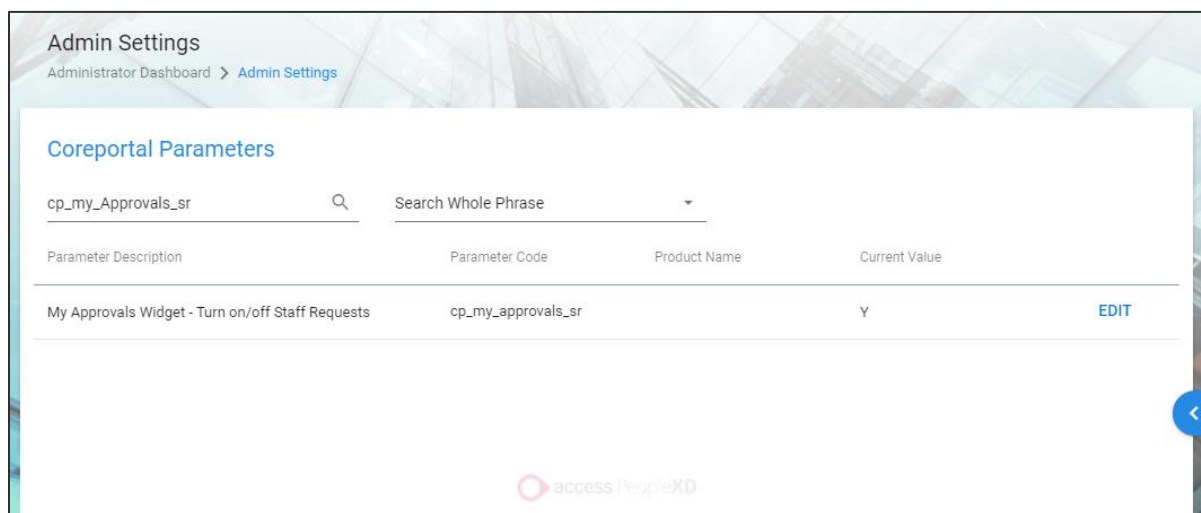

The following menu options will give access to the staff requests features:

System	Menu Option
CorePortal	Create New Staff Request
CorePortal	Staff Requests Your Establishment Tab
CorePortal	Staff Request Contract (Contract Details)
CorePortal	Staff Request Contract (Payment Details)
CorePortal	Staff Request Contract (Personal Details)
CorePortal	Staff Request Contract (Questionnaire Details)
CorePortal	Staff Request Contract (Submit Details)
CorePortal	Staff Request Contract Request Person Details
CorePortal	Staff Request Contract Create Approved Request

4.2. Staff Request Approval Notifications

To ensure that Staff Requests appear to approvers on the *My Approval Notifications* widget, follow the below steps:

1. Quick jump to the *Site Manager* widget.
2. Select **Open** for Admin Settings.
3. Search for the parameter code: cp_my_approvals_sr.
4. Ensure this parameter value is set to "Y", which allows staff request approvals to be shown on the *My Approvals Notification* widget.
5. Click **OK** to save.

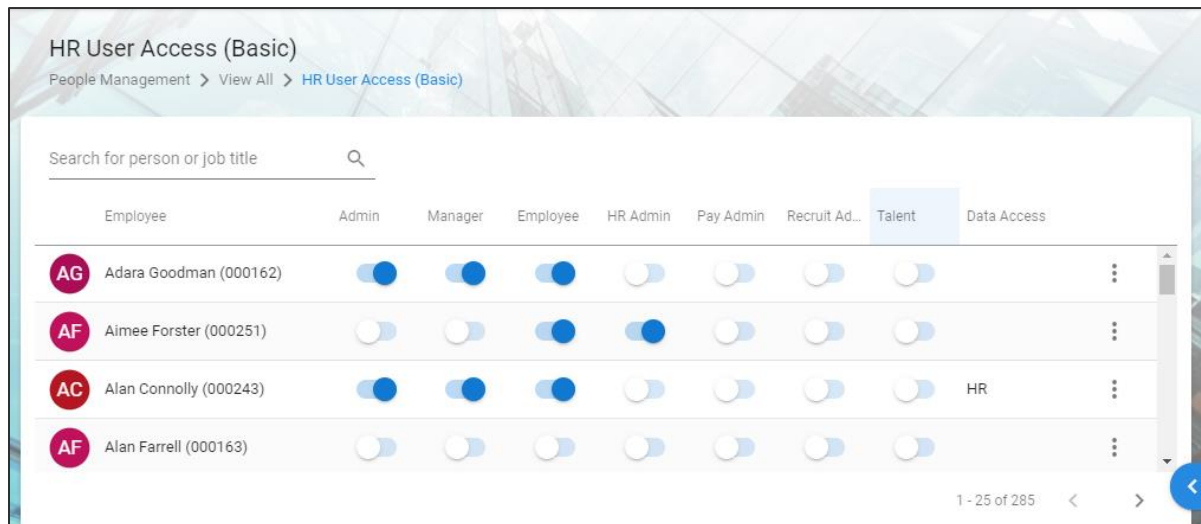

4.3. Accessing Post Profile Data

The *Your Establishment* tab on the staff request screen displays all of the active post profiles currently accounted for within the organisation. A manager's access can be managed via data access in the system, to control what data results appear on this screen.

Post No	Department	Pay Scale	Post FTE	Active FTE	Employee Name
502192	Technical	Personal Ra...	1	3	Multiple Records
502194	**Do Not Us...	Personal Ra...	1	0	
502195	**Do Not Us...	Personal Ra...	3	3	Multiple Records
502196	Ceo	Personal Ra...	1	3	Multiple Records
502197	Senior Mana...	Personal Ra...	1	10	Multiple Records
502198	Senior Mana...	Personal Ra...	1	2	Multiple Records

To manage user data access on People Management:

1. Navigate to the *Data Centre* widget.
2. Click **Open** for *People Management*.
3. Search for *HR User Access (Basic)* and click on the corresponding option.
4. The *Data Security Access* screen opens. This screen provides a summary at a glance of the user's current access:
 - a. If they have data access, this will appear in the Data Access column.
 - b. HR indicates access to data for employees, contracts and posts.
 - c. Pay indicates access to salary and allowance data.

Note: This screen provides a list of employees on PeopleXD.

- Access is not restricted – all employees will appear here.
- Users will have access to their own record here, even if the parameter is enabled to hide their actual employee HR record on the *Command Centre > Employee* screen widget.

To grant access to HR data:

1. Search for the employee on the *HR User Access (Basic)* screen.
2. In the relevant employee row, click on the  button and then click **HR Admin**.
This opens the *Administrator Access* screen
3. Select the *Structure Code* dropdown on the *HR Admin* tab.
4. If more than 1 Org Structure exists on PeopleXD for an organisation, it is vital to select the correct one here. If only 1 exists, select it.
5. The *Structure Level* drop down list will appear.
 - a. The levels displayed here will reflect the levels that have the *Hierarchy Indicator* enabled on the Org Structure definition.

Administrator Access

People Management > View All > HR User Access (Basic) > Administrator Access

DC Declan Carey (000194), Budget Analyst, Budget

HR Admin Pay Admin Recruit Admin

Structure Code: Abc Solutions Structure Level: Company

Search

Field Active

Abc Solutions

DESELECT ALL

6. Select a level from the drop-down e.g. *Company*.
 - a. The window expands to include a list of all the active org units for the chosen level e.g. if *Company* is selected, this will be a list of companies, if *Department* is selected this will be a list of departments.
 - b. Select the indicator for the Org Unit.
7. Use **Enable All** to select all org units on screen.
8. Changes to the user access settings are automatically saved.

Note: If access is enabled at the top level of the structure, this provides full access to all units beneath. If access is required for only specific sub units, ensure that:

- the org unit at the top level is not enabled.
- the correct level is selected on the *Structure Level* drop down list.
- only the required units are enabled for the selected level

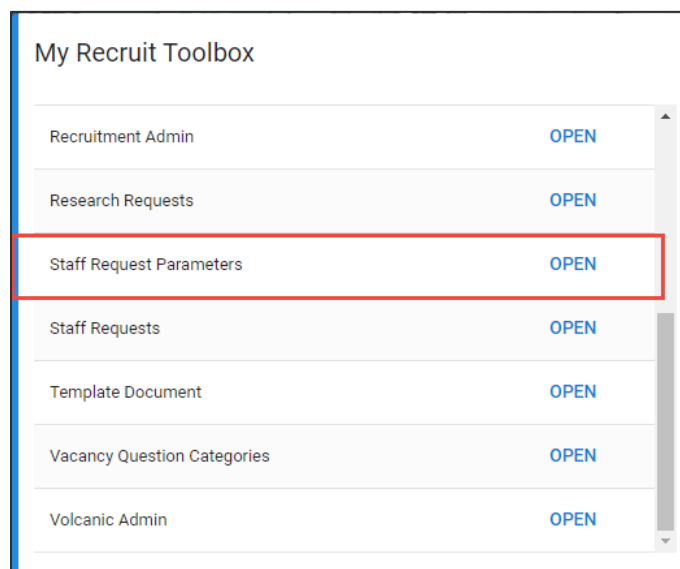

On returning to the *Data Security Access* screen, the *Data Access* column will display a label of *HR*, indicating that this employee has been granted access to see HR data on the system (employees, contracts & posts).

4.4. Staff Request Parameters

4.4.1. Accessing the Staff Requests Parameters

The menu option below gives access to the *Staff Request Parameters* screen on the Recruitment *Toolbox* tab on the *Recruitment* dashboard. This is required to allow users to configure field options/parameters relating to staff requests.

System	Menu Option
CorePortal	Staff Requests - Parameters

4.4.2. Updating Staff Request Parameters

There are a number of parameters that relate to the customisation of the staff request process.

To update these:

1. Navigate to *My Recruit Toolbox*
2. Click **Open** for the Staff Request Parameters option.

This will open the Staff Request Parameters screen which is broken into two tabs:

- a. Parameters
- b. Field Options

Staff Request Parameters

Recruitment > Staff Request Parameters

Parameters Field Options

Search

Parameter Name	Status
Online Staff Requests: Hide Advertising Publications and Comments	☒

SAVE

Note: These settings / parameters lists are inclusive of all the staff request parameters available and enabling / disabling these parameters will affect your system.

Parameters

The following table outlines all items which can be amended for staff requests. The majority of these allow you to update the configuration of the staff request form.

Parameter	Explanation
Online Staff Requests: Hide Advertising Publications and Comments	This controls the display of the <i>Comments</i> box within the <i>Advertising</i> section of the staff request form.
Online Staff Requests: Hide Charges for External Advertising	This controls the display of the <i>Charges for External Advertising</i> table within the <i>Advertising</i> section of the staff request form.
Online Staff Requests: Hide Other Information	This controls the display of the following fields within the <i>Vacancy Details</i> step of the staff request: • Org. Unit • Grade • Contact Person • Email • Telephone
Online Staff Requests: Hide Date To on Cost Allocations	This controls the display of the <i>Cost From</i> date within the <i>Cost Allocation</i> screen.
Online Staff Requests: Hide Funding Source on Advertising Details	This controls the display of the <i>Funding Source</i> option on the <i>Charges for External Advertising</i> table.
Online Staff Requests: Force all Cost Allocation fields as mandatory	This controls the mandatory fields within the <i>Cost Allocations</i> table. When enabled, every column within the table will become mandatory. i.e. details of <i>Cost Centre</i> , <i>Project</i> , <i>Expense</i> , <i>Date From</i> , <i>Date to</i> and <i>Percentage</i> .
Online Staff Requests: Force all Advertising Details fields as mandatory	This controls the mandatory fields within the <i>External Advertising Grid</i> on the <i>Advertising</i> section. When enabled, if one of the columns within the advertising grid contains a value, then that entire row must also be completed.

Parameter	Explanation
Online Staff Requests: Use Job Title Text as Competition Description	When enabled, the <i>Job Title Text</i> entered in the <i>Job Details</i> section of the staff request form will carry across to form the <i>Description</i> value within the <i>Vacancy Details - 1</i> page on the vacancy.
Online Staff Requests: My Requests by Organisational Role	When enabled, the staff request details displayed on the <i>Your Requests</i> screen, reflect only those which you have raised personally. When disabled, the <i>Your Request</i> screen shows all the requests that were made by employees with the same organisational role as you.
Online Staff Requests: Cost Allocations Mandatory	When enabled, you must specify at least one <i>Cost Allocation</i> entry relating to the staff request within the <i>Cost Allocations</i> table.
Online Staff Requests: Hide Advertising Details	When enabled, the <i>Advertising</i> section of the staff request form will not display.
Online Staff Requests: Use Job Category/Title Linking	When enabled, the <i>Job Title</i> dropdown list, within the <i>Job Details</i> section of the staff request, will only display relevant job titles that correspond with the <i>Job Category</i> value, previously entered within the same screen. When disabled, the requester has the freedom to select from an unlimited list of job titles. i.e., the job category value is not considered.
Requester Funding Active	When enabled, funding sections become available within the <i>Advertising</i> screen.
Online Staff Requests: Restrict Job Title List based on Department	When enabled, the Job Title dropdown list, within the <i>Job Details</i> section of the staff request, will only display relevant job titles that correspond with the <i>department</i> value, previously entered within the <i>Position</i> section. When disabled, the requester has the freedom to select from an unlimited list of job titles. i.e., the department value is not considered. Note, this parameter cannot be used if the Job Title / Category listing parameter is also enabled.
Online Staff Requests: Cost Allocations Active	When enabled, cost allocations will display on the staff request form.

Parameter	Explanation
Online Staff Requests: Cost Allocations by Project	When enabled, the <i>Project</i> box of the cost allocations table will display first. When disabled, the <i>Cost Centre</i> field will appear first.
Online Staff Requests: Assigned Cost Allocations to Post Profile	When enabled, the <i>Cost Allocation</i> field will be linked to the chosen post profile for all future staff requests. When disabled, cost allocations will be assigned on an individual post profile basis.
Online Staff Requests: Assigned Cost Allocations to Post Appointment	When enabled, an approved staff request will result in a new appointment being created. The cost allocations specified on the staff request will also be assigned to the appointment created. When disabled, cost allocations are not linked with the approved post appointment.
Online Staff Requests: Assigned Post Appointments to Competition	When enabled, the approved post appointment is linked to the vacancy automatically.
Automatically create post profile, post appointments and vacancy link	When enabled, once a staff request has been fully approved, the system will create a new post profile record, a new post appointment and a vacancy.
Automatically create and authorise vacancy on staff approval	When enabled, once the staff request has been fully approved, it is automatically updated to a status of complete and a vacancy is created.

Note:

- The *Online Staff Requests: Additional Staff Request Validation* parameter is not a standard feature, and can only be configured with the help of PeopleXD project team.
 - If you have custom rules relating to your staff request process, this parameter controls the validation required for these.
 - For example, planned end date(s) needed to be populated for all fixed term contacts.
- The *Organisation Role Based (multi approval)* parameter is recommended by PeopleXD to be enabled.
 - When enabled, any member of the same chosen organisational role has the authority to approve staff requests.
- The *Automatically create post profile, post appointments and vacancy link* parameter is recommended by PeopleXD to review upon initial configuration.
 - While it will link the appointment to the vacancy automatically, it creates a new post profile record.
 - For example, if you are adhering to *Post Management Lite* (i.e. limited post profile numbers), then you may not allow the creation of post profiles on the completion of a staff request approval process.
- The *Automatically create and authorise vacancy on staff approval* parameter is recommended by PeopleXD to review upon initial configuration.
 - This allows the vacancy to be automatically authorised which removes the need to update the vacancy with an authorised date. This will already be populated with the date the staff request was approved on.
 - Once authorised (along with other additional items), the vacancy will be available to be seen on the recruitment website.

Field Options tab

The staff request form and corresponding wizard can be tailored as per your organisation's needs.

Note: These field options are global settings and will affect all new, current, and historic staff request forms. There is only one staff request form for all managers and vacancies.

The table outlines the options that can be set against the different field options on screen:

Parameter	Explanation
Mandatory	This option must be supplied on the staff request form.
Hidden	This option will not be included as a field option on the staff request form.
Initial Value	This defaults the option on the staff request to a value that you can set.
Code-Desc Or Desc-Code	This links to the format of the field options in terms of Desc-Code or Code-Desc. This refers to the code and description of the reference data on the staff request form.
Display Only	This will show the field option as a read only field on the staff request form.
Label	Update the text of the label for the field. Max character length is 80 characters.

4.5. Approval Configuration

The approval process for staff requests is based on a standard PeopleXD workflow process, created using organisational roles, tasks, and levels of approval.

A workflow will be made available by default as part of baseline configuration. However, this workflow can be updated or added to, in order to reflect your organisation's specific approval requirement.

For example, you may require an additional level of approver than what the standard workflow will provide.

4.5.1. Viewing the Work Flow

To create and update the tasks in the approval process, follow the below steps:

1. On the People Management dashboard, navigate to the Data Centre widget.
2. Open HR Admin Setup Settings.
3. Select **HR Process Configuration**.
4. Select **Staff Requests** from the *Process Category* drop-down box.
5. Click **Search**.

This returns all Processes that have been created for Staff Requests in PeopleXD.

Hr Process Configuration
People Management > HR Admin Setup Settings > Hr Process Configuration

Search

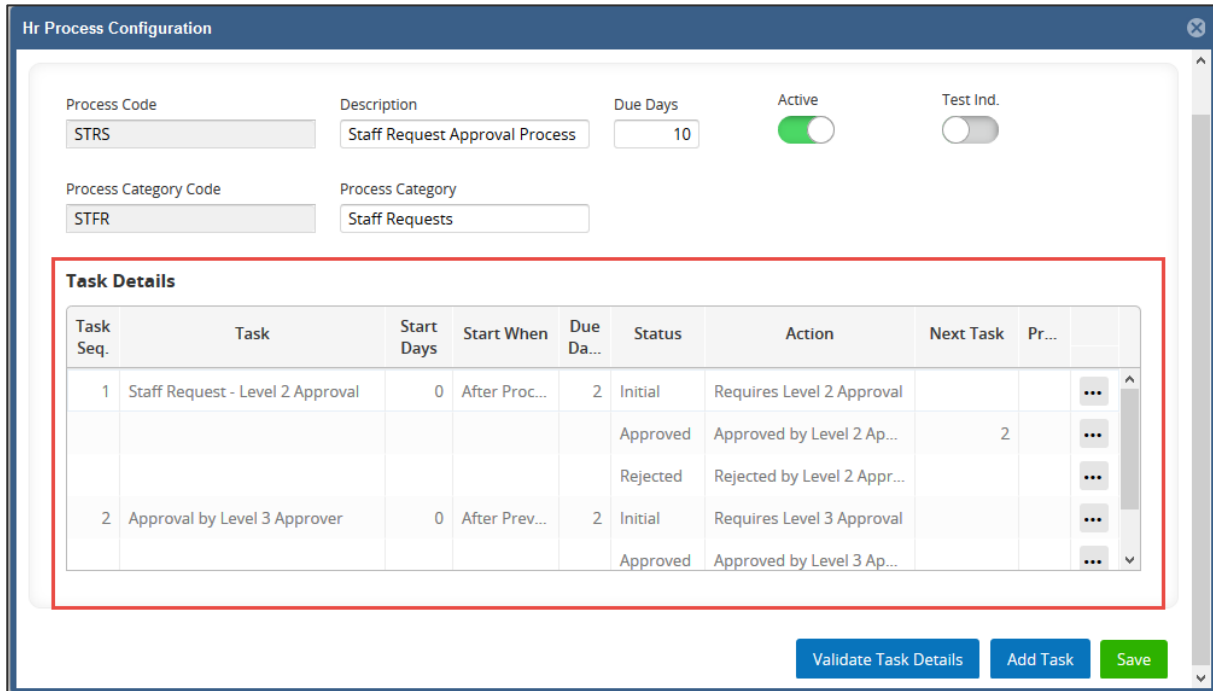

Process Description:
Process Category:

Task Details

Process Code	Description	Process Category	Active	
STRS	Staff Request Approval Process	Staff Requests	☒	...

6. Click the  button and select **Edit** to open the *Task Details* screen.

This shows the standard workflow in place for staff requests as per baseline configuration.

The screenshot shows the 'Hr Process Configuration' window. It contains several input fields for process configuration and a 'Task Details' table. The 'Task Details' table is highlighted with a red border.

Task Seq.	Task	Start Days	Start When	Due Da...	Status	Action	Next Task	Pr...
1	Staff Request - Level 2 Approval	0	After Proc...	2	Initial	Requires Level 2 Approval		
					Approved	Approved by Level 2 Ap...	2	
					Rejected	Rejected by Level 2 Appr...		
2	Approval by Level 3 Approver	0	After Prev...	2	Initial	Requires Level 3 Approval		
					Approved	Approved by Level 3 Ap...		

Buttons at the bottom: Validate Task Details, Add Task, Save.

The following table outlines the items that are found on screen:

Item	Explanation
Process Category Code	This is the Code created for the overall staff request approval process category.
Process Category	This is the name of the Process Category.
Process Code	This is the Code created against each individual process within the Staff Request process category.
Description	This is the name of the individual process within the Staff Request process category.
Due Days	This is the number of days that it should take to complete the process i.e. If Due Days = 10, and if the work flow is not complete by 10 days, the process will be marked as overdue.
Active Ind	This means that this process is active and is ready to be used in a live scenario.
Test Ind	This means that this process is currently in configuration and testing.

Item	Explanation
Task Seq.	This is the number of a sequence of events that must be completed in order for the next task to be completed / approved.
Task	This is the name of the task in question.
Start Days	This is the number of days which is linked to the Start Days Type option.
Start Days Type	a. After Process Start Date. b. After Process Due Date. c. Before Process Due Date.
Status	The status / point of the work flow that this task has been created against.
Action	This is the name of the task and is to be carried out / approved / rejected.
Next Task	This gives visibility of the next task that is due according to the Task Sequence.

4.5.2. Editing the Work Flow

To edit the workflow for a Staff Request:

1. Follow steps in section [4.5.1 Viewing the Work Flow](#) to access the *Task Details* screen.
2. Click the  button and select **View/Edit Task**.

3. In the *Task Detail* screen, you can make edits to the task detail and task status i.e. the duration of the staff request process and the individual actions involved.
4. To edit task specific configuration, click on the  button against a task.

Message: Staff Request - <<JOB_TITLE_NAME>> - <<JOB_DESCRIPTION>>
<<REQUEST_NO>>, <<JOB_TITLE_NAME>> from <<DEPARTMENT_NAME>> in
<<MANAGEMENT_UNIT_NAME>> has been requested and requires authorisation by you as Level 2
Approver. Could you log onto Manager self service and either approve or reject the request above within 2
days.
You can approve/reject in Portal - Approvals

Additional Update Action:

Cancel Delete Save

Changes can be made here to the notification process, i.e., who will receive the notification of the staff request. Edits can also be made to the notification message that they will receive.

4.5.3. Assigning Approvers

In Portal, assigning approval access for staff requests is controlled by organisational role management. This setup must be carried out for all employees that will be approving Staff Requests at all levels.

Note: The creation and amendment of Organisational Roles is explained in detail in the People Management *Configuring Organisational Roles* user guide.

4.6. Additional Configuration Items:

In Back Office, there are additional elements to staff request configuration.

Note: These parameters / settings are part of baseline configuration and should not be amended without the input and advice from PeopleXD.

1. Go to *PeopleXD Back Office > CorePersonnel > Recruitment > Reference > Recruitment Parameters*.
2. Select the *Staff Request Parameters* tab.

The following table outlines the additional options available on this screen:

Item	Explanation
Creator Role	This can be used to only allow users with a specific organisational role to create a staff request. Otherwise, if a user has access to the staff request screen in portal, they can raise a staff request regardless of their organisational role.
Restriction Active	This needs to be selected if the <i>Creator Role</i> parameter is being used. If it is not active, <i>Restriction Active</i> should always be switched off.
Allow Creation of Vacancy Without Full Approval	Legacy Option.
Reject Staff Request	Legacy Option.
